(4.) The ordinary outer garment consisted of a quadrangular piece of woolen cloth, probably resembling in shape a Scotch plaid. The size and texture would vary with the means of the wearer. The Hebrew terms referring to it are — *simlâh* (שִׂמְלָה, occasionally שַׂלְמָה), which appears to have had the broadest sense, and sometimes is put for clothes generally (Gen. xxxv. 2, xxxvii. 34; Ex iii. 22, xxii. 9; Deut. x. 18; Is. iii. 7, iv. 1), though once used specifically of the warrior's cloak (Is. ix. 5); *beged* (בֶּגֶד), which is more usual in speaking of robes of a handsome and substantial character (Gen. xxvii. 15, xli. 42; Ex. xxviii. 2; 1 K. xxii. 10; 2 Chr. xviii. 9; Is. lxiii. 1); *cesûth* (כְּסוּת), appropriate to passages where covering or protection is the prominent idea (Ex. xxii. 26; Job xxvi. 6, xxxi. 19); and lastly *lebûsh* (לְבוּשׁ), usual in poetry, but specially applied to a warrior's cloak (2 Sam. xx. 8), priests' vestments (2 K. x 22), and royal apparel (Esth. vi. 11, viii. 15). A cognate term (*malbûsh* (מַלְבּוּשׁ) describes specifically a state-dress, whether as used in a royal household (1 K. x. 5; 2 Chr. ix. 4), or for religious festivals (2 K. x. 22): elsewhere it is used generally for robes of a handsome character (Job xxvii. 16; Is. lxiii. 3; Ez. xvi. 13; Zeph. i. 8). Another

Digitized by Google

term, *mad* (מַד), with its derivatives מִדָּה (Ps. xxxiii. 2), and מְדֻי (2 Sam. x. 4; 1 Chr. xix. 4), is expressive of the *length* of the Hebrew garments (1 Sam. iv. 12, xviii. 4), and is specifically applied to a long cloak (Judg. iii. 16; 2 Sam. xx. 8), and to the priest's coat (Lev. vi. 10). The Greek terms ἱμάτιον and στολή express the corresponding idea, the latter being specially appropriate to robes of more than ordinary grandeur (1 Macc. x. 21, xiv. 9; Mark xii. 38, xvi. 5; Luke xv. 22, xx. 46; Rev. vi. 11, vii. 9, 13); the χιτών and ἱμάτιον (*tunica, pallium*, Vulg.; *coat, cloak*, A. V.) are brought into juxtaposition in Matt. v. 40 and Acts ix. 39. The *beged* might be worn in various ways, either wrapped round the body, or worn over the shoulders, like a shawl, with the ends or "skirts" (כְּנָפַיִם: πτερύγια: *anguli*) hanging down in front; or it might be thrown over the head, so as to conceal the

Figs. 4, 5. Egyptians of the lower orders. (Lane.)

face (2 Sam. xv. 30; Esth. vi. 12). The ends were skirted with a fringe and bound with a dark purple ribbon (Num. xv. 38). It was confined at the waist by a girdle, and the fold (חֵיק: κόλπος: *sinus*), formed by the overlapping of the robe, served as a pocket in which a considerable quantity of articles might be carried (2 K. iv. 39; Ps. lxxix. 12; Hag. ii. 12; Niebuhr, *Description*, p. 56), or as a purse (Prov. xvii. 23, xxi. 14; Is. lxv. 6, 7; Jer. xxxii. 18; Luke vi. 38).

The ordinary mode of wearing the outer robe, called *abba* or *abáyeh*, at the present time, is exhibited in figs. 2 and 5. The arms, when falling down, are completely covered by it, as in fig. 5: but in holding any weapon, or in active work, the lower part of the arm is exposed, as in fig. 2.

The dress of the women differed from that of the men in regard to the outer garment, the *cethoneth* being worn equally by both sexes (Cant. v. 3). The names of their distinctive robes were as follows: — (1) *mitpachath* (מִטְפַּחַת: περίζωμα: *pallium, linteamen: veil, wimple*, A. V.), a kind of shawl (Ruth iii. 15; Is. iii. 22); (2) *ma'atáphâh* (מַעֲטָפָה: *palliolum: mantle*, A. V.), another kind of shawl (Is. iii. 22), but how differing from the one just mentioned, we know not; the etymological meaning of the first name is *expansion*, of the second, *enveloping*: (3) *tsá'îph* (צָעִיף: θέριστρον: *veil*, A. V.), a robe worn by Rebecca on approaching Isaac (Gen. xxiv. 65), and by Tamar when she assumed the guise of a harlot (Gen. xxxviii. 14, 19); it was probably, as the LXX. represents it, a light summer dress of handsome appearance (περιέβαλε τὸ θέριστρον καὶ ἐκαλλωπίσατο, Gen. xxxviii. 14), and of ample dimensions, so that it might be thrown over the head at pleasure; (4) *rádîd* (רָדִיד: A. V. "veil"), a similar robe (Is. iii. 23; Cant. v. 7), and substituted for the *tsá'îph* in the Chaldee version: we

Fig. 6. An Egyptian Woman. (Lane.)

may conceive of these robes as resembling the *peplum* of the Greeks, which might be worn over the head, as represented in *Dict. of Ant.* p. 885, or again as resembling the *habarah* and *mildyeh* of the modern Egyptians (Lane, i. 73, 75); (5) *pethîgil* (פְּתִיגִיל: χιτὼν μεσοπόρφυρος: *stomacher*, A. V.), a term of doubtful origin, but probably significant of a gay holiday dress (Is. iii. 24); to the various explanations enumerated by Gesenius (*Thes.* p. 1137), we may add one proposed by Saalschütz (*Archäol.* i. 31), פֶּתִי, *wide* or *foolish*, and גִּיל, *pleasure*, in which case it = *unbridled pleasure*, and has no reference to dress at all; (6) *gilyônim* (גִּלְיֹנִים, Is. iii. 23), also a doubtful word, explained in the LXX. as a transparent dress, *i. e.* of gauze (διαφανῆ Λακωνικά); Schroeder (*de Vest. Mul. Heb.* p. 311) supports this view, but more probably the word means, as in the A. V., *glasses*. The garments of females were terminated by an ample border or fringe (שׁוּל, שֻׁלַּי: ὀπίσθια: *skirts*), which concealed the feet (Is. xlvii. 2; Jer. xiii. 22).

Figs. 6 and 7 illustrate some of the peculiarities of female dress: the former is an Egyptian woman (in her walking dress): the latter represents a dress probably of great antiquity, still worn by the peasants in the south of Egypt: the outer robe, or *hulaleeyeh*, is a large piece of woolen stuff wound

Digitized by Google

round the body, the upper parts being attached at the shoulders: another piece of the same stuff is used for the head-veil, or *tarhah*.

fig. 7. A woman of the southern province of Upper Egypt. (Lane.)

Having now completed our description of Hebrew dress, we add a few remarks relative to the selection of equivalent terms in our own language. It must at once strike every Biblical student as a great defect in our Authorized Version that the same English word should represent various Hebrew words; *e. g.* that "veil" should be promiscuously used for *rádíd* (Is. iii. 23), *tsá'iph* (Gen. xxiv. 65), *mitpachath* (Ruth iii. 15), *masveh* (Ex. xxxiv. 33): "robe" for *me'il* (1 Sam. xviii. 4), *cethoneth* (Is. xxii. 21), *addereth* (Jon. iii. 6), *salmâh* (Mic. ii. 8): "mantle" for *me'il* (1 Sam. xv. 27), *addereth* (1 K. xix. 13), *ma'atâphâh* (Is. iii. 22); and "coat" for *me'il* (1 Sam. ii. 19), *cethoneth* (Gen. iii. 21): and conversely that different English words should be promiscuously used for the same Hebrew one, as *me'il* is translated "coat," "robe," "mantle;" *addereth* "robe," "mantle." Uniformity would be desirable, in as far as it can be attained, so that the English reader might understand that the same Hebrew term occurred in the original text, where the same English term was found in the translation. Beyond uniformity, correctness of translation would also be desirable: the difficulty of attaining this in the subject of dress, with regard to which the customs and associations are so widely at variance in our own country and in the East, is very great. Take, for instance, the *cethoneth*: at once an undergarment, and yet not unfrequently worn without anything over it: a *shirt*, as being worn next the skin; and a *coat*, as being the upper garment worn in a house: deprive the Hebrew of his *cethoneth*, and he was positively naked; deprive the Englishman of his *coat*, and he has under-garments still. The *beged* again: in shape probably like a Scotch *plaid*, but the use of such a term would be unintelligible to the minds of English peasantry: in use unlike any garment with which we are familiar, for we only wear a *great-coat* or a *cloak* in bad weather, whereas the Hebrew and his *beged* were inseparable. With such difficulties attending the subject, any attempt to render the Hebrew terms must be, more or less, a *compromise* between correctness and modern usage; and the English terms which we are about to propose must be regarded merely in the light of suggestions. *Cethoneth* answers in many respects to "frock:" the sailor's "frock" is constantly worn next the skin, and either with or without a coat over it; the "smock-frock" is familiar to us as an upper garment, and still as a kind of undress. In shape and material these correspond with *cethoneth*, and like it, the term "frock" is applied to both sexes. In the sacerdotal dress a more technical term might be used: "vestment," in its specific sense as = the chasuble, or *casula*, would represent it very aptly. *Me'il* may perhaps be best rendered "gown," for this too applies to both sexes, and, when to men, always in an official sense, as the academic gown, the alderman's gown, the barrister's gown, just as *me'il* appears to have represented an official, or, at all events, a special dress. In sacerdotal dress "alb" exactly meets it, and retains still, in the Greek church, the very name, *ποδήρης*, by which the *me'il* is described in the LXX. The sacerdotal ephod approaches, perhaps, most nearly to the term "pall," the *ὠμοφόριον* of the Greek church, which we may compare with the *ἐπωμίς* of the LXX. *Addereth* answers in several respects to "pelisse," although this term is now applied almost exclusively to female dress. *Sâdîn* = "linen wrapper." *Simlâh* we would render "garment," and in the plural "clothes," as the broadest term of the kind; *beged*, "vestment," as being of superior quality; *lebûsh*, "robe," as still superior; *mad*, "cloak," as being long; and *malbûsh*, "dress," in the specific sense in which the term is not unfrequently used as = *fine* dress. In female costume *mitpachath* might be rendered "shawl," *ma'atâphâh* "mantle," *tsá'iph* "handsome dress," *rádíd* "cloak."

In addition to these terms, which we have thus far extracted from the Bible, we have in the Talmudical writers an entirely new nomenclature. The *talith* [*tallith* or *tallèth*] (טלית) is frequently noticed; it was made of fine linen, and had a fringe attached to it, like the *beged;* it was of ample dimensions, so that the head might be enveloped in it, as was usual among the Jews in the act of prayer. The *kólbin* (קולבין) was probably another name for the *talith*, derived from the Greek κολόβιον; Epiphanius (i. 15) represents the στολαί of the Pharisees as identical with the *Dalmatica* or the *Colobium;* the latter, as known to us, was a close tunic without sleeves. The *châlûk* (חלוק) was a woolen shirt, worn as an under tunic. The *mactóren* (מקטורן) was a mantle or outer garment (cf. Lightfoot, *Exercitations* on Matt. v. 40; Mark xiv. 51; Luke ix. 3, &c.) Gloves (קסיה or כף) are also noticed (*Celim*, xvi. 6, xxiv. 15, xxvi. 3), not, however, as worn for luxury, but for the protection of the hands in manual labor.

With regard to other articles of dress, see Girdle; Handkerchief; Headdress; Hem of Garment; Sandals; Shoes; Veil.

The dresses of foreign nations are occasionally referred to in the Bible; that of the Persians is described in Dan. iii. 21 in terms which have been variously understood, but which may be identified with the statements of Herodotus (i. 195, vii. 61) in the following manner: — (1) The *sarâbâlis*

Digitized by Google

סַרְבָּלִין: A. V. "coats") = *ἀναξυρίδες* or *trousers*, which were the distinctive feature in the Persian as compared with the Hebrew dress; (2) the *pattîsh* (פַּטִּישׁ: A. V. "hosen") = *κιθὼν ποδηνεκὴς λίνεος* or inner tunic; (3) the *carbelâ* (כָּרְבְּלָא: A. V. "hat") = *ἄλλος εἰρίνεος κιθών* or upper tunic, corresponding to the *me'îl* of the Hebrews; (4) the *lebûsh* (לְבוּשׁ: A. V. "garment") = *χλανίδιον λευκόν* or cloak, which was worn, like the *beged*, over all. In addition to these terms, we have notice of a robe of state of fine linen, *tacrîc* (תַּכְרִיךְ): *διάδημα*: *sericum pallium*), so called from its ample dimensions (Esth. viii. 15). The same expression is used in the Chaldee for *purple garments* in Ez. xxvii. 16.

The references to Greek or Roman dress are few: the *χλαμύς* (2 Macc. xii. 35; Matt. xxvii. 28) was either the *paludamentum*, the military scarf of the Roman soldiery, or the Greek *chlamys* itself, which was introduced under the Emperors (*Dict. of Ant.* art. *Chlamys*); it was especially worn by officers. The travelling *cloak* (*φελόνης*) referred to by St. Paul (2 Tim. iv. 13) is generally identified with the Roman *pænula*, of which it may be a corruption; the Talmudical writers have a similar name (פליון or פלוניא). It is, however, otherwise explained as a travelling case for carrying clothes or books (Conybeare, *St. Paul*, ii. 499)

4. The customs and associations connected with dress are numerous and important, mostly arising from the peculiar form and mode of wearing the outer garments. The *beged*, for instance, could be applied to many purposes besides its proper use as a vestment; it was sometimes used to carry a burden (Ex. xii. 34; Judg. viii. 25; Prov. xxx. 4), as Ruth used her shawl (Ruth iii. 15); or to wrap up an article (1 Sam. xxi. 9); or again as an *impromptu* saddle (Matt. xxi. 7). Its most important use, however, was a coverlet at night (Ex. xxii. 27; Ruth iii. 9; Ez. xvi. 8), whence the word is sometimes taken for bed-clothes (1 Sam. xix. 13; 1 K. i. 1): the Bedouin applies his *abba* to a similar purpose (Niebuhr, *Description*, p. 56). On this account a creditor could not retain it after sunset (Ex. xxii. 26; Deut. xxiv. 12, 13; cf. Job xxii. 6, xxiv. 7; Am. ii. 8). The custom of placing garments in pawn appears to have been very common, so much so that עָבוֹט, *pledge* = a garment (Deut. xxiv. 12, 13); the accumulation of such pledges is referred to in Hab. ii. 6 (*that loadeth himself with* עַבְטִים, i. e. *pledges*; where the A. . following the LXX. and Vulg. reads עָב, טִיט, thick clay"); this custom prevailed in the time f our Lord, who bids his disciples give up the *ἱμάτιον* = *beged*, in which they slept, as well as the *χιτών* (Matt. v. 40). At the present day it is not unusual to seize the *abba* as compensation for an injury: an instance is given in Wortabet's *Syria*, . 293.

The loose, flowing character of the Hebrew robes admitted of a variety of symbolical actions; rending them was expressive of various emotions, as grief (Gen. xxxvii. 29, 34; Job i. 20; 2 Sam. i. 2) [MOURNING], fear (1 K. xxi. 27; 2 K. xxii. 11, 19), indignation (2 K. v. 7, xi. 14; Matt. xxvi. 65), or despair (Judg. xi. 35; Esth. iv. 1): generally the outer garment alone was thus rent (Gen. xxxvii. 34; Job i. 20, ii. 12), occasionally the inner (2 Sam. xv. 32), and occasionally both (Ezr. ix 3; Matt. xxvi. 65, compared with Mark xiv. 63) Shaking the garments, or shaking the dust off them, was a sign of renunciation (Acts xviii. 6) spreading them before a person, of loyalty and joyous reception (2 K. ix. 13; Matt. xxi. 8); wrapping them round the head, of awe (1 K. xix. 13), or of grief (2 Sam. xv. 30; Esth. vi. 12; Jer. xiv. 3, 4); casting them off, of excitement (Acts xxii. 23); laying hold of them, of supplication (1 Sam. xv. 27; Is. iii. 6, iv. 1; Zech. viii. 23).

The length of the dress rendered it inconvenient for active exercise: hence the outer garments were either left in the house by a person working close by (Matt. xxiv. 18), or were thrown off when the occasion arose (Mark x. 50; John xiii. 4: Acts vii. 58); or, if this was not possible, as in the case of a person travelling, they were girded up (1 K. xviii 46; 2 K. iv. 29, ix. 1; 1 Pet. i. 13); on entering a house the upper garment was probably laid aside and resumed on going out (Acts xii. 8). In a sitting posture the garments concealed the feet; this was held to be an act of reverence (Is. vi. 2; see Lowth's note). The proverbial expression in 1 Sam. xxv. 22; 1 K. xiv. 10, xxi. 21; 2 K. ix. 8, probably owes its origin to the length of the garments, which made another habit more natural (cf. Her. ii. 35; Xen. *Cyrop.* i. 2, § 16; Ammian. Marcell. xxiii. 6); the expression is variously understood to mean the *lowest* or the *youngest* of the people (Gesen. *Thes.* p. 1397; Jahn, *Archæol.* i. 8, § 120). To cut the garments short was the grossest insult that a Jew could receive (2 Sam. x. 4; the word there used, מְדֵן, is peculiarly expressive of the length of the garments). To raise the border or skirt of a woman's dress was a similar insult, implying her unchastity (Is. xlvii. 2; Jer. xiii. 22, 26; Nah. iii. 5).

The putting on and off of garments, and the ease with which it was accomplished, are frequently referred to; the Hebrew expressions for the first of these operations, as regards the outer robe, are לָבַשׁ, *to put on*, עָטָה, כָּסָה, and עָטַף, lit. *to cover*, the three latter having special reference to the amplitude of the robes; and for the second פָּשַׁט, lit. *to expand*, which was the natural result of taking off a wide, loose garment. The ease of these operations forms the point of comparison in Ps. cii. 26; Jer. xliii. 12. In the case of closely fitting robes the expression is חָגַר, lit. *to gird*, which is applied to the ephod (1 Sam. ii. 18; 2 Sam. vi. 14), to sackcloth (2 Sam. iii. 31; Is. xxxii. 11; Jer. iv. 8); the use of the term may illustrate Gen. iii. 7, where the garments used by our first parents are called חֲגֹרֹת (A. V. "aprons"), probably meaning such as could be wound round the body. The converse term is פָּתַח, *to loosen*, or *unbind* (Ps. xxx. 11; Is. xx. 2).

The number of suits possessed by the Hebrews was considerable. A single suit consisted of an under and upper garment, and was termed עֵרוּךְ תְּנָדִים (*στολὴ ἱματίων*, i. e. *apparatus vestium* LXX.; Judg. xvii. 10). Where more than one is

Digitized by Google

spoken of, the suits are termed חֲלִיפוֹת (ἀλλασσόμεναι στολαί; cf. Hom. *Od.* viii. 249, εἵματα ἐξημοιβά: *changes of raiment*, A. V.). These formed in ancient times one of the most usual presents among Orientals (Harmer, *Observations*, ii. 379 ff.); five (Gen. xlv. 22) and even ten changes (2 K. v. 5) were thus presented, while as many as thirty were proposed as a wager (Judg. xiv. 12, 19). The highest token of affection was to present the robe actually worn by the giver (1 Sam. xviii. 4; cf. Hom. *Il.* vi. 230; Harmer, ii. 388). The presentation of a robe in many instances amounted to installation or investiture (Gen. xli. 42; Esth. viii. 15; Is. xxii. 21; cf. Morier, *Second Journey*, p. 93); on the other hand, taking it away amounted to dismissal from office (2 Macc. iv. 38). The production of the best robe was a mark of special honor in a household (Luke xv. 22). The number of robes thus received or kept in store for presents was very large, and formed one of the main elements of wealth in the East (Job xxvii. 16; Matt. vi. 19; James v. 2), so that *to have clothing* = to be wealthy and powerful (Is. iii. 6, 7). On grand occasions the entertainer offered becoming robes to his guests (Trench on *Parables*, p. 231). Hence in large households a wardrobe (מֶלְתָּחָה) was required for their preservation (2 K. x. 22; cf. Harmer, ii. 382), superintended by a special officer named שֹׂמֵר הַבְּגָדִים, *keeper of the wardrobe* (2 Chr. xxxiv. 22). Robes reserved for special occasions are termed מַחֲלָצוֹת (A. V. "changeable suits"; Is. iii. 22; Zech. iii. 4), because laid aside when the occasion was past.

The color of the garment was, as we have already observed, generally white; hence a spot or stain readily showed itself (Is. lxiii. 3; Jude 23; Rev. iii. 4); reference is made in Lev. xiii. 47 ff. to a greenish or reddish spot of a leprous character. Jahn (*Archæol.* i. 8, § 135) conceives this to be not the result of leprosy, but the depredations of a small insect; but Schilling (*de Lepra*, p. 192) states that leprosy taints clothes, and adds "sunt maculæ omnino indelebiles et potius incrementum capere quam minui sub his lavationibus videntur" (Knobel, *Comm.* in l. c.). Frequent washings and the application of the fuller's art were necessary to preserve the purity of the Hebrew dress. [SOAP; FULLER.]

The business of making clothes devolved upon women in a family (Prov. xxxi. 22; Acts ix. 39); little art was required in what we may term the tailoring department: the garments came forth for the most part ready-made from the loom, so that one weaver supplanted the tailor. The references to sewing are therefore few: the term תָּפַר (Gen. iii. 7; Job xvi. 15; Eccl. iii. 7; Ez. xiii. 18) was applied by the later Jews to *mending* rather than making clothes.

The Hebrews were liable to the charge of extravagance in dress; Isaiah in particular (iii. 16 ff.) dilates on the numerous robes and ornaments worn by the women of his day. The same subject is referred to in Jer. iv. 30; Ez. xvi. 10; Zeph. i. 8, and Ecclus. xi. 4, and in a later age 1 Tim. ii. 9; 1 Pet. iii. 3. W. L. B.

DRINK, STRONG (שֵׁכָר: σίκερα, [μέθη; μέθυσμα; οἶνος: *sicera; ebrietas; omne quod inebriare potest; potio*]). The Hebrew term *shécâr*, in its etymological sense, applies to any beverage that had *intoxicating* qualities. It is generally found connected with wine, either as an exhaustive expression for all other liquors (*e. g.* Judg. xiii. 4; Luke i. 15), or as parallel to it, particularly in poetical passages (*e. g.* Is. v. 11; Mic. ii. 11); in Num. xxviii. 7 and Ps. lxix. 12, however, it stands by itself and must be regarded as including wine. The Bible itself throws little light upon the nature of the mixtures described under this term. We may infer from Cant. viii. 2 that the Hebrews were in the habit of expressing the juice of other fruits besides the grape for the purpose of making wine: the pomegranate, which is there noticed, was probably one out of many fruits so used. In Is. xxiv. 9 there may be a reference to the *sweetness* of some kind of strong drink. In Num. xxviii. 7 *strong drink* is clearly used as equivalent to wine, which was ordered in Ex. xxix. 40. With regard to the application of the term in later times we have the explicit statement of Jerome (*Ep. ad Nepot.*[a]), as well as other sources of information, from which we may state that the following beverages were known to the Jews: (1.) *Beer*, which was largely consumed in Egypt under the name of *zythus* (Herod. ii. 77; Diod. Sic. i. 34), and was thence introduced into Palestine (Mishn. *Pesach.* 3, § 1). It was made of barley; certain herbs, such as lupin and skirrett, were used as substitutes for hops (Colum. x. 114). The *boozah* of modern Egypt is made of barley-bread, crumbled in water, and left until it has fermented (Lane, i. 131): the Arabians mix it with spices (Burckhardt's *Arabia*, i. 213), as described in Is v. 22. The Mishna (*l. c.*) seems to apply the term *shécâr* more especially to a Median drink, probably a kind of beer made in the same manner as the modern *boozah*; the Edomite *chomets*, noticed in the same place, was probably another kind of beer, and may have held the same position among the Jews that bitter beer does among ourselves. (2.) *Cider*, which is noticed in the Mishna (*Terum.* 11, § 2) as *apple-wine*. (3.) *Honey-wine*, of which there were two sorts, one like the οἰνόμελι of the Greeks, which is noticed in the Mishna (*Shabb.* 20, § 2; *Terum.* 11, § 1) under a Hebraized form of that name, consisting of a mixture of wine, honey, and pepper; the other a decoction of the juice of the grape, termed *debash* (honey) by the Hebrews, and *dibs* by the modern Syrians, resembling the ἕψημα of the Greeks and the *defrutum* of the Romans, and similarly used, being mixed either with wine milk, or water. (4.) *Date-wine*, which was also manufactured in Egypt (οἶνος φοινικήιος, Herod. ii. 86, iii. 20). It was made by mashing the fruit in water in certain proportions (Plin. xiv. 19, § 3). A similar method is still used in Arabia, except that the fruit is not mashed (Burckhardt's *Arabia*, ii. 264): the palm-wine of modern Egypt is the sap of the tree itself, obtained by making an incision into its heart (Wilkinson, ii. 174). (5.) Various other fruits and vegetables are enumerated by Pliny (xiv. 19) as supplying materials for *factitious* or home-made wine, such as figs, millet, the

[a] "Sicera Hebræo sermone omnis potio nuncupatur, quæ inebriare potest, sive illa, quæ frumento conficitur sive pomorum succo, aut cum favi decoquuntur in dulcem et barbaram potionem, aut palmarum fructus exprimuntur in liquorem, coctisque frugibus aqua pinguior coloratur"

Digitized by Google

carob fruit, &c. It is not improbable that the Hebrews applied *raisins* to this purpose in the simple manner followed by the Arabians (Burckhardt, ii. 377), namely, by putting them in jars of water and burying them in the ground until fermentation takes place. W. L. B.

DROMEDARY. The representative in the A. V. of the Heb. words *bêcer* or *bicrâh*, *recesh* and *rammâc*. As to the two former terms, see under CAMEL.[a]

1. *Recesh* (רֶכֶשׁ: ἱππεῖων, ἅρμα: *jumenta, veredarii*) is variously interpreted in our version by "dromedaries" (1 K. iv. 28), "mules" (Esth. viii. 10, 14), "swift beasts" (Mic. i. 13). There seems to be no doubt that *recesh* denotes "a superior kind of horse," such as would be required when dispatch was necessary. See Gesenius (*Thes.* s. v.).

2. *Rammâc* (רַמָּךְ: LXX. and Vulg. omit) occurs only in plur. form in Esth. viii. 10, in connection with *benê*, "sons;" the expression *benê rammâchîm* being an epexegesis of the Heb. word *achashterânîm*, "mules, the sons of mares." The Heb. רַמָּךְ, "a mare," which the A. V. renders incorrectly "dromedary," is evidently allied to the Arab. رَمَكَة, "a brood-mare." W. H.

* **DROPPING, A CONTINUAL.** It is said in Prov. xxvii. 15, that "a continual dropping in a very rainy day and a contentious woman are alike." The LXX. gives as the sense of this: "Drops of rain in a wintry day drive a man out of his house; in the same manner also does an abusive woman." The force of this comparison becomes evident when we know something of the construction of ordinary houses in the East. Many of them have mud-covered roofs; and hence the rains, especially if violent and protracted, are liable to loosen such coverings and allow the water, according to the extent of the injury, to drop or pour down upon the hapless inmates. Mr. Hartley (*Travels in Asia Minor*), relates an experience of his own which illustrates this inconvenience: "Last night, we retired to rest in what appeared to be one of the best rooms which we have occupied during the journey; but at midnight we were roused by the rain descending through the roof; and were obliged to rise and seek shelter from the incessant dropping, in the corridor, which was better protected."

On the roofs of many houses (the writer observed this most frequently in northern Syria) they keep a cylindrical rolling-stone which the people employ, especially after a shower, for the purpose of smoothing and hardening the softened earth through which the rain so easily penetrates. This precaution will sometimes aggravate the evil. Dr. Lepsius relates (*Briefe aus Ægypten*, &c. (p. 393) 1852) that, being overtaken by a sudden shower at night, he took refuge in a house near *Deir el-Kamar*, on Mount Lebanon. Ere long the rain softened the mud on the roof and began to pour down on his bed. The family sent out one of their number to fill up the crevices and draw about the stone-roller. But in addition to the rain, heaps of stone and rubbish were precipitated on him, and he was compelled to beg his host to forego the well meant kindness. He passed a sleepless night, and hailed the earliest dawn as the signal for departure.

We see therefore how much the proverb expressed, when it says, that "a continual dropping in a very rainy day and a contentious woman are alike." H.

DRUSILLA (Δρουσίλλη), daughter of Herod Agrippa I. (Acts xii. 1, 19 ff.) and Cypros; sister of Herod Agrippa II. She was at first betrothed to Antiochus Epiphanes, prince of Commagene, but, he refusing to become a Jew, she was married to Azizus, king of Emesa, who complied with that condition (*Ant.* xx. 7, § 1). Soon after, Felix, procurator of Judæa, brought about her seduction by means of the Cyprian sorcerer Simon, and took her as his wife (*ib.* 7, § 2). In Acts xxiv. 24, we find her in company with Felix at Cæsarea, on occasion of St. Paul being brought before the latter; and the narrative implies that she was present at the Apostle's preaching. Felix had by Drusilla a son named Agrippa, who, together with his mother, perished in the eruption of Vesuvius under Titus (Joseph. *l. c.*; comp. Tac. *Hist.* v. 9). H. A.

* **DUKE** (from the Latin *dux*) as employed in the English Bible (Gen. xxxvi. 15, 40; Ex. xv. 15; Josh. xiii. 21, &c.) differs widely from the present usage. In the older English writers it often meant simply leader, chieftain, and is so used (A. V.) of the heads or *sheiks* of Arab clans which come forward so often in the earlier Hebrew history. See Eastwood and Wright's *Bible Word-Book*. H.

DULCIMER (*Symphoniah*, סומפוניה: [συμφωνία: *symphonia*]), a musical instrument, not in use amongst the Jews of Palestine, but mentioned in Daniel, iii. 5, 15, and at ver. 10 under the shorter form of סיפניא, along with several other instruments, which Nebuchadnezzar ordered to be sounded before a golden image set up for national worship during the period of the captivity of Judah. Luther translates it *lute*. Grotius adopts the view of Servius, who considers *symphonia* to be the same with *tibia obliqua* (πλαγίαυλος); he also quotes Isidorus (ii. 22), who speaks of it as a long drum. Rabbi Saadia Gaon (*Comm. on Dan.*) describes the *sumphoniah* as the bag-pipe, an opinion adopted by the author of *Shilte hag-Gibborim* (Joel Brill's Preface to Mendelssohn's version of the Psalms), by Kircher, Bartoloccius, and the majority of Biblical critics. The same instrument is still in use amongst peasants in the N. W. of Asia and in Southern Europe, where it is known by the similar name *sampogna* or *zampogna*. With respect to the etymology of the word a great difference of opinion prevails. Some trace it to the Greek συμφωνία, and Calmet, who inclines to this view, expresses astonishment that a pure Greek word should have made its way into the Chaldee tongue: it is probable, he thinks, that the instrument Dulcimer (A. V.) was introduced into Babylon by some Greek or Western-Asiatic musician who was taken prisoner by Nebuchadnezzar during one of his campaigns on the coast of the Mediterranean. Others, with far greater probability, regard it as a Semitic word and connect it with סמפן, "a tube" (Fürst,)

[a] * To what is said under CAMEL (Amer. ed.) respecting the obstinacy and moroseness of this animal, the reader may add Dr. Robinson's statement, *Bib. Res.* ii. 632–635, 1st ed. E

Digitized by Google

The word סמפון, occurs in the Talmud (*Succa*, 56a), where it evidently has the meaning of an air-pipe. Landau (*Aruch*, art. סמפון) considers it synonymous with siphon. Ibn Yahia, in his commentary on Dan. iii. 5, renders it by אורגאנוש (ὄργανα), organ, the well-known powerful musical instrument, composed of a series of pipes. Rabb. Elias, whom Buxtorf quotes (*Lexic. Talmud.* col. 1504), translates it by the German word *Leier* (lyre).

The old-fashioned spinet, the precursor of the harpsichord, is said to have resembled in tone the ancient dulcimer. The modern dulcimer is described by Dr. Busby (*Dict. of Music*) as a triangular instrument, consisting of a little chest, strung with about fifty wires cast over a bridge fixed at each end; the shortest wire is 18 inches in length, the longest 36: it is played with two small hammers held in the hands of the performer.

D. W. M.

DU'MAH (דּוּמָה [*silence*]: [in Gen.,] Δουμά [Alex. Ιδουμα: in 1 Chr.,] Ἰδουμά [Comp. Δουμά; in Is.,] Ἰδουμαία: *Duma*), a son of Ishmael, most probably the founder of an Ishmaelite tribe of Arabia, and thence the name of the principal place, or district, inhabited by that tribe. In Gen. xxv. 14, and 1 Chr. i. 30, the name occurs in the list of the sons of Ishmael; and in Isaiah (xxi. 11), in the "burden of Dumah," coupled with Seir, the forest of Arabia, and Kedar. The name of a town in the northwestern part of the peninsula, *Doomat-el-Jendel*,[a] is held by Gesenius, and other European authorities, to have been thus derived; and the opinion is strengthened by Arab traditionists, who have the same belief (*Mir-át ez-Zemán*). The latter, however, err in writing "*Dáwmat-el-Jendel*" (دَوْمَة الجَنْدَل); while the lexicographers and geographers of their nation expressly state that it is correctly "*Doomat-el-Jendel*," or "*Doomá-el-Jendel*" (دُومَة الجَنْدَل, or دُومَاء الجَنْدَل), signifying "Dumah of the stones or blocks of stone," of which it is said to have been built (*Sihák*, MS., *Marásid*, and *Mushtarak*, s. v.); not the "stony Dumah," as Europeans render it. *El-Jendel* is said by some to mean "stones such as a man can lift" (*Kámoos*), and seems to indicate that the place was built of unhewn or Cyclopean masonry, similar to that of very ancient structures. The town itself, which is one of the "*Kureiyát*" of *Wádi-l-Kurà*[b] (*Marásid*, s. v. *Doomah*), appears to be called "*Doomat-el-Jendel*;" and the fortress which it contains, to have the special appellation of "*Márid*" (مَارِد).

It should be observed that there are two "*Doomahs*;" that named in this article, and *D. el-Erák*. The chief of one, a contemporary of Mohammed, is said to have founded the other, or to have given it the name of D.; but most Arab authorities, and probability also, are in favor of the prior antiquity of the former. E. S. P.

DU'MAH (דּוּמָה [*silence*, i. e. *land of*]: Ῥεμά; Alex. [Comp. Ald.] Ῥουμα: *Ruma*), a city in the mountainous district of Judah, near Hebron (Josh. xv. 52). In the *Onomasticon* of Eusebius and Jerome it is named as a very large place (κώμη μεγίστη), 17 miles from Eleutheropolis, in the district of Daroma (*i. e.* "the south," from the Hebrew דָּרוֹם). Eleutheropolis not being certainly known, this description does not afford much clew. Robinson passed the ruins of a village called *ed-Daumeh*, 6 miles southwest of Hebron (Rob. i. 212), and this may possibly be Dumah. (See also Kiepert's *Map*, 1856; and Van de Velde's Memoir, 308).[c] G.

DUNG (גֶּלֶל, גֵּלֶל, גֵּלָל, יָאֹה, the latter always, and the two former generally, applied to men; פֶּרֶשׁ, דֹּמֶן, יָצִיעַ, to brute animals, the second exclusively to animals offered in sacrifice, and the third to the dung of cows or camels). The uses of dung were twofold, as manure, and as fuel. The manure consisted either of straw steeped in liquid manure (מֵי מַדְמֵנָה, lit. *in dung water*, Is. xxv. 10), or the *sweepings* (סְחָרָה, Is. v. 25) of the streets and roads, which were carefully removed from about the houses and collected in heaps (אַשְׁפֹּת) outside the walls of the towns at fixed spots (hence the dung-gate at Jerusalem, Neh. ii. 13), and thence removed in due course to the fields (Mishn. *Sheb.* 3, § 1–3). To sit on a dung-heap was a sign of the deepest dejection (1 Sam. ii. 8; Ps. cxiii. 7; Lam. iv. 5; cf. Job ii. 8, LXX. and Vulg.). The mode of applying manure to trees was by digging holes about their roots and inserting it (Luke xiii. 8), as still practiced in Southern Italy (Trench, *Parables*, p. 356). In the case of sacrifices the dung was burnt outside the camp (Ex. xxix. 14; Lev. iv. 11, viii. 17; Num. xix. 5); hence the extreme opprobrium of the threat in Mal. ii. 3. Particular directions were laid down in the law to enforce cleanliness with regard to human ordure (Deut. xxiii. 12 ff.): it was the grossest insult to turn a man's house into a receptacle for it (מַחֲרָאָה, 2 K. x. 27; גֵּלָל, Ezr. vi. 11; Dan. ii. 5, iii. 29, "dunghill" A. V.); public establishments of that nature are still found in the large towns of the East (Russell's *Aleppo*, i. 34). The expression to "cast out as dung" implied not only the offensiveness of the object, but also the ideas of *removal* (1 K. xiv. 10), and still more *exposure* (2 K. ix. 37; Jer. viii. 2). The reverence of the later Hebrews would not permit the pronunciation of some of the terms used in Scripture, and accordingly more delicate words were substituted in the margin (2 K. vi. 25, x. 27, xviii. 27; Is. xxxvi. 12). The occurrence of such names as Gilalai, Dimnah, Madmenah, and Madmannah, shows that these ideas of delicacy did not extend to ordinary matters. The term σκύβαλα ("dung,"

[a] The "h" in Doomat is thus written for "h" by grammatical construction.

[b] Winer, in his art. *Duma*, quoting Hitzig (Zeller's Archiv. 1848), has complicated the question by making D. *el-Jendel* distinct from *D.* of *Wádi-l-Kurá*.

[c] Keil (*Josua*, p. 125) and Knobel (*Josua*, p. 437 recognise Dumah in this *ed-Daumeh*, though Robinson (i. 212, 2d ed.) expresses no opinion. Raumer (*Palästina*, p. 184, 4te Aufl.) adopts this identification. H

A. V., Phil. iii. 8) applies to refuse of any kind (cf. Ecclus. xxvii. 4).

The difficulty of procuring fuel in Syria, Arabia, and Egypt, has made dung in all ages valuable as a substitute: it was probably used for heating ovens and for baking cakes (Ez. iv. 12, 15), the equable heat which it produced adapting it peculiarly for the latter operation. Cow's and camel's dung is still used for a similar purpose by the Bedouins (Burckhardt's *Notes*, i. 57): they even form a species of pan for frying eggs out of it (Russell, i. 39): in Egypt the dung is mixed with straw and formed into flat round cakes, which are dried in the sun (Lane, i. 252, ii. 141). W. L. B.

DUNGEON. [PRISON.]

* DUNG-PORT (Neh. ii. 13). [JERUSALEM, VIII.] H.

DU'RA (דּוּרָא: [Theodot.] Δεειρά; [LXX. ὁ περίβολος:] *Dura*), the plain where Nebuchadnezzar set up the golden image (Dan. iii. 1), has been sometimes identified with a tract a little below *Tekrit*, on the left bank of the Tigris (Layard, *Nin. & Bab.* p. 469), where the name *Dur* is still found. But (1) this tract probably never belonged to Babylon; (2) at any rate it is too far from the capital to be the place where the image was set up; for the plain of Dura was in the *province* or *district* of Babylon (בִּמְדִינַת בָּבֶל), and therefore in the vicinity of the city; (3) the name *Dur*, in its modern use, is applicable to any plain. M. Oppert places the plain (or, as he calls it, the "valley") of Dura to the south-east of Babylon, in the vicinity of the mound of *Dowair* or *Diwir*. He has discovered on this site the pedestal of a colossal statue, and regards the modern name as a corruption of the ancient appellation. G. R.

* DUST shaken off from one's sandals (Acts xiii. 51), or his garments (Acts xviii. 6) was a symbolic act, expressive of disapprobation and renunciation. Its significancy lay in the idea that those against whom the act was directed were so unworthy that it was defiling to one to allow so much as a particle of the soil to cleave to his garments (see Wetstein's *Nov. Test.* i. 370). For other references to this custom, see Matt. x. 14; Mark vi. 11; Luke ix. 5, x. 11.

Dust thrown into the air by an excited crowd, as in the case of the mob at Jerusalem on hearing Paul's declaration that the heathen were to share in the blessings of the Messiah's kingdom (Acts xxii. 23), was an expression of rage and menace, while at the same time it inflamed still further the passion already excited. The oriental traveller, Sir John Chardin (Harmer's *Observations*, iv. 203) states that this form of popular outbreak is not uncommon among the Persians at the present day. The peasants there when they have a grievance to redress, collect at the palace-gate, howl, rend their garments and throw dust into the air, in order to enforce by such frantic violence their demand for justice. In like manner Shimei, as he cursed David (2 Sam. xvi. 13), "threw stones at him and cast dust" (according to the Hebrew, and as in the margin of the A. V., "dusted him with dust").

Panting "after the dust of the earth on the head of the poor" is mentioned in Amos ii. 7 as a mark of avarice. Even those who were so wretched as to have nothing but the dust and ashes, which, in token of their misery, they had spread upon their heads, were still objects of the rapacity of the merciless miser. With an approach to this sarcasm, it is said in the old ballad of Gernutus the Jew (*Connoisseur*, No. xvi.) who, in default of the payment of his bond, insisted on having "his pound of flesh":—

> "His heart doth thinke on many a wile,
> How to deceive the poore;
> His mouth is almost full of mucke,
> Yet still he gapes for more."

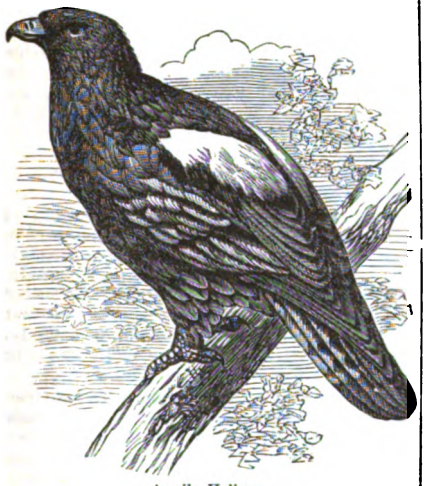
See under MOURNING in regard to the custom of sprinkling ashes on the head or person as a badge of sorrow. See SERPENT for what is meant by the tempter's being doomed to "eat dust all the days of his life" (Gen. iii. 14). H.

E.

EAGLE (נֶשֶׁר, *nesher*: ἀετός: *aquila*). The Hebrew word, which occurs frequently in the O. T., may denote a particular species of the *Falconidæ*, as in Lev. xi. 13, Deut. xiv. 12, where the *nesher* is distinguished from the *ossifrage*, *osprey*, and other raptorial birds; but the term is used also to express the griffon vulture (*Vultur fulvus*) in two or three passages.

At least four distinct kinds of eagles have been observed in Palestine, namely, the golden eagle (*Aquila chrysaëtus*), the spotted eagle (*A. nævia*), the commonest species in the rocky districts (see *Ibis*, i. 23), the imperial eagle (*Aquila Heliaca*), and the very common *Circaëtos gallicus*, which preys on the numerous *reptilia* of Palestine (for a figure of this bird see OSPREY). The Hebrew *nesher* may stand for any of these different species, though perhaps more particular reference to the golden and imperial eagles and the griffon vulture may be intended.[a]

The eagle's swiftness of flight is the subject of frequent allusion in Scripture (Deut. xxviii. 49, 2 Sam. i. 23; Jer. iv. 13, xlix. 22; Lam. iv. 19, &c.); its mounting high into the air is referred to (in Job xxxix. 27; Prov. xxiii. 5, xxx. 19; Is. xl. 31; Jer. xlix. 16); its strength and vigor (in Ps. ciii. 5); its predaceous habits (Job ix. 26; Prov. xxx. 17); its setting its nest in high places (in Jer. xlix. 16); the care in training its young to fly (in Ex. xix. 4; Deut. xxxii. 11); its powers of vision (in Job xxxix. 29).



The passage in Mic. i. 16, "Enlarge thy baldness as the eagle," has been understood by Bochart (*Hieroz.* ii. 744) and others to refer to the eagle at the time of its moulting in the spring. Oedmann (*Vermisch. Samm.* i. 64) erroneously refers [?] the baldness spoken of by the prophet to point to the

[a] The modern Arabic term for the Griffon Vulture, including the *V. auricularis* and *V. cinereus*, is *Nisr*. This word is never applied to the *Neophron percnopterus* or "Rachmah." The Eagles are designated collectively by *ôgab* with a specific adjective for various species. I am inclined, therefore, to restrict the Heb. *Nesher* to the majestic *Vultur*, every Scriptural characteristic of the *Nesher* being more true of the Griffon Vulture than of any Eagle. H. B. T.

The reader will find the vernacular Arabic names of different species of Vulturidæ and Falconidæ in Loche's *Catalogue des Oiseaux observ. en Algérie* and in *Ibis*, vols. i., ii., Tristram's papers on the Ornithology of North Africa.

Digitized by Google

Vultur barbatus (*Gypaëtus*), the bearded vulture or lammergyer, which he supposed was bald. It appears to us to be extremely improbable that there is any reference in the passage under consideration to eagles moulting. Allusion is here made to the custom of shaving the head as a token of mourning; but there would be little or no appropriateness in the comparison of a shaved head with an eagle at the time of moulting. But if the *nesher* is supposed to denote the griffon vulture (*Vultur fulvus*), the simile is peculiarly appropriate; it may be remarked that the Hebrew verb *kârach* (קָרַח) signifies "to make bald on the back part of the head;" the notion here conveyed is very applicable to the whole head and neck of this bird, which is destitute of true feathers.

Aquila Heliaca.

With reference to the texts referred to above, which compare the watchful and sustaining care of his people by the Almighty with that exhibited by the eagle in training its young ones to fly, we may quote a passage from Sir Humphry Davy, who says, "I once saw a very interesting sight above one of the crags of Ben Nevis, as I was going in the pursuit of black game. Two parent eagles were teaching their offspring, two young birds, the manœuvres of flight. They began by rising from the top of the mountain, in the eye of the sun. It was about midday, and bright for this climate. They at first made small circles, and the young birds imitated them. They paused on their wings, waiting till they had made their first flight, and then took a second and larger gyration: always rising towards the sun, and enlarging their circle of flight so as to make a gradually ascending spiral. The young ones still and slowly followed, apparently flying better as they mounted; and they continued this sublime exercise, always rising, till they became mere points in the air, and the young ones were lost, and afterwards their parents, to our aching sight." The expression in Ex. and Deut. (*ll. cc.*), "beareth them on her wings," has been understood by Rabbinical writers and others to mean that the eagle does actually carry her young ones on her wings and shoulders. This is putting on the words a construction which they by no means are intended to convey; at the same time, it is not improbable that the parent bird assists the first efforts of her young by flying under them, thus sustaining them for a moment, and encouraging them in their early lessons.

In Ps. ciii. 5 it is said, "Thy youth is renewed like the eagle's" (see also Is. xl. 31). Some Jewish interpreters have illustrated this passage by a reference to the old fables about the eagle being able to renew his strength when very old (see Bochart, *Hieroz.* ii. 747). Modern commentators for the most part are inclined to think that these words refer to the eagle after the moulting season, when the bird is more full of activity than before. We much prefer Hengstenberg's explanation on Ps. ciii. 5, "Thy youth is renewed, so that in point of strength thou art like the eagle."

The *âetol* of Matt. xxiv. 28, Luke xvii. 37, may include the *Vultur fulvus* and *Neophron percnopterus*; though, as eagles frequently prey upon dead bodies, there is no necessity to restrict the Greek word to the *Vulturidæ*.[a] The figure of an eagle is now and has been long a favorite military ensign. The Persians so employed it; which fact illustrates the passage in Is. xlvi. 11, where Cyrus is alluded to under the symbol of an "eagle" (עַיִט) or "ravenous bird" (comp. Xenoph. *Cyrop.* vii. 4). The same bird was similarly employed by the Assyrians and the Romans. Eagles are frequently represented in Assyrian sculptures attending the soldiers in their battles; and some have hence supposed that they were trained birds Considering, however, the wild and intractable nature of eagles, it is very improbable that this was the case. The representation of these birds was doubtless intended to portray the common feature in Eastern battle-field scenery, of birds of prey awaiting to satisfy their hunger on the bodies of the slain.

W. H.

E'ANES (Μάνης; [Ald. Ἁάνης:] *Esses*), 1 Esdr. ix. 21, a name which stands in the place of HARIM, MAASEIAH, and ELIJAH, in the parallel list of Ezra x. It does not appear whence the translators obtained the form of the name given in the A. V.

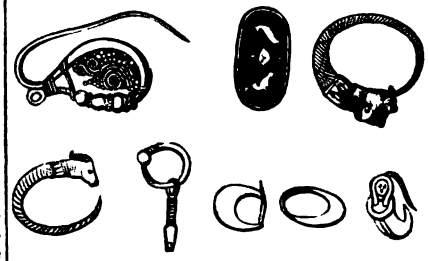
* Here, as in many other instances in the Apocrypha, the form of the name in the A. V. is derived, either directly or indirectly, from the Aldine edition. A.

* **EAR** used as a verb (from the Lat. *arare* through the Anglo-Saxon *erian*) in Deut. xxi. 4; 1 Sam. viii. 12; Is. xxx. 24 (A. V.), meant "to plough" or "till," at the time when our English version was made. So in Shakespeare (*Rich. II.*, iii. 2): —

> "And let them go
> To *ear* the land that hath some hope to grow"

See Eastwood and Wright's *Bible Word-Book*, p. 168 (Lond. 1866). H.

* **EARING** (from the Anglo-Saxon *eriung*) occurs in Gen. xlv. 6 and Ex. xxxiv. 21 (A. V.), where, according to the present English usage, we should write "ploughing" for "earing," and "ploughing-time" for "earing-time." Thus "earing" at present (so liable to be taken in the sense of putting forth ears) suggests almost the opposite of the true meaning. H.



[a] It is necessary to remember that no true eagle will kill for himself if he can find dead flesh.

EARNEST. This term occurs only thrice in the A. V. (2 Cor. i. 22, v. 5; Eph. i. 14). The equivalent in the original is ἀρραβών, a Grecized form of עֵרָבוֹן, which was introduced by the Phœnicians into Greece, and also into Italy, where it reappears under the forms *arrhabo* and *arrha*. It may again be traced in the French *arrhes*, and in the old English expression *Earl's* or *Arle's* money. The Hebrew word was used generally for *pledge* (Gen. xxxviii. 17), and in its cognate forms for *surety* (Prov. xvii. 18) and *hostage* (2 K. xiv. 14). The Greek derivative, however, acquired a more technical sense as signifying the *deposit* paid by the purchaser on entering into an agreement for the purchase of anything (Suid. *Lex.* s. v.). A similar legal and technical sense attaches to *earnest*, the payment of which places both the vendor and the purchaser in a position to enforce the carrying out of the contract (Blackstone, ii. 30 [which see]). There is a marked distinction between *pledge* and *earnest* in this respect, that the latter is a *part-payment*, and therefore implies the *identity* in kind of the deposit with the future full payment; whereas a pledge may be something of a totally different nature, as in Gen. xxxviii., to be resumed by the depositor when he has completed his contract. Thus the expression "*earnest* of the Spirit" implies, beyond the idea of security, the *identity* in kind, though not in degree, and the *continuity* of the Christian's privileges in this world and in the next. The payment of earnest-money under the name of *arrabon* is still one of the common occurrences of Arab life.[a] W. L. B.

EAR-RINGS. The word נֶזֶם, by which these ornaments are usually described, is unfortunately ambiguous, originally referring to the nose-ring (as its root indicates), and thence transferred to the ear-ring. The full expression for the latter is נֶזֶם אֲשֶׁר בְּאָזְנִים (Gen. xxxv. 4), in contradistinction to נֶזֶם עַל־אַף (Gen. xxiv. 47). In the majority of cases, however, the kind is not specified, and the only clew to the meaning is the context. The term occurs in this undefined sense in Judg. viii. 24; Job xlii. 11; Prov. xxv. 12; Hos. ii. 13. The material of which the ear-ring was made was generally gold (Ex. xxxii. 2), and its form circular, as we may infer from the name עָגִיל, by which it is described (Num. xxxi. 50; Ex. xvi. 12): such was the shape usual in Egypt (Wilkinson's *Egyptians*, iii. 370). They were worn by women and by youth of both sexes (Ex. *l. c.*). It has been inferred from the passage quoted, and from Judg. viii. 24, that they were not worn by men: these passages are, however, by no means conclusive. In the former an order is given to the men in such terms that they could not be mentioned, though they might have been implicitly included; in the latter the *amount of the gold* is the peculiarity adverted to, and not the character of the ornament, a peculiarity which is still noticeable among the inhabitants of southern Arabia (Wellsted's *Travels*, i. 321). The mention of the *sons* in Ex. xxxii. 2 (which, however, is omitted in the LXX.) is in favor of their having been worn; and it appears unlikely that the Hebrews presented an exception to the almost universal practice of Asiatics, both in ancient and modern times (Winer, *Realwört.* s. v. *Ohrringe*). The ear-ring appears to have been regarded with superstitious reverence as an amulet: thus it is named in the Chaldee and Samaritan versions קְדִישָׁא, *a holy thing*; and in Is. iii. 20 the word לְחָשִׁים, properly *amulets*, is rendered in the A. V., after the LXX. and Vulg., *earrings*. [AMULET.] On this account they were surrendered along with the idols by Jacob's household (Gen. xxxv. 4). Chardin describes ear-rings,

Egyptian Ear-rings, from Wilkinson.

with talismanic figures and characters on them, as still existing in the East (Brown's *Antiquities*, ii. 305). Jewels were sometimes attached to the rings: they were called נְטִיפוֹת (from נָטַף, *to drop*), a word rendered in Judg. viii. 26, δρμίσκοι: *monilia: collars* or *sweet jewels*, A. V., and in Is. iii. 19, κάθεμα: *torques: chains* or *sweet balls*, A. V. The size of the ear-rings still worn in eastern countries far exceeds what is usual among ourselves (Harmer's *Observations*, iv. 311, 314); hence they formed a handsome present (Job xlii. 11), or offering to the service of God (Num. xxxi. 50). W. L. B.

EARTH. This term is used in two widely different senses: (1) for the material of which the earth's surface is composed; (2) as the name of the planet on which man dwells. The Hebrew language discriminates between these two by the use of separate terms, *Adamah* (אֲדָמָה) for the former, *Erets* (אֶרֶץ) for the latter. As the two are essentially distinct, we shall notice them separately.

I. *Adamah* is the *earth* in the sense of soil or ground, particularly as being susceptible of cultivation; hence the expression *ish adamah* for an agriculturist (Gen. ix. 20). The *earth* supplied the elementary substance of which man's body was formed, and the terms *adam* and *adamah* are brought into juxtaposition, implying an etymological connection (Gen. ii. 7). [ADAM.] The opinion that man's body was formed of earth prevailed among the Greeks (Hesiod, *Op. et Di.* 61, 70; Plat. *Rep.* p. 269), the Romans (Virg. *Georg.* ii. 341; Ovid, *Met.* i. 82), the Egyptians (Diod. Sic. i. 10), and other ancient nations. It is evidently based on the observation of the material into which the body is resolved after death (Job x. 9; Eccl. xii. 7). The law prescribed earth as the material out of which altars were to be raised (Ex. xx. 24). Bähr (*Symb.* i. 488) sees in this a reference to the name *adam*: others with more reason compare the *ara de cespite* of the Romans (Ov. *Trist.* v. 5, 9 Hor. *Od.* iii. 8, 4, 5), and view it as a precept of simplicity. Naaman's request for two mules' bur-

lan of earth (2 K. v. 17) was based on the idea that Jehovah, like the heathen deities, was a local god, and could be worshipped acceptably only on his own soil.

II. *Erets* is explained by Von Bohlen (*Introd. to Gen.* ii. 6) as meaning etymologically the *low* in opposition to the *high*, i. e. the heaven. It is applied in a more or less extended sense: (1) to the whole world (Gen. i. 1); (2) to land as opposed to sea (Gen. i. 10); (3) to a country (Gen. xxi. 32); (4) to a plot of ground (Gen. xxiii. 15); and (5) to the ground on which a man stands (Gen. xxxiii. 3). The two former senses alone concern us, the first involving an inquiry into the opinions of the Hebrews on Cosmogony, the second on Geography.

I. COSMOGONY. — The views of the Hebrews on this subject are confessedly imperfect and obscure. This arises partly from the ulterior objects which led them to the study of natural science, and still more from the poetical coloring with which they expressed their opinions. The books of Genesis, Job, and Psalms supply the most numerous notices. Of these, the two latter are strictly poetical works, and their language must be measured by the laws of poetical expression; in the first alone have we anything approaching to an historical and systematic statement, and even this is but a sketch — an outline — which ought to be regarded at the same distance, from the same point of view, and through the same religious medium as its author regarded it. The act of creation itself, as recorded in the first chapter of Genesis, is a subject beyond and above the experience of man; human language, derived, as it originally was, from the sensible and material world, fails to find an adequate term to describe the act; for our word "create" and the Hebrew *bara*, though most appropriate to express the idea of an original creation, are yet applicable and must necessarily be applicable to other modes of creation; nor does the addition of such expressions as "out of things that were not" (ἐξ οὐκ ὄντων, 2 Macc. vii. 28), or "not from things which appear" (μὴ ἐκ φαινομένων, Heb. xi. 3) contribute much to the force of the declaration. The absence of a term which shall describe exclusively an original creation is a necessary infirmity of language: as the event occurred but once, the corresponding term must, in order to be adequate, have been coined for the occasion and reserved for it alone, which would have been impossible. The same observation applies, though in a modified degree, to the description of the various processes subsequent to the existence of original matter. Moses viewed matter and all the forms of matter in their relations primarily to God, and secondarily to man — as manifesting the glory of the former, and as designed for the use of the latter. In relation to the former, he describes creation with the special view of illustrating the Divine attributes of power, goodness, wisdom, and accordingly he throws this narrative into a form which impresses the reader with the sense of these attributes. In relation to the latter, he selects his materials with the special view of illustrating the subordination of all the orders of material things to the necessities and comforts of man. With these objects in view, it ought not to be a matter of surprise, if the simple narrative of creation omits much that scientific research has since supplied, and appears in a guise adapted to those objects. The subject itself is throughout one of a transcendental character; it should consequently be subjected to the same standard of interpretation as other passages of the Bible descriptive of objects which are entirely beyond the experience of man, such as the day of judgment, the states of heaven and hell, and the representations of the Divine Majesty. The style of criticism applied to Gen. i. by the opponents, and not unfrequently by the supporters of Revelation, is such as would be subversive of many of the most noble and valuable portions of the Bible. With these prefatory remarks we proceed to lay down what appear to us to be the leading features of Hebrew cosmogony.

1. The earth was regarded not only as the central point of the universe, but as the universe itself, every other body — the heavens, sun, moon, and stars — being subsidiary to, and, as it were, the complement of the earth. The Hebrew language has no expression equivalent to our *universe:* "the heavens and the earth" (Gen. i. 1, xiv. 19; Ex. xxxi. 17) has been regarded as such; but it is clear that the heavens were looked upon as a necessary adjunct of the earth — the curtain of the tent in which man dwells (Is. xl. 22), the sphere above which fitted the sphere below (comp. Job xxii. 14, and Is. xl. 22) — designed solely for purposes of beneficence in the economy of the earth. This appears from the account of its creation and offices: the existence of the heaven was not prior to or contemporaneous with that of the earth, but subsequent to it; it was created on the second day (Gen. i. 6). The term under which it is described, *rakia* (רָקִיעַ) is significant of its *extension*, that it was *stretched out* as a curtain (Ps. civ. 2) over the surface of the earth. Moreover it depended upon the earth; it had its "foundations" (2 Sam. xxii. 8) on the edges of the earth's circle, where it was supported by the mountains as by massive pillars (Job xxvi. 11). Its offices were (1) to support the waters which were above it (Gen. i. 7; Ps. cxlviii. 4), and thus to form a mighty reservoir of rain and snow, which were to pour forth through its windows (Gen. vii. 11; Is. xxiv. 18) and doors (Ps. lxxviii. 23), as through opened sluice-gates, for the fructification of the earth; (2) to serve as the *substratum* (στερέωμα or "*firmament*") in which the celestial bodies were to be fixed. As with the heaven itself, so also with the heavenly bodies; they were regarded solely as the ministers of the earth. Their offices were (1) to give light; (2) to separate between day and night; (3) to be for *signs*, as in the case of eclipses or other extraordinary phenomena; for *seasons*, as regulating seedtime and harvest, summer and winter, as well as religious festivals; and for *days* and *years*, the length of the former being dependent on the sun, the latter being estimated by the motions both of sun and moon (Gen. i. 14–18); so that while it might truly be said that they held "dominion" over the earth (Job xxxviii. 33), that dominion was exercised solely for the convenience of the tenants of earth (Ps. civ. 19–23). So entirely indeed was the existence of heaven and the heavenly bodies designed for the earth, that with the earth they shall simultaneously perish (2 Pet. iii. 10): the curtain of the tent shall be rolled up and the stars shall of necessity drop off (Is. xxxiv. 4; Matt. xxiv. 29) — their sympathy with earth's destruction being the counterpart of their joyous song when its foundations were laid (Job xxxviii. 7).

2. The earth was regarded in a twofold aspect.

Digitized by Google

in relation to God, as the manifestation of his infinite attributes; in relation to man, as the scene of his abode. (1.) The Hebrew cosmogony is based upon the leading principle that the universe exists, not independently of God, by any necessity or any inherent power, nor yet contemporaneously with God, as being co-existent with him, nor yet in opposition to God, as a hostile element, but dependently upon him, subsequently to him, and in subjection to him. The opening words of Genesis express in broad terms this leading principle: however difficult it may be, as we have already observed, to express this truth adequately in human language, yet there can be no doubt that the subordination of matter to God in every respect is implied in that passage, as well as in other passages, too numerous to quote, which comment upon it. The same great principle runs through the whole history of creation: matter owed all its forms and modifications to the will of God: in itself dull and inert, it received its first vivifying capacities from the influence of the Spirit of God brooding over the deep (Gen. i. 2); the progressive improvements in its condition were the direct and miraculous effects of God's will; no interposition of secondary causes is recognized: "He spake and it was" (Ps. xxxiii. 9); and the pointed terseness and sharpness with which the writer sums up the whole transaction in the three expressions "God said," "it was so," "God saw that it was good" — the first declaring the divine volition, the second the immediate result, the third the perfectness of the work — harmonizes aptly with the view which he intended to express. Thus the earth became in the eyes of the pious Hebrew the scene on which the Divine perfections were displayed: the heavens (Ps. xix. 1), the earth (Ps. xxiv. 1, civ. 24), the sea (Job xxvi. 10; Ps. lxxxix. 9; Jer. v. 22), "mountains and hills, fruitful trees and all cedars, beasts and all cattle, creeping things and flying fowl" (Ps. cxlviii. 9, 10), all displayed one or other of the leading attributes of His character. So also with the ordinary operations of nature — the thunder was His voice (Job xxxvii. 5), the lightnings His arrows (Ps. lxxvii. 17), wind and storm His messengers (Ps. cxlviii. 8), the earthquake, the eclipse, and the comet, the signs of His presence (Joel ii. 10; Matt. xxiv. 29; Luke xxi. 25).

(2.) The earth was regarded in relation to man, and accordingly each act of creation is a preparation of the earth for his abode — light, as the primary condition of all life; the heavens, for purposes already detailed; the dry land, for his home; "grass for the cattle and herb for the service of man" (Ps. civ. 14); the alternations of day and night, the one for his work and the other for his rest (Ps. civ. 23); fish, fowl, and flesh for his food; the beasts of burden, to lighten his toil. The work of each day of creation has its specific application to the requirements and the comforts of man, and is recorded with that special view.

3. Creation was regarded as a progressive work — a gradual development from the inferior to the superior orders of things. Thus it was with the earth's surface, at first a chaotic mass, *waste and empty*, well described in the paronomastic terms *tohu, bohu*, overspread with waters and enveloped in darkness (Gen. i. 2), and thence gradually brought into a state of order and beauty so conspicuous, as to have led the Latins to describe it by the name *Mundus*. Thus also with the different portions of the universe, the earth before the light, the light before the firmament, the firmament before the dry land. Thus also with light itself, at first the elementary principle, separated from the darkness, but without defined boundaries; afterwards the illuminating bodies with their distinct powers and offices — a progression that is well expressed in the Hebrew language by the terms *ôr* and *mâôr* (מָאוֹר, אוֹר). Thus also with the orders of living beings; firstly, plants; secondly, fish and birds; thirdly, cattle; and lastly, man. From "good" in the several parts to "very good" as a whole (Gen. i. 31), such was its progress in the judgment of the Omnipotent workman.

4. Order involves time; a succession of events implies a succession of periods; and accordingly Moses assigns the work of creation to six days, each having its specific portion — light to the first, the firmament to the second, the dry land and plants to the third, the heavenly bodies to the fourth, fish and fowl to the fifth, beasts and man to the sixth. The manner, in which these acts are described as having been done, precludes all idea of time in relation to their performance: it was miraculous and instantaneous: "God said" and then "it was." But the progressiveness, and consequently the individuality of the acts, does involve an idea of time as elapsing between the completion of one and the commencement of another; otherwise the work of creation would have resolved itself into a single continuous act. The period assigned to each individual act is a day — the only period which represents the entire cessation of a work through the interposition of night. That a natural day is represented under the expression "evening was and morning was," admits, we think, of no doubt; the term "day" alone may refer sometimes to an indefinite period contemporaneous with a single event; but when the individual parts of a day "evening and morning" are specified, and when a series of such days are noticed in their numerical order, no analogy of language admits of our understanding the term in anything else than its literal sense. The Hebrews had no other means of expressing the civil day of 24 hours than as "evening, morning" (עֶרֶב בֹּקֶר, Dan. viii. 14), similar to the Greek νυχθήμερον, and although the alternation of light and darkness lay at the root of the expression, yet the Hebrews in their use of it no more thought of those elements than do we when we use the terms *fortnight* or *se'nnight*; in each case the lapse of a certain time, and not the elements by which that time is calculated, is intended; so that, without the least inconsistency either of language or of reality, the expression may be applied to the days previous to the creation of the sun. The application of the same expressions to the events subsequent to the creation of the sun, as well as the use of the word "day" in the 4th commandment without any indications that it is used in a different sense, or in any other than the literal acceptation of Gen. i. 5 ff., confirm the view above stated. The interpretation that "evening and morning" = *beginning* and *end*, is opposed not only to the order in which the words stand, but to the sense of the words elsewhere.

5. The Hebrews, though regarding creation as the immediate act of God, did not ignore the evident fact that existing materials and intermediate agencies were employed both then and in the subsequent operations of nature. Thus the simple fact

Digitized by Google

"God created man" (Gen. i. 27) is amplified by the subsequent notice of the material substance of which his body was made (Gen. ii 7); and so also of the animals (Gen. i. 24, ii. 19). The separation of sea and land, attributed in Gen. i. 6 to the Divine fiat, was seen to involve the process of partial elevations of the earth's surface (Ps. civ. 8, "the mountains ascend, the valleys descend;" comp. Prov. viii. 25–28). The formation of clouds and the supply of moisture to the earth, which in Gen. i. 7 was provided by the creation of the firmament, was afterwards attributed to its true cause in the continual return of the waters from the earth's surface (Eccl. i. 7). The existence of the element of light, as distinct from the sun (Gen. i. 3, 14; Job xxxviii. 19), has likewise been explained as the result of a philosophically correct view as to the nature of light; more probably, however, it was founded upon the incorrect view that the light of the moon was independent of the sun.

6. With regard to the earth's body, the Hebrews conceived its surface to be an immense disc, supported like the flat roof of an Eastern house by pillars (Job ix. 6; Ps. lxxv. 3), which rested on solid foundations (Job xxxviii. 4, 6; Ps. civ. 5; Prov. viii. 29); but where those foundations were on which the "sockets" of the pillars rested, none could tell (Job xxxviii. 6). The more philosophical view of the earth being suspended in free space seems to be implied in Job xxvi. 7; nor is there any absolute contradiction between this and the former view, as the pillars of the earth's surface may be conceived to have been founded on the deep bases of the mountains, which bases themselves were unsupported. Other passages (Ps. xxiv. 2, cxxxvi. 6) seem to imply the existence of a vast subterraneous ocean; the words, however, are susceptible of the sense that the earth was elevated above the level of the seas (Hengstenberg, *Comm.* in loc.), and, that this is the sense in which they are to be accepted, appears from the converse expression "water under the earth" (Ex. xx. 4), which, as contrasted with "heaven above" and "earth beneath," evidently implies the comparative elevation of the three bodies. Beneath the earth's surface was *sheol* (שְׁאוֹל), the *hollow* place, "*hell*" (Num. xvi. 30; Deut. xxxii. 22; Job xi. 8), the "house appointed for the living" (Job xxx. 23), a "land of darkness" (Job x. 21), to which were ascribed in poetical language gates (Is. xxxviii. 10) and bars (Job xvii. 16), and which had its valleys or deep places (Prov. ix. 18). It extended beneath the sea (Job xxvi. 5, 6), and was thus supposed to be conterminous with the upper world.

II. GEOGRAPHY. — We shall notice (1) the views of the Hebrews as to the form and size of the earth, its natural divisions, and physical features; (2) the countries into which they divided it and their progressive acquaintance with those countries. The world in the latter sense was sometimes described by the poetical term *tébel* (תֵּבֵל), corresponding to the Greek *οἰκουμένη* (Is. xiv. 21).

(1.) In the absence of positive statements we have to gather the views of the Hebrews as to the form of the earth from scattered allusions, and these for the most part in the poetical books, where it is difficult to decide how far the language is to be regarded as literal, and how far as metaphorical. There seem to be traces of the same ideas as prevailed among the Greeks, that the world was a disk (Is. xl. 22; the word חוּג, *circle*, is applied exclusively to the circle of the horizon, whether bounded by earth, sea or sky), bordered by the ocean (Deut. xxx. 13; Job xxvi. 10; Ps. cxxxix. 9; Prov. viii. 27), with Jerusalem as its centre (Ez. v. 5), which was thus regarded, like Delphi, as the *navel* (טַבּוּר, Judg. ix. 37; Ez. xxxviii. 12; LXX.; Vulg.), or, according to another view (Gesen. *Thesaur.* s. v.), the highest point of the world. The passages quoted in support of this view admit of a different interpretation; Jerusalem might be regarded as the centre of the world, not only as the seat of religious light and truth, but to a certain extent in a geographical sense; for Palestine was situated between the important empires of Assyria and Egypt; and not only between them but above them, its elevation above the plains on either side contributing to the appearance of its centrality. A different view has been gathered from the expression "four corners" (כַּנְפוֹת, generally applied to the skirts of a garment), as though implying the quadrangular shape of a garment stretched out, according to Eratosthenes' comparison; but the term "corners" may be applied in a metaphorical sense for the extreme ends of the world (Job xxxvii. 3, xxxviii. 13; Is. xi. 12, xxiv 16; Ez. vii. 2). Finally, it is suggested by Bähr (*Symbolik*, i. 170) that these two views may have been held together, the former as the actual and the latter as the symbolical representation of the earth's form. As to the size of the earth, the Hebrews had but a very indefinite notion; in many passages the "earth," or "whole earth," is used as co-extensive with the Babylonian (Is. xiii. 5, xiv. 7 ff., xxiv. 17), or Assyrian empires (Is. x. 14, xiv. 26, xxxvii. 18), just as at a later period the Roman empire was styled *orbis terrarum;* the "ends of the earth" (קְצוֹת) in the language of prophecy applied to the nations on the border of these kingdoms, especially the Medes (Is. v. 26, xiii. 5) in the east, and the islands and coasts of the Mediterranean in the west (Is. xli. 5, 9); but occasionally the boundary was contracted in this latter direction to the eastern shores of the Mediterranean (Is. xxiv. 16; Zech. ix. 10; Ps. lxxii. 8). Without unduly pressing the language of prophecy, it may be said that the views of the Hebrews as to the size of the earth extended but little beyond the nations with which they came in contact; its solidity is frequently noticed, its dimensions but seldom (Job xxxviii. 18; Is. xlii. 5). We shall presently trace the progress of their knowledge in succeeding ages.

The earth was divided into four quarters or regions corresponding to the four points of the compass; these were described in various ways, sometimes according to their positions relatively to a person facing the east, *before* (קֶדֶם), *behind* (אָחוֹר), the *right* hand (יָמִין), and the *left* hand (שְׂמֹאל), representing respectively E., W., S., and N. (Job xxiii. 8, 9); sometimes relatively to the sun's course, the *rising* (מִזְרָח), the *setting* (מִבוֹא, Ps. l. 1) the *brilliant* quarter (דָּרוֹם, Ez. xl. 24), and the *dark* quarter (צָפוֹן, Ex. xxvi. 20 comp. the Greek *ζόφος*, Hom. *Il.* xii. 240); sometimes as the seat of the four winds (Ez. xxxvii. 9); and sometimes according to the physical char-

asteristics, the *sea* (יָם) for the W. (Gen. xxviii. 14), the *parched* (נֶגֶב) for the S. (Ex. xxvii. 9), and the mountains (הָרִים) for the N. (Is. xiii. 4). The north appears to have been regarded as the highest part of the earth's surface, in consequence perhaps of the mountain ranges which existed there, and thus the heaviest part of the earth (Job xxvi. 7). The north was also the quarter in which the Hebrew *el-Dorado* lay, the land of gold mines (Job xxxvii. 22; *margin*; comp. Her. iii. 116).

These terms are very indistinctly used when applied to special localities; for we find the north assigned as the quarter of Assyria (Jer. iii. 18), Babylonia (Jer. vi. 22), and the Euphrates (Jer. xlvi. 10), and more frequently Media (Jer. l. 3; comp. li. 11), while the south is especially represented by Egypt (Is. xxx. 6; Dan. xi. 5). The Hebrews were not more exact in the use of terms descriptive of the physical features of the earth's surface; for instance, the same term (יָם) is applied to the sea (Mediterranean), to the lakes of Palestine, and to great rivers, such as the Nile (Is. xviii. 2), and perhaps the Euphrates (Is. xxvii. 1): mountain (הָר) signifies not only high ranges, such as Sinai or Ararat, but an elevated region (Josh. xi. 16); river (נָהָר) is occasionally applied to the sea (Jon. ii. 3; Ps. xxiv. 2) and to canals fed by rivers (Is. xliv. 27). Their vocabulary, however, was ample for describing the special features of the lands with which they were acquainted, the terms for the different sorts of valleys, mountains, rivers, and springs being very numerous and expressive. We cannot fail to be struck with the adequate ideas of descriptive geography expressed in the directions given to the spies (Num. xiii. 17–20), and in the closing address of Moses (Deut. viii. 7–9); nor less, with the extreme accuracy and the variety of almost technical terms, with which the boundaries of the various tribes are described in the book of Joshua, warranting the assumption that the Hebrews had acquired the art of surveying from the Egyptians (Jahn, i. 6, § 104).

(2.) We proceed to give a brief sketch of the geographical knowledge of the Hebrews down to the period when their distinctive names and ideas were superseded by those of classical writers. The chief source of information open to them, beyond the circle of their own experience, was their intercourse with the Phœnician traders. While the first made them acquainted with the nations from the Tigris to the African desert, the second informed them of the coasts of the Mediterranean, the regions of the north, and the southern districts of Arabia. From the Assyrians and Babylonians they gained some slight knowledge of the distant countries of India, and perhaps even China.[a]

Of the physical objects noticed we may make the following summary, omitting of course the details of the geography of Palestine: (1.) *Seas* — the Mediterranean, which was termed the "*Great* Sea" (Num. xxxiv. 6), the "Sea of the Philistines" (Ex. xxiii. 31), and the "Western Sea" (Deut. xi. 24); the Red Sea, under the names of the "Sea of Suph," *sedge* (Ex. x. 19), and the "Egyptian Sea" (Is. xi. 15); the Dead Sea, under the names "Salt Sea" (Gen. xiv. 3), "Eastern Sea" (Joel ii. 20) and "Sea of the Desert" (Deut. iv. 49); and the Sea of Chinnereth, or Galilee (Num. xxxiv. 11). (2.) *Rivers* — the Euphrates, which was specifically "*the* river" (Gen. xxxi. 21), or "the great river" (Deut. i. 7); the Nile, which was named either Yor (Gen. xli. 1), or Sihor (Josh. xiii. 3); the Tigris, under the name of Hiddekel (Dan. x. 4); the Chebar, *Chaboras*, a tributary to the Euphrates (Ez. i. 3); the Habor, probably the same, but sometimes identified with the *Chaboras* that falls into the Tigris (2 K. xvii. 6); the river of Egypt (Num. xxxiv. 5); and the rivers of Damascus. Abana (*Barada*), and Pharpar (2 K. v. 12). For the Gihon and Pison (Gen. ii. 11, 13), see EDEN. (3.) *Mountains* — Ararat or Armenia (Gen. viii. 4); Sinai (Ex. xix. 2); Horeb (Ex. iii. 1); Hor (Num. xx. 22) near Petra; Lebanon (Deut. iii. 25); and Sephar (Gen. x. 30) in Arabia.

The distribution of the nations over the face of the earth is systematically described in Gen. x., to which account subsequent, though not very important, additions are made in chaps. xxv. and xxxvi., and in the prophetical and historical books. Although the table in Gen. x. is essentially ethnographical, yet the geographical element is also strongly developed: the writer had in his mind's eye not only the descent but the *residence* of the various nations. Some of the names indeed seem to be purely geographical designations; Aram, for instance, means *high lands*; Canaan, *low lands*; Eber, the land *across*, or *beyond*; Sidon, *fishing* station; Madai, *central* land; Tarshish, probably *conquered*; Mizraim, still more remarkably from its dual form, the *two* Egypts; Ophir, the *rich* land. It has indeed been surmised that the names of the three great divisions of the family of Noah are also in their origin geographical terms; Japhet, the *widely extended* regions of the north and west; Ham, the country of the *black* soil, Egypt; and Shem the *mountainous* country; the last is, however, more than doubtful.

In endeavoring to sketch out a map of the world as described in Gen. x., it must be borne in mind that, in cases where the names of the races have not either originated in or passed over to the lands they occupied, the locality must be more or less doubtful. For the migrations of the various tribes in the long lapse of ages led to the transfer of the name from one district to another, so that even in Biblical geography the same name may at different periods indicate a widely different locality. Thus Magog in the Mosaic table may have been located south of the Caucasus, and in Ezekiel's time, north of that range; Gomer at the former period in Cappadocia, at the latter in the *Crimea*. Again, the terms may have varied with the extending knowledge of the earth's surface; Chittim, originally Cyprus, was afterwards applied to the more westerly lands of Macedonia in the age of the Maccabees, if not even to Italy in the prophecies of Daniel, while Tarshish may without contradiction have been the sea-coast of Cilicia in the Mosaic table, and the coast of Spain in a later age. Possibly a solution may be found for the occurrence of more than one Dedan, Sheba, and Havilah, in the fact that these names represent districts of a certain character, of which several might exist in different parts. From the above remarks it will appear how numerous are the elements of uncertainty introduced into this

[a] The geographical questions arising out of the description of the garden of Eden are discussed in a separate article. [EDEN.]

Digitized by Google

subject; unanimity of opinion is almost impossible; nor need it cause surprise, if even in the present work the views of different writers are found at variance. The principle on which the following statement has been compiled is this — to assign to the Mosaic table the narrowest limits within which the nations have been, according to the best authorities, located, and then to trace out, as far as our means admit, the changes which those nations experienced in Biblical times.

Commencing from the west, the "isles of the Gentiles," *i. e.* the coasts and islands of the Mediterranean sea, were occupied by the Japhetites in the following order: Javan, the *Ionians*, in parts of Greece and Asia Minor; Elishah, perhaps the *Æolians*, in the same countries; Dodanim, the *Dardani*, in Illyricum; Tiras in Thrace; Kittim, at *Citium*, in Cyprus; Ashkenaz in Phrygia; Gomer in Cappadocia, and Tarshish in Cilicia. In the north, Tubal, the *Tibareni*, in Pontus; Meshech, the *Moschici*, in Colchis; Magog, *Gogarene*, in northern Armenia; Togarmah in Armenia; and Madai in Media. The Hamites represent the southern parts of the known world; Cush, probably an appellative similar to the Greek *Æthiopia*, applicable to all the dark races of Arabia and eastern Africa; Mizraim in Egypt; Phut in Libya; Naphtuhim and Lehabim, on the coast of the Mediterranean, west of Egypt; Caphtorim, in Egypt; Casluhim from the Nile to the border of Palestine; Pathrusim in Egypt; Seba in Meroë; Sabtah, on the western coast of the straits of *Bab-el-mandeb*; Havilah, more to the south; and Sabtechah in the extreme south, where the *Somauli* now live; Nimrod in Babylonia; Raamah and Dedan on the southwestern coast of the Persian gulf. In the central part of the world were the Shemites: Elam, *Elymais*, in Persia; Asshur in *Assyria*; Arphaxad, *Arrapachitis*, in northern Assyria; Lud in *Lydia*; Aram in Syria and Mesopotamia, and the descendants of Joktan in the peninsula of Arabia.

This sketch is filled up, as far as regards northern Arabia, by a subsequent account, in ch. xxv., of the settlement of the descendants of Abraham by Keturah and of Ishmael; the geographical position of many is uncertain; but we are acquainted with that of the Midianites among the sons of Abraham, and of Nebaioth, *Nabatæa*; Kedar, *Kedrei* (Plin. v. 12); Dumah, *Dumaitha* (Ptol. v. 19), among the sons of Ishmael. Some of the names in this passage have a geographical origin, as Mibsam, a *spice-bearing* land, Tema, an *arid* or *southern* land. Again, in ch. xxxvi. we have some particulars with regard to the country immediately to the south of Palestine, where the aboriginal Horites, the *Troglodytes* of the mountainous districts in the eastern part of Arabia Petræa, were displaced by the descendants of Esau. The narrative shows an intimate acquaintance with this district, as we have the names of various towns, Dinhabah, Bozrah, Avith, Masrekah, Rehoboth, and Pau, few of which have any historical importance. The peninsula of Sinai is particularly described in the book of Exodus.

The countries, however, to which historical interest attaches are Mesopotamia and Egypt. The hereditary connection of the Hebrews with the former of these districts, and the importance of the dynasties which bore sway in it, make it by far the most prominent feature in the map of the ancient world; its designation in the book of Genesis is Padan aram, or Aram-Naharaim; in the north was Ur of the Chaldees, and the Haran to which Terah migrated; in the south was the plain of Shinar, and the seat of Nimrod's capital, Babel; on the banks of the Tigris were the cities of Accad Calneh, Nineveh, Calah, and Resen; and on the banks of the Euphrates, Erech and Rehoboth (Gen. x. 10–12). From the same district issued the warlike expedition headed by the kings of Shinar, Ellasar, Elam, and Tidal, the object of which apparently was to open the commercial route to the Ælanitic gulf (Gen. xiv.), and which succeeded in the temporary subjection of all the intervening nations, the Rephaim in Ashteroth-Karnaim (Bashan), the Zusim in Ham (between the Arnon and Jabbok), the Emim in Shaveh (near the Arnon), and the district of the Amalekites (to the south of Palestine). It is, in short, to the early predominance of the eastern dynasties that we are indebted for the few geographical details which we possess regarding those and the intervening districts. The Egyptian captivity introduces to our notice some of the localities in Lower Egypt, namely, the province of Goshen, and the towns Rameses (Gen. xlvii. 11); On, *Heliopolis* (Gen. xli. 45); Pithom, *Patumus?* (Ex. i. 11); and Migdol, *Magdolum?* (Ex. xiv. 2).

During the period of the Judges the Hebrews had no opportunity of advancing their knowledge of the outer world; but with the extension of their territory under David and Solomon, and the commercial treaties entered into by the latter with the Phœnicians in the north and the Egyptians in the south, a new era commenced. It is difficult to estimate the amount of information which the Hebrews derived from the Phœnicians, inasmuch as the general policy of those enterprising traders was to keep other nations in the dark as to the localities they visited; but there can be no doubt that it was from them that the Hebrews learned the route to Ophir, by which the trade with India and South Africa was carried on, and that they also became acquainted with the positions and productions of a great number of regions comparatively unknown. From Ez. xxvii. we may form some idea of the extended ideas of geography which the Hebrews had obtained: we have notice of the mineral wealth of Spain, the dyes of the Ægean Sea, the famed horses of Armenia, the copper-mines of Colchis, the yarns and embroideries of Assyria, the cutlery of South Arabia, the spices and precious stones of the *Yemen*, and the caravan trade which was carried on with India through the entrepots on the Persian Gulf. As the prophet does not profess to give a systematical enumeration of the places, but selects some from each quarter of the earth, it may fairly be inferred that more information was obtained from that source. Whether it was from thence that the Hebrews heard of the tribes living on the northern coasts of the Euxine — the Scythians (Magog), the Cimmerians (Gomer), and the Roxolani (?), or perhaps *Russians* (Rosch, Ez. xxxviii. 2, *Hebrew text*) — is uncertain: the inroad of the northern hordes, which occurred about Ezekiel's time, may have drawn attention to that quarter.

The progress of information on the side of Africa is clearly marked: the distinction between Upper and Lower Egypt is shown by the application of the name Pathros to the former (Ez. xxix. 14) Memphis, the capital of lower Egypt, is first mentioned in Hosea (ix. 6) under the name Moph, and afterwards frequently as Noph (Is. xix. 13); Thebes, the capital of Upper Egypt, at a later period, as

Digitized by Google

No-Ammon (Nah. iii. 8) and No (Jer. xlvi. 25); and the distant Syene (Ez. xxix. 10). Several other towns are noticed in the Delta; Sin, *Pelusium* (Ez. xxx. 15); Pibeseth, *Bubastis* (Ez. xxx. 17); Zoan, *Tanis* (Is. xix. 11); Tahapanes, or Tahpanhes, *Daphne* (Jer. ii. 16); *Heliopolis*, under the Hebraised form Beth-shemesh (Jer. xliii. 13); and, higher up the Nile, Hanes, *Heracleopolis* (Is. xxx. 4). The position of certain nations seems to have been better ascertained. Cush (*Æthiopia*) was fixed immediately to the south of Egypt, where Tirhakah held sway with *Napata* for his capital (2 K. xix. 9); the Lubim (*Libyans*, perhaps rather *Nubians*, who may also be noticed under the corrupted form Chub, Ez. xxx. 5) appear as allies of Egypt; and with them a people not previously noticed, the Sukkiim, the *Troglodytes* of the western coast of the Red Sea (2 Chr. xii. 3); the Ludim and Phut are mentioned in the same connection (Ez. xxx. 5).

The wars with the Assyrians and Babylonians, and the captivities which followed, bring us back again to the geography of the East. Incidental notice is taken of several important places in connection with these events: the capital of Persia, Shushan, *Susa* (Dan. viii. 2); that of Media, Achmetha, *Ecbatana* (Ezr. vi. 2); Hena, Ivah, and Sepharvaim, on the Euphrates (2 K. xviii. 34); Carchemish, *Circesium*, on the same river (Is. x. 9); Gozan and Halah, on the borders of Media (2 K. xvii. 6); Kir, perhaps on the banks of the Cyrus (2 K. xvi. 9). The names of Persia (2 Chr. xxxvi. 20) and India (Esth. i. 1), now occur: whether the far-distant *China* is noticed at an earlier period under the name Sinim (Is. xlix. 12) admits of doubt.

The names of Greece and Italy are hardly noticed in Hebrew geography: the earliest notice of the former, subsequently to Gen. x., occurs in Is. lxvi. 19, under the name of Javan; for the Javan in Joel iii. 6 is probably in South Arabia, to which we must also refer Ez. xxvii. 13, and Zech. ix. 13. In Dan. viii. 21, the term definitely applies to Greece, whereas in Is. lxvi. it is indefinitely used for the Greek settlements. If Italy is described at all, it is under the name Chittim (Dan. xi. 30).

In the Maccabæan era the classical names came into common use: Crete, Sparta, Delos, Sicyon, Caria, Cilicia, and other familiar names, are noticed (1 Macc. x. 67, xi. 14, xv. 23); Asia, in a restricted sense, as = the Syrian empire (1 Macc. viii. 3); Hispania and Rome (1 Macc. viii. 1–3). Henceforward the geography of the Bible, as far as foreign lands are concerned, is absorbed in the wider field of classical geography. It is hardly necessary to add that the use of classical designations in our Authorized Version is in many instances a departure from the Hebrew text: for instance, *Mesopotamia* stands for Aram-Naharaim (Gen. xxiv. 10); *Æthiopia* for Cush (2 K. xix. 9); the *Chaldæans* for Chasdim (Job i. 17); *Græcia* for Javan (Dan. viii. 21); *Egypt* for Mizraim (Gen. xiii. 10); *Armenia* for Ararat (2 K. xix. 37); *Assyria* for Asshur (Gen. ii. 14); *Idumæa* for Edom (Is. xxxiv 5), and *Syria* for Aram. Arabia, it may be observed, does occur as an original Hebrew name in the later books (Is. xxi. 13), but probably in a restricted sense as applicable to a single tribe.

W. L. B.

EARTHENWARE. [Pottery.]

EARTHQUAKE (רַעַשׁ [*a trembling*])

Earthquakes, more or less violent, are of frequent occurrence in Palestine, as might be expected from the numerous traces of volcanic agency visible in the features of that country. The recorded instances, however, are but few; the most remarkable occurred in the reign of Uzziah (Am. i. 1; Zech. xiv. 5), which Josephus (*Ant.* ix. 10, § 4) connected with the sacrilege and consequent punishment of that monarch (2 Chr. xxvi. 16 ff.). From Zech. xiv. 4 we are led to infer that a great convulsion took place at this time in the Mount of Olives, the mountain being split so as to leave a valley between its summits. Josephus records something of the sort, but his account is by no means clear, for his words (τοῦ ὄρους ἀποῤῥαγῆναι τὸ ἥμισυ τοῦ κατὰ τὴν δύσιν) can hardly mean the *western half of the mountain*, as Whiston seems to think, but the *half of the western mountain*, i. e., of the Mount of Evil Counsel, though it is not clear why this height particularly should be termed the *western* mountain. We cannot but think that the two accounts have the same foundation, and that the Mount of Olives was really affected by the earthquake. Hitzig (*Comm. in Zech.*) suggests that the name מַשְׁחִית, "*corruption*," may have originated at this time, the rolling down of the side of the hill, as described by Josephus, entitling it to be described as the *destroying mountain*, in the sense in which the term occurs in Jer. li. 25. An earthquake occurred at the time of our Saviour's crucifixion (Matt. xxvii. 51–54), which may be deemed miraculous rather from the conjunction of circumstances than from the nature of the phenomenon itself, for it is described in the usual terms (ἡ γῆ ἐσείσθη). Josephus (*Ant.* xv. 5, § 2) records a very violent earthquake, that occurred B. C. 31, in which 10,000 people perished.[a] Earthquakes are not unfrequently accompanied by fissures of the earth's surface; instances of this are recorded in connection with the destruction of Korah and his company (Num. xvi. 32; cf. Joseph. *Ant.* iv. 3, § 3), and at the time of our Lord's death (Matt. xxvii. 51); the former may be paralleled by a similar occurrence at Oppido in Calabria A. D. 1783, where the earth opened to the extent of 500, and a depth of more than 200 feet; and again by the sinking of the bed of the Tagus at Lisbon, in which the quay was swallowed up (Pfaff, *Schöpfungsgesch.* p. 115). These depressions are sometimes on a very large scale; the subsidence of the valley of Siddim at the southern extremity of the Dead Sea may be attributed to an earthquake; similar depressions have occurred in many districts,

[a] * For a tragic account of the great earthquake in 1837, which was so destructive in Galilee, especially in the loss of life at Tiberias and *Safed*, see Robinson's *Bibl. Res.* iii. 321 ff., and Thomson's *Land and Book*, i. 428–433. On the general subject of the frequency of earthquakes in the East, we have copious information in Dr. Pusey's *Minor Prophets* (Am. i. 1). See also Rob *Phys. Geogr* p. 284 ff. It is remarkable that though the figurative allusions to earthquakes are so numerous in the Bible, we read of but two instances mentioned as occurring in Palestine, namely that in the days of Uzziah (Am. i. 1 and Zech. xiv. 5 and the one in connection with the Saviour's death. Earthquakes are not uncommon in the Arabian peninsula (comp. Ex. xix. 18 and 1 K. xix. 11). H.

the most remarkable being the submersion and subsequent re-elevation of the temple of Serapis at Puteoli. The frequency of earthquakes about the Dead Sea is testified in the name Bela (Gen. xiv. 2; comp. Jerome *ad Is.* xv.). Darkness is frequently a concomitant of earthquake. [DARKNESS.] The awe, which an earthquake never fails to inspire, "conveying the idea of some universal and unlimited danger" (Humboldt's *Kosmos*, i. 212), rendered it a fitting token of the presence of Jehovah (1 K. xix. 11); hence it is frequently noticed in connection with his appearance (Judg. v. 4; 2 Sam. xxii. 8; Ps. lxxvii. 18, xcvii. 4, civ. 32; Am. viii. 8; Hab. iii. 10). W. L. B.

EAST (קֶדֶם: מִזְרָח). The Hebrew terms descriptive of the *east* differ in idea, and, to a certain extent, in application; (1) *kedem* properly means that which is *before* or *in front of* a person, and was applied to the east from the custom of turning in that direction when describing the points of the compass, *before*, *behind*, the *right* and the *left*, representing respectively E., W., S., and N. (Job xxiii. 8, 9); (2) *mizrâch* means the place of the *sun's rising*, and strictly answers to the Greek ἀνατολή and the Latin *oriens*; sometimes the full expression מִזְרַח־שֶׁמֶשׁ is used (Judg. xi. 18; Is. xli. 25), and sometimes *kedem* and *mizrâch* are used together (*e. g.* Ex. xxvii. 13; Josh. xix. 12), which is after all not so tautologous as it appears to be in our translation "on the east side eastward." Bearing in mind this etymological distinction, it is natural that *kedem* should be used when the *four* quarters of the world are described (as in Gen. xiii. 14, xxviii. 14; Job xxiii. 8, 9; Ez. xlvii. 18 ff.), and *mizrâch* when the east is only distinguished from the *west* (Josh. xi. 3; Ps. l. 1, ciii. 12, cxiii. 3; Zech. viii. 7), or from some other one quarter (Dan. viii. 9, xi. 44; Am. viii. 12); exceptions to this usage occur in Ps. cvii. 3, and Is. xliii. 5, each, however, admitting of explanation. Again, *kedem* is used in a strictly geographical sense to describe a spot or country immediately *before* another in an easterly direction; hence it occurs in such passages as Gen. ii. 8, iii. 24, xi. 2, xiii. 11, xxv. 6; and hence the subsequent application of the term, as a proper name (Gen. xxv. 6, *eastward, unto the land of Kedem*), to the lands lying immediately eastward of Palestine, namely, Arabia, Mesopotamia, and Babylonia [BENE-KEDEM]; on the other hand *mizrâch* is used of the *far* east with a less definite signification (Is. xli. 2, 25, xliii. 5, xlvi. 11). In describing *aspect* or *direction* the terms are used indifferently (compare *kedem* in Lev. i. 16 and Josh. vii. 2 with *mizrâch* in 2 Chr. v. 12, and 1 Chr. v. 10). The east seems to have been regarded as symbolical of *distance* (Is. xlvi. 11), as the land stretched out in these directions without any known limit. In Is. ii. 6 it appears as the seat of witchery and similar arts (comp. Job xv. 2); the correct text may, however, be מִקֶּסֶם, which gives a better sense (Gesen. *Thesaur.* p. 1193). In the LXX. ἀνατολαί is used both for *kedem* and *mizrâch*. It should be observed that the expression is, with but few exceptions (Dan. viii. 9; Rev. xxi. 13; comp. vii. 2, xvi. 12, from which it would seem to have been St. John's usage to insert ἡλίου), ἀνατολαί (Matt. ii. 1, viii. 11, xxiv. 27; Luke xiii. 29), and not ἀνατολή. It is hardly possible that St. Matthew would use the two terms indifferently in succeeding verses (ii. 1, 2), particularly as he adds the article to ἀνατολή, which is invariably absent in other cases (cf. Rev. xxi. 13). He seems to imply a definiteness in the locality — that it was the country called קֶדֶם, or ἀνατολή (comp. the modern *Anatolia*) as distinct from the quarter or point of the compass (ἀνατολαί) in which it lay. In confirmation of this it may be noticed that in the only passage where the article is prefixed to *kedem* (Gen. x. 30), the term is used for a definite and restricted locality, namely, Southern Arabia. W. L. B.

EASTER (πάσχα: *pascha*). The occurrence of this word in the A. V. of Acts xii. 4 — "Intending after Easter to bring him forth to the people" — is chiefly noticeable as an example of the want of consistency in the translators. In the earlier English versions Easter had been frequently used as the translation of πάσχα. At the last revision Passover was substituted in all passages but this. It would seem from this, and from the use of such words as "robbers of churches" (Acts xix. 37), "town-clerk" (xix. 35), "serjeants" (xvi. 35), "deputy" (xiii. 7, &c.), as if the Acts of the Apostles had fallen into the hands of a translator who acted on the principle of choosing, not the most correct, but the most familiar equivalents. (Comp. Trench, *On the Authorized Version of the N. T.* p. 21 [2d ed. p. 49].) For all that regards the nature and celebration of the Feast thus translated, see PASSOVER. E. H. P.

* In Christian antiquity the joyful remembrance of our Lord's resurrection was intimately associated, as it has ever since been, with the mournful recollection of his death. The allusions in the New Testament are not indeed so distinct (cf. 1 Cor. v. 7) that any positive evidence can be drawn from them; yet the resurrection of Christ was so connected in the teaching of the Apostles with his death (*e. g.* Rom. vi. 9; 1 Cor. xv. 20, &c.) that it is difficult to conceive in the early churches of an annual festival to commemorate the latter apart from all reference to the former.[a] As the two events however took place on different days, and as they called up in the mind different sides of Christ's work upon earth, and along with these different sets of thoughts and emotions, it became easy to observe them in close connection with each other, and yet with a marked separation between them. Such an arrangement probably was recognized under Anicetus at Rome (A. D. 170) by the keeping of Friday in commemoration of the death, and of the following Lord's day as the anniversary of the resurrection, although the decree to this effect ascribed to him cannot be considered genuine. (Cf. Suicer, *Thes.* s. v. πάσχα, II. 625.) Towards the close of the second century, the notices of directions for the observance of the "Passover" or the "Lord's Resurrection" only on the Lord's day become very numerous in the western church. The two names seem to be used indifferently in the admonitions of bishops and the determinations of councils; but in either case it is spoken of as a joyful festival and the termination of the preceding solemn fast.

a * Steitz indeed (in Herzog's *Real-Encycl.* s. v. *Pascha*) has supposed that such a separation existed, and that the event commemorated throughout the first three centuries was only the *death* of Christ; but the notices of antiquity do not seem to support this conclusion. F. G.

Digitized by Google

(See the citations in Suicer, *ubi supra.*) In the Eastern Church, when the fast was terminated and the festival kept on the day of the Jewish Passover, it does not so clearly appear how the distinction was drawn between the two events; but that both were in remembrance cannot be doubted in view of the fact that there were no recriminations upon this point in the sharp and bitter controversy between the East and the West as to the proper time of celebration.

This controversy was at first conducted in a kindly and fraternal spirit. Polycarp visited Rome (A. D. 164) for the express purpose, among other objects, of bringing about an agreement. He was unsuccessful, but separated from Anicetus in peace and in full communion. The same spirit animated the successors of Anicetus down to the time of Victor I. who excommunicated the "quarto-decimans" and threw into the controversy that element of bitterness from which it was never after wholly free. The council of Arles (A. D. 314) finally decided the dispute, now so prolonged and so acrimonious, in favor of the Western practice, and this decision was reaffirmed at Nice. The decision however, seems hardly to have been received in the more distant parts of the empire, as is evidenced by the famous conferences between St. Augustine and the Anglican Christians at the close of the sixth century. The decision of Nice required the festival to be celebrated on the Lord's day following the full moon next succeeding the Vernal Equinox. This still left the question open as to what should be done when that full moon itself fell on a Sunday; and here again the East and West divided, the former in such case following their old custom and celebrating on the same day with the Jews, while the latter deferred their festival to the following Lord's day. This controversy likewise travelled to England and was then settled in favor of the Western practice at the council of Whitby (A. D. 664) after a sharp dispute between Ailbert of Paris and Colman Bp. of Northumbria.

Such controversies, perhaps all the more from the earnestness with which they were conducted, testify to the importance attached to this festival from the earliest antiquity. Had there ever been any disposition among Christians to forget the annual return of the time of the Redeemer's suffering and resurrection, the recurrence of the Jewish Passover must have been a sufficient reminder, and when the Christian Church had outgrown such influence, the observance of the festival had become fixed. Its early name continued to be "the Pass-over," as at once continuing the Jewish festival, and in itself deeply significant. Substantially the same name is still preserved throughout a large part of Christendom. The English name of *Easter* and the German *Ostern* have direct reference rather to the season of the year, the Spring, at which the festival occurs, than to its subject matter; while yet that season itself has always been considered as suggestive of the resurrection. Indeed the names themselves are supposed to be derived from the old word *oster, osten*, = rising, "because nature arises anew in spring." There was a Teutonic goddess *Ostera*, whose festival was celebrated early in the Spring by the Saxons, and the occurrence of the Easter festival at the same season made it easier for them to give up their heathen feast, and perhaps led to their attaching thereto a name to which they were already accustomed. F. G.

EBAL (עֵיבָל [*stone*]: Γαιβήλ, Ταιβήλ [Vat. Γαιβηλ]; Alex. Γαοβηλ in 1 Chr.: *Ebal*). 1. One of the sons of Shobal the son of Seir (Gen. xxxvi. 23; 1 Chr. i. 40).

2. (Om. in Vat. MS.; Alex. Γεμιαν; [Comp Ηβήλ:] *Hebul.*) OBAL the son of Joktan (1 Chr. i. 22; comp. Gen. x. 28). Eleven of Kennicott's MSS. [with the Syriac and Arabic versions] read עובל in 1 Chr. as in Gen.

EBAL, MOUNT (הַר עֵיבָל [*mount of stone*]: ὄρος Γαιβάλ; Joseph. Γιβάλος: *Mons Hebal*), a mount in the promised land, on which, according to the command of Moses, the Israelites were, after their entrance on the promised land, to "put" the curse which should fall upon them if they disobeyed the commandments of Jehovah. The blessing consequent on obedience was to be similarly localized on Mount Gerizim (Deut. xi. 26–29). This was to be accomplished by a ceremonial in which half the tribes stood on the one mount and half on the other; those on Gerizim responding to and affirming blessings, those on Ebal curses, as pronounced by the Levites, who remained with the ark in the centre of the interval (comp. Deut. xxvii. 11–26 with Josh. viii. 30–35, with Joseph. *Ant.* iv. 8, § 44, and with the comments of the Talmud (*Sota*, vii. § 5), quoted in Herxheimer's Pentateuch). But notwithstanding the ban thus apparently laid on Ebal, it was further appointed to be the site of the first great altar to be erected to Jehovah; an altar of large unhewn stones plastered with lime and inscribed with the words of the law (Deut. xxvii. 2–8). On this altar peace-offerings were to be offered, and round it a sacrificial feast was to take place, with other rejoicings (ver. 6, 7). Scholars disagree as to whether there were to be two erections — a kind of cromlech and an altar — or an altar only, with the law inscribed on its stones. The latter was the view of Josephus (*Ant.* iv. 8, § 44, v. 1, § 19), the former is unhesitatingly adopted by the latest commentator (Keil, on Josh. viii. 32). The words themselves may perhaps bear either sense.

The terms of Moses' injunction seem to infer that no delay was to take place in carrying out this symbolical transaction. It was to be "on the day" that Jordan was crossed (xxvii. 1), before they "went in unto the land flowing with milk and honey" (ver. 3). And accordingly Joshua appears to have seized the earliest practicable moment, after the pressing affairs of the siege of Jericho, the execution of Achan, and the destruction of Ai had been despatched, to carry out the command (Josh. viii. 30–35). After this Ebal appears no more in the sacred story.

The question now arises, where were Ebal and Gerizim situated? The all but unanimous reply to this is, that they are the mounts which form the sides of the fertile valley in which lies *Nablûs*, the ancient SHECHEM — Ebal on the north and Gerizim on the south.

(1.) It is plain from the passages already quoted that they were situated near together, with a valley between.

Digitized by Google

(S.) Gerizim was very near Shechem (Judg. ix. 7) and in Josephus's time their names appear to have been attached to the mounts, which were then, as now, Ebal on the north and Gerizim on the south. Since that they have been mentioned by Benjamin of Tudela (Asher, i. 66), and Sir John Maundeville, and among modern travellers by Maundrell (*Mod. Trav.* p. 432).

The main impediment to our entire reception of this view rests in the terms of the first mention of the place by Moses in Deut. xi. 30: A. V. "Are they not on the other side of Jordan, by the way where the sun goeth down in the land of the Canaanites, which dwell in the champaign over against Gilgal, beside the plains of Moreh?" Here the mention of Gilgal, which was in the valley of the Jordan near Jericho, of the valley itself (*Arabah*, mistranslated here only, "champaign"), and of the Canaanites who dwelt there, and also the other terms of the injunction of Moses, as already noticed, seem to imply that Ebal and Gerizim were in the immediate neighborhood of Jericho. And this is strengthened by the narrative of Joshua, who appears to have carried out the prescribed ceremonial on the mounts while his camp was at Gilgal (comp. vii. 2, ix. 6), and before he had (at least before any account of his having) made his way so far into the interior of the country as Shechem.

This is the view taken by Eusebius (*Onomasticon*, Γεβάλ). He does not quote the passage in Deut., but seems to be led to his opinion rather by the difficulty of the mountains at Shechem being too far apart to admit of the blessings and cursings being heard, and also by his desire to contradict the Samaritans; add to this that he speaks from no personal knowledge, but simply from hearsay (λέγεται), as to the existence of two such hills in the Jordan valley. The notice of Eusebius is merely translated by Jerome, with a shade more of animosity to the Samaritans (*vehementer errant*), and expression of difficulty as to the distance, but without any additional information. Procopius and Epiphanius also followed Eusebius, but their mistakes have been disposed of by Reland (*Pal.* pp. 503, 504; *Miscell.* pp. 129–133).

With regard to the passage in Deut., it will perhaps assume a different aspect on examination. (1.) Moses is represented as speaking from the east side of the Jordan, before anything was known of the country on the west, beyond the exaggerated reports of the spies, and when everything there was wrapped in mystery, and localities and distances had not assumed their due proportions. (2.) A closer rendering of the verse is as follows: "Are they not on the other side the Jordan, beyond — (אַחֲרֵי), the word rendered "the *backside* of the desert," in Ex. iii. 1) — the way of the sunset, in the land of the Canaanite who dwells in the Arabah over against Gilgal, near the terebinths of Moreh." If this rendering is correct, a great part of the difficulty has disappeared. Gilgal no longer marks the site of Ebal and Gerizim, but of the dwelling of the Canaanites, who were, it is true, the first to encounter the Israelites on the other side the river, in their native lowlands, but who, we have it actually on record, were both in the time of Abraham (Gen. xii. 6) and of the conquest (Josh. xvii. 18) located about Shechem. The word now rendered "beyond" is not represented at all in the A. V., and it certainly throws the locality much further back; and lastly there is the striking landmark of the trees of Moreh, which were standing by Shechem when Abraham first entered the land, and whose name probably survived in Morthia, or Mamortha, a name of Shechem found on coins of the Roman period (Reland, *Miscell.* pp. 137, 139).

In accordance with this is the addition in the Samaritan Pentateuch, after the words "the terebinths of Moreh," at the end of Deut. xi. 30, of the words "over against Shechem." This addition is the more credible because there is not, as in the case noticed afterwards, any apparent motive for it If this interpretation be accepted, the next verse (31) gains a fresh force: "*For* ye shall pass over Jordan [not only to meet the Canaanites immediately on the other side, but] to go in to possess the land [the whole of the country, even the heart of it, where these mounts are situated (glancing back to ver. 29)], the land which Jehovah your God giveth you; and ye shall possess it, and dwell therein." And it may also be asked whether the significance of the whole solemn ceremonial of the blessing and cursing is not missed if we understand it as taking place directly a footing had been obtained on the outskirts of the country, and not as acted in the heart of the conquered land, in its most prominent natural position, and close to its oldest city — Shechem.

This is evidently the view taken by Josephus. His statement (*Ant.* v. 1, § 19) is that it took place after the subjugation of the country and the establishment of the Tabernacle at Shiloh. *He* has no misgivings as to the situation of the mountains. They were at Shechem (ἐπὶ Σικίμων), and from thence, after the ceremony, the people returned to Shiloh.

The narrative of Joshua is more puzzling. But even with regard to this something may be said. It will be at once perceived that the book contains no account of the conquest of the centre of the country, of those portions which were afterwards the mountain of Ephraim, Esdraelon, or Galilee. We lose Joshua at Gilgal, after the conquest of the south, to find him again suddenly at the waters of Merom in the extreme north (x. 43, xi. 7). Of his intermediate proceedings the only record that seems to have escaped is the fragment contained in viii. 30–35. Nor should it be overlooked that some doubt is thrown on this fragment by its omission in both the Vat. and Alex. MSS. of the LXX.

The distance of Ebal and Gerizim from each other is not such a stumbling-block to us as it was to Eusebius; though it is difficult to understand how he and Jerome should have been ignorant of the distance to which the voice will travel in the clear, elastic atmosphere of the East. Prof. Stanley has given some instances of this (*S. & P.* p. 13); others equally remarkable were observed by the writer; and he has been informed by a gentleman long resident in the neighborhood that a voice can be heard without difficulty across the valley separating the two spots in question (see also Bonar, p. 371).

It is well known that one of the most serious variations between the Hebrew text of the Pentateuch and the Samaritan text, is in reference to Ebal and Gerizim. In Deut. xxvii. 4, the Samaritan has Gerizim, while the Hebrew (as in A. V.) has Ebal, as the mount on which the altar to Jehovah and the inscription of the law were to be erected. Upon this basis they ground the sanctity of Gerizim and the authenticity of the temple and

Digitized by Google

holy place, which did exist and still exist there The arguments upon this difficult and hopeless question will be found in Kennicott (*Dissert.* 2), and in the reply of Verschuir (Leovard. 1775; quoted by Gesenius, *de Pent. Sam.* p. 61). Two points may merely be glanced at here which have apparently escaped notice. (1.) Both agree that Ebal was the mount on which the cursings were to rest, Gerizim that for the blessings. It appears inconsistent, that Ebal, the mount of cursing, should be the site of the altar and the record of the law, while Gerizim, the mount of blessing, should remain unoccupied by sanctuary of any kind. (2.) Taking into account the known predilection of Orientals for ancient sites on which to fix their sanctuaries, it is more easy to believe (in the absence of any evidence to the contrary) that in building their temple on Gerizim, the Samaritans were making use of a spot already enjoying a reputation for sanctity, than that they built on a place upon which the curse was laid in the records which they received equally with the Jews. Thus the very fact of the occupation of Gerizim by the Samaritans would seem an argument for its original sanctity.

Ebal is rarely ascended by travellers, and we are therefore in ignorance as to how far the question may be affected by remains of ancient buildings thereon. That such remains do exist is certain, even from the very meagre accounts published (Bartlett, *Walks about Jerusalem*, App. 251, 252; and Narrative of Rev. J. Mills in *Trans. Pal. Archæol. Assoc.* 1855), while the mountain is evidently of such extent as to warrant the belief that there is a great deal still to discover. [See also Mills's *Three Months' Residence at Nablus* (Lond. 1864).]

The report of the old travellers was that Ebal was more barren than Gerizim (see Benjamin of Tudela, &c.), but this opinion probably arose from a belief in the effects of the curse mentioned above. At any rate, it is not borne out by the latest accounts, according to which there is little or no perceptible difference. Both mountains are terraced, and Ebal is "occupied from bottom to top by beautiful gardens" (Mills; see also Porter, *Handbook*, p. 332). The slopes of Ebal towards the valley appear to be steeper than those of Gerizim (Wilson, *Lands*, ii. 45, 71). It is also the higher mountain of the two. There is some uncertainty about the measurements, but the following are the results of the latest observations (Van de Velde, *Memoir*, p. 178).

Nablûs above sea,		1672 ft.			
Gerizim	do.	2600 "	. . above *Nablûs*,		928 ft.
Ebal	do. about	2700 "	. . do.		1028 "

According to Wilson (*Lands*, ii. 71, — but see Rob. ii. 277, 280, note) it is sufficiently high to shut out Hermon from the highest point of Gerizim. The structure of Gerizim is nummulitic limestone with occasional outcrops of igneous rock (Poole, in *Geogr. Journ.* xxvi. 56), and that of Ebal is probably similar. At its base above the valley of *Nablûs* are numerous caves and sepulchral excavations. The modern name of Ebal is *Sitti Salumiyah*, from a Mohammedan female saint, whose tomb is standing on the eastern part of the ridge, a little before the highest point is reached (Wilson, ii. 71, note). By others, however, it is reported to be called '*Imád-ed-Deen*, "the pillar of the religion" (Stanley, p. 238, note). The tomb of another saint called *Amád* is also shown (Ritter, p. 641), with whom the latter name may have some connection. On the southeast shoulder is a ruined site bearing the name of '*Askar* (Rob. iii. 132) [SYCHAR.] G.

E'BED. 1. (עֶבֶד = "slave:" but many MSS., and the Syr. and Arab. versions, have עבר, EBER: Ἰωβήλ; Alex. Αβεδ; [exc. ver. 35, Σαβεr:] *Ebed* [?] and *Obed*), father of GAAL, who with his brethren assisted the men of Shechem in their revolt against Abimelech (Judg. ix. 26, 28, 30, 31, 35).

2. (עֹבֵד: Ὠβήθ; Alex. Ὠβηv; [Comp. Ὠβήδ:] *Abed*), son of Jonathan; one of the Bene-Adin [sons of Adin] who returned from Babylon with Ezra (Exr. viii. 6). In 1 Esdras the name is given OBETH.

It would add greatly to the force of many passages in the O. T. if the word "slave" or "bondman" were appropriated to the Hebrew term *Ebed*, while "servant," "attendant," or "minister," were used to translate *Na'ar*, *Mesharet*, &c. In the addresses of subjects to a ruler, the oriental character of the transaction would come home to us at once if we read "what saith my lord to his slave" — the very form still in use in the East, and familiar to us all in the *Arabian Nights* and other oriental works — instead of "his servant." G.

E'BED-ME'LECH (עֶבֶד־מֶלֶךְ [see below]: Αβδεμέλεχ: *Abdemelech*), an Æthiopian eunuch in the service of king Zedekiah, through whose interference Jeremiah was released from prison, and who was on that account preserved from harm at the taking of Jerusalem (Jer. xxxviii. 7 ff., xxxix. 15 ff.). His name seems to be an official title = *king's slave*, i. e. *minister*.

* Out of the hints in Jer. xxxviii. 7–13 (very imperfectly unfolded in the A. V.) Stanley draws the following scene: "Ebed-melech found the king sitting in the great northern entrance of the Temple, and obtained a revocation of the order [by which Jeremiah had been put into the dungeon]; and then, under the protection of a strong guard, proceeded with a detailed care, which the prophet seems gratefully to record, to throw down a mass of soft rags from the royal wardrobe to ease the rough ropes with which he drew him out of the well." (*Lectures on the Jewish Church*, ii. 603.) The Æthiopian's escape amid the disasters which fell on the nation (as the prophet foretold) is recorded as exemplifying the truth that those who put their trust in God shall be saved (Jer. xxxix. 18). H.

EBEN-E'ZER (אֶבֶן הָעֵזֶר. *the stone of help*: Αβενέζερ; [Vat. 1 Sam. v. 1, Αβεννηρ; Alex. iv. 1, v. 1, Αβεννεζερ:] Joseph. Λίθος ἰσχυρός: *lapis adjutorii*), a stone set up by Samuel after a signal defeat of the Philistines, as a memorial of the "help" received on the occasion from Jehovah (1 Sam. vii. 12). "He called the name of it Eben-ezer, saying, 'hitherto hath Jehovah helped us'" (*azárânú*, אֲזָרָנוּ). Its position is carefully defined as between MIZPEH — "the watch-tower," one of the conspicuous eminences a few miles north of Jerusalem — and SHEN, "the tooth" or "crag." Neither of these points, how-

a For a peculiarity in the Hebrew name in iv. 1 — the definite article to both words, — see Ewald *Ausführl. Lehrb.* § 290 d.

ever, have been identified with any certainty — the latter not at all.[a] According to Josephus's record of the transaction (*Ant.* vi. 2, 2), the stone was erected to mark the limit of the victory, a spot which he calls Korraia, but in the Hebrew BETH-CAR. It is remarkable that of the occurrences of the name Eben-ezer, two (1 Sam. iv. 1, v. 1) are found in the order of the narrative before the place received its title. But this would not unnaturally happen in a record written after the event, especially in the case of a spot so noted as Eben-ezer must have been. G.

* Though Eben-ezer is mentioned twice before Samuel's victory (see above), it was on the same occasion, namely, when the Hebrews fought at that place with the Philistines. Rüetschi suggests (Herzog's *Real-Encyk.* iii. 618) that possibly there may have been a village Eben-ezer, near which Samuel's "stone," taking the same name, was afterwards set up. But there is no difficulty in supposing a case of *prolepsis*. [See DAN.] H.

EBER (עֵבֶר [*beyond*]: Ἔβερ, Ἔβερ: *Heber* [in Num. xxiv. 24, Ἔβραῖοι, Vulg. *Hebræi*]). 1. Son of Salah, and great-grandson of Shem (Gen. x. 24, [xi. 14–17;] 1 Chr. i. 19). For confusion between Eber and Heber see HEBER; and for the factitious importance attached to this patriarch, and based upon Gen. x. 21, Num. xxiv. 24, see HEBREW. T. E. B.

2. (עֵבֶר: Ὀβήδ; [Ald. Ἔβερ:] *Heber*). Son of Elpaal and descendant of Shaharaim of the tribe of Benjamin (1 Chr. viii. 12). He was one of the founders of Ono and Lod with their surrounding villages.

3. (Ἀβέδ; [Vat. Alex. omit.]) A priest, who represented the family of Amok, in the days of Joiakim the son of Jeshua (Neh. xii. 20). W. A. W.

EBI'ASAPH (אֶבְיָסָף: Ἀβιασάφ and [1 Chr. vi. 23,] Ἀβιασάφ; [1 Chr. vi. 23, Vat. Ἀβιαθαρ; vi. 37, Ἀβιασαρ, 2. m. -σαφ; Alex.[1] vi. 23, Ἀβισαφ, 2. m. Ἀβιασαφ:] *Abiasaph*), a Kohathite Levite of the family of Korah, one of the forefathers of the prophet Samuel and of Heman the singer (1 Chr. vi. 23, 37). The same man is probably intended in ix. 19. The name appears also to be identical [as a contracted form] with ABIASAPH (which see), and in one passage (1 Chr. xxvi. 1) to be abbreviated to Asaph.

EBONY (הָבְנִים, *hobnim*: καὶ τοῖς ἐλεφαντόδοντας;[b] ἐβένους, Symm.: (*dentes*) *hebeninos*) occurs only in Ez. xxvii. 15, as one of the valuable commodities imported into Tyre by the men of Dedan. [DEDAN.] It is mentioned together with "horns of ivory," and it may hence be reasonably conjectured that ivory and ebony came from the same country. The best kind of ebony is yielded by the *Diospyros ebenum*, a tree which grows in Ceylon and Southern India: but there are many trees of the natural order *Ebenaceæ* which produce this material. Ebony is also yielded by trees belonging to different natural families in other parts of the world, as in Africa. The ancients held the black heart-wood in high esteem. Herodotus (iii. 97) mentions ebony (φάλαγγας ἐβένου) as one of the precious substances presented by the people of Ethiopia to the king of Persia. Dioscorides (i. 130) speaks of two kinds of ebony, an Indian and an Ethiopian; he gives the preference to the latter kind. It is not known what tree yielded the Ethiopian ebony. Royle says, "No Abyssinian ebony is at present imported. This, however, is more likely to be owing to the different routes which commerce has taken, but which is again returning to its ancient channels, than to the want of ebony in ancient Ethiopia." There can be little doubt that the tree

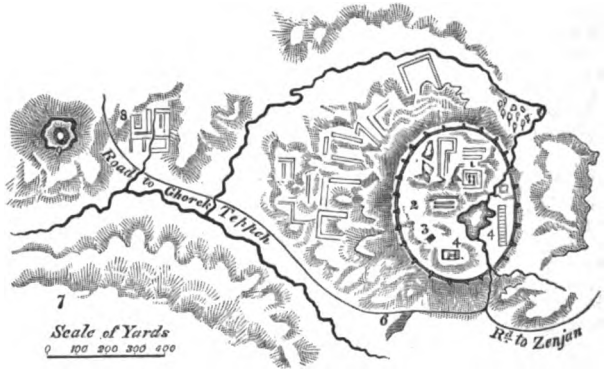
Diospyros Ebenum.

which yielded Ethiopian ebony is distinct from the *Diospyros ebenum*, and probably belongs to another genus altogether. Virgil (*Georg.* ii. 116) says that "India alone produces the black ebony;" and Theophrastus (*Hist. Plant.* iv. 4, § 6) asserts that "ebony is peculiar to India." The Greek word ἔβενος, the Latin *ebenus*, our "ebony," have all doubtless their origin in the Hebrew *hobnim*, a term which denotes "wood as hard as stone" (comp the German *Steinholz*, "fossil-wood;" see Gesenius, *Thes.* s. v., and Fürst, *Heb. Concord.*). It is probable that the plural form of this noun is used to express the *billets* into which the ebony was cut previous to exportation, like our "log-wood." There is every reason for believing that the ebony afforded by the *Diospyros ebenum* was imported from India or Ceylon by Phœnician traders; though it is equally probable that the Tyrian merchants were supplied with ebony from trees which grew in Ethiopia. See full discussions on the ebony of the ancients in Bochart, *Hieroz.* ii. 714, and Salmasius, *Plin. Exercitat.* p. 735 c; comp. also Royle in Kitto's *Cycl.*, art. *Hobnim*. According to Sir E. Tennent (*Ceylon*, i. 116) the following trees yield ebony: *Diospyros ebenum*, *D. reticulata*, *D. ebenaster*, and *D. hirsuta*. The wood of the first-named tree, which is abundant throughout all the flat country to the west of Trincomalee, "excels all others in the evenness and intensity of its color, The centre of the trunk is the only portion which furnishes the extremely black part which is the ebony of commerce; but the trees are of such magnitude that reduced logs of two feet in diameter,

[a] * Shen was probably not so much the name of a place, as a solitary "tooth" or crag which served as a landmark. H.

[b] For the Hebrew word used by the LXX., see Rosenmüller's *Schol. ad* Ez. xxvii. 15.

Digitized by Google



and varying from 10 to 15 feet in length, can be readily procured from the forests at Trincomalee" (*Ceylon*, l. c.). W. H.

EBRO'NAH. [ABRONAH.]

ECA'NUS, one of the five swift scribes who attended on Esdras (2 Esdr. xiv. 24).

ECBATA'NA (אַחְמְתָא: Ἀμαθά, Ἐκβάτανα: *Ecbatana*). It is doubtful whether the name of this place is really contained in the Hebrew Scriptures. Many of the best commentators understand the expression בְּאַחְמְתָא, in Ezra vi. 2, differently, and translate it *in arcâ*, "in a coffer" (see Buxtorf and others, and so our English Bible, *in the margin*). The LXX., however, give ἐν πόλει, "in a city," or (in some MSS. [*e. g.* Alex.]) ἐν Ἀμαθὰ ἐν πόλει [Comp. Ald. ἐν Ἀμαθὰ πόλει], which favors the ordinary interpretation. If a city is meant, there is little doubt of one of the two Ecbatanas being intended, for except these towns there was no place in the province of the Medes "which contained a palace" (בִּירָה), or where records are likely to have been deposited. The name *'Achmetha*, too, which at first sight seems somewhat remote from Ecbatana, wants but one letter of *Hagmatana*, which was the native appellation. In the apocryphal books Ecbatana is frequently mentioned (Tob. iii. 7, xiv. 12, 14; Jud. i. 1, 2; 2 Macc. ix. 3, &c.); and uniformly with the later and less correct spelling of Ἐκβάτανα, instead of the earlier and more accurate form, used by Herodotus, Æschylus, and Ctesias, of Ἀγβάτανα.

Two cities of the name of Ecbatana seem to have existed in ancient times, one the capital of Northern Media, the Media Atropatênê of Strabo, the other the metropolis of the larger and more important province known as Media Magna (see Sir H. Rawlinson's paper on the Atropatenian Ecbatana, in the 10th volume of the *Journal of the Geographical Society*, art. ii.). The site of the former appears to be marked by the very curious ruins at *Takht-i-Suleïman* (lat. 36° 28′, long. 47° 9′); while that of the latter is occupied by *Hamadan*, which is one of the most important cities of modern Persia. There is generally some difficulty in determining, when Ecbatana is mentioned, whether the northern or the southern metropolis is intended. Few writers are aware of the existence of the two cities, and they lie sufficiently near to one another for geographical notices in most cases to suit either site. The northern city was the "seven-walled town" described by Herodotus, and declared by him to have been the capital of Cyrus (Herod. i. 98, 99, 153; comp. Mos. Choren. ii. 84); and it was thus most probably there that the roll was found which proved to Darius that Cyrus had really made a decree allowing the Jews to rebuild their Temple.

Plan of Ecbatana.

EXPLANATION.

1. Remains of a Fire-Temple.
2. Ruined Mosque.
3. Ancient buildings with shafts and capitals.
4. Ruins of the Palace of Abakai Khan.
5. Cemetery.
6. Ridge of Rock called "the Dragon."
7. Hill called "Tawilah," or "the Stable."
8. Ruins of Kalisiah.
9. Rocky hill of Zindani-Soleïman.

Various descriptions of the northern city have come down to us, but none of them is completely to be depended on. That of the Zendavesta (Vendidad, Fargard II.) is the oldest, and the least exaggerated. "Jemshid," it is said, "erected a *Var*, or fortress, sufficiently large, and formed of squared blocks of stone; he assembled in the place a vast population and stocked the surrounding country with cattle for their use. He caused the water of the great fortress to flow forth abundantly. And within the var, or fortress, he erected a lofty palace, encompassed with walls, and laid it out in many separate divisions, and there was no place, either in front or rear, to command and overawe the fortress." Herodotus, who ascribes the foundation of the city to his king Deïoces, says: "The Medes were obedient to Deïoces, and built the city now called Agbatana, the walls of which are of great size and strength, rising in circles, one within the other. The plan of the place is that each of the walls should out-top the one beyond it by the battlements. The nature of the ground, which is a gentle hill, favors this arrangement in some degree, but it was mainly effected by art. The number of the circles is seven, the royal palace and the treasuries standing within the last. The circuit of the outer wall is nearly the same with that of Athens. Of this outer wall the battlements are white, of the

Digitized by Google

next black, of the third scarlet, of the fourth blue, of the fifth orange: all these are colored with paint. The two last have their battlements coated respectively with silver and gold. All these fortifications Deioces caused to be raised for himself and his own palace. The people were required to build their dwellings outside the circuit of the walls" (Herod. i. 98, 99). Finally, the book of Judith, probably the work of an Alexandrian Jew, professes to give a number of details, which appear to be drawn chiefly from the imagination of the writer (Jud. i. 2–4).

The peculiar feature of the site of *Takht-i-Suleïman*, which it is proposed to identify with the northern Ecbatana, is a conical hill rising to the height of about 150 feet above the plain, and covered both on its top and sides with massive ruins of the most antique and primitive character. A perfect enceinte, formed of large blocks of squared stone, may be traced round the entire hill along its brow; within, there is an oval enclosure about 800 yards in its greatest and 400 in its least diameter, strewn with ruins, which cluster round a remarkable lake. This is an irregular basin, about 300 paces in circuit, filled with water exquisitely clear and pleasant to the taste, which is supplied in some unknown way from below, and which stands uniformly at the same level, whatever the quantity taken from it for irrigating the lands which lie at the foot of the hill. This hill itself is not perfectly isolated, though it appears so to those who approach it by the ordinary route. On three sides — the south, the west, and the north — the acclivity is steep and the height above the plain uniform, but on the east it abuts upon a hilly tract of ground, and here it is but slightly elevated above the adjacent country. It cannot therefore have ever answered exactly to the description of Herodotus, as the eastern side could not anyhow admit of seven walls of circumvallation. It is doubted whether even the other sides were thus defended. Although the flanks on these sides are covered with ruins, "no traces remain of any *wall* but the upper one" (*As. Journ.* x. 52). Still, as the nature of the ground on three sides would allow this style of defense, and as the account in Herodotus is confirmed by the Armenian historian, writing clearly without knowledge of the earlier author, it seems best to suppose, that in the peaceful times of the Persian empire it was thought sufficient to preserve the upper enceinte, while the others were allowed to fall into decay, and ultimately were superseded by domestic buildings. With regard to the coloring of the walls, or rather of the battlements, which has been considered to mark especially the fabulous character of Herodotus' description, recent discoveries show that such a mode of ornamentation was actually in use at the period in question in a neighboring country. The temple of the Seven Spheres at Borsippa was adorned almost exactly in the manner which Herodotus assigns to the Median capital [BABEL, TOWER OF]; and it does not seem at all improbable that, with the object of placing the city under the protection of the Seven Planets, the seven walls may have been colored nearly as described. Herodotus has a little deranged the order of the hues, which should have been either black, orange, scarlet, gold, white, blue, silver — as at the Borsippa temple, — or black white, orange, blue, scarlet, silver, gold — if the order of the days dedicated to the planets were followed. Even the use of silver and gold in external ornamentation — which seems at first sight highly improbable — is found to have prevailed. Silver roofs were met with by the Greeks at the southern Ecbatana (Polyb. x. 27, §§ 10–12); and there is reason to believe that at Borsippa the gold and silver stages of the temple were actually coated with those metals.

The northern Ecbatana continued to be an important place down to the 13th century after Christ By the Greeks and Romans it appears to have been known as Gaza, Gazaca, or Canzaca, "the treasure city," on account of the wealth laid up in it, while by the Orientals it was termed *Shiz*. Its decay is referable to the Mogul conquests, ab. A. D. 1200; and its final ruin is supposed to date from about the 15th or 16th century (*As. Soc. Journ.* vol. x. part i. p. 49).

In the 2d book of Maccabees (ix. 3, &c.) the Ecbatana mentioned is undoubtedly the southern city, now represented both in name and site by *Hamadán*. This place, situated on the northern flank of the great mountain called formerly Orontes, and now *Elwend*, was perhaps as ancient as the other, and is far better known in history. If not the Median capital of Cyrus, it was at any rate regarded from the time of Darius Hystaspis as the chief city of the Persian *satrapy* of Media, and as such it became the summer residence of the Persian kings from Darius downwards. It was occupied by Alexander soon after the battle of Arbela (Arr. *Exp. Alex.* iii. 19), and at his decease passed under the dominion of the Seleucidæ. In the wars between his successors it was more than once taken and retaken, each time suffering largely at the hands of its conquerors (Polyb. x. 27). It was afterwards recognized as the metropolis of their empire by the Parthians (Oros. vi. 4). During the Arabian period, from the rise of Baghdad on the one hand and of Isfahan on the other, it sank into comparative insignificance; but still it has never descended below the rank of a provincial capital, and even in the present depressed condition of Persia, it is a city of from 20,000 to 30,000 inhabitants. The Jews, curiously enough, regard it as the residence of Ahasuerus (Xerxes?) — which is in Scripture declared to be Susa (Esth. i. 2, ii. 3 &c.) — and show within its precincts the tombs of Esther and Mordecai (Ker Porter, vol. ii. pp. 105-110). It is not distinguished by any remarkable peculiarities from other oriental cities of the same size.

The Ecbatana of the book of Tobit is thought by Sir H. Rawlinson to be the *northern* city (see *As. Soc. Journ.* x. pt. i. pp. 137–141). G. R.

ECCLESIASTES (קֹהֶלֶת, *Koheleth*: Ἐκκλησιαστής: *Ecclesiastes*). I. *Title.* — The title of this book is taken from the name by which the son of David, or the writer who personates him, speaks of himself throughout it. The apparent anomaly of the feminine termination ת indicates that the abstract noun has been transferred from the office to the person holding it (Gesen. *s. v.*), and has thus become capable of use as a masculine proper name, a change of meaning of which we find other instances in *Sophereth* (Neh. vii. 57), *Pochereth* (Ezr. ii. 57); and hence, with the single exception of Eccl. vii. 27, the noun, notwithstanding its form, is used throughout in the masculine. Ewald, however (*Poet. Bücher.* iv. 189), connects the feminine termination with the noun חָכְמָה

Digitized by Google

(wisdom), understood, and supposes a poetic license in the use of the word as a kind of symbolic proper name, appealing to Prov. xxx. 1, xxxi. 1, as examples of a like usage. As connected with the root קָהַל, "to call together," and with קָהָל, "assembly," the word has been applied to one who speaks publicly in an assembly, and there is, to say the least, a tolerable agreement in favor of this interpretation. Thus we have the comment of the Midrash, stating that the writer thus designates himself, "because his words were spoken in the assembly" (quoted in Preston's *Ecclesiastes*, note on i. 1); the rendering Ἐκκλησιαστής by the LXX.; the adoption of this title by Jerome (*Præf. in Eccl.*), as meaning "qui cœtum, *i. e.* ecclesiam congregat quem nos nuncupare possumus Concionatorem;" the use of "Prediger" by Luther, of "Preacher" in the Authorized Version. On the other hand, taking קָהַל in the sense of collecting things, not of summoning persons, and led perhaps by his inability to see in the book itself any greater unity of design than in the chapters of Proverbs, Grotius (*in Eccles.* i. 1) has suggested Συναθροιστής (*compiler*) as a better equivalent. In this he has been followed by Herder and Jahn, and Mendelssohn has adopted the same rendering (notes on i. 1, and vii. 27, in Preston), seeing in it the statement partly that the writer had compiled the sayings of wise men who had gone before him, partly that he was, by an inductive process, gathering truths from the facts of a wide experience.

II. *Canonicity.* — In the Jewish division of the books of the Old Testament, Ecclesiastes ranks as one of the five Megilloth or Rolls [BIBLE], and its position, as having canonical authority, appears to have been recognized by the Jews from the time in which the idea of a canon first presented itself. We find it in all the Jewish catalogues of the sacred books, and from them it has been received universally by the Christian Church. Some singular passages in the Talmud indicate, however, that the recognition was not altogether unhesitating, and that it was at least questioned how far the book was one which it was expedient to place among the Scriptures that were read publicly. Thus we find the statements (Mishna, *Shabbas*, c. x., quoted by Mendelssohn in Preston, p. 74; Midrash, fol. 114 a; Preston, p. 13) that "the wise men sought to secrete the book *Koheleth*, because they found in it words tending to heresy," and "words contradictory to each other;" that the reason they did not secrete it was "because its beginning and end were consistent with the law;" that when they examined it more carefully they came to the conclusion, "We have looked closely into the book *Koheleth*, and discovered a meaning in it." The chief interest of such passages is of course connected with the inquiry into the plan and teaching of the book, but they are of some importance also as indicating that it must have commended itself to the teachers of an earlier generation, either on account of the external authority by which it was sanctioned, or because they had a clearer insight into its meaning, and were less startled by its apparent difficulties. Traces of this controversy are to be found in a singular discussion between the schools of Shammai and Hillel, turning on the question whether the book Koheleth were inspired, and in the comments on that question by R. Ob. de Bartenora and Maimonides (Surenhus iv. 349).

III. *Author and Date.* — The questions of the authorship and the date of this book are so closely connected that they must be treated of together and it is obviously impossible to discuss the points which they involve without touching also on an inquiry into the relation in which it stands to Hebrew literature generally.

The hypothesis which is naturally suggested by the account that the writer gives of himself in ch. i. and ii. is that it was written by the only "son of David" (i. 1), who was "king over Israel in Jerusalem" (i. 12). According to this notion we have in it what may well be called the Confessions of King Solomon, the utterance of a repentance which some have even ventured to compare with that of the 51st Psalm. Additional internal evidence has been found for this belief in the language of vii. 26–28, as harmonizing with the history of 1 K. xi. 3, and in an interpretation (somewhat forced perhaps) which refers iv. 13–15 to the murmurs of the people against Solomon and the popularity of Jeroboam as the leader of the people, already recognized as their future king (Mendelssohn and Preston *in loc.*). The belief that Solomon was actually the author was, it need hardly be said, received generally by the Rabbinic commentators and the whole series of Patristic writers. The apparent exceptions to this in the passages by Talmudic writers which ascribe it to Hezekiah (*Baba Bathra*, c. i. fol. 15), or Isaiah (*Shalsh. Hakkab.* fol. 66 *b*, quoted by Michaelis), can hardly be understood as implying more than a share in the work of editing, like that claimed for the "men of Hezekiah" in Prov. xxv. 1. Grotius (*Præf. in Eccles.*) was indeed almost the first writer who called it in question, and started a different hypothesis. It can hardly be said, however, that this consensus is itself decisive. In questions of this kind the later witnesses add nothing to the authority of the earlier, whose testimony they simply repeat, and unless we had clearer knowledge than we have as to the sources of information or critical discernment of those by whom the belief was adopted, we ought not to look on their acceptance of it as closing all controversy. The book which bears the title of the "Wisdom of Solomon" asserts, both by its title and its language (vii. 1–21), a claim to the same authorship, and, though the absence of a Hebrew original led to its exclusion from the Jewish canon, the authorship of Solomon was taken for granted by all the early Christian writers who quote it or refer to it, till Jerome had asserted the authority of the Hebrew text as the standard of canonicity, and by not a few afterwards. It may seem, however, as if the whole question were settled for all who recognise the inspiration of Scripture by the statement, in a canonical and inspired book, as to its own authorship. The book purports, it is said (Preston, *Proleg. in Eccles.* p. 5), to be written by Solomon, and to doubt the literal accuracy of this statement is to call in question the truth and authority of Scripture. It appears questionable, however, whether we can admit an *a priori* argument of this character to be decisive. The hypothesis that every such statement in a canonical book must be received as literally true, is, in fact, an assumption that inspired writers were debarred from forms of composition which were open, without blame, to others. In the literature of every other nation the form of personated

Digitized by Google

authorship, where there is no *animus decipiendi*, has been recognized as a legitimate channel for the expression of opinions, or the quasi-dramatic representation of character. Why should we venture on the assertion that if adopted by the writers of the Old Testament it would have made them guilty of a falsehood, and been inconsistent with their inspiration? The question of authorship does not involve that of canonical authority. A book written by Solomon would not necessarily be inspired and canonical. There is nothing that need startle us in the thought that an inspired writer might use a liberty which has been granted without hesitation to the teachers of mankind in every age and country.

The preliminary difficulty being so far removed, we can enter on the objections which have been urged against the traditional belief by Grotius and later critics, and the hypotheses which they have substituted for it. In the absence of adequate external testimony, these are drawn chiefly from the book itself.

1. The language of the book is said to be inconsistent with the belief that it was written by Solomon. It belongs to the time when the older Hebrew was becoming largely intermingled with Aramaic forms and words (Grotius, De Wette, Ewald, and nearly the whole series of German critics), and as such takes its place in the latest group of books of the Old Testament, along with Ezra, Nehemiah, Daniel, Esther: it is indeed more widely different from the language of the older books than any of them (Ewald). The prevalence of abstract forms again, characteristic of the language of Ecclesiastes, is urged as belonging to a later period than that of Solomon in the development of Hebrew thought and language. The answers given to these objections by the defenders of the received belief are (Preston, *Eccles.* p. 7), (*a*) that many of what we call Aramaic or Chaldee forms may have belonged to the period of pure Hebrew, though they have not come down to us in any extant writings; and (*b*) that so far as they are foreign to the Hebrew of the time of Solomon, he may have learnt them from his "strange wives," or from the men who came as ambassadors from other countries.

2. It has been asked whether Solomon would have been likely to speak of himself as in i. 12, or to describe with bitterness the misery and wrong of which his own misgovernment had been the cause, as in iii. 16, iv. 1 (Jahn, *Einl.* ii. p. 840). On the hypothesis that he was the writer, the whole book is an acknowledgment of evils which he had occasioned, while yet there is no distinct confession and repentance. The question here raised is, of course, worth considering, but it can hardly be looked on as leading in either direction to a conclusion. There are forms of satiety and self-reproach, of which this half-sad, half-scornful retrospect of a man's own life — this utterance of bitter words by which he is condemned out of his own mouth — is the most natural expression. Any individual judgment on this point cannot, from the nature of the case, be otherwise than subjective, and ought therefore to bias our estimate of other evidence as little as possible.

3. It has been urged that the state of society indicated in this book leads to the same conclusion as its language, and carries us to a period after the return from the Babylonian Captivity, when the Jews were enjoying comparative freedom from invasion, but were exposed to the evils of misgovernment under the satraps of the Persian king (Ewald, *Poet. Bücher;* Keil, *Einl. in das A. T.* under *Eccles.*). The language is throughout that of a man who is surrounded by many forms of misery (iii. 16, iv. 1, *r.* 8, viii. 11, ix. 12). There are sudden and violent changes, the servant of to-day becoming the ruler of to-morrow (x. 5–7). All this, it is said, agrees with the glimpses into the condition of the Jews under the Persian empire in Ezra and Nehemiah, and with what we know as to the general condition of the provinces under its satraps. The indications of the religious condition of the people, their formalism, and much-speaking (v. 1, 2), their readiness to evade the performance of their vows by casuistic excuses (v. 5), represent in like manner the growth of evils, the germs of which appeared soon after the Captivity, and which we find in a fully developed form in the prophecy of Malachi. In addition to this general resemblance there is the agreement between the use of הַמַּלְאָךְ for the "angel" or priest of God (v. 6, Ewald, *in loc.*), and the recurrence in Malachi of the terms מַלְאַךְ יְהוָה, the "angel" or messenger of the Lord, as a synonym for the priest (Mal. ii. 7), the true priest being the great agent in accomplishing God's purposes. Significant, though not conclusive, in either direction, is the absence of all reference to any contemporaneous prophetic activity, or to any Messianic hopes. This might indicate a time before such hopes had become prevalent or after they were, for a time, extinguished. It might, on the other hand, be the natural result of the experience through which the son of David had passed, or fitly take its place in the dramatic personation of such a character. The use throughout the book of Elohim instead of Jehovah as the divine Name, though characteristic of the book as dealing with the problems of the universe rather than with the relations between the Lord God of Israel and his people, and therefore striking as an idiosyncrasy, leaves the question as to date nearly where it was. The indications of rising questions as to the end of man's life, and the constitution of his nature, of doubts like those which afterwards developed into Sadduceeism (iii. 19–21), of a copious literature connected with those questions, confirm, it is urged (Ewald), the hypothesis of the later date. It may be added too, that the absence of any reference to such a work as this in the enumeration of Solomon's writings in 1 K. iv. 32, tends, at least, to the same conclusion.

In this case, however, as in others, the arguments of recent criticism are stronger against the traditional belief than in support of any rival theory, and the advocates of that belief might almost be content to rest their case upon the discordant hypotheses of their opponents. On the assumption that the book belongs, not to the time of Solomon, but to the period subsequent to the Captivity, the dates which have been assigned to it occupy a range of more than 300 years. Grotius supposes Zerubbabel to be referred to in xii. 11, as the "One Shepherd" (*Comm. in Eccles.* in loc.), and so far agrees with Keil (*Einleitung in das A. T.*), who fixes it in the time of Ezra and Nehemiah. Ewald and De Wette conjecture the close of the period of Persian or the commencement of that of Macedonian rule; Bertholdt, the period between Alexander the Great and Antiochus Epiphanes; Hitzig, circ. 204

Digitized by Google

B. C.; Hartmann, the time of the Maccabees. On the other hand it must be remembered in comparing these discordant theories that the main facts relied upon by these critics as fatal to the traditional belief are compatible with any date subsequent to the Captivity, while they are inconsistent, unless we admit the explanation, given as above, by Preston, with the notion of the Salomonic authorship.

IV. *Plan.* — The book of Ecclesiastes comes before us as being conspicuously, among the writings of the O. T., the great stumbling-block of commentators. Elsewhere there are different opinions as to the meaning of single passages. Here there is the widest possible divergence as to the plan and purpose of the whole book. The passages already quoted from the Mishna show that some, at least, of the Rabbinical writers were perplexed by its teaching — did not know what to make of it — but gave way to the authority of men more discerning than themselves. The traditional statement, however, that this was among the scriptures which were not read by any one under the age of thirty (*Cf. it. Sac., Amama in Eccles.*, but with a "nescio ubi" as to his authority), indicates the continuance of the old difficulty, and the remarks of Jerome (*Præf. in Eccles., Comm. in Eccles.* xii. 13) show that it was not forgotten. Little can be gathered from the series of Patristic interpreters. The book is comparatively seldom quoted by them. No attempt is made to master its plan and to enter into the spirit of its writer. The charge brought by Philastrius of Brescia (circ. 380) against some heretics who rejected it as teaching a false morality, shows that the obscurity which had been a stumbling-block to Jewish teachers was not removed for Christians. The fact that Theodore of Mopsuestia was accused at the Fifth General Council of calling in question the authority and inspiration of this book, as well as of the Canticles, indicates that in this respect as in others he was the precursor of the spirit of modern criticism. But with these exceptions, there are no traces that men's minds were drawn to examine the teachings of the book. When, however, we descend to the more recent developments of criticism, we meet with an almost incredible divergence of opinion. Luther, with his broad clear insight into the workings of a man's heart, sees in it (*Præf. in Eccles.*) a noble "Politica vel Œconomica," leading men in the midst of all the troubles and disorders of human society to a true endurance and reasonable enjoyment. Grotius (*Præf. in Eccles.*) gives up the attempt to trace in it a plan or order of thought, and finds in it only a collection of many maxims, connected more or less closely with the great problems of human life, analogous to the discussion of the different definitions of happiness at the opening of the Nicomachean Ethics. Some (of whom Warburton may be taken as the type, *Works*, vol. iv. p. 154) have seen in the language of iii. 18–21, a proof that the belief in the immortality of the soul was no part of the transmitted creed of Israel. Others (Patrick, Desvoeux, Davidson, Mendelssohn) contend that the special purpose of the book was to assert that truth against the denial of a sensual skepticism. Others, the later German critics, of whom Ewald may be taken as the highest and best type, reject these views as partial and one-sided, and while admitting that the book contains the germs of later systems, both Pharisaic and Sadducean, assert that the object of the writer was to point out the secret of a true blessedness in the midst of all the distractions and sorrows of the world as consisting in a tranquil, calm enjoyment of the good that comes from God (*Poet. Büch.* iv. 180).

The variety of these opinions indicates sufficiently that the book is as far removed as possible from the character of a formal treatise. It is that which it professes to be — the confession of a man of wide experience looking back upon his past life and looking out upon the disorders and calamities which surround him. Such a man does not set forth his premises and conclusions with a logical completeness. While it may be true that the absence of a formal arrangement is characteristic of the Hebrew mind in all stages of its development (Lowth, *de Sac. Poet. Heb.* Præl. xxiv.), or that it was the special mark of the declining literature of the period that followed the captivity (Ewald, *Poet. Büch.* iv. p. 177), it is also true that it belongs generally to all writings that are addressed to the spiritual rather than the intellectual element in man's nature, and that it is found accordingly in many of the greatest works that have influenced the spiritual life of mankind. In proportion as a man has passed out of the region of a traditional, easily-systematized knowledge, and has lived under the influence of great thoughts — possessed by them, yet hardly mastering them so as to bring them under a scientific classification — are we likely to find this apparent want of method. The true utterances of such a man are the records of his struggles after truth, of his occasional glimpses of it, of his ultimate discovery. The treatise *de Imitatione Christi*, the *Pensées* of Pascal, Augustine's *Confessions*, widely as they differ in other points, have this feature in common. If the writer consciously reproduces the stages through which he has passed, the form he adopts may either be essentially dramatic, or it may record a statement of the changes which have brought him to his present state, or it may repeat and renew the oscillations from one extreme to another which had marked that earlier experience. The writer of Ecclesiastes has adopted and interwoven both the latter methods, and hence, in part, the obscurity which has made it so preëminently the stumbling-block of commentators. He is not a didactic moralist writing a homily on Virtue. He is not a prophet delivering a message from the Lord of Hosts to a sinful people. He is a man who has sinned in giving way to selfishness and sensuality, who has paid the penalty of that sin in satiety and weariness of life; in whom the mood of spirit, over-reflective, indisposed to action, of which Shakespeare has given us in Hamlet, Jaques, Richard II., three distinct examples, has become dominant in its darkest form, but who has through all this been under the discipline of a divine education, and has learnt from it the lesson which God meant to teach him. What that lesson was will be seen from an examination of the book itself.

Leaving it an open question whether it is possible to arrange the contents of this book (as Köster and Vaihinger have done) in a carefully balanced series of strophes and antistrophes, it is tolerably clear that the recurring burden of "Vanity of vanities" and the teaching which recommends a life of calm enjoyment, mark, whenever they occur, a kind of halting-place in the succession of thoughts. It is the summing up of one cycle of experience; the sentence passed upon one phase of life. Taking this, accordingly, as our guide we may look on the

Digitized by Google

whole book as falling into five divisions, each, to a certain extent, running parallel to the others in its order and results, and closing with that which, in its position no less than its substance, is "the conclusion of the whole matter."

(1.) Ch. i. and ii. This portion of the book more than any other has the character of a personal confession. The Preacher starts with reproducing the phase of despair and weariness into which his experience had led him (i. 2, 3). To the man who is thus satiated with life the order and regularity of nature are oppressive (i. 4–7); nor is he led, as in the 90th Psalm, from the things that are transitory to the thought of One whose years are from eternity. In the midst of the ever-recurring changes he finds no progress. That which seems to be new is but the repetition of the old (i. 8–11). Then, having laid bare the depth to which he had fallen, he retraces the path by which he had travelled thitherward. First he had sought after wisdom as that to which God seemed to call him (i. 13), but the pursuit of it was a sore travail, and there was no satisfaction in its possession. It could not remedy the least real evil, nor make the crooked straight (i. 15). The first experiment in the search after happiness had failed, and he tried another. It was one to which men of great intellectual gifts and high fortunes are continally tempted — to surround himself with all the appliances of sensual enjoyment and yet in thought to hold himself above it (ii. 1–9), making his very voluptuousness part of the experience which was to enlarge his store of wisdom. This — which one may perhaps call the Goethe idea of life — was what now possessed him. But this also failed to give him peace (ii. 11). Had he not then exhausted all human experience and found it profitless (ii. 12)? If for a moment he found comfort in the thought that wisdom excelleth folly, and that he was wise (ii. 13, 14), it was soon darkened again by the thought of death (ii. 15). The wise man dies as the fool (ii. 16). This is enough to make even him who has wisdom hate all his labor and sink into the outer darkness of despair (ii. 20). Yet this very despair leads to the remedy. The first section closes with that which, in different forms, is the main lesson of the book — to make the best of what is actually around one (ii. 24) — to substitute for the reckless feverish pursuit of pleasure the calm enjoyment which men may yet find both for the senses and the intellect. This, so far as it goes, is the secret of a true life; this is from the hand of God. On everything else there is written, as before, the sentence that it is vanity and vexation of spirit.

(2.) Ch. iii. 1–vi. 9. The order of thought in this section has a different starting-point. One who looked out upon the infinitely varied phenomena of man's life might yet discern, in the midst of that variety, traces of an order. There are times and seasons for each of them in its turn, even as there are for the vicissitudes of the world of nature (iii. 1–8). The heart of man with its changes is the mirror of the universe (iii. 11), and is, like that, inscrutable. And from this there comes the same conclusion as from the personal experience. Calmly to accept the changes and chances of life, entering into whatever joy they bring, as one accepts the order of nature, this is the way of peace (iii. 13). The thought of the ever-recurring cycle of nature, which had before been irritating and disturbing, now whispers the same lesson. If we suffer, others have suffered before us (iii. 15). God is seeking out the past and reproducing it. If men repeat injustice and oppression, God also in the appointed season repeats his judgments (iii. 16, 17). It is true that this thought has a dark as well as a bright side, and this cannot be ignored. If men come and pass away, subject to laws and changes like those of the natural world, then, it would seem, man has no preëminence above the beast (iii. 19). One end happens to all. All are of the dust and return to dust again (iii. 20). There is no immediate denial of that conclusion. It was to that that the preacher's experience and reflection had led him. But even on the hypothesis that the personal being of man terminates with his death, he has still the same counsel to give. Admit that all is darkness beyond the grave, and still there is nothing better on this side of it than the temper of a tranquil enjoyment (iii. 22). The transition from this to the opening thoughts of ch. iv. seems at first somewhat abrupt. But the Preacher is retracing the paths by which he had been actually led to a higher truth than that in which he had then rested, and he will not, for the sake of a formal continuity, smooth over its ruggedness. The new track on which he was entering might have seemed less promising than the old. Instead of the self-centred search after happiness he looks out upon the miseries and disorders of the world, and learns to sympathize with suffering (iv. 1). At first this does but multiply his perplexities. The world is out of joint. Men are so full of misery that death is better than life (iv. 2). Successful energy exposes men to envy (iv. 4). Indolence leads to poverty (iv. 5). Here too he who steers clear of both extremes has the best portion (iv. 6). The man who heaps up riches stands alone without kindred to share or inherit them, and loses all the blessings and advantages of human fellowship (iv. 8–12). And in this survey of life on a large scale, as in that of a personal experience, there is a cycle which is ever being repeated. The old and foolish king yields to the young man, poor and wise, who steps from his prison to a throne (iv. 13, 14). But he too has his successor. There are generations without limit before him, and shall be after him (iii. 15, 16). All human greatness is swallowed up in the great stream of time. The opening of ch. v. again presents the appearance of abruptness, but it is because the survey of human life takes a yet wider range. The eye of the Preacher passes from the dwellers in palaces to the worshippers in the Temple, the devout and religious men. Have they found out the secret of life, the path to wisdom and happiness? The answer to that question is that there the blindness and folly of mankind show themselves in their worst forms. Hypocrisy, unseemly prayers, idle dreams, broken vows, God's messenger, the Priest, mocked with excuses — that was what the religion which the Preacher witnessed presented to him (v. 1–6). The command "Fear thou God," meant that a man was to take no part in a religion such as this. But that command also suggested the solution of another problem, of that prevalence of injustice and oppression which had before weighed down the spirit of the inquirer. Above all the tyranny of petty governors, above the might of the king himself, there was the power of the Highest (v. 8); and his judgment was manifest even upon earth. Was there after all so great an inequality? Was God's purpose that the earth should be for all, really counteracted (v. 9)? Was the rich man with his cares and fears happier than

Digitized by Google

the laboring man whose sleep was sweet without riches (v. 10–12)? Was there anything permanent in that wealth of his? Did he not leave the world naked as he entered it? And if so, did not all this bring the inquirer round to the same conclusion as before? Moderation, self-control, freedom from all disturbing passions, these are the conditions of the maximum of happiness which is possible for man on earth. Let this be received as from God. Not the outward means only, but the very capacity of enjoyment is his gift (v. 18, 19). Short as life may be, if a man thus enjoys, he makes the most of it. God approves and answers his cheerfulness. Is not this better than the riches or length of days on which men set their hearts (vi. 1–5)? All are equal in death; all are nearly equal in life (vi. 6). To feed the eyes with what is actually before them is better than the ceaseless wanderings of the spirit (vi. 9).

(3.) Ch. vi. 10–viii. 15. So far the lines of thought all seemed to converge to one result. The ethical teaching that grew out of the wise man's experience had in it something akin to the higher forms of Epicureanism. But the seeker could not rest in this, and found himself beset with thoughts at once more troubling and leading to a higher truth. The spirit of man looks before and after, and the uncertainties of the future vex it (vi. 12). A good name is better, as being more permanent, than riches (vii. 1); death is better than life, the house of mourning than the house of feasting (vii. 2). Self-command and the spirit of calm endurance are a better safeguard against vain speculations than any form of enjoyment (vii. 8, 9, 10). This wisdom is not only a defense, as lower things, in their measure may be, but it gives life to them that have it (vii. 12). So far there are signs of a clearer insight into the end of life. Then comes an oscillation which carries him back to the old problems (vii. 15). Wisdom suggests a half-solution of them (vii. 18), suggests also calmness, caution, humility in dealing with them (vii. 22); but this again is followed by a relapse into the bitterness of the sated pleasure-seeker. The search after wisdom, such as it had been in his experience, had led only to the discovery that though men were wicked, women were more wicked still (vii. 26–29). The repetition of thoughts that had appeared before, is perhaps the natural consequence of such an oscillation, and accordingly in ch. viii. we find the seeker moving in the same round as before. There are the old reflections on the misery of man (viii. 6), and the confusions in the moral order of the universe (viii. 10, 11), the old conclusion that enjoyment (such enjoyment as is compatible with the fear of God) is the only wisdom, iii. 15.

(4.) Ch. viii. 16–xii. 8. After the pause implied in his again arriving at the lesson of v. 15, the Preacher retraces the last of his many wanderings. This time the thought with which he started was a profound conviction of the inability of man to unravel the mysteries by which he is surrounded (viii. 17); of the nothingness of man when death is thought of as ending all things (ix. 3–6); of the wisdom of enjoying life while we may (ix. 7–10); of the evils which affect nations or individual man (ix. 11, 12). The wide experience of the Preacher suggests sharp and pointed sayings as to these evils (x. 1–20), each true and weighty in itself, but not leading him on to any firmer standing-ground or clearer solution of the problems which oppressed him. It is here that the traces of plan and method in the book seem most to fail us. Consciously or unconsciously the writer teaches us how clear an insight into the follies and sins of mankind may coexist with doubt and uncertainty as to the great ends of life, and give him no help in his pursuit after truth. In ch. xi., however, the progress is more rapid. The tone of the Preacher becomes more that of direct exhortation, and he speaks in clearer and higher notes. The conclusions of previous trains of thought are not contradicted, but are placed under a new law and brought into a more harmonious whole. The end of man's life is not to seek enjoyment for himself only, but to do good to others, regardless of the uncertainties or disappointments that may attend his efforts (xi. 1–4). His wisdom is to remember that there are things which he cannot know, problems which he cannot solve (xi. 5), to enjoy, in the brightness of his youth, whatever blessings God bestows on him (xi. 9). But beyond all these there lie the days of darkness, of failing powers and incapacity for enjoyment; and the joy of youth, though it is not to be crushed, is yet to be tempered by the thought that it cannot last for ever, and that it too is subject to God's law of retribution (xi. 9, 10). The secret of a true life is that a man should consecrate the vigor of his youth to God (xii. 1). It is well to do that before the night comes, before the slow decay of age benumbs all the faculties of sense (xii. 2, 6), before the spirit returns to God who gave it. The thought of that end rings out once more the knell of the nothingness of all things earthly (xii. 8); but it leads also to "the conclusion of the whole matter," to that to which all trains of thought and all the experiences of life had been leading the seeker after wisdom, that "to fear God and keep his commandments" was the highest good attainable; that the righteous judgment of God would in the end fulfill itself and set right all the seeming disorders of the world (xii. 13, 14).

If one were to indulge conjecture, there would perhaps be some plausibility in the hypothesis that xii. 8 had been the original conclusion, and that the epilogue of xii. 9–14 had been added, either by another writer, or by the same writer on a subsequent revision. The verses (9–12) have the character of a panegyric designed to give weight to the authority of the teacher. The two that now stand as the conclusion, may naturally have originated in the desire to furnish a clew to the perplexities of the book, by stating in a broad intelligible form, not easy to be mistaken, the truth which had before been latent.

If the representation which has been given of the plan and meaning of the book be at all a true one, we find in it, no less than in the book of Job, indications of the struggle with the doubts and difficulties which in all ages of the world have presented themselves to thoughtful observers of the condition of mankind. In its sharp sayings and wise counsels, it may present some striking affinity to the Proverbs, which also bear the name of the son of David, but the resemblance is more in form than in substance, and in its essential character it agrees with that great inquiry into the mysteries of God's government which the drama of Job brings before us. There are indeed characteristic differences. In the one we find the highest and boldest forms of Hebrew poetry, a sustained unity of design; in the other there are, as we have seen, changes and oscillations, and the style seldom rises

Digitized by Google

above the rhythmic character of proverbial forms of speech. The writer of the book of Job deals with the great mystery presented by the sufferings of the righteous, and writes as one who has known those sufferings in their intensity. In the words of the Preacher, we trace chiefly the weariness or satiety of the pleasure-seeker, and the failure of all schemes of life but one. In spite of these differences, however, the two books illustrate each other. In both, though by very diverse paths, the inquirer is led to take refuge (as all great thinkers have ever done) in the thought that God's kingdom is infinitely great, and that man knows but the smallest fragment of it; that he must refrain from things which are too high for him and be content with that which it is given him to know, the duties of his own life and the opportunities it presents for his doing the will of God.

Literature. — Every commentary on the Bible as a whole, every introduction to the study of the O. T., contains of course some materials for the history and interpretation of this as of other books. It is not intended to notice these, unless they possess some special merit or interest. As having that claim may be specified the commentary by Jerome addressed to Paula and Eustochium, as giving an example of the Patristic interpretation of the book now before us; the preface and annotations of Grotius (*Opp.* vol. iii.) as representing the earlier, the translation and notes of Ewald (*Poet. Büch.* vol. iv.) as giving the later results of philosophical criticism. The *Critici Sacri* here, as elsewhere, will be found a great storehouse of the opinions of the Biblical scholars of the 16th and 17th centuries. The sections on Ecclesiastes in the Introductions to the O. T. by Eichhorn, De Wette, Jahn, Hävernick, Keil, Davidson, will furnish the reader with the opinions of the chief recent critics of Germany as to the authorship and meaning of the book. Among the treatises specially devoted to this subject may be mentioned the characteristic *Commentary* by Luther already referred to (*Opp.* vol. ii. Jena, 1580); that by Anton. Corranus in the 16th century, interesting as one of the earliest attempts to trace a distinct plan and order in it, and as having been adopted by Bishop Patrick as the basis of his interpretation; the *Annotationes in Koheleth* by J. Drusius, 1635; the *Translation and Notes* of Moses Mendelssohn, published in German by Rabe (Anspach, 1771); the *Philosophical and Critical Essay on Ecclesiastes* by Desvoeux (Lond. 1760), written chiefly to meet the attacks of skeptics, and to assert that *the* doctrine of the book is that of the Immortality of the Soul; the *Scholia* of Maldonatus, better known for his *Commentary on the Gospels* (Paris, 1767), the commentaries of Knobel (Leipzig, 1836), Zirkel (Würzb. 1792), Schmidt, J. E. Ch. (1794), Nachtigal, J. Ch. (Halle, 1798), Van der Palm (1784), Kaiser (Erlang. 1823), Köster (1831), Umbreit (Gotha, 1818); and the article by Vaihinger, in the *Stud. und Krit.* of 1848 [translated, with modification, in the *Methodist Quar. Rev.* for April and July, 1849]. English Biblical literature is comparatively barren in relation to this book, and the only noticeable recent contributions to its exegesis are the *Commentary* by Stuart, the translation of Mendelssohn with Prolegomena, &c., by Preston (Cambridge, 1853) and the *Attempt to illustrate the Book of Ecclesiastes* by Holden. As growing out of the attempt to fathom its meaning, though not taking the form of criticism or exegesis, may be mentioned the metrical paraphrases which are found among the works of the minor English poets of the 17th century, of which the most memorable are those by Quarles (1645) and Sandys (1648). E. H. P.

* *Other works or later editions.* — Prof. Stuart (*Commentary on Ecclesiastes*, edited and revised by R. D. C. Robbins, 1864), without admitting all the objections to Solomon's authorship of the book to be valid, regards the arguments urged for that view insufficient to establish the claim. He supposes the author of the book to be unknown, but maintains its canonicity to be unquestionable. "The book of Ecclesiastes . . . has a claim to the place which it holds as one of the inspired writings. . . . There the book is, in the midst of the Hebrew Scriptures; and there it has been, at least ever since the period when the Hebrew canon was closed. There at all events it was, when our Saviour and the Apostles declared the Jewish Scriptures to be of Divine origin and authority." For his views on this point expressed more fully, see his *Hist. of the O. T. Canon*, p. 138 ff.

We have commentaries also, in addition to those mentioned above, from Ewald, *Die Dichter des Alten Bundes*, Theil iv. (Götting. 1837, 2e Aufl. Theil ii., 1867), Herzfeld (1838), Hitzig (in the *Kurzgef. Exeg. Handb.* Lief. vii., 1847), Heiligstedt (continuation of Maurer, iv. sect. ii. 1848), Burger (1854), Philippson (*Die Israelitische Bibel*, iii. 1854), Elster (1855), Wangenmann (1856), Vaihinger (1858), Hengstenberg (1859, Eng. trans. in Clark's *For. Theol. Libr.* Edin. 1860), L. Young (Phila. 1866), D. Castelli (*Il libro del Cohelet, trad. dal testo ebraico con introd. crit. e note*, Pisa, 1866), and G. R. Noyes (*A New Trans. of Job, Ecclesiastes and Canticles, with Introductions and Notes*, 3d ed., Boston, 1867). The *Historical and Critical Commentary* of Ginsburg (Lond. 1861), a valuable work, contains a good history of the earlier and later literature of the book. Ginsburg writes also the article *Ecclesiastes* in Kitto's *Cycl. of Bibl. Literature* (3d ed., 1862). Vaihinger writes the article *Prediger Salomo* in Herzog's *Real-Encykl.* xii. 92–106, worthy of attention especially for its minute analysis of the contents of Koheleth. Bleek's section (*Einl. in das A. T.* p. 641 ff.) summarizes the results of a careful study of the questions relating to this book. (See also Herbst's *Einl. in die heil. Schriften*, ii. 241–254, edited by Welte, 1852.) Dr. Nordheimer has an elaborate article on the *Philosophy of Ecclesiastes* in the *Amer. Bibl. Repos.* for July 1838, xii. 197–219. See also Gurlitt, *Zur Erklärung des Buches Koheleth*, in the *Theol. Stud. u. Krit.*, 1865, pp. 321–343. The LXX. translation of Ecclesiastes, says Bleek, is remarkable for its literal adherence to the Hebrew text. It is so slavish at times in this respect (*e. g.* vii. 29) as to be ungrammatical and unintelligible. Such translations have a special value as vouchers for the condition of the text on which they are founded.

Dean Stanley's remarks on this composition evince his characteristic critical skill, as well as power of elegant expression. As to the author, he understands that the anonymous writer or "Preacher" in Ecclesiastes personates Solomon. "There can be no doubt that Ecclesiastes embodies the sentiments which were believed to have proceeded from Solomon at the close of his life, and therefore must be taken as the Hebrew, Scriptural representation of his last lessons to the world" (*History of the Jewish Church*, ii. 281). He

Digitized by Google

characterizes the scope and structure of the writing thus: "As the book of Job is couched in the form of a dramatic argument between the patriarch and his friends — as the Song of Songs is a dramatic dialogue between the Lover and the Beloved One, so the book of Ecclesiastes is a drama of a still more tragic kind. It is an interchange of voices, higher and lower, mournful and joyful, within a single human soul. It is like the struggle between the two principles in the Epistle to the Romans. It is like the question and answer of the 'Two Voices' of our modern poet. It is like the perpetual strophe and antistrophe of Pascal's *Pensées*. . . . Every speculation and thought of the human heart is heard, and expressed, and recognized in turn. The conflicts which in other parts of the Bible (comp. especially Ps. lxxxviii. 5, 6, 12, 18, and lxxxix. 46–50) are confined to a single verse or a single chapter, are here expanded to a whole book" (pp. 282, 283). We have space only for the concluding paragraph. "There is a yet simpler and nobler summary of the wide and varied experience of the manifold forms of human life, as represented in the greatness and the fall of Solomon. It is not 'vanity of vanities,' it is not 'rejoice and be merry,' it is not even 'wisdom and knowledge, and many proverbs, and the words of the wise, even words of truth.' 'Of making many books there is no end, and much study is a weariness of the flesh. Let us hear the conclusion of the whole matter.' For all students of ecclesiastical history, for all students of theology, for all who are about to be religious teachers of others, for all who are entangled in the controversies of the present, there are no better words to be remembered than these, viewed in their original and immediate application. They are the true answer to all perplexities respecting Ecclesiastes and Solomon; they are no less the true answer to all perplexities about human life itself. 'Fear God and keep his commandments; for this is the whole duty of man. For God shall bring every work into judgment, with every secret thing, whether it be good, or whether it be evil' (Eccl. xii. 12–14)." H.

ECCLESIASTICUS, the title given in the Latin Version to the book which is called in the Septuagint THE WISDOM OF JESUS THE SON OF SIRACH (Σοφία Ἰησοῦ υἱοῦ Σιράχ [Sin. Σειραχ], A. C.; Σοφία Σειράχ, B. Rufinus, *Vers.* Orig. *Hom. in Num.* xviii. 3: "In libro, qui apud nos quidem inter Salomonis volumina haberi solet, et *Ecclesiasticus* dici, apud Græcos vero *Sapientia Jesu filii Sirach* appellatur, scriptum est . . ."). The word, like many others of Greek origin, appears to have been adopted in the African dialect (*e. g.* Tertull. *de Pudic.* c. 22, p. 435), and thus it may have been applied naturally in the *Vetus Latina* to a *church reading-book;* and when that translation was adopted by Jerome (*Præf. in Libro Sal. juxta LXX.* x. 404, ed. Migne), the local title became current throughout the West, where the LXX. was most used. The right explanation of the word is given by Rufinus, who remarks that "it does not designate the author of the book, but the character of the writing," as publicly used in the services of the Church (*Comm. in Symb.* § 38 "Sapientia, quæ dicitur filii Sirach . . . apud Latinos hoc ipso generali vocabulo *Ecclesiasticus* appellatur, quo vocabulo non auctor libelli seu scripturæ qualitas cognominata est"). The special application by Rufinus of the general name of the class (*ecclesiastici* as opposed to *canonici*) to the single book may be explained by its wide popularity. Athanasius, for instance, mentions the book (*Ep. Fest.* sub fin.) as one of those "framed by the fathers to be read by those who wish to be instructed (κατηχεῖσθαι) in the word of godliness." According to Jerome (*Præf. in Libr. Sal.* ix. 1242) the original Hebrew title was *Proverbs* (משלים, cf. inf. § 9); and the Wisdom of Sirach shared with the canonical book of Proverbs and the Wisdom of Solomon the title of *The Book of all Virtues* (ἡ πανάρετος σοφία, ἡ πανάρετος. Hieron. *l. c.* Cf. Routh, *Rell. Sacr.* i. 278). In the Syriac version the book is entitled *The Book of Jesus the son of Simeon Asiro* (i. e. the bound); *and the same book is called the Wisdom of the Son of Asiro.* In many places it is simply styled *Wisdom* (Orig. *in Matt.* xiii. § 4; cf. Clem. Al. *Pæd.* i. 8, §§ 69, 72, &c.), and *Jesus Sirach* (August. *ad Simplic.* i. 20).

2. The writer of the present book describes himself as *Jesus* (i. e. Jeshua) *the son of Sirach, of Jerusalem*[a] (ch. l. 27), but the conjectures which have been made to fill up this short notice are either unwarranted (*e. g.* that he was a physician from xxxviii. 1–15) or absolutely improbable. There is no evidence to show that he was of priestly descent; and the similarity of names is scarcely a plausible excuse for confounding him with the Hellenizing high-priest Jason (2 Macc. iv. 7–11; Georg. Sync. *Chronogr.* 276). In the Talmud the name of Ben Sira (בן סירא, for which סירוך is a late error, Jost, *Gesch. d. Judenth.* i. 311) occurs in several places as the author of proverbial sayings which in part are parallel to sentences in Ecclesiasticus (cf. § 4), but nothing is said as to his date or person [JESUS THE SON OF SIRACH], and the tradition which ascribes the authorship of the book to Eliezer (B. C. 260) is without any adequate foundation (Jost, *a. a. O.*; yet see note 1). The Palestinian origin of the author is, however, substantiated by internal evidence, *e. g.* xxiv. 10 f.

3. The language in which the book was originally composed was Hebrew (Ἑβραϊστί; this may mean, however, the vernacular *Aramæan* dialect, John v. 2, xix. 13, &c.).[b] This is the express statement of the Greek translator, and Jerome says (*Præf. in Libr. Sal.* l. c.) that he had met with the "Hebrew" text; nor is there any reason to doubt that he saw the book in its original form. The internal character of the present book bears witness to its foreign source. Not only is the style Hebraistic in general form (cf. Lowth, *de sacra Poesi*, xxiv.) and idiom (*e. g.* θεμέλιον αἰῶνος, i. 15; κτίσμα αἰῶνος xxxviii. 34; ἀπὸ προσώπου λόγου, xix. 11; cf. Eichhorn, *Einl. in d. Apok.* p. 57) as distinguished from the Greek of the Introduction, but in several instances it is possible to point out mistakes and

[a] The reading of Cod. A. and six other MSS. is remarkable: Ἰησοῦς νι. Σιρὰχ Ἐλεάζαρ (2 MSS Ἐλεάζαρος; Ald. 1 MS. Ἐλεαζάρου) ὁ Ἱερος. Cf. Eichh. p. 38, n. The words are wanting in the Syriac and Vulg., but are supported by all other authorities.

[b] That the work was written in Hebrew and not Aramæan is shown by the fact that the numerous quotations from it preserved in *Aramæan writings*, as the Talmud and Midrashim, are nearly all in pure Hebrew. See Zunz, *Gottesdienstl. Vortr. d. Juden*, § 104; Ginsburg, art. *Ecclesiasticus* in Kitto's *Cycl.* & *Bibl. Lit.*, 3d ed., i. 724.

Digitized by Google

allusions which are cleared up by the reconstruction of the Hebrew phrases: *e. g.* xxiv. 25–27, ἐν φῶς, *i. e.* בְּיָאוֹר for בְּיָאוֹר, as Am. viii. 8; xliii. 8, יְרֵחַ, ὑήν, יֶרַח, σελήνη (cf. Eichhorn, *l. c.*; Ewald, *Gesch. d. Volkes Isr.* iv. 299 n.).

4. Nothing however remains of the original proverbs of Ben Sira except the few fragments in pure Hebrew (Jost, *Gesch. d. Judenth.* i. 311 n.) which occur in the Talmud and later Rabbinic writers; and even these may have been derived from tradition and not from any written collection.[a] The Greek translation incorporated in the LXX., which is probably the source from which the other translations were derived, was made by the grandson of the author in Egypt "in the reign of Euergetes,"[b] for the instruction of those "in a strange country (ἐν παροικίᾳ) who were previously prepared to live after the law." The date which is thus given is unfortunately ambiguous. Two kings of Egypt bore the surname Euergetes. Ptol. III., the son and successor of Ptol. II. Philadelphus, B. C. 247–222; and Ptol. VII. Physcon, the brother of Ptol. VI. Philometor, B. C. 170–117. And the noble eulogy on "Simon the son of Onias, the high-priest," who is described as the last of the great worthies of Israel (ch. l.), and apparently removed only by a short interval from the times of the author, is affected by a similar ambiguity, so that it cannot be used absolutely to fix the reign in which the translation was made. Simon I., the son of Onias, known by the title of *the Just*, was high-priest about 310–290 B. C., and Simon II., also the son of Onias, held the same office at the time when Ptol. IV. Philopator endeavored to force an entrance into the Temple, B. C. 217 (3 Macc. i. 2). Some have consequently supposed that the reference is to Simon the Just, and that the grandson of Ben Sirach, who is supposed to have been his younger contemporary, lived in the reign of Ptolemy III. (Jahn, Vaihinger in Herzog's *Encykl.* s. v.); others again have applied the eulogy to Simon II., and fixed the translation in the time of Ptolemy VII. (Eichhorn, *Einl.* p. 38). But both suppositions are attended with serious difficulties. The description of Simon can scarcely apply to one so little distinguished as the second high-priest of the name, while the first, a man of representative dignity, is passed over without notice in the list of the benefactors of his nation. And on the other hand the manner in which the translator speaks of the Alexandrine version of the Old Testament, and the familiarity which he shows with its language (*e. g.* xliv. 16, Ἐνὼχ μετετέθη, Gen. v. 24; cf. Linde, ap. Eichhorn, p. 41, 42) is scarcely consistent with a date so early as the middle of the third century. From these considerations it appears best to combine the two views. The grandson of the author was already past middle age when he came to Egypt, and if his visit took place early in the reign of Ptolemy Physcon, it is quite possible that the book itself was written while the name and person of the last of "the men of the great synagogue" were still familiar to his countrymen.[c] Even if the date of the book be brought somewhat lower, the importance of the position which Simon the Just occupied in the history of the Jews would be a sufficient explanation of the distinctness of his portraiture; and the political and social troubles to which the book alludes (li. 6, 12, xxxvi. ff.) seem to point to the disorders which marked the transference of Jewish allegiance from Egypt to Syria rather than to the period of prosperous tranquillity which was enjoyed during the supremacy of the earlier Ptolemies (c. B. C. 200).

5. The name of the Greek translator is unknown. He is commonly supposed to have borne the same name as his grandfather, but this tradition rests only on conjecture or misunderstanding (Jerome, l. c. *inf.* § 7; [*Pseud*-Athanasius,] *Synops. S. Script.* printed as a Prologue in the Comp. ed. and in A. V.).

6. It is a more important fact that the book itself appears to recognise the incorporation of earlier collections into its text. Jesus the son of Sirach, while he claims for himself the writing of the book (ἐχάραξα), characterizes his father as one "who poured forth a shower of wisdom (ἀνώμβρησε σοφίαν) from his heart;" and the title of the book in the Vatican MS. and in many others may be more than a familiar abbreviation (σοφία Σειράχ. Yet Cod. C has πρόλογος Σιράχ combined with the usual heading, Σοφ. Ἰησοῦ υἱ. Σ.). From the very nature of his work the author was like "a gleaner after the grape-gatherers" (xxxiii. 16), and Bretschneider has endeavored to show (p. 28 ff.) from internal discrepancies of thought and doctrine that he made use of several smaller collections,

[a] The "*Alphabet*," or "*Book of Ben Sira*," which exists at present, is a later compilation (Zunz, *Gottesd. Vortr. d. Juden*, pp. 100–106) of proverbs in Hebrew and Chaldee, containing some genuine fragments, among much that is worthless (Dukes, *Rabbinische Blumenlese*, p. 31 ff.). Ben Sira is called in the preface the son of Jeremiah. The sayings are collected by Dukes, *l. c.* p. 67 ff. They offer parallels to Ecclus. iii. 21, vi. 6, ix. 8 ff., xi. 1, xiii 15, xxv. 2, xxvi. 1, xxx. 23, xxxviii. 1, 4, 8, xlii. 9 f.

[b] Sirac. *Prol.* ἐν γὰρ τῷ ὀγδόῳ καὶ τριακοστῷ ἔτει ἐπὶ τοῦ Εὐεργέτου βασιλέως, παραγενηθεὶς εἰς Αἴγυπτον It is strange that any doubt should have been raised about the meaning of the words, which can only be, that the translator "in his thirty-eighth year came to Egypt during the reign of Euergetes," though it is impossible now to give any explanation of the specification of his age. The translation of Eichhorn (*l. c.* p. 40), and several others, "in the thirty-eighth year of the reign of Euergetes," is absolutely at variance with the grammatical structure of the sentence.

* The Septuagint furnishes abundant examples of the construction which is here pronounced impossible. The following list contains some which do not appear to have been hitherto noticed. See Hagg. i, 1, ἐν τῷ δευτέρῳ ἔτει ἐπὶ Δαρείου βασιλέως; ii. 1 (i. 15), 11 (10); Zech. i. 1, ἐν τῷ ὀγδόῳ μηνὶ ἔτους δευτέρου ἐπὶ Δαρείου; i. 7; vii. 1, ἐν τῷ τετάρτῳ ἔτει ἐπὶ Δαρείου τοῦ βασιλέως; Dan. ix. 1 (LXX.), ἔτους πρώτου ἐπὶ Δαρείου, where Theodotion has ἐν τῷ πρώτῳ ἔτει Δαρείου, though even here the Comp. edition and the Alex. MS. insert ἐπὶ before Δαρείου: 1 Macc. xiii. 42, ἔτους πρώτου ἐπὶ Σίμωνος ἀρχιερέως; xiv. 27; Jer. xlvi. [Heb. xxxix.] 2, Aldine ed. Comp. 1 Esdr. ii. 15 (16), ἐν δὲ τοῖς ἐπὶ Ἀρταξέρξου τῶν Περσῶν βασιλέως χρόνοις. As Mr Westcott admits that no reason can be given for the translator's specification of his own age, it is not surprising that Eichhorn's construction of the passage should be adopted by many recent writers, as Bruch (*Weisheits-Lehre der Hebraer*, p. 267), Palfrey, Davidson, Ewald, Fritzsche (*Exeg. Handb.* v. p. xiii.), and Horowitz (*Das Buch Jesus Sirach*, p. 20, n.). A.

[c] If indeed the inscription in B. "*The Wisdom of Sirach*" (so also Epiph. *Haer.* viii. ἡ σοφία τοῦ Σιράχ), as distinguished from the prayer in c. li. (Ἰησοῦ υἱ. Σ.) is based upon any historic tradition, another generation will be added to carry us back to the first elements of the book. See § 6.

Digitized by Google

differing widely in their character, though all were purely Hebrew in their origin.

7. The Syriac and Old Latin versions, which latter Jerome adopted without alteration (*Præf. in Libr. Sal. juxta LXX.* l. c. . . . "in Ecclesiastico, quem esse Jesu filii Sirach nullus ignorat, calamo temperavi, tantummodo Canonicas scripturas emendare desiderans"), differ considerably from the present Greek text, and it is uncertain whether they were derived from some other Greek recension (Eichhorn, p. 84) or from the Hebrew original (Bertholdt, p. 2304 ff.).[a] The language of the Latin version presents great peculiarities. Even in the first two chapters the following words occur which are found in no other part of the Vulgate: *defunctio* (i. 13), *religiositas* (i. 17, 18, 26), *compartior* (i. 24), *inhonoratio* (i. 33), *obductio* (ii. 2, v. 1, 10), *receptibilis* (ii. 5) The Arabic version is directly derived from the Syriac (Bretschn. p. 702 f.).

8. The existing Greek MSS. present great discrepancies in order, and numerous interpolations. The arrangement of cc. xxx. 25 — xxxvi. 17 in the Vatican and Complutensian editions is very different. The English version follows the latter, which is supported by the Latin and Syriac versions against the authority of the Uncial MSS. The extent of the variation is seen in the following table: —

Ed. Comp. Lat. Syr. E. V.	*Ed. Vat. A. B. C.*
xxx. 25	xxxiii. 13, λαμπρὰ καρδία, κ. τ. λ.
xxxi., xxxii.	xxxiv., xxxv.
xxxiii. 1–16, ἠγρύπνησα .	xxxvi. 1–16.
xxxiii 17 ff. ὡς καλαμώμενος	xxx. 25 ff.
xxxiv., xxxv.	xxxi., xxxii.
xxxvi. 1–11, φυλὰς Ἰακώβ .	xxxiii. 1–13.
xxxvi. 12 ff. καὶ κατεκληρονόμησα.	xxxvi. 17 ff.

The most important interpolations are: i. 5, 7; 18*b*, 21; iii. 25; iv. 23*b*; vii. 26*b*; x. 21; xii. 6*c*; xiii. 25*b*; xvi. 15, 16, 22*c*; xvii. 5, 9, 16, 17*a*, 18, 21, 22*c*, 26*b*; xviii. 2*b*, 3, 27*c*, 33*c*; xix. 5*b*, 6*a*, 13*b*, 14*a*, 18, 19, 21, 25*c*; xx. 3, 14*b*, 17*b*, 32; xxii. 9, 10, 23*c*; xxiii. 3*c*, 4*c*, 5*b*, 28: xxiv. 18, 24; xxv. 12, 26*c*; xxvi. 19–27; l. 29*b*. All these passages, which occur in the A. V. and the Comp. texts, are wanting in the best MSS. The edition of the Syro-Hexaplaric MS. at Milan, which is at present reported to be in preparation (1858), will probably contribute much to the establishment of a sounder text.

9. It is impossible to make any satisfactory plan of the book in its present shape. The latter part, ch. xlii. 15–l. 21, is distinguished from all that precedes in style and subject; and "the praise of noble men" (πατέρων ὕμνος) seems to form a complete whole in itself (ch. xliv.–l. 24). The words of Jerome, *Præf. in Libr. Solom.* ("Quorum priorem [πανάρετον Jesu filii Sirach librum] Hebraicum reperi, non *Ecclesiasticum* ut apud Latinos, sed *Parabolas* prænotatum, cui juncti erant *Ecclesiastes* et *Canticum Canticorum*, ut similitudinem Salomonis non solum librorum numero, sed etiam materiarum genere cosequaret"), which do not appear to have received any notice, imply that the original text presented a triple character answering to the three works of Solomon, the Proverbs, Ecclesiastes, and Canticles; and it is, perhaps, possible to trace the prevalence of the diffbrent types of maxim, reflection, and song in successive parts of the present book. In the central portion of the book (xviii. 29, ἐγκράτεια ψυχῆς, xxxii. (xxxv. περὶ ἡγουμένων) several headings are introduced in the oldest MSS., and similar titles preface ch. xliv. (πατέρων ὕμνος) and ch li. (προσευχὴ Ἰησοῦ υἱοῦ Σειράχ). These sections may have contributed to the disarrangement of the text, but they do not offer any sufficient clue to its true subdivisions. Eichhorn supposed that the book was made up of three distinct collections which were afterwards united: i.–xxiii.; xxiv.–xlii. 14; xlii. 15–l. 24 (*Einl.* p. 50 ff.). Bretschneider sets aside this hypothesis, and at the same time one which he had formerly been inclined to adopt, that the recurrence of the same ideas in xxiv. 32 ff.; xxxiii. 16, 17 (xxx.); l. 27, mark the conclusion of three parts. The last five verses of ch. l. (l. 25–29) form a natural conclusion to the book: and the prayer, which forms the last chapter (li.), is wanting in two MSS. Some have supposed that it was the work of the translator; but it is more probable that he found it attached to the larger work, though it may not have been designed originally for the place which it occupies.

10. The earliest clear coincidence with the contents of the book occurs in the epistle of Barnabas (c. 19 = Ecclus. iv. 31; cf. *Const. Apost.* vii. 11), but in this case the parallelism consists in the thought and not in the words, and there is no mark of quotation. The parallels which have been discovered in the New Testament are too general to show that they were derived from the written text, and not from popular language; and the same remark applies to the other alleged coincidences with the Apostolic fathers (*e. g.* Ecclus. v. 13 = James i. 19; xi. 18, 19 = Luke xii. 19). There is no sign of the use of the book in Justin Martyr, which is the more remarkable as it offers several thoughts congenial to his style. The first distinct quotations occur in Clement of Alexandria; but from the end of the second century the book was much used and cited with respect, and in the same terms as the canonical Scriptures; and its authorship was often assigned to Solomon from the similarity which it presented to his writings (August. *De Cura pro Mort.* 18). Clement speaks of it continually as *Scripture* (*Pæd.* i. 8, § 62; ii. 2, § 34; 5, § 46; 8, § 69, &c.), as the work of Solomon (*Strom.* ii. 5, § 24), and as the voice of the great Master (παιδαγωγός, *Pæd.* ii. 10, § 98). Origen cites passages with the same formula as the canonical books (γέγραπται, *In Johann.* xxxii. § 14; *In Matt.* xvi. § 8), as *Scripture* (*Comm. in Matt.* §

a * That the Latin version was derived from the Greek Fritzsche (*Exeg. Handb.* v. p. xxiv.) regards as beyond all question. He justly remarks that the supposition that a Latin version was made from the *Hebrew* at so early a date (the second century) would be an anachronism, or at least without a parallel, and that all the internal evidence is against it. He considers the Syriac version, on the other hand, as a loose paraphrase of the Greek, with many arbitrary alterations, omissions, and additions. But Dr. J. Horowitz in a recent essay (see the addition to this article) maintains that the Syriac translator had a Hebrew text before him, though interpolated and corrupted, and finds in this version the means of restoring the original Hebrew, and of explaining the mistakes of the Greek translator, in not a few passages which, as they now stand, yield no good sense. Ginsburg takes the same view (art. *Ecclesiasticus* in Kitto's *Cycl. of Bibl. Lit.*, 3d ed.). A.

Digitized by Google

44; *In Ep. ad Rom.* IX. § 17, &c.), and as the utterance of "*the divine word*" (*c. Cels.* viii. 50). The other writers of the Alexandrine school follow the same practice. Dionysius calls its words "*divine oracles*" (*Frag. de Nat.* iii. p. 1258, ed. Migne), and Peter Martyr quotes it as the work of "*the Preacher*" (*Frag.* i. § 5, p. 515, ed. Migne). The passage quoted from Tertullian (*de Exhort. Cast.* 2, "sicut scriptum est: *ecce posui ante te bonum et malum*; gustasti enim de arbore agnitionis " cf. Ecclus. xv. 17, Vulg.) is not absolutely conclusive [see Deut. xxx. 15]; but Cyprian constantly brings forward passages from the book as *Scripture* (*de Bono Pat.* 17; *de Mortalitate*, 9, § 13) and as the work of Solomon (*Ep.* lxv. 2). The testimony of Augustine sums up briefly the result which follows from these isolated authorities. He quotes the book constantly himself as the work of a *prophet* (*Serm.* xxxix. 1), the word of God (*Serm.* lxxxvii. 11), "*Scripture*" (*Lib. de Nat.* 33), and that even in controversy (*c. Jul. Pelag.* v. 36), but he expressly notices that it was not in the Hebrew Canon (*De Cura pro Mort.* 18) "though the Church, especially of the West, had received it into authority" (*De Civit.* xvii. 20, cf. *Speculum*, iii. 1127, ed. Paris). Jerome, in like manner (*l. c.* § 7), contrasts the book with "the Canonical Scriptures" as "doubtful," while they are "sure;" and in another place (*Prol. Galeat.*) he says that it "is not in the Canon," and again (*Prol. in Libr. Sal.*) that it should be read "for the instruction of the people (*plebis*), not to support the authority of ecclesiastical doctrines." The book is not quoted by Irenæus, Hippolytus, or Eusebius;[a] and is not contained in the Canon of Melito, Origen, Cyril, Laodicea, Hilary, or Rufinus. [CANON.] It was never included by the Jews among their Scriptures; for though it is quoted in the Talmud, and at times like the Kethubim, the study of it was forbidden, and it was classed among "*the outer books*" (סְפָרִים חִיצוֹנִים), that is probably, those which were not admitted into the Canon (Dukes, *Rabb. Blumenlese*, pp. 24, 25).

11. But while the book is destitute of the highest canonical authority, it is a most important monument of the religious state of the Jews at the period of its composition. As an expression of Palestinian theology it stands alone; for there is no sufficient reason for assuming Alexandrine interpolations or direct Alexandrine influence (Gfrörer, *Philo*, ii. 18 ff.). The translator may, perhaps, have given an Alexandrine coloring to the doctrine, but its great outlines are unchanged (cf. Daehne, *Relig.-Philos.* ii. 129 ff.). The conception of God as Creator, Preserver, and Governor is strictly conformable to the old Mosaic type; but at the same time his mercy is extended to all mankind (xviii. 11–13). Little stress is laid upon the spirit-world, either good (xlviii. 21, xlv. 2, xxxix. 28?) or evil (xxi. 27?); and the doctrine of a resurrection fades away (xiv. 16, xvii. 27, 28, xliv. 14, 15. Yet cf. xlviii. 11). In addition to the general hope of restoration (xxxvi. 1, &c.) one trait only of a Messianic faith is preserved in which the writer contemplates the future work of Elias (xlviii. 10). The ethical precepts are addressed to the middle class (Eichhorn, *Einl.* p. 44 ff.). The praise of agriculture (vii. 15) and medicine (xxxviii. 1 ff.), and the constant exhortations to cheerfulness, seem to speak of a time when men's thoughts were turned inwards with feelings of despondency and perhaps (Dukes, *l. c.* p. 27 ff.) of fatalism. At least the book marks the growth of that anxious legalism which was conspicuous in the sayings of the later doctors. Life is already imprisoned in rules; religion is degenerating into ritualism; knowledge has taken refuge in schools (cf. Ewald, *Gesch. d. Volkes Isr.* iv 298 ff.).

12. Numerous commentaries on Ecclesiasticus appeared in the 16th and 17th centuries (cf. Bretschneider, *Lib. Sirac.* Præf. x. note, for a list of these), of which the most important were those of Camerarius (*Lipsiæ*, 1570, 8vo), Corn. a Lapide (*Antverpiæ*, 1687, &c., fol.), and Drusius (*Franekeræ*, 1596, 4to); [Dav. Hoeschel's edition (Aug. Vind. 1604) was also of some importance for its large collection of various readings;] but nothing more was done for the criticism of the book till the editions of Linde (a German translation and notes, *Lipsiæ*, 1785, 1795, 8vo, followed by a Greek text, *Gedani*, 1795, 8vo). Linde's labors left much to be supplied, and in 1806 Bretschneider published his edition, which still remains the most complete (*Liber Jesu Siracidæ Græce ad fidem Codd. et vers. emend. et perpet. comm. illustratus a Car. Gottl. Bretschneider . . . Ratisbonæ*, MDCCCVI.); but this will probably be superseded by the promised (1858) Commentary of Fritzsche in the *Kurzg Exeg. Handbuch*, for both in style and scholarship it labors under serious defects. B. F. W.

* *Additional Literature.* — Besides the works already referred to in this article, or under the art. APOCRYPHA, as Arnald's *Commentary*, the following deserve notice: Jan van Gilse, *Commentatio de Libri qui Sap. Jes. Sirac. inscribitur Argumento et Doctrinæ Fonte*, Groning. 1832, 4to; J. F. Räbiger, *Ethica Librorum Apoc. V. T.*, Vratisl. 1838; J. F. Bruch, *Weisheits-Lehre der Hebräer*, Strassb. 1851, pp. 266–319; Ewald, in his *Jahrb. d. Bibl. wissensch.*, 1851, iii. 125–140, and *Gesch. d. Volkes Isr.*, 3e Aufl. (1864), iv. 340 ff.; Welte (Cath.), in Herbst's *Einl.* ii. pt. iii. pp. 203–237; Palfrey, *Lect. on the Jewish Scriptures*, iv. 343–350 (Bost. 1852); Geiger, *Warum gehört das Buch* Sirach *zu den Apokryphen*, in the *Zeitschr. d. Deutsch. Morgenl. Gesellsch.*, 1858, xii. 536–543; Davidson, *Introd. to the Old Test.* iii. 411–422. A translation of chapters i.–xxx. by the Rev. Thomas Hill, D. D., now President of Harvard College, was published in the *Monthly Religious Magazine* (Boston) for 1852 and 1853 Far the most important work on this book, however, is the Commentary and Translation of O. F. Fritzsche, with a full Introduction, forming the 5th *Lieferung* of the *Kurzgef. exeget. Handb. zu den Apok. des A. T.* (Leipz. 1859). A German translation of the Apocrypha by D. Cassel (*Die Apokryphen. Nach dem griech. Texte übersetzt*, u. s. w.) was published in Berlin, 1866.

An essay of some value has recently appeared by Dr. J. Horowitz (*Das Buch Jesus Sirach*, Breslau, 1865, first printed in Frankel's *Monatsschrift f. Gesch. u. Wiss. des Judenthums*), which discusses the principal questions respecting the original author and the different translations of the work. According to Horowitz, the Simon mentioned in

[a] * It *is* quoted by Hippolytus (*Opp.* p. 192, l. 12, ed. Lagarde), and by Eusebius (*De Eccles. Theol.* i. 12; *Dem. Evang.* i. 1, *Opp.* iv. 21 a, ed. Migne; *De Vita Const* i. 11; and *Comm. in Ps.* lvi. 2).

Digitized by Google

ch. l. is the famous Simon the Just, and the description in that chapter is so vivid that it must represent what the writer had seen and heard; the book was probably composed at different periods during the long life of the author, the original conclusion being the last verse of ch. xlix.; chapters l., li. were added afterwards, possibly as late as B. C. 250, whence the strangely placed invective against the Samaritans (l. 25, 26), who about this time were harassing the Jews (Joseph. *Ant.* xii. 4, § 1). The translator came to Egypt in the 38th year of Ptolemy Euergetes II. (Physcon), that is, about 132 B. C. But how then could he call the author, who is supposed to have died about 120 years before, his *grandfather*? Horowitz meets this difficulty by taking πάππος in the wider sense of *ancestor*. Further, he does not regard the language in the Prologue respecting the books of the Old Testament as necessarily implying that the collection was then complete, and the Canon closed. The essay contains some happy conjectural restorations of the original text in corrupted passages, chiefly by the aid of the Syriac version. A.

ECLIPSE OF THE SUN. No historical notice of an eclipse occurs in the Bible, but there are passages in the prophets which contain manifest allusion to this phenomenon. They describe it in the following terms: "The sun goes down at noon," "the earth is darkened in the clear day" (Am. viii. 9), "the day shall be dark" (Mic. iii. 6), "the light shall not be clear nor dark" (Zech. xiv. 6), "the sun shall be dark" (Joel ii. 10, 31, iii. 15). Some of these notices probably refer to eclipses that occurred about the time of the respective compositions: thus the date of Amos coincides with a total eclipse, which occurred Feb. 9, B. C. 784, and was visible at Jerusalem shortly after noon (Hitzig, *Comm.* in Proph.); that of Micah with the eclipse of June 5, B. C. 716, referred to by Dionys. Hal. ii. 56, to which same period the latter part of the book of Zechariah may be probably assigned. A passing notice in Jer. xv. 9 coincides in date with the eclipse of Sept. 30, B. C. 610, so well known from Herodotus' account (i. 74, 103). The darkness that overspread the world at the crucifixion cannot with reason be attributed to an eclipse, as the moon was at the full at the time of the Passover. [DARKNESS.] The awe which is naturally inspired by an eclipse in the minds of those who are unacquainted with the cause of it, rendered it a token of impending judgment in the prophetical books. W. L. B.

ED, *i. e.* "witness," a word inserted in the A. V. of Josh. xxii. 34 [brought along from the earlier English versions] apparently on the authority of a few MSS., and also of the Syriac and Arabic Versions, but not existing in the generally-received Hebrew Text. The passage is literally as follows: 'And the children [sons] of Reuben and the children [sons] of Gad named (LXX. ἐπωνόμασεν) the altar: because that is a witness (Ed) between us that Jehovah is God." The rendering of the LXX., though in some respects differing materially from the present text, shows plainly that at that time the word Ed (עֵד) stood in the Hebrew in the present place. The word קָרָא, to call or proclaim, has not invariably (though generally) a transitive force, but is also occasionally an intransitive verb. (For a further investigation of this passage, see Keil, *Joshua*, ad loc.) G.

* The sense is better if we make עֵדִי in the last clause recitative like ὅτι, not causal, as above: "It (*i. e.* the altar) is a witness between us that Jehovah is God." The entire sentence and not "witness" merely (A. V.) was inscribed on the altar and formed its name. So in De Wette's *Uebersetzung* (1858) and in that of the *Société biblique Protestante de Paris* (1866). Ed therefore is not a proper name any more than the other words. H.

EDAR, TOWER OF (accus. EDER, מִגְדַּל עֵדֶר: Vat. omits; Alex. ["in charact. minore"] πύργος Γαδέρ: *turris gregis*), a place named only in Gen. xxxv. 21. Jacob's first halting-place between Bethlehem and Hebron was "beyond (מֵהֲלְאָה) the tower Eder." According to Jerome (*Onomasticon*, Bethlehem) it was 1000 paces from Bethlehem. The name signifies a "flock" or "drove," and is quite in keeping with the pastoral habits of the district.[a] Jerome sees in it a prophecy of the announcement of the birth of Christ to the shepherds; and there seems to have been a Jewish tradition that the Messiah was to be born there (Targum P's. Jon.). G.

EDDI'AS ('Ιεζίας; [Vat. -ζει-;] Alex. Ιεδδίας; [Ald. 'Εδδίας:] *Geddias*), 1 Esdr. ix. 26. [JEZIAH.]

EDEN (עֵדֶן [*pleasantness*]: 'Εδέμ [see below]), the first residence of man. It would be difficult, in the whole history of opinion, to find any subject which has so invited, and at the same time so completely baffled, conjecture, as the Garden of Eden. The three continents of the old world have been subjected to the most rigorous search; from China to the Canary Isles, from the Mountains of the Moon to the coasts of the Baltic, no locality which in the slightest degree corresponded to the description of the first abode of the human race has been left unexamined. The great rivers of Europe, Asia, and Africa, have in turn done service as the Pison and Gihon of Scripture, and there remains nothing but the New World wherein the next adventurous theorist may bewilder himself in the mazes of this most difficult question.

In order more clearly to understand the merit of the several conjectures, it will be necessary to submit to a careful examination the historic narrative on which they are founded. Omitting those portions of the text of Gen. ii. 8–14 which do not bear upon the geographical position of Eden, the description is as follows: "And the Lord God planted a garden in Eden eastward. . . . And a river goeth forth from Eden to water the garden; and from thence it is divided and becomes four heads (or arms). The name of the first *is* Pison: that *is* it which compasseth the whole land of Havilah, where *is* the gold. And the gold of that land *is* good: there *is* the bdellium and the onyx stone. And the name of the second river *is* Gihon; that is it which compasseth the whole land of Cush.

[a] * This Eder may have been a well known watch-tower from which the shepherds overlooked their flocks. Bethlehem is famous at the present day for the number of similar structures in its neighborhood

And the name of the third river *is* Hiddekel; that *is* it which floweth before Assyria. And the fourth river, that *is* Euphrates." In the eastern portion then of the region of Eden was the garden planted. The river which flowed through Eden watered the garden, and thence branched off into four distinct streams. The first problem to be solved then is this: To find a river which, at some stage of its course, is divided into four streams, two of which are the Tigris and Euphrates. The identity of these rivers with the Hiddekel and P'rath has never been disputed, and no hypothesis which omits them is worthy of consideration. Setting aside minor differences of detail, the theories which have been framed with regard to the situation of the terrestrial paradise naturally divide themselves into two classes. The first class includes all those which place the garden of Eden below the junction of the Euphrates and Tigris, and interpret the names Pison and Gihon of certain portions of these rivers: the second, those which seek for it in the high table-land of Armenia, the fruitful parent of many noble streams. These theories have been supported by most learned men of all nations, of all ages, and representing every shade of theological belief; but there is not one which is not based in some degree upon a forced interpretation of the words of the narrative. Those who contend that the united stream of the Euphrates and Tigris is the "river" which "goeth forth from Eden to water the garden," have committed a fatal error in neglecting the true meaning of יָצָא, which is only used of the course of a river from its source *downwards* (cf. Ez. xlvii. 1). Following the guidance which this word supplies, the description in ver. 10 must be explained in this manner: the river takes its rise in Eden, flows into the garden, and from thence is divided into four branches, the separation taking place either in the garden or after leaving it. If this be the case, the Tigris and Euphrates before junction cannot, in this position of the garden, be two of the four branches in question. But, though they have avoided this error, the theorists of the second class have been driven into a Charybdis not less destructive. Looking for the true site of Eden in the highlands of Armenia, near the sources of the Tigris and Euphrates, and applying the names Pison and Gihon to some one or other of the rivers which spring from the same region, they have been compelled to explain away the meaning of נָהָר, the "river," and to give to רָאשִׁים a sense which is not supported by a single passage. In no instance is רֹאשׁ (lit. "head") applied to the *source* of a river. On several occasions (cf. Judg. vii. 16, Job i. 17, &c.) it is used of the detachments into which the main body of an army is divided, and analogy therefore leads to the conclusion that רָאשִׁים denotes "the branches" of the parent stream. There are other difficulties in the details of the several theories, which may be obstacles to their entire reception, but it is manifest that no theory which fails to satisfy the above-mentioned conditions can be allowed to take its place among things that are probable.

The old versions supply us with little or no assistance. The translators appear to have hesitated between a mystical and literal interpretation. The word עֵדֶן is rendered by the LXX. as a proper name in three passages only, Gen. ii. 8, 10, iv. 16 where it is represented by Ἐδέμ. In all others, with the exception of Is. li. 3, it is translated τρυφή. In the Vulgate it never occurs as a proper name, but is rendered "*voluptas*," "*locus voluptatis*," or "*delicia*." The Targum of Onkelos gives it uniformly עֵדֶן, and in the Peshito-Syriac it is the same, with the slight variation in two passages of ܥܕܢ for ܥܕܝ.

It would be a hopeless task to attempt to chronicle the opinions of all the commentators upon this question: their name is legion. Philo (*de Mundi Opif.* § 54) is the first who ventured upon an allegorical interpretation. He conceived that by paradise is darkly shadowed forth the governing faculty of the soul; that the tree of life signifies religion, whereby the soul is immortalized; and by the faculty of knowing good and evil the middle sense, by which are discerned things contrary to nature. In another passage (*de Plantat.* § 9) he explains Eden, which signifies "pleasure," as a symbol of the soul, that sees what is right, exults in virtue, and prefers one enjoyment, the worship of the Only Wise, to myriads of men's chief delights. And again (*Legum Allegor.* i. § 14) he says, "now virtue is tropically called paradise, and the site of paradise is Eden, that is, pleasure." The four rivers he explains (§ 19) of the several virtues of prudence, temperance, courage, and justice; while the main stream of which they are branches is the generic virtue, goodness, which goeth forth from Eden, the wisdom of God. The opinions of Philo would not be so much worthy of consideration, were it not that he has been followed by many of the Fathers. Origen, according to Luther (*Comm. in Gen.*), imagined paradise to be heaven, the trees angels, and the rivers wisdom. Papias, Irenæus, Pantænus, and Clemens Alexandrinus have all favored the mystical interpretation (Huet, *Origeniana*, ii. 167). Ambrosius followed the example of Origen, and placed the terrestrial paradise in the third heaven, in consequence of the expression of St. Paul (2 Cor. xii. 2, 4); but elsewhere he distinguishes between the terrestrial paradise and that to which the Apostle was caught up (*De Parad.* c. 3). In another passage (*Ep. ad Sabinum*) all this is explained as allegory. Among the Hebrew traditions enumerated by Jerome (*Trad. Hebr. in Gen.*) is one that paradise was created before the world was formed, and is therefore beyond its limits. Moses Bar Cepha (*De Parad.*) assigns it a middle place between the earth and the firmament. Some affirm that paradise was on a mountain, which reached nearly to the moon; while others, struck by the manifest absurdity of such an opinion, held that it was situated in the third region of the air, and was higher than all the mountains of the earth by twenty cubits, so that the waters of the flood could not reach it. Others again have thought that paradise was twofold, one corporeal and the other incorporeal: others that it was formerly on earth, but had been taken away by the judgment of God (Hopkinson, *Descr. Parad.* in Ugol. *Thes.* vii.). Among the opinions enumerated by Morinus (*Diss. de Parad. Terrest.* Ugol. *Thes.* vii.) is one, that, before the fall, the whole earth was paradise, and was really situated in Eden, in the midst of a kinds of delights. Ephraem Syrus (*Comm. in Gen.*, expresses himself doubtfully upon this point. Whether the trees of paradise, being spiritual, drank

Digitized by Google

of spiritual water, he does not undertake to decide; but he seems to be of opinion that the four rivers have lost their original virtue in consequence of the curse pronounced upon the earth for Adam's transgression.

Conjectures with regard to the dimensions of the garden have differed as widely as those which assign its locality. Ephraem Syrus maintained that it surrounded the whole earth, while Johannes Tostatus restricted it to a circumference of thirty-six or forty miles, and others have made it extend over Syria, Arabia, and Mesopotamia. (Hopkinson, as above.) But of speculations like these there is no end.

What is the river which goes forth from Eden to water the garden? is a question which has been often asked, and still waits for a satisfactory answer. That the ocean stream which surrounded the earth was the source from which the four rivers flowed was the opinion of Josephus (*Ant.* i. 1, § 3) and Johannes Damascenus (*De Orthod. Fid.* ii. 9). It was the *Shat-el-Arab*, according to those who place the garden of Eden below the junction of the Tigris and Euphrates, and their conjecture would deserve consideration were it not that this stream cannot, with any degree of propriety, be said to rise in Eden. By those who refer the position of Eden to the highlands of Armenia, the "river" from which the four streams diverge is conceived to mean "a collection of springs," or a well-watered district. It is scarcely necessary to say that this signification of נָהָר (*nâhâr*) is wholly without a parallel; and even if it could, under certain circumstances, be made to adopt it, such a signification is, in the present instance, precluded by the fact that, whatever meaning we may assign to the word in ver. 10, it must be the same as that which it has in the following verses, in which it is sufficiently definite. Sickler (Augusti, *Theol. Monatsschrift*, i. 1, quoted by Winer), supposing the whole narrative to be a myth, solves the difficulty by attributing to its author a large measure of ignorance. The "river" was the Caspian Sea, which in his apprehension was an immense stream from the east. Bertheau, applying the geographical knowledge of the ancients as a test of that of the Hebrews, arrived at the same conclusion, on the ground that all the people south of the Armenian and Persian highlands place the dwelling of the gods in the extreme north, and the regions of the Caspian were the northern limit of the horizon of the Israelites (Knobel, *Genesis*). But he allows the four rivers of Eden to have been real rivers, and not, as Sickler imagined, oceans which bounded the earth east and west of the Nile.

That the Hiddekel [a] is the Tigris, and the Phrath the Euphrates, has never been denied, except by those who assume that the whole narrative is a myth which originated elsewhere, and was adapted by the Hebrews to their own geographical notions. As the former is the name of the great river by which Daniel sat (Dan. x. 4), and the latter is the term uniformly applied to the Euphrates in the Old Testament, there seems no reason to suppose that the appellations in Gen. ii. 14 are to be understood in any other than the ordinary sense. One circumstance in the description is worthy of observation. Of the four rivers, one, the Euphrates, is mentioned by name only, as if that were sufficient to identify it. The other three are defined according to their geographical positions, and it is fair to conclude that they were therefore rivers with which the Hebrews were less intimately acquainted. If this be the case, it is scarcely possible to imagine that the Gihon, or, as some say, the Pison, is the Nile, for that must have been even more familiar to the Israelites than the Euphrates, and have stood as little in need of a definition.

With regard to the Pison, the most ancient and most universally received opinion identifies it with the Ganges. Josephus (*Ant.* i. 1, § 3), Eusebius (*Onomast.* s. v.), Ambrosius (*de Parad.* c. 3), Epiphanius (*Ancor.* c. 58), Ephr. Syr. (*Opp. Syr.* i. 23), Jerome (Ep. 4 *ad Rust.* and *Quæst. Heb. in Gen.*), and Augustine (*de Gen. ad Lit.* viii. 7) held this. But Jarchi (on Gen. ii. 11), Saadiah Gaon, R. Moses ben Nachman, and Abr. Peritsol (Ugol. *Thes.* vii.), maintained that the Pison was the Nile. The first of these writers derives the word from a root which signifies "to increase," "to overflow" (cf. Hab. i. 8), but at the same time quotes an etymology given in *Bereshith rabbâ*, § 16, in which it is asserted that the river is called Pison "because it makes the flax (פִּשְׁתָּן) to grow." Josephus explains it by πλῆθος, Scaliger by πλῆμμυρα. The theory that the Pison is the Ganges is thought to receive some confirmation from the author of the book of Ecclesiasticus, who mentions (xxiv. 25, 27) in order the Pison, the Tigris, the Euphrates, Jordan, and Gihon, and is supposed to have commenced his enumeration in the east and to have terminated it in the west. That the Pison was the Indus was an opinion current long before it was revived by Ewald (*Gesch. d. Volk. Isr.* i. 331, note 2) and adopted by Kalisch (*Genesis*, p. 96). Philostorgius, quoted by Huet (Ugol. vol. vii.), conjectured that it was the Hydaspes; and Wilford (*As. Res.* vol. vi.), following the Hindoo tradition with regard to the origin of mankind, discovers the Pison in the Landi-Sindh, the Ganges of Isidorus, called also Nilâb from the color of its waters, and known to the Hindoos by the name of Nilá-Gangá or Gangá simply. Severianus (*de Mundi Creat.*) and Ephraem Syrus (*Comm. on Gen.*) agree with Cæsarius in identifying the Pison with the Danube. The last-mentioned father seems to have held, in common with others, some singular notions with regard to the course of this river. He believed that it was also the Ganges and Indus, and that, after traversing Ethiopia and Elymais, which he identified with Havilah, it fell into the ocean near Cadiz. Such is also the opinion of Epiphanius with regard to the course of the Pison, which he says is the Ganges of the Ethiopians and Indians and the Indus of the Greeks (*Ancor.* c. 58). Some, as Hopkinson (Ugol. vol. vii.), have found the Pison in the Naharmalca, one of the artificial canals which formerly joined the Euphrates with the Tigris. This canal is the *flumen regium* of Amm. Marc. (xxiii. 6, § 25, and xxiv. 6, § 1), and the *Armalchar* of Pliny (*H. N.* vi. 30). Grotius, on the contrary, considered it to be the Gihon. Even those commentators who agree in placing the terrestrial Paradise on the *Shat-el-Arab*, the stream formed by the junction of the Tigris and Euphrates, between Ctesiphon and Apamea, are by no means unanimous as to which of the branches, into

[a] This name is said to be still in use among the tribes who live upon its banks (Col. Chesney, *Exp. to Tigris and Euphrates*, i. 18).

Digitized by Google

which this stream is again divided, the names Pison and Gihon are to be applied. Calvin (*Comm. in Gen.*) was the first to conjecture that the Pison was the most easterly of these channels, and in this opinion he is followed by Scaliger and many others. Huet, on the other hand, conceived that he proved beyond doubt that Calvin was in error, and that the Pison was the westernmost of the two channels by which the united stream of the Euphrates and Tigris falls into the Persian Gulf. He was confirmed by the authority of Bochart (*Hieroz.* pt. ii. l. 5, c. 5). Junius (*Præl. in Gen.*) and Rask discovered a relic of the name Pison in the Pasitigris. The advocates of the theory that the true position of Eden is to be sought for in the mountains of Armenia have been induced, from a certain resemblance in the two names, to identify the Pison with the Phasis, which rises in the elevated plateau at the foot of Mount Ararat, near the sources of the Tigris and Euphrates. Reland (*de Situ Paral. terr.* Ugol. vol. vii.), Calmet (*Dict.* s. v.), Link (*Urwelt*, i. 307), Rosenmüller (*Handb. d. Bibl. Alt.*), and Hartmann have given their suffrages in favor of this opinion. Raumer (quoted by Delitzsch, *Genesis*) endeavored to prove that the Pison was the Phasis of Xenophon (*Anab.* iv. 6), that is, the Aras or Araxes, which flows into the Caspian Sea. There remain yet to be noticed the theories of Le Clerc (*Comm. in Gen.*) that the Pison was the Chrysorrhoas, the modern Barada, which takes its rise near Damascus; and that of Buttmann (*Alt. Erdk.* p. 32) who identified it with the Besynga or Irabatti, a river of Ava. Mendelssohn (*Comm. on Gen.*) mentions that some affirm the Pison to be the Gozan of 2 K. xvii. 6 and 1 Chr. v. 26, which is supposed to be a river, and the same with the Kizil-Uzen in Hyrcania. Colonel Chesney, from the results of extensive observations in Armenia, was "led to infer that the rivers known by the comparatively modern names of Halys and Araxes are those which, in the book of Genesis, have the names of Pison and Gihon; and that the country within the former is the land of Havilah, whilst that which borders upon the latter is the still more remarkable country of Cush." (*Exp. to Euphr. and Tigris*, i. 267.)

Such, in brief, is a summary of the various conjectures which have been advanced, with equal degrees of confidence, by the writers who have attempted to solve the problem of Eden. The majority of them are characterized by one common defect. In the narrative of Genesis the river Pison is defined as that which surrounds the whole land of Havilah. It is, then, absolutely necessary to fix the position of Havilah before proceeding to identify the Pison with any particular river. But the process followed by most critics has been first to find the Pison and then to look about for the land of Havilah. The same inverted method is characteristic of their whole manner of treating the problem. The position of the garden is assigned, the rivers are then identified, and lastly the countries mentioned in the description are so chosen as to coincide with the rest of the theory.

With such diversity of opinion as to the river which is intended to be represented by the Pison, it was scarcely possible that writers on this subject should be unanimous in their selection of a country possessing the attributes of Havilah. In Gen. ii. 11, 12, it is described as the land where the best gold was found, and which was besides rich in the treasures of the *b'dolach* and the stone *shoham*. A country of the same name is mentioned as forming one of the boundaries of Ishmael's descendants (Gen. xxv. 18), and the scene of Saul's war of extermination against the Amalekites (1 Sam. xv. 7). In these passages Havilah seems to denote the desert region southeast of Palestine. But the word occurs also as the proper name of a son of Joktan, in close juxtaposition with Sheba and Ophir, also sons of Joktan and descendants of Shem (Gen. x. 29), who gave their names to the spice and gold countries of the south. Again, Havilah is enumerated among the Hamites as one of the sons of Cush; and in this enumeration his name stands in close connection with Seba, Sheba, and Dedan, the first founders of colonies in Ethiopia and Arabia which afterwards bore their names. If, therefore, the Havilah of Gen. ii. be identical with any one of these countries, we must look for it on the east or south of Arabia, and probably not far from the Persian Gulf. In other respects, too, this region answers to the conditions required. Bochart, indeed, thought the name survived in *Chaulan*, which was situated on the east side of the Arabian Gulf, and which he identified with the abode of the Shemitic Joktanites; but if his etymology be correct, in which he connects Havilah with the root חול "sand," the appellation of "the sandy" region would not necessarily be restricted to one locality. That the name is derived from some natural peculiarity is evident from the presence of the article. Whatever may be the true meaning of *b'dolach*, be it carbuncle, crystal, bdellium, ebony, pepper, cloves, beryl, pearl, diamond, or emerald, all critics detect its presence, under one or other of these forms, in the country which they select as the Havilah most appropriate to their own theory. As little difficulty is presented by the *shoham*: call it onyx, sardonyx, emerald, sapphire, beryl, or sardius, it would be hard indeed if some of these precious stones could not be found in any conceivable locality to support even the most far-fetched and improbable conjecture. That Havilah is that part of India through which the Ganges flows, and, more generally, the eastern region of the earth; that it is to be found in Susiana (Hopkinson), in Ava (Buttmann), or in the Ural region (Raumer), are conclusions necessarily following upon the assumptions with regard to the Pison. Hartmann, Reland, and Rosenmüller are in favor of Colchis, the scene of the legend of the Golden Fleece. The Phasis was said to flow over golden sands, and gold was carried down by the mountain-torrents (Strabo, xi. 2, § 19). The crystal (*b'dolach*) of Scythia was renowned (Solinus, c. xx.), and the emeralds (*shoham*) of this country were as far superior to other emeralds as the latter were to other precious stones (Plin. *H. N.* xxxvii. 17), all which proves, say they, that Havilah was Colchis. Rosenmüller argues, rather strangely, *if* the Phasis be the Pison, the land of Havilah *must* be Colchis, supposing that by this country the Hebrews had the idea of a Pontic or Northern India. In like manner Le Clerc, having previously determined that the Pison must be the Chrysorrhoas, finds Havilah not far from Cœle-Syria. Hasse (*Entdeck.* pp 49, 50, quoted by Rosenmüller) compares Havilah with the Τλαία of Herodotus (iv 9), in the neighborhood of the Arimaspians, and the dragon which guarded the land of gold. For all these hypotheses there is no more support than the merest conjecture.

Digitized by Google

The second river of Paradise presents difficulties not less insurmountable than the Pison. Those who maintained that the Pison is the Ganges held also that the Gihon was the Nile. One objection to this theory has been already mentioned. Another, equally strong, is, that although in the books of the Old Testament frequent allusion is made to this river, it nowhere appears to have been known to the Hebrews by the name Gihon. The idea seems to have originated with the LXX. rendering of שִׁיחוֹר by Γηών in Jer. ii. 18; but it is clear from the manner in which the translators have given the latter clause of the same passage that they had no conception of the true meaning. Among modern writers, Bertheau (quoted by Delitzsch, *Genesis*) and Kalisch (*Genesis*) have not hesitated to support this interpretation, in accordance with the principle they adopt, that the description of the garden of Eden is to be explained according to the most ancient notions of the earth's surface, without reference to the advances made in later times in geographical knowledge. If this hypothesis be adopted, it certainly explains some features of the narrative; but, so far from removing the difficulty, it introduces another equally great. It has yet to be proved that the opinions of the Hebrews on these points were as contradictory to the now well-known relations of land and water as the recorded impressions of other nations at a much later period. At present we have nothing but categorical assertion. Pausanias (ii. 5), indeed, records a legend that the Euphrates, after disappearing in a marsh, rises again beyond Ethiopia, and flows through Egypt as the Nile. Arrian (*Exp. Alex.* vi. 1) relates that Alexander, on finding crocodiles in the Indus, and beans like those of Egypt on the banks of the Acesines, imagined that he had discovered the sources of the Nile; but he adds, what those who make use of this passage do not find it convenient to quote, that on receiving more accurate information Alexander abandoned his theory, and cancelled the letter he had written to his mother Olympias on the subject. It is but fair to say that there was at one time a theory afloat that the Nile rose in a mountain of Lower Mauritania (Plin. *H. N.* v. 10).

The etymology of Gihon (גִּיחוֹן, *to burst forth*) seems to indicate that it was a swiftly flowing, impetuous stream. According to Golius (*Lex. Arab.*), جيحون (*Jichoon*) is the name given to the Oxus, which has, on this account, been assumed by Rosenmüller, Hartmann, and Michaelis to be the Gihon of Scripture. But the Araxes, too, is called by the Persians *Jichoon ar-Ras*, and from this circumstance it has been adopted by Reland, Calmet, and Col. Chesney as the modern representative of the Gihon. It is clear, therefore, that the question is not to be decided by etymology alone, as the name might be appropriately applied to many rivers. That the Gihon should be one of the channels by which the united stream of the Tigris and Euphrates falls into the Persian Gulf, was essential to the theory which places the garden of Eden on the *Shat-el-Arab*. Bochart and Huet contended that it was the easternmost of these channels, while Calvin considered it to be the most westerly. Hopkinson and Junius, conceiving that Eden was to be found in the region of Auranitis (= *Audanitis, quasi Edenitis*) on the Euphrates, were compelled to make the Gihon coincide with the Naharsar, the Marses of Amm. Marc. (xxiii. 6, § 25). That it should be the Orontes (Le Clerc), the Ganges (Buttmann and Ewald), the Kur, or Cyrus, which rises from the side of the Saghanlou mountain, a few miles northward of the sources of the Araxes (Link), necessarily followed from the exigencies of the several theories. Rask and Verbrugge are in favor of the Gyndes of the ancients (Her. i. 189), now called the Diyálah, one of the tributaries of the Tigris. Abraham Peritsol (Ugol. vol. vii.) was of opinion that the garden of Eden was situated in the region of the Mountains of the Moon. Identifying the Pison with the Nile, and the Gihon with a river which his editor, Hyde, explains to be the Niger, he avoids the difficulty which is presented by the fact that the Hiddekel and P'rath are rivers of Asia, by conceiving it possible that these rivers actually take their rise in the Mountains of the Moon, and run underground till they make their appearance in Assyria. Equally satisfactory is the explanation of Ephraem Syrus that the four rivers have their source in Paradise, which is situated in a very lofty place, but are swallowed up by the surrounding districts, and after passing underneath the sea, come to light again in different quarters of the globe. It may be worth while remarking, by the way, that the opinions of this father are frequently misunderstood in consequence of the very inadequate Latin translation with which his Syriac works are accompanied, and which often does not contain even an approximation to the true sense. (For an example, see Kalisch, *Genesis*, p. 95.)

From etymological considerations, Huet was induced to place Cush in Chusistan (called Cutha, 2 K. xvii. 24), Le Clerc in Cassiotis in Syria, and Reland in the "regio Cossæorum." Bochart identified it with Susiana, Link with the country about the Caucasus, and Hartmann with Bactria or Bálkh, the site of Paradise being, in this case, in the celebrated vale of Kashmir. The term Cush is generally applied in the Old Testament to the countries south of the Israelites. It was the southern limit of Egypt (Ez. xxix. 10), and apparently the most westerly of the provinces over which the rule of Ahasuerus extended, "from India, even unto Ethiopia" (Esth. i. 1, viii. 9). Egypt and Cush are associated in the majority of instances in which the word occurs (Ps. lxviii. 31; Is. xviii. 1; Jer. xlvi. 9, &c.); but in two passages Cush stands in close juxtaposition with Elam (Is. xi. 11) and Persia (Ez. xxxviii. 5). The Cushite king, Zerah, was utterly defeated by Asa at Mareshah, and pursued as far as Gerar, a town of the Philistines, on the southern border of Palestine, which was apparently under his sway (2 Chr. xiv. 9, &c.). In 2 Chr. xxi. 16, the Arabians are described as dwelling "beside the Cushites," and both are mentioned in connection with the Philistines. The wife of Moses, who, we learn from Ex. ii., was the daughter of a Midianite chieftain, is in Num. xii. 1 denominated a Cushite. Further, Cush and Seba (Is. xliii. 3), Cush and the Sabæans (Is. xlv. 14) are associated in a manner consonant with the genealogy of the descendants of Ham (Gen. x. 7), in which Seba is the son of Cush. From all these circumstances it is evident that under the denomination Cush were included both Arabia and the country south of Egypt on the western coast of the Red Sea. It is possible, also, that the vast desert tracts west of Egypt were known to the Hebrews as the land of Cush, but of this we have no certain proof. The Targumist on Is. xi. 11 sharing the prevailing

Digitized by Google

error of his time, translates Cush by India but that a better knowledge of the relative positions of these countries was anciently possessed is clear from Esth. i. 1. With all this evidence for the southern situation of Cush, on what grounds are Rosenmüller and others justified in applying the term to a more northern region on the banks of the Oxus? We are told that, in the Hindoo mythology, the gardens and metropolis of Indra are placed around the mountain Méru, the celestial north pole; that, among the Babylonians and Medo-Persians, the gods' mountain, Albordj, "the mount of the congregation," was believed to be "in the sides of the north" (Is. xiv. 13); that the oldest Greek traditions point northwards to the birthplace of gods and men; and that, for all these reasons, the Paradise of the Hebrews must be sought for in some far distant hyperborean region. Guided by such unerring indications, Hasse (*Entdeckungen*, pp. 49, 50 n.) scrupled not to gratify his national feeling by placing the garden of Eden on the coast of the Baltic; Rudbeck, a Swede, found it in Scandinavia, and the inhospitable Siberia has not been without its advocates (Morren, Rosenmüller's *Geog.* i. 96). But, with all this predilection in favor of the north, the Greeks placed the gardens of the Hesperides in the extreme west, and there are strong indications in the Puránas "of a terrestrial paradise, different from that of the general Hindu system, in the southern parts of Africa" (*As. Res.* iii. 300). Even Méru was no further north than the Himálayan range, which the Aryan race crossed in their migrations.

In the midst of this diversity of opinions, what is the true conclusion at which we arrive? Theory after theory has been advanced, with no lack of confidence, but none has been found which satisfies the required conditions. All share the inevitable fate of conclusions which are based upon inadequate premises. The problem may be indeterminate because the data are insufficient. It would scarcely, on any other hypothesis, have admitted of so many apparent solutions. Still it is one not easy to be abandoned, and the site of Eden will ever rank, with the quadrature of the circle and the interpretation of unfulfilled prophecy, among those unsolved, and perhaps insoluble, problems, which possess so strange a fascination.

It must not be denied, however, that other methods of meeting the difficulty, than those above mentioned, have been proposed. Some, ever ready to use the knife, have unhesitatingly pronounced the whole narrative to be a spurious interpolation of a later age (Granville Penn, *Min. and Mos. Geol.* p. 184). But, even admitting this, the words are not mere unmeaning jargon, and demand explanation. Ewald (*Gesch.* i. 331, note) affirms, and we have only his word for it, that the tradition originated in the far East, and that in the course of its wanderings the original names of two of the rivers at least were changed to others with which the Hebrews were better acquainted. Hartmann regards it as a product of the Babylonian or Persian period. Luther, rejecting the forced interpretations on which the theories of his time were based, gave it as his opinion that the garden remained under the guardianship of angels till the time of the deluge, and that its site was known to the descendants of Adam; but that by the flood all traces of it were obliterated. On the supposition that this is correct, there is still a difficulty to be explained. The narrative is so worded as to convey the idea that the countries and rivers spoken of were still existing in the time of the historian. It has been suggested that the description of the garden of Eden is part of an inspired antediluvian document (Morren, Rosenmüller's *Geogr.* i. 92). The conjecture is beyond criticism; it is equally incapable of proof or disproof, and has not much probability to recommend it. The effects of the flood in changing the face of countries, and altering the relations of land and water, are too little known at present to allow any inferences to be drawn from them. Meanwhile, as every expression of opinion results in a confession of ignorance, it will be more honest to acknowledge the difficulty than to rest satisfied with a fictitious solution.

The idea of a terrestrial paradise, the abode of purity and happiness, has formed an element in the religious beliefs of all nations. The image of "Eden, the garden of God," retained its hold upon the minds of the poets and prophets of Israel as a thing of beauty whose joys had departed (Ez. xxviii. 13; Joel ii. 3), and before whose gates the cherubim still stood to guard it from the guilty. Arab legends tell of a garden in the East, on the summit of a mountain of jacinth, inaccessible to man; a garden of rich soil and equable temperature, well watered, and abounding with trees and flowers of rare colors and fragrance. In the centre of Jambu-dwípa, the middle of the seven continents of the Puránas, is the golden mountain Méru, which stands like the seed-cup of the lotus of the earth. On its summit is the vast city of Brahmá, renowned in heaven, and encircled by the Ganges, which, issuing from the foot of Vishnu, washes the lunar orb, and falling thither from the skies, is divided into four streams, that flow to the four corners of the earth. These rivers are the Bhadrá, or Oby of Siberia; the Sítá, or Hoangho, the great river of China; the Alakanandá, a main branch of the Ganges; and the Chakshu, or Oxus. In this abode of divinity is the Nandana, or grove of Indra; there too is the Jambu tree, from whose fruit are fed the waters of the Jambu river, which give life and immortality to all who drink thereof. (*Vishnu Purána*, trans. Wilson, pp. 166–171.) The enchanted gardens of the Chinese are placed in the midst of the summits of Houanlun, a high chain of mountains further north than the Himálaya, and further east than Hindukush. The fountain of immortality which waters these gardens is divided into four streams, the fountains of the supreme spirit, Tychiu. Among the Medo-Persians the gods' mountain Albordj is the dwelling of Ormuzd, and the good spirits, and is called "the navel of the waters." The Zend books mention a region called *Heden*, and the place of Zoroaster's birth is called *Hedenesh*, or, according to another passage, *Airjana Veedjo* (Knobel, *Genesis*).

All these and similar traditions are but mere mocking echoes of the old Hebrew story, jarred and broken notes of the same strain; but, with all their exaggerations, "they intimate how in the background of man's visions lay a Paradise of holy joy, — a Paradise secured from every kind of profanation, and made inaccessible to the guilty; a Paradise full of objects that were calculated to delight the senses and to elevate the mind; a Paradise that granted to its tenant rich and rare immunities, and that fed with its perennial streams the tree of life and immortality" (Hardwick, *Christ and other Masters*, pt. ii. p. 133).

W. A. W.

* This difficult subject should not be dismissed without additional suggestions. 1. The statements

Digitized by Google

of Genesis are to be interpreted in a manner consistent with themselves and with other known facts. We accept it as a true history. In so doing, we thereby set aside all theories which find here the Ganges, the Indus, or the Nile. All such interpretations come from men who regard the passage as a myth or saga. We get no help from them here. Known laws of hydrostatics and known facts concerning the Tigris and Euphrates also forbid our understanding that any one *river* in the elevated region where these streams rise, divided itself into four rivers, of which these were two. 2. "Eden" was a region or territory, we know not how extensive, *in which* God planted a garden, and from which went forth these waters. It was not the garden, but the region in which the garden lay. 3. It would not appear that the Deluge wholly changed the face of the country. The sacred writer was evidently describing a region that might be still recognized when he wrote, and he made specifications for the sake of recognition. Moreover, two of the rivers are now well known. 4. The general situation of the territory *is fixed* by the rising of the rivers Tigris and Euphrates, in the highlands of Armenia. It is generally conceded, as the result of ethnographical researches, that the early home (or one of the early homes of the nations) is to be sought around that region. 5. The writer seems to be describing the river-system of the territory and the four great rivers into which these various waters became united. No one Hebrew word would so well describe the case as נָהָר used collectively. The word עַיִן denotes a fountain; מַיִם bodies of water. But נָהָר is a stream, or used collectively, streams, the river-system. It is commonly employed in the plural when more than one stream is designated. Here however the whole are viewed together. A similar use is found in Jonah ii. 4, where the same word in the singular and connected with a singular verb, designates the ocean streams or floods that surrounded Jonah.

Now in the high regions of Armenia there are still to be found four great streams with numerous branches, rising within a short distance of each other and flowing into three different seas. Two of these rivers are unquestionably among the four mentioned in Genesis; and of these two the Tigris rises within four or five miles of the Euphrates. The latter is 1500 miles in length, and the former 1186 miles long before its junction with it. Now midway between the two main sources of the Euphrates, and about ten miles from each, rises the Araxes and flows a thousand miles to the Caspian Sea; while at no great distance from the Euphrates is the origin of the Halys (now *Kizil Irmak*), which runs a winding course of 700 miles northwesterly to the Black Sea. That the Gihon is the Araxes was long ago maintained by Reland and Rosenmüller; and the explorations of Col. Chesney, who adopts the same view, bring no little weight to the opinion. His suggestion that the Pison is the Halys is also favored by the relation of the several streams, and by the striking similarity of the names Havilah, חֲוִילָה, and Colchis, Κολχίς, the region of the Golden Fleece, which lay on the eastern end of the Black Sea. Reland, Rosenmüller and others saw the resemblance in the names of the country, but suggested the Phasis as the river. Its remoteness would seem to set it aside. The main objection to identifying the Araxes with the Gihon, lies in the statement that the river encompasses the whole land of Cush. But Gesenius himself was obliged to retract his statement that Cush was to be found only in Ethiopia, and to admit an Arabian Cush, while Rawlinson has shown (*Herod.* i. 353, Am. ed.) a remarkable connection between the Cushites of Ethiopia and the earlier inhabitants of Babylonia and Assyria. [CUSH.] Dr. Robinson has well said that "the Cushites occupied the immense region stretching from Assyria in the N. E. through eastern Arabia into Africa" (Gesen. *Heb. Lex.* כּוּשׁ). The Araxes thus apparently lay beyond or compassed "the *whole* land" of the Cushites in Asia. Without going into further details, or becoming responsible for this theory, we may say that it holds fast certain central facts of the narrative, offers a plausible solution of its chief statements, and introduces no mythic or impossible elements. The unsatisfactory state of our knowledge concerning the regions Havilah and Cush, with the reasons, by no means insuperable, for finding them elsewhere, are the chief objections. It deserves consideration in this, at least, that it treats the sacred narrative with respect. S. C. B.

EDEN, 1. (עֵדֶן [*pleasantness*]: Ἐδέμ; [Alex. Εδων:] *Eden*; omitted by LXX. in Is. xxxvii. 12, and Ez. xxvii. 23), one of the marts which supplied the luxury of Tyre with richly embroidered stuffs. It is associated with Haran, Sheba, and Asshur; and in Am. i. 5, Beth-Eden, or "the house of Eden," is rendered in the LXX. by Χαρράν. In 2 K. xix. 12, and Is. xxxvii. 12, "the sons of Eden" are mentioned with Gozan, Haran, and Rezeph, as victims of the Assyrian greed of conquest. Telassar appears to have been the head-quarters of the tribe; and Knobel's (*Comm. on Isaiah*) etymology of this name would point to the highlands of Assyria as their whereabouts. But this has no sound foundation, although the view which it supports receives confirmation from the version of Jonathan, who gives חדיב (*Chadib*) as the equivalent of Eden. Bochart proved (*Phaleg*, pt. i. p. 274) that this term was applied by the Talmudic writers to the mountainous district of Assyria, which bordered on Media, and was known as Adiabene. But if Gozan be Gausanitis in Mesopotamia, and Haran be Carrhæ, it seems more natural to look for Eden somewhere in the same locality. Keil (*Comm. on Kings*, ii. 97, English translation) thinks it may be ܒܝܬ ܥܕܢ (*Ma'don*), which Assemani (*Bibl. Or.* ii. 294) places in Mesopotamia, in the modern province of Diarbekr. Bochart, considering the Eden of Genesis and Isaiah as identical, argues that Gozan, Haran, Rezeph, and Eden, are mentioned in order of geographical position, from north to south; and, identifying Gozan with Gausanitis, Haran with Carrhæ, a little below Gausanitis on the Chaboras, and Rezeph with Resaipha, gives to Eden a still more southerly situation at the confluence of the Euphrates and Tigris, or even lower. According to him, it may be Addan, or Addana, which geographers place on the Euphrates. Michaelis (*Suppl.* No. 1836) is in favor of the modern Aden, called by Ptolemy Ἀραβίας ἐμπόριον, as the Eden of Ezekiel. In the absence of positive evidence, probability seems to point to the N. W. of Mesopotamia as the locality of this Eden.

2. BETH-EDEN (בֵּית עֶדֶן, *house of pleasure* [*house of Eden*, A. V.]: οἶκος Χαρράν; [Comp. Ε. Ἁδάν:] *domus voluptatis*), probably the name of a country residence of the kings of Damascus (Am. i. 5). Michaelis (*Suppl. ad Lex. Hebr.* s. v.), following Laroque's description, and misled by an apparent resemblance in name, identified it with *Ehden*, about a day's journey from Baalbek, on the eastern slope of the Libanus, and near the old cedars of *Bshirrai*. Baur (*Amos*, p. 224), in accordance with the Mohammedan tradition, that one of the four terrestrial paradises was in the valley between the ranges of the Libanus and Anti-Libanus, is inclined to favor the same hypothesis. But Grotius, with greater appearance of probability, pointed to the παράδεισος of Ptolemy (v. 15) as the locality of Eden. The ruins of the village of *Jûsieh el-Kuftmeh*, now a paradise no longer, are supposed by Dr. Robinson to mark the site of the ancient Paradisus, and his suggestion is approved by Mr. Porter (*Hdmdb.* p. 577). Again, it has been conjectured that Beth-Eden is no other than *Beit-Jenn*, "the house of Paradise," not far to the southwest of Damascus, on the eastern slope of the Hermon, and a short distance from *Mejdel*. It stands on a branch of the ancient Pharpar, near its source (Rosenmüller, *Bibl. Alt.* ii. 291; Hitzig, *Amos*, in loc.; Porter, *Damascus*, i. 311). But all this is mere conjecture; it is impossible, with any degree of certainty, to connect the Arabic name, bestowed since the time of Mohammed, with the more ancient Hebrew appellation, whatever be the apparent resemblance. W. A. W.

EDEN (עֵדֶן [*pleasantness*]: Ἰωαδάμ; [Vat. M.] Ἰωαδαν; [Vat. H. Alex. Ἰωδαν; Comp. Ωδαδν:] *Eden*). 1. A Gershonite Levite, son of Joah, in the days of Hezekiah (2 Chr. xxix. 12). He was one of the two representatives of his family who took part in the purification of the Temple.

2. (Ὀδάμ; [Comp. Ἁδάν.]) Also a Levite, contemporary and probably identical with the preceding, who under Kore the son of Imnah was over the freewill offerings of God (2 Chr. xxxi. 15). W. A. W.

EDER (עֶדֶר, *a flock*: Vat. omits [rather, with Rom., reads Ἀρά]; Alex. Εδραιν; [Ald. with 20 MSS. Ἐδραΐ; Comp. Ἔδερ:] *Eder*), one of the towns of Judah in the extreme south, and on the borders of Edom (Josh. xv. 21). No trace of it has been discovered in modern times, unless, as has been suggested, it is identical with ARAD, by a transposition of letters.

2. (Ἐδέρ: *Eder*.) A Levite of the family of Merari, in the time of David (1 Chr. xxiii. 23, xxiv. 30). G.

EDES (Ἠδαΐς; [Vat., including the next word, Ηδσουηλ; Ald. Ἠδές: *Sedmi*] *Esmi* [?]), Esdr. ix. 35. [JADAU.]

EDNA (Ἔδνα, *i. e.* עֶדְנָה, *pleasure*: *Anna*), the wife of Raguel (Tob. vii. 2, 8, 14, 16, [viii. 2,] x. 12, xi. 1). B. F. W.

EDOM, IDUME'A, or IDUMÆ'A (אֱדוֹם, *red*: Ἐδώμ, [Ἰδουμαία:] N. T. Ἰδουμα'α, only in Mark iii. 8). The name Edom was given to Esau, the first-born son of Isaac, and twin brother of Jacob, when he sold his birthright to the latter for a meal of lentile pottage. The peculiar color of the pottage gave rise to the name *Edom*, which signifies "red." "And Esau said to Jacob, Feed me, I pray thee, with that same red pottage; for I am faint; therefore was his name called Edom" (Gen. xxv. 29–34). The country which the Lord subsequently gave to Esau was hence called the "field of Edom" (שְׂדֵה אֱדוֹם, Gen. xxxii. 3) or "land of Edom" (אֶרֶץ אֱדוֹם, Gen. xxxvi 16; Num. xxxiii. 37). Probably its physical aspect may have had something to do with this. The Easterns have always been, and to the present day are, accustomed to apply names descriptive of the localities. The ruddy hue of the mountain-range given to Esau would at once suggest the word *Edom*, and cause it to be preferred to the better-known Esau. The latter was also occasionally used, as in Obad. 8, 9, 19; and in 21, we have "the Mount of Esau" (אֶת־הַר עֵשָׂו).

Edom was previously called *Mount Seir* (שֵׂעִיר, *rugged*; Gen. xxxii. 3, xxxvi. 8), from Seir the progenitor of the Horites (Gen. xiv. 6, xxxvi. 20–22). The name Seir was perhaps adopted on account of its being descriptive of the "rugged" character of the territory. Josephus (*Ant.* i. 18, § 1) confounds the words *Seir* and *Esau*, and seems to affirm that the name Seir was also derived from Isaac's son; but this idea is opposed to the express statement of Moses (Gen. xiv. 6). The original inhabitants of the country were called *Horites*, from *Hori*, the grandson of Seir (Gen. xxxvi. 20, 22), because that name was descriptive of their habits as "Troglodytes," or "dwellers in caves" (חֹרִי, HORITES). Timna, the daughter of Seir and aunt of Hori, became concubine to Eliphaz, Esau's oldest son, and bare to him Amalek, the progenitor of the *Amalekites* (Gen. xxxvi. 12, 20, 22). Immediately after the death of Isaac, Esau left Canaan and took possession of Mount Seir (Gen. xxxv. 28. xxxvi. 6, 7, 8). When his descendants increased they extirpated the Horites, and adopted their habits as well as their country (Deut. ii. 12; Jer. xlix. 16; Obad. 3, 4).

The boundaries of Edom, though not directly, are yet incidentally defined with tolerable distinctness in the Bible. The country lay along the route pursued by the Israelites from the peninsula of Sinai to Kadesh-barnea, and thence back again to Elath (Deut. i. 2, ii. 1–8); that is, along the *east* side of the great valley of Arabah. It reached southward as far as Elath, which stood at the northern end of the gulf of Elath, and was the seaport of the Edomites; but it does not seem to have extended further, as the Israelites on passing Elath struck out eastward into the desert, so as to pass round the land of Edom (Deut. ii. 8). On the north of Edom lay the territory of Moab, through which the Israelites were also prevented from going, and were therefore compelled to go from Kadesh by the southern extremity of Edom (Judg. xi. 17, 18; 2 K. iii. 6–9). The boundary between Moab and Edom appears to have been the "brook Zered" (Deut. ii. 13, 14, 18), probably the modern *Wady-el-Ahsy*, which still divides the provinces of *Kerak* (Moab) and *Jebâl* (Gebalene). But Edom was wholly a mountainous country. "Mount Seir" (Gen. xiv. 6, xxxvi. 8, 9; Deut. i. 2, ii. 1, 5, &c.) and "the Mount of Esau" (Obad. 8, 9, 19, 21) are names often given to it in the Bible, while Josephus and later writers called it *Gebalene* ("the mountainous"). This shows that it only embraced

Digitized by Google

the narrow mountainous tract (about 100 miles long by 20 broad) extending along the eastern side of the Arabah from the northern end of the gulf of Elath to near the southern end of the Dead Sea. A glance at the more modern divisions and names corroborates this view. Josephus divides Edom, or Idumæa, into two provinces; the one he calls *Gobolitis* (Γοβολίτις), and the other *Amalekitis* (*Ant.* ii. 1, § 2). The former is Edom Proper, or Mount Seir; the latter is the region south of Palestine now called the desert of *et-Tîh*, or "Wandering," originally occupied by the Amalekites (Num. xiii. 29; 1 Sam. xv. 1–7, xxvii. 8), but afterwards, as we shall see, possessed by the Edomites. Eusebius also gives the name *Gabalene*, or *Gebalene*, as identical with Edom (*Onom.* s. v. *Seir*, *Idumæa*, *Allus*, &c.), and in the Samaritan Pentateuch the word *Gabla* is substituted for *Seir* in Deut. xxxiii. 2. Gebalene is the Greek form of the Hebrew *Gebâl* (גְּבָל, *mountain*), and it is still retained in the Arabic *Jebâl* (جِبَال, *mountains*). The mountain range of Edom is at present divided into two districts. The northern is called *Jebâl*. It begins at *Wady-el-Ahsy* (the ancient brook *Zered*), which separates it from *Kerak* (the ancient Moab), and it terminates at or near Petra. The southern district is called *esh-Shêrah*, a name which, though it resembles, bears no radical relation to the Hebrew Seir.

The physical geography of Edom is somewhat peculiar. Along the western base of the mountain-range are low calcareous hills. To these succeed lofty masses of igneous rock, chiefly porphyry, over which lies red and variegated sandstone in irregular ridges and abrupt cliffs, with deep ravines between. The latter strata give the mountains their most striking features and remarkable colors. The average elevation of the summits is about 2000 feet above the sea. Along the eastern side runs an almost unbroken limestone ridge, a thousand feet or more higher than the other. This ridge sinks down with an easy slope into the plateau of the Arabian desert. While Edom is thus wild, rugged, and almost inaccessible, the deep glens and flat terraces along the mountain sides are covered with rich soil, from which trees, shrubs, and flowers now spring up luxuriantly. No contrast could be greater than that between the bare, parched plains on the east and west, and the ruddy cliffs, and verdant, flower-spangled glens and terraces of Edom. This illustrates Bible topography, and reconciles seemingly discordant statements in the sacred volume. While the posterity of Esau dwelt amid rocky fastnesses and on mountain heights, making their houses like the eyries of eagles, and living by their sword (Jer. xlix. 16; Gen. xxvii. 40), yet Isaac, in his prophetic blessing, promised his disappointed son that his dwelling should be "of the fatness of the earth, and of the dew of heaven from above" (Gen. xxvii. 39). Some other passages of Scripture are also illustrated by a glance at the towering precipices and peaks of Edom. The border of the Amorites was from "the ascent of scorpions (*Akrabbim*), from the rock" — that is, from the rocky boundary of Edom (Judg. i. 36). And we read that Amaziah, after the conquest of Seir, took ten thousand of the captives to the "top of the cliff," and thence cast them down, dashing them all to pieces (2 Chr. xxv. 11, 12).

The ancient capital of Edom was Bozrah [BOZRAH], the site of which is most probably marked by the village of *Buseireh*, near the northern border, about 25 miles south of Kerak (Gen. xxxvi 33; Is. xxxiv. 6, lxiii. 1; Jer. xlix. 13, 22). But Sela, better known by its Greek name Petra, appears to have been the principal stronghold in the days of Amaziah (B. C. 838; 2 K. xiv. 7; see PETRA). Elath, and its neighbor Ezion-geber, were the sea-ports; they were captured by king David, and here Solomon equipped his merchant-fleet (2 Sam. viii. 14; 1 K. ix. 26).

When the kingdom of Israel began to decline, the Edomites not only reconquered their lost cities, but made frequent inroads upon southern Palestine (2 K. xvi. 6; where *Edomites* and not Syrians (*Aramæans*) is evidently the true reading; 2 Chr. xxviii. 17). It was probably on account of these attacks, and of their uniting with the Chaldeans against the Jews, that the Edomites were so fearfully denounced by the later prophets (Obad. 1 ff.; Jer. xlix. 7 ff.; Ez. xxv. 12 ff., xxxv. 3 ff.). During the Captivity they advanced westward, occupied the whole territory of their brethren the Amalekites Gen. xxxvi. 12; 1 Sam. xv. 1 ff.; Joseph. *Ant.* ii. 1, § 2), and even took possession of many towns in southern Palestine, including Hebron (Joseph. *Ant.* xii. 8, § 6; *B. J.* iv. 9, § 7; *c. Apion.* ii. 10). The name Edom, or rather its Greek form, Idumæa, was now given to the country lying between the valley of Arabah and the shores of the Mediterranean. Thus Josephus writes (*Ant.* v. 1, § 22) — "the lot of Simeon included that part of Idumæa which bordered upon Egypt and Arabia;" and though this is true, it does not contradict the language of Scripture — "I will not give you of their land, no, not so much as a footbreadth, because I have given Mount Seir unto Esau for a possession" (Deut. ii. 5). Not a footbreadth of Edom Proper, or Mount Seir, was ever given to the Jews. Jerome also (*in Obad.*) says that the Edomites possessed the whole country from Eleutheropolis to Petra and Elath; and Roman authors sometimes give the name Idumæa to all Palestine, and even call the Jews Idumæans (Virg. *Georg.* iii. 12; Juven. viii. 160; Martial, ii. 2).

While Idumæa thus extended westward, Edom Proper was taken possession of by the Nabathæans, an Arabian tribe, descended from Nebaioth, Ishmael's oldest son and Esau's brother-in-law (Gen. xxv. 13; 1 Chr. i. 29; Gen. xxxvi. 3). The Nabathæans were a powerful people, and held a great part of southern Arabia (Joseph. *Ant.* i. 12, § 4). They took Petra and established themselves there at least three centuries before Christ, for Antigonus, one of the successors of Alexander the Great, after conquering Palestine, sent two expeditions against the Nabathæans in Petra (Diod. Sic. xix). This people, leaving off their nomad habits, settled down amid the mountains of Edom, engaged in commerce, and founded the little kingdom called by Roman writers *Arabia Petræa*, which embraced nearly the same territory as the ancient Edom. Some of its monarchs took the name Aretas (2 Macc. v. 8; Joseph. *Ant.* xiii. 15, § 1, 2; xiv. 5, § 1), and some Obodas (Joseph. *Ant.* xiii. 13, § 5). Aretas, king of Arabia, was father-in-law of Herod Antipas (Matt. xiv. 3, 4), and it was the same who captured the city of Damascus and held it at the time of Paul's conversion (2 Cor. xi. 32; Acts ix 25). The kingdom of Arabia was finally subdued by the Romans in A. D. 105. Under the Romans the transport trade of the Nabathæans increased Roads were constructed through the mountain-de

Digitized by Google

files from Elath on the coast to Petra, and thence northward and westward. Traces of them still remain, with ruinous military stations at intervals, and fallen mile-stones of the times of Trajan and Marcus Aurelius (*Peutinger Tables;* Laborde's *Voyage;* Burckhardt's *Syria*, pp. 374, 419; Irby and Mangles' *Travels*, pp. 371, 377, 1st ed.). To the Nabathæans Petra owes those great monuments which are still the wonder of the world.

When the Jewish power revived under the warlike Asmonean princes, that section of Idumæa which lay south of Palestine fell into their hands. Judas Maccabæus captured Hebron, Marissa, and Ashdod; and John Hyrcanus compelled the inhabitants of the whole region to conform to Jewish law (Joseph. *Ant.* xii. 8, § 6, xiii. 9, § 2; 1 Macc. v. 65, 68). The country was henceforth governed by Jewish prefects; one of these, Antipater, an Idumæan by birth, became, through the friendship of the Roman emperor, procurator of all Judæa, and his son was Herod the Great, "King of the Jews" (Joseph. *Ant.* xiv. 1, § 3, 8, § 5, xv. 7, § 9, xvii. 11, § 4).

Early in the Christian era Edom Proper was included by geographers in Palestine, but in the fifth century a new division was made of the whole country into *Palæstina Prima, Secunda*, and *Tertia*. The last embraced Edom and some neighboring provinces, and when it became an ecclesiastical division its metropolis was Petra. In the seventh century the Mohammedan conquest gave a death-blow to the commerce and prosperity of Edom. Under the withering influence of Mohammedan rule the great cities fell to ruin, and the country became a desert. The followers of the false prophet were here, as elsewhere, the instruments in God's hands for the execution of his judgments. "Thus saith the Lord God, Behold, O Mount Seir, I am against thee, and I will make thee most desolate. I will lay thy cities waste, and when the whole earth rejoiceth I will make thee desolate. . . . I will make Mount Seir most desolate, and cut off from it him that passeth out and him that returneth. . . . I will make thee perpetual desolations, and thy cities shall not return, and ye shall know that I am the Lord" (Ez. xxxv. 3, 4, 7, 9, 14).

The Crusaders made several expeditions into Edom, penetrating as far as Petra, to which they gave the name it still bears, *Wady Músa*, "Valley of Moses" (*Gesta Dei per Franc.* pp. 405, 518, 535, 581). On a commanding height about 12 miles north of Petra they built a strong fortress called Mons Regalis, now *Shôbek* (*Gesta Dei*, p. 811). At that time so little was known of the geography of the country that the Crusaders occupied and fortified *Kerak* (the ancient Kir Moab) under the impression that it was the site of Petra.

From that time until the present century Edom remained an unknown land. In the year 1812 Burckhardt entered it from the north, passed down through it, and discovered the wonderful ruins of Petra. In 1828 Laborde, proceeding northward from *Akabah* through the defiles of Edom, also visited Petra, and brought away a portfolio of splendid drawings, which proved that the descriptions of Burckhardt had not been exaggerated. Many have since followed the footsteps of the first explorers, and a trip to Petra now forms a necessary part of the eastern traveller's grand tour.

For the ancient geography of Edom consult *Reland Palæstina*, pp. 48, 66 ff., 78, 82; for the history and commerce of the Nabathæans, Vincent's *Commerce and Navigation of the Ancients*, vol. ii.; for the present state of the country and descriptions of Petra, Burckhardt's *Travels in Syria*, Laborde's *Voyage*, Robinson's *Biblical Researches*, Porter's *Handbook for Syria and Palestine*.

J. L. P.

EDOMITES (אֲדֹמִיִּים, אֱדֹמִי, pl.; and בְּנֵי עֵשָׂו [*sons of the hairy*], Deut. ii. 4: Ἰδουμαῖοι), the descendants of Esau or Edom. [EDOM]. Esau settled in Mount Seir immediately after the death of his father Isaac (Gen. xxxvi. 6, 8). Before that time, however, he had occasionally visited, and even resided in, that country; for it was to the "land of Seir" Jacob sent messengers to acquaint his brother of his arrival from Padan-aram (Gen. xxxii. 3). The Edomites soon became a numerous and powerful nation (Gen. xxxvi. 1 ff.). Their first form of government appears to have resembled that of the modern Bedawin; each tribe or clan having a petty chief or sheikh (אַלּוּף, "Duke" in the A. V., Gen. xxxvi. 15). The Horites, who inhabited Mount Seir from an early period, and among whom the Edomites still lived, had their sheikhs also (Gen. xxxvi. 29 ff.). At a later period, probably when the Edomites began a war of extermination against the Horites, they felt the necessity of united action under one competent leader, and then a king was chosen. The names of eight of their kings are given in the book of Genesis (xxxvi. 31–39), with their native cities, from which it appears that one of them was a foreigner ("Saul of Rehoboth-by-the river"), or, at least, that his family were resident in a foreign city. (See also 1 Chr. i. 43–50.) Against the Horites the children of Edom were completely successful. Having either exterminated or expelled them they occupied their whole country (Deut. ii. 12). A statement made in Gen. xxxvi. 31, serves to fix the period of the dynasty of the eight kings. They "reigned in the land of Edom before there reigned any king over the children of Israel;" that is, before the time of Moses, who may be regarded as the first virtual king of Israel (comp. Deut. xxxiii. 5; Ex. xviii. 16–19). Other circumstances, however, prove that though the Edomite kings had the chief command, yet the old patriarchal government by sheikhs of tribes was still retained. Most of the large tribes of Bedawin at the present day have one chief, with the title of *Emir*, who takes the lead in any great emergency; while each division of the tribe enjoys perfect independence under its own sheikh. So it would seem to have been with the Edomites. Lists of *dukes* (or *sheikhs*, אַלּוּפֵי) are given both before and after the kings (Gen. xxxvi. 15 ff.; 1 Chr. i. 51 ff.), and in the triumphant song of Israel over the engulfed host of Pharaoh, when describing the effect this fearful act of divine vengeance would produce on the surrounding nations, it is said: "Then the *dukes* of Edom shall be amazed" (Ex. xv. 15), while, only a few years afterwards, Moses "sent messengers from Kadesh unto the *king* (מֶלֶךְ) of Edom" to ask permission to pass through his country (Judg. xi. 17).

Esau's bitter hatred to his brother Jacob for fraudulently obtaining his blessing appears to have been inherited by his latest posterity. The Edomites peremptorily refused to permit the Israelites to pass through their land, though addressed in the most friendly terms — "thus saith thy brother

Digitized by Google

Israel" (Num xx. 14) — and though assured that they would neither drink of their waters nor trespass on their fields or vineyards (ver. 17). The Israelites were expressly commanded by God neither to resent this conduct, nor even to entertain feelings of hatred to the Edomites (Deut. ii. 4, 5, xxiii. 7). The Edomites did not attempt actual hostilities, though they prepared to resist by force any intrusion (Num. xx. 20). Their neighbors and brethren (Gen. xxxvi. 12), the Amalekites, were probably urged on by them, and proved the earliest and most determined opponents of the Israelites during their journey through the wilderness (Ex. xvii. 8, 9).

For a period of 400 years we hear no more of the Edomites. They were then attacked and defeated by Saul (1 Sam. xiv. 47). Some forty years later David overthrew their army in the "Valley of Salt," and his general, Joab, following up the victory, destroyed nearly the whole male population (1 K. xi. 15, 16), and placed Jewish garrisons in all the strongholds of Edom (2 Sam. viii. 13, 14; in ver. 13 the Hebrew should evidently be אֲדֹם, instead of אֲרָם; comp. 14; 2 K. xiv. 7; and Joseph. *Ant.* vii. 5, § 4). In honor of that victory the Psalmist-warrior may have penned the words in Ps. lx. 8, "over Edom will I cast my shoe." Hadad, a member of the royal family of Edom, made his escape with a few followers to Egypt, where he was kindly received by Pharaoh. After the death of David he returned, and tried to excite his countrymen to rebellion against Israel, but failing in the attempt he went on to Syria, where he became one of Solomon's greatest enemies (1 K. xi. 14–22; Joseph. *Ant.* viii. 7, § 6). The Edomites continued subject to Israel from this time till the reign of Jehoshaphat (B. C. 914), when they attempted to invade Israel in conjunction with Ammon and Moab, but were miraculously destroyed in the valley of Berachah (2 Chr. xx. 22). A few years later they revolted against Jehoram, elected a king, and for half a century retained their independence (2 Chr. xxi. 8). They were then attacked by Amaziah, 10,000 were slain in battle, Sela, their great stronghold, was captured, and 10,000 more were dashed to pieces by the conqueror from the cliffs that surround the city (2 K. xiv. 7; 2 Chr. xxv. 11, 12). Yet the Israelites were never able again completely to subdue them (2 Chr. xxviii. 17). When Nebuchadnezzar besieged Jerusalem the Edomites joined him, and took an active part in the plunder of the city and slaughter of the poor Jews. Their cruelty at that time seems to be specially referred to in the 137th Psalm — "Remember, O Lord, the children of Edom in the day of Jerusalem; who said, Raze it, raze it, even to the foundation thereof." As the first part of Isaac's prophetic blessing to Esau — "the elder shall serve the younger" — was fulfilled in the long subjection of the Edomites to the kings of Israel, so now the second part was also fulfilled — "It shall come to pass when thou shalt have the dominion that thou shalt break his yoke from off thy neck" (Gen. xxvii. 40). It was on account of these acts of cruelty committed upon the Jews in the day of their calamity that the Edomites were so fearfully denounced by the later prophets (Is. xxxiv. 5–8, lxiii. 1–4; Jer. xlix. 17; Lam. iv. 21; Ez. xxv. 13, 14; Am. i. 11, 12; Obad. 10 ff.).

On the conquest of Judah by the Babylonians, the Edomites, probably in reward for their services during the war, were permitted to settle in southern Palestine, and the whole plateau between it and Egypt; but they were about the same time driven out of Edom Proper by the Nabathæans. [EDOM: NEBAIOTH.] For more than four centuries they continued to prosper, and retained their new possessions with the exception of a few towns which the Persian monarchs compelled them to restore to the Jews after the Captivity. But during the warlike rule of the Maccabees they were again completely subdued, and even forced to conform to Jewish laws and rites (Joseph. *Ant.* xii. 8, § 6, xiii. 9, § 1; 1 Macc. v. 65), and submit to the government of Jewish prefects. The Edomites were now incorporated with the Jewish nation, and the whole province was often termed by Greek and Roman writers *Idumæa* (Ptol. *Geog.* v. 16; Mar. iii. 8). According to the ceremonial law an Edomite was received into "the congregation of the Lord" — that is, to all the rites and privileges of a Jew — "in the third generation" (Deut. xxiii. 8). Antipater, a clever and crafty Idumæan, succeeded, through Roman influence, in obtaining the government of Judæa (Joseph. *Ant.* xiv. 8, § 5). His oldest son, Phasaëlus, he made governor of Jerusalem, and to his second son Herod, then only in his 15th year, he gave the province of Galilee. Herod, afterwards named *the Great*, was appointed "king of the Jews" by a decree of the Roman senate (B. C. 37; Joseph. *Ant.* xiv. 14, § 5; Matt. ii. 1). Immediately before the siege of Jerusalem by Titus, in consequence of the influence of John of Gischala, 20,000 Idumæans were admitted to the Holy City, which they filled with robbery and bloodshed (Joseph. *B. J.* iv. 4 and 5). From this time the Edomites, as a separate people, disappear from the page of history, though the name Idumæa still continued to be applied to the country south of Palestine as late as the time of Jerome (*in Obad.*).

The character of the Edomites was drawn by Isaac in his prophetic blessing to Esau — "By thy sword shalt thou live" (Gen. xxvii. 40). War and rapine were the only professions of the Edomites By the sword they got Mount Seir — by the sword they exterminated the Horites — by the sword they long battled with their brethren of Israel, and finally broke off their yoke — by the sword they won southern Palestine — and by the sword they performed the last act in their long historic drama, massacred the guards in the temple, and pillaged the city of Jerusalem.

Little is known of their religion; but that little shows them to have been idolatrous. It is probable that Esau's marriage with the "daughters of Canaan," who "were a grief of mind" to his father and mother (Gen. xxvi. 34, 35), induced him to embrace their religion, and when Esau and his followers took possession of Mount Seir they seem to have followed the practice common among ancient nations of adopting the country's gods, for we read that Amaziah, king of Judah, after his conquest of the Edomites, "brought the gods of the children of Seir, and set them up to be his gods" (2 Chr. xxv. 14, 15, 20). Josephus also refers to both the idols and priests of the Idumæans (*Ant.* xv. 17 § 9).

The habits of the Idumæans were singular. The Horites, their predecessors in Mount Seir, were, as their name implies, *troglodytes*, or dwellers in caves and the Edomites seem to have adopted their dwellings as well as their country. Jeremiah and Obe

Digitized by Google

diah both speak of them as "dwelling in the clefts of the rocks," and making their habitations high in the cliffs, like the eyries of eagles (Jer. xlix. 16; Obad. 3, 4), language which is strikingly illustrated by a survey of the mountains and glens of Edom. Everywhere we meet with caves and grottoes hewn in the soft sandstone strata. Those at Petra are well known. [PETRA.] Their form and arrangements show that most of them were originally intended for habitations. They have closets and recesses suitable for family uses, and many have windows. The nature of the rock and the form of the cliffs made excavation an easier work than erection, besides the additional security, comfort, and permanence of such abodes. Indeed there is reason to believe that the commercial Nabatheans were the first who introduced buildings into Edom. It is worthy of remark also that the Edomites, when they took possession of southern Palestine, followed even there their old mode of life, and excavated caves and grottoes everywhere through the country. So Jerome in his Commentary on Obadiah writes — "Omnis Australis regio Idumæorum de Eleutheropoli usque ad Petram et Ailam (hæc est possessio Esau) in specubus habitatiunculas habet: et propter nimios calores solis, quia meridiana provincia est, subterraneis tuguriis utitur." During a visit to this region in 1857, the writer of this article had an opportunity of inspecting a large number of these caverns, and has no hesitation in ranking them among the most remarkable of their kind in the world. [ELEUTHEROPOLIS.] The nature of the climate, the dryness of the soil, and their great size, render them healthy, pleasant, and commodious habitations, while their security made them specially suitable to a country exposed in every age to incessant attacks of robbers. J. L. P.

EDREI, 1. (אֶדְרֶעִי [*strong, mighty*]: [Rom. Εδραΐν, exc. Deut. iii. 1, 10, -ῖμ; Josh. xix. 37, Ασσαρί; Vat. Εδραειν, -ειμ, Ασσαρει; Alex. Εδραειν, -ειμ, -ιμ, in Josh. xiii. 12 corrupt, xix. 37, with Ald. Εδραει;] Euseb. *Onom.* Αδρασ: Arab. ادرع: [*Edrai*]), one of the two capital cities of Bashan (Num. xxi. 33; Deut. i. 4, iii. [1,] 10; Josh. xii. 4 [xiii. 12, 31, xix. 37]). In Scripture it is only mentioned in connection with the victory gained by the Israelites over the Amorites under Og their king, and the territory thus acquired. Not a single allusion is made to it in the subsequent history of God's people, though it was within the territory allotted to the half tribe of Manasseh (Num. xxxii. 33), and it continued to be a large and important city down to the seventh century of our era.

The ruins of this ancient city, still bearing the name *Edr'a*, stand on a rocky promontory which projects from the S. W. corner of the Lejah. [ARGOB.] The site is a strange one — without water, without access, except over rocks and through defiles all but impracticable. Strength and security seem to have been the grand objects in view. The rocky promontory is about a mile and a half wide by two miles and a half long; it has an elevation of from twenty to thirty feet above the plain, which spreads out from it on each side, flat as a sea, and of rare fertility. The ruins are nearly three miles in circumference, and have a strange wild look, rising up in black shattered masses from the midst of a wilderness of black rocks. A number of the old houses still remain; they are low, massive, and gloomy, and some of them are half buried beneath heaps of rubbish. In these the present inhabitants reside, selecting such apartments as are best fitted for comfort and security. The short Greek inscriptions which are here and there seen over the doors prove that the houses are at least as old as the time of Roman dominion. *Edr'a* was at one time adorned with a considerable number of public edifices, but time and the chances of war have left most of them shapeless heaps of ruin. Many Greek inscriptions are met with; the greater part of them are of the Christian age, and of no historic value.

The identity of this site with the Edrei of Scripture has been questioned by many writers, who follow the doubtful testimony of Eusebius (*Onom.* s. v. *Eadrei* and *Astaroth*), and place the capital of Bashan at the modern *Der'a*, a few miles further south. The following reasons have induced the present writer to regard *Edr'a* as the true site of Edrei. (1.) The situation is such as would naturally be selected for a capital city in early and troublous times by the rulers of a warlike nation The principles of fortification were then little known, and consequently towns and villages were built on the tops of hills or in the midst of rocky fastnesses. The advantages of *Edr'a* in this respect are seen at a glance. *Der'a*, on the other hand, lies in the open country, without any natural advantages, exposed to the attack of every invader. It is difficult to believe that the warlike Rephaim would have erected a royal city in such a position. (2.) The dwellings of *Edr'a* possess all the characteristics of remote antiquity — massive walls, stone roofs, stone doors. (3.) The name Edrei, "strength," is not only descriptive of the site, but it corresponds more exactly to the Arabic *Edr'a* than to *Der'a* In opposition to these we have the statement in Eusebius that Edrei was in his day called Adara, and was 24 Roman miles from Bostra. There can be no doubt that he refers to *Der'a*, which, as lying on a great road, was better known to him than *Edr'a*, and thus he was led hastily to identify it with Edrei.

It is probable that Edrei did not remain long in possession of the Israelites. May it not be that they abandoned it in consequence of its position within the borders of a wild region infested by numerous robber bands? The Lejah is the ancient Argob, and appears to have been the stronghold of the Geshurites; and they perhaps subsequently occupied Edrei (Josh. xii. 4, 5). The monuments now existing show that it must have been an important town from the time the Romans took possession of Bashan; and that it, and not *Der'a*, was the episcopal city of Adraa, which ranked next to Bostra (Reland, *Pal.* pp. 219, 223, 548). In A. D. 1142, the Crusaders under Baldwin III. made a sudden attack upon Adraa, then popularly called *Civitas Bernardi de Stampis*, but they encountered such obstacles in the difficult nature of the ground, the scarcity of water, and the valor of the inhabitants, that they were compelled to retreat. At the time of the visit of the present writer in 1854 the population amounted to about fifty families, of which some eight or ten were Christian, and the rest Mohammedan. A full account of the history and antiquities of Edrei is given in Porter's *Five Years in Damascus*, vol. ii. p. 220 ff., and *Handbook for Syria and Palestine*, p. 532 ff. See also Burckhardt's *Travels in Syria*, p. 57 ff.; Buckingham's *Travels among the Arab Tribes*, p. 274 [Porter's *Giant Cities of Bashan*, p. 94 ff.]

2. A town of northern Palestine, allotted to the tribe of Naphtali, and situated near Kedesh. It is only once mentioned in Scripture (Josh. xix. 37). The name signifies "strength," or a "stronghold." About two miles south of Kedesh is a conical rocky hill called *Tell Khuraibeh*, the "Tell of the ruin;" with some remains of ancient buildings on the summit and a rock-hewn tomb in its side. It is evidently an old site, and it may be that of the long-lost Edrei. The strength of the position, and its nearness to Kedesh, give probability to the supposition. Dr. Robinson (*Bibl. Res.* vol. iii. p. 365) suggests the identity of *Tell Khuraibeh* with Hazor. For the objections to this theory see Porter's *Hand-book for Syria and Palestine*, p. 442.

J. L. P.

EDUCATION. Although nothing is more carefully inculcated in the Law than the duty of parents to teach their children its precepts and principles (Ex. xii. 26, xiii. 8, 14; Deut. iv. 5, 9, 10, vi. 2, 7, 20, xi. 19, 21; Acts xxii. 3; 2 Tim. iii. 15; Hist. of Susanna, 3; Joseph. *c. Ap.* ii. 16, 17, 25), yet there is little trace among the Hebrews in earlier times of education in any other subjects. The wisdom, therefore, and instruction, of which so much is said in the Book of Proverbs, is to be understood chiefly of moral and religious discipline, imparted, according to the direction of the Law, by the teaching and under the example of parents (Prov. i. 2, 8, ii. 2, 10, iv. 1, 7, 20, viii. 1, ix. 1, 10, xii. 1, xvi. 22, xvii. 24, xxxi.). Implicit exceptions to this statement may perhaps be found in the instances of Moses himself, who was brought up in all Egyptian learning (Acts vii. 22); of the writer of the book of Job, who was evidently well versed in natural history and in the astronomy of the day (Job xxxviii. 31, xxxix., xl, xli.); of Daniel and his companions in captivity (Dan. i. 4, 17); and above all, in the intellectual gifts and acquirements of Solomon, which were even more renowned than his political greatness (1 K. iv. 29, 34, x. 1–9; 2 Chr. ix. 1–8), and the memory of which has, with much exaggeration, been widely preserved in oriental tradition. The statement made above may, however, in all probability be taken as representing the chief aim of ordinary Hebrew education, both at the time when the Law was best observed, and also when, after periods of national decline from the Mosaic standard, attempts were made by monarchs, as Jehoshaphat or Josiah, or by prophets, as Elijah or Isaiah, to enforce, or at least to inculcate reform in the moral condition of the people on the basis of that standard (2 K. xvii. 13, xxii. 8–20; 2 Chr. xvii. 7, 9; 1 K. xix. 14; Is. i. ff.).

In later times the prophecies, and comments on them as well as on the earlier Scriptures, together with other subjects, were studied (Prol. to Ecclus., and Ecclus. xxxviii. 24, 26, xxxix. 1–11). St. Jerome adds that Jewish children were taught to say by heart the genealogies (Hieronym. *on Titus*, iii. 9; Calmet, *Dict.* art. *Généalogie*). Parents were required to teach their children some trade, and he who failed to do so was said to be virtually teaching his child to steal (Mishn. *Kiddush.* ii. 2, vol. iii. p. 413, Surenhus.; Lightfoot, *Chron. Temp.* on Acts xviii. vol. ii. p. 79).

The sect of the Essenes, though themselves abjuring marriage, were anxious to undertake, and careful in carrying out, the education of children, but confined its subject matter chiefly to morals and the Divine Law (Joseph. *B. J.* ii. 8, § 12; Philo. *Quod omnis probus liber*, vol. ii. p. 456, ed Mangey; § 12, Tanchn.).

Previous to the Captivity, the chief depositaries of learning were the schools or colleges, from which in most cases (see Am. vii. 14) proceeded that succession of public teachers, who at various times endeavored to reform the moral and religious conduct of both rulers and people. [PROPHET, II.] In these schools the Law was probably the chief subject of instruction; the study of languages was little followed by any Jews till after the Captivity, but from that time the number of Jews residing in foreign countries must have made the knowledge of foreign languages more common than before (see Acts xxi. 37). From the time of the outbreak of the last war with the Romans, parents were forbidden to instruct their children in Greek literature (Mishn. *Sotah*, c. ix. 15, vol. iii. pp. 307, 308, Surenh.).

Besides the prophetical schools, instruction was given by the priests in the Temple and elsewhere, but their subjects were doubtless exclusively concerned with religion and worship (Lev. x. 11; Ez. xliv. 23, 24; 1 Chr. xxv. 7, 8; Mal. ii. 7). Those sovereigns who exhibited any anxiety for the maintenance of the religious element in the Jewish polity, were conspicuous in enforcing the religious education of the people (2 Chr. xvii. 7, 8, 9, xix. 5, 8, 11; 2 K. xxiii. 2).

From the time of the settlement in Canaan there must have been among the Jews persons skilled in writing and in accounts. Perhaps the neighborhood of the tribe of Zebulun to the commercial district of Phœnicia may have been the occasion of their reputation in this respect. The "writers" of that tribe are represented (Judg. v. 14) by the same word סֹפֵר, used in that passage of the levying of an army, or, perhaps, of a military officer (Gesen. p. 966), as is applied to Ezra, in reference to the Law (Ezr. vii. 6); to Seraiah, David's scribe or secretary (2 Sam. viii. 17); to Shebna, scribe to Hezekiah (2 K. xviii. 37); Shemaiah (1 Chr. xxiv. 6); Baruch, scribe to Jeremiah (Jer. xxxvi. 32), and others filling like offices at various times. The municipal officers of the kingdom, especially in the time of Solomon, must have required a staff of well-educated persons in their various departments under the recorder (מַזְכִּיר) or historiographer, whose business was to compile memorials of the reign (2 Sam. viii. 16, xx. 24; 2 K. xviii. 18; 2 Chr. xxxiv. 8). Learning, in the sense above mentioned, was at all times highly esteemed, and educated persons were treated with great respect, and, according to Rabbinical tradition, were called "sons of the noble," and allowed to take precedence of others at table (Lightfoot, *Chr. Temp.* Acts xvii. vol. ii. p. 79, fol.; *Hor. Hebr.* Luke xiv. 8–24, ii. 540). The same authority deplores the degeneracy of later times in this respect (Mishn. *Sotah*, ix. 15, vol. iii. p. 308, Surenh.).

To the schools of the prophets succeeded, after the Captivity, the synagogues, which were either themselves used as schools or had places near them for that purpose. In most cities there was at least one, and in Jerusalem, according to some, 394, according to others, 460 (Calmet, *Dict.* art. *Ecoles*). It was from these schools and the doctrines of the various teachers presiding over them, of whom Gamaliel, Sammai, and Hillel were among the most famous, that many of those traditions and refinements proceeded by which the Law was at

Digitized by Google

our Lord's time encumbered and obscured, and which may be considered as represented, though in a highly exaggerated degree, by the Talmud. After the destruction of Jerusalem, colleges inheriting and probably enlarging the traditions of their predecessors, were maintained for a long time at Japhne in Galilee, at Lydda, at Tiberias, the most famous of all, and Sepphoris. These schools in process of time were dispersed into other countries, and by degrees destroyed. According to the principles laid down in the Mishna, boys at five years of age were to begin the Scriptures, at ten the Mishna, at thirteen they became subject to the whole Law (see Luke ii. 46), at fifteen they entered the Gemara (Mishna, *Pirk. Ab.* iv. 20, v. 21, vol. iv. pp. 460, 482, 486, Surenhus.). Teachers were treated with great respect, and both pupils and teachers were exhorted to respect each other. Physical science formed part of the course of instruction (*ib.* iii. 18). Unmarried men and women were not allowed to be teachers of boys (*Kiddush.* iv. 13, vol. iii. p. 383). In the schools the Rabbins sat on raised seats, and the scholars, according to their age, sat on benches below or on the ground (Lightfoot on *Luke* ii. 46; Philo, *ibid.* 12, ii. 458, Mangey).

Of female education we have little account in Scripture, but it is clear that the prophetical schools included within their scope the instruction of females, who were occasionally invested with authority similar to that of the prophets themselves (Judg. iv. 4; 2 K. xxii. 14). Needle-work formed a large but by no means the only subject of instruction imparted to females, whose position in society and in the household must by no means be considered as represented in modern oriental — including Mohammedan — usage (see Prov. xxxi. 16, 26; Hist. of Sus. 3; Luke viii. 2, 3, x. 39; Acts xiii. 50; 2 Tim. i. 5).

Among modern Mohammedans, education, even of boys, is of a most elementary kind, and of females still more limited. In one respect it may be considered as the likeness or the caricature of the Jewish system, namely, that besides the most common rules of arithmetic, the Kurán is made the staple, if not the only subject of instruction. In oriental schools, both Jewish and Mohammedan, the lessons are written by each scholar with chalk on tablets which are cleaned for a fresh lesson. All recite their lessons together aloud; faults are usually punished by stripes on the feet. Female children are, among Mohammedans, seldom taught to read or write. A few chapters of the Kurán are learnt by heart, and in some schools they are taught embroidery and needle-work. In Persia there are many public schools and colleges, but the children of the wealthier parents are mostly taught at home. The Kurán forms the staple of instruction, being regarded as the model not only of doctrine but of style, and the text-book of all science. In the colleges, however, mathematics are taught to some extent (Jahn, *Arch. Bibl.* §§ 106, 166, Engl. Tr.; Shaw, *Travels*, p. 194; Rauwolff, *Travels*, c. vii. p. 60; Burckhardt, *Syria*, p. 326; *Travels in Arabia*, i. 275; Porter, *Damascus*, ii. 95; Lane, *Mod. Egypt.* i. 89, 93; *Englishw. in Egypt*, ii. 28, 31; Wellsted, *Arabia*, ii. 6, 395; Chardin, *Voyages*, iv 324 (Langlès); Olearius, *Travels*, pp. 214, 215; Pietro della Valle, *Viaggi*, ii. 188). [See Prophet, I.] H. W. P.

* **EGGS.** [Fowls; Ostrich.]

EGLAH (עֶגְלָה, *a heifer*: Αἰγλά and Ἀγλά [Vat. Αλα]; [Alex. in 2 Sam., Αγλαι; Comp. in 1 Chr. Εγλα:] *Egla*), one of David's wives during his reign in Hebron, and the mother of his son Ithream (2 Sam. iii. 5; 1 Chr. iii. 3). In both lists the same order is preserved, Eglah being the sixth and last, and in both is she distinguished by the special title of David's "wife." According to the ancient Hebrew tradition preserved by Jerome (*Quæst. Hebr.* on 2 Sam. iii. 5, vi. 23) she was Michal, the wife of his youth; and she died in giving birth to Ithream. A name of this signification is common amongst the Arabs at the present day.

EGLAIM (אֶגְלַיִם, *two ponds*: Αγαλείμ; [Alex. Αγαλλειμ; Sin. Αγαλλιμ:] *Gallim*), a place named only in Is. xv. 8, and there apparently as one of the most remote points on the boundary of Moab. It is probably the same as En-eglaim. A town of this name was known to Eusebius (*Onom.* Agallim), who places it 8 miles to the south of Areopolis, *i. e.* Ar-Moab (*Rabba*). Exactly in that position, however, stands *Kerak*, the ancient Kir Moab.

A town named Agalla is mentioned by Josephus with Zoar and other places as in the country of the Arabians (*Ant.* xiv. 1, § 4).

With most of the places on the east of the Dead Sea, Eglaim yet awaits further research for its identification.

EGLON (עֶגְלוֹן [*calf-like, vituline*]: Ἐγλών; [Comp.] Joseph. Ἐγλών: *Eglon*), a king of the Moabites (Judg. iii. 12 ff.), who, aided by the Ammonites and the Amalekites, crossed the Jordan and took "the city of palm-trees," or Jericho (Joseph.). Here he built himself a palace (Joseph. *Ant.* v. 4, § 1 ff.), and continued for eighteen years (Judg. and Joseph.) to oppress the children of Israel, who paid him tribute (Joseph.). Whether he resided at Jericho permanently, or only during the summer months (Judg. iii. 20; Joseph.), he seems to have formed a familiar intimacy (συνήθης, Joseph., not Judg.) with Ehud, a young Israelite (νεανίας, Joseph.), who lived in Jericho (Joseph., not Judg.), and who, by means of repeated presents, became a favorite courtier of the monarch. Josephus represents this intimacy as having been of long continuance; but in Judges we find no mention of intimacy, and only one occasion of a present being made, namely, that which immediately preceded the death of Eglon. The circumstances attending this tragical event are somewhat differently given in Judges and in Josephus. That Ehud had the *entrée* of the palace is implied in Judges (iii. 19), but more distinctly stated in Josephus. In Judges the Israelites send a present by Ehud (iii. 15); in Josephus Ehud wins his favor by repeated presents of his own. In Judges we have two scenes, the offering of the present and the death scene, which are separated by the temporary withdrawal of Ehud (18, 19); in Josephus there is but one scene. The present is offered, the attendants are dismissed, and the king enters into friendly conversation (ὁμιλίαν) with Ehud. In Judges the place seems to change from the reception-room into the "summer-parlor" [probably a cool room on the roof is meant], where Ehud found him upon his return (cf. 18, 20). In Josephus the entire action takes place in the summer-parlor (θωμάτιον). In Judges the king exposes himself to the dagger by rising apparently in respect for the divine message which Ehud professed

Digitized by Google

to communicate (Patrick, *ad loc.*); in Josephus it is a *dream* which Ehud pretends to reveal, and the king, in delighted anticipation, springs up from his throne. The obesity of Eglon, and the consequent impossibility of recovering the dagger, are not mentioned by Josephus (vid. Judg. iii. 17, *fat*, ἀστεῖος, LXX.; but "crassus," Vulg., and so Gesen. *Lex.*).

After this desperate achievement Ehud repaired to Seirah (improp. Seirath; vid. Gesen. *Lex.* sub v.), in the mountains of Ephraim (iii. 26, 27), or Mount Ephraim (Josh. xix. 50). To this wild central region, commanding, as it did, the plains E. and W., he summoned the Israelites by sound of horn (a national custom according to Joseph.; A. V. "a trumpet"). Descending from the hills they fell upon the Moabites, dismayed and demoralized by the death of their king (Joseph., not Judg.). The greater number were killed at once, but 10,000 men made for the Jordan with the view of crossing into their own country. The Israelites, however, had already seized the *fords*, and not one of the unhappy fugitives escaped. As a reward for his conduct Ehud was appointed Judge (Joseph., not Judg.).

Note. — The "quarries that were by Gilgal" [A. V.] (iii. 19): in the margin better, as in Deut. vii. 25, "graven images" (Patrick *ad loc.*: cf. Gesen. *Heb. Lex.* sub v. פְּסִילִים). [See QUARRIES, Amer. ed.] T. E. B.

EG'LON (עֶגְלוֹן) [see above]: in Josh. x., [Rom.] Vat. and Alex. [Ὀδολλάμ; vv. 34, 36, 37, Comp. Ἐγλών; vv. 5, 23, 34, 37, Ald. Ἀγλών; ver. 3, Ὀδολάμ; Josh. xii. 12,] Αἰλάμ, [Alex. Ald. Comp.] Ἐγλάμ; [Josh. xv. 39, Rom. Vat. corrupt; Alex. Εγλωμ; Comp. with 17 MSS. Ἀγλών:] *Eglon*), a town of Judah in the *Shefelah* or low country (Josh. xv. 39). During the struggles of the conquest, Eglon was one of a confederacy of five towns, which under Jerusalem attempted resistance, by attacking Gibeon after the treaty of the latter with Israel. Eglon was then Amorite, and the name of its king Debir (Josh. x. 3–5). The story of the overthrow of this combination is too well known to need notice here (x. 23–25, &c.). Eglon was soon after visited by Joshua and destroyed (x. 34, 35, xii. 12). The name doubtless survives in the modern *Ajlan*, "a shapeless mass of ruins," "potsherds," and "scattered heaps of unhewn stone," covering a "round hillock" (Porter, *Handb.*; Van de Velde, ii. 188; Rob. ii. 49), about 10 miles from *Beit Jibrin* (Eleutheropolis) and 14 from Gaza, on the south of the great maritime plain.

In the Onomasticon it is given as *Eglon quæ et Adollam*; and its situation stated as 10 miles east of Eleutheropolis. The identification with Adullam arose no doubt from the reading of the LXX. in Josh. x., as given above; and it is to the site of that place, and not of Eglon, that the remarks of Eusebius and Jerome refer. This will be seen on comparing *Adollam*. No reason has been assigned for the reading of the LXX. G.

EGYPT (מִצְרַיִם, מִצְרָיִם, אֶרֶץ מִצְרַיִם, מָצוֹר, gent. n. מִצְרִי: Αἴγυπτος: *Ægyptus*), a country occupying the northeastern angle of Africa, and lying between N. lat. 31° 37′ and 24° 1′, and E. long. 27° 13′ and 34° 12′. Its limits appear to have been always very nearly the same. In Ezekiel (xxix. 10, xxx. 6), according to the obviously correct rendering [MIGDOL], the whole country is spoken of as extending from Migdol to Syene, which indicates the same limits to the east and the south as at present. Egypt seems, however, to have been always held, except by the modern geographers, to include no more than the tract irrigated by the Nile lying within the limits we have specified. The deserts were at all times wholly different from the valley, and their tribes, more or less independent of the rulers of Egypt.

Names. — The common name of Egypt in the Bible is "Mizraim," or more fully "the land of Mizraim." In form Mizraim is a dual, and accordingly it is generally joined with a plural verb. When, therefore, in Gen. x. 6, Mizraim is mentioned as a son of Ham, we must not conclude that anything more is meant than that Egypt was colonized by descendants of Ham. The dual number doubtless indicates the natural division of the country into an upper and a lower region, the plain of the Delta and the narrow valley above, as it has been commonly divided at all times. The singular Mazor also occurs, and some suppose that it indicates Lower Egypt, the dual only properly meaning the whole country (thus Gesenius, *Thes.* s. vv. מצור, מצרים), but there is no sure ground for this assertion. The mention of Mizraim and Pathros together (Is. xi. 11; Jer. xliv. 1, 15), even if we adopt the explanation which supposes Mizraim to be in these places by a late usage put for Mazor, by no means proves that since Pathros is a part of Egypt, Mizraim, or rather Mazor, is here a part also. The mention together of a part of a country as well as the whole is very usual in Hebrew phraseology. Gesenius thinks that the Hebrews supposed the word מצור to mean a limit, although he admits it may have had a different Egyptian origin. Since we cannot trace it to Egyptian, except as a translation, we consider it a purely Semitic word, as indeed would be most likely. Gesenius finds the signification "limit" in the Arabic name of Egypt, مِصر; but this word also means "red mud," the color intended being either red or reddish brown.

Egypt is also called in the Bible אֶרֶץ חָם, "the land of Ham" (Ps. cv. 23, 27; comp. lxxviii. 51), a name most probably referring to Ham the son of Noah [HAM]; and רַחַב, Rahab, "the proud" or "insolent" [RAHAB]: both these appear to be poetical appellations. The common ancient Egyptian name of the country is written in hieroglyphics KEM, which was perhaps pronounced Chem; the demotic form is KEMÉE[a] (Brugsch, *Geographische Inschriften*, i. p. 73. No 362); and the Coptic forms are ⲭⲏⲙⲓ, ⲭⲏⲙⲓ (M); ⲕⲏⲙⲉ, ⲕⲏⲙⲏ (S), and ⲕⲏⲙⲓ (B).[b] This name signifies, alike in the ancient language and in Coptic, "black," and may be supposed to have been given to the land on

[a] The system of transcribing ancient Egyptian is that given by the writer, in the *Encyclopædia Britannica*, 8th ed., art. *Hieroglyphics*.

[b] The letters M, S, and B denote here and elsewhere the Memphitic, Sahidic, and Bashmuric dialects

Digitized by Google

account of the blackness of its alluvial soil (comp. Plut. *de Is. et Osir.* c. 33, ἔτι τὴν Αἴγυπτον ἐν τῇ μάλιστα μελάγγειον οὖσαν, ὥσπερ τὸ μέλαν τοῦ ὀφθαλμοῦ, Χημίαν καλοῦσι). It would seem, as thus descriptive of the physical character of the land, to be the Egyptian equivalent of Mazor, if the meaning we have assigned to that word be the true one. In this case it would appear strange that it should correspond in sound to Ham, and in sense to Mazor or Mizraim. It is probable, however (comp. Plut. *l. c.*), that it also corresponded in sense to Ham, implying warmth as well as darkness. In Arabic we find the cognate word حَمٌ, "black fetid mud" (*Kámoos*), or "black mud" (*Sihâh*, MS.), which suggests the identity of Ham and Mazor. Therefore we may reasonably conjecture that Kem is the Egyptian equivalent of Ham, and also of Mazor, these two words being similar or even the same in sense. The name Ham may have been prophetically given to Noah's son as the progenitor of the inhabitants of Egypt and neighboring hot or dark countries. The other hieroglyphic names of Egypt appear to be of a poetical character.

Under the Pharaohs Egypt was divided into Upper and Lower, "the two regions" TA-TEE? called respectively "the Southern Region" TA-RES, and "the Northern Region" TA-MEHEET. There were different crowns for the two regions, that of Upper Egypt being white, and that of Lower Egypt red, the two together composing the pschent. The sovereign had a special title as ruler of each region: of Upper Egypt he was SUTEN, "king," and of Lower Egypt SHEBT, "bee," the two combined forming the common title SUTEN-SHEBT. The initial sign of the former name is a bent reed, which illustrates what seems to have been a proverbial expression in Palestine as to the danger of trusting to the Pharaohs and Egypt (2 K. xviii. 21; Is. xxxvi. 6; Ez. xxix. 6); the latter name may throw light upon the comparison of the king of Egypt to a fly, and the king of Assyria to a bee (Is. vii. 18). It must be remarked that Upper Egypt is always mentioned before Lower Egypt, and that the crown of the former in the pschent rises above that of the latter. In subsequent times this double division obtained. Manetho speaks of τὴν τε ἄνω καὶ κάτω χώραν (ap. *Joseph. c. Apion.* i. 14), and under the Ptolemies βασιλεὺς τῶν τε ἄνω καὶ τῶν κάτω χωρῶν (Rosetta Stone) occurs, as equivalent to the title mentioned above. In the time of the Greeks and Romans Upper Egypt was divided into the Heptanomis and the Thebais, making altogether three provinces, but the division of the whole country into two was even then the most usual.

Superficies. — Egypt has a superficies of about 9582 square geographical miles of soil, which the Nile either does or can water and fertilize. This computation includes the river and lakes as well as sandy tracts which can be inundated, and the whole space either cultivated or fit for cultivation is no more than about 5626 square miles. Anciently 735 square miles more may have been cultivated, and now it would be possible at once to reclaim about 1295 square miles. These computations are those of Colonel Jacotin and M. Estève, given in the Memoir of the former in the great French work (*Description de l'Egypte*, 2d ed. xviii. pt ii. pp. 101 ff.). They must be very nearly true of the actual state of the country at the present time. Mr. Lane calculated the extent of the cultivated land in A. H. 777, A. D. 1375–6, to be 5500 square geographical miles, from a list of the cultivated lands of towns and villages appended to De Sacy's *Abd Allatif*. He thinks this list may be underrated. M. Mengin made the cultivated land much less in 1821, but since then much waste territory has been reclaimed (Mrs. Poole, *Englishwoman in Egypt*, i. 85). The chief differences in the character of the surface in the times before the Christian era were that the long valley through which flowed the canal between the Nile and the Red Sea was then cultivated, and that the Gulf of Suez extended much further north than at present.

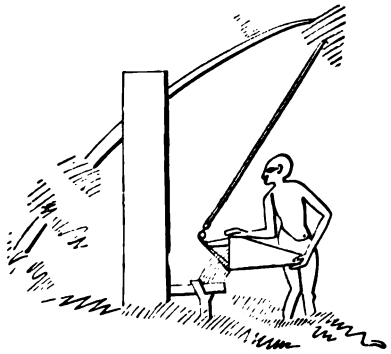
Nomes. — From a remote period Egypt was divided into Nomes, HESPU, sing. HESP, each one of which had its special objects of worship. The monuments show that this division was as old as the earlier part of the Twelfth Dynasty, which began B. C. cir. 2082. They are said to have been at first 36 in number. Ptolemy enumerates 44, and Pliny 46; afterwards they were further increased. There is no distinct reference to them in the Bible. In the LXX. version indeed, מַמְלָכָה (Is. xix. 2) is rendered by νόμος, but we have no warrant for translating it otherwise than "kingdom." It is probable that at that time there were two, if not three, kingdoms in the country. Two provinces or districts of Egypt are mentioned in the Bible, Pathros and Caphtor; the former appears to have been part of Upper Egypt, the latter was certainly so, and must be represented by the Coptite Nome, although no doubt of greater extent. [PATHROS; CAPHTOR.]

General Appearance, Climate, &c. — The general appearance of the country cannot have greatly changed since the days of Moses. The Delta was always a vast level plain, although of old more perfectly watered than now by the branches of the Nile and numerous canals, while the narrow valley of Upper Egypt must have suffered still less alteration. Anciently, however, the rushes must have been abundant; whereas now they have almost disappeared, except in the lakes. The whole country is remarkable for its extreme fertility, which especially strikes the beholder when the rich green of the fields is contrasted with the utterly-bare yellow mountains or the sand-strewn rocky desert on either side. Thus the plain of Jordan before the cities were destroyed was, we read, "well watered every where" "[even] like a garden of the Lord, like the land of Egypt" (Gen. xiii. 10). The climate is equable and healthy. Rain is not very unfrequent on the northern coast, but inland very rare. Cultivation nowhere depends upon it. This absence of rain is mentioned in Deut. (xi. 10, 11) as rendering artificial irrigation necessary, unlike the case of Palestine, and in Zech. (xiv. 18) as peculiar to the country. Egypt has been visited in all ages by severe pestilence, but it cannot be determined that any of those of ancient times were of the character of the modern Plague. The plague with which the Egyptians are threatened in Zech. (*l. c.*) is described by a word, מַגֵּפָה, which is not specially applicable to a pestilence of their country (see ver. 12). Cutaneous disorders, which have always been very prevalent in Egypt, are distinctly mentioned as peculiar to the country (Deut. vii. 15, xxviii. 27, 35, 60, and perhaps Ex. xv. 26, though here the

Digitized by Google

reference may be to the Plague of Boils), and as punishments to the Israelites in case of disobedience, whereas if they obeyed they were to be preserved from them. The Egyptian calumny that made the Israelites a body of lepers and unclean (Joseph. c. *Apion.*) is thus refuted, and the traditional tale as to the Exodus given by Manetho shown to be altogether wrong in its main facts, which depend upon the truth of this assertion. Famines are frequent, and one in the middle ages, in the time of the Fátimee Khaleefeh El-Mustansir-billah, seems to have been even more severe than that of Joseph. [FAMINE.]

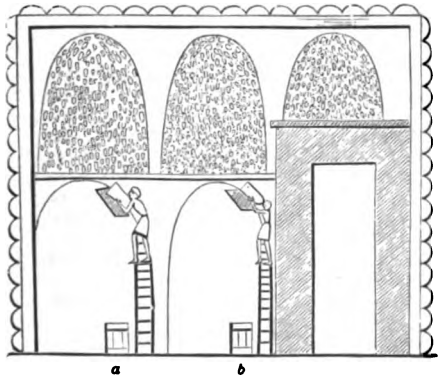
Geology. — The fertile plain of the Delta and the valley of Upper Egypt are bounded by rocky deserts covered or strewn with sand. On either side of the plain they are low, but they overlook the valley, above which they rise so steeply as from the river to present the aspect of cliffs. The formation is limestone as far as a little above Thebes, where sandstone begins. The First Cataract, the southern limit of Egypt, is caused by granite and other primitive rocks, which rise through the sandstone and obstruct the river's bed. In Upper Egypt the mountains near the Nile rarely exceed 300 feet in their height, but far in the eastern desert they often attain a much greater elevation. The highest is *Gebel Ghárib*, which rises about 6000 feet above the sea. Limestone, sandstone, and granite were obtained from quarries near the river; basalt, breccia, and porphyry from others in the eastern desert between the Thebais and the Red Sea. An important geological change has in the course of centuries raised the country near the head of the Gulf of Suez, and depressed that on the northern side of the isthmus. Since the Christian era the head of the Gulf has retired southwards, as prophesied by Isaiah — "The Lord shall utterly destroy the tongue of the Egyptian sea" (xi. 15); "the waters shall fail from the sea" (xix. 5). The Delta is of a triangular form, its eastern and western limits being nearly marked by the courses of the ancient Pelusiac and Canopic branches of the Nile; Upper Egypt is a narrow winding valley, varying in breadth, but seldom more than 12 miles across, and generally broadest on the western side. Anciently there was a fertile valley on the course of the Canal of the Red Sea, the Land of Goshen, now called *Wádi-t Tumeylát:* this is covered with the sands of the desert. [GOSHEN.] To the south, on the opposite side, is the oasis now called the *Feiyoom*, the old Arsinoïte Nome, connected with the valley by a neck of cultivated land.



The Nile. — The Nile is called in the Bible *Shihor*, שִׁיחוֹר, or "the black (river);" *Ye'or*, יְאוֹר, יְאֹר, "the river," probably derived from the Egyptian ATUR, AUR; נְהַר מִצְרַיִם, "the river of Egypt;" and נַחַל מִצְרַיִם, either "the brook," if the first word be not a proper name, or else the "Nahal (Nile) of Egypt," to which, if the latter rendering be correct, נַחַל alone must be added. These names are discussed in another article. [NILE.] In Egyptian the Nile bore the sacred appellation HAPEE or HAPEE-MU, "the abyss," or "the abyss of waters." As Egypt was divided into two regions, we find two Niles, HAPEE-RES, "the Southern Nile," and HAPEE-MEHEET "the Northern Nile," the former name being given to the river in Upper Egypt and in Nubia. The common appellation is ATUR, or AUR, "the river," which may be compared to the Hebrew *Ye'or*. This word has been preserved in the Coptic appellation ⲉⲓⲉⲣⲟ, ⲓⲁⲣⲟ, ⲓⲁⲣⲱ (M), ⲓⲉⲣⲟ (S), which likewise also signifies "the river." The inundation, HAPEE-UR, "great Nile," or "high Nile," fertilizes and sustains the country, and makes the river its chief blessing; a very low inundation or failure of rising being the cause of famine. The Nile was on this account anciently worshipped, and the plague in which its waters were turned into blood, while injurious to the river itself and its fish (Ex. vii. 21; Ps. cv. 29), was a reproof to the superstition of the Egyptians. The rise begins in Egypt about the summer solstice, and the inundation commences about two months later. The greatest height is attained about or somewhat after the autumnal equinox. The inundation lasts about three months. During this time, and especially when near the highest, the river rapidly pours along its red turbid waters, and spreads through openings in its banks over the whole valley and plain. The prophet Amos, speaking of the ruin of Israel, metaphorically says that "the land . . . shall be drowned, as [by] the flood [river] of Egypt" (viii. 8, ix. 5). The rate at which the Nile deposits the alluvial soil of Egypt has been the subject of interesting researches, which have as yet led to no decisive result.

Cultivation, Agriculture, &c. — The ancient prosperity of Egypt is attested by the Bible as well as by the numerous monuments of the country. As early as the age of the Great Pyramid it must have been densely populated and well able to support its inhabitants, for it cannot be supposed that there was then much external traffic. In such a climate the wants of man are few, and nature is liberal in necessary food. Even the Israelites in their hard bondage did "eat freely" the fish and the vegetables and fruits of the country, and ever afterwards they longed to return to the idle plenty of a land where even now starvation is unknown. The contrast of the present state of Egypt to its former prosperity is more to be ascribed to political than to physical causes. It is true that the branches of the Nile have failed, the canals and the artificial lakes and ponds for fish are dried up; that the reeds and other water-plants which were of value in commerce, and a shelter for wild-fowl, have in most parts perished; that the land of Goshen, once, at least for pasture, "the best of the land" (Gen. xlvii. 6, 11), is now sand-strewn and unwatered so as scarcely to be distinguished from the desert around, and that the predictions of the prophets have thus received a literal fulfillment (see especially Is. xix. 5–10), yet this has not been by any irresistible aggression of nature, but because Egypt, smitten and accursed, has lost all strength and energy. The population is not large enough for the cultivation of the land now fit for culture, and long oppression has taken from it the power and the will to advance.

Egypt is naturally an agricultural country. As far back as the days of Abraham, we find that when the produce failed in Palestine, Egypt was the natural resource. In the time of Joseph it was evidently the granary — at least during famines — of the nations around. The inundation, as taking the place of rain, has always rendered the system of agriculture peculiar; and the artificial irrigation during the time of low Nile is necessarily on the

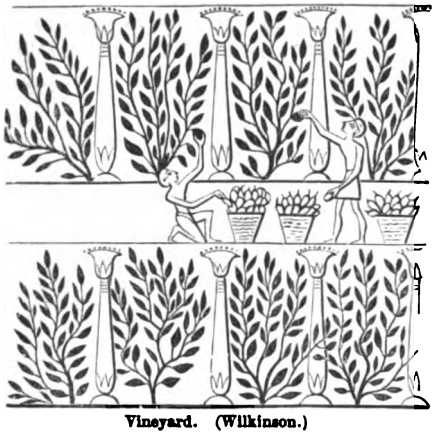


Digitized by Google

same principle. We read of the Land of Promise that it is "not as the land of Egypt, from whence ye came out, where thou sowedst thy seed, and wateredst [it] with thy foot, as a garden of herbs: but the land whither thou goest in to possess it, [is] a land of hills and valleys, [and] drinketh water of the rain of heaven" (Deut. xi. 10, 11). Watering with the foot may refer to some mode of irrigation by a machine, but we are inclined to think that it is an idiomatic expression implying a laborious work. [FOOT, WATERING WITH.] The monuments do not afford a representation of the supposed machine. That now called the shádoof,

Shádoof, or pole and bucket, for watering the garden. (Wilkinson.)

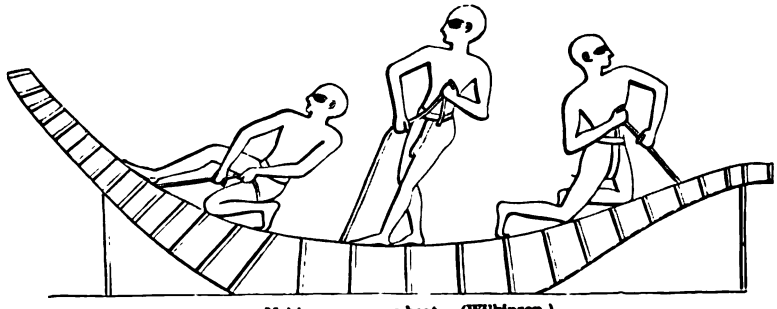
which is a pole having a weight at one end and a bucket at the other, so hung that the laborer is aided by the weight in raising the full bucket, is depicted, and seems to have been the common means of artificial irrigation. There are detailed pictures of breaking up the earth, or plough-



Granary, showing how the grain was put in, and that the doors *a b* were intended for taking it out. (Wilkinson.)

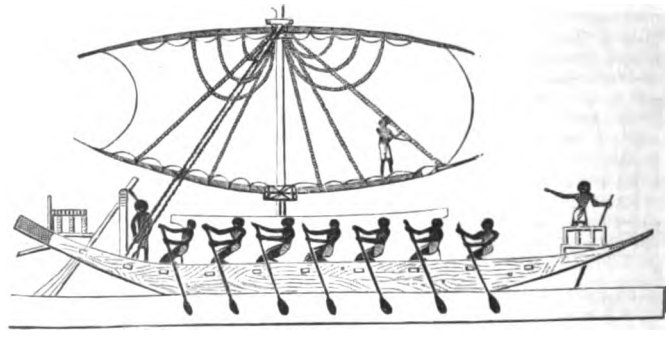
ing, sowing, harvest, thrashing, and storing the wheat in granaries. The thrashing was simply treading out by oxen or cows, unmuzzled (comp. Deut. xxv. 4). The processes of agriculture began as soon as the water of the inundation had sunk into the soil, about a month after the autumnal equinox, and the harvest time was about and soon after the vernal equinox (Ex. ix. 31, 32). Vines were extensively cultivated, and there were several different kinds of wine, one of which, the Mareotic, was famous among the Romans. Of other fruit-trees, the date-palm was the most common and valuable. The gardens resembled the fields, being watered in the same manner by irrigation. On the tenure of land much light is thrown by the history of Joseph. Before the famine each city and large village — for עִיר must be held to have a wider signification than our "city" — had its field (Gen. xli. 48); but Joseph gained for Pharaoh all the land, except that of the priests, in exchange for food, and required for the right thus obtained a fifth of the produce, which became a law (xlvii. 20–26). The evidence of the monuments, though not very explicit, seems to show that this law was ever afterwards in force under the Pharaohs. The earliest records afford no information as to the tenure of land; but about Joseph's time we find frequent mention of villages with their lands, the two being described under one designation, as held by the great officers of the crown, apparently by the royal gift. There does not seem to have been any hereditary aristocracy, except perhaps at an earlier time, and it is not impossible that these lands may have been held during tenure of office or for life. The temples had lands which of course were inalienable. Diodorus Siculus states that all the lands belonged to the crown except those of the priests and the soldiers (i. 73). It is probable that the latter, when not employed on active service, received no pay, but were supported by the crown-lands, and occupied them for the time as their own. [JOSEPH.] The great lakes in the north of Egypt were anciently of high importance, especially for their fisheries and the growth of the papyrus. Lake Menzeleh, the most eastern of the existing lakes, has still large fisheries, which support the people who live on its islands and shore, the rude successors of the independent Egyptians of the Bucolia. Lake Mœris, anciently so celebrated, was an artificial lake between Benee-Suweyf and Medeenet El-Feiyoom. It was of use to irrigate the neighboring country, and its fisheries yielded a great revenue. It is now entirely dried up. The canals are now far less numerous than of old, and many of them are choked and comparatively useless. The Bahr Yoosuf, or "river of Joseph" — not the patriarch, but the famous Sultán Yoosuf Saláh-eddeen, who repaired it — is a long series of canals, near the desert on the west side of the river, extending northward from Farshoot for about 350 miles to a little below Memphis. This was probably a work of very ancient times. There can be no doubt of the high antiquity of the Canal of the Red Sea, upon which the land of Goshen mainly depended for its fertility. It does not follow, however, that it originally connected the Nile and the Red Sea.

Botany. — The cultivable land of Egypt consists almost wholly of fields, in which are very few trees. There are no forests and few groves, except of date-palms, and in Lower Egypt a few of orange and lemon-trees. There are also sycamores, mulberry-trees, and acacias, either planted on the sides of roads or standing singly in the fields. The Theban palm grows in the Thebaïs, generally in clumps. These were all, except, perhaps, the mulberry-tree, of old common in the country. The two palms are represented on the monuments, and sycamore and acacia-wood are the materials of various objects made by the ancient inhabitants. The chief fruits are the date, grape, fig, sycamore-fig, pomegranate, banana, many kinds of melons, and the olive; and



Digitized by Google

there are many others less common or important. These were also of old produced in the country. Anciently gardens seem to have received great attention, to have been elaborately planned, and well



Vineyard. (Wilkinson.)

filled with trees and shrubs. Now horticulture is neglected, although the modern inhabitants are as fond of flowers as were their predecessors. The vegetables are of many kinds and excellent, and form the chief food of the common people. Anciently cattle seem to have been more numerous and their meat, therefore, more usually eaten, but never as much so as in colder climates. The Israelites in the desert, though they looked back to the time when they "sat by the flesh pots" (Ex. xvi 3), seem as much to have regretted the vegetables and fruits, as the flesh and fish of Egypt. "Who shall give us flesh to eat. We remember the fish which we did eat in Egypt freely, the cucumbers and the melons, and the leeks, and the onions, and the garlick" (Num. xi. 4, 5). The chief vegetables now are beans, peas, lentils, of which an excellent thick pottage is made (Gen. xxv. 34), leeks, onions garlic, radishes, carrots, cabbages, gourds, cucumbers, the tomato, and the egg-fruit. There are many besides these. The most important field-produce in ancient times was wheat;[a] after it must be placed barley, millet, flax, and among the vegetables, lentils, peas, and beans. At the present day the same is the case; but maize, rice, oats, clover, the sugar-cane, roses, the tobacco-plant, hemp, and cotton, must be added; some of which are not indigenous. In the account of the Plague of Hail

Making a papyrus boat. (Wilkinson.)

Boat of the Nile, showing how the sail was fastened to the yards, and the nature of the rigging. (Wilkinson.)

four kinds of field-produce are mentioned — flax, barley, wheat, and כֻּסֶּמֶת (Ex. ix. 31, 32), which is variously rendered in the A. V. "rye" (*l. c.*), "spelt" (Is. xxviii. 25), and "fitches" (Is. xxviii. 27). It is doubted whether the last be a cereal or a leguminous product: we incline to the former opinion. (See RYE.) It is clear from the evidence of the monuments and of ancient writers that, of old, reeds were far more common in Egypt than

[a] It may be well to mention that the writer knows no satisfactory instance of wheat found in ancient Egyptian tombs having germinated on being sown in our own time.

Digitized by Google

now. The byblus or papyrus is almost or quite unknown. Anciently it was a common and most important plant: boats were made of its stalks, and of their thin leaves the famous paper was manufactured. It appears to be mentioned under two names in the Bible, neither of which, however, can be proved to be a peculiar designation for it. (1.) The mother of Moses made תֵּבַת גֹּמֶא, "an ark" or "skiff" "of papyrus" in which to put her child (Ex. ii. 3), and Isaiah tells of messengers sent apparently from furthest Ethiopia in כְּלֵי־גֹמֶא, "vessels of papyrus" (xviii. 2), in both which cases גֹּמֶא must mean papyrus, although it would seem in other places to signify "reeds" generically.[a] (2.) Isaiah prophesies "the papyrus-reeds (עָרוֹת) in the river (יְאוֹר), on the edge of the river, and everything growing [lit. sown] in the river shall be dried up, driven away [by the wind], and [shall] not be" (xix. 7). Gesenius renders עָרָה a naked or bare place, here grassy places on the banks of the Nile. Apart from the fact that little grass grows on the banks of the Nile, in Egypt, and that little only during the cooler part of the year, instead of those sloping meadows that must have been in the European scholar's mind, this word must mean some product of the river which with the other water-plants should be dried up, and blown away, and utterly disappear. Like the fisheries and the flax mentioned with it, it ought to hold an important place in the commerce of ancient Egypt. It can therefore scarcely be reasonably held to intend anything but the papyrus. The marine and fluvial product סוּף, from which the Red Sea was called יַם־סוּף, will be noticed in art. RED SEA. The lotus was anciently the favorite flower, and at feasts it took the place of the rose among the Greeks and Arabs: it is now very rare.

Zoölogy. — Of old, Egypt was far more a pastoral country than at present. The neat cattle are still excellent, but lean kine are more common among them than they seem to have been in the days of Joseph's Pharaoh (Gen. xli. 19). Sheep and goats have always been numerous. Anciently swine were kept, but not in great numbers; now there are none, or scarcely any, except a few in the houses of Copts and Franks."[b] Under the Pharaohs the horses of the country were in repute among the neighboring nations, who purchased them as well as chariots out of Egypt. Thus it is commanded respecting a king of Israel: "He shall not multiply horses to himself, nor cause the people to return to Egypt, to the end that he should multiply horses: forasmuch as the Lord hath said unto you, Ye shall henceforth return no more that way" (Deut. xvii. 16), — which shows that the trade in horses was with Egypt, and would necessitate a close alliance. "Solomon had horses brought out of Egypt, and linen yarn: the king's merchants received the linen yarn at a price. And a chariot came up and went out of Egypt for six hundred [shekels] of silver, and an horse for an hundred and fifty; and so for all the kings of the Hittites and for the kings of Syria did they bring [them] out by their hand" (1 K. x. 28, 29). The number of horses kept by this king for chariots and cavalry was large (iv. 26, x. 26; 2 Chr. i. 14, ix. 25).[c] Some of these horses came as yearly tribute from his vassals (1 K. x. 25). In later times the prophets reproved the people for trusting in the help of Egypt, and relying on the aid of her horses and chariots and horsemen, that is, probably, men in chariots, as we shall show in speaking of the Egyptian armies. The kings of the Hittites, mentioned in the passage quoted above, and in the account of the close of the siege of Samaria by Benhadad, where we read — "The Lord hath made the host of the Syrians to hear a noise of chariots, and a noise of horses, [even] the noise of a great host: and they said one to another, Lo, the king of Israel hath hired against us the kings of the Hittites, and the kings of the Egyptians to come upon us" (2 K. vii. 6) — these kings ruled the Hittites of the valley of the Orontes, who were called by the Egyptians SHETA or KHETA. The Pharaohs of the XVIIIth, XIXth, and XXth dynasties waged fierce wars with these Hittites, who were then ruled by a great king and many chiefs, and whose principal arm was a force of chariots resembling those of the Egyptian army. Asses were anciently numerous: the breed at the present time is excellent. Dogs were formerly more prized than now, for being held by most of the Muslims to be extremely unclean, they are only used to watch the houses in the villages. The camel has nowhere been found mentioned in the inscriptions of Egypt, or represented on the monuments. In the Bible Abraham is spoken of as having camels when in Egypt, apparently as a gift from Pharaoh (Gen. xii. 16), and before the Exodus the camels of Pharaoh or his subjects were to be smitten by the murrain (Ex. ix. 3, comp. 6). Both these Pharaohs were probably Shepherds. The Ishmaelites or Midianites who took Joseph into Egypt, carried their merchandise on camels (Gen xxxvii. 25, 28, 36), and the land-traffic of the Arabs must always have been by caravans of camels; but it is probable that camels were not kept in Egypt, but only on the frontier. On the black obelisk from Nimrood, now in the British Museum, which is of Shalmanubar, king of Assyria, contemporary with Jehu and Hazael, camels are represented among objects sent as tribute by Egypt: They are of the two-humped sort, which, though perhaps then common in Assyria, has never, as far as is known, been kept in Egypt. The deserts have always abounded in wild animals, especially of the canine and antelope kinds. Anciently the hippopotamus was found in the Egyptian Nile, and hunted. This is a fact of importance for those who suppose it to be the behemoth of the book of Job, especially as that book shows evidence of a knowledge of Egypt. Now, this animal is rarely seen even

[a] In Job viii. 11, Ps. xxxv. 7, the word is probably used generically.

[b] In a tomb near the Pyramids of El-Geezeh, of the time of Shaf-ra, second King of the Vth dynasty, the flocks and herds of the chief occupant are represented and their numbers thus given: 835 oxen, 220 cows with their calves, 2234 goats, 760 asses with their young, and 974 sheep. Job had at the first 7000 sheep, 3000 camels, 500 yoke of oxen, 500 she-asses (i. 3), and afterwards double in each case (xlii. 12). The numbers are round, but must be taken as an estimate of a large property of this kind in the patriarchal times.

[c] The number of Solomon's chariots is given as 1400, and his horsemen 12,000. The stalls of horses are stated as 40,000 (1 K. iv. 26), or 4000 (2 Chr ix. 25); the former would seem to be the correct number.

in Lower Nubia. The elephant may have been, in the remotest historical period, an inhabitant of Egypt, and, as a land animal, have been driven further south than his brother pachyderm, for the name of the Island of Elephantine, just below the first Cataract in hieroglyphics, AB . . "Elephant-land," seems to show that he was anciently found there. Bats abound in the temples and tombs, filling the dark and desecrated chambers and passages with the unearthly whir of their wings. Such desolation is represented by Isaiah when he says that a man shall cast his idols "to the moles and to the bats" (ii. 20).

The birds of Egypt are not remarkable for beauty of plumage: in so open a country this is natural. The *Rapaces* are numerous, but the most common are scavengers, as vultures and the kite. The *Grallatores* and *Anseres* abound on the islands and sandbanks of the river and in the sides of the mountains which approach or touch the stream.

Among the reptiles, the crocodile must be especially mentioned. In the Bible it is usually called תַּנִּין, תַּנִּים, "dragon," a generic word of almost as wide a signification as "reptile," and is used as a symbol of the king of Egypt.[a] Thus in Ezekiel, "Behold I am against thee, Pharaoh king of Egypt, the great dragon that lieth in the midst of his rivers, which hath said, My river [is] mine own, and I have made [it] for myself. But I will put hooks in thy jaws, and I will cause the fish of thy rivers to stick unto thy scales, and I will bring thee up out of the midst of thy rivers, and all the fish of thy rivers shall stick unto thy scales. And I will leave thee [thrown] into the wilderness, thee and all the fish of thy rivers. . . . I have given thee for meat to the beasts of the field and to the fowls of the heaven" (xxix. 3, 4, 5). Here there seems to be a retrospect of the Exodus, which is thus described in Is. li. 9, 10, and 15? and with a more close resemblance in Ps. lxxiv. 13, 14, "Thou didst divide the sea by thy strength: thou brakest the heads of the dragons (תַּנִּינִים) in the waters. Thou brakest the heads of leviathan (לִוְיָתָן) in pieces, [and] gavest him [to be] meat to the dwellers in the wilderness" (צִיִּים, *i. e.* to the wild beasts, comp. Is. xiii. 21). The last passage is important as indicating that whereas תנין is the Hebrew generic name of reptiles, and therefore used for the greatest of them, the crocodile, לויתן is the special name of that animal. The description of leviathan in Job (xli.) fully bears out this opinion, and it is doubtful if any passage can be adduced in which a wider signification of the latter word is required.[b] In Job (xxvi. 12) also there is an apparent allusion to the Exodus in words similar to those in Isaiah (li. 9, 10, and 15?), but without a mention of the dragon. In this case the division of the sea and the smiting of רָהַב, the proud or insolent, are mentioned in connection with the wonders of creation (vv. 7-11, 13): so too in Is. (vv. 13, 15). The crossing of the Red Sea could be thus spoken of as a signal exercise of the Divine power. Frogs are very numerous in Egypt, and their loud and constant croaking in the autumn in "the streams," יְאֹרִים, "the rivers," נְהָרוֹת, and "the ponds" or "marshes," אֲגַמִּים[c] (Ex. viii. 1, A. V. 5) makes it not difficult to picture the Plague of Frogs. Serpents and snakes are also common, but the more venomous have their home, like the scorpion, in the desert (comp. Deut. viii. 15). The Nile and lakes have abundance of fishes; and although the fisheries of Egypt have very greatly fallen away, their produce is still a common article of food. Among the insects the locusts must be mentioned, which sometimes come upon the cultivated land in a cloud, and, as in the plague, eat every herb and fruit and leaf where they alight; but they never, as then, overspread the whole land (Ex. x. 3–6, 12–19). They disappear as suddenly as they come, and are carried away by the wind (ver. 19). As to the lice and flies, they are now plagues of Egypt; but it is not certain that the words כִּנָּם and עָרֹב designate them (Ex. viii. 16–31).

Ancient Inhabitants. — The old inhabitants of Egypt appear from their monuments and the testimony of ancient writers to have occupied in race a place between the Nigritians and the Caucasians. The constant immigrations of Arab settlers have greatly diminished the Nigritian characteristics in the generality of the modern Egyptians. The ancient dress was far more scanty than the modern and in this matter, as in manners and character, the influence of the Arab race is also very apparent. The ancient Egyptians in character were very religious and contemplative, but given to base superstition, patriotic, respectful to women, hospitable, generally frugal, but at times luxurious, very sensual, lying, thievish, treacherous, and cringing, and intensely prejudiced, through pride of race, against strangers, although kind to them. This is very much the character of the modern inhabitants, except that Mohammedanism has taken away the respect for women. The ancient Egyptians are indeed the only early eastern nation that we know to have resembled the modern westerns in this particular; but we find the same virtue markedly to characterize the Nigritians of our day. That the Egyptians, in general, treated the Israelites with kindness while they were in their country, even during the oppression, seems almost certain from

[a] It is supposed by commentators to mean the country also; but this cannot, we think, be proved.

[b] Gesenius (*Thes.* s. v.) would take לויתן for a serpent in Job iii. 8, Is. xxvii. 1, and in the latter case supposes the king of Babylon to be meant. In the first passage the meaning "crocodile" is, however, especially applicable. The patriarch speaks of desperate men as those "who are ready to stir up leviathan": comp. xli. 2; A. V. 10, "None [is so] fierce as to stir him up. Who then can stand before me?" The argument is, that if the creature be so terrible, who shall resist the Creator? The second passage seems to refer not to the king of Babylon, but to the enemies of God's people at a remote time (Is. xxiv., xxv., xxvi., esp. ver. 19, and xxvii. esp. vv. 12, 13: comp. the similar use of Egypt, &c., in Rev. xi. 8).

[c] Gesenius (*Thes.* s. v.) understands this word here and in Ex. vii. 19 to mean the stagnant pools left by the Nile after the inundation. At the season to which the narrative refers, these would have been dried up although there would be many marshy places, especially near the north coast and towards the ancient head of the Red Sea.

Digitized by Google

the privilege of admission into the congregation in the third generation, granted to them in the Law, with the Edomites, while the Ammonites and Moabites were absolutely excluded, the reference in three out of the four cases being to the stay in Egypt and the entrance into Palestine (Deut. xxiii. 3–8). This supposition is important in its bearing on the history of the oppression.

Language. — The ancient Egyptian language, from the earliest period at which it is known to us, is an agglutinate monosyllabic form of speech. It is expressed by the signs which we call hieroglyphics. The character of the language is compound: it consists of elements resembling those of the Nigritian languages and the Chinese language, on the one hand, and those of the Semitic languages on the other. All those who have studied the African languages make a distinct family of several of those languages, spoken in the northeast quarter of the continent, in which family they include the ancient Egyptian; while every Semitic scholar easily recognizes in Egyptian Semitic pronouns and other elements, and a predominantly Semitic grammar. As in person, character, and religion, so in language we find two distinct elements, mixed but not fused, and here the Nigritian element seems unquestionably the earlier. Bunsen asserts that this language is "ante-historical Semitism;" we think it enough to say that no Semitic scholar has accepted his theory. For a full discussion of the question see *The Genesis of the Earth and of Man*, ch. vi. As early as the age of the XXVIth dynasty a vulgar dialect was expressed in the demotic or enchorial writing. This dialect forms the link connecting the old language with the Coptic or Christian Egyptian, the latest phasis. The Coptic does not very greatly differ from the monumental language, distinguished in the time of the demotic as the sacred dialect, except in the presence of many Greek words.

Religion. — The basis of the religion was Nigritian fetishism, the lowest kind of nature-worship, differing in different parts of the country, and hence obviously indigenous. Upon this were engrafted, first, cosmic worship, mixed up with traces of primeval revelation, as in Babylonia; and then, a system of personifications of moral and intellectual abstractions. The incongruous character of the religion necessitates this supposition, and the ease with which it admitted extraneous additions in the historical period confirms it. There were three orders of gods — the eight great gods, the twelve lesser, and the Osirian group. They were represented in human forms, sometimes having the heads of animals sacred to them, or bearing on their heads cosmic or other objects of worship. The fetishism included, besides the worship of animals, that of trees, rivers, and hills. Each of these creatures or objects was appropriated to a divinity. There was no prominent hero-worship, although deceased kings and other individuals often received divine honors — in one case, that of Sesertesen III., of the XIIth dynasty, the old Sesostris, of a very special character. Sacrifices of animals, and offerings of all kinds of food, and libations of wine, oil, and the like, were made. The great doctrines of the immortality of the soul, man's responsibility, and future rewards and punishments, were taught Among the rites circumcision is the most remarkable: it is as old as the time of the IVth dynasty

The Israelites in Egypt appear during the oppression, for the most part, to have adopted the Egyptian religion (Josh. xxiv. 14; Ex. xx. 7, 8). The golden calf, or rather steer, עֵגֶל, was probably taken from the bull Apis, certainly from one of the sacred bulls. Remphan and Chiun were foreign divinities adopted into the Egyptian Pantheon, and called in the hieroglyphics RENPU (probably pronounced REMPU) and KEN. It can hardly be doubted that they were worshipped by the Shepherds; but there is no satisfactory evidence that there was any separate foreign system of idolatry. [REMPHAN.] Ashtoreth was worshipped at Memphis, as is shown by a tablet of Amenoph II., B. C. cir. 1400, at the quarries of Turà, opposite that city (Vyse's *Pyramids*, iii. "Tourah tablet 2"), in which she is represented as an Egyptian goddess. The temple of "the Foreign Venus" in "the Tyrian camp" in Memphis (Herod. ii. 112) must have been sacred to her. Doubtless this worship was introduced by the Phœnician Shepherds.

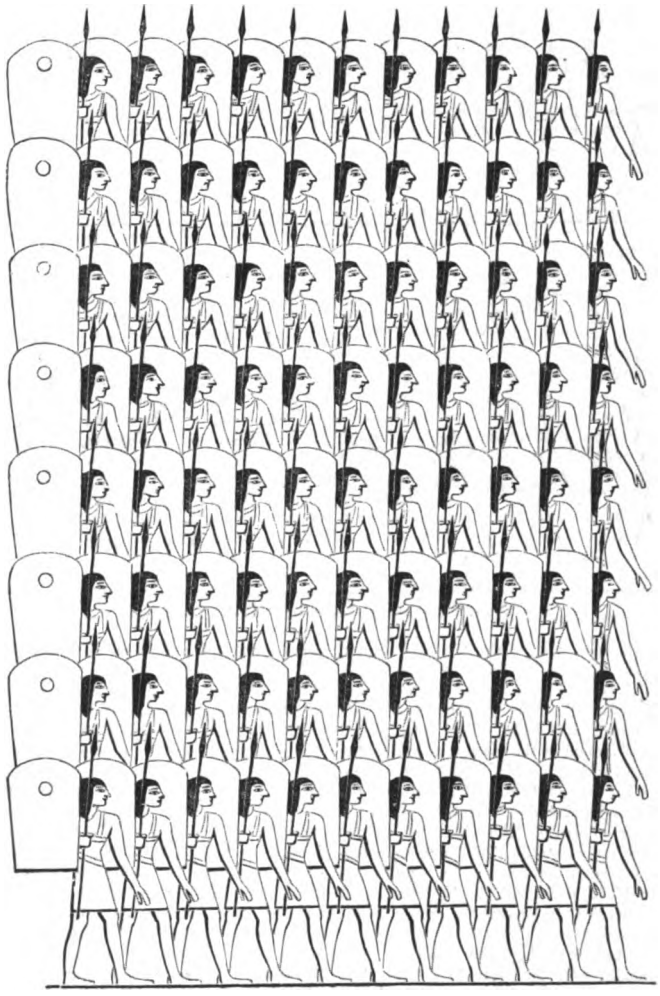
As there are prominent traces of primeval revelation in the ancient Egyptian religion, we cannot be surprised at finding certain resemblances to the Mosaic Law, apart from the probability that whatever was unobjectionable in common belief and usages would be retained. The points in which the Egyptian religion shows strong traces of truth are, however, doctrines of the very kind that the Law does not expressly teach. The Egyptian religion, in its reference to man, was a system of responsibility, mainly depending on future rewards and punishments. The Law, in its reference to man, was a system of responsibility mainly depending on temporal rewards and punishments. All we learn, but this is of the utmost importance, is that every Israelite who came out of Egypt must have been fully acquainted with the universally-recognized doctrines of the immortality of the soul, man's responsibility, and future rewards and punishments, truths which the Law does not, and of course could not, contradict. The idea that the Law was an Egyptian invention is one of the worst examples of modern reckless criticism.

Laws. — We have no complete account of the laws of the ancient Egyptians either in their own records or in works of ancient writers. The passages in the Bible which throw light upon the laws in force during the sojourn of the Israelites in Egypt most probably do not relate to purely native law, nor to law administered to natives, for during that whole period they appear to have been under Shepherd rulers, and in any case it cannot be doubted that they would not be subject to absolutely the same system as the Egyptians. The paintings and sculptures of the monuments indicate a very high degree of personal safety, showing us that the people of all ranks commonly went unarmed, and without military protection. We must therefore infer that the laws relating to the maintenance of order were sufficient and strictly enforced. The punishments seem to have been lighter than those of the Mosaic Law, and very different in their relation to crime and in their nature. Capital punishment appears to have been almost restricted, in practice, to murder. Crimes of violence were more severely treated than offenses against religion and morals. Popular feeling seems to have taken the duties of the judge upon itself in the case of impiety alone. That in early times the Egyptian populace acted with reference to any offense against its religion as it did under the Greeks and Romans

Digitized by Google

is evident from the answer of Moses when Pharaoh proposed that the Hebrews should sacrifice in the land. "It is not meet so to do; for we shall sacrifice the abomination of the Egyptians to the Lord our God: lo, shall we sacrifice the abomination of the Egyptians before their eyes, and will they not stone us?" (Ex. viii. 26).

Government. — The government was monarchical, but not of an absolute character. The sovereign was not superior to the laws, and the priests had the power to check the undue exercise of his authority. The kings under whom the Israelites lived, seem to have been absolute, but even Joseph's Pharaoh did not venture to touch the independence of the priests. Nomes and districts were governed by officers whom the Greeks called nomarchs and toparchs. There seems to have been no hereditary aristocracy, except perhaps at the earliest period, for indications of something of the kind occur in the inscriptions of the IVth and XIIth dynasties.



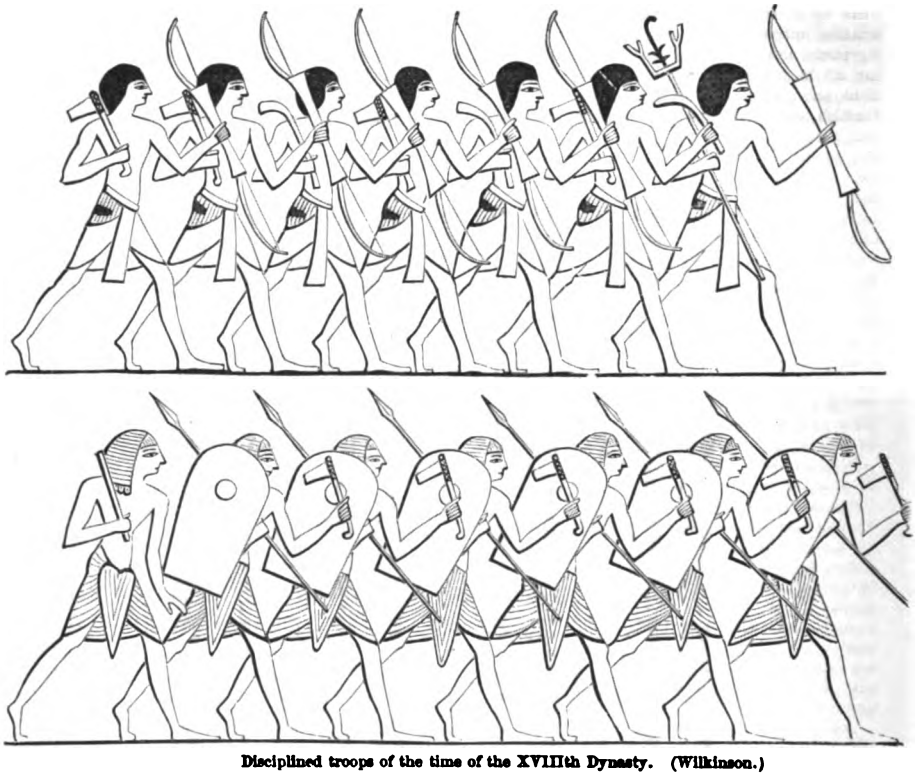
Foreign Policy. — The foreign policy of the Egyptians must be regarded in its relation to the admission of foreigners into Egypt and to the treatment of tributary and allied nations. In the former aspect it was characterized by an exclusiveness which sprang from a national hatred of the yellow and white races, and was maintained by the wisdom of preserving the institutions of the country from the influence of the pirates of the Mediterranean and the Indian Ocean, and the robbers of the deserts. Hence the jealous exclusion of the Greeks from the northern ports until Naucratis was opened to them, and hence too the restriction of Shemite settlers in earlier times to the land of Goshen, scarcely regarded as part of Egypt. It may be remarked as a proof of the strictness of this policy that during the whole of the sojourn of the Israelites they appear to have been kept to Goshen. The key to the policy towards foreign nations, after making allowance for the hatred of the yellow and white races balanced by the regard for the red and black, is found in the position of the great oriental rivals of Egypt. The supremacy or influence of the Pharaohs over the nations lying between the Nile and the Euphrates depended as much on wisdom in policy as prowess in arms. The kings of the IVth, VIth, and XVth dynasties appear to have uninterruptedly held the peninsula of Sinai, where tablets record their conquest of Asiatic nomads. But with the XVIIIth dynasty commences the period of Egyptian supremacy. Very soon after the accession of this powerful line most of the countries between the Egyptian border and the Tigris were reduced to the condition of tributaries. The empire seems to have lasted for nearly three centuries, from about B. C. 1500 to about 1200. The chief opponents of the Egyptians were the Hittites of the valley of the Orontes, with whom the Pharaohs waged long and fierce wars. After this time the influence of Egypt declined; and until the reign of Shishak (B. C. cir. 990–967), it appears to have been confined to the western borders of Palestine. No doubt the rising greatness of Assyria caused the decline. Thenceforward to the days of Pharaoh Necho there was a constant struggle for the tracts lying between Egypt, and Assyria and Babylonia, until the disastrous battle of Carchemish finally destroyed the supremacy of the Pharaohs. It is probable that during the period of the empire an Assyrian or Babylonian king generally supported the opponents of the rulers of Egypt. Great aid from a powerful ally can indeed alone explain the strong resistance offered by the Hittites. The general policy of the Egyptians towards their eastern tributaries seems to have been marked by great moderation. The Pharaohs intermarried with them, and neither forced upon them Egyptian garrisons, except in some important positions, nor attempted those deportations that are so marked a feature of Asiatic policy. In the case of those nations which never attacked them they do not appear to have even exacted tribute. So long as their general supremacy was uncontested, they would not be unwise enough to make favorable or neutral powers their enemies. Of their relation to the Israelites we have for the earlier part of this period no direct information. The explicit account of the later part is fully consistent with what we have said of the general policy of the Pharaohs. Shishak and Zerah, if the latter were, as we believe, a king of Egypt, or a commander of Egyptian forces, are the only exceptions in a series of friendly kings, and they were almost certainly of Assyrian or Babylonian extraction. One Pharaoh gave his daughter in marriage to Solomon; another appears to have been the ally of Jehoram, king of Israel (2 K. vii. 6); So made a treaty with Hoshea; Tirhakah aided Hezekiah; Pharaoh Necho fought Josiah against his will, and did not treat Judah with the severity of the oriental kings; and his second successor, Pharaoh Hophra, maintained the alliance, notwithstanding this break, as firmly as before, and although foiled in his endeavor to save Jerusalem from the Chaldeans, received the fugitives of Judah, who, like the fugitives of Israel at the capture of Samaria, took refuge in Egypt. It is probable that during the earlier period the same friendly relations existed. The Hebrew records of that time afford no distinct indication of hostility with Egypt, nor have the Egyptian lists of conquered regions and towns of the same age been found to contain any Israelite name, whereas in Shishak's list the kingdom of Judah and some of its towns occur. The route of the earlier Pharaohs to the east seems always to have been along the Palestinian coast, then mainly held by the Philistines and Phœnicians, both of whom they subdued, and across Syria northward of the territories occupied by the Hebrews. With respect to the African nations a different policy appears to have been pursued. The Rebu (Lebu) or Lubim, to the west of Egypt, on the north coast, were reduced to subjection, and probably employed, like the Shayretana or Cherethim, as mercenaries. Ethiopia was made a purely Egyptian province, ruled by a viceroy, "the Prince of Kesh (Cush)," and the assimilation was so complete that Ethiopian sovereigns seem to have been received by the Egyptians as native rulers. Further south, the Negroes were subject to predatory attacks like the slave hunts of modern times, conducted not so much from motives of hostility as to obtain a supply of slaves. In the Bible we find African peoples, Lubim, Phut, Sukkiim, Cush, as mercenaries or supporters of Egypt, but not a single name that can be positively placed to the eastward of that country.

Army. — There are some notices of the Egyptian army in the O. T. They show, like the monuments, that its most important branch was the chariot-force. The Pharaoh of the Exodus led 600 chosen chariots besides his whole chariot-force in pursuit of the Israelites. The warriors fighting in chariots are probably the "horsemen" mentioned in the relation of this event and elsewhere, for in Egyptian

Digitized by Google

they are called the "horse" or "cavalry." We have no subsequent indication in the Bible of the constitution of an Egyptian army until the time of the XXIId dynasty, when we find that Shishak's invading force was partly composed of foreigners; whether mercenaries or allies, cannot as yet be positively determined, although the monuments make it most probable that they were of the former character. The army of Necho, defeated at Carchemish, seems to have been similarly composed, although it probably contained Greek mercenaries who soon afterwards became the most important foreign element in the Egyptian forces.

Domestic Life. — The sculptures and paintings of the tombs give us a very full insight into the domestic life of the ancient Egyptians, as may be seen in Sir G. Wilkinson's great work. What most strikes us in their manners is the high position occupied by women, and the entire absence of the harem-system of seclusion. The wife is called



Phalanx of heavy infantry. (Wilkinson.)

"the lady of the house." Marriage appears to have been universal, at least with the richer class; and if polygamy were tolerated it was rarely practiced. Of marriage-ceremonies no distinct account has been discovered, but there is evidence that something of the kind was usual in the case of a queen (De Rougé, *Essai sur une Stèle Égyptienne*, pp. 53, 54). Concubinage was allowed, the concubines taking the place of inferior wives. There were no castes, although great classes were very distinct, especially the priests, soldiers, artisans, and herdsmen, with laborers. A man of the upper class might, however, both hold a command in the army and be a priest; and therefore the caste-system cannot have strictly applied in the case of the subordinates. The general manner of life does not much illustrate that of the Israelites, from its great essential difference. The Egyptians from the days of Abraham were a settled people, occupying a land which they had held for centuries without question,

Digitized by Google

except through the aggression of foreign invaders. The occupations of the higher class were the superintendence of their fields and gardens; their diversions, the pursuit of game in the deserts, or on the river, and fishing. The tending of cattle was left to the most despised of the lower class. The Israe-

Disciplined troops of the time of the XVIIIth Dynasty. (Wilkinson.)

ites on the contrary were from the very first a pastoral people: in time of war they lived within walls; when there was peace they "dwelt in their tents" (2 K. xiii. 5). The Egyptian feasts, and the dances, music, and feats which accompanied them, for the diversion of the guests, as well as the common games, were probably introduced among the Hebrews in the most luxurious days of the kingdoms of Israel and Judah. The account of the noontide dinner of Joseph (Gen. xliii. 16, 31–34) agrees with the representations of the monuments, although it evidently describes a far simpler repast than would be usual with an Egyptian minister. The attention to precedence, which seems to have surprised Joseph's brethren (ver. 33), is perfectly characteristic of Egyptian customs. The funeral ceremonies were far more important than any events of the Egyptian life, as the tomb was regarded as the only true home. The body of the deceased was embalmed in the form of Osiris, the judge of the dead, and conducted to the burial-place with great pomp and much display of lamentation. The mourning lasted seventy-two days or less. Both Jacob and Joseph were embalmed, and the mourning for the former continued seventy days.

Literature and Art. — The Egyptians were a very literary people, and time has preserved to us, besides the inscriptions of their tombs and temples, many papyri, of a religious or historical character, and one tale. They bear no resemblance to the books of the O. T., except such as arises from their sometimes enforcing moral truths in a manner not wholly different from that of the Book of Proverbs. The moral and religious system is, however, essentially different in its principles and their application. Some have imagined a great similarity between the O. T. and Egyptian literature, and have given a show of reason to their idea by dressing up Egyptian documents in a garb of Hebrew phraseology, in which, however, they have gone so awkwardly that no one who had not prejudged the question could for a moment be deceived. In science, Egyptian influence may be distinctly traced in the Pentateuch. Moses was "learned in all the wisdom of the Egyptians" (Acts vii. 22), and probably derived from them the astronomical knowledge which was necessary for the calendar. [CHRONOLOGY.] His acquaintance with chemistry is shown in the manner of the destruction of the golden calf. The Egyptians excelled in geometry and mechanics: the earlier books of the Bible, however, throw no light upon the degree in which Moses may have made use of this part of his knowledge. In medicine and surgery, the high proficiency of the Egyptians was probably of but little use to the Hebrews after the Exodus: anatomy, practiced by the former from the earliest ages, was repugnant to the feelings of

Digitized by Google

Shemites, and the simples of Egypt and of Palestine would be as different as the ordinary diseases of the country. In the arts of architecture sculpture, and painting, the former of which was the chief, there seems to have been but a very slight and material influence. This was natural, for with the Egyptians architecture was a religious art, embodying in its principles their highest religious convictions, and mainly devoted to the service of religion. Durable construction, massive and grand form, and rich, though sober, color, characterize their temples and tombs, the abodes of gods, and "homes" of men. To adopt such an architecture would have been to adopt the religion of Egypt, and the pastoral Israelites had no need of buildings. When they came into the Promised Land they found cities ready for their occupation, and it was not until the days of Solomon that a temple took the place of the tent, which was the sanctuary of the pastoral people. Details of ornament were of course borrowed from Egypt; but separated from the vast system in which they were found, they lost their significance, and became harmless, until modern sciolists made them prominent in support of a theory which no mind capable of broad views can for a moment tolerate.

Magicians. — We find frequent reference in the Bible to the magicians of Egypt. The Pharaoh of Joseph laid his dream before the magicians, who could not interpret it (Gen. xli. 8); the Pharaoh of the Exodus used them as opponents of Moses and Aaron, when, after what appears to have been a seeming success, they failed as before (Ex. vii. 11, 12, 22, viii. 18, 19, ix. 11; 2 Tim. iii. 8, 9). The monuments do not recognize any such art, and we must conclude that magic was secretly practiced, not because it was thought to be unlawful, but in order to give it importance. [See MAGIC; JAMBRES; JANNES.]

Industrial Arts. — The industrial arts held an important place in the occupations of the Egyptians. The workers in fine flax and the weavers of white linen are mentioned in a manner that shows they were among the chief contributors to the riches of the country (Is. xix. 9). The fine linen of Egypt found its way to Palestine (Prov. vii. 16). Pottery was a great branch of the native manufactures, and appears to have furnished employment to the Hebrews during the bondage (Ps. lxxxi. 6, lxviii. 13; comp. Ex. i. 14).

Festivals. — The religious festivals were numerous, and some of them were, in the days of Herodotus, kept with great merry-making and license. His description of that of the goddess Bubastis, kept at the city of Bubastis in the eastern part of the Delta, would well apply to some of the great Mohammedan festivals now held in the country (ii. 59, 60). The feast which the Israelites celebrated when Aaron had made the golden calf seems to have been very much of the same character: first offerings were presented, and then the people ate and danced and sang (Ex. xxxiii. 5, 6, 17, 18, 19), and even, it seems, stripped themselves (ver. 25), as appears to have been not unusual at the popular ancient Egyptian festivals.

Manners of Modern Inhabitants. — The manners of the modern inhabitants are, we are disposed to believe after much consideration, more similar to those of the ancient Hebrews, on account of Arab influence, than the manners of their predecessors. How remarkably they illustrate the Bible is seen in the numerous references given in the *Modern Egyptians* (see its index), and in the great general value of that work in Biblical criticism.

CHRONOLOGY AND HISTORY. — In treating of the chronology and history of ancient Egypt it is our endeavor to avoid as much as possible the statement of doubtful matters, and to give the greater prominence to those points on which the generality of sound Egyptologers are virtually agreed. The subject may be divided into three main branches, technical chronology, historical chronology, and history: —

1. *Technical Chronology.* — It is impossible here to treat in much detail the difficult subject of Egyptian technical chronology. That the Egyptians used various periods of time, and made astronomical observations from a remote age, is equally attested by ancient writers, and by their monuments. It is, however, very difficult to connect periods mentioned by the former with the indications of the same kind offered by the latter; and what we may term the recorded observations of the monuments cannot be used for the determination of chronology without a previous knowledge of Egyptian astronomy that we have not wholly attained. The testimony of ancient writers must, moreover, be carefully sifted, and we must not take their statements as a positive basis without the strongest evidence of correctness. Without that testimony, however, we could not at present prosecute the inquiry. The Egyptians do not appear to have had any common era. Every document that bears the date of a year, gives the year of the reigning sovereign, counted from that current year in which he came to the throne, which was called his first year. There is therefore no general means of testing deductions from the chronological indications of the monuments.

There appear to have been at least three years in use with the Egyptians before the Roman domination, the Vague Year, the Tropical Year, and the Sothic Year; but it is not probable that more than two of these were employed at the same time. The Vague Year contained 365 days without any additional fraction, and therefore passed through all the seasons in about 1500 years. It was both used for civil and for religious purposes. Probably the Israelites adopted this year during the sojourn in Egypt, and that instituted at the Exodus appears to have been the current Vague Year fixed by the adoption of a method of intercalation. [CHRONOLOGY.] The Vague Year was divided into twelve months, each of thirty days, with five epagomenæ, or additional days, after the twelfth. The months were assigned to three seasons, each comprising four months, called respectively the 1st, 2d, 3d, and 4th of those seasons. The names by which the Egyptian months are commonly known, Thoth, Paophi, &c., are taken from the divinities to which they were sacred. The seasons are called, according to our rendering, those of Vegetation, Manifestation and the Waters or the Inundation: the exact meaning of their names has however been much disputed. They evidently refer to the phenomena of a Tropical Year, and such a year we must therefore conclude the Egyptians to have had, at least in a remote period of their history. If, as we believe, the third season represents the period of the inundation, its beginning must be dated about one month before the autumnal equinox, which would place the beginning of the year at the Winter Solstice, an especially fit time in Egypt for the commencement of a tropical year. The Sothic Year was a supposed sidereal year of 365¼ days, commencing with

Digitized by Google

the so-called heliacal rising of Sothis. The Vague Year, having no intercalation, constantly retreated through the Sothic Year, until a period of 1461 years of the former kind, and 1460 of the latter had elapsed, from one coincidence of commencements to another.

The Egyptians are known to have used two great cycles, the Sothic Cycle and the Tropical Cycle. The former was a cycle of the coincidence of the Sothic and Vague Years, and therefore consisted of 1460 years of the former kind. This cycle is mentioned by ancient writers, and two of its commencements recorded, the one, called the Era of Menophres, July 20, B. C. 1322, and the other, on the same day, A. D. 139. Menophres is supposed to be the name of an Egyptian king, and this is most probable. The nearest name is Men-ptah, or Men-phthah, which is part of that of Sethee Men-ptah, the father of Rameses II., and also that of the son of the latter, all these being kings of the XIXth dynasty. We are of opinion that chronological indications are conclusive in favor of the earlier of the two sovereigns. The Tropical Cycle was a cycle of the coincidence of the Tropical and Vague Years. We do not know the exact length of the former year with the Egyptians, nor indeed that it was used in the monumental age; but from the mention of a period of 500 years, the third of the cycle, and the time during which the Vague Year would retrograde through one season, we cannot doubt that there was such a cycle, not to speak of its analogy with the Sothic Cycle. It has been supposed by M. Biot to have had a duration of 1505 years; but the length of 1500 Vague Years is preferable, since it contains a number of complete lunations, besides that the Egyptians could scarcely have been more exact, and that the period of 500 years is a subdivision of 1500. Ancient writers do not fix any commencements of this cycle. If the characteristics of the Tropical Year are what we suppose, the cycle would have begun B. C. 2005 and 507: two hieroglyphic inscriptions record, as we believe, the former of these epochs (*Hor. Ægyptiacæ*, p. 12 ff., pl. i. Nos. 5, 6).[a] The return of the Phœnix has undoubtedly a chronological meaning. It has been supposed to refer to the period last mentioned, but we are of opinion that the Phœnix Cycle was of exactly the same character, and therefore length, as the Sothic, its commencement being marked by the so-called heliacal rising of a star of the constellation BENNU HESAR, "the Phœnix of Osiris," which is placed in the astronomical ceiling of the Rameseum of El-Kurneh six months distant from Sothis. The monuments make mention of Panegyrical Months, which can only, we believe, be periods of thirty years each, and divisions of a year of the same kind. We have computed the following dates of commencements of these Panegyrical Years: 1st. B. C. 2717, first dynasty, era of Menes (not on monuments); 2d. B. C. 2352, IVth dynasty, Sûphis, I. and II.; 3d. B. C. 1986 (XIIth dynasty, Sesertesen III.? not on monuments); the last-mentioned date being also the beginning of a Phœnix Cycle, which appears to have comprised four of these Panegyrical Years. The other important dates of the system of Panegyrics which occur on the monuments are B. C. 1442, XVIIIth dynasty, Queen Amen-nemt; and B. C. 1412, XVIIIth dynasty, Thothmes III.

[a] For the reasons for fixing on these years, see *Hor. Æg.* l. c.

Certain phenomena recorded on the monuments have been calculated by M. Biot, who has obtained the following dates: Rising of Sothis in reign of Thothmes III., XVIIIth dynasty, B. C. 1445; supposed Vernal Equinox, Thothmes III., B. C., cir 1441; rising of Sothis, Rameses III., XXth dynasty, B. C. 1301; star-risings, Rameses VI. and IX., XXth dynasty, B. C. cir. 1241. Some causes of uncertainty affect the exactness of these dates, and that of Rameses III. is irreconcilable with the two of Thothmes III., unless we hold the calendar in which the inscription supposed to record it occurs to be a Sothic one, in which case no date could be obtained.

Egyptian technical chronology gives us no direct evidence in favor of the high antiquity which some assign to the foundation of the first kingdom. The earliest record which all Egyptologers are agreed to regard as affording a date is of the fifteenth century B. C., and no one has alleged any such record to be of any earlier time than the twenty-fourth century B. C. The Egyptians themselves seem to have placed the beginning of the 1st dynasty in the twenty-eighth century B. C., but for determining this epoch there is no direct monumental evidence.

2. *Historical Chronology.* — The materials for historical chronology are the monuments and the remains of the historical work of Manetho. Since the interpretation of hieroglyphics has been discovered the evidence of the monuments has been brought to bear on this subject, but as yet it has not been sufficiently full and explicit to enable us to set aside other aid. We have had to look elsewhere for a general frame-work, the details of which the monuments might fill up. The remains of Manetho are now generally held to supply this want. A comparison with the monuments has shown that he drew his information from original sources, the general authenticity of which is vindicated by minute points of agreement. The information Manetho gives us, in the present form of his work, is, however, by no means explicit, and it is only by a theoretical arrangement of the materials that they take a definite form. The remains of Manetho's historical work consist of a list of the Egyptian dynasties and two considerable fragments, one relating to the Shepherds, the other to a tale of the Exodus. The list is only known to us in the epitome given by Africanus, preserved by Syncellus, and that given by Eusebius. These present such great differences that it is not reasonable to hope that we can restore a correct text. The series of dynasties is given as if they were successive, in which case the commencement of the first would be placed full 5000 years B. C., and the reign of the king who built the Great Pyramid, 4000. The monuments do not warrant so extreme an antiquity, and the great majority of Egyptologers have therefore held that the dynasties were partly contemporary. A passage in the fragment of Manetho respecting the Shepherds, where he speaks of the kings of the Thebaïs and of the rest of Egypt rising against these foreign rulers, makes it almost certain that he admitted at least three contemporary lines at that period (Joseph. c. *Apion.* i. 14). The naming of the dynasties anterior to the time of a certain single kingdom, and that of the later ones, which we know to have generally held sway over all Egypt, or the first seventeen, and the XVIIIth and following dynasties, lends support to this opinion. The former are named in groups, first a group of Thinites, then one of Memphites, broken by a dynasty of Elephant

Digitized by Google

nates, next a Heracleopolite line, &c., the dynasties of a particular city being grouped together; whereas the latter generally present but one or two together of the same name, and the dynasties of different cities recur. The earlier portion seems therefore to represent parallel lines, the later, a succession. The evidence of the monuments leads to the same conclusion. Kings who unquestionably belong to different dynasties are shown by them to be contemporary. In the present state of Egyptology this evidence has led to various results as to the number of contemporary dynasties, and the consequent duration of the whole history. One great difficulty is that the character of the inscriptions makes it impossible to ascertain, without the explicit mention of two sovereigns, that any one king was not a sole ruler. For example, it has been lately discovered that the XIIth dynasty was for the greatest part of its rule a double line. Yet its numerous monuments in general give no hint of more than one king, although there was almost always a recognized colleague. Therefore, *à fortiori*, no notice would be taken, if possible, on any monument of a ruler of another house than that of the king in whose territory it was made. We can therefore scarcely expect very full evidence on this subject. Mr. Lane, as long ago as 1830, proposed an arrangement of the first seventeen dynasties based upon their numbers and names. This scheme the writer believes to be strikingly confirmed by the monuments. The table in the following page contains the dynasties thus arranged, with the approximative dates we assign to their commencements, and the dates of chief events in Hebrew history connected with that of Egypt, according to the system preferred in art. CHRONOLOGY.

The monuments will not, in our opinion, justify any great extension of the period assigned in the table to the first seventeen dynasties. The last date, that of the commencement of the XVIIIth dynasty, cannot be changed more than a few years. Baron Bunsen and Dr. Lepsius indeed place it much earlier, but they do so in opposition to positive monumental evidence. The date of the beginning of the Ist dynasty, which we are disposed to place a little before B. C. 2700, is more doubtful, but a concurrence of astronomical evidence points to the twenty-eighth century. The interval between the two dates cannot therefore be greatly more or less than twelve hundred years, a period quite in accordance with the lengths of the dynasties according to the better text, if the arrangement here given be correct. Some have supposed a much greater antiquity for the commencement of Egyptian history. Lepsius places the accession of Menes B. C. 3892, and Bunsen, two hundred years later. Their system is founded upon a passage in the chronological work of Syncellus, which assigns a duration of 3555 to the thirty dynasties (*Chron.* p. 51 B). It is by no means certain that this number is given on the authority of Manetho, but apart from this, the whole statement is unmistakably not from the true Manetho, but from some one of the fabricators of chronology, among whom the Pseudo-Manetho held a prominent place (*Enc Brit.* 8th ed. *Egypt*, p. 452; *Quarterly Review* No. 210, p. 395–7). If this number be discarded as doubtful or spurious, there is nothing definite to support the extended system so confidently put forth by those who adopt it.

3. *History.* — Passing from chronology to history, we have first to notice the indications in the Bible which relate to the earliest period. That Egypt was colonized by the descendants of Noah in a very remote age is shown by the mention of the migration of the Philistines from Caphtor which had taken place before the arrival of Abraham in Palestine. Before this migration could occur, the Caphtorim and other Mizraites must have occupied Egypt for some time. A remarkable passage points to a knowledge of the date at which an ancient city of Egypt was founded: "Hebron was built seven years before Zoan in Egypt" (Num xiii. 22). We find that Hebron was originally called Kirjath-arba, and was a city of the Anakim (Josh. xiv. 15), and it is mentioned under that appellation in the history of Abraham (Gen. xxiii. 2); it had therefore been founded by the giant-race before the days of that patriarch.

The evidence of the Egyptians as to the primeval history of their race and country is extremely indefinite. They seem to have separated mankind into two great stocks, and each of these again into two branches, for they appear to have represented themselves and the Negroes, the red and black races, as the children of the god Horus, and the Shemites and Europeans, the yellow and white races, as the children of the goddess Pesht (comp. Brugsch, *Geogr. Inschr.* ii. 90, 91). They seem therefore to have held a double origin of the species. The absence of any important traditional period is very remarkable in the fragments of Egyptian history. These commence with the divine dynasties, and pass abruptly to the human dynasties. The latest portion of the first may indeed be traditional, not mythical; and the earliest part of the second may be traditional and not historical, though this last conjecture we are hardly disposed to admit. In any case, however, there is a very short and extremely obscure time of tradition, and at no great distance from the earliest date at which it can be held to end we come upon the clear light of history in the days of the pyramids. The indications are of a sudden change of seat, and the settlement in Egypt of a civilized race, which, either wishing to be believed autochthonous, or having lost all ties that could keep up the traditions of its first dwelling-place, filled up the commencement of its history with materials drawn from mythology. There is no trace of the tradition of the Deluge which is found in almost every other country of the world. The priests are indeed reported to have told Solon when he spoke of one deluge that many had occurred (Plat. *Tim.* 23), but the reference is more likely to have been to great floods of the Nile than to any extraordinary catastrophes.

The history of the dynasties preceding the XVIIIth is not told by any continuous series of monuments. Except those of the IVth and XIIth dynasties there are scarcely any records of the age left to the present day, and thence in a great measure arises the difficulty of determining the chronology. From the times of Menes, the first king, until the Shepherd-invasion, Egypt seems to have enjoyed perfect tranquillity. During this age the Memphite line was the most powerful, and by it, under the IVth dynasty, were the most famous pyramids raised. The Shepherds were foreigners who came from the East, and, in some manner unknown to Manetho, gained the rule of Egypt. Those whose kings composed the XVth dynasty were the first and most important. They appear to have been Phœnicians, and it is probable that their migration into Egypt, and

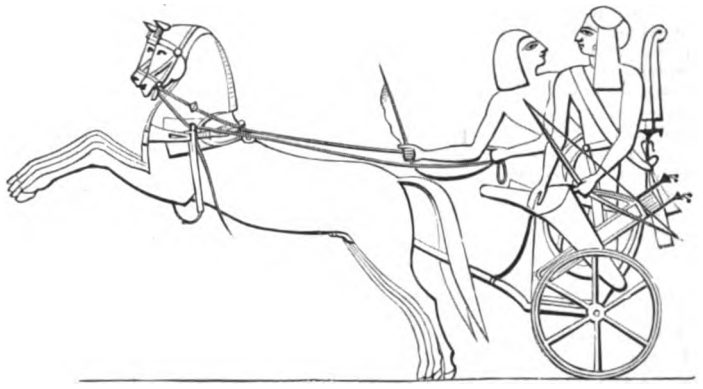
thence at last into Palestine, was part of the great movement to which the coming of the Phœnicians from the Erythræan Sea, and the Philistines from Caphtor, belong. It is not impossible that the war of the four kings — Chedorlaomer and his allies — was directed against the power of the kings of the XVth dynasty. Most probably the Pharaoh of Abraham was of this line, which lived at Memphis, and at the great fort or camp of Avaris on the eastern frontier. The period of Egyptian history to which the Shepherd-invasion should be assigned is a point of dispute. It is generally placed after the XIIth dynasty, for it is argued that this powerful line could not have reigned at the same time as one or more Shepherd-dynasties. We are of opinion that this objection is not valid, and that the Shepherd-invasion was anterior to the XIIth dynasty. It is not certain that the foreigners were at the outset hostile to the Egyptians, for they may have come in by marriage, and it is by no means unlikely that they may have been long in a position of secondary importance. The rule of the XIIth dynasty, which was of Thebans, lasting about 160 years, was a period of prosperity to Egypt, but after its close those calamities appear to have occurred which made the Shepherds hated by the Egyptians. During the interval to the XVIIIth dynasty there seems to have been no native line of any importance but that of the Thebans, and more than one Shepherd dynasty exercised a severe rule over the Egyptians. The paucity of the monuments proves the troubled nature of this period.

We must here notice the history of the Israelites in Egypt with reference to the dynasty of the Pharaohs who favored them, and that of their oppressors. According to the scheme of Biblical Chronology which we believe to be the most probable [CHRONOLOGY], the whole sojourn in Egypt would belong to the period before the XVIIIth dynasty. The Israelites would have come in and gone forth during that obscure age for the history of which we have little or no monumental evidence. This would explain the absence of any positive mention of them on the Egyptian monuments. Some assert that they were an unimportant Arab tribe, and therefore would not be mentioned, and that the calamities attending their departure could not be commemorated. These two propositions are contradictory, and the difficulties are unsolved. If, as Lepsius supposes, the Israelites came in under the XVIIIth dynasty, and went out under the XIXth, or if, as Bunsen holds, they came in under the XIIth, and (after a sojourn of 1434 years!) went out under the XIXth, the oppression in both cases falling in a period of which we have abundant contemporary monuments, sometimes the records of every year, it is impossible that the monuments should be wholly silent if the Biblical narrative is true. Let us examine the details of that narrative. At the time to which we should assign Joseph's rule, Egypt was under Shepherds, and Egyptian kings of no great strength. Since the Pharaoh of Joseph must have been a powerful ruler and held Lower Egypt, there can be no question that he was, if the dates be correct, a Shepherd of the XVth dynasty. How does the Biblical evidence affect this inference? Nothing is more striking throughout the ancient Egyptian inscriptions and writings than the bitter dislike of most foreigners, especially Easterns. They are constantly spoken of in the same terms as the inhabitants of the infernal regions, not alone when at war with the Pharaohs, but in time of peace and in the case of friendly nations. It is a feeling alone paralleled in our days by that of the Chinese. The accounts of the Greek writers, and the whole history of the later period, abundantly confirm this estimate of the prejudice of the Egyptians against foreigners. It seems to us perfectly incredible that Joseph should be the minister of an Egyptian king. In lesser particulars the evidence is not less strong. The Pharaoh of Joseph is a despot, whose will is law, who kills and pardons at his pleasure, who not only raises a foreign slave to the head of his administration, but through his means makes all the Egyptians, except the priests, serfs of the crown. The Egyptian kings on the contrary were restrained by the laws, shared the public dislike of foreigners, and would have avoided the very policy Joseph followed, which would have weakened the attachment of their fellow-countrymen by the loosening of local ties and complete reducing to bondage of the population, although it would have greatly strengthened the power of an alien sovereign. Pharaoh's conduct towards Joseph's family points to the same conclusion. He gladly invites the strangers, and gives them leave to dwell, not among the Egyptians, but in Goshen, where his own cattle seem to have been (Gen. xlvi. 34, xlvii. 6). His acts indicate a fellow-feeling and a desire to strengthen himself against the national party.

The "new king" "which knew not Joseph," is generally thought by those who hold with us as to the previous history, to have been an Egyptian, and head of the XVIIIth dynasty. It seems at first sight extremely probable that the king who crushed, if he did not expel, the Shepherds, would be the first oppressor of the nation which they protected. Plausible as this theory appears, a close examination of the Bible-narrative seems to us to overthrow it. We read of the new king that — "he said unto his people, Behold, the people of the children of Israel [are] more and mightier than we: come on, let us deal wisely with them; lest they multiply, and it come to pass, that, when there falleth out any war, they join also unto our enemies, and fight against us, and [so] get them up out of the land" (Ex. i. 9, 10). The Israelites are therefore more and stronger than the people of the oppressor, the oppressor fears war in Egypt, and that the Israelites would join his enemies; he is not able at once to adopt open violence, and he therefore uses a subtle system to reduce them by making them perform forced labor, and soon after takes the stronger measure of killing their male children. These conditions point to a divided country and a weak kingdom, and cannot, we think, apply to the time of the XVIIIth and XIXth dynasties. The whole narrative of subsequent events to the Exodus is consistent with this conclusion, to which the use of universal terms does not offer any real objection. When all Egypt is spoken of, it is not necessary either in Hebrew or in Egyptian that we should suppose the entire country to be strictly intended. If we conclude therefore that the Exodus most probably occurred before the XVIIIth dynasty, we have to ascertain, if possible, whether the Pharaohs of the oppression appear to have been Egyptians or Shepherds. The change of policy is in favor of their having been Egyptians, but is by no means conclusive, for there is no reason that all the foreigners should have had the same feeling towards the Israelites; and we have already seen that the Egyptian Pharaohs and their subjects seem to

Digitized by Google



general to have been friendly to them throughout their history, and that the Egyptians were privileged by the Law, apparently on this account. It may be questioned whether the friendship of the two nations, even if merely a matter of policy, would have been as enduring as we know it to have been, had the Egyptians looked back on their conduct towards the Israelites as productive of great national calamities, or had the Israelites looked back upon the persecution as the work of the Egyptians. If the chronology be correct, we can only decide in favor of the Shepherds. During the time to which the events are assigned there were no important lines but the Theban, and one or more of Shepherds. Lower Egypt, and especially its eastern part, must have been in the hands of the latter. The land of Goshen was in the eastern part of Lower Egypt: it was wholly under the control of the oppressors, whose capital, or royal residence, at least in the case of the Pharaoh of the Exodus, lay very near to it. Manetho, according to the transcript of Africanus, speaks of three Shepherd-dynasties, the XVth, XVIth, and XVIIth, the last of which, according to the present text, was of Shepherds and Thebans, but this is probably incorrect, and the dynasty should rather be considered as of Shepherds alone. It is difficult to choose between these three: a passage in Isaiah, however, which has been strangely overlooked, seems to afford an indication which narrows the choice. "My people went down aforetime into Egypt to sojourn there; and the Assyrian oppressed them without cause" (lii. 4). This indicates that the oppressor was an Assyrian, and therefore not of the XVth dynasty, which, according to Manetho, in the epitomes, was of Phœnicians, and opposed to the Assyrians (Joseph. *c. Apion.* i. 14). Among the names of kings of this period in the Royal Turin Papyrus (ed. Wilkinson) are two which appear to be Assyrian, so that we may reasonably suppose that some of the foreign rulers were of that race. It is not possible at present to decide whether they were of the XVIth or the XVIIth dynasty. It cannot be objected to the explanation we have offered that the title Pharaoh is applied to the kings connected with the Israelites, and that they must therefore have been natives, for it is almost certain that at least some of the Shepherd-kings were Egyptianized, like Joseph, who received an Egyptian name, and Moses, who was supposed by the daughters of Jethro to be an Egyptian (Ex. ii. 19). It has been urged by the opponents of the chronological schemes that place the Exodus before the later part of the fourteenth century B. C., that the conquests of the Pharaohs of the XVIIIth, XIXth, and XXth dynasties would have involved collisions with the Israelites had they been in those times already established in Palestine, whereas neither the Bible nor the monuments of Egypt indicate any such event. It has been overlooked by the advocates of the Rabbinical date of the Exodus that the absence of any positive Palestinian names, except that of the Philistines, in the lists of peoples and places subject to these Pharaohs, and in the records of their wars, entirely destroys their argument, for while it shows that they did not conquer Palestine, it makes it impossible for us to decide on Egyptian evidence whether the Hebrews were then in that country or not. Shishak's list, on the contrary, presents several well-known names of towns in Palestine, besides that of the kingdom of Judah. The policy of the Pharaohs, as previously explained, is the key to their conduct towards the Israelites. At the same time the character of the portions of the Bible relating to this period prevents our being sure that the Egyptians may not have passed through the country, and even put the Israelites to tribute. It is illustrative of the whole question under consideration, that in the most flourishing days of the sole kingdom of Israel, a Pharaoh should have marched unopposed into Palestine and captured the Canaanite city Gezer at no great distance from Jerusalem, and that this should be merely incidentally mentioned at a later time instead of being noticed in the regular course of the narrative (1 K. ix. 15, 16).

The main arguments for the Rabbinical or latest date of the Exodus have been discussed in a previous article (CHRONOLOGY). The objections to a much earlier date, that of B. C. 1652, may be considered as favorable to the latest rather than to Usher's date, although not unfavorable to both. The main objection to these, in our opinion, is that the details of the Biblical narrative do not, even with the utmost latitude of interpretation, agree with the history of the country if the Exodus be supposed to have taken place under the XVIIIth or XIXth dynasty. As to the account of the Exodus given by Manetho, it was confessedly a mere popular story, for he admitted it was not a part of the Egyptian records, but a tale of uncertain authorship (*ὑπὲρ ὧν ὁ Μανεθὼν οὐκ ἐκ τῶν παρ' Αἰγυπτίοις γραμμάτων, ἀλλ' ὡς αὐτὸς ὡμολόγηκεν, ἐκ τῶν ἀδεσπότως μυθολογουμένων προστέθεικεν, κ. τ. λ.* Joseph. *c. Apion.* i. 16). A critical examination shows that it cannot claim to be a veritable tradition of the Exodus: it is indeed, if based on any such tradition, so distorted that it is impossible to be sure that it relates to the king to whose reign it is assigned. Yet upon the supposition that the king is really Menptah, son of Rameses II., the advocates of the Rabbinical date entirely base their adjustment of Hebrew with Egyptian history at this period.

The history of the XVIIIth, XIXth, and XXth dynasties is that of the Egyptian empire. Aahmes, the head of the first of these (B. C. cir. 1525), overthrew the power of the Shepherds, and probably expelled them. Queen Amen-nemt and Thothmes II. and III. are the earliest sovereigns of whom great monuments remain in the temple of El-Karnak, the chief sanctuary of Thebes. The last of these rulers was a great foreign conqueror, and reduced Nineveh, and perhaps Babylon also, to his sway. Amenoph III., his great-grandson, states on scarabæi, struck apparently to commemorate his marriage that his northern boundary was in Mesopotamia, his southern in Kara (Choloë?). By him was raised the great temple on the west bank at Thebes, the site of which is now only marked by the gigantic pair, the Vocal Memnon and its fellow. The head of the XIXth dynasty, Sethee I., or Sethos, B. C. cir. 1340, waged great foreign wars, particularly with the Hittites of the valley of the Orontes, whose capital Ketesh, situate near Emesa, he captured. By him the great hypostyle hall of El-Karnak was built, and on its northern wall is a most interesting series of bas-reliefs recording his successes. His son Rameses II. was the most illustrious of the Pharaohs. If he did not exceed all others in foreign conquests, he far outshone them in the grandeur and beauty of the temples with which he adorned Egypt and Nubia. His chief campaign was against the Hittites and a great confederacy they had formed. He defeated their army, captured Ketesh, and forced them to conclude a treaty

Digitized by Google

with him, though this last object does not seem to have been immediately attained. Menptah, the son and successor of Rameses II., is supposed by the advocates of the Rabbinical date of the Exodus to have been the Pharaoh in whose time the Israelites went out. One other king of this period must be noticed, Rameses III., of the XXth dynasty, B. C. cir. 1200, whose conquests, recorded on the walls of his great temple of Medeenet Haboo in western Thebes, seem to have been not less important than those of Rameses II. The most remarkable of the sculptures commemorating them represent a naval victory in the Mediterranean, gained by the Egyptian fleet over that of the Tokkaree, probably the Carians, and Shairetana (Khairetana) or Cretans. Other Shairetana, whom we take to correspond to the Cherethim of Scripture, serve in the Egyptian forces. This king also subdued the Philistines and the Rebu (Lebu), or Lubim, to the west of Egypt. Under his successors the power of Egypt evidently declined, and towards the close of the dynasty the country seems to have fallen into anarchy, the high-priests of Amen having usurped regal power at Thebes, and a Lower Egyptian dynasty, the XXIst, having arisen at Tanis. Probably the Egyptian princess who became Solomon's wife was a daughter of a late king of the Tanite dynasty. The head of the XXIId dynasty, Sheshonk I., the Shishak of the Bible, restored the unity of the kingdom and revived the credit of the Egyptian arms, B. C. cir. 990. Early in his reign he received Jeroboam, the enemy of Solomon (1 K. xi. 40), and perhaps it was by his advice that he afterwards attacked Judah. It is doubtful, however, whether Jeroboam did not suffer by the invasion as well as Rehoboam. On the outside of the south wall of the temple of El-Karnak is a list of the conquests of Sheshonk I., comprising "the kingdom of Judah," and several Hebrew towns, some of which must have been taken from Jeroboam. [SHISHAK.] Probably his successor, Osorkon I., is the Zerah of Scripture, defeated by Asa. The army that Zerah led can only have been that of Egypt, and his overthrow will explain the decline of the house of Sheshonk. [ZERAH.] Egypt makes no figure in Asiatic history during the XXIIId and XXIVth dynasties: under the XXVth it regained, in part at least, its ancient importance. This was an Ethiopian line, the warlike sovereigns of which strove to the utmost to repel the onward stride of Assyria. So, whom we

The son of King Rameses with his charioteer. (Wilkinson.)

are disposed to identify with Shebek II. or Sebichus, the second Ethiopian, rather than with Shebek I. or Sabaco, the first, made an alliance with Hoshea the last king of Israel. [So.] Tehrak or Tirhakah, the third of this house, advanced against Sennacherib in support of Hezekiah. [TIRHAKAH.] After this, a native dynasty again occupied the throne, the XXVIth, of Saïte kings. Psametek I. or Psammetichus I. (B. C. 664), who may be regarded as the head of this dynasty, warred in Palestine, and took Ashdod, Azotus, after a siege of twenty-nine years (Herod. ii. 157). Probably it was held by an Assyrian garrison, having been previously taken from the Egyptians by Sargon (Is. xx.). Neku or Necho, the son of Psammetichus, continued the war in the East, and marched along the coast of Palestine to attack the king of Assyria. At Megiddo Josiah encountered him (B. C. 608–7), notwithstanding the remonstrance of the Egyptian king, which is very illustrative of the policy of the Pharaohs in the East (2 Chr. xxxv. 21) no less than is his lenient conduct after the defeat and death of the king of Judah. The army of Necho was after a short space routed at Carchemish by Nebuchadnezzar, B. C. 605–4 (Jer. xlvi. 2). We read of a time not long subsequent that "the king of Egypt came not again any more out of his land: for the king of Babylon had taken from the river of Egypt unto the river Euphrates all that pertained to the king of Egypt" (2 K. xxiv. 7) [PHARAOH-NECHO.] The second successor of Necho, Apries, or Pharaoh-Hophra, sent his army into Palestine to the aid of Zedekiah (Jer. xxxvii. 5, 7, 11), so that the siege of Jerusalem was raised for a time, and kindly received the fugitives from the captured city. He seems to have been afterwards attacked by Nebuchadnezzar in his own country. There is, however, no certain account of a complete subjugation of Egypt by the king of Babylon, and it is probable that the prophecies of Ezekiel (for the fulfillment of which commentators have looked to this time) refer to a later period, and chiefly to the conquest by Cambyses and the calamities which followed the revolt of Inaros [PHARAOH-HOPHRA.] Amasis, the successor of Apries, had a long and prosperous reign, and taking advantage of the weakness and fall of Babylon somewhat restored the weight of Egypt in the East. But the new power of Persia was to prove even more terrible to his house than Babylon had been to the house of Psammetichus; and the son of

Digitized by Google

Amasis had reigned but six months when Cambyses reduced the country to the condition of a province of his empire, B. C. 525.

It is not necessary here to give an outline of the subsequent history of Egypt. Its connection with the history and literature of the Jews is discussed in the articles on the Greek kings of Egypt [PTOLEMY] and ALEXANDRIA. The relation of Egypt and Palestine during the period from the accession of the first Ptolemy until the age of the Apostles is full of interest, but it does not offer any serious difficulties that require it to be here discussed. It would not be within the province of this article to enter upon a general consideration of the prophecies relating to Egypt: we must, however, draw the reader's attention to their remarkable fulfillment. The visitor to the country needs not to be reminded of them: everywhere he is struck by the precision with which they have come to pass. We have already spoken of the physical changes which have verified to the letter the words of Isaiah. In like manner we recognize, for instance, in the singular disappearance of the city of Memphis and its temples in a country where several primeval towns yet stand, and scarce any ancient site is unmarked by temples, the fulfillment of the words of Jeremiah: "Noph shall be waste and desolate without an inhabitant" (xlvi. 19), and those of Ezekiel, "Thus saith the Lord God; I will also destroy the idols, and I will cause [their] images to cease out of Noph" (xxx. 13). Not less signally are the words immediately following the last quotation — "And there shall be no more a prince of the land of Egypt" (*l. c.*) — fulfilled in the history of the country, for from the second Persian conquest, more than two thousand years ago, until our own days, not one native ruler has occupied the throne.

Literature. — The following are the most useful works upon Egypt, excepting such as relate to its modern history: for a very full list of the literature of the subject the reader is referred to Jolowicz's (Dr. H.) *Bibliotheca Ægyptiaca*, 1858 [and Supplement I., 1861]. Egypt generally: *Description de l'Égypte*, 2d ed. 1821–9; *Encyclopædia Britannica*, 8th ed. art. *Egypt*. Description, Productions, and Topography: Abd-Allatif, *Relation de l'Égypte*, ed. Silvestre de Sacy, 1810; D'Anville, *Mémoires sur l'Égypte*, 1766; Belzoni (G.), *Narrative of Operations*, 1820; Brugsch (H.), *Geographische Inschriften altägyptischer Denkmäler*, 1857 [–60]; *Reiseberichte aus Ægypten*, 1855; Champollion le Jeune, *L'Égypte sous les Pharaons*, 1814; *Lettres écrites pendant son Voyage en Égypte*, 2de éd. 1833; Ehrenberg, Ch. G., und Hemprich, F. W., *Naturgeschichtliche Reisen — Reisen in Ægypten*, &c., 1828 — *Symbolæ Physicæ*, 1829–1845; Forskål, Pt., *Descriptiones Animalium*, &c., 1775–6; *Flora Ægyptiaco-arabica*, 1775; Harris, A. C., *Hieroglyphical Standards*, 1852; Linant de Bellefonds, *Mémoire sur le Lac de Mœris*, 1843; Makreezee el-Takee-ed-deen, *Khitat*: Quatremère, E., *Mémoires Géographiques et Historiques*, 1811; Russegger, *Reisen*, 1841–8; Vyse, H., Col., and Perring, J. S., *Pyramids of Gizeh*, 1839–42; Perring, J. S., 58 *Large views, &c., of the Pyramids of Gizeh*; Wilkinson, Sir J. G., *Modern Egypt and Thebes*, 1843; *Handbook for Egypt*, 2d ed. 1858; *Survey of Thebes* (plan); *On the Eastern Desert*, Journ. Geogr. Soc. ii. 1832, p. 28 ff. Monuments and Inscriptions: Champollion le Jeune, *Monuments*, 1822–47; *Notices descriptives*, 1844; Lepsius, R. *Denkmäler*, 1849, in progress [plates completed in 12 vols. in 1859]; Letronne, J. A., *Recueil des inscriptions grecques et latines d'Égypte*, 1842. Rosellini, *Monumenti; Select Papyri*, 1844. Language: Brugsch, H., *Grammaire Démotique*, 1855. Champollion le Jeune, *Grammaire Égyptienne*, 1836–41: *Dictionnaire Égyptien*, 1841; *Encyc. Brit.* 8th ed. art. *Hieroglyphics*; Parthey, G., *Vocabularium Coptico-Latinum*, &c.; Peyron, A., *Grammatica Linguæ Copticæ*, 1841; *Lexicon*, 1835; Schwartze, M. G., *Das Alte Ægypten*, 1843 Ancient Chronology, History, and Manners: Bunsen, C. C. J., *Egypt's Place*, vol. i.–iii. 1848–59 [vol iv. 1860, vol. v. 1867]; Cory, I. P., *Ancient Fragments*, 2d ed. 1832; *Herodotus*, ed. [trans.] Rawlinson, vols. i.–iii.; Hengstenberg, E. W., *Egypt and the Books of Moses*, 1843; Ideler, L., *Handbuch der Chronologie*, 1825; Lepsius, R., *Chronologie der Ægypter*, vol. i. 1849; *Königsbuch der alten Ægypter*, 1858; Poole, R. S., *Horæ Ægyptiacæ*, 1851; Wilkinson, Sir J. G., *Manners and Customs of the Ancient Egyptians*, 1837, 1841; *Popular Account of the Ancient Egyptians*, 1855. To these must be added, for the manners of the modern inhabitants: Lane, E. W., *Modern Egyptians*, ed. 1842 [new ed. 1861]; *Thousand and One Nights*, 2d ed., by E. S. Poole, 1859; Poole, Mrs., *English-woman in Egypt*, 1844. It is impossible to specify a large number of valuable papers by Dr. Hincks, Mr. Birch, M. de Rougé, and others. R. S. P.

* Since the first publication of Mr. Poole's article, in 1860, numerous works have appeared in almost every department of Egyptology, of which the following are the more important: —

Language. — Brugsch, H., *Hieroglyphisch-Demotisches Wörterbuch*, 1867. This is a scientific arrangement of the most common words and groups of both the sacred and the popular languages of ancient Egypt, with definitions in French, German, and Arabic, and a statement of their affinities with corresponding words of the Coptic. Rougé, Vicomte Emmanuel de, *Chrestomathie Égyptienne*, a selection of Egyptian texts, translated and accompanied with a running commentary; also a grammatical compendium. Birch, S., *Dictionary of Hieroglyphics, Hieroglyphic Grammar, and selected Egyptian Texts*; published in vol. v. of Bunsen's *Egypt's Place*. The same volume contains Professor Dietrich's *Comparison of the Old Egyptian and Semitic Roots*, and Bunsen's *Comparison of Old and New Egyptian Words with the Semitic and Iranian*. Brugsch, H., *A. Henry Rhind's zwei bilingue Papyri, hieratisch und demotisch*, 1865. The same, translated by Dr. S. Birch, 1863. Lepsius, Richard, *Das bilingue Dekret von Kanopus*, 1867. This is an inscription of the ninth year of Ptolemy III. Euergetes I. found at Tanis, in 1866. It contains 37 lines of hieroglyphics, and 76 lines of Greek, both in excellent preservation. This addition to the Egypto-Greek vocabulary confirms the previous reading of the hieroglyphics by the school of Champollion. The same inscription has been published by Dr. S. Leo Reinisch and E. R. Roesler, under the title *Die zweisprachige Inschrift von Tanis*, 1867. Chabas, F., *L'Inscription Hiéroglyphique de Rosette, analysée et comparée à la Version Grecque*, 1867. This new translation of the Rosetta inscription is made for the purpose of philological comparison with that of Tanis. A valuable Egypto-Greek glossary is appended to the text.

Monuments and Inscriptions. — Lepsius

Johannes, *Altägyptische Tempelinschriften*, especially from Edfu, and the famous battle-scenes of Karnak, and the triumphal gates of Medinet-Habu, 1867. Rougé, E. de, *Recherches sur les Monuments qu'on peut attribuer aux six premières Dynasties de Manéthon*, 1866; a work of chronological value. Leemans, Dr. C., *Monuments Égyptiens du Musée d'Antiquités des Pays-Bas à Leide; Monuments de la Vie Civile*, 1866. Brugsch, H., *Recueil de Monuments Égyptiens*, 1862–63. Reinisch, S., *Die Ægyptischen Denkmäler in Miramar*, 1865. These antiquities are chiefly funereal. Rhind, A. Henry, *Thebes, its Tombs and their Tenants*, 1862. Clark, Edward L., *Daleth, or the Homestead of the Nations*, 1864, a popular account of Egyptian discoveries.

History and Geography. — Dümichen, J., *Geographische Inschriften altägyptischer Denkmäler*, 1865, and *Historische Inschriften altägyptischer Denkmäler*, 1867. Brugsch, H., *Histoire d'Égypte*, vol. i. 1859, comprising Egypt under her native sovereigns; vol. ii. is now in press. Hartmann, Dr. R., *Geographie und Naturgeschichte der Nilländer*, 1865. Kremer, Alfred von, *Ægypten; Physische Geographie, Ethnographie, Agrikultur*, 1863. This work is devoted chiefly to modern Egypt. Parthey, G., *Zur Erdkunde des alten Ægyptens*, 1859; with maps according to Herodotus, Strabo, Ptolemy, Pliny, and other ancient authorities. Petherick, John, *Egypt, the Soudan, and Central Africa*, 1861. Chabas, F., *Voyage d'un Égyptien en Syrie, en Phénicie, en Palestine, au XIV^me^ siècle avant notre ère, traduction analytique d'un papyrus du Musée Britannique*, 1866.

Chronology. — Hincks, E., *On the Various Years and Months in use among the Egyptians*, 1865. Lauth, Fr. Jos., *Der 30 Dynastieen Manetho's, von Menes bis Amosis*, 1865. Brugsch, H., *Matériaux pour servir à la Réconstruction du Calendrier des Anciens Égyptiens*, 1864. Palmer, William, *Egyptian Chronicles, with a Harmony of Sacred and Egyptian Chronology*; — an attempt to revive the authority of the "Old Chronicle," and to fix the era of Menes at 2224 B. C., about the time of Terah. Henne von Sargans, Dr. Anton, *Manethos, die Origines unserer Geschichte und Chronologie*, 1865; a highly fanciful work. Lieblein, J., *Ægyptische Chronologie*, 1863. Lepsius, R., *Über einige Berührungspunkte der Ägyptischen, Griechischen, und Römischen Chronologie*, 1859. Also, by the same, a monograph, *Über die Manethonische Bestimmung des Umfangs der Ägyptischen Geschichte*, 1857. Dümichen, J., *Altägyptische Kalenderinschriften*, 1866. Smyth, C. Piazzi, *Life and Work at the Great Pyramid*, 1867. Professor Smyth, of the University of Edinburgh, and Astronomer-Royal for Scotland, spent the months of January, February, March, and April, 1865, at the Great Pyramid, devoting his whole attention to mathematical measurements and astronomical observations. For this work he had prepared himself by a careful study of all previous measurements and observations, and he was furnished with the best instruments of modern science. His results, in the main confirming, and in some points correcting, those of Col. Howard Vyse and Mr. Perring, are of scientific value, and may hereafter contribute to the settlement of chronological and historical questions, though their authority is weakened by the fanciful and extravagant theories of the author. So exact is the orientation of the Great Pyramid that Professor Smyth found the difference between the direction of its entrance passage and the present astronomical meridian to be less than 5′. His determination of the latitude of the pyramid is 29° 58′ 51″. He regards the whole structure as a symbolical standard for a universal metrology, anticipating by thousands of years the exactest determinations of modern science, — "the linear standard founded on the earth's axis of rotation; the weight and capacity measure on an employment of the whole earth's mean density; the temperature standard on the mean surface temperature of the whole earth; and the time standard on the precession of the equinoxes, assisted by meridian observations combining a well-chosen polar with an equatorial star." All these standards Professor Smyth believes that he has found expressed in the form, materials, and proportions of the entrance passage, the king's chamber, and the coffer therein contained; and he traces to this source the Hebrew cubit, and the dimensions of the sacred ark and the molten sea. A metrology so recondite and exact, the Professor ascribes to a divine inspiration in the mind of the original architect or founder of the pyramid. The date of the pyramid he fixes upon astronomical grounds at 2170 B. C. Following the theory of Sir John Herschel that α *Draconis* was the star to which the builders of the pyramid had reference in the angle or dip of its entrance or tube, he finds that this star was in the prescribed position at about 2200 B. C. and 3400 B. C.; but at the former date the Pleiades, whose "sweet influences" were so noted among the ancients, were also crossing the meridian above the pole, and from a comparison of the right ascension and declination of η *Tauri* with the right ascension and north polar distance of α *Draconis*, he reaches the mean date of 2170 B. C.

But if the builder of the Great Pyramid was the Souphis or Chefre of Manetho's fourth dynasty, this date would place Menes at nearly 3000 B. C., long before the flood, according to the Hebrew chronology. Prof. Smyth endeavors to meet this difficulty by impeaching Manetho's list; and, following Mr. William Osburn in his *Monumental History of Egypt*, he abbreviates and condenses the earlier dynasties. But monumental evidences unknown to Osburn, and overlooked by Smyth, point to a different conclusion. The most important recent additions to the materials of Egyptian Chronology are the "*Tablet of Memphis or Sakkarah*" discovered by M. Mariette, and the "*Sethos Tablet*," discovered at Abydos by M. Dümichen. These tablets, collated with each other and with the Turin papyrus, furnish an almost unbroken list of kings from Menes to Sethos I. Lepsius, Brugsch, and others, place Sethos I. about the middle of the 15th century before Christ; Mr. Poole, a century later, in 1340 B. C. But even this latter date will require that Egyptian chronology be carried back somewhat beyond the limits assigned in the foregoing article, in order to provide for the seventy-six consecutive reigns from Menes to Sethos. That these reigns are to be taken consecutively, the tablet of Sethos I. clearly indicates. This monarch, accompanied by his son Rameses, is offering homage to his royal predecessors, whose cartouches are arranged in three parallel lines, that of Menes heading the first column; and wherever the list can be verified by a comparison with other monuments, the order of the car-

Digitized by Google

touches is found to be strictly historical. This tablet must be accepted as an official list of the regular and legitimate dynasties of old Egypt, as these were recognized at the beginning of the nineteenth dynasty. The tablets of Sakkarah and Sethos, with the Turin papyrus, fill out the earlier dynasties with great completeness and accuracy; and an average for the seventy-six reigns prior to Sethos I. will place Menes at least 3000 B. C. Thus monumental data for the determination of Egyptian chronology are accumulating, and the conclusions of Mr. Poole should be held in suspense until some surer light is gained.

Religion. — Sharpe, Samuel, *Egyptian Mythology and Egyptian Christianity*, 1863. Lepsius, R., *Ältteste Texte des Todtenbuchs*, 1867. Rougé, E. de, *Le Rituel Funéraire des Anciens Égyptiens*, 1866. Chabas, F., *Le Chapitre VI. du Rituel Égyptien*, 1863. Pleyte, W., *Étude sur le Chapitre* 125 *du Rituel Funéraire*, 1866. Birch, S., *The Funereal Ritual*, the first complete translation of this important text-book of the Egyptian faith; see vol. v. of Bunsen's *Egypt's Place in Universal History*. Pleyte, W., *La Religion des Pré-Israelites*, 1862. Beauregard, Ollivier, *Les Divinités Égyptiennes, leur Origine, leur Culte, et son Expansion dans le Monde*, 1866. The work of Dr. Lepsius is based chiefly upon the inscriptions of sarcophagi in the Berlin Museum, and gives the earliest known text of the Book of the Dead. This text, though much more brief than that of the Turin papyrus, contains the important doctrines of the immortality of the soul, the rehabilitation of the body, the judgment of both good and bad, the punishment of the wicked, the justification of the righteous and their admission to the blessed state of the gods. These doctrines are amplified and repeated under various forms, in the larger text translated by Dr. Birch.

Valuable articles on Egyptology may be found in the *Révue Archéologique*, the *Journal of Sacred Literature*, the *Bibliotheca Sacra*, the *Mélanges Égyptologiques* of M. Chabas, the *Transactions of the Royal Irish Academy*, the *Abhandlungen der Akad. d. Wissenschaften zu Berlin*, and especially in the *Zeitschrift für Ägyptische Sprache und Alterthumskunde*, published monthly at Berlin, and edited by Drs. Lepsius and Brugsch. J. P. T.

EGYPTIAN (מִצְרִי, masc.; מִצְרִית, fem.: Αἰγύπτιος, Αἰγυπτία: *Ægyptius*), **EGYPTIANS** (מִצְרִים, masc.; מִצְרִיּוֹת, fem.; מִצְרִים: Αἰγύπτιοι, γυναῖκες Αἰγύπτου: *Ægyptii, Ægyptiæ mulieres*). Natives of Egypt. The word most commonly rendered Egyptians (*Mitsraim*) is the name of the country, and might be appropriately so translated in many cases. W. A. W.

* In Acts xxi. 38, an Egyptian is mentioned who headed a popular tumult in the procuratorship of Felix, whom the Roman chiliarch at first supposed might be Paul, whom he had rescued from the rage of the Jews. Josephus gives an account of the same Egyptian, whom he likewise represents as having appeared in the time of Felix (*B. J.* ii. 13, § 5, and *Ant.* xx. 7, § 6). In some other respects the Jewish historian seems to be hardly less at variance with himself in the two passages, than with Luke's account. In *B. J.* ii. 13, § 5, Josephus relates that a juggler (γόης), whom he also denominates ὁ Αἰγύπτιος, having procured for himself the reputation of a prophet, led a multitude of about 30,000 men out of the desert to the Mount of Olives, and promised them that the walls of Jerusalem would fall down at his command; but Felix fell upon them, the Egyptian fled with a few men (μετ' ὀλίγων), most of his followers were slain or taken prisoners, and the rest of the crowd (τὸ λοιπὸν πλῆθος) dispersed. In his *Ant.* xx. 7, § 6, Josephus states that this Egyptian came to Jerusalem, that he persuaded the populace to go out with him to the Mount of Olives, where he would exhibit to them the wonder before mentioned; and then he speaks of the attack of Felix, and in that connection says merely that 400 of the Egyptian's adherents were slain, and 200 were taken captive, without adding any thing further. The points of apparent disagreement here are, that in one case the Egyptian brings the people from the desert to the Mount of Olives, in the other, from Jerusalem: in one case that the greater part of 30,000 people are slain or taken prisoners; in the other, that the number of the slain amounts to only 400, that of the prisoners to only 200.

Here now is an example, as Tholuck argues (*Glaubwürdigkeit der evangel. Geschichte*, pp. 169, 170), which shows how reasonable it is, if a writer's general credibility be acknowledged, that we should reconcile such differences by having recourse to supposition or combination. Under this rule, we may view the case thus: "The Egyptian at first had a band of *sicarii* (Luke's σικάριοι), and a rabble had also attached themselves to him; these people he leaves behind on the Mount of Olives, and leads thither out of Jerusalem an additional crowd, so that the entire multitude might amount to about 30,000 men. As usually happens in such cases, curiosity merely had drawn together most of them. Only a smaller company belonged to the train of his followers, and among these were the *sicarii*; the attack of the Romans was directed properly against these, of whom Felix slew 400, and made 200 prisoners. With a small number, i. e., *with the* 4000 *of whom Luke speaks*, he escaped into the desert; the remaining mass, *i. e.*, τὸ πλῆθος, of which the first passage of Josephus speaks, dispersed. In this, or in a similar way, the Jewish historian may be reconciled with himself, and with the writer of the Acts." H.

EHI (אֲחִי [*brother*, i. e. *friend, of Jehovah*, Ges.]: Ἀγχίς; [Alex. Αγχεις:] *Echi*), head of one of the Benjamite houses, according to the list in Gen. xlvi. 21, and son of Belah according to the LXX. version of that passage. He seems to be the same as Ahi-ram, אֲחִירָם, in the list in Num. xxvi. 38, and if so, *Ahiram* is probably the right name, as the family were called *Ahiramites*. In 1 Chr. viii. 1, the same person seems to be called אַחְרַח, Aharah, and perhaps also אַחוֹחַ, Ahoah, in ver. 4 (Ἀχιά, LXX., and in Cod. Vatic. [?] Ἀχιφών), אֲחִיָּה (Ἀχιά), Ahiah, ver. 7, and אָחֵר (Ἀόρ), Aher, 1 Chr. vii. 12. These fluctuations in the orthography seem to indicate that the original copies were partly effaced by time or injury [BECHER; CHRONICLES.] A. C. H.

EHUD (אֵהוּד [*union*]: [Ἀαθ,] Ααδ; [Alex. Αμειδ, Ωδ;] Joseph. Ἤουδης: *Aod*, [*Ahod*]), like Gera, an hereditary name among the Benjamites.

1. Ehud, the son of Bilhan, and great-grandson of Benjamin the Patriarch (1 Chr. vii. 10, viii. 6).

Digitized by Google

2. ['Αδί: *Aod.*] Ehud, the son of Gera (גֵּרָא: Γηρά: *Gera*; three others of the name. Gen. xlvi. 21; 2 Sam. xvi. 5; 1 Chr. viii. 3), of the tribe of Benjamin (Judg. iii. 15, marg "son of Jemini," but vid. Gesen. *Lex.* sub v. בִּנְיָמִין), the second Judge of the Israelites (B. C. 1336). In the Bible he is not called a Judge, but a *deliverer* (l. c.): so Othniel (Judg. iii. 9) and all the Judges (Neh. ix. 27). As a Benjamite he was specially chosen to destroy Eglon, who had established himself in Jericho, which was included in the boundaries of that tribe. [EGLON.] In Josephus he appears as a young man (*νεανίας*). He was very strong, and left-handed. So A. V.; but the more literal rendering is, as in margin, "shut of his right hand." The words are differently rendered: (1) left-handed, and unable to use his right; (2) using his left hand as readily as his right. For (1), are Targum, Joseph., Syr. (*impotem*), Arab. (*aridum*), and Jewish writers generally; Cajet., Buxtorf, Parkh., Gesen. (*impeditus*): derivation of אֵטֶר from אָטַר, the latter only in Ps. lxix. 15, where it = to shut. For (2), LXX. (ἀμφιδέξιος), Vulg. (*qui utrâque manu pro dextrâ utebatur*), Corn. a Lap., Bonfrer, Patrick (cf. περιδέξιος, Hom. *Il.* xxi. 163, Hipp. *Aph.* 7, 43); Judg. xx. 16, sole recurrence of the phrase, applied to 700 Benjamites, the picked men of the army, who were not likely to be chosen for a physical defect. As regards Ps. lxix. 15, it is urged that אָטַר may = *corono* = *aperio*; hence אָטֵר = *apertus* = *expeditus*, q. d. *expeditâ dextrâ*; or if "*clausus*," *clausus dextrâ* = *cinctus dextrâ* = περιδέξιος, *ambidexter* (vid. Pol. *Syn.*). The feint of drawing the dagger from the right thigh (Judg. iii. 21) is consistent with either opinion. For Ehud's adventures see EGLON; and for the period of eighty years' rest which his valor is said to have procured for the Israelites, see JUDGES. T. E. B.

EKER (עֵקֶר [a *rooting up*, perh. = *one transplanted, foreigner*]: Ἀκόρ; [Comp. Ἰκόρ:] *Achar*), a descendant of Judah through the families of Hezron and Jerahmeel (1 Chr. ii. 27).

EKREBEL (Ἐκρεβήλ; [Vat. Sin. Εγρεβηλ:] Peah. אֶכְרֶבַּת, *Ecrabat*: Vulg. omits), a place named in Jud. vii. 18 only, as "near to Chusi, which is on the brook Mochmur;" apparently somewhere in the hill country to the south-east of the Plain of Esdraelon and of Dothain. The Syriac reading of the word points to the place *Acrabbein*, mentioned by Eusebius in the *Onomasticon* as the capital of a district called *Acrabattine*, and still standing as *Akrabih*, about 6 miles south-east of *Nablûs* (Shechem), in the *Wady Makfûriyeh*, on the road to the Jordan valley (Van de Velde, ii. 304, and Map). Though frequently mentioned by Josephus (*B. J.* ii. 20, § 4, iii. 3, § 5, &c.), neither the place nor the district are named in the Bible, and they must not be confounded with those of the same name in the south of Judah. [AKRABBIM; ARABATTINE; MAALEH-ACRABBIM.] G.

EKRON (עֶקְרוֹן [*eradication*[a]]: ἡ Ἀκκαρών; [1 Sam. v. 10, xvii. 52[1st], Rom. Vat. Alex. Ἀσκάλων; so Rom. Vat. 1 Sam. vi. 16, vii. 14; Jer. xxv. 20, FA.[1] Ακκαρων:] *Accaron* [in Josh. xix. 43, *Acron*]), one of the five towns belonging to the lords of the Philistines, and the most northerly of the five (Josh. xiii. 3). Like the other Philistine cities its situation was in the *Shefelah*. It fell to the lot of Judah (Josh. xv. [11,] 45, 46; Judg. i. 18), and indeed formed one of the landmarks on his north border, the boundary running from thence to the sea at JABNEEL (*Yebna*). We afterwards, however, find it mentioned among the cities of Dan (Josh. xix. 43). But it mattered little to which tribe it nominally belonged, for before the monarchy it was again in full possession of the Philistines (1 Sam. v 10). Ekron was the last place to which the ark was carried before its return to Israel, and the mortality there in consequence seems to have been more deadly than at either Ashdod or Gath.[b] From Ekron to BETH-SHEMESH was a straight highway. Henceforward Ekron appears to have remained uninterruptedly in the hands of the Philistines (1 Sam. xvii. 52; 2 K. i. 2, 16; Jer. xxv. 20). Except the casual mention of a sanctuary of Baal-zebub existing there (2 K. i. 2, 3, 6, 16), there is nothing to distinguish Ekron from any other town of this district — it was the scene of no occurrence, and the native place of no man of fame in any way. The following complete the references to it, [1 Sam. vi. 16, 17, vii. 14;] Am. i. 8; Zeph. ii. 4; Zech. ix. 5, 7.

'Akîr, the modern representative of Ekron, lies at about 5 miles S. W. of *Ramleh*, and 3 due E. of *Yebna*, on the northern side of the important valley *Wady Surar*. "The village contains about 50 mud houses, without a remnant of antiquity, except two large finely built wells." The plain south is rich, but immediately round the village it has a dreary, forsaken appearance, only relieved by a few scattered stunted trees (Porter, *Handb.* p. 275; and see Van de Velde, ii. 169; Rob. ii. 228). In proximity to Jabneh (*Yebna*) and Beth-shemesh (*Ain Shems*), *Akir* agrees with the requirements of Ekron in the O. T., and also with the indications of the *Onomasticon* (s. v. *Accaron*). Jerome there mentions a tradition that the Turris Stratonis, Cæsarea, was Ekron.

In the Apocrypha it appears as ACCARON (1 Macc. x. 89, only) bestowed with its borders (τὰ ὅρια αὐτῆς) by Alexander Balas on Jonathan Maccabæus as a reward for his services. It was known in the Middle Ages by the same name. (See the quotation in Rob. ii. 228, *note*.)

The word EKRONITES appears in Josh. xiii. 3, and 1 Sam. v. 10. In the former it should be singular — "the Ekronite;" in the latter עֶקְרֹנִים. G.

[a] * There is a play on this meaning as well as the sound of the name in Zeph. ii. 4 (עֶקְרוֹן תֵּעָקֵר), only slightly apparent in the A. V. The Vulg. reminds us of the verbal assonance in its *Accaron eradicabitur*. H.

[b] The LXX. in both MSS., and Josephus (*Ant.* vi § 1), substitute Ascalon for Ekron throughout this passage (1 Sam. v 10–12). In support of this it should be remarked that, according to the Hebrew text, the golden trespass offerings were given for Askelon, though it is omitted from the detailed narrative of the journeyings of the ark. There are other important differences between the LXX. and Hebrew texts of this transaction. See especially ver. 6

EKRONITES, THE (הָעֶקְרוֹנִי, הָעֶקְרֹנִים: ὁ Ἀκκαρανίτης, οἱ Ἀσκαλωνῖται; [Vat. -νει-; Comp. Ἀκαρωνῖται:] *Accaronita*). The inhabitants of Ekron (Josh. xiii. 3; 1 Sam. v. 10). In the latter passage the LXX. read "Eshkalonites." W. A. W.

ELA (Ηλά: *Jolaman*), 1 Esdr. ix. 27. [ELAM.]

EL'ADAH (אֶלְעָדָה [*whom God adorns*; or *El's* (God's) *attire*, Fürst]: Ἐλαάδ, [Vat. Λααδα;] Alex. Ελεαδα: *Elada*), a descendant of Ephraim through Shuthelah (1 Chr. vii. 20).

ELAH. 1. (אֵלָה [*oak* or *terebinth*]: Ηλά; Joseph. Ηλανος: *Ela*), the son and successor of Baasha, king of Israel (1 K. xvi. 8–14); his reign lasted for little more than a year (comp. ver. 8 with 10). He was killed, while drunk, by Zimri, in the house of his steward Arza, who was probably a confederate in the plot. This occurred, according to Josephus (*Ant.* viii. 12, § 4), while his army and officers were absent at the siege of Gibbethon.

2. Father of Hoshea, the last king of Israel (2 K. xv. 30, xvii. 1). W. L. B.

ELAH. 1. (אֵלָה [*oak* or *terebinth*]: Ηλάς; [in 1 Chr. Ηλάς, Comp. Ald. Ηλά:] *Ela*), one of the dukes of Edom (Gen. xxxvi. 41; 1 Chr. i. 52). By Knobel (*Genesis*, ad loc.) the name is compared with Elath on the Red Sea. [DUKE.]

2. Shimei ben-Elah (accur. Ela, אֵלָא: Ηλά) was Solomon's commissariat officer in Benjamin (1 K. iv. 18).

3. (Ααδ; [Vat. Ηραδαι, Ηλα; Comp. Ηλά:] Alex. Αλα), a son of Caleb the son of Jephunneh (1 Chr. iv. 15). His sons were called Kenaz or Uknaz; but the words may be taken as if Kenaz was, with Elah, a son of Caleb. The names of both Elah and Kenaz appear amongst the Edomite "dukes."

4. (Ηλά; [Vat. om.;] Alex. Ηλα), son of Uzzi, a Benjamite (1 Chr. ix. 8), and one of the chiefs of the tribe at the settlement of the country.

ELAH, THE VALLEY OF (עֵמֶק הָאֵלָה = *Valley of the Terebinth*: ἡ κοιλὰς Ηλά, or τῆς δρυός, once ἐν τῇ κοιλάδι: *Vallis Terebinthi*), a valley in (not "by," as the A. V. has it) which the Israelites were encamped against the Philistines when David killed Goliath (1 Sam. xvii. 2, 19). It is once more mentioned in the same connection (xxi. 9). We have only the most general indications of its position. It lay somewhere near SOCOH of Judah, and Azekah, and was nearer Ekron than any other Philistine town. So much may be gathered from the narrative of 1 Sam. xvii. Socoh has been with great probability identified with *Suweikeh*, near to *Beit Netif*, some 14 miles S. W. of Jerusalem, on the road to *Beit Jibrin* and Gaza, among the more western of the hills of Judah, not far from where they begin to descend into the great Philistine Plain. The village stands on the south slopes of the *Wady es-Sunt*, or Valley of the Acacia, which runs off in a N. W. direction across the plain to the sea just above Ashdod. Below *Suweikeh* it is joined by two other wadys, large though inferior in size to itself, and the junction of the three forms a considerable open space of not less than a mile wide, cultivated in fields of grain. In the centre is a wide torrent bed thickly strewed with round pebbles, and bordered by the scanty bushes from which the valley derives its present name.

There seems no reason to doubt that this is the Valley of the Terebinth. It has changed its name and is now called after another kind of tree, but the terebinth (*Butm*) appears to be plentiful in the neighborhood, and one of the largest specimens in Palestine still stands in the immediate neighborhood of the spot. A mile down the valley from *Suweikeh* is *Tell Zakariyeh*, which Schwarz (p. 102) and Van de Velde propose to identify with Azekah. If this could be maintained, the site of the valley might be regarded as certain. Ekron is 17 miles, and Bethlehem 12 miles, distant from Socoh. For the valley, see Rob. ii. 20, 21; Van de Velde, ii. 191; Porter, *Handb.* pp. 249, 250 280. [See also Ritter's *Geogr. of Palestine*, Gage's trans. iii. 241; Porter's *Giant Cities*, &c., p. 222; Rob. *Phys. Geogr.* p. 117; and the references under DAVID, at the end.]

There is a point in the topographical indications of 1 Sam. xvii., which it is very desirable should be carefully examined on the spot. The Philistines were between Socoh and Azekah, at Ephes-dammim, or Pas-dammim, on the mountain on the S. side of the Wady, while the Israelites were in the "valley" (עֵמֶק) of the terebinth, or rather on the mountain on the N. side, and "the ravine" or "the glen" (הַגַּיְא), was between the two armies (ver. 2, 3). Again (ver. 52), the Israelites pursued the Philistines "till you come to 'the ravine'" (the same word). There is evidently a marked difference between the "valley" and the "ravine," and a little attention on the spot might do much towards elucidating this, and settling the identification of the place.

The traditional "Valley of the Terebinth" is the *Wady Beit Hanina*, which lies about 4 miles to the N. W. of Jerusalem, and is crossed by the road to *Nebi Samuel*. The scene of David's conflict is pointed out a little north of the "Tombs of the Judges" and close to the traces of the old paved road. But this spot is in the tribe of Benjamin, and otherwise does not correspond with the narrative of the text. G.

ELAM (עֵילָם: [In Gen.,] Ἐλάμ, [Alex. Αιλαμ; in 1 Chr., Jer. xlix., Ez., Dan. (Theodot.), Αἰλάμ; in Jer. xxv. 25, Alex.[1] FA.[1] omit, Alex.[2] Ald. Δαιδάν; in Is., Rom. Ελαμῖται; xi. 11, Vat. Αιλαμειται, Alex. Αιλαμιται; xxi. 2, xxii. 6, Vat. Alex. Ελαμειται; Dan. viii. 2 (LXX.), Ἐλυμαΐς:] *Ælam* [Gen. xiv. *Elamites*; Jer. xxv. 25, *Elam*]), like Aram, seems to have been originally the name of a man — the son of Shem (Gen. x. 22; 1 Chr. i. 17). Commonly, however, it is used as the appellation of a country (Gen. xiv. 1, 9; Is. xi. 11, xxi. 2, [xxii. 6;] Jer. xxv. 25, xlix. 34–39; Ez. xxxii. 24; Dan. viii. 2), and will be so treated in this article.

The Elam of Scripture appears to be the province lying south of Assyria, and east of Persis Proper, to which Herodotus gives the name of Cissia (iii. 91, v. 49, &c.), and which is termed Susis or Susiana by the geographers (Strab. xv. 3, § 12; Ptolem. vi. 3, &c.). It includes a portion of the mountainous country separating between the Mesopotamian plain and the high table-land of *Iran*, together with a fertile and valuable low tract at the foot of the range, between it and the Tigris

Digitized by Google

the passage of Daniel (viii. 2) which places Shushan (Susa) in "the province of Elam," may be regarded as decisive of this identification, which is further confirmed by the frequent mention of Elymæans in this district (Strab. xi 13, § 6, xvi. 1, § 17; Ptolem. vi. 3; Plin. *H. N.* vi. 26, &c.), as well as by the combinations in which Elam is found in Scripture (see Gen. xiv. 1; Is. xxi. 2; Ez. xxxii. 24). It appears from Gen. x. 22 that this country was originally peopled by descendants of Shem, closely allied to the Aramæans (Syrians) and the Assyrians; and from Gen. xiv. 1–12 it is evident that by the time of Abraham a very important power had been built up in the same region. Not only is "Chedor-laomer, king of Elam," at the head of a settled government, and able to make war at a distance of two thousand miles from his own country, but he manifestly exercises a supremacy over a number of other kings, among whom we even find Amraphel, king of *Shinar*, or Babylonia. It is plain then that at this early time the predominant power in Lower Mesopotamia was Elam, which for a while held the place possessed earlier by Babylon (Gen. x. 10), and later by either Babylon or Assyria. Discoveries made in the country itself confirm this view. They exhibit to us Susa, the Elamitic capital, as one of the most ancient cities of the East, and show its monarchs to have maintained, throughout almost the whole period of Babylonian and Assyrian greatness, a quasi-independent position. Traces are even thought to have been found of Chedor-laomer himself, whom some are inclined to identify with an early Babylonian monarch, who is called the "Ravager of the West," and whose name reads as *Kudur-mapula*. The Elamitic empire established at this time was, however, but of short duration. Babylon and Assyria proved on the whole stronger powers, and Elam during the period of their greatness can only be regarded as the foremost of their feudatories. Like the other subject nations she retained her own monarchs, and from time to time, for a longer or a shorter space, asserted and maintained her independence. But generally she was content to acknowledge one or other of the two leading powers as her suzerain. Towards the close of the Assyrian period she is found allied with Babylon, and engaged in hostilities with Assyria; but she seems to have declined in strength after the Assyrian empire was destroyed, and the Median and Babylonian arose upon its ruins. Elam is clearly a "province" of Babylonia in Belshazzar's time (Dan. viii. 2), and we may presume that it had been subject to Babylon at least from the reign of Nebuchadnezzar. [ELYMAIS.] The desolation which Jeremiah (xlix. 30–34) and Ezekiel (xxxii. 24–25) foresaw. was probably this conquest, which destroyed the last semblance of Elamitic independence. It is uncertain at what time the Persians added Elam to their empire. Possibly it only fell under their dominion together with Babylon; but there is some reason to think that it may have revolted and joined the Persians before the city was besieged. The prophet Isaiah in two places (xxi. 2, xxii. 6) seems to speak of Elam as taking part in the destruction of Babylon; and unless we are to regard him with our translators as using the word loosely for Persia, we must suppose that on the advance of Cyrus and his investment of the Chaldæan capital, Elam made common cause with the assailants. She now became merged in the Persian empire, forming a distinct satrapy (Herod. iii. 91), and furnishing to the crown an annual tribute of 300 talents. Susa, her capital, was made the ordinary residence of the court, and the metropolis of the whole empire, a curious circumstance, the causes of which will be hereafter considered. [SHUSHAN.] This mark of favor, did not, however, prevent revolts. Not only was the Magian revolution organized and carried out at Susa, but there seem to have been at least two Elamitic revolts in the early part of the reign of Darius Hystaspis (Behistun Inscr. col. i. par. 16, and col. ii. par. 3). After these futile efforts, Elam acquiesced in her subjection, and, as a Persian province, followed the fortunes of the empire.

It has been already observed that Elam is called Cissia by Herodotus, and Susiana by the Greek and Roman geographers. The latter is a term formed artificially from the capital city, but the former is a genuine territorial title, and marks probably an important fact in the history of the country. The Elamites, a Semitic people, who were the primitive inhabitants (Gen. x. 22), appear to have been invaded and conquered at a very early time by a Hamitic or Cushite race from Babylon, which was the ruling element in the territory from a date anterior to Chedor-laomer. These *Cush*ites were called by the Greeks *Cissians* (Κίσσιοι), or *Cosseans* (Κοσσαῖοι), and formed the dominant race, while the Elamites or Elymæans were in a depressed condition. In Scripture the country is called by its primitive title without reference to subsequent changes; in the Greek writers it takes its name from the conquerors. The Greek traditions of Memnon and his *Ethiopians* are based upon this Cushite conquest, and rightly connect the Cissians or Cosseans of Susiana with the Cushite inhabitants of the upper valley of the Nile. G. R.

2. [Ἰωλάμ; Alex., by inclusion of prec. name, Ιενουηλωλαμ.] A Korhite Levite, fifth son of Meshelemiah; one of the Bene-Asaph [sons of Asaph], in the time of King David (1 Chr. xxvi. 3).

3. [Αἰλάμ; Alex. Αηλαμ.] A chief man of the tribe of Benjamin, one of the sons of Shashak (1 Chr. viii. 24).

4. (Αἰλάμ, [Αἰλάμ,] Ἠλάμ; [in Ezr. ii. 7, Vat. Μαλαμ; viii. 7, Vat. Ηλα; Neh. vii. 12, FA. Ελαμ; 1 Esdr. v. 12, Vat. Ιωαμου; viii. 33, Alex. Ελαμ, Vat. (with foll. word) Λαμεσιας:] *Ælam* [in Ezr. viii. 7, *Alam*; 1 Esdr. v. 12, *Demu*, viii. 33, *Sala*].) "Children [sons] of Elam," *Bene-Elam*, to the number of 1254, returned with Zerubbabel from Babylon (Ezr. ii. 7; Neh. vii. 12; 1 Esdr. v. 12), and a further detachment of 71 men with Ezra in the second caravan (Ezr. viii. 7; 1 Esdr. viii. 33). It was one of this family, Shechaniah, son of Jehiel, who encouraged Ezra in his efforts against the indiscriminate marriages of the people (x. 2, *Ceti*, עֵילָם, Olam), and six of the Bene-Elam accordingly put away their foreign wives (x. 26). Elam occurs amongst the names of those, the chief of the people, who signed the covenant with Nehemiah (Neh. x. 14). The lists of Ezr. ii. and Neh. vii. contain apparently an irregular mixture of the names of places and of persons. In the former, ver. 21–34, with one or two exceptions, are names of places; 3–19, on the other hand, are not known as names of places, and are probably of persons. No such place as Elam is mentioned as in Palestine, either in the Bible or in the *Onomasticon* of Eusebius, nor has since been

Digitized by Google

discovered as existing in the country. We may therefore conclude that it was a person.

5. In the same lists is a second Elam, whose sons, to the same number as in the former case, returned with Zerubbabel (Ezr. ii. 31; Neh. vii. 34), and which for the sake of distinction is called "the other Elam" (עֵילָם אַחֵר: Ἠλαμάρ, Ἠλαμαάρ; [Comp. Ἠλάμ and Αἰλάμ ἕτερος:] *Ælam alter*). The coincidence of the numbers is curious, and also suspicious.

6. [Rom. Vat. om.; Alex. Αιλαμ; Comp. Ald. Ἐλάμ: *Ælam.*] One of the priests who accompanied Nehemiah at the dedication of the new wall of Jerusalem (Neh. xii. 42). G.

ELAMITES (עֵילָמָיֵא: [Vat. Ἠλαμαιοι for Δαναῖοι; Comp. Ἐλαμῖται;] Ἐλυμαῖοι, Strab. Ptol.: *Ælamitæ*). This word is found only in Ezra, iv. 9; and is omitted in that place by the Septuagint writers, who probably regarded it as a gloss upon "Susanchites," which had occurred only a little before. The Elamites were the original inhabitants of the country called Elam; they were descendants of Shem, and perhaps drew their name from an actual man, Elam (Gen. x. 22). It has been observed in the preceding article that the Elamites yielded before a Cossæan or Cushite invasion. They appear to have been driven in part to the mountains, where Strabo places them (xi. 13, § 6; xvi. 1, § 17), in part to the coast, where they are located by Ptolemy (vi. 3). Little is known of their manners and customs, or of their ethnic character. Strabo says they were skillful archers (xv. 3, § 10), and with this agree the notices both of Isaiah and Jeremiah, the latter of whom speaks of "the bow of Elam" (xlix. 35), while the former says that "Elam bare the quiver" (xxii. 6). Isaiah adds also in this place, that they fought both on horseback and from chariots. They appear to have retained their nationality with peculiar tenacity; for it is plain from the mention of them on the day of Pentecost (Acts ii. 9), that they still at that time kept their own language, and the distinct notice of them by Ptolemy more than a century later seems to show that they were not even then merged in the Cossæans. In Jud. i. 6 the name is given in the Greek form as ELYMÆANS. G. R.

EL'ASAH (אֶלְעָשָׂה [*God created*]: Ἠλασά: *Elasa*). 1. One of the Bene-Pashur [sons of Pashur], a priest, in the time of Ezra, who had married a Gentile wife (Ezra, x. 22). In the apocryphal Esdras, the name is corrupted to TALSAS.

2. (Ἐλεασάν, Alex. Ελεασαρ; [FA. Ελεαζαρ; Comp. Ἐλεάσα]). Son of Shaphan; one of the two men who were sent on a mission by King Zedekiah to Nebuchadnezzar at Babylon after the first deportation from Jerusalem, and who at the same time took charge of the letter of Jeremiah the Prophet to the captives in Babylon (Jer. xxix. 3).

Elasah is precisely the same name as ELEASAH, the latter being the more correct rendering of the Hebrew word.

E'LATH. E'LOTH (אֵילַת, אֵילוֹת [*trees*, usrh. *palm-trees*, Ges.; the former a collective singular, and hence = plural]: Αἰλάν, Αἰλάθ; [Αἰλάθ; 2 K. xiv. 22, Vat. Αιλωμ, Alex. Ελωθ; 2 K. xvi. 6, 2 Chr. viii. 17, Alex. Αιλαμ;] Joseph. *Ant.* Αἰλανή: *Elath, Ailath, Æloth, Aila*), the name of a town of the land of Edom, commonly mentioned together with EZIONGEBER, and situate at the head of the Arabian Gulf, which was thence called the Elanitic Gulf. It first occurs in the account of the wanderings (Deut. ii. 8), and in later times must have come under the rule of David in his conquest of the land of Edom, when "he put garrisons in Edom, throughout all Edom put he garrisons, and all they of Edom became David's servants" (2 Sam. viii. 14). We find the place named again in connection with Solomon's navy, "in Eziongeber, which is beside Eloth, on the shore of the Red Sea, in the land of Edom" (1 K. ix. 26; cf. 2 Chr. viii. 17). It was apparently included in the revolt of Edom against Joram recorded in 2 K. viii. 20; but it was taken by Azariah, who "built Elath, and restored it to Judah" (xiv. 22; [2 Chr. xxvi. 2]). After this, however, "Rezin king of Syria recovered Elath, and drave out the Jews from Elath, and the Syrians came to Elath and dwelt there to this day" (xvi. 6). From this time the place is not mentioned until the Roman period, during which it became a frontier town of the south, and the residence of a Christian bishop.

The Arabic name is *Eyleh* (أَيْلَة).

In the geography of Arabia, Eyleh forms the extreme northern limit of the province of the Hijáz (El-Makreezee, *Khitat;* and *Marásid*, s. v.; cf. ARABIA), and is connected with some points of the history of the country. According to several native writers the district of Eyleh was, in very ancient times, peopled by the Sameyda', said to be a tribe of the Amalekites (the first Amalek). The town itself, however, is stated to have received its name from Eyleh, daughter of Midian (El-Makreezee's *Khitat*, s. v.; Caussin's *Essai sur l'Hist. des Arabes*, i. 23). The Amalekites, if we may credit the writings of Arab historians, passed in the earliest times from the neighborhood of the Persian Gulf through the peninsula (spreading over the greater part of it), and thence finally passed into Arabia Petræa. Future researches may trace in these fragments of primeval tradition the origin of the Phœnicians. Herodotus seems to strengthen such a supposition when he says that the latter people came from the Erythræan Sea. Were the Phœnicians a mixed Cushite settlement from the Persian Gulf, who carried with them the known maritime characteristics of the peoples of that stock, developed in the great commerce of Tyre, and in that of the Persian Gulf, and, as a link between their extreme eastern and western settlements, in the fleets that sailed from Eziongeber and Elath, and from the southern ports of the Yemen? [See ARABIA; CAPHTOR; MIZRAIM.] It should be observed, however, that Tyrian sailors manned the fleets of Solomon and of Jehoshaphat.

By the Greeks and Romans, Elath was called Ἐλάνα (Ptol. v. 17, § 1), Αἴλανα (Strabo, xvi. 768; Plin. v. 12, vi. 32). Under their rule it lost its former importance with the transference of its trade to other ports, such as Berenice, Myos Hormos, and Arsinoë; but in Mohammedan times it again became a place of some note. It is now quite insignificant. It lies on the route of the Egyptian pilgrim-caravan, and the mountain-road, or 'Akabah named after it, was improved, or reconstructed, by Ahmad Ibn-Tooloon, who ruled Egypt from about A. D. 840 to 848. E. S. P.

* Near the present *'Akabah*, at the head of the Elanitic Gulf, are "extensive mounds of rubbish

Digitized by Google

indicating that a very ancient city has here utterly perished," remains which Dr. Robinson supposes to mark the site of Elath (*Bibl. Res.* i. 241, 1st ed.). Stanley (*S. & P.* p. 84) thinks that Elath stood on the spot where *'Akabah* itself now stands. See also Burckhardt's *Reisen*, p. 828. It may be correct to combine the two statements, inasmuch as the ancient town may have embraced a wider circuit than its modern successor. The propriety of the ancient name (see its import above) is attested by the palm-groves still found in that neighborhood. H.

EL-BETH'EL (אֵל בֵּית־אֵל = *God of the House of God:* LXX., both MSS. omit the "El," Βαιθήλ; and so also Vulg., *Domus Dei*, Syr. and Arabic versions), the name which Jacob is said to have bestowed on the place at which God appeared to him when he was flying from Esau (Gen. xxxv. 7). This account differs from the more detailed narrative in chap. xxviii., inasmuch as it places the bestowal of the name after the return from Mesopotamia. A third version of the transaction is given in xxxv. 15. [BETHEL, where see *note*, Amer. ed.] G.

ELCI'A ('Ελκία), one of the forefathers of Judith, and therefore belonging to the tribe of Simeon (Jud. viii. 1); what Hebrew name the word represents is doubtful. Hilkiah is probably Chelkias, two steps back in the genealogy. The Syriac version [with 5 Greek MSS.] has Elkana. In the Vulgate the names are hopelessly altered.

EL'DAAH (אֶלְדָּעָה, *whom God calls* [Ges.; *the knowing one*, Fürst]: 'Ελδαγά, 'Ελδαδά; [in 1 Chr. Vat., Ελλαδα, Alex. Ελδαα:] *Eldaa;* Gen. xxv. 4; 1 Chr. i. 33), the last, in order, of the sons of Midian. The name does not occur except in the two lists of Midian's offspring; and no satisfactory trace of the tribe which we may suppose to have taken the appellation has yet been found. E. S. P.

EL'DAD and ME'DAD (אֶלְדָּד [*whom God loves*, Ges.]: 'Ελδάδ καὶ Μωδάδ: *Eldad et Medad*), two of the 70 elders to whom was communicated the prophetic power of Moses (Num. xi. 16, 26). Although their names were upon the list which Moses had drawn up (xi. 26), they did not repair with the rest of their brethren to the tabernacle, but continued to prophesy in the camp. Moses being requested by Joshua to forbid this, refused to do so, and expressed a wish that the gift of prophecy might be diffused throughout the people. The great fact of the passage is the more general distribution of the spirit of prophecy, which had hitherto been concentrated in Moses; and the implied sanction of a tendency to separate the exercise of this gift from the service of the tabernacle, and to make it more generally available for the enlightenment and instruction of the Israelites, a tendency which afterwards led to the establishment of "schools of the prophets." The circumstance is in strict accordance with the Jewish tradition that all prophetic inspiration emanated originally from Moses, and was transmitted from him by a legitimate succession down to the time of the Captivity. The *mode* of prophecy in the case of Eldad and Medad was probably the extempore production of hymns, chanted forth to the people (Hammond): comp. the case of Saul, 1 Sam. x. 11.

From Num. x. 35, it appears that the gift was not merely intermittent, but a continuous energy though only occasionally developed in action.

T. E. B.

ELDER (זָקֵן: πρεσβύτερος: *senior*). The term *elder* or *old man*, as the Hebrew literally imports, was one of extensive use, as an official title, among the Hebrews and the surrounding nations. It applied to various offices; Eliezer, for instance, is described as the "old man of the house," *i. e.* the *major-domo* (Gen. xxiv. 2); the officers of Pharaoh's household (Gen. l. 7), and, at a later period, David's head servants (2 Sam. xii. 17) were so termed; while in Ez. xxvii. 9, the "old men of Gebal" are the *master-workmen*. As betokening a political office, it applied not only to the Hebrews, but also to the Egyptians (Gen. l. 7), the Moabites and Midianites (Num. xxii. 7). Wherever a patriarchal system is in force, the *office* of the *elder* will be found, as the keystone of the social and political fabric; it is so at the present day among the Arabs, where the Sheikh (= the *old man*) is the highest authority in the tribe. That the title originally had reference to age, is obvious; and age was naturally a concomitant of the office at all periods (Josh. xxiv. 31; 1 K. xii. 6), even when the term had acquired its secondary sense. At what period the transition occurred, in other words, *when* the word *elder* acquired an official signification, it is impossible to say. The earliest notice of the *elders* acting in concert as a political body is at the time of the Exodus. We need not assume that the order was then called into existence, but rather that Moses availed himself of an institution already existing and recognized by his countrymen, and that, in short, "*the* elders of Israel" (Ex. iii. 16, iv. 29) had been the *senate* (γερουσία, LXX.) of the people, ever since they had become a people. The position which the elders held in the Mosaic constitution, and more particularly in relation to the people, is described under CONGREGATION; they were the representatives of the people, so much so that *elders* and *people* are occasionally used as equivalent terms (comp. Josh. xxiv. 1, with 2, 19, 21; 1 Sam. viii. 4, with 7, 10, 19). Their authority was undefined, and extended to all matters concerning the public weal; nor did the people question the validity of their acts, even when they disapproved of them (Josh. ix. 18). When the tribes became settled, the elders were distinguished by different titles according as they were acting as national representatives ("elders of Israel," 1 Sam. iv. 3; 1 K. viii. 1, 3; "of the land," 1 K. xx. 7, "of Judah," 2 K. xxiii. 1; Ez. viii. 1), as district governors over the several tribes (Deut. xxxi. 28; 2 Sam. xix. 11), or as local magistrates in the provincial towns, appointed in conformity with Deut xvi. 18, whose duty it was to sit in the gate and administer justice (Deut. xix. 12, xxi. 3 ff., xxii. 15; Ruth iv. 9, 11; 1 K. xxi. 8; Jud. x. 6); their number and influence may be inferred from 1 Sam. xxx. 26 ff. They retained their position under all the political changes which the Jews underwent: under the Judges (Judg. ii. 7, viii. 14, xi. 5; 1 Sam. iv. 3, viii. 4); under the kings (2 Sam. xvi[3] 4; 1 K. xii. 6, xx. 8, xxi. 11); during the Captivity (Jer. xxix. 1; Ez. viii. 1, xiv. 1, xx. 1); subsequently to the return (Ezr. v. 5, vi. 7, 14, x. 8, 14); under the Maccabees,[a] when they were de

[a] Some difficulty arises at this period from the notice in 1 Macc. xiv. 28 of a double body, ἀφ' ἑαυτοῦ

Digitized by Google

scribed sometimes as the *senate* (γερουσια, 1 Macc. xii. 6; 2 Macc. i. 10, iv. 44, xi. 27; Joseph. *Ant.* xii. 3, § 3), sometimes by their ordinary title (1 Macc. vii. 33, xi. 23, xii. 35); and, lastly, at the commencement of the Christian era, when they are noticed as a distinct body from the Sanhedrim, but connected with it as one of the classes whence its members were selected, and always acting in conjunction with it and the other dominant classes. [SANHEDRIM.] Thus they are associated sometimes with the Chief Priests (Matt. xxi. 23), sometimes with the Chief Priests and the Scribes (Matt. xvi. 21), or the Council (Matt. xxvi. 59), always taking an active part in the management of public affairs. St. Luke describes the whole order by the collective term πρεσβυτέριον (Luke xxii. 66; Acts xxii. 5). In Matt. xv. 2, and Heb. xi. 2, "elders" is expressive of time rather than office. For the position of the elders in the synagogue and the Christian Church, see SYNAGOGUE, BISHOP. W. L. B.

EL'EAD (אֶלְעָד [*God defender*]: Ἐλεάδ: *Elad*), a descendant of Ephraim (1 Chr. vii. 21), but whether through Shuthelah, or a son of the patriarch (the second Shuthelah being taken as a repetition of the first, and Ezer and Elead as his brothers) is not to be determined (see Bertheau, *Chronik*, p. 82).

ELEA'LEH (אֶלְעָלֵה [*whither God ascends*, Ges.]: Ἐλεαλή; [Num. xxxii. 37, Rom. Ἐλεαλήν, Vat. Ελεαλημ; Is., Alex. ελαλησεν:] *Eleale*), a place on the east of Jordan, in the pastoral country, taken possession of and rebuilt by the tribe of Reuben (Num. xxxii. 3, 37). We lose sight of it till the time of Isaiah and Jeremiah, by both of whom it is mentioned as a Moabite town, and, as before, in close connection with Heshbon (Is. xv. 4, xvi. 9; Jer. xlviii. 34). The extensive ruins of the place are still to be seen, bearing very nearly their ancient name, *El-A'al*, though with a modern signification, "the high," a little more than a mile N. of Heshbon. It stands on the summit of a rounded hill, commanding a very extended view of the plain, and the whole of the southern *Belka* (Burckh. *Syr.* p. 365; Seetzen, 1854, i. 467). It is from this commanding situation that it doubtless derives its name, which, like many other names of modern Palestine, is as near an approach to the ancient sound as is consistent with an appropriate meaning. G.

ELE'ASA (Ἐλεασά; Alex. Αλασα; [Sin. Ελασα:] *Laisa*), a place at which Judas Maccabæus encamped before the fatal battle with Bacchides, in which he lost his life (1 Macc. ix. 5). It was apparently not far from Azotus (comp. 15). Josephus (*Ant.* xii. 11, § 1) has Bethzetho, by which he elsewhere renders Bezeth. But this may be but a corrupt reading of Berzetha or Bethzetha, which is found in some MSS. for Berea in 1 Macc. ix. 4. Another reading is Adasa, where Judas had encamped on a former memorable occasion (vii. 40). It is singular that Bezeth should be mentioned in this connection also (see ver. 19). G.

* Some have proposed to change the reading to Αδασα (Reland, Grotius), but no such reading is actually found. According to Ewald (*Gesch. Isr.* iii 2, 370 ff.) the place must be sought not far north of Jerusalem. See Rüetschi in Herzog's *Real-Encykl.* iii. 750. Judas pursued Bacchides as far as to Azotus (1 Macc. ix. 15), but how far he followed him before approaching this place, and from what direction, is unknown. H.

ELE'ASAH (אֶלְעָשָׂה [*God made*]: Ελεασά; [Vat. Εμας:] *Elasa*). 1. Son of Helez, one of the descendants of Judah, of the family of Hezron (1 Chr. ii. 39).

2. (Ἐλασά; Alex. Ελεασα; [1 Chr. viii. 37, Vat. Σαλασαθ; ix. 43, Vat. Sin. om.]) Son of Rapha, or Rephaiah; a descendant of Saul through Jonathan and Merib-baal or Mephibosheth (1 Chr. viii. 37, ix. 43).

This name is elsewhere rendered in the A. V. ELASAH.

ELEA'ZAR (אֶלְעָזָר [*God's help*]: Ἐλεάζαρ: *Eleazar*). 1. Third son of Aaron, by Elisheba, daughter of Amminadab, who was descended from Judah, through Pharez (Ex. vi. 23, 25; xxviii. 1; for his descent see Gen. xxxviii. 29, xlvi. 12; Ruth iv. 18, 20). After the death of Nadab and Abihu without children (Lev. x. 1; Num. iii. 4), Eleazar was appointed chief over the principal Levites, to have the oversight of those who had charge of the sanctuary (Num. iii. 32). With his brother Ithamar he ministered as a priest during their father's lifetime, and immediately before his death was invested on Mount Hor with the sacred garments, as the successor of Aaron in the office of high-priest (Num. xx. 28). One of his first duties was in conjunction with Moses to superintend the census of the people (Num. xxvi. 3). He also assisted at the inauguration of Joshua, and at the division of spoil taken from the Midianites (Num. xxvii. 22, xxxi. 21). After the conquest of Canaan by Joshua he took part in the distribution of the land (Josh. xiv. 1). The time of his death is not mentioned in Scripture; Josephus says it took place about the same time as Joshua's, 25 years after the death of Moses. He is said to have been buried in "the hill of Phinehas" his son (Ges. p 260), where Josephus says his tomb existed (*Ant* v. 1, § 29); or possibly a town called Gibeath-Phinehas (Josh. xxiv. 33). The high-priesthood is said to have remained in the family of Eleazar until the time of Eli, a descendant of Ithamar, into whose family, for some reason unknown, it passed until it was restored to the family of Eleazar in the person of Zadok (1 Sam. ii. 27; 1 Chr. vi. 8, xxiv. 3; 1 K. ii. 27; Joseph. *Ant.* viii. 1, § 3). [This Eleazar is mentioned 1 Esdr. viii. 2; Ecclus. xlv. 23.]

2. The son of Abinadab, of the "hill" (גִּבְעָה) of Kirjath-jearim, consecrated by the people of that place to take care of the ark after its return from the Philistines (1 Sam. vii. 1).

3. [In 2 Sam., Rom. Vat. Ἐλεαρδν.] The son of Dodo the Ahohite (דֹּדַי הָאֲחֹחִי), i. e. possibly a descendant of Ahoah of the tribe of Benjamin (1 Chr. viii. 4); one of the three principal mighty men of David's army, whose exploits are recorded 2 Sam. xxiii. 9; 1 Chr. xi. 12.

4. [In 1 Chr. xxiii. 21, Alex. Ελιαζαρ.] A Merarite Levite, son of Mahli, and grandson of Merari. He is mentioned as having had only daughters, who were married by their "brethren"

δήμου, and πρεσβύτεροι τῆς χώρας; and again in 3 Macc. i. 8, γερουσία and πρεσβύτεροι: the second term may refer to the municipal authorities, as is perhaps implied in the term χώρα. The identity of the γερουσία and the πρεσβύτεροι in other passages, is clear from 1 Macc. xii. 6, compared with 35.

Digitized by Google

i. e. their cousins) (1 Chr. xxiii. 21, 22; xxiv. 28).

5. [Rom. Vat. om.] A priest who took part in the feast of dedication under Nehemiah (Neh. xii. 42).

6. [In 1 Esdr., Ἐλεάζαρος; in Ezr., Alex. Ἐλεαζα: Vulg. *Eliezer*.] One of the sons of Parosh; an Israelite (*i. e.* a layman) who had married a foreign wife, and had to put her away (Ezr. x. 25; 1 Esdr. ix. 26).

7. Son of Phinehas a Levite (Ezr. viii. 33; 1 Esdr. viii. 63).

* 7 a. (Ἐλεάζαρος: *Eleazarus*.) One of the "principal men and learned," who went up to Jerusalem with Ezra (1 Esdr. viii. 43). A.

8. ELEAZAR (Ἐλεάζαρ; [2 Macc. viii. 23, and] Joseph. Ἐλεάζαρος: [*Eleazarus, Eleazar*]), surnamed AVARAN (1 Macc. ii. 5, Αὐαράν, or Αὐράν, and so Joseph. *Ant.* xii. 6, § 1; 9, § 4. In 1 Macc. vi. 43, the common reading ὁ Σαυαράν arises either from the insertion of C by mistake after O, or from a false division of Ἐλεάζαρος Αὐαράν). The fourth son of Mattathias, who fell by a noble act of self-devotion in an engagement with Antiochus Eupator, B. C. 164 (1 Macc. vi. 43 ff.; Joseph. *Ant.* xii. 19, § 4; *B. J.* i. 1, § 5; Ambr. *de Offic. Min.* i. 40). In a former battle with Nicanor, Eleazar was appointed by Judas to read "the holy book" before the attack, and the watchword in the fight — "the help of God" — was his own name (2 Macc. viii. 23).

The surname is probably connected with Arab. *hawara*, "to pierce an animal behind" (Mich. *sub* roc.). This derivation seems far better than that of Rödiger (Ersch u. Gruber, *s. v.*) from Arab. *khavaran*, "an elephant-hide." In either case the title is derived from his exploit.

9. A distinguished scribe (Ἐλεάζαρος . . . τῶν πρωτευόντων γραμματέων, 2 Macc. vi. 18) of great age, who suffered martyrdom during the persecution of Antiochus Epiphanes (2 Macc. vi. 18–31). His death was marked by singular constancy and heroism, and seems to have produced considerable effect. Later traditions embellished the narrative by representing Eleazar as a priest (*De Macc.* 5), or even high-priest (Grimm, *ad Macc.* l. c.). He was also distinguished by the nobler title of "the proto-martyr of the old covenant," "the foundation of martyrdom" (Chrys. *Hom.* 3 *in Macc.* init. Cf. Ambr. *de Jacob.* ii. 10).

For the general credibility of the history compare Grimm, *Excurs über* 2 *Macc.* vi. 18–vii. in *Exeg. Handb.*; also Ewald, *Gesch.* iv. 341, 532. [MACCABEES.]

The name Eleazar [Ἐλεάζαρος] in 3 Macc. vi. appears to have been borrowed from this Antiochian martyr, as belonging to one weighed down by age and suffering and yet "helped by God." (For the name comp. LAZARUS, Luke xvi. 19–25.)

10. [Ἐλεάζαρος: *Eleazarus*.] The father of Jason, ambassador from Judas Maccabæus to Rome. [1 Macc viii. 17.)

11. The son of Eliud, three generations above Joseph, the husband of the Virgin Mary (Matt. i. 15). B. F. W.

ELEAZU'RUS (Ἐλιάσεβος; Alex. Ελιασιβος; [Ald. Ἐλιάζουρος; Wechel (1597), Ἐλιέζουρος:] *Eliasib*), 1 Esdr. ix. 24. [ELIASHIB.] It is difficult to see where the translators of the A. V. got the form of this name there given.

* The form in the Bishop's Bible and the Geneva version is Eliazurus, which differs in but a single letter from the reading of two of the editions noted above. It may have easily arisen from a misprint in one of the early editions derived from the Aldine. A.

* **ELECT LADY, THE** (ἐκλεκτὴ κυρία: *electa domina*), 2 John, 1. [JOHN, SECOND AND THIRD EPISTLES OF.]

EL ELO'HE IS'RAEL (אֵל אֱלֹהֵי יִשְׂרָאֵל = *Almighty* [*Mighty one*], *God of Israel* · καὶ ἐπεκαλέσατο τὸν θεὸν Ἰσραήλ: *Fortissimum Deum Israel*), the name bestowed by Jacob on the altar which he erected facing the city of Shechem, in the piece of cultivated land upon which he had pitched his tent, and which he afterwards purchased from the Bene-Hamor (Gen. xxxiii. 19, 20).

* **ELEMENTS.** The expression "the *elements* of the world," τὰ στοιχεῖα τοῦ κόσμου, in Gal. iv. 3 ("even so we, when we were children, were in bondage under the elements of the world;" comp. ver. 9, and Col. ii. 8, 20, where στοιχεῖα is translated *rudiments*), has received a wide diversity of interpretations, which cannot be here specified. (See Meyer, *in loc.*) It appears to refer particularly to the outward observances and burdensome rites common to Jewish and heathen worship (see Gal. iv. 9, 10, and Col. ii. 20–23), and belonging to a very imperfect state of religious knowledge, — "the rudiments" or "elementary discipline of the world," "weak and beggarly," in contrast with the spirituality, renovating power, and enlightened freedom of Christianity. A.

E'LEPH (אֶלְעָלֵה = *the Ox*: Ἐλεηκάν, Alex. Ἐηλαλεφ — both by including the preceding name: *Eleph*), one of the towns allotted to Benjamin, and named next to Jerusalem (Josh. xviii. 28). The signification of the name may be taken as an indication of the pastoral pursuits of its inhabitants. The LXX. read Zelah and Eleph as one name, possibly owing to the "and" between them having been dropped; but if this is done, the number of 14 cities cannot be made up. The Peshito has ܓܒܥܐ *Gebro*, for Eleph; but what the origin of this can be is not obvious. G.

ELEPHANT. The word does not occur in the text of the canonical Scriptures of A. V., but is found as the marginal reading to *Behemoth*, in Job xl. 15. "*Elephants' teeth*" is the marginal reading for "*ivory*" in 1 K. x. 22; 2 Chr. ix. 21. Elephants, however, are repeatedly mentioned in the 1st and 2d books of Maccabees, as being used in warfare. The way in which they were used in battle, and the method of exciting them to fight, is described in the 6th chap. of 1 Macc. For the meaning of *Behemoth*, see BEHEMOTH. For the meaning of שִׁנְהַבִּים, see IVORY. W. D.

ELEUTHEROP'OLIS (Ἐλευθεροπολις, *the free city*), a town of southern Palestine, situated at the foot of the hills of Judah, on the borders of the great plain of Philistia. It is about 25 miles from Jerusalem on the road to Gaza. It is not mentioned in Scripture; but it became in the early centuries of the Christian era one of the most important and flourishing towns in the country. Its ancient name was *Betogabra* (Βαιτογάβρα, *the House of Gabra or Gabrael*), which first occurs in the writings of Ptolemy in the beginning

Digitized by Google

of the 2d century (ch. xvi.). Josephus refers to a large village called Βήταρις (in Rufinus's copy Βήγαβρις) in this region, which may be the same (*B. J.* iv. 8, § 1). It is found in the Peutinger Tables as *Betogabri* (Reland, *Pal.* p. 421). Its new name, Eleutheropolis, first occurs upon coins in the time of the emperor Septimius Severus (A. D. 202–3; Eckhel, iii. 488). That emperor during his visit to Palestine conferred important privileges on several cities, and this was one of the number. Eusebius is the first writer who mentions Eleutheropolis (*Onom.* s. v.), which was in his time the capital of a large province. It was the seat of a bishop, and was so well known that he made it the central point in Southern Palestine from which the positions of more than 20 other towns were determined. Epiphanius, the well-known writer, was born in a village three miles from the city, in the beginning of the 4th century, and is often called an Eleutheropolitan (Reland, pp. 751, 752). In the year A. D. 796, little more than a century and a half after the Saracenic conquest, Eleutheropolis was razed to the ground, and left completely desolate. The Greek language now gave place to the Arabic; and this city lost its proud name, and its prouder rank together (Reland, p. 987). Like so many other cities, the old name, which had probably never been lost to the peasantry, was revived among writers; and we thus find *Beigeberin*, or some form like it, constantly in use after the 8th century. In the 12th century the Crusaders found the place in ruins, and built a fortress on the old foundations; the remains of which, and the chapel connected with it, still exist. After the battle of Hattin, *Beit Jibrin*, for such is its Arabic name, fell into the hands of the Saracens. It was retaken by King Richard of England, but it was finally captured by Bibars (see Will. Tyr. 14, 22; Jac. de Vit. in *Gesta Dei*, pp. 1070, 1071; Bohaëddin, *Vit. Salad.* p. 229). It has since crumbled to ruin under the blight of Mohammedan rule.

Several curious traditions have found a "local habitation" at *Beit Jibrin*. One places here the miraculous fountain which sprang from the jawbone Samson wielded with such success against the Philistines (Anton. Mart. *Itin.* 30, 32).

The modern village contains some 50 or 60 houses. It is situated in a little nook, in the side of a long green valley. The ancient ruins are of considerable extent; they consist of the remains of a strong fortress standing within an irregular inclosure encompassed by a massive wall. A great part of this outer wall is completely ruinous; but the north side, which skirts the bank of the valley, is still several feet high. The inclosure is about 600 ft. in diameter. The fortress is about 200 ft. square, and is of a much later date than the outer wall; an Arabic inscription over the gateway bears the date A. H. 958 (A. D. 1551). Along its south side are the walls and part of the groined roof of a fine old chapel — the same, doubtless, which was built by the Crusaders.

The valley, on the side of which the ruins of Eleutheropolis lie, runs up among the hills for two miles or more south-by-east. On each side of it are low ridges of soft limestone, which rises here and there in white bare crowns over the dark shrubs. In these ridges are some of the most remarkable caverns in Palestine. They are found together in clusters, and form subterranean villages. Some are rectangular, 100 ft. and more in length, with smooth walls and lofty arched roofs. Others are bell-shaped — from 40 to 70 ft. in diameter, by nearly 60 ft. in height — all connected together by arched doorways and winding subterranean passages. A few are entirely dark; but most of them are lighted by a circular aperture at the top. They occur at short intervals along both sides of the whole valley; and the writer also saw them at several other neighboring villages. We learn from history that the Idumæans [EDOMITES] came, during the Babylonish Captivity, and occupied the greater part of southern Palestine. Jerome says they inhabited the whole country extending from Eleutheropolis to Petra and Elah; and that *they dwelt in caves* — preferring them both on account of their security, and their coolness during the heat of summer (*Comm. in Obad.*). These remarkable caves, therefore, were doubtless the work of the Idumæans. (See *Handbook for Syria and Palestine*, p. 255 ff.; Robinson's *Biblical Researches*, 2d ed. ii. 23, 57 ff.) J. L. P.

ELEUTHERUS (Ἐλεύθερος), a river of Syria mentioned in 1 Macc. xi. 7, xii. 30. In early ages it was a noted border stream. According to Strabo it separated Syria from Phœnicia (xvi. 753), and formed the northern limit of Cœle-Syria. Josephus informs us that Antony gave Cleopatra "the cities that were within the river Eleutherus, as far as Egypt, except Tyre and Sidon" (*Ant.* xv. 4, § 1; *B. J.* i. 18, § 5). A careful examination of the passages in Num. xxxiv. 8–10 and Ez. xlvii. 15–17, and a comparison of them with the features of the country, lead the present writer to the conclusion that this river also formed, for so far, the northern border of the "Promised Land" (*Five Years in Damascus*, ii. 354 f.). Pliny says that at a certain season of the year it swarmed with tortoises (ix. 10).

Of the identity of the Eleutherus with the modern *Nahr-el-Kebîr*, "Great River," there cannot be a doubt. Its highest source is at the northeastern base of Lebanon; it sweeps round the northern end of the range, through the opening called in Scripture "the entrance of Hamath" (Num. xxxiv. 8); and, after receiving several small tributaries from the heights of Lebanon, it falls into the Mediterranean, about 18 miles north of Tripolis. It still forms the boundary between the provinces of *Akkâr* and *el-Husn*. During summer and autumn it is but a small stream, easily forded; but in winter it swells into a large and rapid river.

J. L. P.

* **ELEU'ZAI** (3 syl.) is the reading of the A. V. ed. 1611 in 1 Chr. xii. 5 for ELUZAI. A.

ELHA'NAN (אֶלְחָנָן [*God who is gracious*]: Ἐλεανάν; [in 1 Chr., Vat. Ελλαν:] *Adeodatus*). 1. A distinguished warrior in the time of King David, who performed a memorable exploit against the Philistines, though in what that exploit exactly consisted, and who the hero himself was, it is not easy to determine.

(1.) 2 Sam. xxi. 19 says that he was the "son of Jaare Oregim the Bethlehemite," and that he "slew Goliath the Gittite, the staff of whose spear was like a weaver's beam." Here, in the A. V. the words "the brother of" are inserted, to bring the passage into agreement with,

(2.) 1 Chr. xx. 5, which states that "Elhanan son of Jair (or Jaor), slew Lahmi, the brother of Goliath the Gittite, the staff of whose spear," &c.

Of these two statements the latter is probably

Digitized by Google

the more correct — the differences between them being much smaller in the original than in English. We must refer the reader to the Hebrew for the comparison of the two,[a] the discrepancies in which are not greater than those known to exist in other corrupt passages, but the following are the grounds of our decision.

(*a.*) The word *Oregim* exists twice in the verse in Samuel, first as a proper name, and again at the end — "weavers." The former has probably been taken in by an early transcriber from the latter, i. e. from the next line of the MSS. To the end of the verse it certainly belongs, since it is found in the parallel passage of Chron., and also forms part of what seems to have been a proverbial description of Goliath (comp. 1 Sam. xvii. 7). The chances are very much against the same word — and that not a common one — forming part of one verse in two capacities.

(*b.*) The statement in 2 Sam. xxi. 19 is in contradiction to the narrative of 1 Sam. xvii., according to which Goliath the Gittite was killed by David.[b] True, Ewald (*Gesch.* iii. 91, 92) — from the fact that David's antagonist is, with only 3 exceptions (one of them in the doubtful verses, xvii. 12–32), called "the Philistine," and for other linguistic reasons — has suggested that Elhanan was the real victor of Goliath, and that after David became king the name of Goliath was attached to the nameless champion whom he killed in his youth. But against this is the fact that Goliath *is* named thrice in 1 Sam. xvii. and xxi. — thrice only though it be; and also that Elhanan's exploit, from its position both in Samuel and in Chronicles, and from other indications, took place late in David's reign. and when he had been so long king and so long renowned, that all the brilliant feats of his youth must have been brought to light, and well known to his people. It is recorded as the last but one in the series of encounters of what seems to have been the closing struggle with the Philistines. It was so late that David had acquired among his warriors the fond title of "the light of Israel" (2 Sam. xxi. 17), and that his nephew Jonathan was old enough to perform a feat rivalling that of his illustrious uncle years before. It was certainly after David was made king, for he goes down to the fight, not with his "young men" (נְעָרָיו),[c] as when he was leading his band during Saul's life, but with his "servants" (עבדיו), literally his "slaves," a term almost strictly reserved for the subjects of a king. The vow of his guard, on one of these occasions, that it should be his last appearance in the field, shows that it must have been after the great Ammonite war, in which David himself had led the host to the storming of Rabbah (2 Sam. xii. 29). It may have been between this last event and the battle with Absalom beyond Jordan, though there are other obvious reasons why David stayed within the walls of Mahanaim on that occasion.

On the whole, therefore, though the question is beset with difficulties, the just conclusion appears to be that the reading in Chronicles is the more correct one, according to which Elhanan is the son of Jair,[d] and slew Lachmi the brother of Goliath.

Jerome in his *Quæst. Hebr.* on both passages — he does not state whether from ancient tradition or not — translates Elhanan into *Adeodatus*, and adds *filius saltûs polymitarius Bethlehemites* — "the son of a wood, a weaver, a Bethlehemite." Adeodatus, he says, is David, which he proves not only by arguments drawn from the meaning of each of the above words, but also from the statement in the concluding verse of the record that all these giants "fell by the hand of David and by the hand of his servants," and as Elhanan slew Goliath, Elhanan must be David.

2. [*Elehanan, Elchanan.*] The son of Dodo of Bethlehem, one of "the thirty" of David's guard, and named first on the list (2 Sam. xxiii. 24; 1 Chr. xi. 26). See Kennicott's *Dissertation*, p. 179.

The same name is also found with Baal substituted for El, — BAAL-HANAN. (Comp. BEKLIADA.) G.

E'LI (עֵלִי [*ascent, elevation*, and concr. *the highest*, Ges.]: Ἠλί; [Vat. Alex. Ηλει:] Ἠλεί, Joseph.: *Heli*), was descended from Aaron through Ithamar, the youngest of his two surviving sons (Lev. x. 1, 2, 12), as appears from the fact that Abiathar, who was certainly a lineal descendant of Eli (1 K. ii. 27), had a son, Ahimelech, who is expressly stated to have been "of the sons of Ithamar" (1 Chr. xxiv. 3; cf. 2 Sam. viii. 17). With this accords the circumstance that the names of Eli and his successors in the high-priesthood up to, and including, Abiathar, are not found in the genealogy of Eleazar (1 Chr. vi. 4–15; cf. Ezr. vii. 1–5). As the history makes no mention of any high-priest of the line of Ithamar before Eli, he is generally supposed to have been the first of that line who held the office. (Ἦλει πρώτου ταύτην [ἀρχιερωσύνην] παραλαβόντος, Joseph. *Ant.* viii. 1, § 3.) From him, his sons having died before him, it appears to have passed to his grandson, Ahitub (1 Sam. xiv. 3; Josephus, however, says Φινεέσης δὲ ἤδη καὶ Ἱερῶτο, τοῦ πατρὸς αὐτῷ παρακεχωρηκότος διὰ τὸ γῆρας, *Ant.* v. 11, § 2), and it certainly remained in his family till Abiathar, the grandson of Ahitub, was "thrust out from being priest unto the Lord" by Solomon for his share in Adonijah's rebellion (1 K. ii. 26, 27, i. 7), and the high-priesthood passed back again to the family of Eleazar in the person of Zadok (1 K. ii. 35). How the office ever came into the younger branch of the house of Aaron we are not informed, though there is reason to suppose that its doing so was sanctioned by God (1 Sam. ii. 30). Its return

[a] It will be found fully examined in Kennicott's *Dissertation*, p. 78.

[b] * This statement assumes that the two passages referred to must relate to the same occurrence. On that point see remarks in the addition under DAVID, note, p. 554. Mr. Deutsch in his art. on "Elhanan" (Kitto's *Cycl. of Bibl. Literature*, 3d ed.) deals with the question as one of textual emendation H.

[c] Nothing can be more marked than this distinction. Na'ar (נַעַר) is used almost invariably for David's followers up to the death of Saul, and then at once the term changes, and *Ebed* (עֶבֶד), a "slave," is as exclusively employed. Even Absalom's people go by the former name. This will be evident to any one who will look into the quotations under the two words in that most instructive book, *The Englishman's Hebrew Concordance*.

[d] Ewald has overcome the difficulty of the two discrepant passages by a curious eclectic process. From Chronicles he accepts the name "Jair," but rejects "Lahmi, the brother of" From Samuel he takes "the Bethlehemite," and rejects "Oregim."

Digitized by Google

to the elder branch was one part of the punishment which had been denounced against Eli during his lifetime, for his culpable negligence in contenting himself with mere verbal reprimand (1 Sam. ii. 22–25) instead of active paternal and judicial restraint (iii. 13), when his sons, by their rapacity and licentiousness, profaned the priesthood, and brought the rites of religion into abhorrence among the people (1 Sam. ii. 27–36, with 1 K. ii 27). Another part of the same sentence (ver. 31–33) appears to have been taking effect in the reign of David, when we read, that "there were more chief men found of the sons of Eleazar than of the sons of Ithamar," sixteen of the former, and only eight of the latter (1 Chr. xxiv. 4). Notwithstanding this one great blemish, the character of Eli is marked by eminent piety, as shown by his meek submission to the divine judgment (1 Sam. iii. 18), and his supreme regard for the ark of God (iv. 18). In addition to the office of high-priest he held that of judge, being the immediate predecessor of his pupil Samuel (1 Sam. vii. 6, 15–17), the last of the judges. The length of time during which he judged Israel is given as 40 years in our present Hebrew copies, whereas the LXX. make it 20 years (εἴκοσιν ἔτη, 1 Sam. iv. 18). It has been suggested in explanation of the discrepancy, that he was *sole* judge for 20 years, after having been co judge with Samson for 20 years (Judg. xvi. 31). He died at the advanced age of 98 years (1 Sam. iv. 15), overcome by the disastrous intelligence that the ark of God had been taken in battle by the Philistines, who had also slain his sons Hophni and Phinehas. [ABIATHAR; ELEAZAR; ITHAMAR.] (See Lightfoot's *Works*, vol. i. pp. 53, 907, fol. Lond. 1684; Selden, *de Success. in Pontif. Hebr.* lib. i. cap. 4.) T. T. P.

* Stanley (*Jewish Church*, i. 421 ff.) has drawn a touching picture of the circumstances of Eli's sad end. "In the evening of the same day [on which the Philistines defeated the Hebrews] there rushed through the vale of Shiloh a youth from the camp, one of the active tribe of Benjamin, — his clothes torn asunder, and his hair sprinkled with dust, as the two oriental signs of grief and dismay. A loud wail, like that which on the announcement of any great calamity runs through all Eastern towns, rang through the streets of the expectant city. The aged high-priest was sitting in his usual place beside the gate-way of the sanctuary. He caught the cry; he asked the tidings. He heard the defeat of the army; he heard the death of his two sons; he heard the capture of the Ark of God. It was this last tidings, 'when mention was made of the Ark of God,' that broke the old man's heart. He fell from his seat and died in the fall." H.

ELI'AB (אֱלִיאָב [*God is father*]: Ἐλιάβ: *Eliab*). 1. Son of Helon and leader of the tribe of Zebulun at the time of the census in the wilderness of Sinai (Num. i. 9, ii. 7, vii. 24, 29, x. 16).

2. A Reubenite, son of Pallu or Phallu, whose family was one of the principal in the tribe; and father or progenitor of Dathan and Abiram, the leaders in the revolt against Moses (Num. xxvi. 8, 9, xvi. 1, 12; Deut. xi. 6). Eliab had another son named NEMUEL, and the record of Num. xxvi. is interrupted expressly to admit a statement regarding his sons.

3. [In 2 Chr., Vat. Ελιαν.] One of David's brothers, the eldest of the family (1 Chr. ii. 13; 1 Sam. xvi. 6, xvii. 13, 28). His daughter Abihail married her second cousin Rehoboam, and bore him three children (2 Chr. xi. 18): although, taking into account the length of the reigns of David and Solomon, it is difficult not to suspect that the word "daughter" is here used in the less strict sense of granddaughter or descendant. In 1 Chr. xxvii. 18, we find mention of "Elihu, of the brethren of David," as "ruler" (נָגִיד), or "prince" (שַׂר) of the tribe of Judah. According to the ancient Hebrew tradition preserved by Jerome (*Quæst. Hebr.* ad loc.), this Elihu was identical with Eliab. "Brethren" is however often used in the sense of kinsmen, *e. g.* 1 Chr. xii. 2.

4. [In 1 Chr. xv. 18, FA.[1] Ελιβα; FA.[2] Vat. Ελιαβα.] A Levite in the time of David, who was both a "porter" (שׁוֹעֵר, *Shôêr*, i. e. a doorkeeper) and a musician on the "psaltery" (1 Chr. xv. 18, 20, xvi. 5).

5. [FA. Ελειαβ.] One of the warlike Gadite leaders who came over to David when he was in the wilderness taking refuge from Saul (1 Chr. xii. 9).

6. An ancestor of Samuel the Prophet; a Kohathite Levite, son of Nahath (1 Chr. vi. 27, Heb. 12). In the other statements of the genealogy this name appears to be given as ELIHU (1 Sam. i. 1) and ELIEL (1 Chr. vi. 34, Heb. 19).

7. [Sin. Εναβ: *Enan.*] Son of Nathanael, one of the forefathers of Judith, and therefore belonging to the tribe of Simeon (Jud. viii. 1).

ELI'ADA (אֶלְיָדָע [*God knows*]: Ἐλιδαέ [Vat. Ελιδαε], and repeated, Βααλιμάθ [Vat. -λει-]; Chr. Ἐλιαδά; [Vat. Ελειδα:] Alex. Ελιεδα: *Eliada*, *Eliada*). 1. One of David's sons; according to the lists, the youngest but one of the family born to him after his establishment in Jerusalem (2 Sam. v. 16; 1 Chr. iii. 8). From the latter passage it appears that he was the son of a wife and not of a concubine. In another list of David's family we find the name Eliada changed to Beeliada, Baal being substituted for El, the false god for the true (1 Chr. xiv. 7). What significance there may be in this change it is impossible to say; at any rate the present is the only instance occurring, and even there Eliada is found in one Heb. MS., also in the LXX. and Syr. versions. [BEELIADA.] The name appears to be omitted by Josephus in his list of David's family (*Ant.* vii. 3, § 3).

2. [Ἐλιαδά; Vat. Ελειδα: *Eliada*]. A mighty man of war (גִּבּוֹר חַיִל), a Benjamite, who led 200,000 of his tribe to the army of Jehoshaphat (2 Chr. xvii. 17).

ELI'ADAH (אֶלְיָדָע [*God knows*]: [Rom. Vat. om.:] Alex. Ελιαδαε: *Eliada*), apparently an Aramite of Zobah; father of Rezon the captain of a marauding band which annoyed Solomon (1 K. xi. 23).

ELI'ADAS (Ἐλιαδάς: *Eliadas*), 1 Esdr. ix. 28. [ELIOENAI.]

ELI'ADUN (Ἠλιαδούδ; [Vat. Ειλιαδουν; Alex. Ελιαδουν; Ald. Ἠλιαδοῦν:] Vulg. omits) 1 Esdr. v. 58. Possibly altered from HENADAD.

ELI'AH (אֶלְיָה [*God – Jehovah*]: *Elia*) 1. (Ἐρία; [Vat.] Alex. Ηλια: [Ald. Ἠλίας.]). A Benjamite; one of the sons of Jeroham, and a chief man (רֹאשׁ, literally "head") of the tribe (1 Chr. viii. 27).

Digitized by Google

2. ('Ηλία; [Vat. FA. Ηλεια.]) One of the Benetham [*sons of Elam*]; an Israelite (*i. e.* a layman) in the times of Ezra, who had married a foreign wife (Ezr. x. 26).

This name is accurately Elijah, and the translators of the A. V. have so expressed it, not only in the name of the prophet (most frequently spelt with a final *u*), but in another case (Ezr. x. 21). [ELIJAH.]

ELI'AHBA (אֶלִיַחְבָּא [*whom God hides*]: [2 Sam.,] 'Εμασού; [Alex.] Ελιαβ; [Comp. 'Ελιαβά; 1 Chr.] 'Ελιαβά: [Vat. corrupt.; FA. Ελμαβα:] *Eliaba*), a Shaalbonite. *i. e.* probably from SHAALBIM; one of the Thirty of David's guard (2 Sam. xxiii. 32; 1 Chr. xi. 33). [The A. V. ed. 1611, and other early editions, read Elihaba, with the Genevan version.]

ELI'AKIM (אֶלְיָקִים, *whom God will establish*: [in 2 K.,] 'Ελιακίμ, [Vat. Alex. -κειμ;] and [Is. xxii. 20,] 'Ελιακείμ; [in Is. xxxvi., xxxvii., 'Ελιακείμ:] *Eliacim*). 1. Son of Hilkiah; master of Hezekiah's household (עַל־הַבָּיִת = "over the house," as Is. xxxvi. 3), 2 K. xviii. 18, 26, 37. He succeeded Shebna in this office, after he had been ejected from it (Grotius thinks by reason of his leprosy) as a punishment for his pride (Is. xxii. 15–20). Eliakim was a good man, as appears by the title emphatically applied to him by God, "my servant Eliakim" (Is. xxii. 20), and as was evinced by his conduct on the occasion of Sennacherib's invasion (2 K. xviii. 37, xix. 1–5), and also in the discharge of the duties of his high station, in which he acted as a "father to the inhabitants of Jerusalem, and to the house of Judah" (Is. xxii. 21). It was as a special mark of the Divine approbation of his character and conduct, of which however no further details have been preserved to us, that he was raised to the post of authority and dignity which he held at the time of the Assyrian invasion. What this office was has been a subject of some perplexity to commentators. The ancients, including the LXX. and Jerome, understood it of the priestly office, as appears by the rendering of סֹכֵן (Is. xxii. 15, A. V. "treasurer") by *παστοφόριον*, the "priest's chamber," by the former, and of עַל־הַבַּיִת by "*præpositus templi*" by the latter. Hence Nicephorus, as well as the author of the Alexandrian Chronicle, includes in the list of high-priests, Somnas or Sobnas (*i. e.* Shebna), and Eliakim, identifying the latter with Shallum or Meshullam. His 12th high-priest is, "Somnas, ille impius et perditus, regnante Ezechiâ," and his 13th, "Eliakim Muselum." But it is certain from the description of the office in Is. xxii., and especially from the expression in ver. 22, "the key of the house of David will I lay upon his shoulder;" that it was the King's house, and not the House of God, of which Eliakim was prefect, as Ahishar had been in the reign of Solomon, 1 K. iv. 6, and Azrikam in that of Ahaz, 2 Chr. xxviii. 7. And with this agrees both all that is said, and all that is not said, of Eliakim's functions. The office seems to have been the highest under the king, as was the case in Egypt, when Pharaoh said to Joseph, "Thou shalt be over my house (עַל־בֵּיתִי) . . . only in the throne will I be greater than thou," Gen. xli. 40, comp. xxxix. 4. In 2 Chr. xxviii. 7, the officer is called "governor (נָגִיד) of the house." It is clear that the "Scribe" was inferior to him for Shebna, when degraded from the prefecture of the house, acted as scribe under Eliakim,[a] 2 K. xviii. 37. The whole description of it too by Isaiah implies a place of great eminence and power. This description is transferred in a mystical or spiritual sense to Christ the son of David in Rev. iii. 7; thus making Eliakim in some sense typical of Christ. This it is perhaps which gave rise to the interpretation of Eliakim's name mentioned by Origen, ὁ Θεός μου ἀνέστη· or as Jerome has it, *Deus resurrectio*, or *Resurgens Deus*; and also favored the mystical interpretation of the passage in Isaiah given by Jerome in his commentary, based upon the interpretation of סֹכֵן (A. V. "treasurer") as "*habitans in tabernaculo*," as if it imported the removal of the Jewish dispensation, and the setting up of the Gospel in its place. The true meaning of סֹכֵן is very doubtful. "Friend," *i. e.* of the king, and "steward of the provisions," are the two most probable significations. Eliakim's career was a most honorable and splendid one. Most commentators agree that Is. xxii. 25 does not apply to him, but to Shebna. Eliakim's name also occurs 2 K. xix. 2; Is. xxxvi. 3, 11, 22, xxxvii. 2. (See further Jerome *de Nom. Hebr.* and *Comm. on Is.* xxii. 15 ff.; Rosenmüll. *ib.*; Bp. Lowth's *Notes on Is.*; Selden, *de Success. in Pontif. Hebr.*; Winer, *s. v.*)

2. ['Ελιακίμ: Vat. Alex. -κειμ: *Eliacim*, *Eliakim*.] The original name of Jehoiakim king of Judah (2 K. xxiii. 34; 2 Chr. xxxvi. 4). [JEHOIAKIM.]

3. [Rom. Vat. Alex. FA.[1] omit; Comp. Ald. FA.[2] 'Ελιακίμ: *Eliachim*.] A priest in the days of Nehemiah, who assisted at the dedication of the new wall of Jerusalem (Neh. xii. 41).

4. ['Ελιακείμ.] Eldest son of Abiud, or Judah; brother of Joseph, and father of Azor, Matt. i. 13. [GENEALOGY OF CHRIST.]

5. ['Ελιακείμ: *Eliakim*.] Son of Melea, and father of Jonan, Luke iii. 30, 31. [IBID.]

A. C. H.

ELI'ALI ('Ελιαλί; [Vat. Εδιαλεις;] Alex. Ελιαλει: *Dielus*), 1 Esdr. ix. 34. [BINNUI.]

ELI'AM (אֱלִיעָם: 'Ελιάβ, Vat. and Alex.; [Comp. 'Ελιάμ:] *Eliam*). 1. Father of Bath-sheba, the wife of David (2 Sam. xi. 3). In the list of 1 Chr. iii. 5, the names of both father and daughter are altered, the former to AMMIEL and the latter to BATH-SHUA: and it may be noticed in passing, that both the latter names were also those of non-Israelite persons, while Uriah was a Hittite. (Comp. Gen. xxxviii. 12; 1 Chr. ii. 3; in both of which "the daughter of Shua" is בַּת שׁוּעַ, Bath-shua; also 2 Sam. xvii. 27.) The transposition of the two parts of the name El-i-am in Amm-i-el, does not alter its Hebrew signification, which may be "God is my people."

2. [Alex. Ελιαφ.] Son of Ahithophel the Gilonite; one of David's "thirty" warriors (2 Sam. xxiii. 34). The name is omitted in the list of 1 Chr. xi., but is now probably dimly discernible as "Ahiah the Pelonite" (ver. 36) (see Kennicott,

[a] Bp. Lowth thinks, but without sufficient reason that this Shebna is a different person from the other

Dissertation, p. 207). The ancient Jewish tradition preserved by Jerome (*Qu. Hebr.* on 2 Sam. xi. 3, and 1 Chr. iii. 5) is that the two Eliams are one and the same person. An argument has been founded on this to account for the hostility of Ahithophel to King David, as having dishonored his house and caused the death of his son-in-law (Blunt, *Coincidences*, Pt. II. x.). But such arguments are frequently grounded on ignorance of the habits and modes of feeling of Orientals, who often see no shame in that which is the greatest disgrace to us.

ELIAO'NIAS ('Ελιαωνίας; [Vat. Ελιαλωνιας:] *Moabitionis*, including preceding name), 1 Esdr. viii. 31. [ELIHOËNAI.]

ELI'AS ('Ηλίας; [Vat.[1] M. in Ecclus. xlviii. 1, Ηλεια; ver. 12, Ηλειας;] in Maccabees, and Lachm. [also Treg.] in N. T. 'Ηλίας; [Tisch. in N. T. 8th ed. 'Ηλείας:] *Elias*, but in Cod. Amiat. *Helias*), the form in which the name of ELIJAH is given in the A. V. of the Apocrypha and N. Test.: Ecclus. xlviii. 1, 4, 12; 1 Macc. ii. 58; Matt. xi. 14, xvi. 14, xvii. 3, 4, 10, 11, 12, xxvii. 47, 49; Mark vi. 15, viii. 28, ix. 4, 5, 11, 12, 13, xv. 35, 36; Luke i. 17, iv. 25, 26, ix. 8, 19, 30, 33, 54 [rec. text]; John i. 21, 25; Rom. xi. 2; James v. 17. In Rom. xi. 2, the reference is not to the prophet, but to the portion of Scripture designated by his name, the words being ἐν 'Ηλίᾳ, "in Elias," not as in A. V. "of Elias." [BIBLE, p. 306 a.]

ELI'ASAPH (אֶלְיָסָף [*added of God*]: 'Ελισάφ; [Vat. M. Ελεισαφ, exc. Num. i. 14:] *Eliasaph*). 1. Son of Deuel; head of the tribe of Dan at the time of the census in the Wilderness of Sinai (Num. i. 14, ii. 14, vii. 42, 47, x. 20).

2. Son of Lael; a Levite, and "chief of the house of the father of the Gershonite" at the same time (Num. iii. 24).

ELI'ASHIB (אֶלְיָשִׁיב [*whom God restores*]: 'Ελιασεβών, 'Ελιαβί, 'Ελιασείβ, 'Ελιασούβ, etc.: *Eliasub*, *Eliasib*), a common name at the later period of the O. T. history.

1. ['Ελιαβί, Vat. -βιει; Alex. Ελιασειβ: *Eliasib.*] A priest in the time of King David, eleventh in the order of the "governors" (שָׂרֵי) of the sanctuary (1 Chr. xxiv. 12).

2. ['Ελιασεβών; Vat. Αασειβ; Alex. Ελιασειβ: *Eliasub.*] A son of Elioënai; one of the latest descendants of the royal family of Judah (1 Chr. iii. 24).

3. ['Ελιασούβ, -σίβ, 'Ελισούβ, etc.: *Eliasib.*] High-priest at Jerusalem at the time of the rebuilding of the walls under Nehemiah (Neh. iii. 1, 20, 21). His genealogy is given in xii. 10, 22, 23. Eliashib was in some way allied (קָרוֹב = near) to Tobiah the Ammonite, for whom he had prepared a room in the Temple, a desecration which excited the wrath of Nehemiah (Neh. xiii. 4, 7). One of the grandsons of Eliashib had also married the daughter of Sanballat the Horonite (xiii. 28). There seems no reason to doubt that the same Eliashib is referred to in Ezr. x. 6.

4. ['Ελισάβ, FA. -σαφ; Vat. Ελεισαφ: *Eliasib.*] A singer in the time of Ezra who had married a foreign wife (Ezr. x. 24). [ELEAZURUS.]

5. ['Ελισούβ, Vat. -σουβηλ, FA. -σου.] A son of Zattu (Ezr. x. 27), [ELISIMUS] and

6. ['Ελιασίφ, Vat. Ελειασειφ, FA. -σειβ, Comp. Ald. 'Ελιασίβ, Alex. -σειβ.] A son of Bani (x. 36), [ENASIBUS. ELIASIS], both of whom had transgressed in the same manner.

ELI'ASIS ('Ελίασις, [Vat. Alex.] Ελιασεις *Eliasis*), 1 Esdr. ix. 34. This name answers to MATTENAI in Ezr. x. 33; but is probably merely a repetition of ENASIBUS, just preceding it [which corresponds to ELIASHIB, 6].

ELI'ATHAH (אֶלְיָתָה and אֶלְיָתָהּ [*to whom God comes*]: 'Ελιαθά; [in ver. 4, Vat. Ηλιαβαθ; in ver. 27, Vat. Αιμαθα, Alex. Ελιαθ:] *Eliatha*), one of the sons of Heman, a musician in the Temple in the time of King David (1 Chr. xxv. 4), who with twelve of his sons and brethren had the twentieth division of the temple-service (xxv. 27). In Jerome's *Quæst. Hebr.* on ver. 27, the name is given as Eliaba and explained accordingly: but not so in the Vulgate.

ELI'DAD (אֶלְיָדָד [*loved of God*]: 'Ελδάδ: *Elidad*), son of Chislon; the man chosen to represent the tribe of Benjamin in the division of the land of Canaan (Num. xxxiv. 21).

E'LIEL (אֲלִיאֵל [*to whom God is strength*]: 'Ελιήλ; [Vat. Ελειηλ:] *Eliel*). 1. One of the heads of the tribe of Manasseh — of that portion of the tribe which was on the east of Jordan (1 Chr. v. 24).

2. [Vat. Ελειηλ; Ald. 'Ελιάβ.] Son of Toah a forefather of Samuel the Prophet (1 Chr. vi. 34, Heb. 19). Probably identical with ELIHU, 2, and ELIAB, 6.

3. ('Ελιηλί [Vat. -λει; Comp. Ald. 'Ελιήλ.]) One of the Bene-Shimhi; a chief man in the tribe of Benjamin (1 Chr. viii. 20).

4. ('Ελεήλ.) Like the preceding, a Benjamite, but belonging to the Bene-Shashak (1 Chr. viii. 22).

5. (Alex. 'Ιελιήλ; [Vat. FA. corrupt.]) "The Mahavite;" one of the heroes of David's guard in the extended list of 1 Chr. (xi. 46).

6. (Δαλιήλ; [Vat. FA. Δαλειηλ;] Alex. Αλιηλ.) Another of the same guard, but without any express designation (1 Chr. xi. 47).

7. ('Ελιάβ; [Alex. Comp. Ald. 'Ελιήλ.]) One of the Gadite heroes who came across Jordan to David when he was in the wilderness of Judah hiding from Saul (1 Chr. xii. 11).

8. [Vat. Εληρ, Νεμηλ; FA. Ερηλ, Ελημ.] A Kohathite Levite, "chief" (שַׂר) of the Bene-Chebron at the time of the transportation of the Ark from the House of Obed-edom to Jerusalem (1 Chr. xv. 9, 11).

9. [Vat. Ιεειηλ; Alex. Ιεῖηλ.] A Levite in the time of Hezekiah; one of the "overseers" (פְּקִידִים) of the offerings made in the Temple (2 Chr. xxxi. 13).

ELIE'NAI (אֶלְיוֹעֵינַי [perh. *to God are my eyes*]: 'Ελιωναΐ; [Vat. Ελιωλιαα; Alex. Ελιωναΐ:] *Elioënai*), one of the Bene-Shimhi; a descendant of Benjamin, and a chief man in the tribe (1 Chr. viii. 20).

ELIE'ZER (אֱלִיעֶזֶר, *my God* (is my) *help* [or *God of help*]: 'Ελιέζερ: [*Eliezer*]). 1. Abraham's chief servant, called by him, as the passage is usually translated, "Eliezer of Damascus," or "that Damascene, Eliezer" (Gen. xv. 2). There is a contradiction in the A. V., for it does not ap

Digitized by Google

pear how, if he was "of Damascus," he could be "born in Abraham's house" (ver. 3). But the phrase בֶּן־בֵּיתִי, "son of my house," only imports that he was one of Abraham's household, not that he was born in his house. In the preceding verse דֶּן מֶשֶׁק בֵּיתִי &c., should probably be rendered "the son of possession," *i. e.* possessor, "of my house, shall be . . . Eliezer." It was, most likely, this same Eliezer who is described in Gen. xxiv. 2, as the *eldest servant* of Abraham's *house, that ruled over all that he had*, and whom his master sent to Padan-Aram to take a wife for Isaac from among his own kindred. With what eminent zeal and faithfulness he executed his commission, and how entirely he found the truth of what his own name expressed, in the providential aid he met with on his errand, is most beautifully told in Gen. xxiv. It should, however, be said that the passage (Gen. xv. 2), in which the connection of Eliezer with Damascus seems to be asserted, is one of extreme obscurity and difficulty. The sense above ascribed to מֶשֶׁק (after Simonis and Gesenius) rests only upon conjecture, the use of "*Damascus*" for "*Damascene*" is very unusual, and the whole arrangement of the sentence very harsh. There is probably something at the bottom of it all, besides the alliteration between *Meshek* and *Dammeshek*, which we are ignorant of, and which is wanting to clear up the sense. The two passages, "*Judæis* origo *Damascena, Syriæ nobilissima civitas . . . Nomen urbi a Damasco rege inditum . . . Post Damascum Azelus, mox Adores et Abraham et Israhel reges fuere*" (Justin. lib. xxxvi. cap. 2): and Ἀβράμης ἐβασίλευσε Δαμασκοῦ . . . τοῦ δὲ Ἀβράμου ἔτι καὶ νῦν ἐν τῇ Δαμασκηνῇ τὸ ὄνομα δοξάζεται· καὶ κώμη ἀπ' αὐτοῦ δείκνυται Ἀβράμου οἴκησις λεγομένη (Joseph. *Ant.* i. 7, § 2, quoting Nicol. Damascen.) have probably some relation to the narrative in Gen. xv. (See Gesen. *Thes.* s. v. מֶשֶׁק; Rosenmüller on Gen. xv.; Knobel, *Genesis.*)

* Kalisch (*Genesis*, p. 365) maintains that the words דַּמֶּשֶׂק אֱלִיעֶזֶר in Gen. xv. 2, cannot possibly be translated "Eliezer of Damascus," but must be taken as a compound proper name, "Dammesek (*or* Damascus) Eliezer," like Hadad-ezer, Chushan-Rishathaim. The LXX. reads Δαμασκὸς Ἐλιέζερ. A.

2. [Ἐλιέζερ, (not Ἐλ.) in 1 Chr.] Second son of Moses and Zipporah, to whom his father gave this name, "because, said he, the God of my father was my help, that delivered me from the sword of Pharaoh" (Ex. xviii. 4; 1 Chr. xxiii. 15, 17). He remained with his mother and brother Gershom, in the care of Jethro his grandfather, when Moses returned to Egypt (Ex. iv. 18), she having been sent back to her father by Moses (Ex. xviii. 2), though she set off to accompany him, and went part of the way with him. Jethro brought back Zipporah and her two sons to Moses in the wilderness, after he heard of the departure of the Israelites from Egypt (xviii.). Eliezer had one son, Rehabiah, from whom sprang a numerous posterity (1 Chr. xxiii. 17, xxvi. 25, 26). Shelomith in the reign of Saul and David (ver. 28), who had the care of all the treasures of things dedicated to God, was descended from Eliezer in the 6th generation, so the genealogy in 1 Chr. xxvi. 25 is complete.

3. One of the sons of Becher, the son of Benjamin (1 Chr. vii. 8).

4. A priest in the reign of David, one of those appointed to sound with trumpets before the Ark on its passage from the house of Obed-edom to the city of David (1 Chr. xv. 24).

5. Son of Zichri, "ruler" (נָגִיד) of the Reubenites in the reign of David (1 Chr. xxvii. 16).

6. [Vat. Ελιαδα.] Son of Dodavah, of Mareshah in Judah (2 Chr. xx. 37), a prophet, who rebuked Jehoshaphat for joining himself with Ahaziah king of Israel, "who did very wickedly," in making a combined expedition of ships of Tarshish to go to Ophir for gold; and foretold the destruction of his fleet at Ezion-geber, which accordingly came to pass. When Ahaziah proposed a second expedition, Jehoshaphat refused (2 Chr. xx. 35–37; 1 K. xxii. 48, 49). The combination of the names Eliezer and Dodavah almost suggests that he may have been descended from David's mighty man, Eleazar the son of Dodo (2 Sam. xxiii. 9).

7. [Ἐλεάζαρ.] A chief Israelite — a "man of understanding" — whom Ezra sent with others from Ahava to Casiphia, to induce some Levites and Nethinim to accompany him to Jerusalem (Ezr. viii. 16). In 1 Esdr. viii. 43, the name is given as ELEAZAR.

8, 9, 10. [Ezr. x. 23, FA. Ελιαζαρ; ver. 31, Vat. Ελει, Εζερ.] A priest, a Levite, and an Israelite of the sons of Harim, who, in the time of Ezra, had married foreign wives (Ezr. x. 18, 23, 31). The former is called ELEAZAR, the second ELEAZURUS, and the third ELIONAS, in 1 Esdr. ix. 19, 24, 32.

11. Son of Jorim, 13th in descent from Nathan the son of David, in the genealogy of Christ (Luke iii. 29). A. C. H.

* ELI'HABA is the reading of the A. V. ed. 1611, and other early editions, in 2 Sam. xxiii. 32, and 1 Chr. xi. 33, for ELIAHBA. A.

ELIHOË'NAI [5 syl.] (אֱלְיְהוֹעֵינַי) [*to Jehovah my eyes*]: Ἐλιαναί, Alex. Ελιααναι: *Eliœnai*), son of Zerahiah, one of the Bene-l'ahath-moab, who with 200 men returned from the Captivity with Ezra (Ezr. viii. 4). In the apocrypha Esdras the name is ELIAONIAS.

ELIHO'REPH (אֱלִיחֹרֶף [*God his recompense*, Ges.]: Ἐλιάφ; Alex. Εναρεφ; [Comp. Ἐλιχόρεφ:] *Elihoreph*), son of Shisha. He and his brother Ahiah were scribes (סֹפְרִים) to Solomon at the commencement of his reign (1 K. iv. 3).

ELI'HU (אֱלִיהוּא [*God is He*, i. e. *Jehovah*]: Ἐλιούς: *Eliu*). **1.** One of the interlocutors in the book of Job. He is described as the "son of Barachel the Buzite," and thus apparently referred to the family of Buz, the son of Nahor, and nephew of Abraham (Gen. xxii. 21). This supposition suits well with the description of the other personages [ELIPHAZ; BILDAD],[a] and the probable date to be assigned to the scenes recorded. In his speech (cc. xxxii.–xxxvii.) he describes himself as younger than the three friends, and accordingly his presence is not noticed in the first chapters. He expresses his desire to moderate between the disputants; and his words alone touch upon,

[a] The connection of Dedan and Tema with Buz in Jer. xxv. 23, is also to be noticed.

Digitized by Google

although they do not thoroughly handle, that idea of the disciplinal nature of suffering, which is the key to Job's perplexity and doubt; but, as in the whole book, the greater stress is laid on God's unsearchable wisdom, and the implicit faith which he demands. [JOB, BOOK OF.] A. B.

2. ('Ηλιού [Vat. Ηλειου; Alex. Ελιου].) Son of Tohu; a forefather of Samuel the Prophet (1 Sam. i. 1). In the statements of the genealogy of Samuel in 1 Chr. vi. the name ELIEL occurs in the same position — son of Toah and father of Jeroham (vi. 34, Heb. 19); and also ELIAB (vi. 27, Heb. 12), father of Jeroham and grandson of Zophai. The general opinion is that Elihu is the original name, and the two latter forms but copyists' variations thereof.

3. (Vat. and Alex. Ελιαβ; [Comp. Ald. 'Ελία.]) A similar variation of the name of Eliab, the eldest son of Jesse, is probably found in 1 Chr. xxvii. 18, where Elihu "of the brethren of David" is mentioned as the chief of the tribe of Judah. But see 1 Chr. xii. 2, where, in a similar connection, the word "brethren" is used in its widest sense. The LXX. retains Eliab. [ELIAB, 3.] In this place the name is without the final Aleph — אֱלִיהוּ.

4. ('Ελιμούθ; Alex. Ελιουδ; [Comp. Ald. 'Ελιοῦ.]) One of the "captains" (רָאשֵׁי, *i. e.* heads) of the "thousands of Manasseh" (1 Chr. xii. 20) who followed David to Ziklag after he had left the Philistine army on the eve of the battle of Gilboa and who assisted him against the marauding band (גְּדוּד) of the Amalekites (comp. 1 Sam. xxx.).

5. (אֱלִיהוּ: 'Ελιοῦ; [Vat. Ενγου.]) A Korhite Levite in the time of David; one of the doorkeepers (A. V. "porters") of the house of Jehovah. He was a son of Shemaiah, and of the family of Obed-edom (1 Chr. xxvi. 7). Terms are applied to all these doorkeepers which appear to indicate that they were not only "strong men," as in A. V., but also fighting men. (See vv. 6, 7, 8, 12, in which occur the words חַיִל = army, and גִּבּוֹרֵי = warriors or heroes.) G.

ELI'JAH. 1. (generally אֵלִיָּהוּ, *Eliyahu*, but sometimes אֵלִיָּה, *Eliyah* [*God-Jehovah*]: 'Ηλιού, [Vat. Ηλειου, exc. Mal. iv 5, 'Ηλίας;] Aquila, Ηλία;[a] N. T. 'Ηλίας, [Tisch. 8th ed 'Ηλείας:] *Elias*). ELIJAH THE TISHBITE has been well entitled "the grandest and the most romantic character that Israel ever produced."[b] Certainly there is no personage in the O. T. whose career is more vividly portrayed, or who exercises on us a more remarkable fascination. His rare, sudden, and brief appearances, his undaunted courage and fiery zeal, the brilliancy of his triumphs, the pathos of his despondency, the glory of his departure, and the calm beauty of his reappearance on the Mount of Transfiguration, throw such a halo of brightness around him as is equalled by none of his compeers in the sacred story.[c] The ignorance in which we are left of the circumstances and antecedents of the man who did and who suffered so much, doubtless contributes to enhance our interest in the story and the character. "Elijah the Tishbite of the inhabitants of Gilead," is literally all that is given us to know of his parentage and locality.[d] It is in remarkable contrast to the detail with which the genealogies of other prophets and leaders of Israel are stated.. Where the place — if it was a place — lay, which gave him this appellation we know not, nor are we likely to know. It is not again found in the Bible, nor has any name answering to it been discovered since.[e] [THISBE.]

The mention of Gilead, however, is the key-note to much that is most characteristic in the story of the prophet. Gilead was the country on the further side of the Jordan — a country of chase and pasture, of tent-villages, and mountain-castles, inhabited by a people not settled and civilized like those who formed the communities of Ephraim and Judah, but of wandering, irregular habits, exposed to the attacks of the nomad tribes of the desert, and gradually conforming more and more to the habits of those tribes; making war with the Hagarites, and taking the countless thousands of their cattle, and then dwelling in their stead (1 Chr. v. 10, 19–22). To an Israelite of the tribes west of Jordan the title "Gileadite" must have conveyed a similar impression, though in a far stronger degree, to that which the title "Celt" does to us. What the Highlands were a century ago to the towns in the Lowlands of Scotland, that, and more than that, must Gilead have been to Samaria or Jerusalem.[f] One of the most famous heroes in the early annals

[a] By Chrysostom and others the name is Grecised into 'Ηλίος, as if signifying the brightness of the sun.

[b] Stanley, *S. & P.* p. 328. In the *Acta Sanctorum*, he is called *Prodigiosus Thesbites*.

[c] "Omnium suae aetatis Prophetarum facile princeps; et, si a Mose discesseris, nulli secundus" (Frischmuth, in *Crit. Sacri*, quoting from Abarbanel).

[d] The Hebrew text is אֵלִיָּהוּ הַתִּשְׁבִּי מִתִּשְׁבֵי גִלְעָד. The third word may be pointed (1) as in the present Masoretic text, to mean "from the inhabitants of Gilead," or (2) "from Tishbi of Gilead;" which, with a slight change in form, is what the LXX. has. The latter is followed by Ewald (iii. 486, note). Lightfoot assumes, but without giving his authority, that Elijah was from Jabesh Gilead. By Josephus he is said to have come from Thesbon — ἐκ πόλεως Θεσβώνης τῆς Γαλααδίτιδος χώρας (viii. 13, § 2). Perhaps תושב may have been read as Heshbon, a city of the priests, and have given rise to the statement of Epiphanius, that he was "of the tribe of Aaron," and grandson of Zadok. See also the *Chron. Pasch.* in Fabricius, *Cod. Pseudep. V. T.* i 1070, &c.; and Quaresmius, *Elucid.* ii. 605. According to Jewish tradition — grounded on a certain similarity between the fiery zeal of the two — Elijah was identical with Phinehas the son of Eleazar the priest. He was also the angel of Jehovah who appeared in fire to Gideon (Lightfoot on John i. 21; Eisenmenger, i. 686). Arab tradition places his birthplace at *Gilkad Gilkood*, a few miles N. of *es-Salt* (Irby, p. 98), and his *tomb* near Damascus (Mislin, i. 490).

[e] The common assumption — perhaps originating with Hiller (*Onom* p. 947) or Reland (*Pal.* p. 1085) — is that he was born in the town Thisbe mentioned in Tob. i. 2. But not to insist on the fact that this Thisbe was not in Gilead but in Naphtali, it is nearly certain that the name has no real existence in that passage, but arises from a mistaken translation of the same Hebrew word which is rendered "inhabitants" in 1 K. xvii. 1. [THISBE.]

[f] See a good passage illustrative of this in *Rob Roy* chap. xix.

of Israel was "Jephthah the Gileadite," in whom all these characteristics were prominent; and Professor Stanley has well remarked how impossible it is rightly to estimate his character without recollecting this fact (*S. & P.* p. 327).

With Elijah, of whom so much is told, and whose part in the history was so much more important, this is still more necessary. It is seen at every turn. Of his appearance as he "stood before" Ahab — with the suddenness of motion to this day characteristic of the Bedouins from his native hills, we can perhaps realize something from the touches, few, but strong, of the narrative. Of his height little is to be inferred — that little is in favor of its being beyond the ordinary size.[a] His chief characteristic was his hair, long and thick, and hanging down his back,[b] and which, if not betokening the immense strength of Samson, yet accompanied powers of endurance[c] no less remarkable. His ordinary clothing consisted of a girdle of skin[d] round his loins, which he tightened when about to move quickly (1 K. xviii. 46). But in addition to this he occasionally wore the "mantle," or cape,[e] of sheep-skin, which has supplied us with one of our most familiar figures of speech.[f] In this mantle, in moments of emotion, he would hide his face (1 K. xix. 13), or when excited would roll it up as into a kind of staff.[g] On one occasion we find him bending himself down upon the ground with his face between his knees.[h] Such, so far as the scanty notices of the record will allow us to conceive it, was the general appearance of the great Prophet, an appearance which there is no reason to think was other than uncommon even at that time.[i] "Vir qui curationem et cultum corporis despiceret; facie squalente, quæ multitudine suorum crinium obumbraretur pelle caprinâ tantum de corpore tegentem quantum abscondi decorum erat, reliqua corporis ad æra perdurantem" (Gregory Nyss. quoted by Willemer *de Pallio Eliæ* in *Crit. Sacri*).

The solitary life in which these external peculiarities had been assumed had also nurtured that fierceness of zeal and that directness of address which so distinguished him. It was in the wild loneliness of the hills and ravines of Gilead that the knowledge of Jehovah, the living God of Israel, had been impressed on his mind, which was to form the subject of his mission to the idolatrous court and country of Israel.

The northern kingdom had at this time forsaken almost entirely the faith in Jehovah. The worship of the calves had been a departure from him, it was a violation of his command against material resemblances; but still it would appear that even in the presence of the calves Jehovah was acknowledged, and they were at any rate a national institution, not one imported from the idolatries of any of the surrounding countries. [CALF.] They were announced by Jeroboam as the preservers of the nation during the great crisis of its existence: "Behold thy gods, O Israel, that brought thee up out of the land of Egypt" (1 K. xii. 28). But the case was quite different when Ahab, not content with the calf-worship — "as if it had been a light thing to walk in the sins of Jeroboam, the son of Nebat" — married the daughter of the king of Sidon, and introduced on the most extensive scale (Joseph. *Ant.* ix. 6, § 6) the foreign religion of his wife's family, the worship of the Phœnician Baal. What this worship consisted of we are ignorant — doubtless it was of a gay, splendid, and festal character, and therefore very opposite to the grave, severe service of the Mosaic ritual. Attached to it and to the worship of Asherah (A. V. "Ashtaroth," and "the groves") were licentious and impure rites, which in earlier times had brought the heaviest judgments on the nation (Num. xxv.; Judg. ii. 13, 14, iii. 7, 8). But the most obnoxious and evil characteristic of the Baal-religion was that it was the worship of power, of mere strength, as opposed to that of a God of righteousness and goodness — a foreign religion, imported from nations the hatred of whom was inculcated in every page of the law, as opposed to the religion of that God who had delivered the nation from the bondage of Egypt, had "driven out the heathen with his hand, and planted them in;" and through whom their forefathers had "trodden down their enemies, and destroyed those that rose up against them." It is as a witness against these two evils that Elijah comes forward.

1. What we may call the first Act in his life embraces between three and four years — three years and six months for the duration of the drought, according to the statements of the New Testament (Luke iv. 25; James v. 17), and three

[a] From a comparison of 2 K. iv. 34 with 1 K. xvii. 21, it would seem as if Elisha approached nearer than Elijah to the stature of the child. But the inference is not to be relied on. Chrysostom applied the same epithet to him as to St. Paul, τριπήχυν ἄνθρωπον.

[b] 2 K. i. 8, "a hairy man;" literally, "a lord of hair." This might be doubtful, even with the support of the LXX. and Josephus — ἄνθρωπον δασύν — and of the Targum Jonathan — גְּבַר סַעֲרָן — the same word used for Esau in Gen. xxvii. 11. But its application to the hair of his head is corroborated by the word used by the children of Bethel when mocking Elisha. "Bald-head" is a peculiar term (קָרֵחַ) applied only to want of hair at the back of the head; and the taunt was called forth by the difference between the bare shoulders of the new prophet and the shaggy locks of the old one. [ELISHA.]

[c] Running before Ahab's chariot; the hardships of the Cherith; the forty days' fast.

[d] עוֹר (2 K. i. 8), rendered "leather" in this one place only. See Gen. iii. 21, &c.

[e] *Allerdth*, אַדֶּרֶת: LXX. μηλωτής; always used for this garment of Elijah, but not for that of any prophet before him. It is perhaps a trace of the permanent impression which he left on some parts of the Jewish society, that a hairy cloak became afterwards the recognized garb of a prophet of Jehovah (Zech. xiii. 4; A. V. "rough garment;" where the Hebrew word is the same which in Elijah's history is rendered "mantle").

[f] Various relics of the mantle are said to exist. The list of claimants will be found in the *Acta Sanctorum* (July 20). One piece is shown at Oviedo in Spain.

[g] גְּלֹם (2 K. ii. 8); "wrapped" is a different word.

[h] This is generally taken as having been in prayer, but kneeling apparently was not (certainly is not) an attitude of prayer in the East. "When ye *stand* praying, forgive" (Mark xi. 25; and see Matt. vi. 5, &c.).

[i] This is to be inferred, as we shall see afterwards from king Ahaziah's recognition of him by mere description.

Digitized by Google

or four months more for the journey to Horeb, and the return to Gilead (1 K. xvii. 1–xix. 21). His introduction is of the most startling description: he suddenly appears before Ahab, as with the unrestrained freedom of Eastern manners he would have no difficulty in doing, and proclaims the vengeance of Jehovah for the apostasy of the king. This he does in the remarkable formula evidently characteristic of himself, and adopted after his departure by his follower Elisha — a formula which includes everything at issue between himself and the king — the name of Jehovah, his being the God of Israel, the Living God, Elijah being his messenger, and then — the special lesson of the event — that the god of power and of nature should be beaten at his own weapons. "As Jehovah, God of Israel, liveth, before whom I stand," whose constant servant I am, "there shall not be dew nor rain these years, but according to my word." What immediate action followed on this we are not told; but it is plain that Elijah had to fly before some threatened vengeance either of the king, or more probably of the queen (comp. xix. 2). Perhaps it was at this juncture that Jezebel "cut off the prophets of Jehovah" (1 K. xviii. 4). He was directed to the brook Cherith, either one of the torrents which cleave the high table-lands of his native hills, or on the west of Jordan, more in the neighborhood of Samaria. [CHERITH.] There in the hollow of the torrent-bed he remained, supported in the miraculous manner with which we are all familiar, till the failing of the brook obliged him to forsake it. How long he remained in the Cherith is uncertain. The Hebrew expression is simply "at the end of days," nor does Josephus afford us any more information. A vast deal of ingenuity has been devoted to explaining away Elijah's "ravens." The Hebrew word, עֹרְבִים, *Orebim*, has been interpreted as "Arabians," as "merchants," as inhabitants of some neighboring town of *Orbo* or *Orbi*.[a] By others Elijah has been held to have plundered a raven's nest — and this twice a day regularly for several months! There is no escape from the plain meaning of the words — occurring as they do twice, in a passage otherwise displaying no tinge of the marvellous — or from the unanimity of all the Hebrew MSS., of all the ancient versions, and of Josephus.[b] [CHERITH.]

His next refuge was at ZAREPHATH, a Phœnician town lying between Tyre and Sidon, certainly the last place at which the enemy of Baal would be looked for.[c] The widow woman in whose house he lived[d] seems, however, to have been an Israelite, and no Baal-worshipper, if we may take her adjuration by "Jehovah thy God" as an indication.[e] Here Elijah performed the miracles of prolonging the oil and the meal; and restored the son of the widow to life after his apparent death.[f]

Here the prophet is first addressed by the title which, although occasionally before used to others, is so frequently applied to Elijah as to become the distinguishing appellation of himself and his successor: "O thou man of God" — "Now I know that thou art a man of God" (1 K. xvii. 18, 24).

In this, or some other retreat, an interval of more than two years must have elapsed. The drought continued, and at last the full horrors of famine, caused by the failure of the crops, descended on Samaria. The king and his chief domestic officer divide between them the mournful duty of ascertaining that neither round the springs, which are so frequent a feature of central Palestine, nor in the nooks and crannies of the most shaded torrent-beds, was there any of the herbage left, which in those countries is so certain an indication of the presence of moisture. No one short of the two chief persons of the realm could be trusted with this quest for life or death — "Ahab went one way by himself, and Obadiah went another way by himself." It is the moment for the reappearance of the prophet. He shows himself first to the minister. There, suddenly planted in his path, is the man whom he and his master have been seeking for more than three years. "There is no nation or kingdom," says Obadiah with true Eastern hyperbole, "whither my lord hath not sent to seek thee;" and now here he stands when least expected. Before the sudden apparition of that wild figure, and that stern, unbroken countenance,

[a] Jerome, quoted by Kennicott, p. 581. See these hypotheses brought together in Keil *ad loc.*

[b] This subject is exhausted in a dissertation entitled *Elias corvorum convictor* in the *Critici Sacri*.

[c] Lightfoot quaintly remarks on this that Elijah was the first Apostle to the Gentiles.

[d] The traditional scene of his meeting with the widow was in a wood to the south of the town (Mislin, i. 582, who however does not give his authority). In the time of Jerome the spot was marked by a tower (Jerome, *Ep. Paulæ*). At a later period a church dedicated to the prophet was erected over the house of the widow, in which his chamber and her kneading-trough were shown (Anton. Martyr, and Phocas, in Reland, p. 962). This church was called τὸ χηρεῖον (*Acta Sanctorum*).

[e] This must not be much relied on. Zedekiah, son of Chenaanah, one of Ahab's prophets, uses a similar form of words, "Thus saith Jehovah" (1 K. xxii. 11). The apparent inference however from Luke iv. 26 is that she was one of the widows of Israel. In the Jewish traditions her son was the Messiah (Eisenmenger, *Entd. Judenth.* ii. 725).

[f] "Jehovah thy God" (see just before) suggests more obviously a difference of worship and nationality between the Sareptan widow and the prophet. See Stanley, *Jewish Church*, ii. 330. So also the exceptive εἰ μή, Luke iv. 26, properly refers to ἐπέμφθη and not αὐτῶν, i. e., was sent nowhere *except* to Sarepta, which lay out of Israel, and *not* was sent to none of the widows in Israel *except* the one at Sarepta. We have the same idiom in ver. 27, where the opposition between Israelite and foreigner is beyond question. On this use of εἰ μή, see especially Fritzsche on Rom. xiv. 14. and Meyer on Matt. xii. 4. H.

[g] This is warranted by the expression "his sickness was so sore that there was no breath left in him," a form of words not elsewhere found; while in the story of the Shunammite's son it is distinctly said the child "died." Josephus's language (viii. 13, § 3) shows that he did not understand the child to have died. The Jewish tradition, quoted by Jerome, was that this boy was the servant who afterwards accompanied Elijah, and finally became the prophet Jonah. (Jerome, *Pref. to Jonah*; and see the citations from the Talmud in Eisenmenger, *Entd. Jud.* ii. 725.)

[h] That the child's death was real, not apparent, as stated above, cannot well be questioned. The language itself is sufficiently explicit. The child's ceasing to breathe must mean the same thing as to die. So the Psalmist says: "Thou takest away their breath, they die" (civ. 29). The two expressions are often interchanged (comp. Gen. vii. 22; Josh. xi. 11; Ps. cxxxv. 17, cxlvi. 4; Ezek. xxxvii. 10, etc.). So also the prayer of the prophet which follows, suppose

Obadiah could not but fall on his face.[a] Elijah, however, soon calms his agitation — "As Jehovah of hosts liveth, before whom I stand, I will surely show myself to Ahab;" and thus relieved of his fear that, as on a former occasion, Elijah would disappear before he could return with the king, Obadiah departs to inform Ahab that the man they seek is there. Ahab arrived, Elijah makes his charge — "Thou hast forsaken Jehovah and followed the Baals." He then commands that all Israel be collected to Mount Carmel with the four hundred and fifty prophets of Baal, and the four hundred of Asherah (Ashtaroth), the latter being under the especial protection of the queen. Why Mount Carmel, which we do not hear of until now, was chosen in preference to the nearer Ebal or Gerizim, is not evident. Possibly Elijah thought it wise to remove the place of the meeting to a distance from Samaria. Possibly in the existence of the altar of Jehovah (xviii. 30) — in ruins, and therefore of earlier erection — we have an indication of an ancient sanctity attaching to the spot. On the question of the particular part of the ridge of Carmel, which formed the site of the meeting, there cannot be much doubt. It is elsewhere examined. [CARMEL.]

There are few more sublime stories in history than this. On the one hand the solitary servant of Jehovah, accompanied by his one attendant; with his wild shaggy hair, his scanty garb, and sheep-skin cloak, but with calm dignity of demeanor and the minutest regularity of procedure, repairing the ruined altar of Jehovah with twelve stones, according to the number of the twelve founders of the tribes, and recalling in his prayer the still greater names of Abraham, Isaac, and Israel — on the other hand the 850 prophets of Baal and Ashtaroth, doubtless in all the splendor of their vestments (2 K. x. 22), with the wild din of their "vain repetitions" and the maddened fury of their disappointed hopes, and the silent people surrounding all — these things form a picture with which we are all acquainted, but which brightens into fresh distinctness every time we consider it. The conclusion of the long day need only be glanced at.[b] The fire of Jehovah consuming both sacrifice and altar — the prophets of Baal killed, it would seem by Elijah's own hand (xviii. 40) — the king, with an apathy almost unintelligible, eating and drinking in the very midst of the carnage of his own adherents — the rising storm — the ride across the plain to Jezreel, a distance of at least 16 miles; the prophet, with true Bedouin endurance, running before the chariot, but also with true Bedouin instinct stopping short of the city, and going no further than the "entrance of Jezreel."

So far the triumph had been complete; but the spirit of Jezebel was not to be so easily overcome, and her first act is a vow of vengeance against the author of this destruction. "God do so to me, and more also," so ran her exclamation, "if I make not thy life as the life of one of them by to-morrow about this time." It was no duty of Elijah to expose himself to unnecessary dangers, and, as at his first introduction, so now, he takes refuge in flight. The danger was great, and the refuge must be distant. The first stage on the journey was Beer-sheba — "Beer-sheba which belongeth to Judah," says the narrative, with a touch betraying its Israelitish origin. Here, at the ancient haunt of those fathers of his nation whose memory was so dear to him, and on the very confines of cultivated country, Elijah halted. His servant — according to Jewish tradition the boy of Zarephath — he left in the town; while he himself set out alone into the wilderness — the waste uninhabited region which surrounds the south of Palestine. The labors, anxieties, and excitement of the last few days had proved too much even for that iron frame and that stern resolution. His spirit is quite broken, and he wanders forth over the dreary sweeps of those rocky hills wishing for death — "It is enough! Lord, let me die, for I am not better than my fathers."[c] It is almost impossible not to conclude from the terms of the story that he was entirely without provisions for this or any journey. But God, who had brought his servant into this difficulty, provided him with the means of escaping from it. Whether we are to take the expression of the story literally or not is comparatively of little consequence. In some way little short of miraculous — it might well seem to the narrator that it could be by nothing but an angel[d] — the prophet was awakened from his dream of despondency beneath the solitary bush[e] of the wilderness, was fed with the bread and the water which to this day are all a Bedouin's requirements,[f] and went forward, "in the strength of that food," a journey of forty days "to the mount of God, even to Horeb."

that result: "Hast thou also brought evil upon the widow . . . by slaying her son?" (1 K. xvii. 20); and, "O Lord, let this child's soul come into him again" (ver. 21). H.

[a] The expressions of Obadiah, "lord" and "slave," show his fear of Elijah; they are those ordinarily used in addressing a potentate.

[b] The more so as the whole of this scene is admirably drawn out by Stanley (*S. & P.* pp. 355, 356).

[c] Although to some it may seem out of place in a work of this nature, yet the writer cannot resist referring to the Oratorio of *Elijah* by Mendelssohn, one of the most forcible commentaries existing on the history of the prophet. The scene in which the occurrences at Beer-sheba are embodied is perhaps the most dramatic and affecting in the whole work.

[d] מַלְאָךְ is both a "messenger" and an "angel." LXX. ver. 5, ττς; and so Josephus (viii. 13, § 7).

[e] "*One Retem tree*," Hebrew, רֹתֶם אֶחָד. [Not certainly so emphatic, for the numeral may be = ~ur a or an, as often elsewhere — H.] The frequented rock opposite the gate of the Greek convent, *Deir Mar Elyas*, between Jerusalem and Bethlehem, which is now shown to travellers as the spot on which the prophet rested on this occasion (Bonar; Porter, *Handbook*, &c.), appears at an earlier date not to have been so restricted, but was believed to be the place on which he was "accustomed to sleep" (Sandys, lib. iii. p. 176; Maundrell, *Ear. Trav.* p. 456), and the site of the convent as that where he was born (Geysforde, 1506, in Bonar, p. 117). Neither the older nor the later story can be believed; but it is possible that they may have originated in some more trustworthy tradition of his having rested here on his southward journey, in all probability taken along this very route. See a curious statement by Quaresmius of the extent to which the rock had been defaced in his own time "by the piety or impiety" of the Christian pilgrims. (*Elucidatio*, ii. 605; comp. Doubdan, *Voyage*, &c., p 144.)

[f] The LXX. adds to the description the only touch wanting in the Hebrew text — "a cake of meal" — ἀλυρίτης.

Digitized by Google

Here, i.e. "the cave," [a] one of the numerous caverns in those awful mountains, perhaps some traditional sanctuary of that hallowed region, at any rate well known — he remained for certainly one [b] night. In the morning came the "word of Jehovah" — the question, "What doest thou here, Elijah? Driven by what hard necessity dost thou seek this spot on which the glory of Jehovah has in former times been so signally shown?" In answer to this invitation the prophet opens his griefs. He has been very zealous for Jehovah; but force has been vain; one cannot stand against a multitude; none follow him, and he is left alone, flying for his life from the sword which has slain his brethren. The reply comes in that ambiguous and indirect form in which it seems necessary that the deepest communications with the human mind should be couched, to be effectual. He is directed to leave the cavern and stand on the mountain in the open air (εἰς τὸ ὄρος τὸ θεοβατον, Josephus), face to face (לִפְנֵי) with Jehovah. Then, as before with Moses (Ex. xxxiv. 6), "The Lord passed by;" passed in all the terror of his most appalling manifestations. The fierce wind tore the solid mountains and shivered the granite cliffs of Sinai; the earthquake crash reverberated through the defiles of those naked valleys; the fire burnt in the incessant blaze of eastern lightning. Like these, in their degree, had been Elijah's own modes of procedure, but the conviction is now forced upon him that in none of these is Jehovah to be known. Then, penetrating the dead silence which followed these manifestations, came the fourth mysterious symbol — the "still small voice." What sound this was, whether articulate voice or not, we cannot even conjecture; but low and still as it was it spoke in louder accents to the wounded heart of Elijah than the roar and blaze which had preceded it. To him no less unmistakably than to Moses, centuries before, it was proclaimed that Jehovah was "merciful and gracious, long-suffering and abundant in goodness and truth." Elijah knew the call, and at once stepping forward and hiding his face in his mantle, stood waiting for the Divine communication. It is in the same words as before, and so is his answer; but with what different force must the question have fallen on his ears, and the answer left his lips! "Before his entrance to the cave, he was comparatively a novice; when he left it he was an initiated man. He had thought that the earthquake, the fire, the wind, must be the great witnesses of the Lord. But he was not in *them;* not they, but the still small voice had that awe in it which forced the prophet to cover his face with his mantle. What a conclusion of all the past history! What an interpretation of its meaning!" (Maurice, *Prophets and Kings*, p. 136). Not in the persecutions of Ahab and Jezebel, nor in the slaughter of the prophets of Baal, but in the 7000 unknown worshippers who had not bowed the knee to Baal, was the assurance that Elijah was not alone as he had seemed to be.

Three commands were laid on him — three changes were to be made. Instead of Ben-hadad, Hazael was to be king of Syria; instead of Ahab, Jehu the son of Nimshi was to be king of Israel, and Elisha the son of Shaphat was to be his own successor. Of these three commands the two first were reserved for Elisha to accomplish, the last only was executed by Elijah himself. It would almost seem as if his late trials had awakened in him a yearning for that affection and companionship which had hitherto been denied him. His first search was for Elisha. Apparently he soon found him; we must conclude at his native place, Abel-meholah, probably somewhere about the centre of the Jordan valley. [ABEL-MEHOLAH.] Elisha was ploughing at the time,[c] and Elijah "passed over to him" — possibly crossed the river [d] — and cast his mantle, the well-known sheep skin cloak, upon him, as if, by that familiar [e] action, claiming him for his son. A moment of hesitation — but the call was quickly accepted, and then commenced that long period of service and intercourse which continued till Elijah's removal, and which after that time procured for Elisha one of his best titles to esteem and reverence — "Elisha the son of Shaphat, who poured water on the hands of Elijah."

2. Ahab and Jezebel now probably believed that their threats had been effectual, and that they had seen the last of their tormentor. At any rate this may be inferred from the events of chap. xxi. Foiled in his wish to acquire the ancestral plot of ground of Naboth by the refusal of that sturdy peasant to alienate the inheritance of his fathers, Ahab and Jezebel proceed to possess themselves of it by main force, and by a degree of monstrous injustice which shows clearly enough how far the elders of Jezreel had forgotten the laws of Jehovah how perfect was their submission to the will of their mistress. At her orders Naboth is falsely accused of blaspheming God and the king, is with his sons [f] stoned and killed, and his vineyard then — as having belonged to a criminal — becomes at once the property of the king. [NABOTH.]

Ahab loses no time in entering on his new acquisition. Apparently the very next day after the execution he proceeds in his chariot to take posses-

[a] The Hebrew word has the article, הַמְּעָרָה; and so too the LXX., τὸ σπήλαιον. The cave is now shown "in the secluded plain below the highest point of *Jebel Mûsa;*" "a hole just large enough for a man's body," beside the altar in the chapel of Elijah (Stanley, *S. & P.* p. 49; Rob. i. 108, 2d ed.).

[b] Hebrew, לִין. A. V. "lodge;" but in Gen. xix. 2, accurately, "tarry all night."

[c] The words of the text are somewhat obscured in the A. V. They bear testimony at once to the solid position of Elisha, and to the extent of the arable soil of the spot. According to the Masoretic punctuation the passage is: "And he departed thence, and found Elisha the son of Shaphat, who was ploughing. Twelve yoke were before him (*i. e.* either 12 ploughs were before him with his servants, or 12 yoke of land were already ploughed), and he was with the last." [See note under ELISHA, p. 714.]

[d] The word is that always employed for crossing the Jordan.

[e] See also Ruth iii. 4–14. Ewald, *Alterthümer*, p. 191, note. A trace of a similar custom survives in the German word *Mantel-kind*.

[f] "The blood of Naboth and the blood of his sons" (2 K. ix. 26; comp. Josh. vii. 24). From another expression in this verse — *yesternight* (אֶתְמוֹל, A. V. "yesterday"), we may perhaps conclude that like a later trial on a similar charge, also supported by two false witnesses — the trial of our Lord — it was conducted at night. The same word — *yesternight* — prompts the inference that Ahab's visit and encounter with Elijah happened on the very day following the murder.

Digitized by Google

son of the coveted vineyard. Behind him, probably in the back part of the chariot, ride his two sages Jehu and Bidkar (2 K. ix. 26). But the triumph was a short one. Elijah had received an intimation from Jehovah of what was taking place, and rapidly as the accusation and death of Naboth had been hurried over, he was there to meet his ancient enemy, and as an enemy he does meet him — as David went out to meet [a] Goliath — on the very scene of his crime; suddenly, when least expected and least wished for, he confronts the miserable king. And then follows the curse, in terms fearful to any Oriental — peculiarly terrible to a Jew — and, most of all, significant to a successor of the apostate princes of the northern kingdom — "I will take away thy posterity; I will cut off from thee even thy very dogs; I will make thy house like that of Jeroboam and Baasha; thy blood shall be shed in the same spot where the blood of thy victims was shed last night; thy wife and thy children shall be torn in this very garden by the wild dogs of the city, or as common carrion devoured by the birds of the sky" — the large vultures which in eastern climes are always wheeling along under the clear blue sky, and doubtless suggested the expression to the prophet. How tremendous was this scene we may gather from the fact that after the lapse of at least 20 years Jehu was able to recall the very words of the prophet's burden, to which he and his companion had listened as they stood behind their master in the chariot. The whole of Elijah's denunciation may possibly be recovered by putting together the words recalled by Jehu, 2 K. ix. 26, 36, 37, and those given in 1 K. xxi. 19–25.

3. A space of three or four years now elapses (comp. 1 K. xxii. 1, xxii. 51; 2 K. i. 17), before we again catch a glimpse of Elijah. The denunciations uttered in the vineyard of Naboth have been partly fulfilled. Ahab is dead, and his son and successor, Ahaziah, has met with a fatal accident, and is on his death-bed, after a short and troubled reign of less than two years (2 K. i. 1, 2; 1 K. xxii. 51). In his extremity he sends to an oracle or shrine of Baal at the Philistine town of Ekron to ascertain the issue of his illness. But the oracle is nearer at hand than the distant Ekron. An intimation is conveyed to the prophet, probably at that time inhabiting one of the recesses of Carmel, and, as on the former occasions, he suddenly appears on the path of the messengers, without preface or inquiry utters his message of death, and as rapidly disappears. The tone of his words is as national on this as on any former occasion, and, as before, they are authenticated by the name of Jehovah — "Thus saith Jehovah, Is it because there is no God in Israel that ye go to inquire of Baal-zebub, god of Ekron?" The messengers returned to the king too soon to have accomplished their mission. They were possibly strangers; at any rate they were ignorant of the name of the man who had thus interrupted their journey. But his appearance had fixed itself in their minds, and their description at once told Ahaziah, who must have seen the prophet about his father's court or have heard him described in the harem, who it was that had thus reversed the favorable oracle which he was hoping for from Ekron. The "hairy man" — the "lord of hair," so the Hebrew reading [b] runs — with a belt of rough skin round his loins, who came and went in this secret manner, and uttered his fierce words in the name of the God of Israel, could be no other than the old enemy of his father and mother, Elijah the Tishbite. But ill as he was this check only roused the wrath of Ahaziah, and, with the spirit of his mother, he at once seized the opportunity of possessing himself of the person of the man who had been for so long the evil genius of his house. A captain was despatched, with a party of fifty, to take Elijah prisoner. He was sitting [perhaps = "dwelt"] on the top of "the mount," [c] *i. e.* probably of Carmel [comp. 2 K. ii 25]. The officer approached and addressed the prophet by the title which, as before noticed, is most frequently applied to him and Elisha — "O man of God, the king hath spoken: come down." "And Elijah answered and said, If I be a man of God, then let fire come down from heaven and consume thee and thy fifty! And there came down fire from heaven and consumed him and his fifty." A second party was sent, only to meet the same fate. The altered tone of the leader of a third party, and the assurance of God that his servant need not fear, brought Elijah down. But the king gained nothing. The message was delivered to his face in the same words as it had been to the messengers, and Elijah, so we must conclude, was allowed to go harmless. This was his last interview with the house of Ahab. It was also his last recorded appearance in person against the Baal-worshippers.

Following as it did on Elijah's previous course of action, this event must have been a severe blow to the enemies of Jehovah. But impressive as it doubtless was to the contemporaries of the prophet, the story possesses a far deeper significance for us than it could have had for them. While it is most characteristic of the terrors of the earlier dispensation under which men were then living, it is remarkable as having served to elicit from the mouth of a greater than even Elijah an exposition, no less characteristic, of the distinction between that severe rule and the gentler dispensation which He came to introduce. It was when our Lord and his disciples were on their journey through this very district, from Galilee to Jerusalem, and when smarting from the churlish inhospitality of some Samaritan villagers, that — led to it by the distant view of the heights of Carmel, or, perhaps, by some traditional name on the road — the impetuous zeal of the two "sons of thunder" burst forth — "Lord, wilt thou that we command fire to come down from heaven and consume them, even as Elijah did?" But they little knew the Master they addressed. "He turned and rebuked them, and said, Ye know not what manner of spirit ye are of. For the Son of Man is not come to destroy men's lives, but to save them" (Luke ix. 51–56).[d] As if he had said,

[a] The Hebrew word is the same.

[b] See p. 708, note *b*.

[c] הָהָר (2 K. i. 9), A. V., inaccurately, "an hill."

[d] * This passage presents a very interesting problem in textual criticism, which it may be proper to notice, though its full discussion would here be out of place. The words following "He turned and rebuked them" (from "and said" to "save them" inclusive, though so appropriate to the occasion and in every respect so worthy of our Lord, are wanting in a large majority of the most important manuscripts (namely, A B C E G H L S V X Δ Π and the Sinaitic) and in other leading authorities for the settlement of the text. They are accordingly rejected by Lachmann

"Ye are mistaking and confounding the different standing points of the Old and New Covenants; taking your stand upon the Old — that of an avenging righteousness, when you should rejoice to take it upon the New — that of a forgiving love" (Trench, *Miracles*, ch. iv.).

4. It must have been shortly after the death of Ahaziah that Elijah made a communication with the southern kingdom. It is the only one of which any record remains, and its mention is the first and last time that the name of the prophet appears in the books of Chronicles. Mainly devoted as these books are, to the affairs of Judah, this is not surprising. The alliance between his enemy Ahab and Jehoshaphat cannot have been unknown to the prophet, and it must have made him regard the proceedings of the kings of Judah with more than ordinary interest. When, therefore, Jehoram, the son of Jehoshaphat, who had married the daughter of Ahab, began "to walk in the ways of the kings of Israel, as did the house of Ahab, and to do that which was evil in the sight of Jehovah," Elijah sent him a letter[a] denouncing his evil doings, and predicting his death (2 Chr. xxi. 12–15). This letter has been considered as a great difficulty, on the ground that Elijah's removal must have taken place before the death of Jehoshaphat (from the terms of the mention of Elisha in 2 K. iii. 11), and therefore before the accession of Joram to the throne of Judah. But admitting that Elijah had been translated before the expedition of Jehoshaphat against Moab, it does not follow that Joram was not at that time, and before his father's death, king of Judah, Jehoshaphat occupying himself during the last six or seven years of his life in going about the kingdom (2 Chr. xix. 4–11), and in conducting some important wars, amongst others that in question against Moab, while Joram was concerned with the more central affairs of the government (2 K. iii. 7, &c.). That Joram began to reign during the lifetime of his father Jehoshaphat is stated in 2 K. viii. 16. According to one record (2 K. i. 17), which immediately precedes the account of Elijah's last acts on earth, Joram was actually on the throne of Judah at the time of Elijah's interview with Ahaziah; and though this is modified by the statements of other places[b] (2 K. iii. 1, viii. 16), yet it is not invalidated, and the conclusion is almost inevitable, as stated above, that Joram ascended the throne some years before the death of his father. [See JORAM; JEHOSHAPHAT; JUDAH.] In its contents the letter bears a strong resemblance to the speeches of Elijah,[c] while in the details of style it is very peculiar, and quite different from the narrative in which it is imbedded (Bertheau, *Chronik*, ad loc.).

5. The closing transaction of Elijah's life introduces us to a locality heretofore unconnected with him. Hitherto we have found him in the neighborhood of Samaria, Jezreel, Carmel, only leaving these northern places on actual emergency, but we now find him on the frontier of the two kingdoms, at the holy city of Bethel, with the sons of the prophets at Jericho, and in the valley of the Jordan (2 K. ii. 1, &c.).

It was at GILGAL — probably not the ancient place of Joshua and Samuel, but another of the same name still surviving on the western edge of the hills of Ephraim[d] — that the prophet received the divine intimation that his departure was at hand. He was at the time with Elisha, who seems now to have become his constant companion. Perhaps his old love of solitude returned upon him perhaps he wished to spare his friend the pain of

Tischendorf, and Tregelles, though defended by Alford, and, as far as ver. 55 is concerned, by Meyer and Bleek, who explain their omission by the supposition that the eye of the copyist passed from ΚΑΙΕΙΠεν to ΚΑΙΕΙΠοριεθησαν. The 56th verse (so far as quoted above) which is wanting in D and a very few other documents which contain the rest of the words in question, is rejected by most critics, though the authorities which support it are substantially the same with those which contain ver. 55. Further, the words ὡς καὶ Ἠλίας ἐποίησε, "even as Elias did," in ver. 54, which are wanting in B L Ξ and the Sinaitic MS., also in the Curetonian Syriac, Vulgate, and Armenian versions, and some MSS. of the Old Latin and Coptic, are likewise rejected by Tischendorf and Tregelles, according to whom the whole passage as originally written reads thus: "Lord, wilt thou that we command fire to come down from heaven and destroy them? But he turned and rebuked them; and they went to another village."

The whole question is discussed by Mr. Norton in his *Evidences of the Genuineness of the Gospels* in a very able and instructive note (vol. i. pp. lxxx.–lxxxvii., 2d ed. Boston, 1846). Though concluding that the words in question "did not make a part of the original text of Luke's Gospel," he goes on to remark: —

"But, on the other hand, the words carry with them strong intrinsic proof that they were spoken by Jesus. Nor can we imagine any reason why, if not uttered by him, they should have been invented and ascribed to him.

"In this state of the case, the only solution of the appearances that present themselves seems to be, that the words ascribed to our Lord were spoken by him, that they were preserved in the memories of those who heard him, and communicated by them to others, and that, not having been recorded by Luke, they were first written in the margin, and then introduced into the text of his Gospel."

The state of the external testimony is such, that he further supposes "that the account of the words of our Lord and his disciples was not introduced in a complete form at once; but that the text owes its present state to marginal additions made at three different times: first, the words, 'As Elijah did,' being written down, as these are wanting in the smallest number of manuscripts, then those first spoken by our Lord, and then his remaining words." A.

[a] מִכְתָּב, "a writing" [A. V.], almost identical with the word used in Arabic at the present day. The ordinary Hebrew word for a letter is *Sepher*, סֵפֶר, a book.

[b] The second statement of Jehoram's accession to Israel (in 2 K. iii. 1) seems inserted there to make the subsequent narrative more complete. Its position there, subsequent to the story of Elijah's departure has probably assisted the ordinary belief in the difficulty in question.

[c] The ancient Jewish commentators got over the apparent difficulty by saying that the letter was written and sent after Elijah's translation. Others believed that it was the production of Elisha, for whose name that of Elijah had been substituted by copyists. The first of these requires no answer. To the second, the severity of its tone, as above noticed, is a sufficient reply. Josephus (*Ant.* ix. 5, § 2) says that the letter was sent while Elijah was still on earth. (See Lightfoot, *Chronicle*, &c., "Jehoram." Other theories will be found in Fabricius, *Cod. Pseudepig.* i. 1075, and Otho, *Lex. Rabb.* p. 167.)

[d] The grounds for this inference are given under ELISHA (p. 718). See also GILGAL.

Digitized by Google

so sudden parting; in either case he endeavors to persuade Elisha to remain behind while he goes on an errand of Jehovah. "Tarry here, I pray thee, for Jehovah hath sent me to Bethel." But Elisha will not so easily give up his master, — "As Jehovah liveth and as thy soul liveth I will not leave thee." They went together to Bethel.[a] The event which was about to happen had apparently been communicated to the sons of the prophets at Bethel, and they inquire if Elisha knew of his impending loss. His answer shows how fully he was aware of it. "Yea," says he, with all the emphasis possible, "indeed *I do*[b] know it, hold ye your peace." But though impending, it was not to happen that day. Again Elijah attempts to escape to Jericho, and again Elisha protests that he will not be separated from him. Again, also, the sons of the prophets at Jericho make the same unnecessary inquiries, and again he replies as emphatically as before. Elijah makes a final effort to avoid what they both so much dread. "Tarry here, I pray thee, for Jehovah hath sent me to the Jordan." But Elisha is not to be conquered, and the two set off across the undulating plain of burning sand, to the distant river, — Elijah in his mantle or cape of sheep-skin, Elisha in ordinary clothes (הֶבֶל, ver. 12). Fifty men of the sons of the prophets ascend the abrupt heights behind the town — the same to which a late tradition would attach the scene of our Lord's temptation — and which command the plain below, to watch with the clearness of eastern vision what happens in the distance. Talking as they go, the two reach the river, and stand on the shelving bank beside its swift brown current. But they are not to stop even here. It is as if the aged Gileadite cannot rest till he again sets foot on his own side of the river. He rolls up[c] his mantle as into a staff, and with his old energy strikes the waters as Moses had done before him — strikes them as if they were an enemy;[d] and they are divided hither and thither, and they two go over on dry ground. What follows is best told in the simple words of the narrative. "And it came to pass when they were[e] gone over, that Elijah said to Elisha, Ask what I shall do for thee, before I be taken away from thee. And Elisha said, I pray thee let a double portion of thy spirit be upon me. And he said, Thou hast asked a hard thing: if thou see me taken from thee, it shall be so unto thee, but if not, it shall not be so. And it came to pass as they still went on, and talked, that, behold, a chariot of fire and horses of fire, and parted them both asunder, and Elijah went up by the whirlwind into the skies." Well might Elisha cry with bitterness,[g] "My father, my father!" He was gone who, to the discerning eye and loving heart of his disciple, had been "the chariot of Israel and the horsemen thereof" for so many years; and Elisha was at last left alone to carry on a task to which he must often have looked forward, but to which in this moment of grief he may well have felt unequal. He saw him no more; but his mantle had fallen, and this he took up — at once a personal relic and a symbol of the double portion of the spirit of Elijah with which he was to be clothed. Little could he have realized, had it been then presented to him, that he whose greatest claim to notice was that he had "poured water on the hands of Elijah" should hereafter possess an influence which had been denied to his master — should, instead of the terror of kings and people, be their benefactor, adviser, and friend, and that over his death-bed a king of Israel should be found to lament with the same words that had just burst from him on the departure of his stern and silent master, "My father, my father, the chariot of Israel and the horsemen thereof!"

And here ends all the direct information which is vouchsafed to us of the life and work of this great prophet. Truly he "stood up as a fire, and his word burnt as a lamp" (Ecclus. xlviii. 1). How deep was the impression which he made on the mind of the nation may be judged of from the fixed belief which many centuries after prevailed, that Elijah would again appear for the relief and restoration of his country. The prophecy of Malachi (iv. 5)[h] was possibly at once a cause and an illustration of the strength of this belief. What it had grown to at the time of our Lord's birth, and how continually the great prophet was present to the expectations of the people, we do not need the evidence of the Talmud to assure us,[i] it is patent

[a] The Hebrew word "went down" is a serious difficulty, if Gilgal is taken to be the site of Joshua's camp and the resting-place of the ark, since that is more than 3000 feet below Bethel. But this is avoided by adopting the other Gilgal to the N. W. of Bethel, and on still higher ground, which also preserves the sequence of the journey to Jordan. (See Stanley, *S. & P.* p. 308, note.) Some considerations in favor of this adoption will be found under ELISHA.

[b] גַּם־אֲנִי יָדַעְתִּי = "Also I know it;" Κἀγὼ ἔγνωσα.

[c] גְּלֹם. The above is quite the force of the word.

[d] The word is נָכָה, used of smiting in battle; generally with the sense of wounding (Gesen. p. 888).

[e] LXX. "As they were going over," ἐν τῷ διαβῆναι.

[f] The statements of the text hardly give support to the usual conception of Elijah's departure as represented by painters and in popular discourses. It was not in the chariot of fire that he went up into the skies. The fire served to part the master from the disciple, to show that the severance had arrived, but Elijah was taken up by the fierce wind of the tempest. The word סְעָרָה involves no idea of *whirling*, and is frequently rendered in the A. V. "storm" or "tempest." The term "the skies" has been employed above to translate the Hebrew הַשָּׁמַיִם, because we attach an idea to the word "heaven" which does not appear to have been present to the mind of the ancient Hebrews. [The word, among its other senses, often denotes the place of God's abode, and may very properly be so understood here. Indeed, that meaning only agrees with 2 K. ii. 1, and with the general tenor of the narrative. — H.]

[g] צָעַק, the word used amongst others for the "great and bitter cry" when the first-born were killed in Egypt.

[h] The expression in Malachi is "Elijah the prophet." From this unusual title some have believed that another Elijah was intended. The LXX., however, either following a different Hebrew text from that which we possess, or falling in with the belief of their times, insert the usual designation, "the Tishbite." (See Lightfoot, *Exercit.* on Luke i. 17.)

[i] He is recorded as having often appeared to the wise and good rabbis — at prayer in the wilderness, or on their journeys — generally in the form of an Arabian merchant (Eisenmenger, i. 11, ii. 407–7). At the circumcision of a child a seat was always placed

on every page of the Gospels. Each remarkable person, as he arrives on the scene, be his habits and characteristics what they may — the stern John equally with his gentle Successor — is proclaimed to be Elijah (Matt. xvi. 14; Mark vi. 15; John i. 21). His appearance in glory on the Mount of Transfiguration does not seem to have startled the disciples. They were "sore afraid," but not apparently surprised. On the contrary, St. Peter immediately proposes to erect a tent for the prophet whose arrival they had been so long expecting. [See TRANSFIGURATION, Amer. ed.] Even the cry of our Lord from the cross, containing as it did but a slight resemblance to the name of Elijah, immediately suggested him to the bystanders. "He calleth for Elijah." "Let be, let us see if Elijah will come to save him."

How far this expectation was fulfilled in John, and the remarkable agreement in the characteristics of these two men, will be considered under JOHN THE BAPTIST.

But on the other hand, the deep impression which Elijah had thus made on his nation only renders more remarkable the departure which the image conveyed by the later references to him evinces, from that so sharply presented in the records of his actual life. With the exception of the eulogiums contained in the catalogues of worthies in the book of Jesus the son of Sirach (xlviii.) and 1 Macc. ii. 58, and the passing allusion in Luke ix. 54, none of these later references allude to his works of destruction or of portent. They all set forth a very different side of his character to that brought out in the historical narrative. They speak of his being a man of like passions with ourselves (James v. 17); of his kindness to the widow of Sarepta (Luke iv. 25); of his "restoring all things" (Matt. xvii. 11); "turning the hearts of the fathers to the children, and the disobedient to the wisdom of the just" (Mal. iv. 5, 6; Luke i. 17). The moral lessons to be derived from these facts must be expanded elsewhere than here; it will be sufficient in this place to call attention to the great differences which may exist between the popular and contemporary view of an eminent character, and the real settled judgment formed in the progress of time, when the excitement of his more brilliant but more evanescent deeds has passed away. Precious indeed are the scattered hints and faint touches which enable us thus to soften the harsh outlines or the discordant coloring of the earlier picture. In the present instance they are peculiarly so. That wild figure, that stern voice, those deeds of blood, which stand out in such startling relief from the pages of the old records of Elijah, are seen by us all silvered over with the "white and glistering" light of the Mountain of Transfiguration. When he last stood on the soil of his native Gilead [a] he was destitute, afflicted, tormented, wandering about "in sheep-skins and goat-skins, in deserts and mountains, and dens and caves of the earth." But these things have passed away into the distance, and with them has receded the fiery zeal, the destructive wrath, which accompanied them. Under that heavenly light they fall back into their proper proportions, and Ahab and Jezebel, Baal and Ashtaroth are forgotten, as we listen to the prophet talking to our Lord — talking of that event which was to be the consummation of all that he had suffered and striven for — "talking of his decease which he should accomplish at Jerusalem."

Elijah has been canonized in both the Greek and Latin churches. Among the Greeks *Mar Elyâs* is the patron of elevated spots, and many a conspicuous summit in Greece is called by his name.[b] The service for his day — Ἠλίας μεγαλώνυμος — will be found in the *Menaion* on July 20, a date recognized by the Latin church also.[c] The convent bearing his name, *Deir Mar Elyâs*, between Jerusalem and Bethlehem, is well known to travellers in the Holy Land. It purports to be situated on the spot of his birth, as already observed. Other convents bearing his name once existed in Palestine: in *Jebel Ajlûn*, the ancient Gilead (Ritter, *Syrien*, pp. 1029, 1066, &c.); at *Ezra* in the *Hauràn* (Burckhardt, *Syria*, p. 59), and the more famous establishment on Carmel.

It is as connected with the great order of the barefooted Carmelites that Elijah is celebrated in the Latin church. According to the statements of the breviary (*Off. B. Mariæ Virginis de Monte Carmelo, Julii* 16) the connection arose from the dedication to the Virgin of a chapel on the spot from which Elijah saw the cloud (an accepted type of the Virgin Mary) rise out of the sea. But other legends trace the origin of the order to the great prophet himself as the head of a society of anchorites inhabiting Carmel: and even as himself dedicating the chapel in which he worshipped to the Virgin![d] These things are matters of controversy

for him, that as the zealous champion and messenger of the "covenant" of circumcision (1 K. xix. 14; Mal. iii. 1) he might watch over the due performance of the rite. During certain prayers the door of the house was set open that Elijah might enter and announce the Messiah (Eisenmenger, i. 685). His coming will be three days before that of the Messiah, and on each of the three he will proclaim, in a voice which shall be heard all over the earth, peace, happiness, salvation, respectively (Eisenmenger, ii. 696). So firm was the conviction of his speedy arrival, that when goods were found and no owner appeared to claim them, the common saying was, "Put them by till Elijah comes" Lightfoot, *Exercit.* Matt. xvii. 10; John i. 21). The same customs and expressions are even still in use among the stricter Jews of this and other countries. (See *Revue des deux Mondes*, xxiv. 131, &c.) [See also the art. *Eliahu* in Hamburger's *Real-Encycl. f. Bibel u. Talmud.* — A.]

* On this subject there is an essay entitled *Der Prophet Elia in der Legende*, in Frankel's *Monatsschrift f. Gesch. d. Judentums*, 1863, xii. 241 ff., 281 ff. The writer divides the legends into three periods: the first, of pure Messianic expectation, closes with the Mishna; the second, in which Elijah is represented as taking part in human affairs even before his Messianic coming, closes with the Talmud; in the third the legends reach the height of extravagance. On the Jewish expectations in regard to Elijah in the time of Christ see Norton's note on Matt. xi. 10 (*Translation of the Gospels*, ii. 111-118); Bertholdt, *Christol.* p. 58 ff. Most of the Christian fathers believed that Elijah would be the precursor of Christ at his *second* coming; see Suicer's *Thes.* i. 1318, also 392-3, and Stuart's *Comm. on the Apocalypse*, ii. 221 ff. A.

[a] See the considerations adduced by Stanley (*S. & P.* [p. 392, Amer. ed.]) in favor of the Mountain of the Transfiguration being on the east of Jordan. [See HERMON; TABOR.]

[b] See this fact noticed in Clark's *Peloponnesus and Morea*, p. 190.

[c] See the *Acta Sanctorum*, July 20. By Cornelius a Lapide it is maintained that his ascent happened on that day, in the 19th year of Jehoshaphat (Kell p. 331).

[d] S. John of Jerusalem, as quoted by Mislin, *Locus*

Digitized by Google

a the Roman church, Baronius and others having proved that the order was founded in 1131, a date which is repudiated by the Carmelites (see extracts in Fabricius, *Cod. Pseudepigr.* i. 1077).

In the Mohammedan traditions *Ilyás* is said to have drunk of the Fountain of Life, "by virtue of which he still lives, and will live to the day of Judgment." He is by some confounded with St. George and with the mysterious *el-Khidr*, one of the most remarkable of the Muslim saints (see Lane's *Arabian Nights*, introd. note 2; also *Selections from the Kurán*, 221, 222). The Persian *Sofis* are said to trace themselves back to Elijah (Fabricius, i. 1077).

Among other traditions it must not be omitted that the words "Eye hath not seen," &c., 1 Cor. ii. 9, which are most probably quoted by the Apostle from Isaiah lxiv. 4, were, according to an ancient belief, from "the Apocalypse, or mysteries of Elijah," τὰ Ἠλία ἀποκρύφα. The first mention of this appears to be [by] Origen (*Hom. on* Matt. xxvii. 9), and it is noticed with disapproval by Jerome, *ad Pammachium* (see Fabricius, i. 1072).

By Epiphanius, the words "awake, thou that sleepest," &c., Eph. v. 14, are inaccurately alleged to be quoted "from Elijah," *i. e.* the portion of the O. T. containing his history — παρὰ τῷ Ἠλίᾳ (comp. Rom. xi. 2).

Two monographs on Elijah must not be overlooked: (1) that of Frischmuth, *De Eliæ Prophetæ Nom., &c.*, in the *Critici Sacri;* and (2) *Elias Thesbites*, by Ægidius Camartus, 4to, Paris, 1631. There are also dissertations of great interest on the ravens, the mantle, and Naboth, in the *Critici Sacri.* G.

* The Biblical facts relating to Elijah, accompanied with suggestive remarks on his character and the significance of his ministry, have been wrought into an interesting form by Mr. Stanley, in the second volume of his *Lectures on the History of the Jewish Church* (p. 321 ff.), published since the preceding article was written. It is difficult to represent the composition by any single extract; but the following scene, that of the coming tempest as descried from the top of Carmel, and the flight of the prophet to Jezreel, is described with remarkable truthfulness and beauty: "At 'the top of the mountain,' but on a lower declivity (see 1 K. xviii. 43, 44), Elijah bent himself down, with his head, in the oriental attitude of entire abstraction, placed between his knees; whilst his attendant boy mounted to the highest point of all, whence, over the western ridge, there was a wide view of the Mediterranean sea. The sun must have been now gone down. But the cloudless sky would be lit up by the long bright glow which succeeds an eastern sunset. Seven times the youthful watcher [Elijah's attendant] ascended and looked; and seven times 'there was nothing.' The sky was still clear; the sea was still calm. At last, out of the far horizon there arose a little cloud, the first that for days and months had passed across the heavens; and it grew in the deepening shades of evening, and quickly the whole sky was overcast, and the forests of Carmel shook in the welcome sound of those mighty winds which in eastern regions precede a coming tempest. Each from his separate height, the King and the Prophet descended. The cry of the boy from his mountain watch had hardly been uttered when the storm broke upon the plain, and the torrent of Kishon began to swell. The King had not a moment to lose, lest he should be unable to reach Jezreel. He mounted his chariot at the foot of the hill. And Elijah was touched as by a supporting hand: and he snatched up his streaming mantle and twisted it round his loins, and amidst the rushing storm with which the night closed in, he outstripped even the speed of the royal horses, and 'ran before the chariot' [a] — as the Bedouins of his native Gilead would still run — with inexhaustible strength, to the entrance of Jezreel, distant, though visible, from the scene of his triumph."

The history and character of Elijah have furnished numerous texts for homiletic uses. Of the writers who have applied the teachings of the narrative in this manner may be mentioned Gottfried Menken, *Homilien üb. die Gesch. des Prophet Elias*, xxiv. discourses (*Schriften*, ii. 17–302, Bremen, 1858); Fr. W. Krummacher, whose *Elias der Thisbiter* (Elberf. 1828–33, 5e Ausg. 1860, Eng. trans. Lond. 1840, Amer. ed. N. Y. 1847) has been extensively read in English as well as German; and Bishop Hall, *Contemplations on Passages of the Old and New Testaments* (books xviii. and xix.). Some of the best chapters in Kitto's *Daily Bible Illustrations* are those which relate to events in the biography of this prophet. One of Keble's hymns in the *Christian Year* is entitled "Elijah in Horeb." See also Ewald's *Geschichte des Volkes Israel*, iii. 524 ff., 3e Ausg. (to whom Stanley acknowledges himself greatly indebted); Winer, *Realw.* i. 317–20; Knobel, *Der Prophetismus der Hebr.* ii. 73–88; Köster, *Die Propheten des A. u. N. Test.* pp. 70–82; Kurtz's article, though brief, in Herzog's *Real-Encykl.* iii. 754–758; Friedr. Rud. Hasse, *Gesch. des Alt. Bundes*, pp. 97–102 (Leipz. 1863); Milman's *Hist. of the Jews*, i. 389–401 (Amer. ed.); and the valuable article in Fairbairn's *Imperial Bible Dictionary*, i. 502–509. H.

ELI'KA (אֶלִיקָא): [Rom. Vat. omit; Comp. Ἐλιούδ;] Alex. Ελικα: *Elica*), a Harodite, *i. e.* from some place called Charod [HAROD in A. V. Judg. vii. 1]; one of David's guard (2 Sam. xxiii 25). The name is omitted in the corresponding list of 1 Chr. xi. 27, — to account for which see Kennicott's conjecture (*Dissertation, &c.*, p. 182).

* The etymology is unknown (Ges.). Fürst derives it from אֵל and קָא (קוּא), *God is rejecter, i. e.* of a nation or individual. H.

E'LIM (אֵילִם[b]: Αἰλείμ: [*Elim*]), mentioned Ex. xv. 27; Num. xxxiii. 9, as the second station where the Israelites encamped after crossing the Red Sea. It is distinguished as having had "twelve wells (rather "fountains," עֲיֹנֹת) of

Saints, ii. 49; and the Bulls of various Popes enumerated by Quaresmius, vol. ii.

a * This running of the prophet before the king's chariot, at the top of his speed, a distance of 12 miles across the plain from Carmel to Jezreel is not unlike what is still practiced in the East by runners who precede persons of rank as a mark of homage or as part of the official equipage. See a striking illustration of this in Thomson's *Land and Book*, ii. 227. H.

b Root אָאַל, or אָיַל, "to be strong," hence "a strong tree," properly either an "oak" or "terebinth," but also generally "tree;" here in plur. as "*the* trees of the desert" (Stanley, *S. & P.* p. 515, § 76). Eloth or Elath is another plur. form of the same [Gesenius and Fürst say "palms."]

Digitized by Google

water, and threescore and ten palm-trees." Laborde (*Geographical Commentary on Exod.* xv. 27) supposed *Wady Useit* to be Elim, the second of four wadies lying between 29° 7′, and 29° 20′,[a] which descend from the range of *et-Tih* (here nearly parallel to the shore), towards the sea, and which the Israelites, going from N. W. to S. E. along the coast would come upon in the following order:—*W. Ghurundel* (where the "low hills" begin, Stanley, *S. & P.* p. 35), *W. Useit*, *W. Thâl*, and *W. Shubeikeh*; the last being in its lower part called also *W. Taiyibeh*, or having a junction with one of that name. Between *Useit* and *Taiyibeh*, the coast-range of these hills rises into the *Gebel Hummam*, "lofty and precipitous, extending in several peaks along the shore, apparently of chalky limestone, mostly covered with flints . . . its precipices . . . cut off all passage along shore from the hot springs (lying a little W. of S. from the mouth of *Wady Useit*, along the coast) to the mouth of *W. Taiyibeh*" (Rob. i. 102; comp. Stanley, *S. & P.* p. 35). Hence, between the courses of these wadies the track of the Israelites must have been inland. Dr. Stanley says, "Elim must be *Ghurundel*, *Useit*, or *Taiyibeh*," (p. 35); elsewhere (p. 66), that "one of *two* valleys, or perhaps *both*, must be Elim;" these appear from the sequel to be *Ghurundel* and *Useit*, "fringed with trees and shrubs, the first vegetation he had met with in the desert;" among these are "wild palms," not stately trees, but dwarf or savage, "tamarisks," and the "wild acacia." Lepsius takes another view, namely, that *Ghurundel* is Mara, by others identified with *Howara*[b] (2½ hours N. W. from *Ghurundel*, and reached by the Israelites, therefore, before it), and that Elim is to be found in the last of the four above named, *W. Shubeikeh* (Lepsius, *Travels*, Berlin, 1845, 8. 1. 27 ff.). [WILDERNESS OF THE WANDERING.]

H. H.

ELIM'ELECH [*Heb.* -me'lech] (אֱלִימֶלֶךְ: Ἐλιμέλεχ; [Vat. Αβειμελεχ; Alex. Αλιμελεκ, -λεχ, Αβιμελεχ: *Elimelech*]), a man of the tribe of Judah, and of the family of the Hezronites and the kinsman of Boaz, who dwelt in Bethlehem-Ephratah in the days of the Judges. In consequence of a great dearth in the land he went with his wife Naomi, and his two sons, MAHLON and CHILION, to dwell in Moab, where he and his sons died without posterity. Naomi returned to Bethlehem with Ruth, her daughter-in-law, whose marriage with Boaz, "a mighty man of wealth, of the family of Elimelech," "her husband's kinsman," forms the subject of the book of Ruth. (Ruth i. 2, 3, ii. 1, 3, iv. 3, 9.) A. C. H.

* Elimelech signifies, if י be pronominal, *my God is king*; but if merely paragogic, *God is king*. This import of the name, as Cassel remarks (*Richter u. Ruth* in Lange's *Bibelwerk*, p. 205), indicates the rank of Elimelech's family, since all the names with this element (מֶלֶךְ), as far as we know, *e. g.* Abimelech, Ahimelech, were borne by eminent persons. How long he lived after the arrival in Moab is uncertain; for though evidently the sons were not married till after his death (Ruth i. 3, 4), it does not appear how many of the ten years of the sojourn there had elapsed (ver. 4) when the sons were married. [RUTH; RUTH, BOOK OF.] H.

ELIOË'NAI [5 syl., 4 in Heb.] (אֶלְיוֹעֵנַי [*unto Jehovah are my eyes*, Ges.]: [Ἐλιθενάν Vat. Ελειθαιναν; Alex. Ελιωηναι: *Elioenai*]). 1. Head of one of the families of the sons of Becher, the son of Benjamin (1 Chr. vii. 8).

2. [Ἐλιωναΐ; Alex. Ελιωηι.] Head of a family of the Simeonites (1 Chr. iv. 36).

3. (Accur. ELIHOË'NAI [5 syl.], אֶלְיְהוֹעֵינַי. [Ἐλιωναΐ; Vat. -ναις; Alex. Ελιωηναι.]) Seventh son of Meshelemiah, the son of Kore, of the sons of Asaph, a Korhite Levite, and one of the door-keepers of the "house of Jehovah" (1 Chr. xxvi. 3). It appears from ver. 14 that the lot fell to Meshelemiah (Shelemiah) to have the east-gate; and as we learn from ver. 9 that he had eighteen strong men of his sons and brethren under him, we may conclude that all his sons except Zechariah the first-born (ver. 14) served with him, and therefore Elioenai likewise. There were six Levites daily on guard at the east-gate, whose turn would therefore come every third day.

4. [Ἐλιθενάν; Vat. Ελειθαια, -θεναν; Alex. Ελιωηναι, -ωννα.] Eldest son of Neariah, the son of Shemaiah, 1 Chr. iii. 23, 24. According to the present Heb. text he is in the seventh generation from Zerubbabel, or about contemporary with Alexander the Great; but there are strong grounds for believing that Shemaiah is identical with Shimei (ver. 19), Zerubbabel's brother. (See *Geneal. of our Lord*, 107–109, and ch. vii.)

5. [In Ezr. Ἐλιωναΐ; Vat. FA. -ωνα; Alex. Ελιωηναι; in Neh., Rom. Vat. Alex. omit; FA.[3] Ελιωηναΐ; Comp. Ald. Ἐλιωνί.] A priest of the sons of Pashur, in the days of Ezra, one of those who had married foreign wives, but who, at Ezra's instigation, put them away with the children born of them, and offered a ram for a trespass-offering (Ezr. x. 22). He is possibly the same as is mentioned in Neh. xii. 41, as one of the priests who accompanied Nehemiah with trumpets at the dedication of the wall of Jerusalem. He is called ELIONAS, 1 Esdr. ix. 22.

6. [Ἐλιωναΐ, Vat. -ωνα, FA. -ωναν; Alex Ελιωηναΐ, 2. m. Ελιωηναΐ.] An Israelite, of the sons of Zattu, who had also married a strange wife (Ezr. x. 27). From the position of Zattu in the lists, Ezr. ii. 8; Neh. vii. 13, x. 14, it was probably a family of high rank. ELIOËNAI is corrupted to ELIADAS, 1 Esdr. ix. 28. A. C. H.

ELIO'NAS. 1. (Ἐλιωναΐς, Alex. Ελιωνας; [Ald. Ἐλλίονας:] Vulg. omits), 1 Esdr. ix. 22. [ELIOENAI, 5.]

* The A. V. ed. 1611, with the Genevan version and the Bishops' Bible, following, as usual, the Aldine edition, reads ELLIONAS. A.

2. (Ἐλιωνάς; [Vat. Ελιωδας:] *Nonens*), 1 Esdr. ix. 32. [ELIEZER, 10.]

EL'IPHAL (אֶלִיפָל [*whom God judges*, Ges.]: Ἐλφάτ; Alex. Ελιφαελ; [Comp. Ἐλιφάλ:] *Eliphal*), son of Ur; one of the members of David's

[a] Seetzen (*Reisen*, 1854, iii. 114–117) traversed them all, and reached Howara in about a six hours' ride. He was going in the opposite direction to the routes of Robinson and Stanley; and it is interesting to compare his notes of the local features, caught in the reverse order, with theirs.

[b] Seetzen alleges that the scanty quantity of the water at *Howara* is against this identity — a weak reason, for the water-supply of these regions is highly variable. He also rejects *Ghurundel* as the site of Elim (iii. 117).

Digitized by Google

guard (1 Chr. xi. 35). In the parallel list in 2 Sam. xxiii. the name is given ELIPHELET, and the names in connection with it are much altered. [UR.]

ELIPH'ALAT (Ἐλιφαλάτ [Vat. -λει-]: *Eliphalach*), 1 Esdr. ix. 33. [ELIPHELET.]

ELIPH'ALET [*Heb.* Elipha'let] (אֱלִיפֶלֶט [*God delivers*]: [in 2 Sam. Ἐλιφαλάθ; Vat. Ελειφααθ; Alex.] Ελιφααθ; [in 1 Chr.,] Ἐλιφαλά; [Alex. -λετ; Vat. Εμφαλετ, FA. Ενφαλετ:] *Eliphaleth*, [*Eliphalet*]). 1. The last of the thirteen sons born to David, by his wives, after his establishment in Jerusalem (2 Sam. v. 16; 1 Chr. xiv. 7). Elsewhere, when it does not occur at a pause, the name is given with the shorter vowel — ELIPHELET (1 Chr. iii. 8). Equivalent to Eliphalet are the names ELPALET and PHALTIEL.

2. 1 Esdr. viii. 39. [Ἐλιφαλά, Vat. -λει-; Ald. Alex. Ἐλιφάλατος: *Eliphalam.*] [ELIPHELET, 5.]

ELIPHAZ (אֱלִיפַז [*God his strength*]: Ἐλιφάς; [in 1 Chr. Ἐλιφάζ; Vat. Ελειφας:] *Eliphaz*). 1. The son of Esau and Adah, and father of Teman (Gen. xxxvi. 4, 10–16; 1 Chr. i. 35, 36).

2. [Ἐλιφάζ; Alex. once -φας, Vat. Sin. Ελειφαζ, Ελιφας, Vat. twice Ελειφας, Sin. twice Ελιφαζ: *Eliphaz.*] The chief of the "three friends" of Job. He is called "the Temanite;" hence it is naturally inferred that he was a descendant of Teman (the son of the first Eliphaz), from whom a portion of Arabia Petræa took its name, and whose name is used as a poetical parallel to Edom in Jer. xlix. 20. On him falls the main burden of the argument, that God's retribution in this world is perfect and certain, and that consequently suffering must be a proof of previous sin (Job iv., v., xv., xxii.). His words are distinguished from those of Bildad and Zophar by greater calmness and elaboration, and in the first instance by greater gentleness towards Job, although he ventures afterwards, apparently from conjecture, to impute to him special sins. The great truth brought out by him is the unapproachable majesty and purity of God (iv. 12–21, xv. 12–16). [JOB, BOOK OF.] But still, with the other two friends, he is condemned for having, in defense of God's providence, spoken of him "the thing that was not right," i. e. by refusing to recognize the facts of human life, and by contenting himself with an imperfect retribution as worthy to set forth the righteousness of God. On sacrifice and the intercession of Job all three are pardoned [xlii. 7–9]. A. B.

ELIPH'ELEH (אֱלִיפְלֵהוּ [*whom God distinguishes*], i. e. *Eliphele'hu*: Ἐλιφενέ, Ἐλιφαλού, Alex. Ελιφαλα, [Ελιφαλαιας; Vat. Ελειφενα, Ενφανιας; FA. Ελειφενα, Ενφανιας:] *Eliphalu*), a Merarite Levite; one of the gatekeepers (שׁוֹעֲרִים, A. V. "porters") appointed by David to play on the harp "on the Sheminith" on the occasion of bringing up the Ark to the city of David (1 Chr. xv. 18, 21).

ELIPH'ELET [*Heb.* Eliphe'let] (אֱלִיפֶלֶט *God delivers*]).

1. (Ἐλιφαλήθ; [Vat. -λει-:] Alex. Ελιφαλετ: *Eliphaleth.*) The name of a son of David, one of the children born to him, by his wives, after his establishment in Jerusalem (1 Chr. iii. 6). In the list in 2 Sam. v. 15, 16, this name and another are omitted; while in another list in 1 Chr. xiv. 5, 6, it is given as ELPALET.

2. (Ἐλιφαλά; [Vat. -λει-; Alex. Ελιφαλετ. *Eliphelet.*) Another son of David, belonging also to the Jerusalem family, and apparently the last of his sons (1 Chr. iii. 8). In the other list, occurring at the pause, the vowel is lengthened and the name becomes ELIPHALET.

It is believed by some that there were not two sons of this name; but that, like Nogah, one is merely a transcriber's repetition. The two are certainly omitted in Samuel, but on the other hand they are inserted in two separate lists in Chronicles, and in both cases the number of sons is summed up at the close of the list.

3. (Ἀλιφαλέθ; [Vat. -λει-; Alex. Ελιφαλετ: *Elipheleth.*]) Son of Ahasbai, son of the Maachathite. One of the thirty warriors of David's guard (2 Sam. xxiii. 34). In the list in 1 Chr. xi. the name is abbreviated into ELIPHAL.

4. [Ἐλιφαλέτ; Vat. Ελειφαλειτ: *Eliphalet.*] Son of Eshek, a descendant of king Saul through Jonathan (1 Chr. viii. 39).

5. [Ἐλιφαλάτ; Alex. -λαθ; Vat. Αλειφατ: *Eliphelet.*] One of the leaders of the Bene-Adonikam, who returned from Babylon with Ezra (Ezr. viii. 13). [ELIPHALET, 2.]

6. [Ἐλιφαλέτ; Vat. FA. Ελειφαλεθ: *Elipheleth.*] A man of the Bene-Hashum, in the time of Ezra, who had married a foreign wife and had to relinquish her (Ezr. x. 33). [ELIPHALAT.]

ELIS'ABETH (Ἐλισάβετ: [*Elisabeth*]), the wife of Zacharias and mother of John the Baptist (Luke i. 5 ff.). She was herself of the priestly family, ἐκ τῶν θυγατέρων Ἀαρών, and a relation (συγγενής, Luke i. 36) of the mother of our Lord. [MARY, THE VIRGIN, II.] She is described as a person of great piety, and was the first to greet Mary, on her coming to visit her, as the mother of her Lord (Luke i. 42 ff.). H. A.

* For the import of the name, see ELISHEBA. The wife of Aaron bore the same name (Ex. vi. 23), and hence it is one that the females of a sacerdotal family like this of Elisabeth (Luke i. 5) would be apt to have given to them. The Greek form arose, says Fürst (*Hebr. u. Chald. Handwb.* i. 93), from אֱלִישֶׁבַע. How she was related to Mary the mother of Jesus, is uncertain. It may have been on the side of her own mother (her father being a Levite) as a descendant of David, or on that of Mary's mother (her father being of the house of David) as a descendant of Aaron. Marriages between those of different tribes were not forbidden, except when there were no sons, and the rights of property vested in daughters. H.

ELISE'US [properly ELIS.E'US] (Ἐλισαιέ [Vat. -λει-]; N. T. Rec. Text with C, Ἐλισσαῖος; Lachm. with A D [Sin.], Ἐλισαῖος; [B, Ελεισαιος:] *Eliseus*, but in Cod. Amiat. *Heliseus*): the form in which the name ELISHA appears in the A. V. of the Apocrypha and the N. T. (Ecclus. xlviii. 12; Luke iv. 27). [The A. V. ed. 1611, with other early editions, reads Elizeus in the passages referred to.]

EL.I'SHA (אֱלִישָׁע [*God is salvation*, i. e. *he who saves*]: Ἐλισαιέ; Alex. Ελισσαιε; Joseph. Ἐλισσαῖος: *Elisæus*), son of Shaphat of Abel-meholah.[a] The attendant and disciple (καὶ μαθητὴς

[a] The story in the *Chron. Paschale* and Epiphanius

καὶ διάκονος, Joseph. *Ant.* viii. 13, § 7) of Elijah, and subsequently his successor as prophet of the kingdom of Israel.

The earliest mention of his name is in the command to Elijah in the cave at Horeb (1 K. xix. 16, 17). But our first introduction to the future prophet is in the fields of his native place. Abel-meholah — the "meadow of the dance" — was probably in the valley of the Jordan, and, as its name would seem to indicate, in a moist or watered situation. [ABEL.] Elijah, on his way from Sinai to Damascus by the Jordan valley, lights on his successor engaged in the labors of the field, twelve yoke before him, *i. e.* either twelve ploughs at work in other parts of the field, or more probably twelve "yokes" of land already ploughed, and he himself engaged on the last.[a] To cross to him (*i. e.* on the other side of the Jordan), to throw over his shoulders the rough mantle — a token at once of investiture with the prophet's office, and of adoption as a son — was to Elijah but the work of an instant, and the prophet strode on as if what he had done were nothing.[b] "Go back again, for what have I done unto thee?"

So sudden and weighty a call, involving the relinquishment of a position so substantial, and family ties so dear, might well have caused hesitation. But the parley was only momentary. To use a figure which we may almost believe to have been suggested by this very occurrence, Elisha was not a man who, having put his hand to the plough, was likely to look back;[c] he delayed merely to give the farewell kiss to his father and mother, and preside at a parting feast with his people, and then followed the great prophet on his northward road to become to him what in the earlier times of his nation Joshua[d] had been to Moses.

Of the nature of this connection we know hardly anything. "Elisha the son of Shaphat, who poured water on the hands of Elijah," is all that is told us. The characters of the two men were thoroughly dissimilar, but how far the lion-like daring and courage of the one had infused itself into the other, we can judge from the few occasions on which it blazed forth, while every line of the narrative of Elijah's last hours on earth bears evidence how deep was the personal affection which the stern, rough, reserved master had engendered in his gentle and pliant disciple.

Seven or eight years must have passed between the call of Elisha and the removal of his master, and during the whole of that time we hear nothing of him. But when that period had elapsed he reappears, to become the most prominent figure in the history of his country during the rest of his long life. In almost every respect Elisha presents the most complete contrast to Elijah. The copious collection of his sayings and doings which are preserved in the 3d to the 9th chapter of the 2d book of Kings, though in many respects deficient in that remarkable vividness which we have noticed in the records of Elijah, is yet full of testimonies to this contrast. Elijah was a true Bedouin child of the desert. The clefts of the Cherith, the wild shrubs of the desert, the cave at Horeb, the top of Carmel, were his haunts and his resting-places. If he enters a city, it is only to deliver his message of fire and be gone. Elisha, on the other hand, is a civilized man, an inhabitant of cities. He passed from the translation of his master to dwell (יָשַׁב, A. V. "tarry") at Jericho (2 K. ii. 18); from thence he "returned" to Samaria (ver. 25) At Samaria (v. 3, vi. 32, comp. ver. 24) and at Dothan (vi. 13) he seems regularly to have resided in a house (v. 9, 24, vi. 32, xiii. 17) with "doors" and "windows," in familiar intercourse with the sons of the prophets, with the elders (vi. 32), with the lady of Shunem, the general of Damascus, the king of Israel. Over the king and the "captain of the host" he seems to have possessed some special influence, capable of being turned to material advantage if desired (2 K. iv. 13). And as with his manners so with his appearance. The touches of the narrative are very slight, but we can gather that his dress was the ordinary garment of an Israelite, the *beged*, probably similar in form to the long *abbeyeh* of the modern Syrians (2 K. ii. 12), that his hair was worn trimmed behind, in contrast to the disordered locks of Elijah (ii. 23, as explained below), and that he used a walking-staff (iv. 29) of the kind ordinarily carried by grave or aged citizens (Zech. viii. 4). What use he made of the rough mantle of Elijah, which came into his possession at their parting, does not anywhere appear, but there is no hint of his ever having worn it.

If from these external peculiarities we turn to the internal characteristics of the two, and to the results which they produced on their contemporaries, the differences which they present are highly instructive. Elijah was emphatically a destroyer His mission was to slay and to demolish whatever opposed or interfered with the rights of Jehovah, the Lord of Hosts. The nation had adopted a god of power and force, and they were shown that he was feebleness itself compared with the God whom they had forsaken. But after Elijah the destroyer comes Elisha the healer. "There shall not be dew nor rain these years" is the proclamation of the one. "There shall not be from thence any dearth

is that when Elisha first saw the light the golden calf at Gilgal roared, so loud as to be heard at Jerusalem, 'He shall destroy their graven and their molten images" (Fabricius, *Cod. pseudepigr.* i. 1071).

a "The exact rendering (1 K. xix. 19) is that Elisha "was ploughing: 12 yoke before him"; and the better explanation is not that the prophet followed a team of 12 oxen, but that 11 yoke of oxen with as many ploughs preceded him, and that he was the 12th at the end of the line. It is customary now for the farmers in Syria to plough in this manner. "I have seen," says Dr. Thomson (*Land and Book*, i. 208) "more than a dozen of them thus at work. . . . Their little ploughs" [see PLOUGH] "make no proper furrow, but merely root up and throw the soil on either side, and so any number may follow one another, each making its own scratch along the back of the earth, and when at the end of the field, they can return along the same line, and thus back and forth until the whole is ploughed. It was well that Elisha came the last of the twelve, for the act of Elijah would have stopped all that were in advance of him. They cannot pass one another." h

b So our translation, and so the latest Jewish rendering (Zunz). Other versions interpret the passage differently.

c According to Josephus (*Ant.* viii. 13, § 7) he began to prophesy immediately.

d The word יְשָׁרְתֵהוּ (A. V. "ministered to him"), is the same that is employed of Joshua Gehazi's relation to Elisha, except once, is designated by a different word, נַעַר = "lad" or "youth."

a barren land" is the first miracle of the other. What may have been the disposition of Elijah when not engaged in the actual service of his mission we have unhappily no means of knowing. Like most men of strong stern character, he had probably affections no less strong. But it is impossible to conceive that he was accustomed to the practice of that beneficence which is so strikingly characteristic of Elisha, and which comes out at almost every step of his career. Still more impossible is it to conceive him exercising the tolerance towards the person and the religion of foreigners for which Elisha is remarkable — in communication, for example, with Naaman or Hazael; in the one case calming with a word of peace the scruples of the new proselyte, anxious to reconcile the due homage to Rimmon with his allegiance to Jehovah; in the other case contemplating with tears, but still with tears only, the evil which the future king of Syria was to bring on his country. That Baal-worship was prevalent in Israel even after the efforts of Elijah, and that Samaria was its chief seat, we have the evidence of the narrative of Jehu to assure us (2 K. x. 18–27), but yet not one act or word in disapproval of it is recorded of Elisha. True, he could be as zealous in his feelings and as cutting in his words as Elijah. "What have I to do with thee?" says he to the son of Ahab — "this son of a murderer," as on another occasion he called him — "what have I to do with thee? get thee to the prophets of thy father and to the prophets of thy mother. As the Lord of hosts liveth before whom I stand" — the very formula of Elijah — "surely were it not that I regard the presence of Jehoshaphat king of Judah I would not look toward thee nor see thee!" But after this expression of wrath he allows himself to be calmed by the music of the minstrel, and ends by giving the three kings the counsel which frees them from their difficulty. So also he smites the host of the Syrians with blindness, but it is merely for a temporary purpose; and the adventure concludes by his preparing great provision for them, and sending these enemies of Israel and worshippers of false gods back unharmed to their master.

In considering these differences the fact must not be lost sight of that, notwithstanding their greater extent and greater detail, the notices of Elisha really convey a much more imperfect idea of the man than those of Elijah. The prophets of the nation of Israel — both the predecessors of Elisha, like Samuel and Elijah, and his successors, like Isaiah and Jeremiah — are represented to us as preachers of righteousness, or champions of Jehovah against false gods, or judges and deliverers of their country, or counsellors of their sovereign in times of peril and difficulty. Their miracles and wonderful acts are introduced as means toward these ends, and are kept in the most complete subordination thereto. But with Elisha, as he is pictured in these narratives, the case is completely reversed. With him the miracles are everything, the prophet's work nothing. The man who was for years the intimate companion of Elijah, on whom Elijah's mantle descended, and who was gifted with a double portion of his spirit,[a] appears in these records chiefly as a worker of prodigies, a predicter of future events, a revealer of secrets, and things happening out of sight or at a distance. The working of wonders seems to be a natural accompaniment of false religions, and we may be sure that the Baal-worship of Samaria and Jezreel was not free from such arts. The story of 1 K. xxii. shows that even before Elisha's time the prophets had come to be looked upon as diviners, and were consulted, not on questions of truth and justice, nor even as depositaries of the purposes and will of the Deity, but as able to foretell how an adventure or a project was likely to turn out, whether it might be embarked in without personal danger or loss. But if this degradation is inherent in false worship, it is no less a principle in true religion to accommodate itself to a state of things already existing, and out of the forms of the alien or the false to produce the power of the true.[b] And thus Elisha appears to have fallen in with the habits of his fellow-countrymen. He wrought, without reward and without ceremonial, the cures and restorations for which the soothsayers of Baal-zebub at Ekron were consulted in vain: he warned his sovereign of dangers from the Syrians which the whole four hundred of his prophets had not succeeded in predicting to Ahab, and thus in one sense we may say that no less signally than Elijah he vanquished the false gods on their own field. But still even with this allowance it is difficult to help believing that the anecdotes of his life (if the word may be permitted, for we cannot be said to possess his biography) were thrown into their present shape at a later period, when the idea of a prophet had been lowered from its ancient elevation to the level of a mere worker of wonders. A biographer who held this lower idea of a prophet's function would regard the higher duties above alluded to as comparatively unworthy of notice, and would omit all mention of them accordingly. In the eulogium of Elisha contained in the catalogue of worthies of Ecclus. xlviii. 12–14 — the only later mention of him save the passing allusion of Luke iv. 27 — this view is more strongly brought out than in the earlier narrative: "Whilst he lived, he was not moved by the presence of any prince, neither could any bring him into subjection. No word could overcome him, and after his death his body prophesied. He did wonders in his life, and at his death were his works marvellous."

But there are other considerations from which the incompleteness of these records of Elisha may be inferred: (1.) The absence of marks by which to determine the dates of the various occurrences.

[a] The ordinary meaning put upon this phrase (see for example, J. H. Newman, *Subjects of the Day*, p. 191) is that Elisha possessed double the power of Elijah. This, though sanctioned by the renderings of the Vulgate and Luther, and adopted by a long series of commentators from S. Ephraem Syrus to Pastor Krummacher, would appear not to be the real force of the words. פִּי שְׁנָיִם, literally "a mouth of two" — a double mouthful — is the phrase employed in Deut. xxi. 17 to denote the amount of a father's goods which were the right and token of a first-born son. Thus the gift of the "double portion" of Elijah's spirit was but the legitimate conclusion of the act of adoption which began with the casting of the mantle at Abel-meholah years before. This explanation is given by Grotius and others. (See Keil *ad loc.*) Ewald (*Gesch.* iii. 507) gives it as *nur Zweidrittel, und auch diese kaum* — two thirds, and hardly that. For a curious calculation by S. Peter Damianus, that Elijah performed 12 miracles and Elisha 24, see the *Acta Sanctorum*, July 20. [See PORTION, DOUBLE, Amer ed.]

The "king of Israel" is continually mentioned, but we are left to infer what king is intended (2 K. v. 5, 6, 7, &c., vi. 8, 9, 21, 26, vii. 2, viii. 3, 5, 6, &c.). This is the case even in the story of the important events of Naaman's cure, and the capture of the Syrian host at Dothan. The only exceptions are iii. 12 (comp. 6), and the narrative of the visit of Jehoash (xiii. 14, &c.), but this latter story is itself a proof of the disarrangement of these records, occurring as it does after the mention of the death of Jehoash (ver. 13), and being followed by an account of occurrences in the reign of Jehoahaz his father (vv. 22, 23). (2.) The absence of chronological sequence in the narratives. The story of the Shunammite embraces a lengthened period, from before the birth of the child till he was some years old. Gehazi's familiar communication with the king, and therefore the story which precedes it (viii. 1, 2), must have occurred before he was struck with leprosy, though placed long after the relation of that event (v. 27). (3.) The different stories are not connected by the form of words usually employed in the consecutive narrative of these books. (See Keil, *Kings*, p. 348, where other indications will be found.)

With this preface we pass to the consideration of the several occurrences preserved to us in the life of the prophet.

The call of Elisha seems to have taken place about four years before the death of Ahab. He died in the reign of Joash, the grandson of Jehu. This embraces a period of not less than 65 years, for certainly 55 of which he held the office of "prophet in Israel" (2 K. v. 8).[a]

1. After the departure of his master, Elisha returned to dwell[b] at Jericho (2 K. ii. 18). The town had been lately rebuilt (1 K. xvi. 34), and was the residence of a body of the "sons of the prophets" (2 K. ii. 5, 15). No one who has visited the site of Jericho can forget how prominent a feature in the scene are the two perennial springs which, rising at the base of the steep hills of Quarantania behind the town, send their streams across the plain toward the Jordan, scattering, even at the hottest season, the richest and most grateful vegetation over what would otherwise be a bare tract of sandy soil. At the time in question part of the fountains further north and south; now they are sweet and pleasant, not cold indeed, but also only slightly warm" (Rob. *Phys. Geogr.* p. 255). This fountain is situated a mile or more in front of *Quarantania*, the reputed mount of Christ's temptation. Travellers from Jerusalem to the Jordan usually pitch their tents at night beside this sparkling fountain.

H.

at least of this charm was wanting. One of the springs was noxious — had some properties which rendered it unfit for drinking, and also prejudicial to the land (ii. 19, רָעִים = bad, A. V. "naught"). At the request of the men of Jericho Elisha remedied this evil. He took salt in a new vessel, and cast it into the water at its source in the name of Jehovah. From the time of Josephus (*B. J.* iv. 8, § 3) to the present (Sæwulf, *Mod. Trav.* p. 17; Mandeville; Maundrell; Rob. i. 554, 555), the tradition of the cure has been attached to the large spring N. W. of the present town, and which now bears, probably in reference to some later event, the name of *'Ain es-Sultân*.[c]

2. We next meet with Elisha at Bethel in the heart of the country, on his way from Jericho to Mount Carmel (2 K. ii. 23). His last visit had been made in company with Elijah on their road down to the Jordan (ii. 2). Sons of the prophets resided there, but still it was the seat of the calf-worship, and therefore a prophet of Jehovah might expect to meet with insult, especially if not so well known and so formidable as Elijah. The road to the town winds up the defile of the *Wady Suweinit*, under the hill which still bears what in all probability are the ruins of Ai, and which, even now retaining some trees, was at that date shaded by a forest, thick, and the haunt of savage animals.[d] Here the boys of the town were clustered, waiting, as they still wait at the entrance of the villages of Palestine, for the chance passer-by. In the short-trimmed locks of Elisha, how were they to recognize the successor of the prophet, with whose shaggy hair streaming over his shoulders they were all familiar? So with the license of the eastern children they scoff at the new comer as he walks by — "Go up,[e] roundhead! go up, roundhead!" For once Elisha assumed the sternness of his master. He turned upon them and cursed them in the name of Jehovah, and we all know the catastrophe which followed. The destruction of these children has been always felt to be a difficulty. It is so entirely different from anything elsewhere recorded of Elisha — the one exception of severity in a life of mildness and beneficence — that it is perhaps allowable to conclude that some circumstances have been omitted in the narrative, or that some expres-

[a] The figures given above are arrived at as follows: —

Ahab's reign after Elisha's call, say	4	years.
Ahaziah's do.	2	"
Joram's do.	12	"
Jehu's do.	28	"
Jehoahaz's do.	17	"
Joash, before Elisha's death, say	2	"
	65	

Out of the above Elijah lived probably 9 years; the 4 of Ahab, the 2 of Ahaziah, and say 3 of Joram: which leaves 56 years from the ascent of Elijah to the death of Elisha.

[b] Hebr. יָשַׁב; A. V. generally "dwelt," but here "tarried."

[c] This, or *'Ain Hajla*, in the same neighborhood, is probably the spring intended by Scott in the opening chapter of the *Talisman*, under the name of the "Diamond of the Desert." But his knowledge of the topography is evidently most imperfect.

[d] This *'Ain es-Sultân* is the only fountain near Jericho; and "there is every reason to regard these as the waters miraculously healed by Elisha. They may have been earlier brackish and warm, like most

[e] עֲלֵה, "go up," can hardly, as Abarbanel would have it, be a scoff at the recent ascent of Elijah. The word rendered above by "roundhead" (קָרֵחַ) is a peculiar Hebrew term for shortness of hair at the back of the head, as distinguished from גַּבַּח, bald in front: A. V. "forehead-bald." This is denied by Ewald (iii. 512). [See p. 703, note [b].]

Digitized by Google

was lost its special force, which would have explained and justified the apparent disproportion of the punishment to the offense.

3. Elisha extricates Jehoram king of Israel, and the kings of Judah and Edom, from their difficulty in the campaign against Moab, arising from want of water (iii. 4–27). The revolt of Moab occurred very shortly after the death of Ahab (iii. 5, comp. i. 1), and the campaign followed immediately — "the same day" (iii. 6; A. V. "time"). The prophet was with the army; according to Josephus (*Ant.* ix. 3, § 1), he "happened to be in a tent (ἔτυχε κατεσκηνωκώς) outside the camp of Israel." Joram he refuses to hear except out of respect for Jehoshaphat the servant of the true God; but a minstrel is brought, and at the sound of music the hand of Jehovah comes upon him, and he predicts a fall of rain, and advises a mode of procedure in connection therewith which results in the complete discomfiture of Moab. This incident probably took place at the S. E. end of the Dead Sea.

4. The widow of one of the sons of the prophets — according to Josephus, of Obadiah, the steward of Ahab — is in debt, and her two sons are about to be taken from her and sold as slaves. She has no property but a pot of oil. This Elisha causes (in his absence, iv. 5) to multiply, until the widow has filled with it all the vessels which she could borrow. No invocation of Jehovah is mentioned, nor any place or date of the miracle.

5. The next occurrence is at Shunem and Mount Carmel (iv. 8–37). The story divides itself into two parts, separated from each other by several years. (*a.*) Elisha, probably on his way between Carmel and the Jordan valley, calls accidentally at Shunem, now *Solam*, a village on the southern slopes of *Jebel ed-Duhy*, the Little Hermon of modern travellers. Here he is hospitably entertained by a woman of substance, apparently at that time ignorant of the character of her guest. There is no occasion here to quote the details of this charming narrative, or the manner in which, as a recompense for her care of the prophet, she was saved from that childless condition which was esteemed so great a calamity by every Jewish wife, and permitted to "embrace a son."

(*b.*) An interval has elapsed of several years. The boy is now old enough to accompany his father to the corn-field, where the harvest is proceeding. The fierce rays of the morning sun are too powerful for him, and he is carried home to his mother only to die at noon. She says nothing of their loss to her husband, but depositing her child on the bed of the man of God, at once starts in quest of him to Mount Carmel. The distance is fifteen or sixteen miles, at least four hours' ride; but she is mounted on the best ass[a] in the stable, and she does not slacken rein. Elisha is on one of the heights of Carmel commanding the road to Shunem, and from his position opposite to her (מִמֻּנֶגֶד) he recognizes in the distance the figure of the regular attendant at the services which he holds here at "new moon and sabbath" (comp. ver. 23). He sends Gehazi down to meet her, and inquire the reason of her unexpected visit. But her distress is for the ear of the master, and not of the servant, and she presses on till she comes up to the place where Elisha himself is stationed,[b] then throwing herself down in her emotion she clasps him by the feet. Misinterpreting this action, or perhaps with an ascetic feeling of the unholiness of a woman, Gehazi attempts to thrust her away. But the prophet is too profound a student of human nature to allow this — "Let her alone, for her soul is vexed within her, and Jehovah hath hid it from me, and hath not told me." "And she said" — with the enigmatical form of oriental speech — "Did I desire a son of my lord? did I not say do not deceive me?" No explanation is needed to tell Elisha the exact state of the case. The heat of the season will allow of no delay in taking the necessary steps, and Gehazi is at once despatched to run back to Shunem with the utmost speed.[c] He takes the prophet's walking-staff in his hand which he is to lay on the face of the child. The mother and Elisha follow in haste. Before they reach the village the sun of that long, anxious, summer afternoon must have set. Gehazi meets them on the road, but he has no reassuring report to give; the placing of the staff on the face of the dead boy had called forth no sign of life. Then Elisha enters the house, goes up to his own chamber, "and he shut the door on them twain, and prayed unto Jehovah." It was what Elijah had done on a similar occasion, and in this and his subsequent proceedings Elisha was probably following a method which he had heard of from his master. The child is restored to life, the mother is called in, and again falls at the feet of the prophet, though with what different emotions — "and she took up her son and went out."

There is nothing in the narrative to fix its date with reference to other events. We here first encounter Gehazi the "servant" of the man of God.[d] It must of course have occurred before the events of viii. 1–6, and therefore before the cure of Naaman, when Gehazi became a leper.

6. The scene now changes to Gilgal, apparently at a time when Elisha was residing there (iv. 38–41). The sons of the prophets are sitting round him. It is a time of famine, possibly the same seven years' scarcity which is mentioned in viii. 1, 2, and during which the Shunammite woman of the preceding story migrated to the Philistine country. The food of the party must consist of any herbs that can be found. The great caldron is put on at the command of Elisha, and one of the company brings his blanket (בִּגְדוֹ: not "lap" as in A. V.) full of such wild vegetables as he has collected, and empties it into the pottage. But no sooner have they begun their meal than the taste betrays the presence of some noxious herb,[e] and they cry out, "there is death in the pot, O man

[a] הָאָתוֹן — "the she-ass." She-asses were, and still are, most esteemed in the East.

[b] The A. V. in iv. 27, perversely renders הָהָר, "the mount," by "the hill," thus obscuring the connection with ver. 25, "Mount Carmel."

[c] "Gird up thy loins and go."

[d] נַעַר, *i. e.* the lad or youth, a term different from that by which the relation of Elisha to Elijah is designated — see above; though the latter is also occasionally applied to Gehazi.

[e] For a full discussion of the nature of this herb see the article *Pakyoth* by the late Dr. Forbes Royle in *Kitto's Cyclop.* One kind of small gourd has received the name *Cucumis prophetarum* in allusion to this circumstance; but Dr. Royle inclines to favor *C. colocynthis*, the colocynth, or *Momordica elaterium*, the squirting cucumber. *This* is surely impossible.

Digitized by Google

of God!" In this case the cure was effected by meal which Elisha cast into the stew, in the caldron. Here again there is no invocation of the name of Jehovah.

7. (iv. 42–44). This in all probability belongs to the same time, and also to the same place as the preceding. A man from Baal-shalisha brings the man of God a present of the first-fruits, which under the law (Num. xviii. 8, 12; Deut. xviii. 3, 4) were the perquisite of the ministers of the sanctuary — 20 loaves of the new barley, and some delicacy, the exact nature of which is disputed, but which seems most likely to have been roasted ears of corn not fully ripe,[a] brought with care in a sack or bag.[b] This moderate provision is by the word of Jehovah rendered more than sufficient for a hundred men.

This is one of the instances in which Elisha is the first to anticipate in some measure the miracles of Christ.

The mention of Baal-shalisha gives great support to the supposition that the Gilgal mentioned here (ver. 38) as being frequented by the sons of the prophets, and therefore the same place with that in ii. 1, was not that near Jericho; since Baal-shalisha or Beth-shalisha is fixed by Eusebius at fifteen Roman miles north of Lydda, the very position in which we still find the name of Gilgal lingering as *Jiljilieh*. [GILGAL.]

8. The simple records of these domestic incidents amongst the sons of the prophets are now interrupted by an occurrence of a more important character (v. 1–27).

The chief captain of the army of Syria, to whom his country was indebted for some signal success,[c] was afflicted with leprosy, and that in its most malignant form, the white variety (v. 27). In Israel this would have disqualified him from all employment and all intercourse (2 K. xv. 5; 2 Chr. xxvi. 20, 21). But in Syria no such practice appears to have prevailed; Naaman was still a "great man with his master," "a man of countenance." One of the members of his establishment is an Israelite girl, kidnapped by the marauders[d] of Syria in one of their forays over the border, and she brings into that Syrian household the fame of the name and skill of Elisha. "The prophet in Samaria," who had raised the dead, would, if brought "face to face"[e] with the patient, have no difficulty in curing even this dreadful leprosy. The news is communicated by Naaman himself[f] to the king. Benhadad had yet to learn the position and character of Elisha. He writes to the king of Israel a letter very characteristic of a military prince, and curiously recalling words uttered by another military man in reference to the cure of his sick servant many centuries later — "I say to this one, go, and he goeth, and to my servant do this, and he doeth it." "And now" — so ran Benhadad's letter after the usual complimentary introduction had probably opened the communication — "and now, when this letter is come unto thee, behold I have sent Naaman, my slave, to thee, that thou mayest recover him of his leprosy." With this letter, and with a present, in which the rich fabrics,[g] for which Damascus has been always in modern times so famous, form a conspicuous feature, and with a full retinue of attendants (13, 15, 23), Naaman proceeds to Samaria. The king of Israel — his name is not given, but it was probably Joram — is dismayed at the communication. He has but one idea, doubtless the result of too frequent experience — "Consider how this man seeketh a quarrel against me!" The occurrence soon reaches the ears of the prophet, and with a certain dignity he "sends" to the king — "Let him come to me, and he shall know that there is a prophet in Israel." To the house of Elisha Naaman goes with his whole cavalcade, the "horses and chariot" of the Syrian general fixing themselves particularly in the mind of the chronicler. Elisha still keeps in the background, and while Naaman stands at the doorway, contents himself with sending out a messenger with the simple direction to bathe seven times in the Jordan. The independent behavior of the prophet, and the simplicity of the prescription — not only devoid of any ceremonial, but absolutely insulting to the native of a city which boasted, as it still boasts, of the finest water-supply of any city of the East — all combined to enrage Naaman. His slaves, however, knew how to deal with the quick but not ungenerous temper of their master, and the result is that he goes down to the Jordan and dips himself seven times, "and his flesh came again like the flesh of a little child, and he was clean." His first business after his cure is to thank his benefactor. He returns with his whole following (מַחֲנֵהוּ, *i. e.* "host," or "camp"), and this time he will not be denied the presence of Elisha, but making his way in, and standing before him, he gratefully acknowledges the power of the God of Israel, and entreats him to accept the present which he has brought from Damascus. But Elisha is firm, and refuses the offer, though repeated with the strongest adjuration. Naaman, having adopted Jehovah as his God, begs to be allowed to take away some of the earth of his favored country, of which to make an altar. He then consults Elisha on a difficulty which he foresees. How is he, a servant of Jehovah, to act when he accompanies the king to the temple of the Syrian god Rimmon? He must bow before the god; will Jehovah pardon this disloyalty? Elisha's answer is "Go in peace," and with this farewell the caravan moves off. But Gehazi, the attendant of Elisha, cannot allow such treasures thus to escape him. "As Jehovah liveth," an expression, in the lips of this vulgar Israelite, exactly

[a] The Hebrew expression כַּרְמֶל seems to be elliptical for גֶּרֶשׂ כַּ (Lev. ii. 14; A. V. "green ears of corn"). The same ellipsis occurs in Lev. xxiii. 14 (A. V. "green ears"). The old Hebrew interpretation is "tender and fresh ears." Gesenius (*Thes.* p. 713) makes it out to be grains or grits. The passage in Lev. ii. 14, compared with the common practice of the East in the present day, suggests the meaning given above.

[b] צְקְלוֹן: LXX. πήρα. The word occurs only here. The meaning given above is recognised by the majority of the versions and by Gesenius, and is stated in the margin of A. V.

[c] The tradition of the Jews is that it was Naaman who killed Ahab (*Midrash Tehillim*, p. 29 *b*, on Ps lxxviii.).

[d] Hebr. גְּדוּדִים, *i. e.* plunderers, always the irregular parties of marauders.

[e] So the Hebrew. A. V. "with."

[f] A. V. "*one* went in" is quite gratuitous.

[g] The word used is לְבוּשׁ — a dress or costume in

equivalent to the oft-repeated *Wallah* — 'by God" — of the modern Arabs, "I will run after this Syrian and take somewhat of him." So he frames a story by which the generous Naaman is made to send back with him to Elisha's house a considerable present in money and clothes. He then went in and stood before his master as if nothing had happened. But the prophet was not to be so deceived. His heart had gone after his servant through the whole transaction, even to its minutest details, and he visits Gehazi with the tremendous punishment of the leprosy, from which he has just relieved Naaman.

This cure of leprosy — the only one which he effected (Luke iv. 27) — is a second miracle in which Elisha, and Elisha only, anticipated our Lord.[a]

The date of the transaction must have been at least seven years after the raising of the Shunammite's son. This is evident from a comparison of viii. 4 with 1, 2, 3. Gehazi's familiar conversation with the king must have taken place before he was a leper.

9. (vi. 1–7). We now return to the sons of the prophets, but this time the scene appears to be changed, and is probably at Jericho, and during the residence of Elisha there. Whether from the increase of the scholars consequent on the estimation in which the master was held, or from some other cause, their habitation had become too small — "the place in which we sit before thee is too narrow for us." They will therefore move to the close neighborhood of the Jordan, and cutting down beams — each man one, as with curious minuteness the text relates — make there a new dwelling-place. Why Jordan was selected is not apparent. Possibly for its distance from the distractions of Jericho — possibly the spot was one sanctified by the crossing of Israel with the ark, or of Elijah, only a few years before. Urged by his disciples the man of God consents to accompany them. When they reach the Jordan, descending to the level of the stream, they commence felling the trees[b] of the dense belt of wood in immediate contact with the water. [JORDAN.] As one of them was cutting at a tree overhanging the stream, the iron of his axe (a borrowed tool) flew off and sank into the water. His cry soon brought the man of God to his aid. The stream of the Jordan is deep up to the very bank, especially when the water is so low as to leave the wood dry, and is moreover so turbid that search would be useless. But the place at which the lost axe entered the water is shown to Elisha; he breaks off[c] a stick and casts it into the stream, and the iron appears on the surface, and is recovered by its possessor. No appeal to Jehovah is recorded here.

10. (vi. 8–23). Elisha is now residing at Dothan, half-way on the road between Samaria and Jezreel. The incursions of the Syrian marauding bands[d] (comp. v. 2) still continue; but apparently with greater boldness, and pushed even into places which the king of Israel is accustomed to frequent.[e] But their manœuvres are not hid from the man of God, and by his warnings he saves the king "not once nor twice." So baffled were the Syrians by these repeated failures, as to make their king suspect treachery in his own camp. But the true explanation is given by one of his own people — possibly one of those who had witnessed the cure wrought on Naaman, and could conceive no power too great to ascribe to so gifted a person: "Elisha, the prophet in Israel, telleth the king of Israel the words that thou speakest in thy bed-chamber." So powerful a magician must be seized without delay, and a strong party with chariots is despatched to effect his capture. They march by night, and before morning take up their station round the base of the eminence on which the ruins of Dothan still stand. Elisha's servant — not Gehazi, but apparently a new comer, unacquainted with the powers of his master — is the first to discover the danger. But Elisha remains unmoved by his fears; and at his request the eyes of the youth are opened to behold the spiritual guards which are protecting them, horses and chariots of fire filling the whole of the mountain. But this is not enough. Elisha again prays to Jehovah, and the whole of the Syrian warriors are struck blind. He then descends, and offers to lead them to the person and the place which they seek. He conducts them to Samaria. There, at the prayer of the prophet, their sight is restored, and they find themselves not in a retired country village, but in the midst of the capital of Israel, and in the presence of the king and his troops. His enemies thus completely in his grasp, the king of Israel is eager to destroy them. "Shall I slay? shall I slay, my father?" But the end of Elisha has been answered when he has shown the Syrians how futile are all their attempts against his superior power. "Thou shalt not slay. Thou mayest[f] slay those whom thou hast taken captive in lawful fight, but not these: feed them, and send them away to their master." After such a repulse it is not surprising that the marauding forays of the Syrian troops ceased.

11. (vi. 24–vii. 2). But the king of Syria could not rest under such dishonor. He abandons his marauding system, and gathers a regular army, with which he lays siege to SAMARIA. The awful extremities to which the inhabitants of the place were driven need not here be recalled. Roused by an encounter with an incident more ghastly than all, and which remained without parallel in Jewish records till the unspeakable horrors of the last days of Jerusalem (Joseph. *B. J.* v. 13, § 3; 13, § 7, &c.), the king vents his wrath on the prophet, probably as having by his share in the last transaction,[g] or in some other way not recorded, provoked the invasion; possibly actuated by the spite with which a weak bad man in difficulty often regards one better and stronger than himself. The king's name is not stated in the Bible, but there can be no doubt that Josephus is correct in giving

[a] The case of Miriam (Num. xii. 10–15) is different. Human agency appears to have done nothing towards her cure.

[b] So the Hebrew, קַצְצִים.

[c] The Hebrew word וַיָּצֶב occurs only once besides this place. Its exact force is not clear, but the LXX. render it ἀπέκοψε, "he pinched off."

[d] גְּדוּדִים, always with the force of irregular ravaging. See ver. 23.

[e] The expression is peculiar — "beware thou pass not by such a place." Josephus (ix. 4, § 3) says that the king was obliged to give up hunting in consequence.

[f] This interpretation is that of the Targum, De Wette, and others, and gives a better sense than that of the A. V. The original will perhaps bear either

[g] Josephus, *Ant.* ix. 4, § 4

Digitized by Google

it as Joram; and in keeping with this is his employment of the same oath which his mother Jezebel used on an occasion not dissimilar (1 K. xix. 2), "God do so to me and more also, if the head of Elisha the son of Shaphat shall stand on him this day." No sooner is the word out of the king's mouth than his emissary starts to execute the sentence. Elisha is in his house, and round him are seated the elders of Samaria, doubtless receiving some word of comfort or guidance in their sore calamity. He receives a miraculous intimation of the danger. Ere the messenger could reach the house, he said to his companions, "See how this son of a murderer[a] hath sent to take away my head! Shut the door, and keep him from entering: even now I hear the sound of his master's feet behind him, hastening to stay the result of his rash exclamation!"[b] As he says the words the messenger arrives at the door, followed immediately, as the prophet had predicted, by the king and by one of his officers, the lord on whose hand he leaned. What follows is very graphic. The king's hereditary love of Baal bursts forth, and he cries, "This evil is from Jehovah," the ancient enemy of my house, "why should I wait for Jehovah any longer?" To this Elisha answers: "Hear the word of Jehovah" — he who has sent famine can also send plenty — "to-morrow at this time shall a measure of fine flour be sold for a shekel, and two measures of barley for a shekel, in the gate of this very city." "This is folly," says the officer: "even if Jehovah were to make windows in heaven and pour down the provisions, it could not be." "It can, it shall," replies Elisha; "and you, you shall see it all, but shall not live even to taste it."

12. (viii. 1–6). We now go back several years to an incident connected with the lady of Shunem, at a period antecedent to the cure of Naaman and the transfer of his leprosy to Gehazi (v. 1, 27).

Elisha had been made aware of a famine which Jehovah was about to bring upon the land for seven years; and he had warned his friend the Shunammite thereof that she might provide for her safety. Accordingly she had left Shunem with her family, and had taken refuge in the land of the Philistines, that is, in the rich corn-growing plain on the seacoast of Judah, where secure from want she remained during the dearth. At the end of the seven years she returned to her native place, to find that during her absence her house with the field-land attached to it, the corn-fields of the former story, had been appropriated by some other person. In Eastern countries kings are (or were) accessible to the complaints of the meanest of their subjects to a degree inconceivable to the inhabitants of the Western world.[c] To the king therefore the Shunammite had recourse, as the widow of Tekoah on a former occasion to king David (2 Sam. xiv. 4). And now occurred one of those rare coincidences which it is impossible not to ascribe to something more than mere chance. At the very moment of the entrance of the woman and her son — clamorous as oriental suppliants alone clamor,[d] for her home and her land — the king was listening to a recital by Gehazi of "all the great things which Elisha had done," the crowning feat of all being that which he was then actually relating — the restoration to life of the boy of Shunem. The woman was instantly recognized by Gehazi. "My lord, O king, this is the woman and this is her son whom Elisha restored to life." From her own mouth the king hears the repetition of the wonderful tale, and, whether from regard to Elisha, or struck by the extraordinary coincidence, orders her land to be restored, with the value of all its produce during her absence.

13. (viii. 7–15). Hitherto we have met with the prophet only in his own country. We now find him at Damascus.[e] He is there to carry out the command given to Elijah on Horeb to "anoint Hazael to be king over Syria." At the time of his arrival Benhadad was prostrate with his last illness. This marks the time of the visit as after the siege of Samaria, which was conducted by Benhadad in person (comp. vi. 24). The memory of the cure of Naaman, and of the subsequent disinterestedness of the prophet, were no doubt still fresh in Damascus; and no sooner does he enter the city than the intelligence is carried to the king — "the man of God is come hither." The king's first desire is naturally to ascertain his own fate; and Hazael, who appears to have succeeded Naaman, is commissioned to be the bearer of a present to the prophet, and to ask the question on the part of his master, "Shall I recover of this disease?" The present is one of royal dimensions; a caravan of 40 camels,[f] laden with the riches and luxuries which that wealthy city could alone furnish. The terms of Hazael's address show the respect in which the prophet was held even in this foreign and hostile country. They are identical with those in which Naaman was addressed by his slaves, and in which the king of Israel in a moment of the deepest gratitude and reverence had addressed Elisha himself. "*Thy son* Benhadad hath sent me to thee, saying, 'Shall I recover of this disease?'" The reply, probably originally ambiguous, is doubly uncertain in the present doubtful state of the Hebrew text; but the general conclusion was unmistakable: "Jehovah hath showed me that he shall surely die." But this was not all that had been revealed to the prophet. If Benhadad died, who would be king in his stead but the man who now stood before him? The prospect was one which drew forth the tears of the man of God. This man was no rash and imprudent leader, who could be baffled and deceived as Benhadad had so often been. Behind that "steadfast" impenetrable countenance was a steady courage and a persistent resolution, in which Elisha could not but foresee the greatest danger to his country. Here was a man who, give him but the power, would "oppress" and "cut Israel short," would "thresh Gilead with threshing instruments of iron," and "make them like the dust by thresh-

[a] Surely an allusion to Ahab (Joram's father) and Naboth.

[b] Josephus, *Ant.* ix. 4, § 4.

[c] Instances of this are frequent in the *Arabian Nights*. Ibrahim Pacha, the famous son of Mehemet Ali, used to hold an open court in the garden of his palace at *Akka* (Acre), for complaints of all kinds and from all classes.

[d] צָעַק (A. V. "cry"); a word denoting great vehemence

[e] The traditional spot of his residence on this occasion is shown in the synagogue at *Jobar* (? Hobah), a village about 2 miles east of Damascus. The same village, if not the same building, also contains the cave in which Elijah was fed by ravens, and the tomb of Gehazi (Stanley, *S. & P.* p. 412; Quaresmius, ii. 881 — "vana et mendacia Hebræorum").

[f] Josephus, *Ant.* ix. 4, § 6.

Digitized by Google

ing" as no former king of Syria had done, and that at a time when the prophet would be no longer alive to warn and to advise. At Hazael's request Elisha confesses the reason of his tears. But the prospect is one which has no sorrow for Hazael. How such a career presented itself to him may be inferred from his answer. His only doubt is the possibility of such good fortune for one so mean. "But what is thy slave,[a] dog that he is, that he should do this great thing?" To which Elisha replies, "Jehovah hath showed me that thou wilt be king over Syria."

Returning to the king, Hazael tells him only half the dark saying of the man of God — "He told me that thou shouldest surely recover." But that was the last day of Benhadad's life. From whose hand he received his death, or what were the circumstances attending it, whether in the bath as has been recently suggested, we cannot tell.[b] The general inference, in accordance with the account of Josephus, is that Hazael himself was the murderer, but the statement in the text does not necessarily bear that interpretation; and, indeed, from the mention of Hazael's name at the end of the passage, the conclusion is rather the reverse.

14. (ix. 1–10). Two of the injunctions laid on Elijah had now been carried out; the third still remained. Hazael had begun his attacks on Israel by an attempt to recover the stronghold of Ramoth-Gilead (viii. 28), or Ramah, among the mountains on the east of Jordan. But the fortress was held by the kings of Israel and Judah in alliance, and though the Syrians had wounded the king of Israel, they had not succeeded in capturing the place (viii. 28, ix. 15). One of the captains of the Israelite army in the garrison was Jehu, the son of Jehoshaphat, the son of Nimshi. At the time his name was mentioned to Elijah on Horeb he must have been but a youth; now he is one of the boldest and best known of all the warriors of Israel. He had seen the great prophet once, when with his companion Bidkar he attended Ahab to take possession of the field of Naboth, and the scene of that day and the words of the curse then pronounced no subsequent adventure had been able to efface (ix. 25, 36). The time was now come for the fulfillment of that curse by his being anointed king over Israel. Elisha's personal share in the transaction was confined to giving directions to one of the sons of the prophets, and the detailed consideration of the story will therefore be more fitly deferred to another place.[c] [JEHU.]

15. Beyond this we have no record of Elisha's having taken any part in the revolution of Jehu, or the events which followed it. He does not again appear till we find him on his deathbed in his own house (xiii. 14–19). Joash, the grandson of Jehu, is now king, and he is come to weep over the approaching departure of the great and good prophet. His words are the same as those of Elisha when Elijah was taken away — "My father! my father! the chariot of Israel and the horsemen thereof!" But it is not a time for weeping. One thought fills the mind of both king and prophet. Syria is the fierce enemy who is gradually destroying the country, and against Syria one final effort must be made before the aid of Elisha becomes unobtainable. What was the exact significance of the ceremonial employed, our ignorance of Jewish customs does not permit us to know, but it was evidently symbolic. The window is opened towards the hated country, the bow is pointed in the same direction, and the prophet laying his hands on the string as if to convey force to the shot, "the arrow of Jehovah's deliverance, the arrow of deliverance from Syria," is discharged. This done, the king takes up the bundle of arrows, and at the command of Elisha beats them on the ground. But he does it with no energy, and the successes of Israel, which might have been so prolonged as completely to destroy the foe, are limited to three victories.

16. (xiii. 20–22). The power of the prophet, however, does not terminate with his death. Even in the tomb[d] he restores the dead to life. Moab had recovered from the tremendous reverse inflicted on her by the three kings at the opening of Elisha's career (2 K. iii.), and her marauding bands had begun again the work of depredation which Syria so long pursued (2 K. v. 2, vi. 23). The text perhaps infers that the spring — that is, when the early crops were ripening — was the usual period for these attacks; but, be this as it may, on the present occasion they invaded the land "at the coming in of the year." A man was being buried in the cemetery which contained the sepulchre of Elisha. Seeing the Moabite spoilers in the distance, the friends of the dead man hastened to conceal his corpse in the nearest hiding-place. They chose — whether by design or by accident is not said — the tomb of the prophet, and as the body was pushed[e] into the cell, which formed the receptacle for the corpse in Jewish tombs, it came in contact with his bones. The mere touch of those hallowed remains was enough to effect that which in his life-

[a] The A. V., by omitting, as usual, the definite articles before "dog," and by its punctuation of the sentence, completely misrepresents the very characteristic turn of the original — given above — and also differs from all the versions. In the Hebrew the word "dog" has the force of *meanness*, in the A. V. of *cruelty*. For a long comment founded on the reading of the A. V., see H. Blunt, *Lectures on Elisha*, p. 222, &c. [See Dog.]

[b] The word הַמַּכְבֵּר, A. V. "a thick cloth," has been variously conjectured to be a carpet, a mosquito-net (Michaelis), and a bath-mattress. The last is Ewald's suggestion (iii. 523, note), and taken in connection with the "water," and with the inference to be drawn from the article attached to the Hebrew word, is more probable than the others. Abbas Pacha is said to have been murdered in the same manner.

As to the person who committed the murder, Ewald justly remarks that as a high officer of state Hazael would have no business in the king's bath. Some suppose that Benhadad killed himself by accident, having laid a wet towel over his face while sleeping. See Keil, *ad loc.*

[c] The connection and the contrast between Elisha and Jehu are well brought out by Maurice (*Prophets and Kings*, serm. ix.).

[d] Josephus says that Elisha had a magnificent funeral (ταφῆς μεγαλοπρεποῦς, *Ant.* ix. 8, § 6). Is this implied in the expression (xiii. 20), "they buried him"? The rich man in the Gospel is also particularly said to have been "buried" (Luke xvi. 22) *i. e.* probably in a style befitting his rank.

[e] The expression of the A. V. "let down," is founded on a wrong conception of the nature of an Eastern sepulchre, which is excavated in the vertical face of a rock, so as to be entered by a door; not sunk below the surface of the ground like our graves. The Hebrew word וַיֵּלֶךְ is simply "went" as in the margin [or, "came" *i. e.* to the bones of Elisha].

Digitized by Google

time had cost Elisha both prayers and exertions — the man "revived and stood up on his feet." It is the only instance in the whole Bible — Old Testament, New Testament, and Apocrypha — of restoration wrought by the inanimate remains of prophet or saint.[a] It is to this miracle that the fathers of the 5th century and the divines of the Roman Catholic Church have appealed as a parallel to the numerous alleged cures at the tombs of saints, such as those at the graves of SS. Gervasius and Protasius.[b]

Before closing this account of Elisha we must not omit to notice the parallel which he presents to our Lord — the more necessary because, unlike the resemblance between Elijah and John the Baptist, no attention is called to it in the New Testament. Some features of this likeness have already been spoken of.[c] But it is not merely because he healed a leper, raised a dead man, or increased the loaves, that Elisha resembled Christ, but rather because of that loving, gentle temper and kindness of disposition — characteristic of him above all the saints of the O. T. — ever ready to soothe, to heal, and to conciliate, which attracted to him women and simple people, and made him the universal friend and "father," not only consulted by kings and generals, but resorted to by widows and poor prophets in their little troubles and perplexities. We have spoken above of the fragmentary nature of the records of Elisha, and of the partial conception of his work as a prophet which they evince. Be it so. For that very reason we should the more gladly welcome those engaging traits of personal goodness which are so often to be found even in those fragments, and which give us a reflection, feeble it is true, but still a reflection, in the midst of the sternness of the Old dispensation, of the love and mercy of the New.

Elisha is canonized in the Greek Church; his day is the 14th June. Under that date his life, and a collection of the few traditions concerning him — few indeed when compared with those of Elijah — will be found in the *Acta Sanctorum*. In the time of Jerome a "mausoleum" containing his remains was shown at Samaria (Reland, p. 980). Under Julian the bones of Elisha were taken from their receptacle and burnt. But notwithstanding this his relics are heard of subsequently, and the church of S. Apollinaris at Ravenna still boasts of possessing his head. The Carmelites have a special service in honor of Elisha. G.

* Most of the writers mentioned under ELIJAH (Amer. ed.) may be consulted on the subject of this article. It may be added here, that Stanley's sketch of Elisha is one of surpassing interest (*History of the Jewish Church*, ii. 353–364). He places before us (to select a single topic) the points of dissimilarity and of resemblance between the two great prophets in a striking manner: "The succession was close and immediate, but it was a succession not of likeness but of contrast. . . . Elisha was not secluded in mountain fastnesses, but dwelt in his own house in the royal city; or lingered amidst the sons of the prophets, within the precincts of ancient colleges; . . . or was sought out by admiring disciples in some town on Carmel, or by the pass of Dothan; or was received in some quiet balcony, overlooking the plain of Esdraelon, where bed and table and seat had been prepared for him by pious hands. His life was not spent, like his predecessor's, in unavailing struggle, but in wide-spread successes. . . . His deeds were not of wild terror, but of gracious, soothing, homely beneficence, bound up with the ordinary tenor of human life. When he smites with blindness, it is that he may remove it again; when he predicts, it is the prediction of plenty, and not of famine. . . . At his house by Jericho the bitter spring is sweetened; for the widow of one of the prophets the oil is increased; even the workmen at the prophets' huts are not to lose the axe-head which has fallen through the thickets of Jordan into the eddying stream; the young prophets, at their common meal, are saved from the deadly herbs which had been poured from the blanket of one of them into the caldron, and enjoy the multiplied provision of corn.

"Elisha was greater yet less, less yet greater, than Elijah. He is less. . . . We cannot dispense with the mighty past even when we have shot far beyond it. . . . Those who follow cannot be as those who went before. A prophet like Elijah comes once and does not return. Elisha, both to his countrymen and to us, is but the successor, the faint reflection of his predecessor. . . . Less, yet greater. For the work of the great ones of this earth is carried on by far inferior instruments but on a far wider scale, and it may be in a far higher spirit. The life of an Elijah is never spent in vain. Even his death has not taken him from us. He struggles, single-handed as it would seem, and without effect; and in the very crisis of the nation's history is suddenly and mysteriously removed. But his work continues; his mantle falls; his teaching spreads; his enemies perish. The prophet preaches and teaches, the martyr dies and passes away; but other men enter into his labors. . . . What was begun in fire and storm, in solitude and awful visions, must be carried on through winning arts, and healing acts, and gentle words of peaceful and social intercourse; not in the desert of Horeb, or on the top of Carmel, but in the crowded thoroughfares of Samaria, in the gardens of Damascus, by the rushing waters of Jordan." H.

ELI'SHAH (אֱלִישָׁה [*God is salvation*, see above]: Ἐλισά; [Vat. in 1 Chr. Ελεισα; in Ez.,] Ἐλεισαί; Joseph. Ἐλισᾶς: *Elisa*), the eldest son of Javan (Gen. x. 4). The residence of his descendants is described in Ez. xxvii. 7, as the "isles of Elishah" (אִיֵּי = *maritime regions*), whence the Phœnicians obtained their purple and blue dyes. Josephus identified the race of Elishah with the Æolians (Ἐλισᾶς μὲν Ἐλισαίους ἐκάλεσεν, ὧν ἦρχεν, Αἰολεῖς δὲ νῦν εἰσί, *Ant.* i. 6, § 1). His view is adopted by Knobel (*Völkertafel*, p. 81 ff.)

a * The miracle was certainly a peculiar one, but not without a moral end. In serving, as it must have done, to maintain among the Hebrews a proper reverence for the prophetic order which Elisha represented, it accomplished a result eminently important to the religious training of that people and the fulfillment of their mission as the upholders of God's truth and worship. H.

b Augustine's *Confessions* (ix. § 16).

c These resemblances are drawn out, with great beauty, but in some instances rather fancifully, by J. H. Newman (*Sermons on Subjects of the Day* Elisha a Type of Christ, &c.). See also Rev. Isaac Williams (*Old Test. Characters*).

Digitized by Google

a preference to the more generally received opinion that Elisha = Elis, and in a more extended sense Peloponnesus, or even Hellas. It certainly appears correct to treat it as the designation of a *race* rather than of a locality; and if Javan represents the Ionians, then Elisha the Æolians, whose name presents considerable similarity (Αἰολεῖς having possibly been Αἰλεῖς), and whose predilection for maritime situations quite accords with the expression in Ezekiel. In early times the Æolians were settled in various parts of Greece, Thessaly, Bœotia, Ætolia, Locris, Elis, and Messenia: from Greece they emigrated to Asia Minor, and in Ezekiel's age occupied the maritime district in the N. W. of that country, named after them Æolis, together with the islands Lesbos and Tenedos. The purple shell-fish was found on this coast, especially at Abydus (Virg. *Georg.* i. 207), Phocæa (Ovid. *Metam.* vi. 9), Sigeum and Lectum (Athenæus, iii. p. 88). Not much, however, can be deduced from this as to the position of the "isles of Elishah," as that shell-fish was found in many parts of the Mediterranean, especially on the coast of Laconia (Pausan. iii. 21, § 6). W. L. B.

ELISH'AMA (אֱלִישָׁמָע [*whom God hears*]: Ἐλισαμά, Ἐλισαμαέ, Ἐλεασά, κτλ.), the name of several men.

1. [Ἐλισαμά; Vat. twice -λει-; in 1 Chr., Rom. Ἐλισαμαΐ, Vat. Ελειμασαι: *Elisama.*] Son of Ammihud, the "prince" or "captain" (both נָשִׂיא) of the tribe of Ephraim in the Wilderness of Sinai (Num. i. 10, ii. 18, vii. 48, 53, x. 22). From the genealogy preserved in 1 Chr. vii. 26, we find that he was grandfather to the great Joshua.

2. [Ἐλισαμά; Vat. -λει-; in 1 Chr. xiv., Rom. Ελισαμαέ, Vat. FA. -λει-.] A son of King David. One of the thirteen, or, according to the record of Samuel, the eleven, sons born to him of his wives after his establishment in Jerusalem (2 Sam. v. 16; 1 Chr. iii. 8, xiv. 7).

3. (Ἐλισά; [Vat. -λει-; Alex. Ελισαμα.]) By this name is also given (in the Heb. text) in 1 Chr. iii. 6, another son of the same family, who in the other lists is called ELISHUA.

4. [Ἐλισαμά; Vat. -λει-.] A descendant of Judah; the son of Jekamiah (1 Chr. ii. 41). In the Jewish traditions preserved by Jerome (*Qu. Hebr.* on 1 Chr. ii. 41), he appears to be identified with

5. [In 2 K., Ἐλισαμά; Vat. -λει-; in Jer., Ἐλεασά; Vat. Alex. Ελασα; FA. Ελεσα; Comp. Ἐλισαμά.] The father of Nethaniah and grandfather of Ishmael "of the seed royal," who lived at the time of the great Captivity (2 K. xxv. 25; Jer. xli. 1). [In Jer. xli. 1 the A. V. ed. 1611, with other early editions, reads Elishamah.]

6. [Ἐλισαμά; Vat. Ελεισαμα, Ελεισα; FA. vv. 20, 21, ditto.] Scribe to King Jehoiakim (Jer. xxxvi. 12, 20, 21).

7. [Ἐλισαμά; Vat. -λει-.] A priest in the time of Jehoshaphat, one of the party sent by that king through the cities of Judah, with the book of the law, to teach the people (2 Chr. xvii. 8).

ELISH'APHAT (אֱלִישָׁפָט [*whom God judges*]: ὁ Ἐλισαφάν [Vat. -λει-], Alex. Ελισαφατ: *Elisaphat*), son of Zichri; one of the "captains of hundreds," whom Jehoiada the priest employed to collect the Levites and other principal people to Jerusalem before bringing forward Joash (2 Chr. xxiii. 1)

ELISH'EBA [*Heb.* Elishe'ba] (אֱלִישֶׁבַע: Ἐλισαβέθ; [Alex. -βετ:] *Elisabeth*), the wife of Aaron (Ex. vi. 23). She was the daughter of Amminadab, and sister of Nahshon the captain of the host of Judah (Num. ii. 3), and her marriage to Aaron thus united the royal and priestly tribes.

W. A. W.

* The name signifies "God of the oath," *i. e.* God is her oath, a worshipper of God (Gesen.); or "God of the covenant" (Fürst). Its Greek form is Ἐλισάβετ, the name of the wife of Zacharias, the mother of John. [ELISABETH.] H.

ELISHU'A (אֱלִישׁוּעַ [*God is salvation*]: Ἐλισουέ, [Vat. Ελεισους, Alex. Ελισους; in 1 Chr.,] Ἐλισά, Alex. Ελισαν, [Vat. Εκτας, Comp. Ἐλισουέ:] *Elisua*), one of David's family by his later wives; born after his settlement in Jerusalem (2 Sam. v. 15; 1 Chr. xiv. 5). In the list of 1 Chr. iii. 6, the name is given with a slight difference, as ELISHAMA.

ELIS'IMUS (Ἐλιάσιμος; [Vat. Ελειασεισμος; Ald. Ἐλίσιμος:] *Liasumus*), 1 Esdr. ix. 28. [ELIASHIB.]

ELI'U (Ἠλιού [Vat. Sin. Alex. Ηλειου] = Heb. *Elihu*), one of the forefathers of Judith (Jud. viii. 1), and therefore of the tribe of Simeon.

ELI'UD (Ἐλιούδ, from the Heb. אֱלִיהוּד, which however does not occur, *God of the Jews*), son of Achim in the genealogy of Christ (Matt. i. 15), four generations above Joseph. His name is of the same formation as Abiud, and is probably an indication of descent from him. A. C. H.

ELIZ'APHAN (אֱלִיצָפָן [*God a protector*]: Ἐλισαφάν; [in Num. and 2 Chr., Vat. -λει-; in 1 Chr., Rom. Ἐλισαφάτ, Vat. FA. -λει-:] *Elisaphan*). 1. A Levite, son of Uzziel, chief of the house of the Kohathites at the time of the census in the Wilderness of Sinai ([Ex. vi. 22; Lev. x. 4;] Num. iii. 30). His family was known and represented in the days of King David (1 Chr. xv. 8), and took part in the revivals of Hezekiah (2 Chr. xxix. 3). His name is also found in the contracted form of ELZAPHAN.

2. [Ἐλισαφάν; Vat. -λει-.] Son of Parnach; "prince" (נָשִׂיא) of the tribe of Zebulun, one of the men appointed to assist Moses in apportioning the land of Canaan (Num. xxxiv. 25).

* ELIZE'US is the reading of the A. V. ed. 1611 and other early editions in Luke iv. 27 and Ecclus. xlviii. 12 for ELISEUS, which see. A.

ELI'ZUR (אֱלִיצוּר [*God is the rock*]: Ἐλισούρ; [Vat. once -λει-:] *Elisur*), son of Shedeur; "prince" (נָשִׂיא) of the tribe, and over the host of Reuben, at the time of the census in the Wilderness of Sinai (Num. i. 5, ii. 10, vii. 30, 35, x. 18).

EL'KANAH (אֶלְקָנָה [*God creates* or *possesses*]: Ἐλκανά: *Elcana*). 1. Son of Korah, the son of Izhar, the son of Kohath, the son of Levi, according to Ex. vi. 24, where his brothers are represented as being Assir and Abiasaph. But in 1 Chr. vi. 22, 23 (Heb. 7, 8) Assir, Elkanah, and Ebiasaph are mentioned in the same order, not as the three sons of Korah, but as son, grandson, and great-grandson respectively; and this seems

Digitized by Google

to be undoubtedly correct. If so, the passage in Exodus must be understood as merely giving the families of the Korhites existing at the time the passage was penned, which must, in this case, have been long subsequent to Moses. In Num. xxvi. 58, "the family of the Korhites" (A. V. "Korathites") is mentioned as one family. As regards the fact of Korah's descendants continuing, it may be noticed that we are expressly told in Num. xxvi. 11, that when Korah and his company died, "the children of Korah died not."

2. A descendant of the above in the line of Ahimoth, otherwise Mahath, 1 Chr. vi. 26, 35 (Heb. 11, 20). (See Hervey, *Genealogies*, pp. 210, 214, note.)

3. Another Kohathite Levite, in the line of Heman the singer. He was son of Jeroham, and father of Samuel the illustrious judge and prophet (1 Chr. vi. 27, 34). All that is known of him is contained in the above notices and in 1 Sam. i. 1, 4, 8, 19, 21, 23, and ii. 11, 20, where we learn that he lived at Ramathaim-Zophim in Mount Ephraim, otherwise called Ramah; that he had two wives, Hannah and Peninnah, but had no children by the former, till the birth of Samuel in answer to Hannah's prayer. We learn also that he lived in the time of Eli the high-priest, and of his sons Hophni and Phinehas; that he was a pious man who went up yearly from Ramathaim-Zophim to Shiloh, in the tribe of Ephraim, to worship and sacrifice at the tabernacle there; but it does not appear that he performed any sacred functions as a Levite; a circumstance quite in accordance with the account which ascribes to David the establishment of the priestly and Levitical courses for the Temple service. He seems to have been a man of some wealth from the nature of his yearly sacrifice, which enabled him to give portions out of it to all his family, and from the costly offering of three bullocks made when Samuel was brought to the House of the Lord at Shiloh. After the birth of Samuel, Elkanah and Hannah continued to live at Ramah (where Samuel afterwards had his house, 1 Sam. vii. 17), and had three sons and two daughters. This closes all that we know about Elkanah.

4. [Vat. Ηλκανα.] A Levite (1 Chr. ix. 16).

5. [Vat. Alex. FA. Ηλκανα, exc. Vat. Κανα in 1 Chr. xii.] Another man of the family of the Korhites who joined David while he was at Ziklag (1 Chr. xii. 6). From the terms of ver. 2 it is doubtful whether this can be the well-known Levitical family of Korhites. Perhaps the same who afterwards was one of the doorkeepers for the ark (xv. 23).

6. [Vat. Ειλκανα.] An officer in the household of Ahaz, king of Judah, who was slain by Zichri the Ephraimite, when Pekah invaded Judah. He seems to have been the second in command under the prefect of the palace (2 Chr. xxviii. 7).

A. C. H.

EL'KOSH (אֶלְקוֹשׁ), the birthplace of the prophet Nahum, hence called "the Elkoshite," Nah. i. 1 (ὁ Ἐλκεσαῖος; [Sin.[1] ο Ελκαισεος:] *Elcesæus*). Two widely differing Jewish traditions assign as widely different localities to this place. In the time of Jerome it was believed to exist in a small village of Galilee. The ruins of some old buildings were pointed out to this father by his guide as the remains of the ancient Elkosh (Jerome, *On Nah.* i. 1). Cyril of Alexandria (*Comm. on Nahum*) says that the village of Elkoan was somewhere or other in the country of the Jews. Pseudo-Epiphanius (*de Vitis Prophetarum*, *Opp.* ii. 247) places Elkosh on the east of the Jordan, at Bethabara (*εἰς Βηταβάρ*, *Chron. Pasch.* p. 150, Cod. B. has *εἰς Βηταβαρήν*), where he says the prophet died in peace. According to Schwartz (*Descr. of Palestine*, p. 188), the grave of Nahum is shown at *Kefr Tanchum*, a village 2½ English miles north of Tiberias. But mediæval tradition, perhaps for the convenience of the Babylonian Jews, attached the fame of the prophet's burial place to *Alkush*, a village on the east bank of the Tigris, near the monastery of Rabban Hormuzd, and about two miles north of Mosul. Benjamin of Tudela (p. 53, ed. Asher) speaks of the synagogues of Nahum, Obadiah, and Jonah at Asshur, the modern *Mosul*. R. Petachia (p. 35, ed. Benisch) was shown the prophet's grave, at a distance of four parasangs from that of Baruch, the son of Nerish, which was itself distant a mile from the tomb of Ezekiel. It is mentioned in a letter of Masius, quoted by Asseman (*Bibl. Orient.* i. 525). Jews from the surrounding districts make a pilgrimage to it at certain seasons. The synagogue which is built over the tomb is described by Colonel Shiel, who visited it in his journey through Kurdistan (*Journ. Geog. Soc.* viii. 93). Rich evidently believed in the correctness of the tradition, considering the pilgrimage of the Jews as almost sufficient test (*Kurdistan*, i. 101). The tradition which assigns Elkosh to Galilee is more in accordance with the internal evidence afforded by the prophecy, which gives no sign of having been written in Assyria.

W. A. W.

* Elkosh as a place is not named in the Bible, though of course Nahum's appellative (Nah. i. 1) implies the place, just as Elika is called the Harodite from Harod (2 Sam. xxiii. 25), Ahijah the Shilonite from Shiloh (1 K. xi. 29), and others (see Jer. xxvi. 18). It may have been the prophet's birthplace or his abode only. The etymology is uncertain. Fürst suggests (*Handwörth.* i. 98) אֵל קֹשׁ, i. e. *God's bow* or *strength*. The American missionary, Dr. Perkins of *Oroomiah*, visited the Assyrian Elkosh in 1849. He assumes it to be the home of the prophet, but assigns no reason for that opinion except such as the name itself may seem to offer. "It is situated on a broken stony declivity, right under the first range of the Kûrdish mountains, after crossing the Tigris, and on the northern extremity of the great Assyrian plain. A few stinted pomegranates and figs were growing in small gardens in the village, which were the only trees to be seen, to relieve the eye as it stretched along the bare limestone range and over the vast plain in other directions. The town contains about 300 papal Nestorian families. The people speak the modern Syriac and the Kûrdish. . . . We visited the prophet's tomb. It is in a small Jewish synagogue. An oblong box, covered with green cotton cloth, stands over what purports to be his grave. The synagogue and tomb are kept by a Christian, there now being no Jews in *Elkush*. Many Israelites make the pilgrimage and spend the feast of Tabernacles in this ancient and venerable place, coming for that purpose even from Burrorah, Constantinople, and Jerusalem." (See *Bibl. Sacra*, ix. 643.)

An appeal to the style and contents of Nahum's prophecy leaves the question as to the place of his nativity still undecided; for critics draw from this

Digitized by Google

source precisely opposite conclusions. While some Ind ideas and expressions in the book which are alleged to be Assyrian in their origin, others either refuse to concede to them that character, or affirm that any Jewish prophet might have so written, who had never passed beyond the boundary of his own country. Of those who place Elkosh in Galilee are Hävernick (*Einl. ins A. Test.* p. 375), Knobel (*Prophetism.* ii. 208), Welte (in Herbst's *Einl. in die heil. Schr. des A. Test.* ii. Abth. 2, p. 147), De Wette (*Einl. in das A. Test.* p. 336), Bleek (*Einl. ins Alte Test.* p. 542), and Raumer (*Palästina*, p. 125). Of those who think that Nahum was born or at least prophesied in Assyria, are Eichhorn (*Einl.* iii. 317), Grimm (*Nahum*, p. 15 ff.), Ewald (*Proph. des A. B.* i. 350), Winer (*Bibl. Realw.* i. 323), and Ritter (*Erdk.* ix. 742). Stanley mentions both opinions, but does not venture to decide between them (*Jewish Church*, ii. 412). It deserves notice that all the testimonies as to the existence of an Elkosh in that remote East are comparatively modern. There is reason to suspect, says a German critic, that "the name may have come not from the village mentioned in our book of Nahum, but out of our book to that village." The internal argument founded on the coloring or imagery of the prophet, is too subjective to be of any weight on either side.

H.

* **EL'KOSHITE.** [ELKOSH.]

EL'LASAR (אֶלָּסָר: Ἐλλασάρ; [Alex. in ver. 1, Σελλασαρ:] *Pontus*) has been considered the same place with the Thelassar (תְּלַאשַׁר) of 2 K. xix. 12, but this is very improbable. Ellasar — the city of Arioch (Gen. xiv. 1, 9) — seems to be the Hebrew representative of the old Chaldæan town called in the native dialect *Lars* or *Larancha*, and known to the Greeks as Larissa (Λάρισσα) or Larachôn (Λαράχων). This emplacement suits the connection with Elam and Shinar (Gen. xiv. 1); and the identification is orthographically defensible, whereas the other is not. *Larsa* was a town of Lower Babylonia or Chaldæa, situated nearly half-way between Ur (*Mugheir*) and Erech (*Warka*), on the left bank of the Euphrates. It is now *Senkereh*. The inscriptions show it to have been one of the primitive capitals — of earlier date, probably, than Babylon itself; and we may gather from the narrative in Gen. xiv. that in the time of Abraham it was the metropolis of a kingdom distinct from that of Shinar, but owning allegiance to the superior monarchy of Elam. That we hear no more of it after this time is owing to its absorption into Babylon, which took place soon afterwards.

G. R.

ELM (אַלָּה). Only once rendered *elms*, in Hos. iv. 13. See OAK.

ELMO'DAM (Ἐλμωδάμ, or Ἐλμαδάμ [so Tisch. Treg.], apparently the same as the Hebrew אֶלְמוֹדָד, Gen. x. 26; Ἐλμωδάδ, LXX.), son of Er, six generations above Zerubbabel, in the genealogy of Joseph (Luke iii. 28). [ALMODAD.]

A. C. H.

ELNA'AM (אֶלְנַעַם [*God's delight*]: Ἐλναάμ; Alex. Ελνααμ; [FA. Ελναμ:] *Elnaëm*), the father of Jeribai and Joshaviah, two of David's guard, according to the extended list in 1 Chr. xi. 46. In the LXX. the second warrior is said to be the son of the first, and Elnaam is given as himself a member of the guard.

EL'NATHAN (אֶלְנָתָן [*whom God gave* comp. Theodore, Diodate]: [in 2 K.,] Ελλαναθάμ, [Vat. -ναθαμ, Alex. -μαθαμ; in Jer. xxvi. LXX. om.; Jer. xxxvi., Alex.] Ναθαν; [Rom Vat.] Ἰωνάθαν, [Ἐλνάθαν:] *Elnathan*). 1. The maternal grandfather of Jehoiachin, distinguished as "Elnathan of Jerusalem" (2 K. xxiv. 8). He is doubtless the same man with "Elnathan the son of Achbor," one of the leading men in Jerusalem in Jehoiakim's reign (Jer. xxvi. 22, xxxvi. 12, 25). The variations in the LXX. arise from the names Elnathan, Jonathan, and Nathan having the same sense, *God's gift* (Theodore).

2. [Αλωνάμ (Comp. Ἐλινάθαν), Ἐλνάθαμ, Ἐλνίθαν (Vat. Εαναθαν).] The name of three persons, apparently Levites, in the time of Ezra (Ezr. viii. 16). In 1 Esdr. they are corrupted to ALNATHAN, and EUNATAN.

W. L. B.

* Elnathan, the contemporary of Jehoiakim, appears in only two incidents, but these strongly illustrate both his own character and that of his times He was sent by the king with a body of men into Egypt to discover and bring back the fugitive URIJAH, who was afterwards beheaded, and whose innocent blood therefore stained in part the hands of his pursuer (Jer. xxvi. 20–23). Elnathan was present also at the burning of Jeremiah's "roll," which the king took from Baruch, the prophet's scribe, and threw into the fire before his eyes, because it contained such threatenings against the wicked that the conscience-smitten ruler could not submit to hear them read. It is recorded to the honor of Elnathan, that he had the courage to protest earnestly though ineffectually against the impious act (Jer. xxxvi. 20–25). On this transaction in its various personal relations, see further under JEHOIAKIM (Amer. ed.).

H.

E'LON. 1. (אַיָּלוֹן [*an oak*]: Ἐλών, Αἰλώμ; Alex. [Αιλωμ,] Ελωμ: *Elon*), a Hittite, whose daughter was one of Esau's wives (Gen. xxvi. 34, xxxvi. 2). For the variation in the name of his daughter, see BASHEMATH.

2. (אֵלוֹן: Αλλών; Alex. [in Gen.,] Ασρων: *Elon*), the second of the three sons attributed to Zebulun (Gen. xlvi. 14; Num. xxvi. 26); and the founder of the family (מִשְׁפַּחַת) of the ELONITES (הָאֵלֹנִי). From this tribe came

3. Elon the (not "a") Zebulonite (אֵילוֹן· Αἰλώμ; [Alex. Αιλων;] Joseph. Ἠλών: *Ahialon*), who judged Israel for ten years, and was buried in Aijalon in Zebulun (Judg. xii. 11, 12). The names "Elon" and "Aijalon" in Hebrew, are composed of precisely the same letters, and differ only in the vowel points, so that the place of Elon's burial may have been originally called after him. It will be remarked that the Vulgate does assimilate the two.

E'LON (אֵילוֹן: Ἐλών; [Vat. Αιλων:] *Elon*), one of the towns in the border of the tribe of Dan (Josh. xix. 43). To judge from the order of the list, its situation must have been between Ajalon (*Yâlo*) and Ekron (*Akîr*); but no town corresponding in name has yet been discovered. The name in Hebrew signifies a great oak or other strong tree, and may therefore be a testimony to

Digitized by Google

the wooded character of the district. It is possibly the same place as

E'LON-BETH-HA'NAN (אֵלוֹן בֵּית־חָנָן = *oak of the house of grace* [lit. *gracious one*, pern. a proper name]: Ἠλὼν ἕως Βηθανάν; Alex. Αιαλωμ c. B.; [Vat. Ελωμ c. Βαιθλαμαν]), which is named with two Danite towns as forming one of Solomon's commissariat districts (1 K. iv. 9). For "Beth-hanan" some Hebrew MSS. have "Ben-hanan," and some "and Bethhanan;" the latter is followed by the Vulgate ["et in Elon, et in Bethhanan"]. G.

E'LONITES, THE, Num. xxvi. 26. [ELON, 2.]

E'LOTH [אֵילוֹת, *grove of strong trees*: Αἰλάθ; in 2 Chr. viii. 17, Vat. Alex. Αιλαμ: *Ailath*], 1 K. ix. 26; 2 Chr. viii. 17, xxvi. 2. [ELATH.]

ELPA'AL (אֶלְפָּעַל [*God his reward*]: Ἀλφαάλ, [Ἐλφαάλ; Vat. Αλφααδ, Ελχααδ; Alex. ver. 12, Αλφ-α:] *Elphaal*), a Benjamite, son of Hushim and brother of Abitub (1 Chr. viii. 11). He was the founder of a numerous family. The Bene-Elpaal appear to have lived in the neighborhood of Lydda (Lod), and on the outposts of the Benjamite hills as far as Ajalon (*Yâlo*) (viii. 12–18), near the Danite frontier. Hushim was the name of the principal Danite family. If the forefather of Elpaal was the same person, his mention in a Benjamite genealogy is an evidence of an intermarriage of the two tribes.

ELPA'LET (אֶלְפָּלֶט: Ἐλιφαλήθ [Alex. -λετ; Vat. Ελειφαλεθ, FA. -λετ:] *Elipha'let*), one of David's sons born in Jerusalem (1 Chr. xiv. 5). In the parallel list, 1 Chr. iii. 6, the name is given more fully as ELIPHELET.

EL-PA'RAN (אֵיל פָּארָן: ἡ τερέβινθος τῆς Φαράν; Alex. η τερεμινθος τ. Φ.: *campestria Pharan*). Literally "the terebinth of Paran" (Gen. xiv. 6). [PARAN.] W. A. W.

EL'TEKEH (אֶלְתְּקֵה [or אֶלְתָּקָא, *God his fear*, i. e. *God-fearing*]: Ἀλκαθέ, and ἡ Ελκωθαλμ; Alex. Ελθεκω: *Elthece*, [*Eltheco*]), one of the cities in the border of Dan (Josh. xix. 44), which with its "suburbs" (מִגְרָשׁ) was allotted to the Kohathite Levites (xxi. 23). It is however omitted from the parallel list of 1 Chr. vi. No trace of the name has yet been discovered. G.

EL'TEKON (אֶלְתְּקוֹן [*God its foundation*]: Θεκούμ; Alex. Ελθεκεν: *Eltecon*), one of the towns of the tribe of Judah, in the mountains (Josh. xv. 59). From its mention in company with HALHUL and BETH-ZUR, it was probably about the middle of the country of Judah, 3 or 4 miles north of Hebron; but it has not yet been identified. G.

ELTO'LAD (אֶלְתּוֹלָד [*God's kindred, allied to him*]: Ἐλβωνδάδ and Ἐρθουλά [Vat. Ελθουλα]; Alex. Ελθωλαδ and Ελθουδαδ: *Eltho'ad*), one of the cities in the south of Judah (Josh. xv. 30) allotted to Simeon (Josh. xix. 4); and in possession of that tribe until the time of David (1 Chr. iv. 29). It is named with Beer-sheba and other places which we know to have been in the extreme south, on the border of the country; but it has not yet been identified. In the passage of Chronicles above quoted, the name is given as TOLAD. G.

E'LUL [*Heb.* Elul] (אֱלוּל: ὁ Ελούλ: *Elul*) Neh. vi. 15; [where the month is so named in which Nehemiah's wall of Jerusalem was finished and] 1 Macc. xiv. 27 [where it is the month in which written tablets of brass were erected on Sion in honor of Simon Maccabæus]. [MONTHS.]

ELU'ZAI [3 syl.] (אֶלְעוּזַי [*God my Praise*]: Ἀζαΐ; [FA. Αζει; Ald.] Alex. Ἐλιωζί: *Eluzai*), one of the warriors of Benjamin, who joined David at Ziklag while he was being pursued by Saul (1 Chr. xii. 5). [The A. V. ed. 1611 reads Eleuzai.]

* **ELYMA'IS** (Ἐλυμαΐς; in 1 Macc., Sin. ενλυμαις; Alex. εν Ελυμες; Comp. Ald. ἐν Ελυμαΐς: *Elymais*; in Tob., Vulg. omits) occurs in 1 Macc. vi. 1 as the name of a city in Persia "greatly renowned for riches, silver and gold," and containing (ver. 2) "a very rich temple, wherein were coverings of gold, and breastplates, and shields, which Alexander, the Macedonian king, had left there." To this place Antiochus Epiphanes (see on that name) laid siege, but was baffled and fled with his army to Babylon. Josephus also, who mentions the same occurrence (*Ant.* xii. 9, § 1), calls the city Elymais (ὥρμησεν ἐπὶ τὴν Ἐλυμαΐδα καὶ αὐτὴν ἐπολιόρχει); but no one of the other writers (Polybius, Appian, Strabo, Diodorus) who refer to this frustrated attempt of Antiochus shows any knowledge of a city bearing this name. It can hardly be said that Josephus confirms the writer of the first book of Maccabees; for he merely copies that writer or some document which they both follow.

Elymais denoted among the Greeks the Semitic ELAM, but as applied to a city is unknown out of 1 Macc. vi. 1, and Josephus as above. Some think it an oversight of these writers, or a mistranslation of the Aramæan original of the first book of Maccabees. Vaihinger (Herzog's *Real-Encyk.* iii. 749) adopts the suggestion of Michaelis that מְדִינָה may have stood in this original document, in its older sense of "province" (see Dan. viii. 2), but was translated into Greek by its later sense of "city," a meaning which the word now bears in Syriac and Arabic. Symmachus renders the same word by πόλις in 1 K. xx. 14 and Dan. viii. 2. Dr. Rödiger thinks it possible that the name of the country may stand in 1 Macc. vi. 1 for that of the capital (Ersch and Gruber's *Encyk.* art. *Elam*). In Tob. ii. 10, Elymais is evidently the name of the province, and not of a town. (See Pauly's *Real-Encyk.* iii. 114; Winer's *Realw.* i. 313; Fritzsche and Grimm, *Exeg. Handb.* in loc.) H.

ELYMÆ'ANS [A. V. ed. 1611 Elime'ans, in later eds. Elyme'ans] (Ἐλυμαῖοι), Jud. i. 6 [ELAMITES.]

EL'YMAS (Ελύμας), the Arabic name of the Jewish mage or sorcerer Bar-jesus, who had attached himself to the proconsul of Cyprus, Sergius Paulus, when St. Paul visited the island (Acts xiii. 6 ff.) On his attempting to dissuade the proconsul from embracing the Christian faith, he was struck with miraculous blindness by the Apostle. The name Elymas, "the wise man," is from the same root as the Arabic "Ulema." On the practice generally then prevailing, in the decay of faith, of consulting

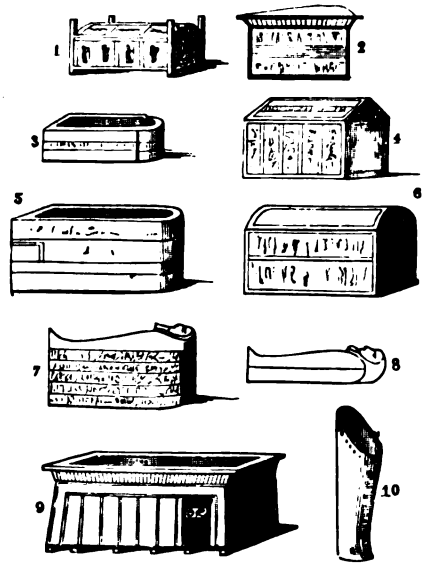
oriental impostors of this kind, see Conybeare and Howson, *Life of St. Paul*, i. 177–180, 2d ed.

H. A.



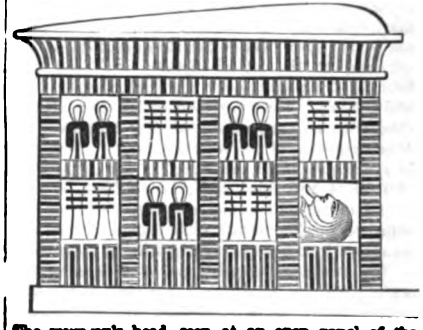
* **ELYME'ANS.** [ELYMÆANS.]

EL'ZABAD (אֶלְזָבָד [*given of God* = Theodore]: Ἐλιαζέρ: Alex. Ἐλεζαβάδ: *Elzebad*). 1. The ninth of the eleven Gadite heroes who came across the Jordan to David when he was in distress in the wilderness of Judah (1 Chr. xii. 12).

2. [Ἐλζαβάθ; Vat. Ἐληζαβάθ; Alex. Ἐλζαβάδ: *Elzabad.*] A Korhite Levite, son of Shemaiah and of the family of Obed-edom; one of the doorkeepers of the "house of Jehovah" (1 Chr. xxvi. 7).

EL'ZAPHAN (אֶלְצָפָן [*one whom God protects*]: Ἐλισαφάν: *Elisaphan*), second son of Uzziel, who was the son of Kohath son of Levi (Ex. vi. 22). He was thus cousin to Moses and Aaron, as is distinctly stated. Elzaphan assisted his brother Mishael to carry the unhappy Nadab and Abihu in their priestly tunics out of the camp (Lev. x. 4). The name is a contracted form of ELIZAPHAN, in which it most frequently occurs.

EMBALMING, the process by which dead bodies are preserved from putrefaction and decay. The Hebrew word חָנַט (*chânat*), employed to denote this process, is connected with the Arabic حنط, which in conj. 1 signifies "*to be red*," as leather which has been tanned; and in conj. 2, "*to preserve with spices.*" In the 1st and 4th conjugations it is applied to the ripening of fruit, and this meaning has been assigned to the Hebrew root in Cant. ii. 13. In the latter passage, however, it probably denotes the fragrant smell of the ripening figs. The word is found in the Chaldee and Syriac dialects, and in the latter ܚܢܛ (*chânetto*)



Different forms of mummy cases. (Wilkinson.)
1, 2, 4. Of wood. 3, 5, 6, 7, 8. Of stone.
9. Of wood, and of early time — before the XVIIIth dynasty.
10. Of burnt earthenware.

is the equivalent of μίγμα, the confection of myrrh and aloes brought by Nicodemus (John xix. 39).

The practice of embalming was most general among the Egyptians, and it is in connection with this people that the two instances which we meet with in the O. T. are mentioned (Gen. l. 2, 26). Of the Egyptian method of embalming there remain two minute accounts, which have a general kind of agreement, though they differ in details.

Herodotus (ii. 86–89) describes three modes, varying in completeness and expense, and practiced by persons regularly trained to the profession, who were initiated into the mysteries of the art by their ancestors. The most costly mode, which is estimated by Diodorus Siculus (i. 91) at a talent of silver, was said by the Egyptian priests to belong to him whose name in such a matter it was not lawful to mention, namely, Osiris. The embalmers first removed part of the brain through the nostrils, by means of a crooked iron, and destroyed the rest by injecting caustic drugs. An incision was then made along the flank with a sharp Ethiopian stone, and the whole of the intestines removed. The cavity was rinsed out with palm-wine, and afterwards scoured with pounded perfumes. It was then filled with pure myrrh pounded, cassia, and other aromatics, except frankincense. This done, the body was sewn up and steeped in natron for seventy days. When the seventy days were accomplished, the embalmers washed the corpse and swathed it in bandages of linen, cut in strips and smeared with gum. They then gave it up to the relatives of the deceased, who provided for it a wooden case, made in the shape of a man, in which the dead was placed, and deposited in an erect position against the wall of the sepulchral chamber. Diodorus Siculus gives some particulars of the process which are omitted by Herodotus. When the body was laid out on the ground for the purpose of embalming, one of the operators, called the scribe (γραμματεύς), marked out the part of the left flank where the incision was to be made. The dissector (παρασχιστής) then, with a sharp Ethiopian stone (black flint, or Ethiopian agate, Rawlinson, *Herod.* ii. 141), hastily cut through as much flesh as the law enjoined, and fled, pursued by curses and volleys of stones from the spectators. When all the embalmers (ταριχευταί) were assembled, one of them extracted the intestines, with the exception of the heart and kidneys; another cleansed

The mummy's head, seen at an open panel of the coffin (Wilkinson.)

them one by one, and rinsed them in palm-wine and perfumes. The body was then washed with oil of cedar, and other things worthy of notice, for

more than thirty days (according to some MSS. forty and afterwards sprinkled with myrrh, cinnamon, and other substances, which possess the property not only of preserving the body for a long period, but also of communicating to it an agreeable smell. This process was so effectual that the features of the dead could be recognized. It is remarkable that Diodorus omits all mention of the steeping in natron.

The second mode of embalming cost about 20 minæ. In this case no incision was made in the body, nor were the intestines removed, but cedar-oil was injected into the stomach by the rectum. The oil was prevented from escaping, and the body was then steeped in natron for the appointed number of days. On the last day the oil was withdrawn, and carried off with it the stomach and intestines in a state of solution, while the flesh was consumed by the natron, and nothing was left but the skin and bones. The body in this state was returned to the relatives of the deceased.

The third mode, which was adopted by the poorer classes, and cost but little, consisted in rinsing out the intestines with syrmæa, an infusion of senna and cassia (Pettigrew, p. 69), and steeping the body for the usual number of days in natron.

Porphyry (*De Abst.* iv. 10) supplies an omission of Herodotus, who neglects to mention what was done with the intestines after they were removed from the body. In the case of a person of respectable rank they were placed in a separate vessel and thrown into the river. This account is confirmed by Plutarch (*Sept. Sap. Conv.* c. 16).

Although the three modes of embalming are so precisely described by Herodotus, it has been found impossible to classify the mummies which have been discovered and examined under one or other of these three heads. Dr. Pettigrew, from his own observations, confirms the truth of Herodotus' statement that the brain was removed through the nostrils. But in many instances, in which the body was carefully preserved and elaborately ornamented, the brain had not been removed at all; while in some mummies the cavity was found to be filled with resinous and bituminous matter.

M. Rouyer, in his *Notice sur les Embaumements des Anciens Égyptiens*, quoted by Pettigrew, endeavored to class the mummies which he examined under two principal divisions, which were again subdivided into others. These were — I. Mummies with the ventral incision, preserved, (1.) by balsamic matter, and (2.) by natron. The first of these are filled with a mixture of resin and aromatics, and are of an olive color — the skin dry, flexible, and adhering to the bones. Others are filled with bitumen or asphaltum, and are black, the skin hard and shining. Those prepared with natron are also filled with resinous substances and bitumen. II. Mummies without the ventral incision. This class is again subdivided, according as the bodies were, (1.) salted and filled with pisasphaltum, a compound of asphaltum and common pitch; or (2.) salted only. The former are supposed to have been immersed in the pitch when in a liquid state.

The medicaments employed in embalming were various. From a chemical analysis of the substances found in mummies, M. Rouelle detected three modes of embalming: (1.) with *asphaltum*, or Jew's pitch, called also *funeral gum*, or *gum of mummies*; (2.) with a mixture of asphaltum and cedria, the liquor distilled from the cedar; (3.) with this mixture together with some resinous and aromatic ingredients. The powdered aromatics mentioned by Herodotus were not mixed with the bituminous matter, but sprinkled into the cavities of the body.

It does not appear that embalming, properly so called, was practiced by the Hebrews. Asa was laid "in the bed which was filled with sweet odors and divers kinds *of spices* prepared by the apothecaries' art" (2 Chr. xvi. 14); and by the tender care of Nicodemus the body of Jesus was wrapped in linen cloths, with spices, "a mixture of myrrh and aloes, about an hundred pound *weight* . . . as the manner of the Jews is to bury" (John xix. 39, 40).

The account given by Herodotus has been supposed to throw discredit upon the narrative in Genesis. He asserts that the body is steeped in natron for seventy days, while in Gen. l. 3 it is said that only forty days were occupied in the whole process of embalming, although the period of mourning extended over seventy days. Diodorus, on the contrary, omits altogether the steeping in natron as a part of the operation, and though the time which, according to him, is taken up in washing the body with cedar oil and other aromatics is more than thirty days, yet this is evidently only a portion of the whole time occupied in the complete process. Hengstenberg (*Egypt and the Books of Moses*, p. 69, Eng. tr.) attempts to reconcile this discrepancy by supposing that the seventy days of Herodotus include the whole time of embalming, and not that of steeping in natron only. But the differences in detail which characterize the descriptions of Herodotus and Diodorus, and the impossibility of reconciling these descriptions in all points with the results of scientific observation, lead to the natural conclusion that, if these descriptions be correct in themselves, they do not include every method of embalming which was practiced, and that, consequently, any discrepancies between them and the Bible narrative cannot be fairly attributed to a want of accuracy in the latter. In taking this view of the case it is needless to refer to the great interval of time which elapsed between the date claimed for the events of Genesis and the age of Herodotus, or between the latter and the times of Diodorus. If the four centuries which separated the two Greek historians were sufficient to have caused such changes in the mode of embalming as are indicated in their different descriptions of the process, it is not unreasonable to conclude that the still greater interval by which the celebration of the funeral obsequies of the patriarch preceded the age of the father of history might have produced changes still greater both in kind and in degree.

It is uncertain what suggested to the Egyptians the idea of embalming. That they practiced it in accordance with their peculiar doctrine of the transmigration of souls we are told by Herodotus. The actual process is said to have been derived from "their first merely burying in the sand, impregnated with natron and other salts, which dried and preserved the body" (Rawlinson, *Herod.* ii. p. 142). Drugs and bitumen were of later introduction, the latter not being generally employed before the XVIIIth dynasty. When the practice ceased entirely is uncertain.

The subject of embalming is most fully discussed, and the sources of practical information well-nigh exhausted, in Dr. Pettigrew's *History of Egyptian Mummies*. [See also Alger's *Hist. of the Doctrine of a Future Life*, p. 97 ff.] W. A. W.

EMBROIDERER. This term is given in the A. V. as the equivalent of *rokém* (רֹקֵם), the productions of the art being described as "needlework" (רִקְמָה). In Exodus the embroiderer is contrasted with the "cunning workman," *choshéb* (חֹשֵׁב); and the consideration of one of these terms involves that of the other. Various explanations have been offered as to the distinction between them, but most of these overlook the distinction marked in the Bible itself, namely, that the *rokém* wove simply a variegated texture, without gold thread or figures, and that the *choshéb* interwove gold thread or figures into the variegated texture. We conceive that the use of the gold thread was for delineating figures, as is implied in the description of the corselet of Amasis (Her. iii. 47), and that the notices of gold thread in some instances and of figures in others were but different methods of describing the same thing. It follows, then, that the application of the term "embroiderer" to *rokém* is false; if it belongs to either it is to *choshéb*, or the "cunning workman," who added the figures. But if "*embroidery*" be strictly confined to the work of the *needle*, we doubt whether it can be applied to either, for the simple addition of gold thread, or of a figure, does not involve the use of the needle. The patterns may have been worked into the stuff by the loom, as appears to have been the case in Egypt (Wilkinson, iii. 128; cf. Her. *loc. cit.*), where the Hebrews learned the art, and as is stated by Josephus (ἄνθη ἐνύφαναν, *Ant.* iii. 7, § 2). The distinction, as given by the Talmudists, which has been adopted by Gesenius (*Thesaur.* p. 1311) and Bähr (*Symbolik*, i. 266) is this — that *rikmáh*, or "needle-work," was where a pattern was attached to the stuff by being sewn on to it on *one* side, and the work of the *choshéb* when the pattern was worked into the stuff by the loom, and so appeared on *both* sides. This view appears to be entirely inconsistent with the statements of the Bible, and with the sense of the word *rikmáh* elsewhere. The absence of the figure or the gold thread in the one, and its presence in the other, constitutes the essence of the distinction. In support of this view we call attention to the passages in which the expressions are contrasted. *Rikmáh* consisted of the following materials: "blue, purple, scarlet, and fine twined linen" (Ex. xxvi. 36, xxvii. 16, xxxvi. 37, xxxviii. 18, xxxix. 29). The work of the *choshéb* was either "fine twined linen, blue, purple, and scarlet, *with cherubims*" (Ex. xxvi. 1, 31, xxxvi. 8, 35), or "*gold*, blue, purple, scarlet, and fine twined linen" (xxviii. 6, 8, 15, xxxix. 2, 5, 8). Again, looking at the general sense of the words, we shall find that *choshéb* involves the idea of invention, or *designing* patterns; *rikmáh* the idea of *texture* as well as *variegated color*. The former is applied to other arts which demanded the exercise of inventive genius, as in the construction of engines of war (2 Chr. xxvi. 15); the latter is applied to other substances, the texture of which is remarkable, as the human body (Ps. cxxxix 15). Further than this, *rikmáh* involves the idea of a regular disposition of colors, which demanded no inventive genius. Beyond the instances already adduced it is applied to tessellated pavement (1 Chr. xxix. 2), to the eagle's plumage (Ez. xvii. 3), and, in the Targums, to the leopard's spotted skin (Jer. xiii. 23). In the same sense it is applied to the checkered sails of the Egyptian vessels (Ez. xxvii. 16), which were either chequered or worked according to a regularly recurring pattern (Wilkinson, iii 211). Gesenius considers this passage as conclusive for his view of the distinction, but it is hardly conceivable that the patterns were on one side of the sail only, nor does there appear any ground to infer a departure from the usual custom of working the colors by the loom. The ancient versions do not contribute much to the elucidation of the point. The LXX. varies between ποικιλτὴς and ῥαφιδευτὴς, as representing *rokém*, and ποικιλτὴς and ὑφαντὴς for *choshéb*, combining the two terms in each case for the work itself, ἡ ποικιλία τοῦ ῥαφιδευτοῦ for the first, ἔργον ὑφαντὸν ποικιλτόν for the second. The distinction, as far as it is observed, consisted in the one being *needle-work* and the other *loom-work*. The Vulgate gives generally *plumarius* for the first, and *polymitarius* for the second; but in Ex. xxvi. 1, 31, *plumarius* is used for the second. The first of these terms (*plumarius*) is well chosen to express *rokém*, but *polymitarius*, i. e. a weaver who works together threads of divers colors, is as applicable to one as to the other. The rendering in Ez. xxvii. 16, *scutulata*, i. e. "chequered," correctly describes one of the productions of the *rokém*. We have lastly to notice the incorrect rendering of the word שְׁבֵץ, in the A. V. "broider," "embroider" (Ex. xxviii. 4, 39). It means stuff worked in a *tessellated* manner, *i. e.* with square cavities such as stones might be set in (comp. ver. 20). The art of embroidery by the loom was extensively practiced among the nations of antiquity. In addition to the Egyptians, the Babylonians were celebrated for it, but embroidery in the proper sense of the term, *i. e.* with the needle, was a Phrygian invention of later date (Plin. viii. 48). W. L. B.

EMERALD (נֹפֶךְ: LXX. ἄνθραξ; N. T. and Apoc., σμάραγδος), a precious stone, first in the 2d row on the breastplate of the high-priest (Ex. xxviii. 18, xxxix. 11), imported to Tyre from Syria (Ez. xxvii. 16), used as a seal or signet (Ecclus. xxxii. 6), as an ornament of clothing and bedding (Ez. xxviii. 13; Jud. x. 21), and spoken of as one of the foundations of Jerusalem (Rev. xxi. 19; Tob. xiii. 16). The rainbow round the throne is compared to emerald in Rev. iv. 3, ὅμοιος ὁράσει σμαραγδίνῳ.

The etymology of נֹפֶךְ is uncertain. Gesenius suggests a comparison with the word פּוּךְ, a paint with which the Hebrew women stained their eyelashes. Kalisch on Exodus xxviii. follows the LXX., and translates it *carbuncle*, transferring the meaning *emerald* to יַהֲלֹם in the same ver. 18. The Targum Jerusalem on the same ver. explains נֹפֶךְ by כַּרְכְּדָנָא = *carchedonius, carbuncle*.

W. D.

EMERODS (עֳפָלִים, טְחֹרִים: ἕδρα. *anus, nates;* Deut. xxviii. 27; 1 Sam. v. 6, 9, 12, vi. 4, 5, 11). The probabilities as to the nature of the disease are mainly dependent on the probable roots of these two Hebrew words; the former of which [a] evidently means "a swelling;" the latter,

[a] Closely akin to it is the Arabic عفل, which means "tumor qui apud viros oritur in posticis partibus, apud mulieres in anteriore parte vulvæ, similis herniæ virorum."

Digitized by Google

though less certain, is most probably from a Syriac verb, ܬܚܙ, meaning "anhelavit sub onere, enixus est in exonerando ventre" (Parkhurst and Gesenius); and the Syriac noun ܬܚܙܐ from the same root denotes, (1.) such effort as the verb implies, and (2.) the *intestinum rectum*. Also, whenever the former word occurs in the Hebrew *Cetib*,[a] the *Keri* gives the latter, except in 1 Sam. vi. 11, where the latter stands in the *Cetib*. Now this last passage speaks of the images of the emerods after they were actually made, and placed in the ark. It thus appears probable that the former word means the disease, and the latter the part affected, which must necessarily have been included in the actually existing image, and have struck the eye as *the essential* thing represented, to which the disease was an incident. As some morbid swelling, then, seems the most probable nature of the disease, so no more probable conjecture has been advanced than that *hemorrhoidal tumors*, or bleeding piles, known to the Romans as *marisca* (Juv. ii. 13), are intended. These are very common in Syria at present, oriental habits of want of exercise and improper food, producing derangement of the liver, constipation, &c., being such as to cause them. The words of 1 Sam. v. 12, "the men that *died not* were smitten with emerods," show that the disease was not necessarily fatal. It is clear from its parallelism with "botch" and other diseases in Deut. xxviii. 27, that עֳפָלִים is a disease, not a part of the body; but the translations of it by the most approved authorities are various and vague.[b] Thus the LXX. and Vulg., as above, uniformly render the word as bearing the latter sense. The mention by Herodotus (i. 105) of the malady, called by him θήλεια νοῦσος, as afflicting the Scythians who robbed the temple (of the Syrian Venus) in Ascalon, has been deemed by some a proof that some legend containing a distortion of the Scriptural account was current in that country down to a late date. The Scholiast on Aristophanes (*Acharn.* 231) mentions a similar plague (followed by a similar subsequent propitiation to that mentioned in Scripture), as sent upon the Athenians by Bacchus.[c] The opinion mentioned by Winer (s. v. *Philister*), as advanced by Lichtenstein, that the plague of emerods and that of mice are one and the same, the former being caused by an insect (*solpuga*) as large as a field-mouse, is hardly worth serious attention. H. H.

EMIM [A. V. Emims] (אֵימִים [*terrors*]: [in Gen.,] Ὀμμαῖοι, [Ald. Alex. Ζομαῖοι, Comp. Εμμαῖοι;] and [in Deut.,] Ὀμμίν, [Vat. Ομμειν, Alex. Οομμειν, Ομμειν: *Emim*]), a tribe or family of gigantic stature which originally inhabited the region along the eastern side of the Dead Sea. It would appear, from a comparison of Gen. xiv. 5–7 with Deut. ii. 10–12, 20–23, that the whole country east of the Jordan was, in primitive times, held by a race of giants, all probably of the same stock comprehending the Rephaim on the north, next the Zuzim, after them the Emim, and then the Horim on the south; and that afterwards the kingdom of Bashan embraced the territories of the first; the country of the Ammonites the second; that of the Moabites the third; while Edom took in the mountains of the Horim. The whole of them were attacked and pillaged by the eastern kings who destroyed Sodom and Gomorrah.

The Emim were related to the Anakim, and were generally called by the same name; but their conquerors the Moabites termed them Emim — that is, "Terrible men" (Deut. ii. 11) — most probably on account of their fierce aspect. [REPHAIM; ANAKIM.] J. L. P.

EMMANUEL (Ἐμμανουήλ: *Emmanuel*), Matt. i. 23. [IMMANUEL.]

EMMAUS (Ἐμμαούς [prob. = חַמַּת, *warm spring*; comp. Josh. xix. 35]), the village to which the two disciples were going when our Lord appeared to them on the way, on the day of his resurrection (Luke xxiv. 13). Luke makes its distance from Jerusalem *sixty stadia* (A. V. "threescore furlongs"), or about 7½ miles; and Josephus mentions "a village called Emmaus" at the same distance (*B. J.* vii. 6, § 6).[d] These statements seem sufficiently definite; and one would suppose no great mistake could be made by geographers in fixing its site. It is remarkable, however, that from the earliest period of which we have any record, the opinion prevailed among Christian writers, that the Emmaus of Luke was identical with the Emmaus on the border of the plain of Philistia, afterwards called Nicopolis, and which was some 20 miles from Jerusalem. Both Eusebius and Jerome adopted this view (*Onom.* s. v. *Emaus*); and they were followed by all geographers down to the commencement of the 14th century (Reland, p. 758). Then, for some reason unknown to us, it began to be supposed that the site of Emmaus was at the little village of *Kubeibeh*, about 3 miles west of *Neby Samwil* (the ancient MIZPEH), and 9 miles from Jerusalem (Sir J. Maundeville in *Early Travels in Palestine*, p. 175; Ludolph. de Suchem, *Itin.*; Quaresmius, ii. 719). There is not, however, a shadow of evidence for this supposition. In fact the site of Emmaus remains yet to be identified.

Dr. Robinson has recently revived the old theory, that the Emmaus of Luke is identical with Nicopolis; and has supported it with his wonted learning, but not with his wonted conclusiveness. He first endeavors to cast doubts on the accuracy of the reading ἑξήκοντα in Luke xxiv. 13, because two uncial MSS. (K and N), and a few unimportant cursive MSS. insert ἑκατόν, thus making the distance 160 stadia, which would nearly correspond to the distance of Nicopolis.[e] But the best MSS. have not this word, and the best critics regard it as an interpolation. There is a strong probability

[a] Parkhurst, however, *s. v.* עֳפָלִים, thinks, on the authority of Dr. Kennicott's *Codices*, that מְחֹרִים is in all these passages a very ancient Hebrew *variae lectio*.

[b] Josephus, *Ant.* vi. 1, § 1, δυσεντερία; Aquila, τὸ τῆς φαγεδαίνης ἕλκος.

[c] Pollux, *Onom.* iv. 25, thus describes what he calls βουβών. οἴδημα μετα φλεγμονῆς αἱματῶδους γίνεται κατὰ τὴν ἕδραν ἔντος, ἐστὶ δὲ ὁμοια μύροις ὄμοις. Comp Bochart, *Hieroz.* i. 881.

[d] * It is not certain that Luke and Josephus refer to the same Emmaus in the passages associated as above. According to some authorities the correct reading in Joseph. *B. J.* vii. 6, § 6 (adopted in Dindorf's and Bekker's text) is τριάκοντα and not ἑξήκοντα. H.

[e] * To the authorities for this reading the *Codex Sinaiticus* and a palimpsest of the 6th century (*l*) are now to be added. But the evidence against it greatly preponderates. A.

Digitized by Google

that some copyist who was acquainted with the city, but not the village of Emmaus, tried thus to reconcile Scripture with his ideas of geography. The opinions of Eusebius, Jerome, and their followers, on a point such as this, are not of very great authority. When the *name* of any noted place agreed with one in the Bible, they were not always careful to see whether the *position* corresponded in like manner. [EDREI.] Emmaus-Nicopolis being a noted city in their day, they were led somewhat rashly to confound it with the Emmaus of the Gospel. The circumstances of the narrative are plainly opposed to the identity. The two disciples having journeyed from Jerusalem to Emmaus in part of a day (Luke xxiv. 28, 29), left the latter again after the evening meal, and reached Jerusalem before it was very late (verses 33, 42, 43). Now, if we take into account the distance, and the nature of the road, leading up a steep and difficult mountain, we must admit that such a journey could not be accomplished in less than from six to seven hours, so that they could not have arrived in Jerusalem till long past midnight. This fact seems to us conclusive against the identity of Nicopolis and the Emmaus of Luke. (Robinson, iii. 147 ff.; Reland, *Pal.* p. 427 ff.) J. L. P.

* Since the preceding article was written, an interesting monograph on this question as to the site of Emmaus has appeared from Dr. Hermann Zschokke, rector of the Austrian Pilgrim-house at Jerusalem (*Das Neutestamentliche Emmaus beleuchtet*, Schaffhausen, 1865). Rector Zschokke, who has made this subject a special study, decides that the Emmaus of Luke (xxiv. 13) must be the present *el-Kubeibeh*, about nine miles northwest of Jerusalem, where the Franciscan monks have placed it. His arguments for that conclusion are the following. First, the distance agrees with that of Luke and Josephus (*B. J.* vii. 6, § 6), namely, as a round number, 60 stadia or "furlongs" (A. V.), as ascertained by actual measurement, *i. e.* taking the shortest of three ways, which differ only by a single stadium, it amounts to 38,020 English feet = 62½ stadia. Secondly, the two disciples of Jesus could easily return from Emmaus to Jerusalem after sunset, or the decline of the day (κέκλικεν ἡ ἡμέρα), and rejoin the Apostles there in their secret meeting during the night which followed the walk to Emmaus (John xx. 19). The journey was performed lately without difficulty, within the time required, by Madam Anna C. Emmerich. Thirdly, the Crusaders (though really, as appears from the author's own figures, not earlier than the 11th century) were led to fix on *Kubeibeh* as the N. T. Emmaus, in consequence of finding the latter name applied to it by the native inhabitants, though the name no longer exists among them. If this last link in the chain of the evidence were stronger, it would deserve serious consideration as bearing on the question. But aside from the lateness of the period to which the alleged testimony belongs, it must be confessed that the currency of the Scripture name, even at that late period, outside of the Christian communities in the East, is by no means so fully made out as the argument requires. It has been generally thought that the earliest traces of such a tradition appear in the 14th century (see Rob. *Res.* iii. 66, 1st ed.).

Some wealthy Catholics, in the assurance that they have identified at length the genuine spot, have recently purchased, at an exorbitant price, the ground of the old "castrum Arnoldi" (*Kubeibeh*), and are converting it into one of their "holy places." (See more fully in *Bibl. Sacra*, July, 1866, p. 517.) Rector Zschokke makes it evident enough, that *'Amwâs* (Nicopolis), at the foot of the mountains, cannot be the N. T. village of that name. Dr. Sepp, though a Catholic, rejects this claim in behalf of *Kubeibeh*, and insists that Emmaus must be at *Kulonieh*, four miles from Jerusalem, on the route from *Ramleh* (*Jerusalem u. das heil. Land*, i. 52). So Ewald, *Gesch. d. Volkes Isr.* vi. 675 f. The Rev. George Williams (art. *Emmaus* in Smith's *Dict. of Geogr.*, and *Journ. of Class. and Sacr. Phil.* iv. 262–267) fixes the site of Emmaus at *Kuriet el-'Enab*, from two to three hours distant from Jerusalem on the road to Jaffa. Dr. Thomson (*Land and Book*, ii. 307 f., 540) inclines to this view. — In a volcanic region like Judæa warm springs might be expected to exist for a time, and then to disappear. The Emmaus of the N. T. (see import of the name above) may have been a place of this description, the site of which is now lost. H.

EM'MAUS, or **NICOP'OLIS** ('Εμμαούμ: [Sin. Αμμαου, Αμμαους, etc.; in] 1 Macc. iii. 40, [Alex. Αμμαουν, 57, -ουμ;] 'Αμμαούς, Joseph. *B. J.* ii. 20, § 4: [*Emmaum, Ammaum*]), a town in the plain of Philistia, at the foot of the mountains of Judah, 22 Roman miles from Jerusalem, and 10 from Lydda (*Itin. Hieros.*; Reland, p. 309). The name does not occur in the O. T.; but the town rose to importance during the later history of the Jews, and was a place of note in the wars of the Asmoneans. It was fortified by Bacchides, the general of Antiochus Epiphanes, when he was engaged in the war with Jonathan Maccabæus (Joseph. *Ant.* xiii. 1, § 3; 1 Macc. ix. 50). It was in the plain beside this city that Judas Maccabæus so signally defeated the Syrians with a mere handful of men, as related in 1 Macc. iii. 57, iv. 3, &c. Under the Romans Emmaus became the capital of a toparchy (Joseph. *B. J.* iii. 3, § 5; Plin. v. 14). It was burned by the Roman general Varus about A. D. 4. In the 3d century (about A. D. 220) it was rebuilt through the exertions of Julius Africanus, the well-known Christian writer; and then received the name Nicopolis. Eusebius and Jerome frequently refer to it in defining the positions of neighboring towns and villages (*Chron. Pas.* ad A. C. 223; Reland, p. 759). Early writers mention a fountain at Emmaus, famous far and wide for its healing virtues; the cause of this Theophanes ascribes to the fact that our Lord on one occasion washed his feet in it (*Chron.* 41). The Crusaders confounded Emmaus with a small fortress further south, on the Jerusalem road now called *Latrôn* (Will. Tyr. *Hist.* vii. 24). A small miserable village called *'Amwâs* still occupies the site of the ancient city. It stands on the western declivity of a low hill, and contains the ruins of an old church. The name Emmaus was also borne by a village of Galilee close to Tiberias; probably the ancient HAMMATH, *i. e.* hot springs — of which name Emmaus was but a corruption. The hot springs still remained in the time of Josephus, and are mentioned by him as giving its name to the place (*B. J.* iv. 1, § 3; *Ant.* xviii. 2, § 3).

J. L. P.

EM'MER ('Εμμήρ; [Vat. Εμηρ:] *Semmeri*), 1 Esdr. ix. 21. [[IMMER.]]

EM'MOR (Rec. Text with E, 'Ρμμόρ; 1 edit. [Tisch. and Treg.] with A B Q [and Sin.],

Ἐμμώρ: *Emmor*), the father of Sychem (Acts vii. 16). [HAMOR.]

• **ENABLED** translates (A. V.) ἐνδυναμώσαντί (1 Tim. i. 12): "I thank Christ Jesus our Lord, who hath *enabled* me," &c., *i. e.*, as the Greek construction shows, qualified me, or made me able, so as to be fitted for the apostolic work. This is an older sense of "enabled," like the French *habiller*. See Eastwood and Wright's *Bible Word-Book*, p. 173. H.

• **ENA'JIM** (more correctly ENAYIM = עֵינַיִם) is the marginal reading of the A. V. for "an open place" in the text (Gen. xxxviii. 14). See next article below. Modern scholars generally (Gesenius, Fürst, Tuch, Knobel, Keil) regard the LXX. as right here (Αἰνάν), and understand that Tamar placed herself "at the gate (opening) of Enajim," situated "on the way to Timnath." The same word recurs in ver. 21, where the A. V. has "openly," but the proper name is more appropriate there, if not absolutely required. (See Mr. Wright's *Book of Genesis in Hebrew*, p. 100.) The dual endings יִם and ם are interchangeable (Gesen. *Heb. Gr.* § 88, Rem. 1), so that this Enajim and Enam in Josh. xv. 34 may be and no doubt are the same. H.

E'NAM (with the article, הָעֵינָם = *the double spring*, Gesen. *Thes.* p. 1019 a: Μαιανί; [Vat. -νει:] Alex. Ηναειμ; [Comp. Ald. Ἠναΐμ:] *Enaim*), one of the cities of Judah in the *Shefelah* or lowland (Josh. xv. 34). From its mention with towns (Jarmuth and Eshtaol, for instance) which are known to have been near Timnath, this is very probably the place in the "doorway" of which Tamar sat before her interview with her father-in-law (Gen. xxxviii. 14). In the A. V. the words *Pethach enayim* (פֶּתַח עֵינַיִם) are not taken as a proper name, but are rendered "an open place," lit. "the doorway of Enayim," or the double spring, a translation adopted by the LXX. (ταῖς πύλαις Αἰνάν) and now generally. In Josh. xv. 34, for "Tappuah and Elam," the Peshito has "Pathuch-Elam," which supports the identification suggested above. [AIN.] G.

E'NAN (עֵינָן [*rich in fountains*]: Αἰνάν: *Enan*). Ahira ben-Enan was "prince" of the tribe of Naphtali at the time of the numbering of Israel in the wilderness of Sinai (Num. i. 15, [ii. 29, vii. 78, 83, x. 27]).

ENAS'IBUS (Ἐνάσιβος; [Vat. -σει-:] *Enasib*), 1 Esdr. ix. 34. [ELIASHIB.]

ENCAMPMENT (מַחֲנֶה, *machăneh*, in all places except 2 K. vi. 8, where הַמַּחֲנוֹת, *tachănōth*, is used). The word primarily denoted the resting-place of an army or company of travellers at night[a] (Ex. xvi. 13; Gen. xxxii. 21), and was hence applied to the army or caravan when on its march (Ex. xiv. 19; Josh. x. 5, xi. 4; Gen. xxxii. 7, 8). Among nomadic tribes war never attained to the dignity of a science, and their encampments were consequently devoid of all the appliances of more systematic warfare. The description of the camp of the Israelites, on their march from Egypt (Num. ii., iii.), supplies the greatest amount of information on the subject: whatever else may be gleaned is from scattered hints. The tabernacle, corresponding to the chieftain's tent of an ordinary encampment, was placed in the centre, and around and facing it (Num. ii. 2),[b] arranged in four grand divisions, corresponding to the four points of the compass, lay the host of Israel, according to their standards (Num. i. 52, ii. 2). On the east the post of honor was assigned to the tribe of Judah, and round its standard rallied the tribes of Issachar and Zebulun, descendants of the sons of Leah. On the south lay Reuben and Simeon, the representatives of Leah, and the children of Gad, the son of her handmaid. Rachel's descendants were encamped on the western side of the tabernacle, the chief place being assigned to the tribe of Ephraim. To this position of Ephraim, Manasseh, and Benjamin, allusions are made in Judg. v. 14, and Ps. lxxx. 2. On the north were the tribes of Dan and Naphtali, the children of Bilhah, and the tribe of Asher, Gad's younger brother. All these were encamped around their standards, each according to the ensign of the house of his fathers. In the centre, round the tabernacle, and with no standard but the cloudy or fiery pillar which rested over it, were the tents of the priests and Levites. The former, with Moses and Aaron at their head, were encamped on the eastern side. On the south were the Kohathites, who had charge of the ark, the table of shewbread, the altars and vessels of the sanctuary. The Gershonites were on the west, and when on the march carried the tabernacle and its lighter furniture; while the Merarites, who were encamped on the north, had charge of its heavier appurtenances. The order of encampment was preserved on the march (Num. ii. 17), the signal for which was given by a blast of the two silver trumpets (Num. x. 5). The details of this account supply Prof. Blunt with some striking illustrations of the undesigned coincidences of the books of Moses (*Undes. Coincid.* pp. 75–86).

In this description of the order of the encampment no mention is made of sentinels, who, it is reasonable to suppose, were placed at the gates (Ex. xxxii. 26, 27) in the four quarters of the camp. This was evidently the case in the camp of the Levites (comp. 1 Chr. ix. 18, 24; 2 Chr. xxxi. 2).

The sanitary regulations of the camp of the Israelites were enacted for the twofold purpose of preserving the health of the vast multitude and the purity of the camp as the dwelling-place of God (Num. v. 3; Deut. xxiii. 14). With this object the dead were buried without the camp (Lev. x. 4, 5); lepers were excluded till their leprosy departed from them (Lev. xiii. 46, xiv. 3; Num. xii. 14, 15), as were all who were visited with loathsome diseases (Lev. xiv. 3). All who were defiled by contact with the dead, whether these were slain in battle or not, were kept without the camp for seven days (Num. xxxi. 19). Captives taken in war were compelled to remain for a while outside (Num. xxxi. 19; Josh. vi. 23). The ashes from the sacrifices were poured out without the camp at an appointed place, whither all uncleanness was removed (Deut. xxiii. 10, 12), and where the entrails, skins, horns, &c., and all that was not offered in sac-

[a] Whence חֲנוֹת הַיּוֹם (*chănōth hayyōm*), "the camping-time of day," *i. e.* the evening, Judg. xix. 9.

[b] The form of the encampment was evidently circular, and not square, as it is generally represented.

Digitized by Google

-ifice were burnt (Lev. iv. 11, 12, vi 11, viii. 17).

The execution of criminals took place without the camp (Lev. xxiv. 14; Num. xv. 35, 36; Josh. vii. 24), as did the burning of the young bullock for the sin-offering (Lev. iv. 12). These circumstances combined explain Heb. xiii. 12, and John xix. 17, 20.

The encampment of the Israelites in the desert left its traces in their subsequent history. The temple, so late as the time of Hezekiah, was still "the camp of Jehovah" (2 Chr. xxxi. 2; cf. Ps. lxxviii. 28); and the multitudes who flocked to David were "a great camp, like the camp of God" (1 Chr. xii. 22).

High ground appears to have been uniformly selected for the position of a camp, whether it were on a hill or mountain side, or in an inaccessible pass (Judg. vii. 1, 8). So, in Judg. x. 17, the Ammonites encamped in Gilead, while Israel pitched in Mizpeh. The very names are significant. The camps of Saul and the Philistines were alternately in Gibeah, the "height" of Benjamin, and the pass of Michmash (1 Sam. xiii. 2, 3, 16, 23). When Goliath defied the host of Israel, the contending armies were encamped on hills on either side of the valley of Elah (1 Sam. xvii. 3); and in the fatal battle of Gilboa Saul's position on the mountain was stormed by the Philistines who had pitched in Shunem (1 Sam. xxviii. 4), on the other side of the valley of Jezreel. The carelessness of the Midianites in encamping in the plain exposed them to the night surprise by Gideon, and resulted in their consequent discomfiture (Judg. vi. 33, vii. 8, 12). But another important consideration in fixing upon a position for a camp was the propinquity of water; hence it is found that in most instances camps were pitched near a spring or well (Judg. vii. 1; 1 Macc. ix. 33). The Israelites at Mount Gilboa pitched by the fountain in Jezreel (1 Sam. xxix. 1), while the Philistines encamped at Aphek, the name of which indicates the existence of a stream of water in the neighborhood, which rendered it a favorite place of encampment (1 Sam. iv. 1; 1 K. xx. 26; 2 K. xiii. 17). In his pursuit of the Amalekites, David halted his men by the brook Besor, and there left a detachment with the camp furniture (1 Sam. xxx. 9). One of Joshua's decisive engagements with the nations of Canaan was fought at the waters of Merom, where he surprised the confederate camp (Josh. xi. 5, 7; comp. Judg. v. 19, 21). Gideon, before attacking the Midianites, encamped beside the well of Harod (Judg. vii. 1), and it was to draw water from the well at Bethlehem that David's three mighty men cut their way through the host of the Philistines (2 Sam. xxiii. 16).

The camp was surrounded by the מַעְגָּלָה, *ma'-gâlâh* (1 Sam. xvii. 20), or מַעְגָּל, *ma'gâl* (1 Sam. xxvi. 5, 7), which some, and Thenius among them, explain as an earthwork thrown up round the encampment, others as the barrier formed by the baggage-wagons. The etymology of the word points merely to the circular shape of the inclosure formed by the tents of the soldiers pitched around their chief, whose spear marked his resting-place (1 Sam. xxvi. 5, 7), and it might with propriety be used in either of the above senses, according as the camp was fixed or temporary. We know that, in the case of a siege, the attacking army, if possible, surrounded the place attacked (1 Macc. xiii. 43), and drew about it a line of circumvallation (דַּיֵּק, *dâyêk*, 2 K. xxv. 1), which was marked by a breastwork of earth (מְסִלָּה, *m'sillâh*, Is. lxii 10; סֹלְלָה, *sol'lâh*, Ez. xxi. 27 (22); comp. Job xix. 12), for the double purpose of preventing the escape of the besieged and of protecting the besiegers from their sallies.[a] But there was not so much need of a formal intrenchment, as but few instances occur in which engagements were fought in the camps themselves, and these only when the attack was made at night. Gideon's expedition against the Midianites took place in the early morning (Judg. vii. 19), the time selected by Saul for his attack upon Nahash (1 Sam. xi. 11), and by David for surprising the Amalekites (1 Sam. xxx. 17; comp. Judg. ix. 33). To guard against these night attacks, sentinels (שֹׁמְרִים, *shôm'rîm*) were posted (Judg. vii. 19; 1 Macc. xii. 27) round the camp, and the neglect of this precaution by Zebah and Zalmunna probably led to their capture by Gideon and the ultimate defeat of their army (Judg. vii. 19).

The valley which separated the hostile camps was generally selected as the fighting ground (שָׂדֶה, *sâdeh*, "the battle-field" (1 Sam. iv. 2, xiv. 15; 2 Sam. xviii. 6), upon which the contest was decided, and hence the valleys of Palestine have played so conspicuous a part in its history (Josh. viii. 13; Judg. vi. 33; 2 Sam. v. 22, viii. 13, &c.). When the fighting men went forth to the place of marshalling (מַעֲרָכָה, *ma'ărâcâh*, 1 Sam. xvii 20), a detachment was left to protect the camp and baggage (1 Sam. xvii. 22, xxx. 24). The beasts of burden were probably tethered to the tent pegs (2 K. vii. 10; Zech. xiv. 15).

The מַחֲנֶה, *machâneh*, or movable encampment, is distinguished from the מָצָב, *mâtsâb*, or נָצִיב, *n'tsîb* (2 Sam. xxiii. 14; 1 Chr. xi. 16), which appear to have been standing camps, like those which Jehoshaphat established throughout Judah (2 Chr. xvii. 2), or advanced posts in an enemy's country (1 Sam. xiii. 17; 2 Sam. viii. 6), from which skirmishing parties made their predatory excursions and ravaged the crops. It was in resisting one of these expeditions that Shammah won himself a name among David's heroes (2 Sam. xxiii. 12). *Machâneh* is still further distinguished from מִבְצָר, *mibhtsâr*, "a fortress" or "walled town" (Num. xiii. 19).

Camps left behind them a memorial in the name of the place where they were situated, as among ourselves (cf. *Chester*, *Grantchester*, &c.). Mahaneh-Dan (Judg. xiii. 25) was so called from the encampment of the Danites mentioned in Judg. xviii. 12. [MAHANAIM.] The more important camps at Gilgal (Josh. v. 10, ix. 6) and Shiloh (Josh. xviii. 9; Judg. xxi. 12, 19) left no such impress; the military traditions of these places were

[a] The Chaldee renders מַעְגָּלָה (1 Sam. xvii. 20 and דַּיֵּק (2 K. xxv. 1) by the same word, גַּרְגּוֹם or גַּרְגּוֹמָא, the Greek χαράκωμα.

eclipsed by the greater splendor of the religious associations which surrounded them.

W. A. W.

ENCHANTMENTS. 1. לָטִים, or לָהָטִים, Ex. vii. 11, 22, viii. 7: *φαρμακίαι*, LXX. (Grotius compares the word with the Greek *λιταί*); secret arts, from לוּט, *to cover*; though others incorrectly connect it with לַהַט, *a flame*, or the glittering blade of a sword, as though it implied a sort of dazzling cheironomy which deceives spectators. Several versions render the word by "whisperings," *insusurrationes*, but it seems to be a more general word, and hence is used of the various means (some of them no doubt of a quasi-scientific character) by which the Egyptian Chartummim imposed on the credulity of Pharaoh.

2. מְכַשְּׁפִים: *φαρμακεῖαι*, *φάρμακα*, LXX. (2 K. ix. 22; Mic. v. 12; Nah. iii. 4): *veneficia*, *maleficia*, Vulg.; "maleficæ artes," "præstigiæ," "muttered spells." Hence it is sometimes rendered by *ἐπαοιδαί*, as in Is. xlvii. 9, 12. The belief in the power of certain formulæ was universal in the ancient world. Thus there were *carmina* to evoke the tutelary gods out of a city (Macrob. *Saturnal.* iii. 9), others to devote hostile armies (*id.*), others to raise the dead (Maimon. *de Idol.* xi. 15; Senec. *Œdip.* 547), or bind the gods (*δεσμοὶ θεῶν*) and men (*Æsch. Fur.* 331), and even influence the heavenly bodies (Ov. *Met.* vii. 207 ff., xii. 263; "Te quoque Luna traho," Virg. *Ecl.* viii., *Æn.* iv. 489; Hor. *Epod.* v. 45). They were a recognized part of ancient medicine, even among the Jews, who regarded certain sentences of the Law as efficacious in healing. The Greeks used them as one of the five chief resources of pharmacy (Pind. *Pyth.* iii. 8, 9; Soph. *Aj.* 582), especially in obstetrics (Plat. *Theæt.* p. 145) and mental diseases (Galen *de Sanitat. tuendâ*, i. 8). Homer mentions them as used to check the flow of blood (*Od.* xix. 456), and Cato even gives a charm to cure a disjointed limb (*de Re Rust.* 160; cf. Plin. *H. N.* xxviii. 2). The belief in charms is still all but universal in uncivilized nations; see Lane's *Mod. Egypt.* i. 300, 306, &c., ii. 177, &c.; Beeckman's *Voyage to Borneo*, ch. ii.; Meroller's *Congo* in Pinkerton's *Voyages*, xvi. 221, 273; Huc's *China*, i. 223, ii. 326; Taylor's *New Zealand*, and Livingstone's *Africa*, passim, &c.; and hundreds of such remedies still exist, and are considered efficacious among the uneducated.

3. לְחָשִׁים, Eccl. x. 11: *ψιθυρισμός*, LXX.; from לָחַשׁ. This word is especially used of the charming of serpents, Jer. viii. 17 (cf. Ps. lviii. 5; Ecclus. xii. 13; Eccl. x. 11; Luc. ix. 391 — a parallel to "cantando rumpitur anguis," and "Viperas rumpo verbis et carmine fauces," Ov. *Met.* l. c.). Maimonides (*de Idol.* xi. 2) expressly defines an enchanter as one "who uses strange and meaningless words, by which he imposes on the folly of he credulous. They say, for instance, that if one utter the words before a serpent or scorpion it will do no harm" (Carpzov, *Annot. in Godwynum*, iv. 11). An account of the Marsi who excelled in this art is given by Augustin (*ad Gen.* ix. 28), and of the Psylli by Arnobius (*ad Nat.* ii. 32); and they are alluded to by a host of other authorities (Plin. *Nat.* ii. 2, xxviii. 6; Ælian, *H. A.* i. 57; Virg. *Æn.* vii. 750; Sil. Ital. viii. 495. They were called Ὀφιοδιῶκται). The secret is still understood in the East (Lane, ii. 106).

4. The word נְחָשִׁים is used of the enchantments sought by Balaam, Num. xxiv. 1. It properly alludes to ophiomancy, but in this place has a *general* meaning of endeavoring to gain omens (*εἰς συνάντησιν τοῖς οἰωνοῖς*, LXX.).

5. חֶבֶר is used for magic, Is. xlvii. 9, 12. It comes from חָבַר, *to bind* (cf. *καταδέω*, *βασκαίνω*, bannen), and means generally the process of acquiring power over some distant object or person; but this word seems also to have been sometimes used expressly of serpent-charmers, for R. Sol. Jarchi on Deut. xviii. 11, defines the חוֹבֵר חֶבֶר to be one "who congregates serpents and scorpions into one place."

Any resort to these methods of imposture was strictly forbidden in Scripture (Lev. xix. 26; Is. xlvii. 9, &c.), but to eradicate the tendency is almost impossible (2 K. xvii. 17; 2 Chr. xxxiii. 6), and we find it still flourishing at the Christian era (Acts xiii. 6, 8, viii. 9, 11, *γοητεία*; Gal. v. 20 Rev. ix. 21).

The chief *sacramenta dæmoniaca* were a rod, a magic circle, dragon's eggs, certain herbs, or "insane roots," like the henbane, &c. The fancy of poets, both ancient and modern, has been exerted in giving lists of them (Ovid and Hor. *ll. cc.*; Shakespeare's *Macbeth*, Act iv. 1; Kirke White's *Gondoline*; Southey's *Curse of Kehama*, Cant. iv. &c.). [AMULETS; DIVINATION; MAGIC.]

F. W. F.

EN-DOR' [*or* EN'DOR (A. V.)] (עֵין־דֹּר [; Ps. lxxxiii., עֲיִן־דֹּאר = *spring of Dor* [i. e. *habitation*]: Ἀενδώρ; [in 1 Sam., Vat. Ἀελδωρ; Comp. Ἐνδώρ; in Josh., LXX. om.:] *Endor*), a place which, with its "daughter-towns" (בָּנוֹת), was in the territory of Issachar, and yet possessed by Manasseh (Josh. xvii. 11). This was the case with five other places which lay partly in Asher, partly in Issachar, and seem to have formed a kind of district of their own called "the three, or the triple, *Nepheth*."

Endor was long held in memory by the Jewish people as connected with the great victory over Sisera and Jabin. Taanach, Megiddo, and the torrent Kishon all witnessed the discomfiture of the huge host, but it was emphatically to Endor that the tradition of the death of the two chiefs attached itself (Ps. lxxxiii. 9, 10). Possibly it was some recollection of this, some fame of sanctity or good omen in Endor, which drew the unhappy Saul thither on the eve of his last engagement with an enemy no less hateful and no less destructive than the Midianites (1 Sam. xxviii. 7). Endor is not again mentioned in the Scriptures; but it was known to Eusebius, who describes it as a large village 4 miles S. of Tabor. Here to the north of *Jebel Duhy* (the "Little Hermon" of travellers), the name still lingers, attached to a considerable but now deserted village. The rock of the mountain, on the slope of which *Endûr* stands, is hollowed into caves, one of which may well have been the scene of the incantation of the witch (Van de Velde, ii. 383; Rob. ii. 360; Stanley, p. 345). The distance from the slopes of Gilboa to Endor is 7 or 8 miles, over difficult ground.

G.

Digitized by Google

* Endor had its name evidently from a spring which made the place habitable (Sim. *Onomast.* p. 296); and it is found that one of the caves there has now "a little spring in it, the water from which runs down the hill; the supply is small, but is said to be unfailing" (Porter's *Handb.* ii. 358). For the striking manner in which the position of *Endôr*, and various customs of the people at present illustrate the account of Saul's visit to the necromancer, see Thomson's *Land and Book*, ii. 161. As to the nature of that transaction, see MAGIC. H.

* **ENDOW** (from *dos*, a dowry) means in Ex. xxii. 16 to furnish with a dower or marriage-portion, though the expression there does not so much translate as explain the Hebrew. This of course is the meaning also in the marriage service of the English Church, "With all my worldly goods I thee *endow*." "Endue," a different form only, has this sense in Gen. xxx. 20. H.

* **ENDUE.** [ENDOW.]

* **ENEAS.** [ÆNEAS.]

EN-EGLAIM (עֵין־עֶגְלָיִם = *spring of two heifers*: Ἐναγαλλείμ; [Vat. Alex. Ἐναγαλειμ:] *Engallim*), a place named only by Ezekiel (xlvii. 10), apparently as on the Dead Sea; but whether near to or far from En-gedi, on the west or east side of the Sea, it is impossible to ascertain from the text. In his comment on the passage, Jerome locates it at the embouchure of the Jordan; but this is not supported by other evidence. By some (*e. g.* Gesenius, *Thes.* p. 1019) it is thought to be identical with EGLAIM, but the two words are different, En-eglaim containing the *Ain*, which is rarely changed for any other aspirate. G.

ENEMESSAR (Ἐνεμέσσαρος, Ἐνεμεσσάρ, [etc.: *Salmanasar*]) is the name under which Shalmaneser appears in the book of Tobit (i. 2, [13,] 15, &c.). This book is not of any historical authority, being a mere work of imagination composed probably by an Alexandrian Jew, not earlier than B. C. 300. The change of the name is a corruption — the first syllable *Shal* being dropped (compare the Bupalussor of Abydenus, which represents *Na*bopolassar), and the order of the liquids *m* and *n* being reversed. The author of Tobit makes Enemessar lead the children of Israel into captivity (i. 2), following the *apparent* narrative of the book of Kings (2 K. xvii. 3–6, xviii. 9–11). He regards Sennacherib not only as his successor but as his son (i. 15), for which he has probably no authority beyond his own speculations upon the text of Scripture. As Sennacherib is proved by the Assyrian inscriptions to be the son of Sargon, no weight can be properly attached to the historical statements in Tobit. The book is, in the fullest sense of the word, *apocryphal*. G. R.

ENENIUS (Ἐνηνέος [(gen. of Ἐνηνής?); Vat. Ald. Ἐνήνιος; Alex. Ἐνηνιου (gen. ?):] *Emmanius*), one of the leaders of the people who returned from captivity with Zorobabel (1 Esdr. v. 8). There is no name corresponding in the lists of Ezra and Nehemiah.

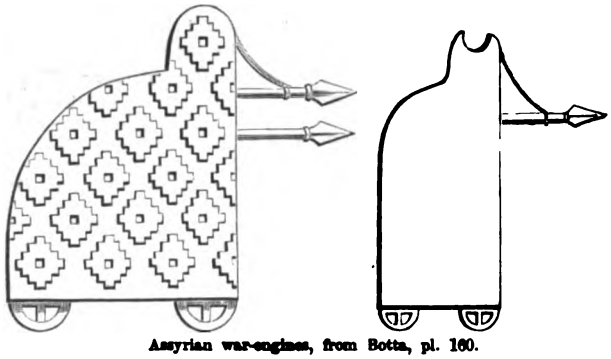
ENGADDI (ἐν αἰγιαλοῖς; [Sin.^{ca} ἐν Ἐνγαδδοις: Comp. ἐν Γαδδί:] *in Cades*), Ecclus. xxiv. 14. [EN-GEDI.]

EN-GANNIM (עֵין־גַּנִּים = *spring of gardens*). 1. A city in the low country of Judah named between Zanoah and Tappuah (Josh. xv. 34). The LXX. in this place is so different from the Hebrew that the name is not recognizable. Vulg *Æn-Gannim*.

2. A city on the border of Issachar (Josh. xix 21; Ἰεὲν καὶ Τομμάν; Alex. ην Γαννιμ; [Comp. Ald. Ἐγγαννίμ:] *En-Gannim*); allotted with its "suburbs" to the Gershonite Levites (xxi. 29; Πηγὴ γραμμάτων: *En-Gannim*). These notices contain no indication of the position of En-gannim with reference to any known place, but there is great probability in the conjecture of Robinson (ii. 315) that it is identical with the Ginaia of Josephus (*Ant.* xx. 6, § 1), which again, there can be little doubt, survives in the modern *Jenîn*, the first village encountered on the ascent from the great plain of Esdraelon into the hills of the central country. *Jenîn* is still surrounded by the "orchards" or "gardens" which interpret its ancient name, and the "spring" is to this day the characteristic object in the place (Rob. ii. 315; Stanley, p. 349, note; Van de Velde, p. 359). The position of *Jenîn* is also in striking agreement with the requirements of Beth-hag-Gan (A. V. "the garden-house;" Βαιθγάν), in the direction of which Ahaziah fled from Jehu (2 K. ix. 27). The rough road of the ascent was probably too much for his chariot, and, keeping the more level ground, he made for Megiddo, where he died (see Stanley, p. 349).

In the lists of Levitical cities in 1 Chr. vi. ANEM is substituted for En-gannim. Possibly it is merely a contraction. G.

EN-GE'DI (עֵין גֶּדִי, *the fountain of the kid*: [Ἀγκάδης,] Ἐγγαδδί, Ἐνγαδδί, [etc.:] Arabic عين جدي: [*En-gaddî*]), a town in the wilderness of Judah (Josh. xv. 62), on the western shore of the Dead Sea (Ez. xlvii. 10). Its original name was Hazezon-Tamar (חֲצְצוֹן תָּמָר, *the pruning of the palm*), doubtless, as Josephus says, on account of the palm groves which surrounded it (2 Chr. xx. 2; Ecclus. xxiv. 14; Joseph. *Ant.* ix. 1, § 2). Some doubt seems to have existed in the early centuries of our era as to its true position. Stephanus places it near Sodom (Steph. B. *s. v.*); Jerome at the south end of the Dead Sea (*Comm. in Ez.* xlvii.); but Josephus more correctly at the distance of 300 stadia from Jerusalem (*Ant.* ix. 1, § 2). Its site is now well known. It is about the middle of the western shore of the lake. Here is a rich plain, half a mile square, sloping very gently from the base of the mountains to the water, and shut in on the north by a lofty promontory. About a mile up the western acclivity, and at an elevation of some 400 feet above the plain, is the fountain of *Ain Jidy*, from which the place gets its name. The water is sweet, but the temperature is 81° Fahr. It bursts from the limestone rock, and rushes down the steep descent, fretted by many a rugged crag, and raining its spray over verdant borders of acacia, mimosa, and lotus. On reaching the plain, the brook crosses it in nearly a straight line to the sea. During a greater part of the year, however, it is absorbed in the thirsty soil. Its banks are now cultivated by a few families of Arabs, who generally pitch their tents near this spot. The soil is exceedingly fertile, and in such a climate it might be made to produce the rarest fruits of tropical climes. Traces of the old city exist upon the plain and lower declivity of the



Digitized by Google

mountain, on the south bank of the brook. They are rude and uninteresting, consisting merely of foundations and shapeless heaps of unhewn stones. A sketch by M. Belly, taken from the fountain, and embracing the plain on the shore, and the south-west border of the Dead Sea, will be found in the Atlas of Plates to De Saulcy's *Voyage*, pl. viii. A much better one is given under SEA, THE SALT.

The history of En-gedi, though it reaches back nearly 4000 years, may be told in a few sentences. It was immediately after an assault upon the "Amorites, that dwelt in Hazezon-Tamar," that the five Mesopotamian kings were attacked by the rulers of the plain of Sodom (Gen. xiv. 7; comp. 2 Chr. xx. 2). It is probable that the *fountain* was always called En-gedi, and that the ancient town built on the plain below it got in time the same name. Saul was told that David was in the "wilderness of En-gedi;" and he took "3000 men, and went to seek David and his men upon the rocks of the *wild goats*" (1 Sam. xxiv. 1–4). These animals still frequent the cliffs above and around the fountain; the Arabs call them *Beden*. At a later period En-gedi was the gathering-place of the Moabites and Ammonites who went up against Jerusalem, and fell in the valley of Berachah (2 Chr. xx. 2). It is remarkable that this is the usual route taken in the present day by such predatory bands from Moab as make incursions into Southern Palestine. They pass round the southern end of the Dead Sea, then up the road along its western shore to *Ain Jidy*, and thence toward Hebron, Tekoa, or Jerusalem, as the prospects of plunder seem most inviting.

The vineyards of En-gedi were celebrated by Solomon (Cant. i. 14); its balsam by Josephus (*Ant.* ix. 1, § 2), and its palms by Pliny — "Engadda oppidum fuit, secundum ab Hierosolymis fertilitate palmetorumque nemoribus" (v. 17). But vineyards no longer clothe the mountain-side, and neither palm-tree nor balsam is seen on the plain. In the fourth century there was still a large village at En-gedi (*Onom.* s. v.); it must have been abandoned very soon afterwards, for there is no subsequent reference to it in history, nor are there any traces of recent habitation (Porter's *Handbook*, p. 242; Rob. i. 507). There is a curious reference to it in Mandeville (*Early Trav.* p. 179), who says that the district between Jericho and the Dead Sea is "the land of Dengadda" (Fr. *d'Engadda*), and that the balm trees were "still called vines of Gady." J. L. P.

ENGINE, a term exclusively applied to military affairs in the Bible. The Hebrew חִשָּׁבוֹן (2 Chr. xxvi. 15) is its counterpart in etymological meaning, each referring to the *ingenuity* (engine, from *ingenium*) displayed in the contrivance. The engines to which the term is applied in 2 Chr. were designed to propel various missiles from the walls of a besieged town; one, like the *balista*, was for stones, consisting probably of a strong spring and a tube to give the right direction to the stone; another, like the *catapulta*, for arrows, an enormous stationary bow. The invention of these is assigned to Uzziah's time — a statement which is supported both by the absence of such contrivances in the representations of Egyptian and Assyrian warfare, and by the traditional belief that the *balista* was invented in Syria (Pliny, vii. 56). Luther gives *brustwehren*, i. e. "parapets," as the meaning of the term. Another war-engine, with which the

Assyrian war-engines, from Botta, pl. 160.

Hebrews were acquainted, was the battering-ram, described in Ez. xxvi. 9, as מְחִי הֻבְּלוֹ, lit. a *beating of that which is in front*, hence a ram for striking walls; and still more precisely in Ez. iv. 2, xxi 22, as כַּר, a *ram*. The use of this instrument was well known both to the Egyptians (Wilkinson, i. 359) and the Assyrians. The references in Ezekiel are to the one used by the latter people, consisting of a high and stoutly built frame-work on four wheels, covered in at the sides in order to protect the men moving it, and armed with one or two pointed weapons. Their appearance was very different from that of the Roman *aries* with which the Jews afterwards became acquainted (Joseph. *B J.* iii. 7, § 19). No notice is taken of the *testudo* or the *vinea* (cf. Ez. xxvi. 9, *Vulg.*); but it is not improbable that the Hebrews were acquainted with them (cf. Wilkinson, i. 361). The marginal rendering "engines of shot" (Jer. vi. 6, xxxii. 24; Ez. xxvi. 8) is incorrect. W. L. B.

ENGRAVER. The term חָרַשׁ, so translated in the A. V., applies broadly to any *artificer*, whether in wood, stone, or metal: to restrict it to the *engraver* in Ex. xxxv. 35, xxxviii. 23, is improper: a similar latitude must be given to the term פָּתַח, which expresses the operation of the artificer: in Zech. iii. 9, ordinary stone-cutting is evidently intended. The specific description of an *engraver* was חָרַשׁ אֶבֶן (Ex. xxviii. 11), and his chief business was cutting names or devices on rings and seals; the only notices of engraving are

Digitized by Google

in connection with the high-priest's dress — the two onyx-stones, the twelve jewels, and the mitre-plate having inscriptions on them (Ex. xxviii. 11, 21, 36). The previous notices of signets (Gen. xxxviii. 18, xli. 42) imply engraving. The art was widely spread throughout the nations of antiquity, particularly among the Egyptians (Diod. i. 78; Wilkinson, iii. 373), the Æthiopians (Her. vii. 69), and the Indians (Von Bohlen, *Indien*, ii. 122).

W. L. B.

EN-HAD'DAH (עֵין־חַדָּה = *sharp, or swift spring*, Gesen.: Αἰμαρέκ; Alex. ην Αδδα: [*Enhadda*]), one of the cities on the border of Issachar named next to En-gannim (Josh. xix. 21). Van de Velde (i. 315) would identify it with *Ain-Haud* on the western side of Carmel, and about 2 miles only from the sea. [See also Thomson, *Land and Book*, ii. 248.] But this is surely out of the limits of the tribe of Issachar, and rather in Asher or Manasseh. G.

EN-HAK-KO'RE [A. V. En-hakkore] (עֵין הַקּוֹרֵא = *the spring of the crier*: πηγὴ τοῦ ἐπικαλουμένου; [Alex. επικλητος: *fons invocantis*]), the spring which burst out in answer to the "cry" of Samson after his exploit with the jaw-bone (Judg. xv. 19). The name is a pun founded on the word in verse 18, *yikra* (יִקְרָא, A. V. "he called"). The word *Makteish*, which in the story denotes the "hollow place" (literally, the "mortar") in the jaw, and also that for the "jaw" itself, *Lechi*, are both names of places. Van de Velde (*Memoir*, p. 343) endeavors to identify Lechi with *Tell-el-Lekiyeh* 4 miles N. of Beer-sheba, and En-hakkore with the large spring between the Tell and *Khewelfeh*. But Samson's adventures appear to have been confined to a narrow circle, and there is no ground for extending them to a distance of some 30 miles from Gaza, which *Lekiyeh* is, even in a straight line. [LECHI.] G.

EN-HA'ZOR (עֵין חָצוֹר = *spring of the village*: πηγὴ Ασόρ: *Enhasor*), one of the "fenced cities" in the inheritance of Naphtali, distinct from Hazor, named between Edrei and Iron, and apparently not far from Kedesh (Josh. xix. 37). It has not yet been identified. G.

EN-MISH'PAT (עֵין מִשְׁפָּט [*fountain of judgment*]: ἡ πηγὴ τῆς κρίσεως: [*fons Misphat*]), Gen. xiv. 7. [KADESH.]

E'NOCH, and once [twice, 1 Chr. i. 3, 33] **HE'NOCH** (חֲנוֹךְ = *Chanôc* [*initiated* or *initiating*, Ges.; *teaching, teacher*, Fürst]: Philo, *de Post. Caini*, § 11, ἑρμηνέυεται Ἐνὰχ χάρις σου; Ενάχ; Joseph. Ἄνωχος: *Henoch*). 1. The eldest son of Cain (Gen. iv. 17 [Chanoch, A. V. marg.]), who called the city which he built after his name. Ewald (*Gesch.* i. 356, *note*) fancies that there is a reference to the Phrygian Iconium, in which city a legend of Ἄννακος was preserved, evidently derived from the Biblical account of the father of Methuselah (Steph. Byz. *s. v.* Ἰκόνιον, Suid. *s. v.* Νάννακος). Other places have been identified with the site of Enoch with little probability; e. g. *Anuchta* in Susiana, the *Heniochi* in the Caucasus, &c.

2. [Vulg. in Jude 14, *Enoch.*] The son of Jared (יֶרֶד, a *descent*, cf. JORDAN), and father of Methuselah (מְתוּשֶׁלַח, a *man of arms*; Philo, *l. c.* § 12, Μαθουσάλεμ ἑξαποστολὴ θανάτου (Gen. v. 18 ff.; Luke iii. 37)). In the Epistle of Jude (ver. 14, cf. Enoch lx. 8) he is described as "the *seventh* from Adam;" and the number is probably noticed as conveying the idea of divine completion and rest (cf. August. *c. Faust.* xii. 14), while Enoch was himself a type of perfected humanity, "a man raised to heaven by pleasing God, while angels fell to earth by transgression" (Iren. iv. 16, 2). The other numbers connected with his history appear too symmetrical to be without meaning. He was born when Jared was 162 ($9 \times 6 \times 3$) years old, and after the birth of his eldest son in his 65th ($5 \times 6 + 7$) year he lived 300 years. From the period of 365 years assigned to his life, Ewald (i. 356), with very little probability, regards him as "the god of the new-year," but the number may have been not without influence on the later traditions which assigned to Enoch the discovery of the science of astronomy (ἀστρολογία, Eupolemus ap. Euseb. *Præp. Ev.* ix. 17, where he is identified with Atlas). After the birth of Methuselah it is said (Gen. v. 22–24) that Enoch "walked with God 300 years . . . and he was not; for God took him" (לָקַח; μετέθηκεν, LXX. (here only): *tulit*, Vulg.). The phrase "walked with God" (וַיִּתְהַלֵּךְ אֶת־הָאֱלֹהִים) is elsewhere only used of Noah (Gen. vi. 9; cf. Gen. xvii. 1, &c.), and is to be explained of a prophetic life spent in immediate converse with the spiritual world (Enoch xii. 2, "All his action was with the holy ones, and with the watchers during his life"). There is no further mention of Enoch in the O. T., but in Ecclesiasticus (xlix. 14) he is brought forward as one of the peculiar glories (οὐδὲ εἷς ἐκτίσθη οἷος Ἐ.) of the Jews, for he was taken up (ἀνελήφθη, Alex. μετετέθη) from the earth. "He pleased the Lord and was translated [into Paradise, Vulg.] being a pattern of repentance" (Ecclus. xliv. 16). In the Epistle to the Hebrews the spring and issue of Enoch's life are clearly marked. "By faith Enoch was translated (μετετέθη, *translatus est*, Vulg.) that he should not see death . . . for before his translation (μεταθέσεως) he had this testimony, that he pleased God." The contrast to this divine judgment is found in the constrained words of Josephus: "Enoch departed to the Deity (ἀνεχώρησε πρὸς τὸ θεῖον), whence [the sacred writers] have not recorded his death" (*Ant.* i. 3, § 4).

The Biblical notices of Enoch were a fruitful source of speculation in later times. Some theologians disputed with subtilty as to the place to which he was removed; whether it was to paradise or to the immediate presence of God (cf. Feuardentius *ad Iren.* v. 5), though others more wisely declined to discuss the question (Philo, *Cod. Apocr. N. T.* p. 758). On other points there was greater unanimity. Both the Latin and Greek fathers commonly coupled Enoch and Elijah as historic witnesses of the possibility of a resurrection of the body and of a true human existence in glory (Iren. iv. 5, 1; Tertull. *de Resurr. Carn.* 58; Hieron. *c. Joan. Hierosol.* §§ 29, 32, pp. 437, 440); and the voice of early ecclesiastical tradition is almost unanimous in regarding them as "the two witnesses" (Rev. xi. 3 ff.) who should fall before "the beast," and afterwards be raised to heaven before the great judgment (Hippol. *Frag. in Dan.* xxii., *de Antichr.* xliii.; Cosmas Indic. p. 75, ap. Thilo, κατὰ τὴν ἐκκλησιαστικὴν παράδοσιν; Tertull. *de*

Digitized by Google

Anima, 59; Ambros. *in Psalm.* xlv. 4; *Evang. Nicod.* c. xxv. on which Thilo has almost exhausted the question: *Cod. Apoc. N. T.* p. 765 f.). This belief removed a serious difficulty which was supposed to attach to their translation; for thus it was made clear that they would at last discharge the common debt of a sinful humanity, from which they were not exempted by their glorious removal from the earth (Tertull. *de Animâ*, l. c.; August. *Op. imp. c. Jul.* vi. 30).

In later times Enoch was celebrated as the inventor of writing, arithmetic, and astronomy (Euseb. *Præp. Ev.* ix. 17). He is said to have filled 300 books with the revelations which he received, and is commonly identified with *Edris* (i. e. *the learned*), who is commemorated in the Koran (cap. 19) as one "exalted [by God] to a high place" (cf. Sale, *l. c.*; Hottinger, *Hist. Orient.* p. 30 ff.). But these traditions were probably due to the apocryphal book which bears his name (cf. Fabric. *Cod. pseudep. V. T.* i. 215 ff.).

Some (Buttm. *Mythol.* i. 176 ff.; Ewald, *l. c.*) have found a trace of the history of Enoch in the Phrygian legend of Annacus (Ἄννακος, Νάννακος), who was distinguished for his piety, lived 300 years, and predicted the deluge of Deucalion. [ENOCH, 1.] In the A. V. of 1 Chr. i. 3, the name is given as HENOCH.

3. The third son of Midian, the son of Abraham by Keturah (Gen. xxv. 4, A. V. *Hanoch*; 1 Chr. i. 33, A. V. *Henoch*).

4. [Vulg. in 1 Chr. v. 3, *Enoch*.] The eldest son of Reuben (A. V. *Hanoch*; Gen. xlvi. 9; Ex. vi. 14; 1 Chr. v. 3), from whom came "the family of the Hanochites" (Num. xxvi. 5).

5. In 2 Esdr. vi. 49, 51, *Enoch* stands in the Latin (and Eng.) Version for *Behemoth* in the Æthiopic. B. F. W.

E'NOCH, THE BOOK OF, is one of the most important remains of that early apocalyptic literature of which the book of Daniel is the great prototype. From its vigorous style and wide range of speculation the book is well worthy of the attention which it received in the first ages; and recent investigations have still left many points for further inquiry.

1. The history of the book is remarkable. The first trace of its existence is generally found in the Epistle of St. Jude (14, 15; cf. Enoch, i. 9), but the words of the Apostle leave it uncertain whether he derived his quotation from tradition (Hofmann, *Schriftbeweis*, i. 420) or from writing (*ἐπροφήτευσεν . . . Ἐνὼχ λέγων*), though the wide spread of the book in the second century seems almost decisive in favor of the latter supposition. It appears to have been known to Justin (*Apol.* ii. 5), Irenæus (*Adv. Hær.* iv. 16, 2), and Anatolius (Euseb. *H. E.* vii. 32). Clement of Alexandria (*Eclog.* p. 801), and Origen (yet comp. c. *Cels.* v. p. 267, ed. Spenc.) both make use of it, and numerous references occur to the "writing," "books," and "words" of Enoch in the Testaments of the XII. Patriarchs, which present more or less resemblance to passages in the present book (Fabr. *Cod. pseudep. V. T.* i. 161 ff.; Gfrörer, *Proph. pseudep.* p. 273 f.). Tertullian (*De Cult. Fem.* i. 3; cf. *De Idol.* 4) expressly quotes the book as one which was "not received by some, nor admitted into the Jewish canon" (in armarium Judaicum), but defends it on account of its reference to Christ ("legimus omnem scripturam ædificationi habilem divinitus inspirari"). Augustine (*De Civ.* xv. 23, 4) and an anonymous writer whose work is printed with Jerome's (*Brev. in Psalm.* cxxxii. 2; cf. Hil. *in Psalm.* l. c.) were both acquainted with it: but from their time till the revival of letters it was known in the Western Church only by the quotation in St. Jude (Dillmann, *Einl.* p. lvi.). In the Eastern Church it was known some centuries later. Considerable fragments are preserved in the *Chronographia* of Georgius Syncellus (c. 792 A. D.), and these, with the scanty notices of earlier writers, constituted the sole remains of the book known in Europe till the close of the last century. Meanwhile, however, a report was current that the entire book was preserved in Abyssinia; and at length, in 1773, Bruce brought with him on his return from Egypt three MSS., containing the complete Æthiopic translation. Notwithstanding the interest which the discovery excited, the first detailed notice of this translation was given by Silvestre de Sacy in 1800, and it was not published till the edition of Archbishop Laurence in 1838 (*Libri Enoch versio Æthiopica* . . . Oxon.). But in the interval Laurence published an English translation, with an introduction and notes, which passed through three editions (*The Book of Enoch*, &c. by R. Laurence. Oxford, 1821, 1833, 1838). The translation of Laurence formed the basis of the German edition of Hoffmann (*Das Buch Henoch*, . . . A. G. Hoffmann, Jena, 1833–38); and Gfrörer, in 1840, gave a Latin translation constructed from the translations of Laurence and Hoffmann (*Prophetæ veteres pseudepigraphi* . . . ed. A. F. Gfrörer, Stuttgartiæ, 1840). All these editions were superseded by those of Dillmann, who edited the Æthiopic text from five MSS. (*Liber Henoch, Æthiopice*, Lipsiæ, 1851), and afterwards gave a German translation of the book with a good introduction and commentary (*Das Buch Henoch*, . . . von Dr. A. Dillmann, Leipzig, 1853). The work of Dillmann gave a fresh impulse to the study of the book. Among the essays which were called out by it the most important were those of Ewald (*Über des Äthiopischen Buches Henökh Entstehung*, &c., Göttingen, 1854) and Hilgenfeld (*Die jüdische Apokalyptik*, Jena, 1857). The older literature on the subject is reviewed by Fabricius (*Cod. pseudep. V. T.* i. 199 ff.).

2. The Æthiopic translation was made from the Greek, and it was probably made about the same time as the translation of the Bible with which it was afterwards connected, or in other words, towards the middle or close of the fourth century. The general coincidence of the translation with the patristic quotations of corresponding passages shows satisfactorily that the text from which it was derived was the same as that current in the early Church though one considerable passage quoted by Georg Syncell. is wanting in the present book (Dillm. p. 85). But it is still uncertain whether the Greek text was the original, or itself a translation. One of the earliest references to the book occurs in the Hebrew *Book of Jubilees* (Dillm. in Ewald's *Jahrb.* 1850, p. 90), and the names of the angels and winds are derived from Aramaic roots (cf. Dillm. p. 236 ff.). In addition to this a Hebrew book of Enoch was known and used by Jewish writers till the thirteenth century (Dillm. *Äthiop. Henoch*, p. vii.), so that on these grounds, among others, many have supposed (J. Scaliger, Laurence, Hoffmann, Dillmann) that the book was first composed in Hebrew (Aramæan). In such a case no stress can be laid

Digitized by Google

upon the Hebraizing style, which may be found as well in an author as in a translator; and in the absence of direct evidence it is difficult to weigh mere conjectures. On the one hand, if the book had been originally written in Hebrew, it might seem likely that it would have been more used by Rabbinical teachers; but, on the other hand, the writer certainly appears to have been a native of Palestine,[a] and therefore likely to have employed the popular dialect. If the hypothesis of a Hebrew original be accepted, which as a hypothesis seems to be the more plausible, the history of the original and the version finds a good parallel in that of the Wisdom of Sirach. [ECCLESIASTICUS.]

3. In its present shape the book consists of a series of revelations supposed to have been given to Enoch and Noah, which extend to the most varied aspects of nature and life, and are designed to offer a comprehensive vindication of the action of Providence. [ENOCH.] It is divided into five parts. The *first part* (Cc. 1–36 Dillm.), after a general introduction, contains an account of the fall of the angels (Gen. vi. 1) and of the judgment to come upon them and upon the giants, their offspring (6–16); and this is followed by the description of the journey of Enoch through the earth and lower heaven in company with an angel, who showed to him many of the great mysteries of nature, the treasure-houses of the storms and winds, and fires of heaven, the prison of the fallen and the land of the blessed (17–36). The *second part* (37–71) is styled "a vision of wisdom," and consists of three "parables," in which Enoch relates the revelations of the higher secrets of heaven and of the spiritual world which were given to him. The first parable (38–44) gives chiefly a picture of the future blessings and manifestation of the righteous, with further details as to the heavenly bodies; the second (45–57) describes in splendid imagery the coming of Messiah and the results which it should work among "the elect" and the gainsayers; the third (58–69) draws out at further length the blessedness of "the elect and holy," and the confusion and wretchedness of the sinful rulers of the world. The *third part* (72–82) is styled "the book of the course of the lights of heaven," and deals with the motions of the sun and moon, and the changes of the seasons; and with this the narrative of the journey of Enoch closes. The *fourth part* (83–91) is not distinguished by any special name, but contains the record of a dream which was granted to Enoch in his youth, in which he saw the history of the kingdoms of God and of the world up to the final establishment of the throne of Messiah. The *fifth part* (92–105) contains the last addresses of Enoch to his children, in which the teaching of the former chapters is made the groundwork of earnest exhortation. The signs which attended the birth of Noah are next noticed (106–7); and another short "writing of Enoch" (108) forms the close to the whole book (*cf.* Dillm. *Einl.* p. i. ff.; Lücke, *Versuch einer vollständ. Einl.* &c., i. 93 ff.).

4. The general unity which the book possesses in its present form marks it, in the main, as the work of one man. The several parts, while they are complete in themselves, are still connected by the development of a common purpose. But internal coincidence shows with equal clearness that different fragments were incorporated by the author into his work, and some additions have been probably made afterwards. Different "books" are mentioned in early times, and variations in style and language are discernible in the present book To distinguish the original elements and later interpolations is the great problem which still remains to be solved, for the different theories which have been proposed are barely plausible. In each case the critic seems to start with preconceived notions as to what was to be expected at a particular time, and forms his conclusions to suit his prejudices. Hofmann and Weisse place the composition of the whole work after the Christian era, because the one thinks that St. Jude could not have quoted an apocryphal book (Hofmann, *Schriftbeweis*, i. 420 ff.), and the other seeks to detach Christianity altogether from a Jewish foundation (Weisse, *Evangelienfrage*, 214 ff.). Stuart (*American Bibl. Repos.* 1840) so far anticipated the argument of Weisse as to regard the Christology of the book as a clear sign of its post-Christian origin. Ewald, according to his usual custom, picks out the different elements with a daring confidence, and leaves a result so complicated that no one can accept it in its details, while it is characterized in its great features by masterly judgment and sagacity. He places the composition of the groundwork of the book at various intervals between 144 B. C. and cir. 120 B. C., and supposes that the whole assumed its present form in the first half of the century before Christ. Lücke (2d ed.) distinguishes two great parts, an older part including cc. 1–36, and 72–105, which he dates from the beginning of the Maccabæan struggle, and a later, cc. 37–71, which he assigns to the period of the rise of Herod the Great (141, &c.). He supposes, however, that later interpolations were made, without attempting to ascertain their date. Dillmann upholds more decidedly the unity of the book, and assigns the chief part of it to an Aramæan writer of the time of John Hyrcanus (c. 110 B. C.). To this, according to him, "historical" and "Noachian additions" were made, probably in the Greek translation (*Einl.* p. lii.). Köstlin (quoted by Hilgenfeld, p. 96, &c.) assigns cc. 1–16, 21–36, 72–105, to about 110 B. C.; cc. 37–71 to c. B. C. 100–64; and the "Noachian additions" and c. 108 to the time of Herod the Great. Hilgenfeld himself places the original book (cc. 1–16; 20–36; 72–90; 91, 1–19; 93; 94–105) about the beginning of the first century before Christ (*a. a. O.* p. 145 n.). This book he supposes to have passed through the hands of a Christian writer who lived between the times "of Saturninus and Marcion" (p. 181), who added the chief remaining portions, including the great Messianic section, cc. 37–71. In the face of these conflicting theories it is evidently impossible to dogmatize, and the evidence is insufficient for conclusive reasoning. The interpretation of the Apocalyptic histories (cc. 56, 57; 85–90), on which the chief stress is laid for fixing the date of the book, involves necessarily minute criticism of details, which belongs rather to a commentary than to a general introduction; but notwithstanding the arguments of Hilgenfeld and Jost (*Gesch. d. Jud.* ii. 318 n.), the whole book appears to be distinctly of Jewish origin. Some inconsiderable interpolations may have been made in successive translations, and large fragments of a much earlier date were undoubtedly incor-

[a] The astronomical calculations by which Lawrence endeavored to fix the locality of the writer in the neighborhood of the Caspian are inconclusive. (*V.* Dillm. p. ii.

ported into the work, but as a whole it may be regarded as describing an important phase of Jewish opinion shortly before the coming of Christ.

5. In doctrine the book of Enoch exhibits a great advance of thought within the limits of revelation in each of the great divisions of knowledge. The teaching on nature is a curious attempt to reduce the scattered images of the O. T. to a physical system. The view of society and man, of the temporary triumph and final discomfiture of the oppressors of God's people, carries out into elaborate detail the pregnant images of Daniel. The figure of the Messiah is invested with majestic dignity as "the Son of God" (c. 105, 2 only), "whose name was named before the sun was made" (48, 3), and who existed "aforetime in the presence of God" (62, 6; cf. Laurence, *Prel. Diss.* li. f.). And at the same time his human attributes as "the son of man," "the son of woman" (c. 62, 5 only), "the elect one," "the righteous one," "the anointed," are brought into conspicuous notice. The mysteries of the spiritual world, the connection of angels and men, the classes and ministries of the hosts of heaven, the power of Satan (40, 7; 65, 6), and the legions of darkness, the doctrines of resurrection, retribution, and eternal punishment (c. 22, cf. Dillm. p. xix.), are dwelt upon with growing earnestness as the horizon of speculation was extended by intercourse with Greece. But the message of the book is emphatically one of "faith and truth" (cf. Dillm. p. 32), and while the writer combines and repeats the thoughts of Scripture, he adds no new element to the teaching of the prophets. His errors spring from an undisciplined attempt to explain their words, and from a proud exultation in present success. For the great characteristic by which the book is distinguished from the later apocalypse of Ezra [ESDRAS, 2D BOOK] is the tone of triumphant expectation by which it is pervaded. It seems to repeat in every form the great principle that the world, natural, moral, and spiritual, is under the immediate government of God. Hence it follows that there is a terrible retribution reserved for sinners, and a glorious kingdom prepared for the righteous, and Messiah is regarded as the divine mediator of this double issue (c. 90, 91). Nor is it without a striking fitness that a patriarch translated from earth, and admitted to look upon the divine majesty, is chosen as "the herald of wisdom, righteousness, and judgment to a people who, even in suffering, saw in their tyrants only the victims of a coming vengeance."

6. Notwithstanding the quotation in St. Jude, and the wide circulation of the book itself, the apocalypse of Enoch was uniformly and distinctly separated from the canonical Scriptures. Tertullian alone maintained its authority (*l. c.*), while he admitted that it was not received by the Jews. Origen, on the other hand (*c. Cels.* v. 267, ed. Spenc.), and Augustine (*de Civ.* xv. 23, 4), definitively mark it as apocryphal, and it is reckoned among the apocryphal books in the Apostolic Constitutions (vi. 16), and in the catalogues of the *Synopsis S. Scripturæ*, Nicephorus (Credner, *Zur Gesch. d. Kan.* 145), and Montfaucon (*Bibl. Coisiv.* p. 193).

7. The literature of the subject has been already noticed incidentally. The German edition of Dillmann places within the reach of the student all the most important materials for the study of the book. Special points are discussed by Gfrörer, *Das Jahrh. d. Heils*, i. 93 ff.; C. Wieseler, *Die 70 Wochen des Daniel*, 1839. An attempt was made by the Rev. E. Murray (*Enoch restitutus*, &c. Lond. 1838) to "separate from the books of Enoch the book quoted by St. Jude," which met with little favor. B. F. W.

* The preceding article may be supplemented by a brief notice of the more recent literature relating to the subject. The essay of Köstlin, *Ueber die Entstehung des Buches Henoch* (alluded to above), appeared in Baur and Zeller's *Theol. Jahrb.* 1856, xv. 240–79, 370–86; comp. Ewald, *Jahrb. f. Bibl. wiss.* viii. 182 ff., 189 ff. Dillmann, in his art. *Pseudepigraphen des A. T.* in Herzog's *Real-Encykl.* xii. 309, has retracted his earlier opinion that the book of Enoch, excepting the Noachian fragments, is substantially the work of a single author. He is now convinced that it is made up of two, if not three other books, besides what has been introduced from the "Noah-book" in ch. liv. 7–lv. 2, ch. lx., lxv.–lxix. 25, ch. vi.–xvi., and cvi. f. He agrees with Ewald in regarding ch. xxxvii.–lxxi. (after leaving out the Noachian portions) as the first Enoch-book, composed about 144 B. C. Volkmar, in the *Zeitschrift d. deutschen morgenl. Gesellschaft* for 1860, xiv. 87–134, presents a view of the origin and date of the book altogether new, maintaining that it was written at the time of the Jewish revolt under Bar-Cochba about 132 A. D., by a disciple of the famous Rabbi Akiba, to encourage the Jews in their rebellion. He finds, however, extensive Christian interpolations in ch. xviii.–lxx., cvi. f. Dillmann has criticized Volkmar's essay in a brief article in the same *Zeitschrift*, xv. 111 ff., not deeming it worthy of a very elaborate refutation. See also Ewald, *Jahrb.* xi. 231 ff. The whole question, with the connected topics, has been discussed by Hilgenfeld and Volkmar in a succession of articles in Hilgenfeld's *Zeitschr. f. wiss. Theol.* for 1860–63. See also on the book Ewald, *Gesch. d. Volkes Isr.*, 3e Ausg. (1864), iv. 455 ff., and especially Martineau's article on the *Early History of Messianic Ideas*, in the *National Review* for April, 1864.

The question of the original language of the book is discussed very fully by M. Joseph Halévi in the *Journal Asiatique* for April and May, 1867, pp. 352–95. He maintains, it would seem conclusively, that it was composed in the almost Biblical Hebrew of the Mishna and the oldest Midrashim. The article contains many happy elucidations of difficult passages in the book. A.

ENOCH, CITY. [ENOCH, No. 1.]

ENON. [ÆNON.]

ENOS (אֱנוֹשׁ [*man*, especially as mortal, decaying]: Ἐνώς: *Enos*). The son of Seth; properly called Enosh, as in 1 Chr. i. 1 [A. V.] (Gen. iv. 26, v. 6, 7, 9, 10, 11; Luke iii. 38).

* He was the third from Adam in the antediluvian genealogy. That he was born, had children (of these CAINAN only is named), and died at the age of 905, is the sum of all that is known of him. The A. V. takes the form of the name from the LXX. or Vulg. H.

ENOSH. The same as the preceding (1 Chr. i. 1) [and the stricter Hebrew form, instead of ENOS].

EN-RIMMON (עֵין רִמּוֹן [*fountain of pomegranates*]: Vat. omits, Alex. ἐν Ῥεμμων: *e. in Rimmon*), one of the places which the men of

udah re-inhabited after their return from the Captivity (Neh. xi. 29). From the towns in company with which it is mentioned, it seems very probable that the name is the same which in the earlier books is given in the Hebrew and A. V. in the separate form of "Ain and Rimmon" (Josh. xv. 32), "Ain, Remmon" (xix. 7; and see 1 Chr. iv. 32), but in the LXX. combined, as in Nehemiah. [AIN, 2.] G.

* Raumer suggests that En or Ain-Rimmon may be equivalent to Ain and Rimmon, *i. e.* virtually two places, Rimmon and a Fountain or Fountains in the vicinity (*Palästina*, p. 220). It would thus be accounted for that the names (as stated above) are found to occur either separately or in combination. According to Van de Velde (*Memoir*, p. 344) the place is now *Um er Rummanim* (Mother of Pomegranates) between Eleutheropolis and Beersheba. There is a copious fountain there at present, to which the people resort from a wide distance. H.

EN-RO'GEL (עֵין רֹגֵל) [*fountain*[a] *of the fuller*]: πηγὴ Ῥωγήλ: *Fons Rogel*), a spring which formed one of the landmarks on the boundary-line between Judah (Josh. xv. 7) and Benjamin (xviii. 16). It was the point next to Jerusalem, and at a lower level, as is evident from the use of the words "ascended" and "descended" in these two passages. Here, apparently concealed from the view of the city, Jonathan and Ahimaaz remained, after the flight of David, awaiting intelligence from within the walls (2 Sam. xvii. 17), and here, "by the stone Zoheleth, which is 'close to' (אֵצֶל) En-rogel," Adonijah held the feast, which was the first and last act of his attempt on the crown (1 K. i. 9). These are all the occurrences of the name in the Bible. By Josephus on the last incident (*Ant.* vii. 14, § 4) its situation is given as "without the city, in the royal garden," and it is without doubt referred to by him in the same connection, in his description of the earthquake which accompanied the sacrilege of Uzziah (*Ant.* ix. 10, § 4), and which, "at the place called Eroge,"[b] shook down a part of the eastern hill, "so as to obstruct the roads, and the royal gardens."

In the Targum, and the Arabic and Syriac versions, the name is commonly given as "the spring of the fuller" (מַבּוּעָא דְּכַבָּסָא), and this is generally accepted as the signification of the Hebrew name — *Rogel* being derived from *Ragal*, to tread, in allusion to the practice of the Orientals in washing linen.

In more modern times, a tradition, apparently first recorded by Brocardus, would make En-rogel the well of Job or Nehemiah (*Bir Eyub*), below the junction of the valleys of Kedron and Hinnom, and south of the Pool of Siloam. In favor of this is the fact that in the Arabic version of Josh. xv. 7 the name of Ain-Eyub, or "spring of Job," is given for En-rogel, and also that in an early Jewish Itinerary (Uri of Biel, in Hottinger's *Cippi Hebraici*) the name is given as "well of *Joab*," as retaining the memory of Joab's connection with Adonijah — a name which it still retains in the traditions of the Greek Christians (Williams, *Holy City*, ii. 490). Against this general belief, some strong arguments are urged by Dr. Bonar in favor of identifying En-rogel with the present "Fountain of the Virgin," *'Ain Ummed-Daraj* = "spring of the mother of steps" — the perennial source from which the Pool of Siloam is supplied (*Land of Promise*, App. v.). These arguments are briefly as follows: — (1.) The *Bir Eyub* is a well and not a spring (En), while, on the other hand, the "Fountain of the Virgin" is the only real spring close to Jerusalem. Thus if the latter be not En-rogel, the single spring of this locality has escaped mention in the Bible. (2.) The situation of the Fountain of the Virgin agrees better with the course of the boundary of Benjamin than that of the *Bir Eyub*, which is too far south. (3.) *Bir Eyub* does not suit the requirements of 2 Sam. xvii. 17. It is too far off both from the city, and from the direct road over Olivet to the Jordan; and is in full view of the city (Van de Velde, i. 475), which the other spot is not. (4.) The martyrdom of St. James was effected by casting him down from the temple wall into the valley of Kedron, where he was finally killed by a fuller with his washing stick. The natural inference is that St. James fell near where the fullers were at work. Now *Bir Eyub* is too far off from the site of the Temple to allow of this, but it might very well have happened at the Fountain of the Virgin. (See Stanley's *Sermons on the Apost. Age*, p. 333–34). (5.) *Daraj* and *Rogel* are both from the same root, and therefore the modern name may be derived from the ancient one, even though at present it is taken to allude to the "steps" by which the reservoir of the Fountain is reached.

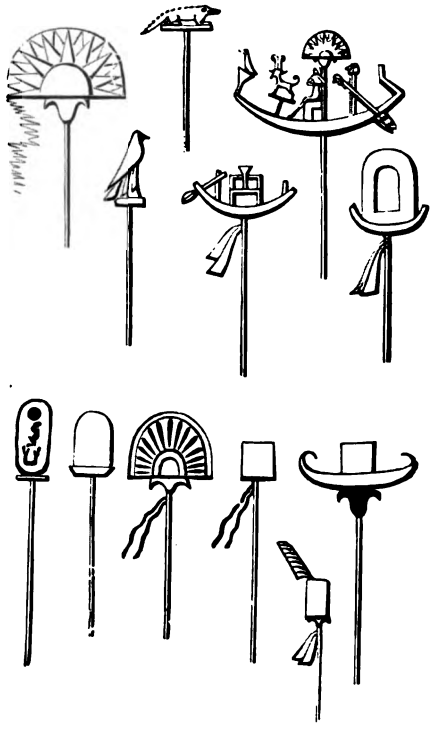
Add to these considerations (what will have more significance when the permanence of Eastern habits is recollected) — (6.) That the Fountain of the Virgin is still the great resort of the women of Jerusalem for washing and treading their clothes: and also — (7.) That the level of the king's gardens must have been above the *Bir Eyub*, even when the water is at the mouth of the well — and it is generally seventy or eighty feet below; while they must have been lower than the Fountain of the Virgin, which thus might be used without difficulty to irrigate them. (See Robinson, i. 331 334; and for the best description of the *Bir Eyub*, see Williams, *Holy City*, ii. 483–495). [JERUSALEM.] G.

* In reply to the argument by Bonar, adduced above, and in support of the theory which identifies *Bir Eyub* with the En-Rogel of the sacred writers, these considerations may be urged. (1.) It is both a well and a spring. During portions of the rainy season, a copious stream issues from its mouth, and when it ceases to overflow, its waters pass off by a subterranean channel. (2.) The narrative of "the martyrdom of St. James" [JAMES THE LITTLE] above referred to, differs from Josephus, and is partly, at least, legendary; and if the incident named is accepted, the "inference" does not follow, nor has it a decisive bearing on this question. (3.) The narrative in 2 Sam. xvii. 17, suggests no difficulty. It implies some place of concealment near the spot. That the locality was

[a] * Stanley (*S. & P.* p. 501, Amer. ed.) defines Endoge. as "Spring of the Foot." But the vocalization should then be עֶרֶגֶל, and not רֹגֵל, as in the Masoretic text. H

[b] This natural interpretation of a name only slightly corrupt appears to have first suggested itself to Stanley (*S. & P.* p 184).

Digitized by Google



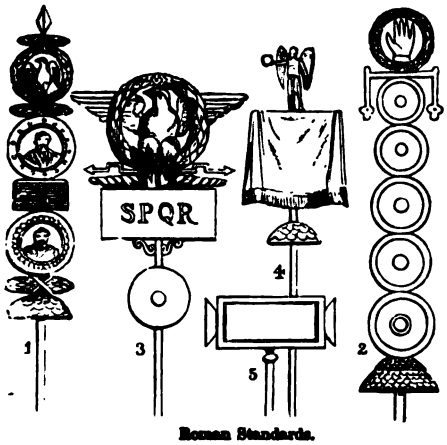
little off from the direct road would be favorable; and its being outside the city, yet within easy reach of a messenger from it, answers all the requirements. (4.) The position of *Bîr Eyub* accords entirely with the boundary-line between Judah and Benjamin, and that of the Fountain of the Virgin does not. This border, coming from the Dead Sea, passed up the Valley of Hinnom, south of Jerusalem. The *Bîr Eyub* is in the centre of the valley through which it passed, while the Fountain of the Virgin is on a hill-side, several hundred yards distant from its natural course. If the reader will turn to the article JERUSALEM, Plate III., on which both points are indicated, he will see at a glance how inevitably the border would touch the former point, and how improbable and unaccountable would be the detour which would carry it to the latter point. (5.) This theory, if not, as Thomson claims, more in harmony, is certainly not less so, with the record in 1 Kings i. 9, 38, 41. (6.) Other reasons in its favor are given above, and it has commanded the general assent of visitors and writers, from Brocardus to Robinson.

The *Bîr Eyub* is 125 feet in depth, walled up with large square stones on its four sides, one of which terminates above in an arch. The work is, evidently, of high antiquity. The water is pure and sweet, but not very cold. When it passes off beneath the surface, it issues, during a part of the year, in a large stream some forty yards below. See Thomson, *Land & Book*, ii. 528 f. S. W.

* **ENROLLED** (Luke ii. 1). [CENSUS; TAXING.]

EN-SHE'MESH (עֵין־שֶׁמֶשׁ = *spring of the sun*: ἡ πηγὴ τοῦ ἡλίου, πηγὴ Βαιθσαμύς; [in Josh. xviii., Alex. πηγη Σαμε:] *Ensemes, id est, Fons Solis*), a spring which formed one of the landmarks on the north boundary of Judah (Josh. xv. 7) and the south boundary of Benjamin (xviii. 17). From these notices it appears to have been between the "ascent of Adummim" — the road leading up from the Jordan valley south of the *Wady Kelt* — and the spring of En-rogel, in the valley of Kedron. It was therefore east of Jerusalem and of the Mount of Olives. The only spring at present answering to this position is the *'Ain-Haud* or *'Ain-Chôt* — the "Well of the Apostles," [a] about a mile below Bethany, the traveller's first halting-place on the road to Jericho. Accordingly this spring is generally identified with En-Shemesh. The aspect of *'Ain-Haud* is such that the rays of the sun are on it the whole day. This is not inappropriate in a fountain dedicated to that luminary. G.

ENSIGN (נֵס, in the A. V. generally "ensign," sometimes "standard;" דֶּגֶל, "standard," with the exception of Cant. ii. 4, "banner;" אוֹת, "ensign"). The distinction between these three Hebrew terms is sufficiently marked by their respective uses: *nes* is a *signal; degel* a military *standard* for a *large* division of an army; and *oth*, the same for a *small* one. Neither of them, however, expresses the idea which "standard" conveys to our minds, namely, a *flag;* the standards in use among the Hebrews probably resembled those of the Egyptians and Assyrians — a figure or device of some kind elevated on a pole. (1.) The notices of the *nes* or "ensign" are most frequent; it consisted of some well-understood signal which was exhibited on the top of a pole from a bare mountain-top (Is. xiii. 2, xviii. 3) — the very emblem of conspicuous isolation (Is. xxx. 17). Around it the inhabitants mustered, whether for the purpose of meeting an enemy (Is. v. 26, xviii. 3, xxxi. 9), which was sometimes notified by the blast of a trumpet (Jer. iv. 21, li. 27); or, as a token of rescue (Ps. lx. 4; Is. xi. 10; Jer. iv. 6); or for a public proclamation (Jer. l. 2); or simply as a gathering point (Is. xlix. 22, lxii. 10). What the nature of the signal was, we have no means of stating; it has been inferred from Is. xxxiii. 23, and Ez. xxvii. 7, that it was a flag: we do not observe a flag depicted either in Egyptian or Assyrian representations of vessels (Wilkinson, iii. 211; Bonomi, pp. 166, 167); but, in lieu of a flag, certain devices, such as the phœnix, flowers, &c., were embroidered on the sail; whence it appears that the device itself, and perhaps also the sail bearing the device, was the *nes* or "ensign." It may have been sometimes the name of a leader, as implied in the title which Moses gave to his altar "Jehovah-nissi" (Ex. xvii. 15). It may also have been, as Michaelis (*Suppl.* p. 1648) suggests, a blazing



Egyptian Standards, from Wilkinson.

torch. The important point, however, to be observed is, that the *nes* was an occasional signal, and not a military standard, and that *elevation* and *conspicuity* are implied in the use of the term hence it is appropriately applied to the "pole" on

[a] So called from its being supposed that the Apostles of Christ may have rested there in their journeys. H.

Digitized by Google

whom the brazen serpent hung (Num. xxi. 8), which was indeed an "ensign" of deliverance to the pious Israelite; and again to the censers of Korah and his company, which became a "sign" or beacon of warning to Israel (Num xvi. 38). (2.) The term *degel* is used to describe the standards which were given to each of the four divisions of the Israelite army at the time of the Exodus (Num. i. 52, ii. 2 ff., x. 14 ff.). Some doubt indeed exists as to its meaning in these passages, the LXX. and Vulgate regarding it not as the standard itself, but as a certain military division annexed to a standard, just as *vexillum* is sometimes used for a body of soldiers (Tac. *Hist.* i. 70; Liv. viii. 8). The sense of *compact and martial array* does certainly seem to lurk in the word; for in Cant. vi. 4, 10, the brilliant glances of the bride's eyes are compared to the destructive advance of a well-arrayed host, and a similar comparison is employed in reference to the bridegroom (Cant. v. 10); but on the other hand, in Cant. ii. 4, no other sense than that of a "banner" will suit, and we therefore think the rendering in the A. V. correct. No reliance can be placed on the term in Ps. xx. 5, as both the sense and the text are mat-

Roman Standards.

ters of doubt (see Olshausen and Hengstenberg, *in loc.*). A standard implies, of course, a standard-bearer; but the supposed notice to that officer in Is. x. 18, is incorrect, the words meaning rather "as a sick man pineth away;" in a somewhat parallel passage (Is. lix. 19) the marginal version is to be followed, rather than the text. The character of the Hebrew military standards is quite a matter of conjecture; they probably resembled the Egyptian, which consisted of a sacred emblem such as an animal, a boat, or the king's name (Wilkinson, i. 294). Rabbinical writers state the devices to have been as follows: for the tribe of Judah a lion; for Reuben a man; for Ephraim an ox; and for Dan an eagle (Carpzov, *Crit. App.* p. 667); but no reliance can be placed on this. As each of the four divisions, consisting of three tribes, had its standard, so had each tribe its "sign" (*oth*) or "ensign," probably in imitation of the Egyptians, among whom not only each battalion, but even each company had its particular ensign (Wilkinson, *l. c.*). We know nothing of its nature. The word occurs figuratively in Ps. lxxiv. 4, apparently in reference to the images of idol gods. W. L. B.

* **ENSUE** (like the French *ensuivre*, which is from the Latin *insequor*) means in 1 Pet. ii. 11, to "follow after and *overtake:*" "Let him seek peace and ensue it." It has no longer this sense. H.

EN-TAPPU'AH (עֵין תַּפּוּחַ = *spring of apple*, or *citron:* πηγὴ Θαφθώθ; [Alex. η γη Θαθφωθ:] *Fons Taphuæ*). The boundary of Manasseh went from facing Shechem "to the inhabitants of En-tappuah" (Josh. xvii. 7). It is probably identical with Tappuah, the position of which will be elsewhere examined. [TAPPUAH.] This place must not be confounded with BETH-TAPPUAH in the mountains of Judah. G.

* **ENTRANCE TO HAMATH.** [HAMATH.]

* **ENTREAT** (written also "intreat") is often used in the A. V. where we should employ "treat," or a similar expression, as in the phrases "to entreat well," "courteously," "spitefully," "shamefully," and "to evil entreat;" see Gen. xii. 16; Acts xxvii. 3; Matt. xxii. 6; Luke xx. 11; Acts vii. 19, &c. The simple "treat" does not occur in this sense either in the A. V. or in Shakespeare. "To be entreated" (A. V.) often signifies "to be prevailed upon by entreaty;" see 1 Chr. v. 20; 2 Chr. xxxiii. 13; Is. xix. 22, &c. A.

EPÆNE'TUS [A. V. Epenetus] (Ἐπαίνετος [*praised* or *worthy of praise*]), a Christian at Rome, greeted by St. Paul in Rom. xvi. 5, and designated as his beloved, and the first fruit of Asia (so the majority of ancient MSS. and the critical editors: the received text has Ἀχαΐας) unto Christ. The Synopsis of the Pseudo-Dorotheus makes him first bishop of Carthage, but Justinian remarks that the African churches do not recognize him. H. A.

EP'APHRAS (Ἐπαφρᾶς [*lovely, fascinating*]), a fellow-laborer with the Apostle Paul, mentioned Col. i. 7, as having taught the Colossian church the grace of God in truth, and designated a faithful minister (διάκονος) of Christ on their behalf. (On the question whether Epaphras was the founder of the Colossian church, see the prolegomena to the epistle, in Alford's *Greek Testament*, iii. 35 ff.) He was at that time with St. Paul at Rome (Col. iv. 12), and seems by the expression ὁ ἐξ ὑμῶν, there used, to have been a Colossian by birth. We find him again mentioned in the Epistle to Philemon (ver. 23), which was sent at the same time as that to the Colossians. St. Paul there calls him ὁ συναιχμάλωτός μου, but whether the word represents matter of fact, or is only a tender and delicate expression of Epaphras's attention to the Apostle in his imprisonment (cf. Rom. xvi. 13), we cannot say.

Epaphras *may* be the same as Epaphroditus, who is called, in Phil. ii. 25, the apostle of the Philippians, and having come from Philippi to Rome with contributions for St. Paul, was sent back with the epistle. It has been supposed by many, and among them by Grotius. In all probability the *name* Epaphras is an abbreviation of Epaphroditus: but on the question of the identity of the persons, the very slight notices in the N. T. do not enable us to speak with any confidence. The name Epaphroditus was sufficiently common: see Tac. *Ann.* xv. 55; Sueton. *Domit.* 14; Joseph. *Life*, § 76. The martyrologies make Epaphras to have been first bishop of Colossæ, and to have suffered martyrdom there. H. A.

Digitized by Google

* Though Epaphras and Epaphroditus may be different forms of the same name (see Winer, *Realw.* i. 331), the probability is that in the Epistles they designate different persons. It is against the supposed identity, first, that Epaphras belonged to Colossæ (Col. iv. 12), and had come thence to Rome (Col. i. 7), whereas Epaphroditus belonged to Philippi, and had been sent thence to Rome with the church's contributions for Paul (Phil. ii. 25); and, secondly (as the foregoing facts indicate), that Epaphras had his circuit of labor in Phrygia or Asia Minor (Col. iv. 13), while Epaphroditus had his circuit in northern Greece or Macedonia. See Neander's *Pflanzung*, ii. 232 (1847). Again, Epaphras was Paul's fellow-captive, probably in a literal sense. We may infer this first, from his being named apart from Paul's fellow-laborers (*συνεργοί*) at Rome (Philem. vv. 23, 24), and, secondly, from the subjoined *ἐν Χριστῷ Ἰησοῦ*, which shows in what sphere he bore that character. Meyer held to the figurative sense in his first ed. (1848), but changes to the other in his third (1865). H.

EPAPHRODITUS (Ἐπαφρόδιτος, Phil. ii. 25, iv. 18). See above under EPAPHRAS. H. A.

* **EPENETUS**, Rom. xvi. 5. [EPENETUS.]

EPHAH (עֵיפָה [*darkness*]: Γεφάρ, [Γειφά; Vat. in 1 Chr., Γαφερ; Alex. in 1 Chr. and Is.,] Γαιφαρ: *Epha*), the first, in order, of the sons of Midian (Gen. xxv. 4; 1 Chr. i. 33), afterwards mentioned by Isaiah in the following words: "The multitude of camels shall cover thee, the dromedaries of Midian and Ephah; all they from Sheba shall come: they shall bring gold and incense; and they shall shew forth the praises of the Lord. All the flocks of Kedar shall be gathered together unto thee, the rams of Nebaioth shall minister unto thee: they shall come up with acceptance on mine altar, and I will glorify the house of my glory" (Is. lx. 6, 7). This passage clearly connects the descendants of Ephah with the Midianites, the Keturahite Sheba, and the Ishmaelites, both in the position of their settlements, and in their wandering habits; and shows that, as usual, they formed a tribe bearing his name. But no satisfactory identification of this tribe has been discovered. The Arabic word غيفة (*Gheyfeh*), which has been supposed to be the same as Ephah, is the name of a town, or village, near *Bulbeys* (the modern Bilbeys), a place in Egypt, in the province of the Sharkeeyeh, not far from Cairo: but the tradition that Ephah settled in Africa does not rest on sufficient authority. [MIDIAN; SHEBA.] E. S. P.

EPHAH (עֵיפָה [*darkness*]: Γαιφά: *Epha*). 1. Concubine of Caleb, in the line of Judah (1 Chr. ii. 46).

2. Son of Jahdai; also in the line of Judah (1 Chr. ii. 47).

EPHAH. [MEASURES.]

EPHAI [2 syl.] (following the Keri, עֵיפָי; but the original text is עוֹפִי = OPHAI [*weary, languid*]: and so LXX. Ἰωφέ; [Alex. Ωφει: FA. Ωφε:] *Ophi*), a Netophathite, whose sons were among the "captains (שָׂרֵי) of the forces" left in Judah after the deportation to Babylon (Jer. xl. 8). They submitted themselves to Gedaliah, the Babylonian governor, and were apparently massacred with him by Ishmael (xli. 3, comp. xl. 13).

EPHER (עֵפֶר [*a calf, young animal*] Ἀφείρ, Ὀφέρ; [in Gen., Alex. Αφερ:] *Opher Epher*), the second, in order, of the sons of Midian (Gen. xxv. 4; 1 Chr. i. 33), not mentioned in the Bible except in these genealogical passages. His settlements have not been identified with any probability. According to Gesenius, the name is equivalent to the Arabic *Ghifr*, غفر, signifying "a calf," and "a certain little animal, or insect, or animalcule." Two tribes bear a similar appellation, *Ghifâr* (غفار); but one was a branch of the first Amalek, the other of the Ishmaelite Kinâneh (cf. Caussin, *Essai sur l'Hist. des Arabes* i. 20, 297, and 298; and Abulfedà, *Hist. Anteislamica*, ed. Fleischer, p. 196): neither is ascribed to Midian. The first settled about Yethrib (El-Medeeneh); the second, in the neighborhood of Mekkeh. E. S. P.

EPHER (עֵפֶר [*a calf*]: Ἄφερ, Alex. Γαφερ: *Epher*).

1. A son of Ezra, among the descendants of Judah; possibly, though this is not clear, of the family of the great Caleb (1 Chr. iv. 17).

2. (Ὀφέρ; [Comp. Αφέρ; Ald. Γεφέρ.]) One of the heads of the families of Manasseh on the east of Jordan (1 Chr. v. 24). The name may be compared with that of Ophrah, the native place of Gideon, in Manasseh, on the west of Jordan. In the original the two are identical except in termination (עפרה, עפרי); and according to the LXX. (as above) the vowel-points were once the same. G.

EPHES-DAMMIM (אֶפֶס דַּמִּים: Ἐφερμείν; [Vat. -μεμ:] Alex. Αφεσδομμειν: *in finibus Dommim*), a place between Socoh and Azekah, at which the Philistines were encamped before the affray in which Goliath was killed (1 Sam. xvii. 1). The meaning of the word is uncertain, but it is generally explained as the "end" or "boundary of blood," in that case probably derived from its being the scene of frequent sanguinary encounters between Israel and the Philistines. Under the shorter form of PAS-DAMMIM it occurs once again in a similar connection (1 Chr. xi. 13). For the situation of the place see ELAH, VALLEY OF. G.

* **EPHESIAN** (Ἐφέσιος: *Ephesius*), an inhabitant of Ephesus, used in the singular only of TROPHIMUS, one of Paul's Greek friends with him at Jerusalem (Acts xxi. 29), but in the plural, of the entire people of that city as notorious for their worship of Diana (Acts xix. 28, 34, 35 *bis*). [DIANA.] H.

EPHESIANS, THE EPISTLE TO THE, was written by the Apostle St. Paul during his first captivity at Rome (Acts xxviii. 16), apparently immediately after he had written the Epistle to the Colossians [COLOSSIANS, EPISTLE TO], and during that period (perhaps the early part of A. D. 62) when his imprisonment had not assumed the severer character which seems to have marked its close.

This sublime epistle was addressed to the Christian church at the ancient and famous city of Ephesus (see below), that church which the Apostle

Digitized by Google

and himself founded (Acts xix. 1 ff., comp. xviii. 19), with which he abode so long (τριετίαν, Acts xx. 31), and from the elders of which he parted with such a warm-hearted and affecting farewell (Acts xx. 18–35). It does not seem to have been called out by any special circumstances, nor even to have involved any distinctly precautionary teaching (comp. Schneckenburger, *Beiträge*, p. 135 ff.), whether against oriental or Judaistic theosophy, but to have been suggested by the deep love which the Apostle felt for his converts at Ephesus, and which the mission of Tychicus, with an epistle to the church of Colossæ, afforded him a convenient opportunity of evincing in written teaching and exhortation. The epistle thus contains many thoughts that had pervaded the nearly contemporaneous Epistle to the Colossians, reiterates many of the same practical warnings and exhortations, bears even the tinge of the same diction, but at the same time enlarges upon such profound mysteries of the divine counsels, displays so fully *the origin and developments of the church in Christ*, its union, communion, and aggregation in him, that this majestic epistle can never be rightly deemed otherwise than one of the most sublime and consolatory outpourings of the Spirit of God to the children of men. To the Christian at Ephesus dwelling under the shadow of the great temple of Diana, daily seeing its outward grandeur, and almost daily hearing of its pompous ritualism, the allusions in this epistle to that mystic building of which Christ was the corner-stone, the Apostles the foundations, and himself and his fellow Christians portions of the august superstructure (ch. ii. 19–22), must have spoken with a force, an appropriateness, and a reassuring depth of teaching that cannot be overestimated.

The contents of this epistle easily admit of being divided into two portions, the first mainly *doctrinal* (ch. i.–iii.), the second *hortatory* and *practical*.

The doctrinal portion opens with a brief address to the saints in Ephesus (see below), and rapidly passes into a sublime ascription of praise to God the Father, who has predestinated us to the adoption of sons, blessed and redeemed us *in Christ*, and made known to us his eternal purpose of uniting all in him (ch. i. 3–14). This not unnaturally evokes a prayer from the Apostle that his converts may be enlightened to know the hope of God's calling, the riches of his grace, and the magnitude of that power which was displayed in the resurrection and transcendent exaltation of Christ — the head of his body, the church (ch. i. 15–23). Then, with a more immediate address to his converts, the Apostle reminds them how, dead as they had been in sin, God had quickened them, raised them, and even enthroned them with Christ, — and how all was by grace, not by works (ch. ii. 1–10). They were to remember, too, how they had once been alienated and yet were now brought nigh in the blood of Christ; how he was their peace; how by him both they and the Jews had access to the Father, and how on him as the corner-stone they had been built into a spiritual temple to God (ch. ii. 11–22). On this account, having heard, as they must have done, how to the Apostle was revealed the profound mystery of this call of the Gentile world, they were not to faint at his troubles (ch. iii. 1–13): nay, he prayed to the great Father of all to give them inward strength to teach them with the love of Christ and fill them with the fullness of God (ch. iii. 13–19). The prayer is concluded by a sublime doxology (ch. iii. 20, 21), which serves to usher in the more directly *practical* portion.

This the Apostle commences by entreating them to walk worthy of this calling, and to keep the unity of the spirit: there was but one body, one Spirit, one Lord, and one God (ch. iv. 1–6). Each one had his portion of grace from God (ch. iv 7–10), who had appointed ministering orders in the church, until all come to the unity of the faith, and grow up and become united with the living Head, even Christ (ch. iv. 11–16). Surely then they were to walk no longer as darkened, feelingless heathen; they were to put off the old man, and put on the new (ch. iv. 17–24). This too was to be practically evinced in their outward actions; they were to be truthful, gentle, honest, pure, and forgiving; they were to walk in love (ch. iv. 25–v. 2). Fornication, covetousness, and impurity, were not even to be named; they were once in heathen darkness, now they are light, and must reprove the deeds of the past (ch. v. 3–14). Thus were they to walk exactly, to be filled with joy, to sing, and to give thanks (ch. v. 15–21). Wives were to be subject to their husbands, husbands to love and cleave to their wives (ch. v. 22–33); children were to honor their parents, parents to bring up holily their children (ch. vi. 1–4); servants and masters were to perform to each other their reciprocal duties (ch. vi. 5–9).

With a noble and vivid exhortation to arm themselves against their spiritual foes with the armor of God (ch. vi. 10–20), a brief notice of the coming of Tychicus (ch. vi. 21, 22), and a twofold doxology (ch. vi. 23, 24), this sublime epistle comes to its close.

With regard to the *authenticity* and *genuineness* of this epistle, it is not too much to say that there are no just grounds for doubt. The testimonies of antiquity are unusually strong. Even if we do not press the supposed allusions in Ignatius, *Eph* ch. 12, and Polycarp, *Philipp.* ch. 12, we can confidently adduce Irenæus, *Hær.* v. 2, 3, v. 14, 3; Clem. Alex. *Pædag.* i. p. 108 (ed. Pott.), *Strom.* iv. p. 592 (ed. Pott.); Origen, *Contr. Cels.* iii. 20; Tertull. *de Præscr. Hær.* ch. 36, and after them the constant and persistent tradition of the ancient church. Even Marcion did not deny that the epistle was written by St. Paul, nor did heretics refuse occasionally to cite it as confessedly due to him as its author; comp. Irenæus, *Hær.* i. 8, 5. In recent times, however, its genuineness has been somewhat vehemently called in question. De Wette, both in the introductory pages of his *Commentary* on this epistle (ed. 2, 1847), and in his *Introduction to the N. T.* (ed. 5, 1848), labors to prove that it is a mere spiritless expansion of the Epistle to the Colossians, though compiled in the apostolic age; Schwegler (*Nachapost. Zeitalt.* ii. 330 ff.), Baur (*Paulus*, p. 418 ff.), and others advance a step further and reject both epistles as of no higher antiquity than the age of Montanism and early Gnosticism. Without here entering into the details, it seems just to say that the adverse arguments have been urged with a certain amount of specious plausibility, but that the replies have been so clear, satisfactory, and in some cases crushing, as to leave no reasonable and impartial inquirer in doubt as to the authorship of the epistle. On the one hand we have mere subjective judgments, not unmarked by arrogance, relying mainly on supposed divergences in doctrine and presumed insipidities of diction, but

Digitized by Google

wholly destitute of any sound historical basis; on the other hand we have unusually convincing counter-investigations, and the unvarying testimony of the ancient church. If the discrepancies in matter and style are so decided as to lead a writer of the 19th century to deny confidently the genuineness of this epistle, how are we to account for its universal reception by writers of the 2d and 3d centuries, who spoke the language in which it was written, and who were by no means unacquainted with the phenomena of pious fraud and literary imposture?

For a detailed reply to the arguments of De Wette and Baur, the student may be referred to Meyer, *Einleit. z. Eph.* p. 19 ff. (ed. 2), Davidson, *Introd. to N. T.* ii. p. 352 ff., and Alford, *Prolegomena*, p. 8. [See also Klöpper, *De Origine Epp. ad Ephesios et Colossenses*, Gryph. 1853.] [a]

Two special points require a brief notice.

(1.) The *readers* for whom this epistle was designed. In the opening words, Παῦλος ἀπόστολος Χριστοῦ Ἰησοῦ διὰ θελήματος Θεοῦ τοῖς ἁγίοις τοῖς οὖσιν ἐν Ἐφέσῳ καὶ πιστοῖς ἐν Χριστῷ Ἰησοῦ, the words ἐν Ἐφέσῳ are omitted by B, 67 [*a secunda manu*], Basil (expressly), and possibly [probably] Tertullian. This, combined with the somewhat noticeable omission of all greetings to the members of a church with which the Apostle stood in such affectionate relation, and some other internal objections, have suggested a doubt whether these words really formed a part of the original text. At first sight these doubts seem plausible; but when we oppose to them (*a*) the overwhelming weight of diplomatic evidence for the insertion of the words, (*b*) the testimony of all the versions, (*c*) the universal designation of this epistle by the ancient church (Marcion standing alone in his assertion that it was written to the Laodiceans) as an epistle *to the Ephesians*, (*d*) the extreme difficulty in giving any satisfactory meaning to the isolated participle, and the absence of any parallel usage in the Apostle's writings, — we can scarcely feel any doubt as to the propriety of removing the brackets in which these words are inclosed in the 2d edition of *Tischendorf*, and of considering them an integral part of the original text.[b] If called upon to supply an answer to, or an explanation of the internal objections, we must record the opinion that none on the whole seems so free from objection as that which regards the Epistle as also designed for the benefit of churches either conterminous to, or dependent on, that of Ephesus. The counter-arguments of Meyer, though ably urged, are not convincing. Nor can an appeal to the silence of writers of the ancient church on this further destination be conceived of much weight, as their references are to the usual and *titular* designation of the epistle, but do not, and are not intended to affect the question of its wider or narrower destination. It is not unnatural to suppose that the special greetings might have been separately intrusted to the bearer Tychicus, possibly himself an Ephesian, and certainly commissioned by the Apostle (ch. vi. 22) to inform the Ephesians of his state and circumstances.

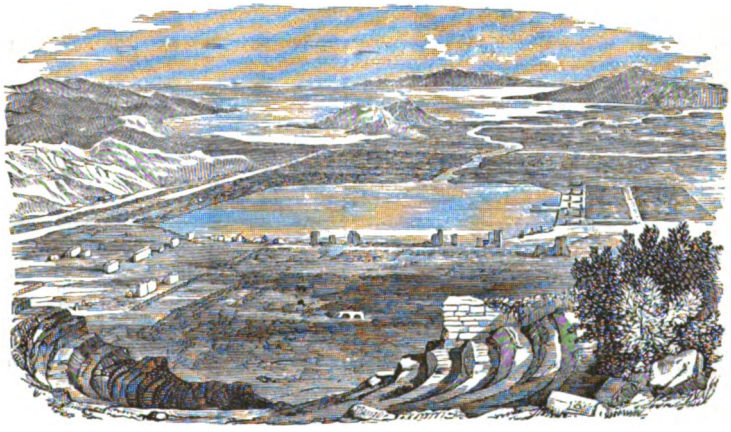
(2.) The question of priority in respect of composition between this epistle and that to the Colossians is very difficult to adjust. On the whole, both internal and external considerations seem somewhat in favor of the priority of the Epistle to the Colossians. Comp. Neander, *Planting*, i. 329 (Bohn), Schleiermacher, *Stud. u. Krit.* for 1832, p. 500, and Wieseler, *Chronol.*, p. 450 ff. On the similarity of contents, see COLOSSIANS, EPISTLE TO.

(3.) The opinion that this epistle and those to the Colossians and to Philemon were written during the Apostle's imprisonment at Cæsarea (Acts xxi. 27–xxvi. 32) has already been noticed [COLOSSIANS, EPISTLE TO], and on deliberation rejected. The weight of probability seems distinctly on the side of the opinion of the ancient church, that the present epistle was written during the Apostle's first imprisonment in Rome.

The editions of [commentaries on] this epistle have been numerous. We may specify those of Rückert (Leipz. 1834), Harless (Erl. 1834), — an admirable edition, completely undervalued by De Wette, — Olshausen (Königsb. 1840), De Wette (Leipz. 1847), Stier (Berl. 1848), Meyer (Gött. 1853); and in our own country those of Eadie (Glasg. 1854 [also New York]), Ellicott (Lond 1855), and Alford (Lond. 1857). C. J. E.

* We have later editions of commentaries from Ellicott, 3d ed., 1864 (Amer. reprint, 1866); Alford, 1865 (4th ed.); Harless, 1858 (but unchanged); Stier, 1859 (an abridgment of the earlier edition, which Ellicott in the Preface to his *Ephesians* so justly censures for its prolixity); Meyer, 3d ed., 1859. To the foregoing works we may add those of Schenkel, *Briefe an die Epheser*, &c., 1867 (2te Ausg.); Karl Braune, *Bvr. an die Epheser*, &c., 1867 (substituted for Schenkel's commentary on this epistle in Lange's *Bibelwerk*); Bleek, *Vorlesungen üb. die Briefe an die Kol., den Philem. u. die*

a * Some good remarks on this topic will also be found in an article on *The Tübingen School* by the Rev. S. G. Bulfinch. D. D., in the *Monthly Religious Magazine* (Boston) for May, 1866, p. 301 ff. Speaking of the resemblance of the Epistles to the Ephesians and the Colossians, and of their rejection by Baur, the writer observes: —



"Our critic, however, does not hold that one of these epistles is genuine and the other forged, but condemns both together. In so doing, he does not appear to perceive that he encounters the very difficulty which he had just urged against the common belief. It is certainly very unlikely that two persons should, without consent, have forged two pretended epistles so like each other as these: nor does it seem credible that, when one had forged Colossians, another counterfeiter should have received this base coinage as true, and given us forgery upon forgery. The only supposition remaining for Dr. Baur is that the pretended author repeated himself — the supposition which he had already repudiated as applied to Paul. It would be, indeed, less probable in the case of a forger than in that of the Apostle; for the latter, writing naturally, would not guard himself against repeating the same thoughts in letters to different persons; while one who was fabricating false epistles would take especial care against whatever might bring his work into suspicion." (Page 308.) A.

b * The diplomatic evidence against the genuineness of the words ἐν Ἐφέσῳ is now strengthened by their omission in the *Codex Sinaiticus*. Basil testifies that the reading τοῖς οὖσιν (without ἐν Ἐφέσῳ) had been handed down by his predecessors, and was that which he had found in the *ancient* copies of the epistle; οὕτω γὰρ καὶ οἱ πρὸ ἡμῶν παραδεδώκασι, καὶ ἡμεῖς ἐν τοῖς παλαιοῖς τῶν ἀντιγράφων εὑρήκαμεν (*Contra Eunom.* ii. 19). This appears also to have been the reading of Origen. See the note in Tischendorf's 7th ed. of the Greek Testament (1859). The external evidence against the words is certainly weighty. On this and other questions relating to the epistle, see particularly Bleek's *Vorlesungen* (1865), p. 172 ff. A.

Eph., 1865 (edited by F. Nitzsch); Trapp, in his *Commentary on the New Testament* (Webster's ed. Lond. 1865); Maurice, *Epistle to the Ephesians*, in his *Unity of the New Testament*, pp. 512–548 (1854); J. Llewelyn Davies, *Epistles of St. Paul to the Ephesians, Colossians, and Philemon, with Introduction and Notes* (Lond. 1866); Alford, in his *New Testament for English Readers* (1866); Wordsworth, in his *Greek Testament, with Introductions and Notes*, 1866 (4th ed.); and in our own country, those of the Rev. Albert Barnes, *Notes, Explanatory and Practical, on the Epistles to the Ephesians, Philippians, and Colossians* (1845), S. H. Turner, D. D., *The Epistle to the Ephesians, in Greek and English, with an Exegetical Commentary* (1856), and Charles Hodge, D. D., *Comm. on the Epistle to the Ephesians* (1856).

The circle of critical questions (such as genuineness, Gnostic tendency, time and place of composition) to which this epistle has given rise, coincides very nearly with that connected with the Epistle to the Colossians. [COLOSSIANS.] On this class of questions see especially Prof. Weiss's supplementary article in Herzog's *Real-Encyk.* xix. 481–487. This writer agrees with those who regard ἐν Ἐφέσῳ of the received text (i. 1) as a later addition, and the epistle consequently as encyclical in its destination. In his view the textual evidence for this conclusion is altogether preponderant, while the omission of the words occasions no difficulty. It was sufficient for the Apostle in the address to characterize his readers as Christians or saints in a general way, while at the same time he gave to Tychicus, the bearer of the letter (Col. iv. 7), oral instructions as to the particular churches for whom the epistle was designed. Bleek (*Einl. in das N. Test.* p. 457) supposes that the letter was sent first to the church at Laodicea (comp. Tertull. *adv. Marcion.* v. 11, 17, and Col. iv. 16), but that it was designed to be communicated to other churches in the immediate neighborhood (as that at Hierapolis), which Paul had not personally visited. He thinks it cannot have been intended also for the church at Ephesus, which stood in so different a relation to the Apostle. Dr. J. C. M. Laurent, on the other hand, in a recent article (*Philemon von Laodikeia*, in the *Jahrb. f. deutsche Theol.* 1866, p. 129 ff.) regards the epistle as designed equally for the churches of Laodicea and Ephesus, and therefore originally written without any address, the words ἐν Ἐφέσῳ in ver. 1 being a later addition. The various hypotheses have been still more recently discussed by Kamphausen, *Ueber den ursprüngl. Leserkreis des Epheserbriefes*, in the *Jahrb. f. deutsche Theol.*, 1866, pp. 742–749. He supposes that the epistle was originally addressed to the church at Laodicea. H.

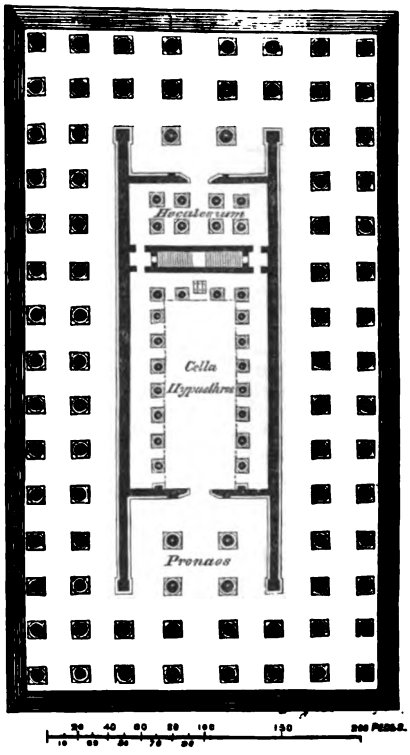
Site of Ephesus. (From Laborde.)

EPH'ESUS (Ἔφεσος), an illustrious city in the district of Ionia (πόλις Ἰωνίας ἐπιφανεστάτη, Steph. Byz. *s. v.*), nearly opposite the island of Samos, and about the middle of the western coast of the peninsula commonly called Asia Minor. Not that this geographical term was known in the first century. The ASIA of the N. T. was simply the Roman province which embraced the western part of the peninsula. Of this province Ephesus was the capital. [EPHESUS.]

Among the more marked physical features of the peninsula are the two large rivers, Hermus and Mæander, which flow from a remote part of the interior westward to the Archipelago, Smyrna (Rev. ii. 8) being near the mouth of one and Miletus (Acts xx. 17) of the other. Between the valleys drained by these two rivers is the shorter stream and smaller basin of the Cayster, called by the Turks *Kutschuk-Menderе*, or the Little Mæander. Its upper level (often called the Caystrian meadows) was closed to the westward by the gorge between Gallesus and Pactyas, the latter of these mountains being a prolongation of the range of Messogis which bounds the valley of the Mæander on the north, the former more remotely connected with the range of Tmolus which bounds the valley of the Hermus on the south. Beyond the gorge and towards the sea the valley opens out again into an alluvial flat (Herod. ii. 10), with hills rising abruptly from it. The plain is now about 5 miles in breadth, but formerly it must have been smaller; and some of the hills were once probably islands. Here Ephesus stood, partly on the level ground and partly on the hills.

Of the hills, on which a large portion of the city was built, the two most important were Prion and Coressus, the latter on the S. of the plain, and being in fact almost a continuation of Pactyas, the former being in front of Coressus and near it.

Digitized by Google



though separated by a deep and definite valley. Further to the N. E. is another conspicuous eminence. It seems to be the hill mentioned by Procopius (*de Ædif.* v. i.) as one on which a church dedicated to St. John was built; and its present name *Ayasaluk* is thought to have reference to him, and to be a corruption of ὁ ἅγιος θεολόγος. Ephesus is closely connected with this Apostle, not only as being the scene (Rev. i. 11, ii. 1) of the most prominent of the churches of the Apocalypse, but also in the story of his later life as given by Eusebius. Possibly his Gospel and Epistles were written here. There is a tradition that the mother of our Lord was buried at Ephesus, as also Timothy and St. John; and Ignatius addressed one of his epistles to the church of this place (τῇ ἐκκλησίᾳ τῇ ἀξιομακαρίστῳ, τῇ οὔσῃ ἐν Ἐφέσῳ τῆς Ἀσίας, Hefele, *Pat. Apostol.* p. 154), which held a conspicuous position during the early ages of Christianity, and was in fact the metropolis of the churches of this part of Asia. But for direct Biblical illustration we must turn to the life and writings of St. Paul, in following which minutely it is remarkable how all the most characteristic features of ancient Ephesus come successively into view.

1. *Geographical Relations.* — These may be viewed in connection, first with the sea and then with the land.

All the cities of Ionia were remarkably well situated for the growth of commercial prosperity (Herod. i. 142), and none more so than Ephesus. With a fertile neighborhood and an excellent climate, it was also most conveniently placed for traffic with all the neighboring parts of the Levant. In the time of Augustus it was the great emporium of all the regions of Asia within the Taurus (Strab. xiv. p. 950): its harbor (named Panormus), at the mouth of the Cayster, was elaborately constructed; though alluvial matter caused serious hindrances both in the time of Attalus, and in St. Paul's own time (Tac. *Ann.* xvi. 23). The Apostle's life alone furnishes illustrations of its mercantile relations with Achaia on the W., Macedonia on the N., and Syria on the E. At the close of his second missionary circuit, he sailed across from Corinth to Ephesus (Acts xviii. 19) when on his way to Syria (*ib.* 21, 22); and there is some reason for believing that he once made the same short voyage over the Ægean in the opposite direction at a later period [CORINTHIANS, FIRST EPISTLE TO]. On the third missionary circuit, besides the notice of the journey from Ephesus to Macedonia (xix. 21, xx. 1), we have the coast voyage on the return to Syria given in detail (xx., xxi.) and the geographical relations of this city with the islands and neighboring parts of the coast minutely indicated (xx. 15–17). To these passages we must add 1 Tim. i. 3; 2 Tim. iv. 12, 20; though it is difficult to say confidently whether the journeys implied there were by land or by water. See likewise Acts xix. 27, xx. 1.

As to the relations of Ephesus to the inland regions of the continent, these also are prominently brought before us in the Apostle's travels. The "upper coasts" (τὰ ἀνωτερικὰ μέρη, Acts xix. 1) through which he passed when about to take up his residence in the city, were the Phrygian table-lands of the interior; and it was probably in the same district that on a previous occasion (Acts xvi. 6) he formed the unsuccessful project of preaching the gospel in the district of Asia. Two great roads at least in the Roman times, led eastward from Ephesus — one through the passes of Tmolus to Sardis (Rev. iii. 1) and thence to Galatia and the N. E. — the other round the extremity of Pactyas to Magnesia, and so up the valley of the Mæander to Iconium, whence the communication was direct to the Euphrates and to the Syrian Antioch. There seem to have been Sardian and Magnesian gates on the E. side of Ephesus, corresponding to these roads respectively. There were also coast-roads leading northwards to Smyrna and southwards to Miletus. By the latter of these it is probable that the Ephesian elders travelled, when summoned to meet Paul at the latter city (Acts xx. 17, 18). Part of the pavement of the Sardian road has been noticed by travellers under the cliffs of Gallesus. All these roads, and others, are exhibited on the map in Leake's *Asia Minor*.

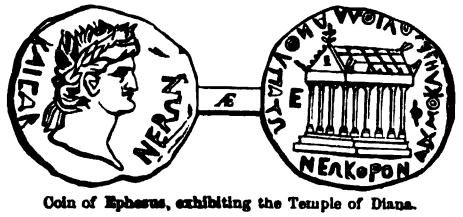
2. *Temple and Worship of Diana.* — Conspicuous at the head of the harbor of Ephesus was the great temple of Diana or Artemis, the tutelary divinity of the city. This building was raised on immense substructions, in consequence of the swampy nature of the ground. The earlier temple, which had been begun before the Persian war, was burnt down in the night when Alexander the Great

Plan of the Temple of Diana at Ephesus. (From Guhl's *Ephesiaca*.)

was born; and another structure, raised by the enthusiastic cooperation of all the inhabitants of "Asia," had taken its place. Its dimensions were very great. In length it was 425 feet, and in breadth 220. The columns were 127 in number and each of them was 60 feet high. In style, too it constituted an epoch in Greek art (Vitruv. iv. 1 since it was here first that the graceful Ionic order

Digitized by Google

was perfected. The magnificence of this sanctuary was a proverb throughout the civilized world. (Ὁ τῆς Ἀρτέμιδος ναὸς ἐν Ἐφέσῳ μόνος ἐστὶ θεῶν οἶκος, Philo Byz. *Spect. Mund.* 7.) All these circumstances give increased force to the architectural allegory in the great epistle which St. Paul wrote in this place (1 Cor. iii. 9–17), to the passages where imagery of this kind is used in the epistles addressed to Ephesus (Eph. ii. 19–22; 1 Tim. iii. 15, vi. 19; 2 Tim. ii. 19, 20), and to the words spoken to the Ephesian elders at Miletus (Acts xx. 32).



The chief points connected with the uproar at Ephesus (Acts xix. 23–41) are mentioned in the article DIANA; but the following details must be added. In consequence of this devotion, the city of Ephesus was called *νεωκόρος* (ver. 35) or "warden" of Diana. This was a recognized title applied in such cases, not only to individuals, but to communities. In the instance of Ephesus, the term is abundantly found both on coins and on inscriptions. Its *neocorate* was in fact, as the "town-clerk" said, proverbial. Another consequence of the celebrity of Diana's worship at Ephesus was, that a large manufactory grew up there of portable shrines (*ναοί*, ver. 24, the *ἀφιδρύματα* of Dionys. Halicarn. ii. 2, and other writers), which strangers purchased, and devotees carried with them on journeys or set up in their houses. Of the manufacturers engaged in this business, perhaps Alexander the "coppersmith" (*ὁ χαλκεύς*, 2 Tim. iv. 14) was one. The case of Demetrius the "silversmith" (*ἀργυροκοπῶν* in the Acts) is explicit. He was alarmed for his trade when he saw the gospel, under the preaching of St. Paul, gaining ground upon idolatry and superstition; and he spread a panic among the craftsmen of various grades, the *τεχνῖται* (ver. 24) or designers, and the *ἐργάται* (ver. 25) or common workmen, if this is the distinction between them.

3. *The Asiarchs.* — Public games were connected with the worship of Diana at Ephesus. The month of May was sacred to her. The uproar mentioned in the Acts very probably took place at this season. St. Paul was certainly at Ephesus about that time of the year (1 Cor. xvi. 8); and Demetrius might well be peculiarly sensitive if he found his trade failing at the time of greatest concourse. However this may be, the Asiarchs (Ἀσιάρχαι, A. V. "chiefs of Asia") were present (Acts xix. 31). These were officers appointed, after the manner of the ædiles at Rome, to preside over the games which were held in different parts of the province of Asia, just as other provinces had their *Galatarchs*, *Lyciarchs*, &c. Various cities would require the presence of these officers in turn. In the account of Polycarp's martyrdom at Smyrna (Hefele, *Patr. Apost.* p. 286) an important part is played by the Asiarch Philip. It is a remarkable proof of the influence which St. Paul had gained at Ephesus, that the Asiarchs took his side in the disturbance. See Dr. Wordsworth's note on Acts xix. 31. [ASIARCH.E.]

4. *Study and practice of magic.* — Not unconnected with the preceding subject was the remarkable prevalence of magical arts at Ephesus. This also comes conspicuously into view in St. Luke's narrative. The peculiar character of St. Paul's miracles (*δυνάμεις οὐ τὰς τυχούσας*, ver. 11) would seem to have been intended as antagonistic to the prevalent superstition. In illustration of the magical books which were publicly burnt (ver. 19) under the influence of St. Paul's preaching, it is enough here to refer to the Ἐφέσια γράμματα (mentioned by Plutarch and others), which were regarded as a charm when pronounced, and when written down were carried about as amulets. The faith in these mystic syllables continued, more or less, till the sixth century. See the Life of Alexander of Tralles in the *Dict. of Biog.* [See also Grotius and Wetstein on Acts xix. 19.]

5. *Provincial and municipal government.* — It is well known that Asia was a proconsular province and in harmony with this fact we find proconsuls (*ἀνθύπατοι*, "deputies," A. V.) specially mentioned (ver. 38). Nor is it necessary to inquire here whether the plural in this passage is generic, or whether the governors of other provinces were present in Ephesus at the time. Again we learn from Pliny (v. 31) that Ephesus was an assize-town (*forum* or *conventus*); and in the sacred narrative (ver. 38) we find the court-days alluded to as actually being held (*ἀγόραιοι ἄγονται*, A. V. "the law is open") during the uproar; though perhaps it is not absolutely necessary to give the expression this exact reference as to time (see Wordsworth). Ephesus itself was a "free city," and had its own assemblies and its own magistrates. The senate (*γερουσία* or *βουλή*) is mentioned, not only by Strabo, but by Josephus (*Ant.* xiv. 10, § 25, xvi. 6, §§ 4, 7); and St. Luke, in the narrative before us, speaks of the *δῆμος* (vv. 30, 33, A. V. "the people") and of its customary assemblies (*ἐννόμῳ ἐκκλησίᾳ*, vv. 39, A. V. "a lawful assembly"). That the tumultuary meeting which was gathered on the occasion in question should take place in the theatre (vv. 29, 31) was nothing extraordinary. It was at a meeting in the theatre at Cæsarea that Agrippa I. received his death-stroke (Acts xii. 23), and in Greek cities this was often the place for large assemblies (Tac. *Hist.* ii 80; Val. Max. ii. 2). We even find conspicuous mention made of one of the most important municipal officers of Ephesus, the "Town-Clerk" (*γραμματεύς*) or keeper of the records, whom we know from other sources to have been a person of great influence and responsibility.

It is remarkable how all these political and religious characteristics of Ephesus which appear in the sacred narrative, are illustrated by inscriptions and coins. An *ἀρχεῖον* or state-paper office is mentioned on an inscription in Chishull. The *γραμματεύς* frequently appears; so also the Ἀσιάρχαι and *ἀνθύπατοι*. Sometimes these words are combined in the same inscription: see for instance Böckh. *Corp. Inscr.* 2999, 2994. The following is worth quoting at length, as containing also the words *δῆμος* and *νεωκόρος*: Ἡ φιλοσέβαστος Ἐφεσίων βουλὴ καὶ ὁ νεωκόρος δῆμος καθιέρωσαν ἐπὶ ἀνθυπάτου Πεδουκαίου Πρεισκείνου ψηφισαμένου Τιβ. Κλ. Ἰταλικοῦ τοῦ γραμματέως τοῦ δήμου. 2966. The coins of Ephesus

Digitized by Google

are full of allusions to the worship of Diana in various aspects. The word νεωκόρος is of frequent occurrence. That which is given above has also the word ἀνθύπατος: it exhibits an image of the temple, and, bearing as it does, the name and head of Nero, it must have been struck about the time of St. Paul's stay in Ephesus.

We should enter on doubtful ground if we were to speculate on the Gnostic and other errors which grew up at Ephesus in the later apostolic age, and which are foretold in the address at Miletus, and indicated in the Epistle to the Ephesians, and more distinctly in the Epistles to Timothy. It is more to our purpose if we briefly put down the actual facts recorded in the N. T. as connected with the rise and early progress of Christianity in this city.

That Jews were established there in considerable numbers is known from Josephus (*ll. c.*), and might be inferred from its mercantile eminence: but it is also evident from Acts ii. 9, vi. 9. In harmony with the character of Ephesus as a place of concourse and commerce, it is here, and here only, that we find disciples of John the Baptist explicitly mentioned after the ascension of Christ (Acts xviii. 25, xix. 3). The case of Apollos (xviii. 24) is an exemplification further of the intercourse between this place and Alexandria. The first seeds of Christian truth were possibly sown at Ephesus immediately after the Great Pentecost (Acts ii.) Whatever previous plans St. Paul may have entertained (xvi. 6), his first visit was on his return from the second missionary circuit (xviii. 19–21); and his stay on that occasion was very short: nor is there any proof that he found any Christians at Ephesus; but he left there Aquila and Priscilla (ver. 19), who both then and at a later period (2 Tim. iv. 19) were of signal service. In St. Paul's own stay of more than two years (xix. 8, 10, xx. 31), which formed the most important passage of his third circuit, and during which he labored, first in the synagogue (xix. 8), and then in the school of Tyrannus (ver. 9), and also in private houses (xx. 20), and during which he wrote the First Epistle to the Corinthians, we have the period of the chief evangelization of this shore of the Ægean. The direct narrative in Acts xix. receives but little elucidation from the Epistle to the Ephesians, which was written several years after from Rome; but it is supplemented in some important particulars (especially as regards the Apostle's personal habits of self-denial, xx. 34) by the address at Miletus. This address shows that the church at Ephesus was thoroughly organized under its presbyters. At a later period TIMOTHY was set over them, as we learn from the two epistles addressed to him. Among St. Paul's other companions, two, Trophi-

View of the Theatre at Ephesus. (From Laborde.)

mus and Tychicus, were natives of Asia (xx. 4), and the latter probably (2 Tim. iv. 12), the former certainly (Acts xxi. 29), natives of Ephesus. In the same connection we ought to mention Onesiphorus (2 Tim. i. 16–18) and his household (iv. 19). On the other hand must be noticed certain specified Ephesian antagonists of the Apostle, the sons of Sceva and his party (Acts xix. 14), Hymenæus and Alexander (1 Tim. i. 20; 2 Tim. iv. 14), and Phygellus and Hermogenes (2 Tim. i. 15).

The site of ancient Ephesus has been visited and examined by many travellers during the last 200 years; and descriptions, more or less copious, have been given by Pococke, Tournefort, Spon and Wheler, Chandler, Poujoulat, Prokesch, Beaujour, Schubert, Arundell, Fellows, and Hamilton. The fullest accounts are, among the older travellers, in Chandler, and among the more recent, in Hamilton. Some views are given in the second volume of the *Ionian Antiquities*, published by the Dilettanti Society. Leake, in his *Asia Minor*, has a discussion on the dimensions and style of the Temple. The whole place is now utterly desolate, with the exception of the small Turkish village at *Ayasaluk*. The ruins are of vast extent, both on Coressus and on the plain; but there is great doubt as to many topographical details. In Kiepert's *Hellas* is a map, more or less conjectural, the substance of which will be found in the *Dict. of Geog.* s. v. *Ephesus*. Guhl's plans also are mostly from Kiepert.

It is satisfactory, however, that the position of the theatre on Mount Prion is absolutely certain. Fellows says it must have been one of the largest in the world. A view of it, from Laborde, is given above. The situation of the temple is doubtful.

Digitized by Google

but it probably stood where certain large masses remain on the low ground, full in view of the theatre. The disappearance of the temple may easily be accounted for, partly by the rising of the soil, and partly by the incessant use of its materials for mediæval buildings. Some of its columns are said to be in St. Sophia at Constantinople, and even in the cathedrals of Italy.

To the works above referred to must be added, Perry, *De rebus Ephesiorum* (Gött. 1837), a slight sketch; Guhl, *Ephesiaca* (Berl. 1843), a very elaborate work; Hemsen's *Paulus* (Gött. 1830), which contains a good chapter on Ephesus; Biscoe *On the Acts* (Oxf. 1829), pp. 274–285; Mr. Akerman's paper on the Coins of Ephesus in the *Trans. of the Numismatic Soc.*, 1841; Gronov. *Antiq. Græc.* vii. 387–401; and an article by Ampère in the *Rev. des Deux Mondes* for January 1842.

An elaborate work on Ephesus is understood to be in preparation by Mr. Falkener [since published, Lond. 1862]. J. S. H.

* The Apostle Paul in all probability wrote his Epistle to the Galatians at Ephesus, during his sojourn of nearly three years in that city (Acts xx. 31). [GALATIANS, EPISTLE TO THE.] His sojourn there for so long a time illustrates what appears to have been a rule of the earliest missionaries, and that was to plant the gospel first in the principal towns, and then from these centres to extend the knowledge of it to other regions. Writing to the believers at Thessalonica, the most populous place in northern Greece, Paul commends them, because from them had "sounded out the word of the Lord not only in Macedonia and Achaia, but also in every (other) place" with which travel and commerce connected that metropolis (1 Thess. i. 8). Ephesus held a similar rank in relation to the adjacent parts of Asia Minor (Acts xix. 10). The church at Ephesus was one of the seven churches to which the Apostle John at a subsequent period sent messages from Patmos (Rev. ii. 1 ff.). How sadly fulfilled were Paul's predictions respecting the corruptions which should appear in this church after his death (Acts xx. 28 ff.), we learn from its condition as described by John (Rev. ii. 1–6). [NICOLAITANS.] For the import and teachings of the communication which the Spirit sent through John to the church at Ephesus, see Trench's *Comm. on the Epistles to the Seven Churches in Asia*, and Prof. Stuart's *Commentary on the Apocalypse*.

Forbiger (*Handb. der alten Geogr.* ii. 188 ff.) cites the principal passages in the classical writers which illustrate the rank and earlier history of this capital of Roman Asia. There are articles on "Ephesus" in Pauly's *Real-Encyk.* by Westermann, and in Herzog's *Real-Encyk.* by Arnold. Lewin furnishes a sketch at some length of proconsular Asia and Ephesus its capital (*Life and Epistles of St. Paul*, i. 344–365). The incidents relating to Paul's life and labors in that city are drawn out in chap. viii. of Howson's *Scenes from the Life of St. Paul, and their Religious Lessons* (Lond. 1866), reprinted by the American Tract Society (Boston, 1867). See also Conybeare and Howson's *Life and Letters of St. Paul*, ii. 80 ff. (Amer. ed.).

The approach of the West to the East in the assimilating power of its commerce, arts, and general civilization brings with it strange innovations. A railroad at the present time connects the Apocalyptic places, Smyrna and Ephesus, with each other. "By the railway," says Pressensé (*Land of the Gospel*, p. 215), "we made the journey in two hours. It crosses a smiling, fertile valley, lying between green mountains, crowned not far from Ephesus by a fine glacier. Numerous herds are startled into flight at the whistle of the engine; several slow caravans pass before us, as if to draw the contrast between the antique locomotion of the desert world and the unbridled haste of a more advanced civilization." H.

EPH'LAL (אֶפְלָל [*judgment*]: Ἀφαμήλ: Alex. Οφλαδ; [Ald. with 8 MSS. Οφλδλ:] *Ophlal*), a descendant of Judah, of the family of Hezron and of Jerahmeel (1 Chr. ii. 37).

EPHOD (אֵפוֹד), a sacred vestment originally appropriate to the high-priest (Ex. xxviii. 4), but afterwards worn by ordinary priests (1 Sam. xxii. 18), and deemed characteristic of the office (1 Sam. ii. 28, xiv. 3; Hos. iii. 4). For a description of the robe itself see HIGH-PRIEST. A kind of ephod was worn by Samuel (1 Sam. ii. 18), and by David when he brought the ark to Jerusalem (2 Sam vi. 14; 1 Chr. xv. 27); it differed from the priestly ephod in material, being made of ordinary linen (*bad*), whereas the other was of fine linen (*shesh*); it is noticeable that the LXX. does not give ἐπωμίς or Ἐφούδ in the passages last quoted, but terms of more general import, στολὴ ἑξαλλος, στολὴ βυσσίνη. Attached to the ephod of the high-priest was the breastplate with the Urim and Thummim; this was *the* ephod κατ' ἐξοχήν, which Abiathar carried off (1 Sam. xxiii. 6) from the tabernacle at Nob (1 Sam. xxi. 9), and which David consulted (1 Sam. xxiii. 9, xxx. 7). The importance of the ephod as the receptacle of the breastplate led to its adoption in the idolatrous forms of worship instituted in the time of the Judges (Judg. viii. 27, xvii. 5, xviii. 14 ff.). The amount of gold used by Gideon in making his ephod (Judg. viii. 26) has led Gesenius (*Thes.* p. 135), following the Peshito version, to give the word the meaning of an idol-image, as though that and not the priest was clothed with the ephod; but there is no evidence that the idol was so invested, nor does such an idea harmonize with the general use of the ephod. The ephod itself would require a considerable amount of gold (Ex. xxviii. 6 ff., xxxix. 2 ff.); but certainly not so large a sum as is stated to have been used by Gideon; may we not therefore assume that to *make an ephod* implied the introduction of a new system of worship with its various accessories, such as the graven image, which seems from the prominence assigned to it in Judg. xviii. 31 to represent the Urim and Thummim, the molten image, and the Teraphim (xvii. 4, 5), which would require a large consumption of metal?

W. L. B

E'PHOD (אֵפֹד [*ephod* or *image*]: Ἐφούλ, Alex. Ουφιδ: *Ephod*). Hanniel the son of Ephod, as head of the tribe of Manasseh, was one of the men appointed to assist Joshua and Eleazar in the apportionment of the land of Canaan (Num. xxxiv. 23).

E'PHRAIM [*Heb.* Ephra'im] (אֶפְרַיִם: Ἐφραΐμ; Joseph. Ἐφραΐμης: *Ephraim*), the second son of JOSEPH by his wife Asenath. He was born during the seven years of plenteousness, and an allusion to this is possibly latent in the name, though it may also allude to Joseph's increasing family: "The name of the second he called Ephraim

(i. e. double fruitfulness), for God hath caused me to be fruitful (הִפְרַנִי, *hiphrani*) in the land of my affliction" (Gen. xli. 52, xlvi. 20).[a]

The first indication we have of that ascendency over his elder brother Manasseh, which at a later period the tribe of Ephraim so unmistakably possessed, is in the blessing of the children by Jacob, Gen. xlviii. — a passage on the age and genuineness of which the severest criticism has cast no doubt (Tuch, *Genesis*, p. 548; Ewald, i. 534, note). Like his own father, on an occasion not dissimilar, Jacob's eyes were dim so that he could not see (xlviii. 10, comp. xxvii. 1). The intention of Joseph was evidently that the right hand of Jacob should convey its ampler blessing to the head of Manasseh, his first-born, and he had so arranged the young men. But the result was otherwise ordained. Jacob had been himself a younger brother, and his words show plainly that he had not forgotten this, and that his sympathies were still with the younger of his two grandchildren. He recalls the time when he was flying with the birthright from the vengeance of Esau; the day when, still a wanderer, God Almighty had appeared to him at "Luz in the land of Canaan," and blessed him in words which foreshadowed the name of[b] Ephraim; the still later day when the name of Ephrath[c] became bound up with the sorest trial of his life (xlviii. 7, xxxv. 16). And thus, notwithstanding the prearrangement and the remonstrance of Joseph, for the second time in that family, the younger brother was made greater than the elder — Ephraim was set before Manasseh (xlviii. 19, 20).

Ephraim would appear at that time to have been about 21 years old. He was born before the beginning of the seven years of famine, towards the latter part of which Jacob had come to Egypt, 17 years before his death (Gen. xlvii. 28). Before Joseph's death Ephraim's family had reached the third generation (Gen. l. 23), and it must have been about this time that the affray mentioned in 1 Chr. vii. 21 occurred, when some of the sons were killed on a plundering expedition along the sea-coast to rob the cattle of the men of Gath, and when Ephraim named a son Beriah, to perpetuate the memory of the disaster which had fallen on his house. [BERIAH.] Obscure as is the interpretation of this fragment, it enables us to catch our last glimpse of the patriarch, mourning inconsolable in the midst of the circle of his brethren, and at last commemorating his loss in the name of the new child, who, unknown to him, was to be the progenitor of the most illustrious of all his descendants — Jehoshua, or Joshua, the son of Nun (1 Chr. vii. 27; see Ewald, i. 491). To this early period, too, must probably be referred the circumstance alluded to in Ps. lxxviii. 9 when the "children of Ephraim, carrying slack bows,[d] turned back in the day of battle." Certainly no instance of such behavior is recorded in the later history.

The numbers of the tribe do not at once fulfill the promise of the blessing of Jacob. At the census in the wilderness of Sinai (Num. i. 32, 33, ii. 19) its numbers were 40,500, placing it at the head of the children of Rachel, Manasseh's number being 32,200, and Benjamin's 35,400. But forty years later, on the eve of the conquest (Num. xxvi. 37), without any apparent cause, while Manasseh had advanced to 52,700, and Benjamin to 45,600, Ephraim had decreased to 32,500, the only smaller number being that of Simeon, 22,200. At this period the families of both the brother tribes are enumerated, and Manasseh has precedence over Ephraim in order of mention. During the march through the wilderness the position of the sons of Joseph and Benjamin was on the west side of the tabernacle (Num. ii. 18–24), and the prince of Ephraim was Elishama the son of Ammihud (Num. i. 10).

It is at the time of the sending of the spies that we are first introduced to the great hero to whom the tribe owed much of its subsequent greatness. The representative of Ephraim on this occasion was "Oshea the son of Nun," whose name was at the termination of the affair changed by Moses to the more distinguished form in which it is familiar to us. As among the founders of the nation Abram had acquired the name of Abraham, and Jacob of Israel, so Oshea, "help," became Jehoshua or Joshua, "the help of Jehovah" (Ewald, ii. 306).

Under this great leader, and in spite of the smallness of its numbers, the tribe must have taken a high position in the nation, to judge from the tone which the Ephraimites assumed on occasions shortly subsequent to the conquest. These will be referred to in their turn.

According to the present arrangement of the records of the book of Joshua — the "Domesday book of Palestine" — the two great tribes of Judah and Joseph (Ephraim and Manasseh) first took their inheritance; and after them, the seven other tribes entered on theirs (Josh. xv., xvi., xvii., xviii. 5). The boundaries of the portion of Ephraim are given in xvi. 1–10. The passage is evidently in great disorder, and in our ignorance of the landmarks, and of the force of many of the almost technical terms with which these descriptions abound, it is unfortunately impossible to arrive at more than an approximation to the case. The south boundary was coincident for part of its length with the north boundary of Benjamin. Commencing at the Jordan, at the reach opposite Jericho,[e] it ran

[a] Josephus (*Ant.* ii. 6, § 1) gives the derivation of the name somewhat differently — "restorer, because he was restored to the freedom of his forefathers;" ἀποδιδούς . . . διὰ τὸ ἀποδοθῆναι κτλ.

[b] "I will make thee fruitful," מַפְרְךָ, *Maphrecha*, Gen. xlviii. 4; "Be thou fruitful," פְּרֵה, *Phreh*, xxxv. 11; both from the same root as the name *Ephraim*.

[c] There seems to have been some connection between Ephrath, or Bethlehem, and Ephraim, the clew to which is now lost (Ewald, *Gesch.* i. 493, note).

The expression "Ephrathite" is generally applied as a native of Ephrath, *i. e.* Bethlehem; but there are some instances of its meaning an Ephraimite. These are 1 Sam. i. 1; 1 K. xi. 26, in both of which the word is accurately transferred to our version. But in Judg. xii. 5, where the Hebrew word is the same, and with the definite article (הָאֶפְרָתִי), it is incorrectly rendered "an Ephraimite." In the other occurrences of the word "Ephraimite" in vv. 4, 5, 6 of the same chapter, the Hebrew is "Ephraim." This narrative raises the curious inquiry, which we have no means of satisfying, whether the Ephraimites had not a peculiar accent or *patois* — similar to that which in later times caused "the speech" of the Galileans to "betray" them to the inhabitants of Jerusalem.

[d] This is the rendering of Ewald.

[e] The expression "Jordan-Jericho" is a common one (Num. xxvi. 3, 63; xxxiii. 48, &c.): the "by" or "near" in the A. V. has no counterpart there.

Digitized by Google

to the "water of Jericho," probably the *'Ain Dûk* or *'Ain Sultân*; thence by one of the ravines, the *Wady Harith* or *W. Suweinit*, it ascended through the wilderness — *Midbar*, the uncultivated waste hills — to Mount Bethel and Luz; and thence by Ataroth, "the Japhletite," Bethhoron the lower, and Gezer — all with one exception unknown — to the Mediterranean, probably about Joppa. This agrees with the enumeration in 1 Chr. vii., in which Bethel is given as the eastern, and Gezer — somewhere about *Ramleh* — as the western limit. The general direction of this line is N. E. by E. In Josh. xvi. 8, we probably have a fragment of the northern boundary (comp. xvii. 10), the torrent Kanah being the *Nahr el-Akhdar* just below the ancient Cæsarea. But it is very possible that there never was any definite subdivision of the territory assigned to the two brother tribes. Such is certainly the inference to be drawn from the very old fragment preserved in Josh. xvii. 14–18, in which the two are represented as complaining that only one portion had been allotted to them. At any rate, if any such subdivision did exist, it is not possible now to make out what it was, except, generally, that Ephraim lay to the south and Manasseh to the north. Among the towns named as Manasseh's were Beth-shean in the Jordan valley, Endor on the slopes of the "Little Hermon," Taanach on the north side of Carmel, and Dor on the sea-coast south of the same mountain. Here the boundary — the north boundary — joined that of Asher, which dipped below Carmel to take in an angle of the plain of Sharon: N. and N. W. of Manasseh lay Zebulun and Issachar respectively. The territory thus allotted to the "house of Joseph" may be roughly estimated at 55 miles from E. to W. by 70 from N. to S., a portion about equal in extent to the counties of Norfolk and Suffolk [England] combined. But though similar in size, nothing can be more different in its nature from those level counties than this broken and hilly tract. Central Palestine consists of an elevated district which rises from the flat ranges of the wilderness on the south of Judah, and terminates on the north with the slopes which descend into the great plain of Esdraelon. On the west a flat strip separates it from the sea, and on the east another flat strip forms the valley of the Jordan. Of this district the northern half was occupied by the great tribe we are now considering. This was the *Har-Ephraim*, the "Mount [hill-country of] Ephraim," a district which seems to extend as far south as Ramah and Bethel (1 Sam. i. 1, vii. 17; 2 Chr. xiii. 4, 19, compared with xv. 8), places but a few miles north of Jerusalem, and within the limits of Benjamin. In structure it is limestone — rounded hills separated by valleys of denudation, but much less regular and monotonous than the part more to the south, about and below Jerusalem; with "wide plains in the heart of the mountains, streams of running water, and continuous tracts of vegetation" (Stanley, p. 229). All travellers bear testimony to the "general growing richness" and beauty of the country in going northwards from Jerusalem, the "innumerable fountains" and streamlets, the villages more thickly scattered than anywhere in the south, the continuous cornfields and orchards, the moist, vapory atmosphere (Martineau, pp. 516, 521; Van de Velde, i. 386, 388; Stanley, p. 234, 235). These are the "precious things of the earth, and the fullness thereof," which are invoked on the "ten thousands of Ephraim" and the "thousands of Manasseh" in the blessing of Moses. These it is which, while Dan, Judah, and Benjamin are personified as lions and wolves, making their lair and tearing their prey among the barren rocks of the south, suggested to the Lawgiver, as they had done to the Patriarch before him, the patient "bullock" and the "bough by the spring, whose branches ran over the wall" as fitter images for Ephraim (Gen. xlix. 22; Deut. xxxiii. 17). And centuries after, when its great disaster had fallen on the kingdom of Israel, the same images recur to the prophets. The "flowers" are still there in the "olive valleys," "faded" though they be (Is. xxviii. 1). The vine is an empty unprofitable vine, whose very abundance is evil (Hos. x. 1); Ephraim is still the "bullock," now "unaccustomed to the yoke," but waiting a restoration to the "pleasant places" of his former "pasture" (Jer. xxxi. 18; Hos. ix. 13, iv. 16) — "the heifer that is taught and loveth to tread out the corn," the heifer with the "beautiful neck" (Hos. x. 11), or the "kine of Bashan on the mountain of Samaria" (Amos iv. 1).

The wealth of their possession had not the same immediately degrading effect on this tribe that it had on some of its northern brethren. [ASHER.] Various causes may have helped to avert this evil (1.) The central situation of Ephraim, in the highway of all communications from one part of the country to another. From north to south, from Jordan to the Sea — from Galilee, or still more distant Damascus, to Philistia and Egypt — these roads all lay more or less through Ephraim, and the constant traffic along them must have always tended to keep the district from sinking into stagnation. (2.) The position of Shechem, the original settlement of Jacob, with his well and his "parcel of ground," with the two sacred mountains of Ebal and Gerizim, the scene of the impressive and significant ceremonial of blessing and cursing; and of Shiloh, from whence the division of the land was made, and where the ark remained from the time of Joshua to that of Eli; and further of the tomb and patrimony of Joshua, the great hero not only of Ephraim but of the nation — the fact that all these localities were deep in the heart of the tribe, must have made it always the resort of large numbers from all parts of the country — of larger numbers than any other place, until the establishment of Jerusalem by David. (3.) But there was a spirit about the tribe itself which may have been both a cause and a consequence of these advantages of position. That spirit, though sometimes taking the form of noble remonstrance and reparation (2 Chr. xxviii. 9–15), usually manifests itself in jealous complaint at some enterprise undertaken or advantage gained in which they had not a chief share. To Gideon (Judg. viii. 1), to Jephthah (xii. 1), and to David (2 Sam. xix. 41–43), the cry is still the same in effect — almost the same in words — "Why did ye despise us that our advice should not have been first had?" "Why hast thou served us thus, that thou calledst us not?" The unsettled state of the country in general, and of the interior of Ephraim in particular (Judg. ix.), and the continual incursions of foreigners, prevented the power of the tribe from manifesting itself in a more formidable manner than by these murmurs, during the time of the Judges and the first stage of the monarchy. Samuel, though a Levite, was a native of Ramah in Mount Ephraim, and Saul belonged to a tribe closely allied to the family of Joseph, so that during the priesthood of the former and the

Digitized by Google

reign of the latter the supremacy of Ephraim may be said to have been practically maintained. Certainly in neither case had any advantage been gained by their great rival in the south. Again, the brilliant successes of David and his wide influence and religious zeal kept matters smooth for another period. even in the face of the blow given to both Shechem and Shiloh by the concentration of the civil and ecclesiastical capitals at Jerusalem. Twenty thousand and eight hundred of the choice warriors of the tribe, "men of name throughout the house of their father," went as far as Hebron to make David king over Israel (1 Chr. xii. 30). Among the officers of his court we find more than one Ephraimite (1 Chr. xxvii. 10, 14), and the attachment of the tribe to his person seems to have been great (2 Sam. xix. 41–43). But this could not last much longer, and the reign of Solomon, splendid in appearance but oppressive to the people, developed both the circumstances of revolt, and the leader who was to turn them to account. Solomon saw through the crisis, and if he could have succeeded in killing Jeroboam as he tried to do (1 K. xi. 40), the disruption might have been postponed for another century. As it was, the outbreak was deferred for a time, but the irritation was not allayed, and the insane folly of his son brought the mischief to a head. Rehoboam probably selected Shechem - the old capital of the country — for his coronation, in the hope that his presence and the ceremonial might make a favorable impression, but in this he failed utterly, and the tumult which followed shows how complete was the breach — "To your tents, O Israel! now see to thine own house, David!" Rehoboam was certainly not the last king of Judah whose chariot went as far north as Shechem, but he was the last who visited it as a part of his own dominion, and he was the last who, having come so far, returned unmolested to his own capital. Jehoshaphat escaped, in a manner little short of miraculous, from the risks of the battle of Ramoth-Gilead, and it was the fate of two of his successors, Ahaziah and Josiah — differing in everything else, and agreeing only in this — that they were both carried dead in their chariots from the plain of Esdraelon to Jerusalem.

Henceforward in two senses the history of Ephraim is the history of the kingdom of Israel, since not only did the tribe become a kingdom, but the kingdom embraced little besides the tribe. This is not surprising, and quite susceptible of explanation. North of Ephraim the country appears never to have been really taken possession of by the Israelites. Whether from want of energy on their part, or great stubbornness of resistance on that of the Canaanites, certain it is that of the list of towns from which the original inhabitants were not expelled, the great majority belong to the northern tribes, Manasseh, Asher, Issachar, and Naphtali. And in addition to this original defect there is much in the physical formation and circumstances of the upper portion of Palestine to explain why those tribes never took any active part in the kingdom. They were exposed to the inroads and seductions of their surrounding heathen neighbors — on one side the luxurious Phœnicians, on the other the plundering Bedouins of Midian; they were open to the attacks of Syria and Assyria from the north, and Egypt from the south; the great plain of Esdraelon, which communicated more or less with all the northern tribes, was the natural outlet of the no less natural high roads of the maritime plain from Egypt and the Jordan valley for the tribes of the East, and formed an admirable base of operations for an invading army.

But on the other hand the position of Ephraim was altogether different. It was one at once of great richness and great security. Her fertile plains and well-watered valleys could only be reached by a laborious ascent through steep and narrow ravines, all but impassable for an army. There is no record of any attack on the central kingdom, either from the Jordan valley or the maritime plain. On the north side, from the plain of Esdraelon, it was more accessible, and it was from this side that the final invasion appears to have been made. But even on that side the entrance was so difficult and so easily defensible — as we learn from the description in the book of Judith (iv. 6, 7) — that, had the kingdom of Samaria been less weakened by internal dissensions, the attacks even of the great Shalmaneser might have been resisted, as at a later date were those of Holofernes. How that kingdom originated, how it progressed, and how it fell, will be elsewhere considered. [ISRAEL, KINGDOM OF.] There are few things more mournful in the sacred story than the descent of this haughty and jealous tribe, from the culminating point at which it stood when it entered on the fairest portion of the Land of Promise — the chief sanctuary and the chief settlement of the nation within its limits, its leader the leader of the whole people — through the distrust which marked its intercourse with its fellows, while it was a member of the confederacy, and the tumult, dissension, and ungodliness which characterized its independent existence, down to the sudden captivity and total oblivion which closed its career. Judah had her times of revival and of recurring prosperity, but here the course is uniformly downward — a sad picture of opportunities wasted and personal gifts abused. "When Israel was a child, then I loved him, and called my son out of Egypt. . . . I taught Ephraim also to go, taking them by their arms, but they knew not that I healed them. I drew them with cords of a man, with bands of love . . . but the Assyrian shall be their king, because they refused to return. . . . How shall I give thee up, Ephraim? how shall I deliver thee, Israel? how shall I make thee as Admah? how shall I set thee as Zeboim?" (Hos. xi. 1–8). G.

E'PHRAIM (אֶפְרַיִם [*double fruitfulness*]: Ἐφραίμ: *Ephraim*). In "Baal-hazor which is 'by' Ephraim" was Absalom's sheep-farm, at which took place the murder of Amnon, one of the earliest precursors of the great revolt (2 Sam. xiii. 23). The Hebrew particle עִם, rendered above "by" (A. V. "beside"), always seems to imply actual proximity, and therefore we should conclude that Ephraim was not the tribe of that name, but a town. Ewald conjectures that it is identical with EPHRAIN, EPHRON, and OPHRAH of the O. T. and also with the EPHRAIM which was for a time the residence of our Lord (*Gesch.* iii. 219, note). But with regard to the three first names there is the difficulty that they are spelt with the guttural letter *ain*, which is very rarely exchanged for the *aleph*, which commences the name before us. There is unfortunately no clew to its situation. The LXX. make the following addition to verse 34: "And the watchman went and told the king, and said, I have seen men on the road of the Oronen (τῶν

Digitized by Google

ἐφραυήν, Alex τῶν ὀρέων) by the side of the mountain." Ewald considers this to be a genuine addition, and to refer to Beth-*horon*, N. W. of Jerusalem, off the Nablûs road, but the indication is surely too slight for such an inference. Any force it may have is against the identity of this Ephraim with that in John xi. 54, which was probably in the direction N. E. of Jerusalem. G.

EPHRAIM (Ἐφραΐμ: *Ephrem*; Cod. Amiat. *Efrem*), a city (Ε. λεγομένην πόλιν) "in the district near the wilderness" to which our Lord retired with his disciples when threatened with violence by the priests (John xi. 54). By the "wilderness" (ἔρημος) is probably meant the wild uncultivated hill-country N. E. of Jerusalem, lying between the central towns and the Jordan valley. In this case the conjecture of Dr. Robinson is very admissible that Ophrah and Ephraim are identical, and that their modern representation is *et-Taiyibeh*, a village on a conspicuous conical hill, commanding a view "over the whole eastern slope, the valley of the Jordan and the Dead Sea" (Rob. i. 444). It is situated 4 or 5 miles east of Bethel, and 16 from Jerusalem; a position agreeing tolerably with the indications of Jerome in the *Onomasticon* (*Ephraim, Ephron*), and is too conspicuous to have escaped mention in the Bible.[a] G.

EPHRAIM, GATE OF (שַׁעַר אֶפְרַיִם: πύλη Ἐφραΐμ: *porta Ephraim*), one of the gates of the city of Jerusalem (2 K. xiv. 13; 2 Chr. xxv. 23; Neh. viii. 16, xii. 39), doubtless, according to the oriental practice, on the side looking towards the locality from which it derived its name, and therefore at the north, probably at or near the position of the present "Damascus gate." [JERUSALEM.] G.

* **EPHRAIM, MOUNT** (Josh. xvii. 15; Judg. vii. 24; 1 Sam. i. 1, and often) must be taken collectively, *i. e.* not any single mount, as the English reader might suppose, but the hill-country, or high lands generally, which fill up the greater part of central Palestine on the west of the Jordan. [EPHRAIM.] See Rob. *Phys. Geogr.* p. 35. H.

EPHRAIM, THE WOOD OF (יַעַר אֶפְרַיִם: δρυμὸς Ἐφραΐμ: *saltus Ephraim*), a wood, or rather a forest (the word *ya'ar* implying dense growth), in which the fatal battle was fought between the armies of David and of Absalom (2 Sam. xviii. 6), and the entanglement in which added greatly to the slaughter of the latter (ver. 8). It would be very tempting to believe that the forest derived its name from the place near which Absalom's sheep-farm was situated (2 Sam. xiii. 23), and which would have been a natural spot for his head-quarters before the battle, especially associated as it was with the murder of Amnon. But the statements of xvii. 24, 26, and also the expression of xviii. 3, "that thou succor us out of the city," *c.* Mahanaim, allow no escape from the conclusion that the locality was on the east side of Jordan, though it is impossible to account satisfactorily for the presence of the name of Ephraim on that side of the river. The suggestion is due to Grotius that the name was derived from the slaughter of Ephraim at the fords of Jordan by the Gileadites under Jephthah (Judg. xii. 1, 4, 5); but that occurrence took place at the very brink of the river itself, while the city of Mahanaim and the wooded country must have lain several miles away from the stream and on the higher ground above the Jordan valley. Is it not at least equally probable that the forest derived its name from this very battle? The great tribe of Ephraim, though not specially mentioned in the transactions of Absalom's revolt, cannot fail to have taken the most conspicuous part in the affair, and the reverse was a more serious one than had overtaken the tribe for a very long time, and possibly combined with other circumstances to retard materially their rising into an independent kingdom. G.

EPHRAIMITE (אֶפְרָתִי: Ἐφραθίτης [Vat. -θει-]; Alex. ἐκ τοῦ Ἐφραιμ: *Ephrathaeus*). Of the tribe of Ephraim; elsewhere called "Ephrathite" (Judg. xii. 5). [EPHRAIM.] W. A. W.

EPHRAIN [*Hebrew*, Ephra'in] (עֶפְרוֹן, Ephron; *Keri*, עֶפְרַיִן: Ἐφρών: *Ephron*), a city of Israel, which with its dependent hamlets (בנות = "daughters," A. V. "towns") Abijah and the army of Judah captured from Jeroboam (2 Chr. xiii. 19). It is mentioned with Bethel and Jeshanah, but the latter not being known, little clew to the situation of Ephrain is obtained from this passage. It has been conjectured that this Ephrain or Ephron is identical with the Ephraim by which Absalom's sheep-farm of Baal-hazor was situated; with the city called Ephraim near the wilderness in which our Lord lived for some time [John xi. 54]; and with Ophrah (עָפְרָה), a city of Benjamin, apparently not far from Bethel (Josh. xviii. 23; comp. Joseph. *B. J.* iv. 9, § 9), and which has been located by Dr. Robinson (i. 447), with some probability, at the modern village of *et-Taiyibeh*. But nothing more than conjecture can be arrived at on these points. (See Ewald, *Geschichte*, iii. 219, 466, v. 365; Stanley, p. 214.) G.

EPH'RATAH, or EPH'RATH (אֶפְרָתָה, or אֶפְרָת [*fruitful*, Dietr.]: Ἐφραθά and Ἐφράθ; [Alex. in ver. 19, φραθ:] *Ephrata*, Jerome). 1. Second wife of Caleb the son of Hezron, mother of Hur, and grandmother of Caleb the spy, according to 1 Chr. ii. 19, 50, and probably 24, and iv. 4. [CALEB-EPHRATAH.]

2. The ancient name of Bethlehem-Judah, as is manifest from Gen. xxxv. 16, 19, xlviii. 7, both which passages distinctly prove that it was called Ephrath or Ephratah in Jacob's time, and use the regular formula for adding the modern name, הִוא בֵּית־לָחֶם, *which is Bethlehem*, comp. *e. g.* Gen. xxiii. 2, xxxv. 27; Josh. xv. 10. It cannot therefore have derived its name from Ephratah, the mother of Hur, as the author of *Quaest. Hebr. in Paralip.* says, and as one might otherwise have supposed from the connection of her descendants, Salma and Hur, with Bethlehem, which is somewhat obscurely intimated in 1 Chr. ii. 50, 51, iv. 4. It seems obvious therefore to infer that, on the

[a] * For the identification of this Ephraim as the place of the Saviour's retreat, see especially Dr. Robinson in *Bibl. Sacra*, ii. 398; and for its importance in harmonizing the Gospels see his *Greek Harmony* § 98. H

contrary, Ephratah the mother of Hur was so called from the town of her birth, and that she probably was the owner of the town and district. In fact, that her name was really gentilitious. But if this be so, it would indicate more communication between the Israelites in Egypt and the Canaanites than is commonly supposed. When, however, we recollect that the land of Goshen was the border country on the Palestine side; that the Israelites in Goshen were a tribe of sheep and cattle drovers (Gen. xlvii. 3); that there was an easy communication between Palestine and Egypt from the earliest times (Gen. xii. 10, xvi. 1, xxi. 21, &c.); that there are indications of communications between the Israelites in Egypt and the Canaanites, caused by their trade as keepers of cattle, 1 Chr. vii. 21, and that in the nature of things the owners or keepers of large herds and flocks in Goshen would have dealings with the nomad tribes in Palestine, it will perhaps seem not impossible that a son of Hezron may have married a woman having property in Ephratah. Another way of accounting for the connection between Ephratah's descendants and Bethlehem, is to suppose that the elder Caleb was not really the son of Hezron, but merely reckoned so as the head of a Hezronite house. He may in this case have been one of an Edomitish or Horite tribe, an idea which is favored by the name of his son Hur [CALEB], and have married an Ephrathite. Caleb the spy may have been their grandson. It is singular that "Salma the father of Bethlehem" should have married a Canaanitish woman. Could she have been of the kindred of Caleb in any way? If she were, and if Salma obtained Bethlehem, a portion of Hur's inheritance, in consequence, this would account for both Hur and Salma being called "father of Bethlehem." Another possible explanation is, that *Ephratah* may have been the name given to some daughter of Benjamin to commemorate the circumstance of Rachel his mother having died close to Ephrath. This would receive some support from the son of Rachel's other son Joseph being called *Ephraim*, a word of identical etymology, as appears from the fact that אֶפְרָתִי means indifferently an Ephrathite, i. e. *Bethlehemite* (Ruth i. 1, 2), or an *Ephraimite* (1 Sam. i. 1). But it would not account for Ephratah's descendants being settled at Bethlehem. The author of the *Quæst. Hebr. in Paralip.* derives *Ephrata* from *Ephraim*, "Ephrath, quia de Ephraim fuit." But this is not consistent with the appearance of the name in Gen. It is perhaps impossible to come to any certainty on the subject. It must suffice therefore to note, that in Gen., and perhaps in Chron., it is called *Ephrath* or *Ephrata;* in Ruth, *Bethlehem-Judah;* but the inhabitants, *Ephrathites;* in Micah (v. 2), *Bethlehem-Ephratah;* in Matt. ii. 6, *Bethlehem in the land of Juda.* Jerome, and after him Kalisch, observes that Ephratah, *fruitful*, has the same meaning as Bethlehem, *house of bread;* a view which is favored by Stanley's description of the neighboring corn-fields (*Sinai and Palestine*, p. 164). [BETHLEHEM.]

3. Gesenius thinks that in Ps. cxxxii. 6, *Ephratah* means *Ephraim.* A. C. H.

* If Ephratah stands for Ephraim (see No. 3 above) the territory of that name, it must refer especially to Shiloh, one of the former sanctuaries of the ark of the covenant in that tribe. Hupfeld explains Ephratah in this passage as an appellative, not a proper name, *i. e.* "fruitful," sc. field, put poetically for Beth-shemesh, like "field of wood" for Kirjath-jearim in the other line (*Die Psalmen* iv. 311 f.). The two places were near each other, and those searching for the lost ark after its capture by the Philistines (2 Sam. vi. 1 ff.) may have heard of it at one of the places, and have found it at the other (see the psalm). Hengstenberg insists (*Die Psalmen*, iv. 75 ff.) that Ephratah is Bethlehem in this place as elsewhere, and that David, who wrote the psalm, means that the ark, which he was removing to Mount Zion where it would be henceforth so accessible, might be said now to be "found," whereas, in his youth at Bethlehem they had only heard of it, as it were, by rumor. H.

EPHRATHITE (אֶפְרָתִי: Ἐφραθαῖος *Ephratæus*). 1. An inhabitant of Bethlehem (Ruth i. 2 [applied to ELIMELECH and his family]).

2. [1 Sam. i. 1, Ἐφραΐμ, Alex. Ἐφραθαιος; 1 K. xi. 26, Ἐφραθί (Vat. -θει).] An Ephraimite (1 Sam. i. 1 [Elkanah, father of Samuel]; Judg. xii. 5 [see p. 752, note c], &c.). A. C. H.

EPHRON (עֶפְרוֹן [*fawn-like*]: Ἐφρών: *Ephron*), the son of Zochar [Zohar, A. V.], a Hittite: the owner of a field which lay facing Mamre or Hebron, and of the cave therein contained, which Abraham bought from him for 400 shekels of silver (Gen. xxiii. 8–17, xxv. 9, xlix. 29, 30, l. 13). By Josephus (*Ant.* i. 14) the name is given as Ephraim; and the purchase-money 40 shekels.

* In the account of the negotiations between Ephron and Abraham for the purchase of the field of Machpelah, related with so much minuteness in Gen. xxiii. 3–18, we have a living picture of the ceremony and finesse for which the Orientals are so remarkable on such occasions. Dr. Thomson has an extended passage, in which he shows how exactly every part of that procedure is still exemplified in the dealings of buyers and sellers with each other among the modern Syrians (*Land and Book*, ii. 381–384). Hess, not taking into account this oriental trait, regards the compliments interchanged between the parties as seriously meant, and hence as evincive of rare generosity and disinterestedness (*Gesch. der Patriarchen*, i. 367–371). Wilkinson also (*Personal Names in the Bible*, p. 424) speaks of Ephron on this occasion as a model of true courtesy. This sale of Ephron to Abraham is "the first recorded legal contract in human history," and it relates to the last object of man's earthly care, the interment of the dead. H.

EPHRON (Ἐφρών: *Ephron*), a very strong city (πόλις μεγάλη ὀχυρὰ σφόδρα) on the east of Jordan between Carnaim (Ashteroth-Karnaim) and Beth-shean, attacked and demolished by Judas Maccabæus (1 Macc. v. 46–52; 2 Macc. xii. 27). From the description in the former of these two passages it appears to have been situated in a defile or valley, and to have completely occupied the pass. Its site has not been yet discovered. G.

EPHRON, MOUNT (הַר־עֶפְרוֹן: τὸ ὄρος Ἐφρών: *Mons Ephron*). The "cities of Mount Ephron" formed one of the landmarks on the northern boundary of the tribe of Judah (Josh. xv. 9), between the "water of Nephtoah" and Kirjath-jearim. As these latter are with great probability identified with *Ain Lifta* and *Kuriet el-Enab*, Mount Ephron is probably the range of hills on the west side of the *Wady Beit-Hanina* (traditional valley of the Terebinth), opposite *Lifta*.

Digitized by Google

which stands on the eastern side. It may possibly be the same place as EPHRAIN. G.

EPICURE'ANS, THE (Ἐπικούρειοι), derived their name from Epicurus (342–271 B. C.), a philosopher of Attic descent, whose "Garden" at Athens rivalled in popularity the "Porch" and the "Academy." The doctrines of Epicurus found wide acceptance in Asia Minor (*Lampsacus, Mitylene, Tarsus*, Diog. L. x. 1, 11 ff.) and Alexandria (Diog. L. *l. c.*), and they gained a brilliant advocate at Rome in Lucretius (95–50 B. C.). The object of Epicurus was to find in philosophy a practical guide to happiness (*ἐνέργεια . . . τὸν εὐδαίμονα βίον περιποιοῦσα*, Sext. Emp. *adv. Math.* xi. 169). True pleasure and not absolute truth was the end at which he aimed; experience and not reason the test on which he relied. He necessarily cast aside dialectics as a profitless science (Diog. L. x. 30, 31), and substituted in its place (as *τὸ κανονικόν*, Diog. L. x. 19) an assertion of the right of the senses, in the widest acceptation of the term, to be considered as the criterion of truth (*κριτήρια τῆς ἀληθείας εἶναι τὰς αἰσθήσεις καὶ τὰς προλήψεις* (general notions) *καὶ τὰ πάθη*). He made the study of physics subservient to the uses of life, and especially to the removal of superstitious fears (Lucr. i. 146 ff.); and maintained that ethics are the proper study of man, as leading him to that supreme and lasting pleasure which is the common object of all.

It is obvious that a system thus framed would degenerate by a natural descent into mere materialism; and in this form Epicurism was the popular philosophy at the beginning of the Christian era (cf. Diog. L. x. 5, 9). When St. Paul addressed "Epicureans and Stoics" (Acts xvii. 18) at Athens, the philosophy of life was practically reduced to the teaching of those two antagonistic schools, which represented in their final separation the distinct and complementary elements which the gospel reconciled. For it is unjust to regard Epicurism as a mere sensual opposition to religion. It was a necessary step in the development of thought, and prepared the way for the reception of Christianity, not only negatively but positively. It not only weakened the hold which polytheism retained on the mass of men by daring criticism, but it maintained with resolute energy the claims of the body to be considered a necessary part of man's nature coördinate with the soul, and affirmed the existence of individual freedom against the Stoic doctrines of pure spiritualism and absolute fate. Yet outwardly Epicurism appears further removed from Christianity than Stoicism, though essentially it is at least as near; and in the address of St. Paul (Acts xvii. 22 ff.) the affirmation of the doctrines of creation (v. 24), providence (v. 26), inspiration (v. 28), resurrection, and judgment (v. 31), appears to be directed against the cardinal errors which it involved.

The tendency which produced Greek Epicurism, when carried out to its fullest development, is peculiar to no age or country. Among the Jews it led to Sadduceeism [SADDUCEES], and Josephus appears to have drawn his picture of the sect with distinct regard to the Greek prototype (Joseph. *Ant.* xviii. 1, § 4; *B. J.* ii. 8, § 14; cf. *Ant.* x. 11, § 7, *de Epicureis*). In modern times the essay of Gassendi (*Syntagma Philosophiæ Epicuri*, Hag. Com. 1659) was a significant symptom of the restoration of sensationalism.

The chief original authority for the philosophy of Epicurus is Diogenes Laertius (lib. x.) who has preserved some of his letters and a list of his principal writings. The poem of Lucretius must be used with caution, and the notices in Cicero, Seneca, and Plutarch are undisguisedly hostile.

B. F. W.

EPIPH'ANES (1 Macc. i. 10, x. 1). [ANTIOCHUS EPIPHANES.]

EPIPHI (Ἐπιφί [Alex. once Επιφι.], 3 Macc. vi. 38), name of the eleventh month of the Egyptian Vague year, and the Alexandrian or Egyptian Julian year: Copt. ⲉⲡⲏⲡ; Arab. أبيب. In ancient Egyptian it is called "the third month [of] the season of the waters." [EGYPT.] The name Epiphi is derived from that of the goddess of the month, Apap-t (Lepsius, *Chron. d. Æg.* i. 141). The supposed derivation of the Hebrew month-name Abib from Epiphi is discussed in other articles. [CHRONOLOGY; MONTHS.] R. S. P.

EPISTLE. The Epistles of the N. T. are described under the names of the Apostles by whom, or the churches to whom, they were addressed. It is proposed in the present article to speak of the epistle or letter as a means of communication.

The use of written letters implies, it needs hardly be said, a considerable progress in the development of civilized life. There must be a recognized system of notation, phonetic or symbolic; men must be taught to write, and have writing materials at hand. In the early nomadic stages of society accordingly, like those which mark the period of the patriarchs of the O. T., we find no traces of any but oral communications. Messengers are sent instructed what to say from Jacob to Esau (Gen. xxxii. 3), from Balak to Balaam (Num. xxii. 5, 7, 16), bringing back in like manner a verbal, not a written answer (Num. xxiv. 12). The negotiations between Jephthah and the king of the Ammonites (Judg. xi. 12, 13) are conducted in the same way. It is still the received practice in the time of Saul (1 Sam. xi. 7, 9). The reign of David, bringing the Israelites, as it did, into contact with the higher civilization of the Phœnicians, witnessed a change in this respect also. The first recorded letter (ספר = "book;" comp. use of *βιβλίον*, Herod. i. 123) in the history of the O. T. was that which "David wrote to Joab, and sent by the hand of Uriah" (2 Sam. xi. 14), and this must obviously, like the letters that came into another history of crime (in this case also in traceable connection with Phœnician influence, 1 K. xxi. 8, 9), have been "sealed with the king's seal," as at once the guarantee of their authority, and a safeguard against their being read by any but the persons to whom they were addressed. The material used for the impression of the seal was probably the "clay" of Job xxxviii. 14. The act of sending such a letter is, however, preëminently, if not exclusively, a kingly act, where authority and secrecy were necessary. Joab, *e. g.* answers the letter which David had sent him after the old plan, and receives a verbal message in return. The demand of Benhadad and Ahab's answer to it are conveyed in the same way (1 K. xx. 2, 5). Written communications, however, become more frequent in the later history. The king of Syria sends a letter to the king of Israel (2 K. v. 5, 6). Elijah the prophet sends a

Digitized by Google

writing (מִכְתָּב) to Jehoram (2 Chr. xxi. 12). Hezekiah introduces a system of couriers like that afterwards so fully organized under the Persian kings (2 Chr. xxx. 6, 10; comp. Herod. viii. 98, and Esth. viii. 10, 14), and receives from Sennacherib the letter which he "spreads before the Lord" (2 K. xix. 14). Jeremiah writes a letter to the exiles in Babylon (Jer. xxix. 1, 3). The books of Ezra and Nehemiah contain or refer to many such documents (Ezr. iv. 6, 7, 11, v. 6, vii. 11; Neh. ii. 7, 9, vi. 5). The stress laid upon the "open letter" sent by Sanballat (Neh. vi. 5) indicates that this was a breach of the customary etiquette of the Persian court. The influence of Persian, and yet more, perhaps, that of Greek civilization, led to the more frequent use of letters as a means of intercourse. Whatever doubts may be entertained as to the genuineness of the epistles themselves, their occurrence in 1 Macc. xi. 30, xii. 6, 20, xv. 1, 16; 2 Macc. xi. 16, 34, indicates that they were recognized as having altogether superseded the older plan of messages orally delivered. The two stages of the history of the N. T. present in this respect a very striking contrast. The list of the Canonical Books shows how largely epistles were used in the expansion and organization of the Church. Those which have survived may be regarded as the representatives of many others that are lost. We are perhaps too much in the habit of forgetting that the absence of all mention of written letters from the gospel history is just as noticeable. With the exception of the spurious letter to Abgarus of Edessa (Euseb. *H. E.* i. 13) there are no epistles of Jesus. The explanation of this is to be found partly in the circumstances of one who, known as the "carpenter's son," was training as his disciples those who, like himself, belonged to the class of laborers and peasants, partly in the fact that it was by personal, rather than by written, teaching that the work of the prophetic office, which he reproduced and perfected, had to be accomplished. The epistles of the N. T. in their outward form are such as might be expected from men who were brought into contact with Greek and Roman customs, themselves belonging to a different race, and so reproducing the imported style with only partial accuracy. They begin (the Epistle to the Hebrews and 1 John excepted) with the names of the writer, and of those to whom the epistle is addressed. Then follows the formula of salutation (analogous to the εὖ πράττειν of Greek, the *S., S. D.*, or *S. D. M.*, *salutem, salutem dicit, salutem dicit multam*, of Latin correspondence) — generally in St. Paul's epistles in some combination of the words χάρις, ἔλεος, εἰρήνη: in others, as in Acts xv. 23, Jam. i. 1, with the closer equivalent of χαίρειν. Then the letter itself commences, in the first person, the singular and plural being used, as in the letters of Cicero, indiscriminately (comp. 1 Cor. ii.; 2 Cor. i. 8, 15; 1 Thess. iii. 1, 2; and *passim*). Then when the substance of the letter has been completed, questions answered, truths enforced, come the individual messages, characteristic, in St. Paul's epistles especially, of one who never allowed his personal affections to be swallowed up in the greatness of his work. The conclusion in this case was probably modified by the fact that the letters were dictated to an amanuensis. When he had done his work, the Apostle took up the pen or reed, and added, in his own large characters (Gal. vi. 11), the authenticating autograph, sometimes with special stress on the fact that this was his writing (1 Cor. xvi. 21; Gal. vi. 11; Col. iv. 18; 2 Thess. iii. 17), always with one of the closing formulæ of salutation, "Grace be with thee" — "the grace of our Lord Jesus Christ be with your spirit." In one instance, Rom. xvi. 22, the amanuensis in his own name adds his salutation. In the ἐρῶσσο of Acts xxiii. 30, the ἔρρωσθε of Acts xv. 29, we have the equivalents to the *vale, valete*, which formed the customary conclusion of Roman letters. It need hardly be said that the fact that St. Paul's epistles were dictated in this way accounts for many of their most striking peculiarities, the frequent digressions, the long parentheses, the vehemence and energy as of a man who is speaking strongly as his feelings prompt him rather than writing calmly. An allusion in 2 Cor. iii. 1 brings before us another class of letters which must have been in frequent use in the early ages of the Christian church, the ἐπιστολαὶ συστατικαί, by which travellers or teachers were commended by one church to the good offices of others. Other persons (there *may be* a reference to Apollos, Acts xviii. 27) had come to the Church of Corinth relying on these. St. Paul appeals to his converts, as the ἐπιστολὴ Χριστοῦ (2 Cor. iii. 3), written "not with ink but with the spirit of the living God." For other particulars as to the material and implements used for epistles, see WRITING.

E. H. P.

* Under this head we may properly notice a few additional particulars: —

Paul's habit of authenticating his letters, referred to above, enables us to trace a correspondence between 2 Thess. iii. 17 and Gal. vi. 11 which is very striking. The Apostle speaks in the former passage not only of adding there the salutation by his own hand, and as a sign (σημεῖον) or attestation of the genuineness of the letter, but of this attestation (οὕτω γράφω, *so I write*) as distinguished by a well-known peculiarity. From Gal. vi. 11, now, we learn incidentally what this peculiarity was, namely, the size of the written characters or letters with which he was accustomed to write (πηλίκοις γράμμασιν, *with how large letters*, not *how large a letter*, A. V.), as compared with men's ordinary writing. Meyer, it is true, thinks that Paul did not write in his own usual way in that instance, but employed large letters or capitals because he would emphasize that particular paragraph of the letter (Gal. vi. 11–18). With that view, the inference which has been suggested falls away of course. But really there is no apparent reason for making any such distinction between that part of the letter and other parts.

Paul's mode of epistolary salutation is similar indeed to the χαίρειν or εὖ πράττειν of the Greeks (as remarked above), but differs from it at the same time in a peculiar manner. This Apostle never employs the classical form, but invariably substitutes for it χάρις καὶ εἰρήνη, χάρις, ἔλεος, εἰρήνη, or a similar combination. Such a rejection of the customary phrase, and the invention of a new one, cannot be otherwise than intentional. It has been suggested that the Greek formula, as containing a virtual prayer to the heathen gods, awakened heathenish associations, and was laid aside, therefore, for something more consonant to a just Christian feeling. It is certainly remarkable that of the N. T. writers the Apostle James only in his Epistle, i. 1, and in Acts xv. 23, employs the Greek form of salutation (χαίρειν = "greeting,"

Digitized by Google

A. V.).[a] It occurs also, as we should expect, in Acts xxiii. 26, for it is a Roman officer there, and heathen, who writes to another Roman officer. The colloquial χαίρειν, which is recognized as still current at a much later period (2 John, vv. 10, 11), was in various respects a different usage.

It has been held by some that Paul always employed an amanuensis, and wrote no one of his epistles without that assistance. The rendering of the A. V. ("How large a letter I have written with mine own hand," Gal vi. 11) might lead us to suppose that in that instance, at least, he departed from his usual practice. But the correct translation (see above) removes that impression, showing that the remark applies rather to a few words or verses only of the letter as the customary token of authenticity. There is more reason for supposing that he may have written the letter to Philemon without dictation, both on account of its brevity and the private nature of the contents. Paul's saying in ver. 19 that "he wrote" the guarantee to pay the debt (if Onesimus was to be held liable for anything), does not prove that he did not write the rest of the letter, but serves only to affirm the security of the pledge. It is barely possible that the capacity in which Onesimus proved himself so useful to Paul (Philem. vv. 11, 13) was that of an occasional amanuensis. His being a slave is not at variance with that supposition; for among the Greeks and Romans slaves were often trained to that particular art, and in other respects were so well educated as to be employed altogether for literary services. (See Becker's *Gallus*, i. 121 ff., Eng. trans.)

In his *Neutestamentliche Studien* (Gotha, 1866), J. C. M. Laurent discusses several questions of interest, relating to the composition and form of Paul's epistles. He maintains that the Apostle dictated all his letters with the exception of that to Philemon (which was wholly written by himself), and that he attested them all by some addition or postscript from his own hand. He attempts to distinguish in every instance the places where Paul took the pen and inserted the attesting words. In the Epistle to the Romans he finds them in xv. 14–33; in 1 Cor. xvi. 21 ff., and 2 Cor. xiii. 10–13; in Gal. vi. 11–18; in Eph. vi. 21–24; in Phil. iv. 21–23; in Col. iv. 18; in 1 Thess. v. 25–28, and 2 Thess. iii. 17, 18; in 1 Tim. vi. 20, 21, and 2 Tim. iv. 19–22, and in Tit. iii. 12–15. The conclusion in some of the instances is very slightly supported. For example, the Pauline ἐνορκίζω, and the strictly personal import of the paragraph, is said to prove that the words in 1 Thess. v. 25–28 are certainly from Paul's hand. Again, it is argued that ἀμήν in Phil. iv. 20 closed the official part of the letter, and hence that the rest was written, as it were, *privatim*. On the other hand, Paul states expressly that he adds the salutation in Col. iv. 18, and that also in 1 Cor. xvi. 21, from which it would certainly be violent to separate the next two verses. So also γράφω in 2 Cor. xiii. 10 brings forward so distinctly the individual after the plurals (εὐχόμεθα, δυνάμεθα, χαίρομεν) which precede, that we may reasonably ascribe that verse to Paul as well as the next two verses so closely connected with it. The reasoning is similar to this in the case of other epistles.

This writer adopts the hypothesis of certain other critics, though carried by him to a much greater extent, that Paul, after dictating his letters to the amanuensis, carefully read them himself or had them read to him, and then wrote or had written on the margin various annotatory remarks where expressions of the text seemed incomplete or obscure. Subsequent copyists transferred these remarks to the text itself. "These marginal notations are not only as much inspired as the words of the text, but they often bear the impress of a special emphasis designed by the author. . . . And though they were forced into the text by the fault of the copyist, against the will of the Apostle, the words of the Apostle remained entirely unaltered. The importance of the hypothesis is philological rather than dogmatic: the style of the Apostle is freed thereby from many an irregularity, the connection of the sentences from many an impediment." It is hardly worth while to illustrate this procedure at length. The character of it will be understood if we mention *e. g.* that Laurent proposes to insert Rom. xvi. 19 after ver. 16, because the logical relation of these verses to each other appears to him more satisfactory than that which he finds between vv. 18 and 19. Hence, to account for the dislocation of the true text, he assumes that the Apostle wrote ver. 19 in the margin with the intention of having it read as explanatory of ver. 16, but by some mistake of a transcriber it became attached to ver. 18, where it seems to be so irrelevant. It is self-evident that such a mode of criticism is not only unhistorical, but arbitrary and subjective, and hence utterly vague and unreliable. Yet it should be said, in justice to this able treatise, that many of the suggestions which the writer makes in the development of his theory are not only ingenious but valuable in an exegetical point of view, and deserve the attention of the critical student. H.

* EQUAL, no longer used as a transitive verb, has that force in Lam. ii. 13; *i. e.* "to make equal," "compare": "What shall I equal to thee, that I may comfort thee, O virgin daughter of Zion?" H.

ER (עֵר, *watchful*: Ἤρ: *Her*). 1. First-born of Judah. His mother was Bath-Shuah (daughter of Shuah), a Canaanite. His wife was Tamar, the mother, after his death, of Pharez and Zarah, by Judah. Er "was wicked in the sight of the Lord; and the Lord slew him." It does not appear what the nature of his sin was; but, from his Canaanitish birth on the mother's side, it was probably connected with the abominable idolatries of Canaan (Gen. xxxviii. 3–7; Num. xxvi. 19).

2. Descendant of Shelah the son of Judah (1 Chr. iv. 21).

3. Son of Jose, and father of Elmodam, in our Lord's genealogy (Luke iii. 28), about contemporary with Uzziah king of Judah. A. C. H.

ERAN (עֵרָן [*watching*], but Sam. and Syr. עֵדֶן, Edan: Ἐδέν: *Heran*), son of Shuthelah, eldest son of Ephraim (Num. xxvi. 36). The name does not occur in the genealogies of Ephraim in 1 Chr. vii. 20–29, though a name, EZER (עֵזֶר), is

[a] * It is supposed that the Apostle James drew up the letter inserted in Acts xv. 23–29, in virtue of his office as pastor of the church at Jerusalem. The occurrence itself of χαίρειν in that document and in the epistle indicates, as Bengel, Bleek, and others observe, that the two compositions are from the same hand. H

found which may possibly be a corruption of it. Eran was the head of the family of

ERANITES, THE (הָעַרְנִי [see above]; Sam. הזערני: ὁ Ἐδενί [Vat. -νει]: *Heranitæ*), Num. xxvi. 36.

ERASTUS (Ἔραστος [*beloved*]: *Erastus*). 1. One of the attendants or deacons of St. Paul at Ephesus, who with Timothy was sent forward into Macedonia while the Apostle himself remained in Asia (Acts xix. 22). He is probably the same with Erastus who is again mentioned in the salutations to Timothy (2 Tim. iv. 20), though not, as Meyer maintains, the same with Erastus the chamberlain of Corinth (Rom. xvi. 23).

2. Erastus the chamberlain, or rather the public treasurer (*οἰκονόμος*, *arcarius*) of Corinth, who was one of the early converts to Christianity (Rom. xvi. 23). According to the traditions of the Greek Church (*Menol. Græcum*, i. 179), he was first œconomus to the church at Jerusalem, and afterwards bishop of Paneas. He is probably not the same with Erastus who was with St. Paul at Ephesus, for in this case we should be compelled to assume that he is mentioned in the Epistle to the Romans by the title of an office which he had once held and afterwards resigned. W. A. W.

ERECH (אֶרֶךְ [as Heb. *enduring*, *slow*, but see *infra*]: Ὀρέχ: *Arach*), one of the cities of Nimrod's kingdom in the land of Shinar (Gen. x. 10). Until recently, the received opinion, following the authority of St. Ephrem, Jerome, and the Targumists, identified it with Edessa or Callirhoë (*Urfah*), a town in the northwest of Mesopotamia. This opinion is supported by Von Bohlen (*Introd. to Gen.* p. 233), who connects the name Callirhoë with the Biblical Erech through the Syrian form *Eurhok*, suggesting the Greek word *ἐῤῥόος*. This identification is, however, untenable: Edessa was probably built by Seleucus, and could not, therefore, have been in existence in Ezra's time (Ezr. iv. 9), and the extent thus given to the land of Shinar presents a great objection. Erech must be sought in the neighborhood of Babylon: Gesenius (*Thes.* p. 151) identifies it with Aracca on the Tigris in Susiana; but it is doubtless the same as Orchoë [of the Greeks], 82 miles S. and 43 E. of Babylon, the modern designations of the site, *Warka*, *Irka*, and *Irak*, bearing a considerable affinity to the original name. This place appears to have been the necropolis of the Assyrian kings, the whole neighborhood being covered with mounds, and strewed with the remains of bricks and coffins. Some of the bricks bear a monogram of "the moon," and Col. Rawlinson surmises that the name Erech may be nothing more than a form of יָרֵחַ (Bonomi, *Nineveh*, p. 45, 508). The inhabitants of this place were among those who were transplanted to Samaria by Asnapper (Ezr. iv. 9). W. L. B.

* As to the interest of the supposed ruins of Erech at *Warka*, and the discoveries there, see Rawlinson's *Five Great Monarchies*, i. 23, and Loftus's *Chaldæa and Susiana*, p. 150 ff. Prof. Rödiger describes some of these and their monumental importance, in the *Zeitsch. der deutschen Morg. Gesellschaft*, ix. 332 and x. 720. Col. Rawlinson held at one time that *Warka* was Abraham's Ur in Chaldæa, but subsequently was convinced that it must be Erech. H.

ERI (עֵרִי [*watching*]: Ἀηδείς, Ἀδδί [Vat. Αδδει]; Alex. Αηδις in Gen.: *Heri*, *Her*). Son of Gad (Gen. xlvi. 16; Num. xxvi. 16).

ERITES, THE (הָעֵרִי: ὁ Ἀδδί [Vat. Αδδει]: *Heritæ*). A branch of the tribe of Gad, descended from ERI (Num. xxvi. 16).

ESAIAS [3 syl.] (Rec. T. [Tisch. Treg.] Ἡσαΐας; Lachm. with B [B has no breathings *a prima manu*] Ἠσαΐας: *Isaias*; Cod. Amiat. *Esaias*), Matt. iii. 3, iv. 14, viii. 17, xii. 17, xiii. 14, xv. 7; Mark [i. 2 in the best editions,] vii. 6; Luke iii. 4, iv. 17; John i. 23, xii. 38, 39, 41; Acts viii. 28, 30, xxviii. 25; Rom. ix. 27, 29, x. 16, 20, xv. 12. [ISAIAH.]

ESAR-HADDON (אַסַּר־חַדֹּן): [in 2 K. and Is.,] Ἀσορδάν, [exc. Sin. in Is., Ναχορδαν; in Ezr. iv. 2, Ἀσαραδάν, Vat. Ασαρεαθαν, Alex. Ασαραδδαν;] Σαχερδονός, LXX. [?]: Ἀσαρίδανος, Ptol.: *Asshurakh-iddina*, Assyr.: *Asar-haddon*), one of the greatest of the kings of Assyria. He was the son of Sennacherib (2 K. xix. 37) and the grandson of Sargon who succeeded Shalmaneser. It has been generally thought that he was Sennacherib's eldest son; and this seems to have been the view of Polyhistor, who made Sennacherib place a son, *Asordanes*, on the throne of Babylon during his own lifetime (ap. Euseb. *Chron. Can.* i. 5). The contrary, however, appears by the inscriptions, which show the Babylonian viceroy — called *Asordanes* by Polyhistor, but *Aparanadius* (Assaranadius?) by Ptolemy — to have been a distinct person from Esar-haddon. Thus nothing is really known of Esar-haddon until his succession (ab. B. C. 680), which seems to have followed quietly and without difficulty on the murder of his father and the flight of his guilty brothers (2 K. xix. 37, Is. xxxvii. 38). It may, perhaps, be concluded from this that he was, *at the death of his father*, the eldest son, Assaranadius, the Babylonian viceroy, having died previously.

Esar-haddon appears by his monuments to have been one of the most powerful — if not *the* most powerful — of all the Assyrian monarchs. He carried his arms over all Asia between the Persian Gulf, the Armenian mountains, and the Mediterranean. Towards the east he engaged in wars with Median tribes "of which his fathers had never heard the name;" towards the west he extended his influence over Cilicia and Cyprus; towards the south he claims authority over Egypt and over Ethiopia. In consequence of the disaffection of Babylon, and its frequent revolts from former Assyrian kings, Esar-haddon, having subdued the sons of Merodach-Baladan who headed the national party, introduced the new policy of substituting for the former government by viceroys a direct dependence upon the Assyrian crown. He did not reduce Babylonia to a province, or attempt its actual absorption into the empire, but united it to his kingdom in the way that Hungary was, until 1848, united to Austria, by holding both crowns himself and residing now at one and now at the other capital. He is the only Assyrian monarch whom we find to have actually reigned at Babylon, where he built himself a palace, bricks from which have been recently recovered bearing his name. His Babylonian reign lasted thirteen years, from B. C. 680 to B. C. 667; and it was undoubtedly within this space of time that Manasseh, king of Judah, having been seized by his captains at Jerusalem on

Digitized by Google

charge of rebellion, was brought before him *at Babylon* (2 Chr. xxxiii. 11) and detained for a time as prisoner there. [MANASSEH.] Eventually Esar-haddon, persuaded of his innocence, or excusing his guilt, restored him to his throne, thus giving a proof of clemency not very usual in an oriental monarch. It seems to have been in a similar spirit that Esar-haddon, according to the inscriptions, gave a territory upon the Persian Gulf to a son of Merodach-Baladan, who submitted to his authority and became a refugee at his court.

As a builder of great works Esar-haddon is particularly distinguished. Besides his palace at Babylon, which has been already mentioned, he built at least three others in different parts of his dominions, either for himself or his son; while in a single inscription he mentions the erection by his hands of no fewer than *thirty* temples in Assyria and Mesopotamia. His works appear to have possessed a peculiar magnificence. He describes his temples as "shining with silver and gold," and boasts of his Nineveh palace that it was "a building such as the kings his fathers who went before him had never made." The southwest palace at Nimrud is the best preserved of his constructions. This building, which was excavated by Mr. Layard, is remarkable from the peculiarity of its plan as well as from the scale on which it is constructed. It corresponds in its general design almost exactly with the palace of Solomon (1 K. vii. 1–12), but is of larger dimensions, the great hall being 220 feet long by 100 broad (Layard's *Nin. & Bab.* p. 634), and the porch or antechamber 160 feet by 60. It had the usual adornment of winged bulls, colossal sphinxes, and sculptured slabs, but has furnished less to our collections than many inferior buildings, from the circumstance that it had been originally destroyed by fire, by which the stones and alabaster were split and calcined. This is the more to be regretted as there is reason to believe that Phœnician and Greek artists took part in the ornamentation.

It is impossible to fix the length of Esar-haddon's reign, or the order of the events which occurred in it. Little is known to us of his history but from his own records, and they have not come down to us in the shape of annals, but only in the form of a general summary. That he reigned thirteen years at Babylon is certain from the Canon of Ptolemy, and he cannot have reigned a shorter time in Assyria. He *may*, however, have reigned longer; for it is not improbable that after a while he felt sufficiently secure of the affections of the Babylonians to reëstablish the old system of vice-regal government in their country. Saosduchinus may have been set up as ruler of Babylon by his authority in B. C. 667, and he may have withdrawn to Nineveh and continued to reign there for some time longer. His many expeditions and his great works seem to indicate, if not even to require, a reign of some considerable duration. It has been conjectured that he died about B. C. 660, after occupying the throne for twenty years. He appears to have been succeeded by his son *Asshur-bani-pal*, or Sardanapalus II., the prince for whom he had built a palace in his own lifetime. G. R.

* For the connections of this Assyrian king with the Hebrew history, and for confirmation of the Scripture account of him by the Babylonian monuments, the reader may see M. von Niebuhr, *Geschichte Assur's und Babel's*, pp. 38. 182 ff.; Brandis, *Rerum Assyr. Tempora*, p. 41; Layard's *Nineveh and Babylon*, pp. 345, 621 (Lond. 1853) Rawlinson's *Bampton Lectures*, p. 122 (Amer ed.); *Five Great Monarchies of the Ancient World*, vol. iii., by the same author; and Milman's *History of the Jews*, i. 433 (Amer. ed.). H

ESAU [Ἠσαῦ: *Esau*], the oldest son of Isaac and twin-brother of Jacob. The singular appearance of the child at his birth originated the name: "And the first came out *red* (אַדְמוֹנִי), all over like an hairy garment, and they called his name *Esau*" (עֵשָׂו, *i. e.* "hairy," "rough," Gen. xxv. 25). This was not the only remarkable circumstance connected with the birth of the infant. Even in the womb the twin-brothers struggled together (xxv. 22). Esau was the first-born; but as he was issuing into life Jacob's hand grasped his heel. The bitter enmity of two brothers, and the increasing strife of two great nations, were thus foreshadowed (xxv. 23, 26). Esau's robust frame and "rough" aspect were the types of a wild and daring nature. The peculiarities of his character soon began to develop themselves. Scorning the peaceful and commonplace occupations of the shepherd, he revelled in the excitement of the chase, and in the martial exercises of the Canaanites (xxv. 27). He was, in fact, a thorough *Bedawy*, a "son of the desert" (so we may translate אִישׁ שָׂדֶה), who delighted to roam free as the wind of heaven, and who was impatient of the restraints of civilized or settled life. His old father, by a caprice of affection not uncommon, loved his willful, vagrant boy; and his keen relish for savory food being gratified by Esau's venison, he liked him all the better for his skill in hunting (xxv. 28). An event occurred which exhibited the reckless character of Esau on the one hand, and the selfish, grasping nature of his brother on the other. The former returned from the field, exhausted by the exercise of the chase, and faint with hunger. Seeing some pottage of lentiles which Jacob had prepared, he asked for it. Jacob only consented to give the food on Esau's swearing to him that he would in return give up his birthright. There is something revolting in this whole transaction. Jacob takes advantage of his brother's distress to rob him of that which was dear as life itself to an Eastern patriarch. The birthright not only gave him the headship of the tribe, both spiritual and temporal, and the possession of the great bulk of the family property, but it carried with it the *covenant blessing* (xxvii. 28, 29, 36; Heb. xii. 16, 17). Then again whilst Esau, under the pressure of temporary suffering, despises his birthright by selling it for a mess of pottage (Gen. xxv. 34), he afterwards attempts to secure that which he had deliberately sold (xxvii. 4, 34, 38; Heb. xii. 17).

It is evident the whole transaction was public for it resulted in a new name being given to Esau. He said to Jacob, "Feed me with that same *red* (הָאָדֹם); therefore was his name called *Edom*" (אֱדוֹם, Gen. xxv. 30). It is worthy of note, however, that this name is seldom applied to Esau himself, though almost universally given to the country he settled in, and to his posterity. [EDOM; EDOMITES.] The name "Children of Esau" is in a few cases applied to the Edomites (Deut. ii. 4, Jer. xlix. 8; Obad. 18); but it is rather a poetical expression.

Esau married at the age of 40, and contrary to the wish of his parents. His wives were both Canaanites; and they "were bitterness of spirit unto Isaac and to Rebekah" (Gen. xxvi. 34, 35).

The next episode in the history of Esau and Jacob is still more painful than the former, as it brings fully out those bitter family rivalries and divisions, which were all but universal in ancient times, and which are still a disgrace to Eastern society. Jacob, through the craft of his mother, is again successful, and secures irrevocably the covenant blessing. Esau vows vengeance. But fearing his aged father's patriarchal authority, he secretly congratulates himself: "The days of mourning for my father are at hand, then will I slay my brother Jacob" (Gen. xxvii. 41). Thus he imagined that by one bloody deed he would regain all that had been taken from him by artifice. But he knew not a mother's watchful care. Not a sinister glance of his eyes, not a hasty expression of his tongue, escaped Rebekah. She felt that the life of her darling son, whose gentle nature and domestic habits had won her heart's affections, was now in imminent peril; and she advised him to flee for a time to her relations in Mesopotamia. The sins of both mother and child were visited upon them by a long and painful separation, and all the attendant anxieties and dangers. By a characteristic piece of domestic policy Rebekah succeeded both in exciting Isaac's anger against Esau, and obtaining his consent to Jacob's departure — "and Rebekah said to Isaac, I am weary of my life because of the daughters of Heth; if Jacob take a wife such as these, what good shall my life do me?" Her object was attained at once. The blessing was renewed to Jacob, and he received his father's commands to go to Padan-aram (Gen. xxvii. 46, xxviii. 1–5).

When Esau heard that his father had commanded Jacob to take a wife of the daughters of his kinsman Laban, he also resolved to try whether by a new alliance he could propitiate his parents. He accordingly married his cousin Mahalath, the daughter of Ishmael (xxviii. 8, 9). This marriage appears to have brought him into connection with the Ishmaelitish tribes beyond the valley of Arabah. He soon afterwards established himself in Mount Seir; still retaining, however, some interest in his father's property in southern Palestine. It is probable that his own habits, and the idolatrous practices of his wives and rising family, continued to excite and even increase the anger of his parents; and that he, consequently, considered it more prudent to remove his household to a distance. He was residing in Mount Seir when Jacob returned from Padan-aram, and had then become so rich and powerful that the impressions of his brother's early offenses seem to have been almost completely effaced. His reception of Jacob was cordial and honest; though doubts and fears still lurked in the mind of the latter, and betrayed him into something of his old duplicity; for while he promises to go to Seir, he carefully declines his brother's escort, and immediately after his departure turns westward across the Jordan (Gen. xxxii. 7, 8, 11; xxxiii. 4, 12, 17).

It does not appear that the brothers again met until the death of their father, about 20 years afterwards. Mutual interests and mutual fear seem to have constrained them to act honestly, and even generously towards each other at this solemn interview. They united in laying Isaac's body in the cave of Machpelah. Then "Esau took all his cattle, and all his substance, which he had got in the land of Canaan" — such, doubtless, as his father with Jacob's consent had assigned to him — "and went into the country from the face of his brother Jacob" (xxxv. 29, xxxvi. 6). He now saw clearly that the covenant blessing was Jacob's; that God had inalienably allotted the land of Canaan to Jacob's posterity; and that it would be folly to strive against the Divine will. He knew also that as Canaan was given to Jacob, Mount Seir was given to himself (comp. xxvii. 39, xxxii. 3; and Deut. ii. 5); and he was, therefore, desirous with his increased wealth and power to enter into full possession of his country, and drive out its old inhabitants (Deut. ii. 12). Another circumstance may have influenced him in leaving Canaan. He "lived by his sword" (Gen. xxvii. 40); and he felt that the rocky fastnesses of Edom would be a safer and more suitable abode for such as by their habits provoked the hostilities of neighboring tribes, than the open plains of southern Palestine.

There is a difficulty connected with the names of Esau's wives, which is discussed under AHOLIBAMAH and BASHEMATH. Of his subsequent history nothing is known; for that of his descendants see EDOM and EDOMITES. J. L. P.

E'SAU (Ἠσαύ: *Sel*), 1 Esdr. v. 29. [ZIBA.]

E'SAY (Ἠσαΐας: *Isaïa*, *Isaias*), Ecclus. xlviii. 20, 22; 2 Esdr. ii. 18. [ISAIAH.]

* **ESCHEW**, now seldom used, means in the A. V. (Job i. 1, 8, ii. 3; 1 Pet. iii. 11) "to flee from" or "shun." It is from the old French *eschiver* in that sense. H.

ESDRAE'LON [Jud. iii. 9, Ἐσδρηλών; Sin.[1] Εσδηρλων; Vat. Comp. Ald. Ἐσδραήλων; iv. 6, Vat. Εσρηλων; Alex. Εσερηχων; vii. 3, Ἐσδρηλώμ, Vat. Sin. -λων; Comp. Ald. Ἐσδραηλώμ; i. 8, Ἐσδρηλώμ.; Sin. -λων; Vat. Εσρρημ; Alex. Εσδρημ: *Esdrelon*]. This name is merely the Greek form of the Hebrew word JEZREEL. It occurs in this exact shape only twice in the A. V. (Jud. iii. 9, iv. 6). In Jud. vii. 3 it is ESDRAELOM [Esdraelon, ed. 1611], and in i. 8 ESDRELOM [Esdrelon, ed. 1611], with the addition of "the great plain." In the O. T. the plain is called the VALLEY OF JEZREEL; by Josephus the great plain, τὸ πεδίον μέγα. The name is derived from the old royal city of JEZREEL, which occupied a commanding site, near the eastern extremity of the plain, on a spur of Mount Gilboa.

"The great plain of Esdraelon" extends across central Palestine from the Mediterranean to the Jordan, separating the mountain ranges of Carmel and Samaria from those of Galilee. The western section of it is properly the plain of ACCHO, or *'Akka*. The main body of the plain is a triangle. Its base on the east extends from *Jenin* (the ancient En-gannim) to the foot of the hills below Nazareth, and is about 15 miles long; the north side, formed by the hills of Galilee, is about 12 miles long; and the south side, formed by the Samaria range, is about 18 miles. The apex on the west is a narrow pass opening into the plain of *'Akka*. This vast expanse has a gently undulating surface — in spring all green with corn where cultivated, and rank weeds and grass where neglected — dotted with several low gray tells, and near the sides with a few olive groves. This is that *Valley of Megiddo* (בִּקְעַת מְגִדּוֹ, so called from the

Digitized by Google

sity of MEGIDDO, which stood on its southern border), where Barak triumphed, and where king Josiah was defeated and received his death-wound (Judg. v.; 2 Chr. xxxv.). Probably, too, it was before the mind of the Apostle John when he figuratively described the final conflict between the hosts of good and evil who were gathered to a place called *Ar-mageddon* (Ἁρμαγεδδών, from the Hebrew הַר מְגִדּוֹ, that is, *the city of Megiddo*; Rev. xvi. 16). The river *Kishon* — "that ancient river" so fatal to the army of Sisera (Judg. v. 21) — drains the plain, and flows off through the pass westward to the Mediterranean.

From the base of this triangular plain three branches stretch out eastward, like fingers from a hand, divided by two bleak, gray ridges — one bearing the familiar name of Mount Gilboa; the other called by Franks Little Hermon, but by natives *Jebel ed-Duhy*. The *northern* branch has Tabor on the one side, and Little Hermon on the other; into it the troops of Barak defiled from the heights of Tabor (Judg. iv. 6); and on its opposite side are the sites of Nain and Endor. The *southern* branch lies between *Jenin* and Gilboa, terminating in a point among the hills to the eastward; it was across it Ahaziah fled from Jehu (2 K. ix. 27). The *central* branch is the richest as well as the most celebrated; it descends in green, fertile slopes to the banks of the Jordan, having Jezreel and Shunem on opposite sides at the western end, and Beth-shean in its midst towards the east. This is the "Valley of Jezreel" proper — the battle-field on which Gideon triumphed, and Saul and Jonathan were overthrown (Judg. vii. 1 ff.; 1 Sam. xxix. and xxxi.)

Two things are worthy of special notice in the plain of Esdraelon. (1.) Its wonderful richness. Its unbroken expanse of verdure contrasts strangely with the gray, bleak crowns of Gilboa, and the rugged ranges on the north and south. The gigantic thistles, the luxuriant grass, and the exuberance

Plain of Esdraelon.

of the crops on the few cultivated spots, show the fertility of the soil. It was the frontier of Zebulun — "Rejoice, Zebulun, in thy *going out*" (Deut. xxxiii. 18). But it was the special portion of Issachar — "And he saw that rest was good, and the land that it was pleasant; and bowed his shoulder to bear, and became a servant unto tribute" (Gen. xlix. 15). (2.) Its desolation. If we except the eastern branches, there is not a single inhabited village on its whole surface, and not more than one sixth of its soil is cultivated. It is the home of the wild, wandering Bedawin, who scour its smooth turf on their fleet horses in search of plunder; and when hard pressed can speedily remove their tents and flocks beyond the Jordan, and beyond the reach of a weak government. It has always been insecure since history began. The old Canaanite tribes drove victoriously through it in their iron chariots (Judg. iv. 3, 7); the nomad Midianites and Amalekites — those "children of the east," who were 'as grasshoppers for multitude," whose "camels were without number" — devoured its rich pastures (Judg. vi. 1–6, vii. 1); the Philistines long held it, establishing a strong hold at Beth-shean (1 Sam. xxix. 1, xxxi. 10); and the Syrians frequently swept over it with their armies (1 K. xx. 26; 2 K. xiii. 17). In its condition, thus exposed to every hasty incursion, and to every shock of war, we read the fortunes of that tribe which for the sake of its richness consented to sink into a half-nomadic state — "Rejoice, O Issachar, in thy *tents* . . . Issachar is a strong ass, couching down between two burdens; and he saw that rest was good, and the land that it was pleasant, and bowed his shoulder to bear, and became a servant unto tribute" (Gen. xlix. 14, 15; Deut. xxxiii. 18). Once only did this tribe shake off the yoke; when under the heavy pressure of Sisera, "the chiefs of Issachar were with Deborah" (Judg. v. 15). Their exposed position and valuable possessions in this open plain made them anxious for the succession of David to the throne, as one under

Digitized by Google

whose powerful protection they would enjoy that peace and rest they loved; and they joined with their neighbors of Zebulun and Naphtali in sending to David presents of the richest productions of their rich country (1 Chr. xii. 32, 40).

The whole borders of the plain of Esdraelon are dotted with places of high historic and sacred interest. Here we group them together, while referring the reader for details to the separate articles. On the east we have *Endor*, *Nain*, and *Shunem*, ranged round the base of the "hill of *Moreh*;" then *Beth-shean* in the centre of the "Valley of Jezreel;" then *Gilboa*, with the "well of *Harod*," and the ruins of *Jezreel* at its western base. On the south are *En-gannim*, *Taanach*, and *Megiddo*. At the western apex, on the overhanging brow of *Carmel*, is the scene of Elijah's sacrifice; and close by the foot of the mountain below, runs the *Kishon*, on whose banks the false prophets of Baal were slain. On the north, among places of less note, are *Nazareth* and *Tabor*. The modern Syrians have forgotten the ancient name as they have forgotten the ancient history of Esdraelon; and it is now known among them only as *Merj ibn 'Amer*, "the Plain of the Son of 'Amer." A graphic sketch of Esdraelon is given in Stanley's *S. & P.* p. 335 ff. See also the *Handbook for Syria and Palestine*, p. 351 ff.; Robinson, ii. 315–30, 366, iii. 113 ff. J. L. P.

* The plain of Esdraelon is remarkable for the number and sanguinary character of the battles which have been fought there from the earliest times down to our own age. The language of the traveller, Dr. Clarke, hardly needs qualification when he says (*Travels*, &c., ii. 493) that "warriors out of every nation which is under heaven have pitched their tent in the plain of Esdraelon, and have beheld the various banners of their nations wet with the dews of Tabor and of Hermon." It was here that Barak encountered the forces of Sisera, and the severe battle ensued (commemorated in the song of Deborah and Barak) which swept over almost the entire plain and dyed its waters with blood (Judg. iv. 4 ff. and v. 1 ff.). At the foot of the ridge where Jezreel (*Zerín*) was situated, Gideon achieved his great victory over the Amalekites and Midianites (Judg. vi. 33, vii. 1 ff.). By the fountain (*'Ain Jálúd*) near the same city, the host of Israel under Saul encamped, before it was chased and scattered on the mountains of Gilboa (1 Sam. xxix. 1, xxxi. 1 ff.). At Megiddo, on the southern frontier, between Issachar and Manasseh, Josiah, king of Judah, was defeated and slain by the Egyptians under Necho (2 K. xxiii. 29; 2 Chr. xxv. 22). The army of Nebuchadnezzar, at the head of which was Holofernes, had their quarters here before Bethulia, the strong post which commanded the pass between Galilee and Samaria (Jud. vii. 3); and here, at the foot of Tabor, Vespasian fought against the Jews (Joseph. *B. J.* iv. 6, § 8). Here the Crusaders and the Saracens slaughtered each other; and here in 1799 the Turks, with an army of 25,000 men, were vanquished by 3,000 French troops under Bonaparte and Kleber. For interesting notices concerning this plain, the most remarkable in Palestine, both geographically and historically, see Ritter's *Geography of Palestine* Mr. Gage's trans. ii. 317, 322, iv. 343 ff.; and Rob *Phys. Geogr.* pp. 131–135. The best view of Esdraelon is that spread out before the observer from the *Wely* on the hill-top above Nazareth, and the best description of that view is the one written by Dr. Robinson (*Bibl. Res.* iii. 189 ff., 1st ed.).

H.

ESDRAS ("Εσδρας: *Esdras*), 1 Esdr. viii. 1, 3, 7, 8, 9, 19, 23, 25, 91, 92, 96; ix. 1, 7, 16, 39, 40, 42, 45, 46, 49; 2 Esdr. i. 1; ii. 10, 33, 42; vi. 10; vii. 2, 25; viii. 2, 19; xiv. 1, 38. [EZRA.]

ESDRAS, FIRST BOOK OF, the first in order of the apocryphal books in the English Bible, which follows Luther and the German Bibles in separating the apocryphal from the canonical books, instead of binding them up together according to historical order (Walton's *Prolegom. de Vers. Græc.* § 9). The classification of the 4 books which have been named after Ezra is particularly complicated. In the Vatican and other quasi-modern editions of the LXX., our 1st Esdr. is called the *first* book of Esdras in relation to the canonical book of Ezra, which follows it and is called the *second* Esdras.[a] But in the Vulgate, 1st Esdr. means the canonical book of Ezra, and 2d Esdr. means *Nehemiah*, according to the primitive Hebrew arrangement, mentioned by Jerome, in which *Ezra* and *Nehemiah* made up two parts of the one book of Ezra; and 3d and 4th Esdr. are what we now call 1 and 2 Esdras. These last, with the prayer of Manasses, are the only apocryphal books admitted *eo nomine* into the Romish Bibles, the other Apocrypha being declared canonical by the Council of Trent. The reason of the exclusion of 3d Esdras from the Canon seems to be that the Tridentine fathers, in 1546, were not aware that it existed in Greek. For it is not in the Complutensian edition (1515), nor in the Biblia Regia; Vatablus (about 1540) had never seen a Greek copy, and, in the preface to the apocryphal books, speaks of it as only existing in some MSS. and printed *Latin* Bibles.[b] Baduel also, a French Protestant divine (*Bibl. Crit.*) (about 1550), says that he knew of no one who had ever seen a Greek copy. For this reason, it seems, it was excluded from the Canon, though it has certainly quite as good a title to be admitted as Tobit, Judith, &c. It has indeed been stated (Bp. Marsh, *Comp. View*, ap. Soames *Hist. of Ref.* ii. 608) that the Council of Trent in excluding the 2 books of Esdras followed Augustine's Canon. But this is not so. Augustine (*de Doctr. Christ.* lib. ii. 13) distinctly mentions among the libri canonici, *Esdræ duo*;[c] and

[a] * In the Vatican, Alexandrine, and Sinaitic MSS. of the Septuagint, and in the Aldine edition, the books of Ezra and Nehemiah are united in one under the name of 2d Esdras. In the Alexandrine MS. 1st Esdras is entitled ὁ ἱερεύς, "The Priest," and ἱερεύς is also prefixed as a title to 2d Esdras (Ezra and Nehemiah). A.

[b] "Oratio Manassæ, necnon libri duo qui sub libri tertii et quarti Esdræ nomine circumferuntur, hoc in ecc, extra scilicet seriem canonicorum librorum, quos sancta Tridentina synodus suscepit, et pro canonicis suscipiendos decrevit, sepositi sunt, ne prorsus interirent, quippe qui à nonnullis sanctis Patribus interdum citantur, et in aliquibus Bibliis Latinis, tam manuscriptis quam impressis, reperiuntur."

[c] Jerome, in his preface to his Latin version of *Ezra* and *Nehemiah*, says, "UNUS a nobis liber editus est," etc.; though he implies that they were sometimes called 1 and 2 Esdras.

Digitized by Google

that one of these was our 1st Esdras is manifest from the quotation from it given below from *De Civit. Dei*. Hence it is also sure that it was included among those pronounced as canonical by the 3d Council of Carthage A. D. 397, or 419, where the same title is given, *Esdræ libri duo:* where it is to be noticed, by the way, that Augustine and the Council of Carthage use the term canonical in a much broader sense than we do; and that the manifest ground of considering them canonical in any sense, is their being found in the Greek copies of the LXX. in use at that time. In all the earlier editions of the English Bible the books of Esdras are numbered as in the Vulgate. In the 6th Article of the Church of England (first introduced in 1571) the 1st and 2d books denote Ezra and Nehemiah, and the 3d and 4th, among the Apocrypha, are our present 1st and 2d. In the list of revisers or translators of the *Bishops'* Bible, sent by Archbishop Parker to Sir William Cecil with the portion revised by each, Ezra, Nehemiah, Esther, and the apocryphal books of Esdras, seem to be all comprised under the one title of ESDRAS. Barlow, Bp. of Chichester, was the translator, as also of the books of Judith, Tobias, and Sapientia (*Corresp. of Archbp. Parker*, Park. Soc. p. 335). The Geneva Bible first adopted the classification used in our present Bibles, in which EZRA and NEHEMIAH give their names to the two canonical books, and the two apocryphal become 1 and 2 Esdras; where the Greek form of the name marks that these books do not exist in Hebrew or Chaldee.

As regards the antiquity of this book and the rank assigned to it in the early church, it may suffice to mention that Josephus quotes largely from it, and follows its authority, even in contradiction to the canonical Ezra and Nehemiah, by which he has been led into hopeless historical blunders and anachronisms. It is quoted also by Clemens Alexandrinus (*Strom.* i.); and the famous sentence "Veritas manet, et invalescit in æternum, et vivit et obtinet in sæcula sæculorum," is cited by Cyprian as from Esdras, prefaced by *ut scriptum est* (*Epist.* lxxiv.). Augustine also refers to the same passage (*De Civit. Dei*, xviii. 36), and suggests that it may be prophetical of Christ who is the truth. He includes under the name of Esdras our 1 Esdr., and the canonical books of Ezra and Nehemiah. 1 Esdr. is also cited by Athanasius and other fathers; and perhaps there is no sentence that has been more widely divulged than that of 1 Esdr. iv. 41, "Magna est veritas et prævalebit." But though it is most strange that the Council of Trent should not have admitted this book into their wide Canon, nothing can be clearer, on the other hand, than that it is rightly included by us among the Apocrypha, not only on the ground of its historical inaccuracy, and contradiction of the true Ezra, but also on the external evidence of the early church. That it was never known to exist in Hebrew, and formed no part of the Hebrew Canon, is admitted by all. Jerome, in his preface to Ezr. and Neh., speaks contemptuously of the dreams (somnia) of the 3d and 4th Esdras, and says they are to be utterly rejected. In his *Prologus Galeatus* he clearly defines the number of books in the Canon, 22, corresponding to the 22 letters of the Hebrew alphabet, and says that all others are apocryphal. This of course excludes 1 Esdras. Melito, Origen, Eusebius, Athanasius, Gregory Nazianzen, Hilary of Poitiers, Cyril of Jerusalem, the Council of Laodicea, and many other fathers, expressly follow the same canon, counting as apocryphal whatever is not comprehended in it.

As regards the contents of the book, and the author or authors of it — the first chapter is a transcript of the two last chapters of 2 Chr. for the most part *verbatim*, and only in one or two parts slightly abridged and paraphrased, and showing some corruptions of the text, the use of a different Greek version, and some various readings, as *e. g.* i. 4, μεγαλειότητα for διὰ χειρός, indicating a various reading in the Hebrew; perhaps מְכֻבָּד for מְכֻתָּב, or, as Bretschneider suggests, מְכֻתָּם; πρωτόν (לְבֹכֶר), for the Hebrew of 2 Chr. xxxv. 12, לַבָּקָר, "with the oxen," &c. Chapters iii., iv., and v., to the end of v. 6. are the *original* portions of the book, containing the legend of the three young Jews at the court of Darius; and the rest is a transcript more or less exact of the book of Ezra, with the chapters transposed and quite otherwise arranged, and a portion of Nehemiah. Hence a twofold design in the compiler is discernible: one to introduce and give Scriptural sanction to the legend about Zerubbabel, which may or may not have an historical base, and may have existed as a separate work; the other to explain the great obscurities of the book of Ezra, and to present the narrative, as the author understood it, in historical order, in which, however, he has signally failed. For, not to advert to innumerable other contradictions, the introducing the opposition of the heathen, as offered to Zerubbabel *after* he had been sent to Jerusalem in such triumph by Darius, and the describing that opposition as lasting "until the reign of Darius" (v. 73), and as put down by an appeal to the decree of Cyrus, is such a palpable inconsistency, as is alone sufficient quite to discredit the authority of the book. It even induces the suspicion that it is a farrago made up of scraps by several different hands. At all events, attempts to reconcile the different portions with each other, or with Scripture, is lost labor.

As regards the time and place when the compilation was made, the *original* portion is that which alone affords much clew. This seems to indicate that the writer was thoroughly conversant with Hebrew, even if he did not write the book in that language. He was well acquainted too with the books of Esther and Daniel (1 Esdr. iii. 1, 2 ff.), and other books of Scripture (*ib.* i. 20, 21, 39, 41, &c., and 45 compared with Ps. cxxxvii. 7) But that he did not live under the Persian kings, and was not contemporary with the events narrated, appears by the undiscriminating way in which he uses promiscuously the phrase *Medes and Persians*, or, *Persians and Medes*, according as he happened to be imitating the language of Daniel or of the book of Esther. The allusion in ch. iv. 23 to "sailing upon the sea and upon the rivers," for the purpose of "robbing and stealing," seems to indicate residence in Egypt, and acquaintance with the lawlessness of Greek pirates there acquired. The phraseology of v. 73 savors also strongly of Greek rather than Hebrew. If, however, as seems very probable, the legend of Zerubbabel appeared first as a separate piece, and was afterwards incorporated into the narrative made up from the book of Ezra, this Greek sentence from ch. v. would not prove anything as to the language in which the original legend was written. The expressions in iv. 40, "She is the strength, kingdom, power, and majesty

Digitized by Google

of all ages," is very like the doxology found in some copies of the Lord's Prayer, and retained by us, "thine is the kingdom and the power and the glory for ever." [Comp. 1 Chr. xxix. 12.] But Lightfoot says that the Jews in the temple service, instead of saying Amen, used this antiphon, "Blessed be the name of the Glory of His Kingdom for ever and ever" (vi. 427). So that the resemblance may be accounted for by their being both taken from a common source.

For a further account of the history of the times embraced in this book, see EZRA; ESDRAS II.; Joseph. *Antiq. Jud.* xi.; Hervey's *Genealog. of our Lord Jesus Christ*, ch. xi.; Bp. Cosin *on the Canon of Scr.*; Fulke's *Defence of Transl. of Bible* (Park. Soc. p. 18 ff.); Kitto, *Cyclop. of Bibl. Lit.*, art. *Esdras*; and the authorities cited in the course of this article. A. C. H.

* For a fuller discussion of the questions suggested by this book, see Trendelenburg's essay *Ueber den apokr. Esras*, in Eichhorn's *Allgem. Bibliothek d. bibl. Lit.* i. 180 ff., reprinted in Eichhorn's *Einl. in die apokr. Schriften des A. T.* (1795), pp. 335–377; O. F. Fritzsche, *Exeg. Handb. zu d. Apokr. des A. T.*, Lief. i. (1851), the best commentary; De Wette, *Einl.* 7e Ausg. (1852), pp. 395–97; Palfrey, *Lect. on the Jewish Scriptures*, iv. 106–119 (Boston, 1852); Keil, *Einl.* 2e Aufl. (1859), pp. 677–682; Bertheau, *Die Bücher Esra, Nechem. u. Ester* (*Exeg. Handb.* Lief. xvii., 1862), p. 14 f., on its relation to the canonical book of Ezra; Davidson, *Introd. to the Old Test.* iii. 352–57 (1863), Ewald, *Gesch. d. Volkes Israel*, 3e Ausg. (1864), iv. 165 ff., and the art. *Esdras* by Ginsburg in the 3d ed. of Kitto's *Cycl. of Bibl. Literature*.

The following table may facilitate the comparison of the apocryphal 1st Esdras with the corresponding portions of the canonical books of the Old Testament:

Ch. i.	is from	2 Chr. xxxv., xxxvi.
" ii. 1–15	"	Ezr. i.
" ii. 16–30	"	Ezr. iv. 7–24.
" v. 7–73	"	Ezr. ii. 1–iv. 5.
" vi. 1–ix. 36	"	Ezr. v. 1–x. 44.
" ix. 37–55	"	Neh. vii. 73–viii. 13.

The abrupt termination of the book has led most scholars to consider it incomplete in its present form. Trendelenburg, Eichhorn, De Wette, Fritzsche, Bertheau, and Ginsburg regard the work as in the main a free translation from the Hebrew of the Old Testament books, and consequently, as of some value for the criticism of the original text: Keil, on the other hand, with whom Davidson agrees, maintains that the compiler used the Septuagint version. The peculiar passage iii. 1–v. 6 is generally supposed to have been originally written in Greek. The style of the book is much better than that of most portions of the Septuagint, and is comparatively free from Hebraisms. The Syriac version of 1st Esdras has been recently published by Lagarde in a form more correct than that in Walton's Polyglott (*Libri Vet. Test. apocryphi Syriace*, Lips. 1861) A.

ESDRAS, THE SECOND BOOK OF, in the English Version of the Apocrypha, and so called by the author (2 Esdr. i. 1), is more commonly known, according to the reckoning of the Latin Version, as the *fourth* book of Ezra [see above, ESDRAS I.]; but the arrangement in the Latin MSS. is not uniform, and in the Arabic and Æthiopic versions the book is called the first of Ezra. The original title, Ἀποκάλυψις Ἔσδρα (or προφητεία Ἔσδρα), "the *Revelation* of Ezra," which is preserved in some old catalogues of the canonical and apocryphal books (Nicephorus, ap Fabric. *Cod. Pseudep. V. T.* ii. 176 [*Cod. Apocr. N. T.* i. 952], Montfaucon, *Biblioth. Coislin.* p. 194), is far more appropriate, and it were to be wished that it could be restored.[a]

1. For a long time this book of Ezra was known only by an old Latin version, which is preserved in some MSS. of the Vulgate. This version was used by Ambrose, and, like the other parts of the *Vetus Latina*, is probably older than the time of Tertullian. A second Arabic text was discovered by Mr. Gregory about the middle of the 17th century in two Bodleian MSS., and an English version made from this by Simon Ockley was inserted by Whiston in the last [4th] volume of his *Primitive Christianity* (London, 1711). Fabricius added the various readings of the Arabic text to his edition of the Latin in 1723 (*Cod. Pseudep. V. T.* ii. 173 ff.). A third Æthiopic text was published in 1820 by [Archbp.] Laurence with English and Latin translations, likewise from a Bodleian MS. which had remained wholly disregarded, though quoted by Ludolf in his Dictionary (*Primi Esræ libri, versio Æthiopica . . . Latine Angliceque reddita*, Oxon. 1820). The Latin translation has been reprinted by Gfrörer, with the various readings of the Latin and Arabic (*Proph. Pseudep.* Stuttg. 1840, p. 66 ff.); but the original Arabic text had not yet been published.

2. The three versions were all made directly from a Greek text. This is evidently the case with regard to the Latin (Lücke, *Versuch einer vollst. Einleitung*, i. 149) and the Æthiopic (Van der Vlis, *Disputatio critica de Esræ lib. apocr.* Amstel., 1839, p. 75 ff.), and apparently so with regard to the Arabic. A clear trace of a Greek text occurs in the Epistle of Barnabas (c. xii. = 2 Ezr. v. 5), but the other supposed references in the Apostolic Fathers are very uncertain (*e. g.* Clem. i. 20; Herm. *Past.* i. 1, 3, &c.). The next witness to the Greek text is Clement of Alexandria, who expressly quotes the book as the work of "the prophet Ezra" (*Strom.* iii. 16, § 100). A question, however, has been raised whether the Greek text was not itself a translation from the Hebrew (Bretschneider, in Henke's *Mus.* iii. 478 ff. ap. Lücke, *l. c.*); but the arguments from language by which the hypothesis of a Hebrew (Aramaic) original is supported, are wholly unsatisfactory; and in default of direct evidence to the contrary, it must be supposed that the book was composed in Greek. This conclusion is further strengthened by its internal character, which points to Egypt as the place of its composition.

3. The common Latin text, which is followed in the English version, contains two important interpolations (ch. i., ii.; xv., xvi.) which are not found in the Arabic and Æthiopic versions, and are separated from the genuine Apocalypse in the best Latin MSS. Both of these passages are evidently

[a] Gfrörer obtained a transcript of a Greek MS. at Paris, bearing the title, which proved to be a worthless compilation of late date. *Jahrb. d. Heils*, i. 70, n.; comp. Van der Vlis, *Disp. crit. de Esræ lib. quarto* Pref. p. 6 ff

of Christian origin: they contain traces of the use of the Christian Scriptures (*e. g.* i. 30, 33, 37, ii. 18, 26, 45 ff., xv. 8, 35, xvi. 54), and still more they are pervaded by an anti-Jewish spirit. Thus, in the opening chapter, Ezra is commanded to reprove the people of Israel for their continual rebellions (i. 1–23), in consequence of which God threatens to cast them off (i. 24–34) and to "give their houses to a people that shall come." But in spite of their desertion, God offers once more to receive them (ii. 1–32). The offer is rejected (ii. 33), and the heathen are called. Then Ezra sees "the Son of God" standing in the midst of a great multitude "wearing crowns and bearing palms in their hands" in token of their victorious confession of the truth. The last two chapters (xv., xvi.) are different in character. They contain a stern prophecy of the woes which shall come upon Egypt, Babylon, Asia, and Syria, and upon the whole earth, with an exhortation to the chosen to guard their faith in the midst of all the trials with which they shall be visited (? the Decian persecution. Cf. Lücke, p. 186, &c.) Another smaller interpolation occurs in the Latin version in vii. 28, where *filius meus Jesus* answers to "*My Messiah*" in the Æthiopic, and to "*My Son Messiah*" in the Arabic (cf. Lücke, p. 170 n. &c.). On the other hand, a long passage occurs in the Æthiopic and Arabic versions after vii. 35, which is not found in the Latin (Æthiop. c. vi.), though it bears all the marks of genuineness, and was known to Ambrose (*de Bono Mort.* 10, 11). In this case the omission was probably due to dogmatic causes. The chapter contains a strange description of the intermediate state of souls, and ends with a peremptory denial of the efficacy of human intercession after death. Vigilantius appealed to the passage in support of his views, and called down upon himself by this the severe reproof of Jerome (*Lib. c. Vigil* c. 7). This circumstance, combined with the Jewish complexion of the narrative, may have led to its rejection in later times (cf. Lücke, p. 155 ff.).

4. The original Apocalypse (iii.–xiv.) consists of a series of angelic revelations and visions in which Ezra is instructed in some of the great mysteries of the moral world, and assured of the final triumph of the righteous. The *first revelation* (iii.–v. 15, according to the A. V.) is given by the angel Uriel to Ezra, in "the thirtieth year after the ruin of the city," in answer to his complaints (c. iii.) that Israel was neglected by God while the heathen were lords over them; and the chief subject is the unsearchableness of God's purposes, and the signs of the last age. The *second revelation* (v. 20–vi. 34) carries out this teaching yet further, and lays open the gradual progress of the plan of Providence, and the nearness of the visitation before which evil must attain its most terrible climax. The *third revelation* (vi. 35–ix. 25) answers the objections which arise from the apparent narrowness of the limits within which the hope of blessedness is confined, and describes the coming of Messiah and the last scene of Judgment. After this follow three visions. The *first vision* (ix. 26–x. 59) is of a woman (Sion) in deep sorrow, lamenting the death, upon his bridal day, of her only son (the city built by Solomon), who had been born to her after she had had no child for thirty years. But while Ezra looked, her face "upon a sudden shined exceedingly," and "the woman appeared no more, but there was a city builded." The *second vision* (xi.–xii.), in a dream, is of an eagle (Rome) which "came up from the sea" and "spread her wings over all the earth." As Ezra looked, the eagle suffered strange transformations, so that at one time "three heads and six little wings" remained; and at last only one head was left, when suddenly a lion (Messiah) came forth, and with the voice of a man rebuked the eagle, and it was burnt up. The *third vision* (xiii.), in a dream, is of a man (Messiah) "flying with the clouds of heaven," against whom the nations of the earth are gathered till he destroys them with the blast of his mouth, and gathers together the lost tribes of Israel and offers Sion, "prepared and builded," to his people The last chapter (xiv.) recounts an appearance to Ezra of the Lord who showed himself to Moses in the bush, at whose command he receives again the Law which had been burnt, and with the help of scribes writes down ninety-four books (the twenty-four canonical books of the O. T. and seventy books of secret mysteries), and thus the people is prepared for its last trial, guided by the recovered Law.

5. The date of the book is much disputed, though the limits within which opinions vary are narrower than in the case of the book of Enoch. Lücke (*Versuch einer vollst. Einl.* &c., 2e Aufl. i. 209) places it in the time of Cæsar; Van der Vlis (*Disput. crit.* l. c.) shortly after the death of Cæsar. Laurence (*l. c.*) brings it down somewhat lower, to 28–25 B. C., and Hilgenfeld (*Jüd. Apok.* p. 231) agrees with this conclusion, though he arrives at it by very different reasoning. On the other hand Gfrörer (*Jahrh. d. Heils*, i. 69 ff.) assigns the book to the time of Domitian, and in this he is followed by Wieseler and by [Bruno] Bauer (Lücke, p. 189, &c.), while Lücke in his first edition had regarded it as the work of a Hellenist of the time of Trajan. The interpretation of the details of the vision of the eagle, which furnishes the chief data for determining the time of its composition, is extremely uncertain from the difficulty of regarding the history of the period from the point of view of the author; and this difficulty is increased by the allusion to the desolation of Jerusalem, which may be merely suggested by the circumstances of Ezra, the imaginary author: or, on the contrary, the last destruction of Jerusalem may have suggested Ezra as the medium of the new revelation. (Cf. Fabricius, *Cod. Pseudep.* ii. p. 189 ff. and Lücke, p. 187, n. &c., for a summary of the earlier opinions on the composition of the book.)

6. The chief characteristics of the "three-headed eagle" which refer apparently to historic details,[a] are "twelve feathered wings" (duodecim alæ pennarum), "eight counter-feathers" (contrariæ pennæ), and "three heads;" but though the writer expressly interprets these of kings (xii. 14, 20) and "kingdoms" (xii. 23), he is, perhaps intentionally, so obscure in his allusions, that the interpretation only increases the difficulties of the vision itself. One point only may be considered certain, — the eagle can typify no other empire than Rome. Notwithstanding the identification of the eagle with the fourth empire of Daniel (cf. Barn. *Ep.* 4; DANIEL, BOOK OF), it is impossible to suppose that it rep-

[a] The description of the duration of the world as "divided into twelve (ten Æth.) parts, of which ten parts are gone already, and half of a tenth part" (xiv. 11), is so uncertain in its reckoning, that no argument can be based upon it.

Digitized by Google

resents the Greek kingdom (Hilgenfeld; cf. Volkmar, *Das vierte Buch Esra*, p. 36 ff. Zürich, 1858). The power of the Ptolemies could scarcely have been described in language which may be rightly applied to Rome (xi. 2, 6, 40); and the succession of kings quoted by Hilgenfeld to represent "the twelve wings" preserves only a faint resemblance to the imagery of the vision. But when it is established that the interpretation of the vision is to be sought in the history of Rome, the chief difficulties of the problem begin. The second wing (*i. e.* king) rules twice as long as the other (xi. 17). This fact seems to point to Octavian and the line of the Cæsars; but thus the line of "twelve" leads to no plausible conclusion. If it is supposed to close with Trajan (Lücke, *1ste Aufl.*), the "three heads" receive no satisfactory explanation. If, again, the "three heads" represent the three Flavii, then "the twelve" must be composed of the nine Cæsars (Jul. Cæsar — Vitellius) and the three pretenders Piso, Vindex, and Nymphidius (Gfrörer), who could scarcely have been brought within the range of a Jewish Apocalypse. Volkmar proposes a new interpretation, by which two wings are to represent *one* king, and argues that this symbol was chosen in order to conceal better from strange eyes the revelation of the seer. The twelve wings thus represent the six Cæsars (Cæsar — Nero); the eight "counter-feathers," the usurping emperors Galba, Otho, Vitellius, and Nerva; and the three heads the three Flavii. This hypothesis offers many striking coincidences with the text, but at the same time it is directly opposed to the form of interpretation given by Ezra (xii. 14, regnabunt . . . *duodecim* reges . . . v. 18, *octo* reges), and Volkmar's hypothesis that the *twelve* and *eight* were marked in the original MS. in some way so as to suggest the notion of division, is extremely improbable. Van der Vlis and Lücke in his later edition regard the twelve kings as only generally symbolic of the Roman power; and while they identify the three heads with the Triumvirs, seek no explanation of the other details. All is evidently as yet vague and uncertain, and will probably remain so till some clearer light can be thrown upon Jewish thought and history during the critical period 100 B. C.-100 A. D.

7. But while the date of the book must be left undetermined, there can be no doubt that it is a genuine product of Jewish thought. Weisse (*Evangelienfrage*, p. 222) alone dissents on this point from the unanimous judgment of recent scholars (Hilgenfeld, p. 190, &c.); and the contrast between the tone and style of the Christian interpolations and the remainder of the book is in itself sufficient to prove the fact. The Apocalypse was probably written in Egypt; the opening and closing chapters certainly were.

8. In tone and character the Apocalypse of Ezra offers a striking contrast to that of Enoch [ENOCH, BOOK OF.] Triumphant anticipations are overshadowed by gloomy forebodings of the destiny of the world. The idea of victory is lost in that of revenge. Future blessedness is reserved only for "a very few" (vii. 70, viii. 1, 3, 52–55, vii. 1–13). The great question is "not how the ungodly shall be punished, but how the righteous shall be saved, for whom the world is created" (ix. 13). The "woes of Messiah" are described with a terrible minuteness which approaches the despairing traditions of the Talmud (v., xiv. 10 ff., ix. 3 ff.); and after a reign of 400 years (vii. 28–35; the clause is wanting in Æth. v. 29) "Christ," it is said "my Son, shall die (*Arab.* omits), and all men that have breath; and the world shall be turned into the old silence seven days, like as in the first beginning, and no man shall remain" (vii. 29). Then shall follow the resurrection and the judgment, "the end of this time and the beginning of immortality" (vii. 43). In other points the doctrine of the book offers curious approximations to that of St. Paul, as the imagery does to that of the Apocalypse (*e. g.* 2 Esdr. xiii. 43 ff.; v. 4). The relation of "the first Adam" to his sinful posterity, and the operation of the Law (iii. 20 ff., vii. 48, ix. 36); the transitoriness of the world (iv. 26); the eternal counsels of God (vi. ff.); his providence (vii. 11) and long-suffering (vii. 64); his sanctification of his people "from the beginning" (ix. 8) and their peculiar and lasting privileges (vi. 59) are plainly stated: and on the other hand the efficacy of good works (viii. 33) in conjunction with faith (ix. 7) is no less clearly affirmed.

9. One tradition which the book contains obtained a wide reception in early times, and served as a pendant to the legend of the origin of the LXX. Ezra, it is said, in answer to his prayer that he might be inspired to write again all the Law which was burnt, received a command to take with him tablets and five men, and retire for forty days. In this retirement a cup was given him to drink, and forthwith his understanding was quickened and his memory strengthened; and for forty days and forty nights he dictated to his scribes, who wrote ninety-four books (*Latin*, 204), of which twenty-four were delivered to the people in place of the books which were lost (xiv. 20–48). This strange story was repeated in various forms by Irenæus (*adv. Hær.* iii. 21, 2), Tertullian (*de Cult. Fœm.* i. 3, "omne instrumentum Judaicæ literaturæ per Esdram constat restauratum"), Clement of Alexandria (*Strom.* i. 22, p. 410, P. cf. p. 392), Jerome (*adv. Helv.* 7, cf. Pseudo-Augustine, *de Mirab. S. Scr.* ii. 32), and many others; and probably owed its origin to the tradition which regarded Ezra as the representative of the men of "the Great Synagogue," to whom the final revision of the canonical books was universally assigned in early times. [CANON.]

10. Though the book was assigned to the "prophet" Ezra by Clement of Alexandria (Strom. iii. 16, p. 556 P.) and quoted with respect by Irenæus (*l. c.*), Tertullian (? *l. c.* Cf. *adv. Marc.* iv. 16), and Ambrose (*Ep.* xxxiv. 2; *de Bono Mortis*, 10 ff.), it did not maintain its ecclesiastical position in the church. Jerome speaks of it with contempt, and it is rarely found in MSS. of the Latin Bible. Archbishop Laurence examined 180 MSS. and the book was contained only in thirteen, and in these it was arranged very differently. It is found, however, in the printed copies of the Vulgate older than the Council of Trent, by which it was excluded from the Canon; and quotations from it still occur in the Roman services (Basnage, ap. Fabr. *Cod. Pseudep.* ii. 191). On the other hand, though this book is included among those which are "read for examples of life" by the English Church, no use of it is there made in public worship. Luther and the Reformed Church rejected the book entirely; but it was held in high estimation by numerous mystics (Fabric. *l. c.* p. 178 ff.) for whom its contents naturally had great attractions.

11. The chief literature of the subject has been

Digitized by Google

noticed in the course of the article. Lücke has, perhaps, given the best general account of the book; but the essay of Van der Vlis is the most important contribution to the study of the text, of which a critical edition is still needed, though the Latin materials for its construction are abundant.

B. F. W.

* Since the preceding article was published, the subject has been much discussed; and the recent literature is too important to be passed over without notice. Volkmar's view of the book as set forth in his *Das vierte Buch Esra*, u. s. w. Zürich, 1858, was criticised by Hilgenfeld (*Volkmar's Entdeckungen üb. das Apok. des Esra*, u. s. w.) in his *Zeitschr. f. wiss. Theol.* 1858, i. 247–270. In the volume of the same periodical for 1860 (iii. 1–81), the subject was further discussed by A. von Gutschmid, *Die Apok. d. Esra u. ihre spätern Bearbeitungen* (comp. Ewald, *Jahrb.* x. 222 ff.); and Ewald had in the mean time presented his view of the question in his *Gesch. d. Volkes Isr.* vii. 62–78 (1859), referring the book to the time of Titus, 78–81 A. D. See also Dillmann, art. *Pseudepigr. des A. T.* in Herzog's *Real-Encykl.* xii. 310 ff. (1860). Gutschmid agreed with Hilgenfeld in assigning the date of the main body of the work to about 30 B. C., but endeavored to rid himself of that *crux interpretum*, the vision of the Eagle (ch. xi., xii.) by the hypothesis of interpolation. Hilgenfeld reviewed the recent Apocalyptic literature in an elaborate article, *Die jüd. Apokalyptik u. die neuesten Forschungen*, in his *Zeitschr. f. wiss. Theol.* 1860, iii. 301–362 (on 2 Esdras, p. 335 ff.). In this article he was constrained to abandon the explanation which he had previously given of the 20 kings in the vision of the Eagle, and endeavored to find them among the Seleucidæ instead of the Ptolemies. It must be confessed, however, that the manner in which they are made out is far from satisfactory. Volkmar briefly replied in the *Zeitschr. f. wiss. Theol.* 1861, iv. 83 ff., and in 1863 published *Das vierte Buch Esra, zum Erstenmale vollständig herausgegeben*, as the 2d Abtheilung of his *Handbuch zu den Apokryphen*. This important work, indispensable to one who would make a thorough study of the book, contains a critical edition of the text of the Old Latin or Italic version, according to the *Codex Sangermanensis* of the 9th century, with the various readings of a newly discovered MS. of that version belonging to the State Library at Zürich (*Codex Turicensis*), and also of the Arabic and Æthiopic versions, so far as the means of giving them were then available. This text is accompanied by a critical and exegetical commentary, a new German translation, and a full discussion (pp. 273–408) of the questions relating to the nature and history of the book. This work was reviewed by Hilgenfeld in an article in his *Zeitschr. f. wiss. Theol.* for 1863, which was issued separately, with additions, under the title *Die Propheten Esra u. Daniel u. ihre neuesten Bearbeitungen*, Halle, 1863. Shortly after, in the same year, Ewald (who had previously criticised Volkmar in the *Götting. gelehrte Anzeigen*, 1863, p. 641 ff.) published *Das vierte Esrabuch nach seinem zeitalter, seinen Arabischen überszungen u. einer neuen wiederherstellung*, Göttingen, 1863, 4to, separately printed from vol. xi. of the *Abhandlungen* of the Royal Acad. of Sciences at Göttingen. Here he gives us for the first time, from a MS. in the Bodleian Library at Oxford, an edition of the Arabic version of the book, which had before been known only by Ockley's English translation, also a portion of another Arabic version, and various readings, communicated by Dillmann, of several MSS. of the Æthiopic version. — As to the comparative fidelity of these ancient translations, there is a difference of opinion. Volkmar regards the Old Latin version as almost a daguerreotype of the original Greek; Hilgenfeld gives the preference to the Arabic; Ewald generally adheres to the Old Latin text, but not unfrequently adopts the readings of the Arabic, and occasionally of the Æthiopic, in their stead. For a good review, by Hermann Schultz, of the essays of Hilgenfeld, Volkmar, and Ewald, on the 2d book of Esdras, see the *Jahrb. f. deutsche Theol.* 1864, ix. 165–173. Volkmar's view respecting the date of 2d Esdras (97 A. D.) appears to be gaining prevalence, being adopted by writers of opposite schools, as Strauss, Colani, Scholten, Pressensé, and the Catholic Langen in his recent treatise, *Das Judenthum zur Zeit Jesu* (1866), p. 118 ff. But the contest, it appears, is not yet over. Hilgenfeld, in a notice of Volkmar's last work, *Mose Prophetie u. Himmelfahrt*, Leipz. 1867, which is closely connected in its subject with the second book of Esdras, announces that he "shall soon speak further respecting the prophet Ezra, and explain the only real difficulty in the way of his view, namely, the passage, ch. xi. 17, without any alteration of the text" (*Zeitschr. f. wiss. Theol.* 1867, x. 217). A.

* **ESDRE'LOM, ESDRE'LON.** [ESDRAËLON.]

ES'EBON, THEY OF (τοὺς Ἐσεβωνίτας [Vat. -νει-; Sin. Ald.] Alex. τοὺς Ἐσεβών: *Hesebon*), Jud. v. 15. [HESHBON.]

ESEBRI'AS (Ἐσερεβίας; [Ald. Ἐσερβίας Wechel (1597) Ἐσεβρίας:] *Sedebias*), 1 Esdr viii. 54. [SHEREBIAH.]

E'SEK (עֵשֶׂק [*strife*]: Ἀδικία: *Calumnia*) a well (בְּאֵר) containing a spring of water; which the herdsmen of Isaac dug in the valley of Gerar, and which received its name of Esek or "strife," because the herdmen of Gerar "strove" (הִתְעַשְּׂקוּ) with him for the possession of it[a] (Gen. xxvi. 20)

ESH-BA'AL (אִישְׁבַּעַל = *Baal's man*: Ἀσαβδάλ; [1 Chr. viii. 33, Alex. Ἰεβααλ, Ald Ἰεσβαδάλ, Comp. Ἰσβαδάλ; ix. 39, Vat. Ἰεβααλ Alex. Βααλ, Ald. Ἰσβδέλ, Comp. Sin. Ἰσβαδάλ:] *Esbaal*), the fourth son of Saul, according to the genealogy of 1 Chr. viii. 33 and ix. 39. He is doubtless the same person as ISH-BOSHETH, since it was the practice to change the obnoxious name of Baal into Bosheth or Besheth, as in the case of Jerub-besheth for Jerub-baal, and (in this very genealogy) of Merib-baal for Mephi-bosheth: compare also Hos. ix. 10, where Bosheth (A. V. "shame") appears to be used as a synonym for Baal. If Esh-baal is not identical with Ish-boshieth, the latter has been omitted entirely from these lists of Saul's descendants, which, considering his posi-

[a] The word rendered "strive" (רִיב) in the former part of ver. 20, and in 21 and 22, is not the same as that from which *Esek* derived its name and should be translated by a different English word. Such points, though small, are anything but unimportant in connection with these ancient and peculiar records

Digitized by Google

tion, is not likely. Which of the two names is the earlier it is not possible to decide. G.

ESH'BAN (אֶשְׁבָּן [*wise hero*, Fürst]: Ἀσβάν, Ἀσεβάν; Alex. [in 1 Chr.] Ἐσεβαν: *Esebam*), a Horite; one of the four sons of DISHAN (so the Hebrew in Gen.; but A. V. has Dishon), the son of Seir the Horite (Gen. xxxvi. 26; 1 Chr. i. 41). No trace of the name appears to have been discovered among the modern tribes of Idumæa.

ESH'COL (אֶשְׁכֹּל [*a bunch, cluster*, especially of grapes]: Ἐσχώλ; [Alex. ver. 24, Ἐσχωλ;] Josephus Ἐσχόλης: *Eschol*), brother of Mamre the Amorite, and of Aner; and one of Abraham's companions in his pursuit of the four kings who had carried off Lot (Gen. xiv. 13, 24). According to Josephus (*Ant.* i. 10, § 2) he was the foremost of the three brothers, but the Bible narrative leaves this quite uncertain (comp. 13 with 24). Their residence was at Hebron (xiii. 18), and possibly the name of Eshcol remained attached to one of the fruitful valleys in that district till the arrival of the Israelites, who then interpreted the appellation as significant of the gigantic "cluster" (in Hebr. *Eshcol*), which they obtained there.

* It is more probable that Eshcol, the chieftain, derived the name from the region or town over which he ruled, which in its turn was so called on account of its fruitful vineyards. So in the case of Shechem (Gen. xxxiv. 2), the Hivite prince must have taken his name from the place, and not the place from him [SHECHEM]. The Amoritic name may well have been very similar in form, as well as meaning, to the later Hebrew name. H.

ESH'COL, THE VALLEY, OR THE BROOK, OF (נַחַל־אֶשְׁכּוֹל, or אֶשְׁכֹּל: φάραγξ βότρυος: [*Torrens botri*,] *Nehelescol, id est torrens botri*, [*Vallis botri*]), a wady in the neighborhood of Hebron, explored by the spies who were sent by Moses from Kadesh-barnea. From the terms of two of the notices of this transaction (Num. xxxii. 9; Deut. i. 24) it might be gathered that Eshcol was the furthest point to which the spies penetrated. But this would be to contradict the express statement of Num. xiii. 21, that they went as far as Rehob. From this fruitful valley they brought back a huge cluster of grapes, an incident which, according to the narrative, obtained for the place its appellation of the "valley of the cluster" (Num. xiii. 23, 24). It is true that in Hebrew *Eshcol* signifies a cluster or bunch, but the name had existed in this neighborhood centuries before, when Abraham lived there with the chiefs Aner, Eshcol, and Mamre, not Hebrews but Amorites; and this was possibly the Hebrew way of appropriating the ancient name derived from that hero into the language of the conquerors, consistently with the paronomastic turns so much in favor at that time, and with a practice of which traces appear elsewhere. [See under ESHCOL.]

In the *Onomasticon* of Eusebius the φάραγξ βότρυος is placed, with some hesitation, at Gophna, fifteen miles north of Jerusalem, on the Neapolis road. By Jerome it is given as north of Hebron on the road to Bethsur (*Epitaph. Paulæ*). The Jewish traveller Ha-Parchi speaks of it as north of the mountain on which the (ancient) city of Hebron stood (Benjamin of Tudela, *Asher*, ii. 437); and here the name has been lately observed still attached to a spring of remarkably fine water called '*Ain-Eshkalı*, in a valley which crosses the vale of Hebron N. E. and S. W., and about two miles north of the town (Van de Velde, *Narrative*, &c., ii. 64). It is right to say that this interesting intelligence has not been yet confirmed by other observers.*

G.

* Mr. Tristram's description of this valley as it now is (*Land of Israel*, p. 397, 2d ed.), shows how well it must have deserved its ancient fame. "The walk up the valley revealed to us for the first time what Judah was everywhere else in the days of its prosperity. Bare and stony as are the hill-sides, not an inch of space is lost. Terraces, where the ground is not too rocky, support the soil. Ancient vineyards cling to the lower slopes; olive, mulberry, almond, fig, and pomegranate trees fill every available cranny to the very crest, while the bottom of the valley is carefully tilled for corn, carrots, and cauliflowers, which will soon give place to melons and cucumbers. Streamlets of fresh water trickled on each side of our path. The production and fertility, as evidenced even in winter, is extraordinary; and the culture is equal to that of Malta. That catacomb of perished cities, the hill-country of Judah, through whose labyrinths we yesterday wandered, is all explained by a walk up the Vale of Eshcol; and those who doubt the ancient records of the population, or the census of David or his successors, have only to look at this valley, and by the light of its commentary to read the story of those cities." H.

E'SHEAN (אֶשְׁעָן: Ἀσάν; [Comp. Ald.] Alex. Ἐσάν: *Esaan*), one of the cities of Judah, in the mountainous district, and in the same group with Hebron (Josh. xv. 52). The name does not occur again, nor has it been met with in modern times. G.

E'SHEK (עֶשֶׁק: Ἀσήλ; Alex. Ἐσελεκ; [Comp. Ἀσέκ:] *Esec*), a Benjamite, one of the late descendants of Saul; the founder of a large and noted family of archers, lit. "treaders of the bow" (1 Chr. viii. 39). The name is omitted in the parallel list of 1 Chr. ix.

ESH'KALONITES, THE (accurately "the Eshklonite," הָאֶשְׁקְלוֹנִי, in the singular number: τῷ Ἀσκαλωνίτῃ; [Vat. -νει-:] *Ascalonitæ*) Josh. xiii. 3. [ASHKELON.]

ESH'TAOL (אֶשְׁתָּאוֹל and [*recess*, Ges.; *deep* or *hollow way*, Fürst]: Ἀσταώλ, Ἀσά, Ἐσθαόλ, [etc.: *Estaol*,] *Esthaol*), a town in the low country — the *Shefelah* — of Judah. It is the first of the first group of cities in that district (Josh. xv. 33), enumerated with Zorcah (Heb *Zareah*), in company with which it is commonly mentioned. Zorah and Eshtaol were two of the towns allotted to the tribe of Dan out of Judah

* We have a minute account of the valley of Hebron and its immediate neighborhood, by Dr. Rosen, the Prussian consul at Jerusalem, in the *Zeitsch. d. D. M. Gesellschaft*, 1858 (xii. 481. 482). Instead of Van de Velde's '*Ain-Eskal*ı (written *Eshkal*ı above; see his *Syr. & Pal.* ii. 64), Dr. Rosen, who speaks of the same fountain, writes the name as '*Ain-el-Kashkala*. Though an expert Arabic scholar, he does not recognise this name as related in any way to Eshcol. See also Rob. *Phys. Geogr.* p. 121 H.

(Josh. xix. 41). Between them, and behind Kirjath-jearim, was situated Mahaneh-Dan, the camp or stronghold which formed the head-quarters of that little community during their constant encounters with the Philistines. Here, among the old warriors of the tribe, Samson spent his boyhood, and experienced the first impulses of the Spirit of Jehovah; and hither after his last exploit his body was brought, up the long slopes of the western hills, to its last rest in the burying-place of Manoah his father (Judg. xiii. 25, xvi. 31, xviii. 2, 8, 11, 12). [DAN.] In the genealogical records of 1 Chron. the relationship between Eshtaol, Zareah, and Kirjath-jearim is still maintained. [ESHTAÜLITES.]

In the *Onomasticon* of Eusebius and Jerome Eshtaol is twice mentioned — (1) as Astaol of Judah, described as then existing between Azotus and Ascalon under the name of *Astho;* (2) as Esthaul of Dan, ten miles N. of Eleutheropolis. The latter position is hardly more in accordance with the indications of the Bible. In more modern times the name has vanished. Zorah has been recognized as *Sŭrah* (Rob. ii. 14, 16, 224, iii. 153), but the identification of Eshtaol has yet to be made. Schwarz (p. 102) mentions a village named *Stual*, west of Zorah, but, apart from the fact that this is corroborated by no other traveller and by no map, the situation is too far west to be "behind Kirjath-jearim" if *Kuryet el-Enab* be Kirjath-jearim. The village marked on the maps of Robinson and Van de Velde, *Yeshûa*, and alluded to by the former (iii. 155), is nearer the requisite position; but the resemblance between the two names is too faint to admit of identification. G.

ESHTAÜLITES, THE (הָאֶשְׁתָּאֻלִי), accurately "the Eshtaülite," in singular number; *viol* Εσθαάμ, Alex. *οι* Εσθαωλαιοι: *Esthaolitæ*), with the Zareathites, were among the families of Kirjath-jearim (1 Chr. ii. 53). [ESHTAOL.]

ESHTEMO'A, and in shorter form, without the final guttural, **ESHTEMOH** (אֶשְׁתְּמֹעַ and אֶשְׁתְּמֹה [*woman of renown*, but uncertain]; the latter occurs in Josh. xv. only: [in Josh. xv.,] corruptly Εσ και Μάν; Alex. Εσθεμω; [Josh. xxi.,] Τεμά; [Alex. Εσθεμω; 1 Sam.,] Εσθιέ [Vat. -θειε; Alex. Εσθεμα; 1 Chr. iv. 17, Εσθαμών; Alex. Εσθεμων; vi. 57,] Εσθαμά: *Istemo, Estemo*, [*Esthamo, Esthemo*]), a town of Judah, in the mountains; one of the group containing DEBIR (Josh. xv. 50). With its "suburbs" Eshtemoa was allotted to the priests (xxi. 14; 1 Chr. vi. 57). It was one of the places frequented by David and his followers during the long period of their wanderings; and to his friends there he sent presents of the spoil of the Amalekites (1 Sam. xxx. 28, comp. 31). The place was known in the time of Eusebius and Jerome (*prægrandis vicus*), though their description of its locality is too vague to enable us to determine it (Onom. *Esthemo*). But there is little doubt that it has been discovered by Dr. Robinson at *Semu'a*, a village seven miles south of Hebron, on the great road from *el-Milh*, containing considerable ancient remains, and in the neighborhood of other villages still bearing the names of its companions in the list of Josh. xv., as Anab, Socoh, Jattir, &c. (See Robinson, i. 494. ii. 204, 295; Schwarz, p. 105; [Wilson, *Lands of the Bible*, i. 353.])

In the lists — half genealogical, half topographical — of the descendants of Judah in 1 Chr., Eshtemoa occurs as derived from Ishbah, "the father of Eshtemoa" (1 Chr. iv. 17); Gedor, Socoh, and Zanoah, all towns in the same locality, being named in the following verse. Eshtemoa appears to have been founded by the descendants of the Egyptian wife of a certain Mered, the three other towns by those of his Jewish wife. See the explanations of Bertheau (*Chronik*, ad loc.). G.

* The "father of Eshtemoa," as Ishbah is called (see above), means that he was its founder or repairer, and head of the clan. [FATHER.] A recent traveller says that the town has now about 500 inhabitants. The ruins there consist of the remains of an early Greek church, many pieces of ancient carving, a marble sarcophagus built into the wall, and numerous sculptured doorways and broken columns (Tristram, *Land of Israel*, p. 391, 2d ed.). The "hill-country" of Judah is full of such examples of the ancient prosperity and present decay. H.

ESHTEMO'A (Εσθαμών; Alex. Ιεσθεμωη: *Esthamo*) in 1 Chr. iv. 19 appears to be the name of an actual person. [MAACHATHITE.]

ESH'TON (אֶשְׁתּוֹן [*effeminate* or *uxorious*, Gesen.]: Ασσαθών: *Eshton*), a name which occurs in the genealogies of Judah (1 Chr. iv. 11, 12). Mehir was "the father of Eshton," and amongst the names of his four children [three] are two — Beth-rapha and Ir-nahash — which have the appearance of being names, not of persons [merely], but of places. G.

ES'LI (Rec. T. Εσλί, [Tisch. and Treg. with] B [Sin. etc.] Εσλεί, probably = אַזַלְיָהוּ, AZALIAH: *Esli*, Cod. Amiat. *Hesli*), son of Nagge or Naggai, and father of Naum, in the genealogy of Christ (Luke iii. 25). See Hervey, *Genealogies*, &c., p. 136.

ESO'RA (Αἰσωρά; [Sin.[1] Αρασουσια; Comp. Ald. Εσωρά:] Vulg. omits: the Peshito Syriac reads *Bethchorn*), a place fortified by the Jews on the approach of the Assyrian army under Holofernes (Jud. iv. 4). The name may be the representative of the Hebrew word Hazor, or Zorah (Simonis, *Onom. N. T.* 19), but no identification has yet been arrived at. The Syriac reading suggests Beth-boron, which is not impossible.

* **ESPOUSAL.** [MARRIAGE.]

ES'RIL (Εσρίλ; [Vat. Εζρειλ;] Alex. Εζρι· Vulg omits), 1 Esdr. ix. 34. [AZAREEL 4, *or* SHARAI.]

ESROM (Rec. T. Εσρώμ; in Luke, Lachm. with B, Εσρών [so Elz. and Tisch. 7th ed.]: *Esrom*), Matt. i. 3; Luke iii. 33. [HEZRON.]

ESSE'NES. 1. In describing the different sects which existed among the Jews in his own time, Josephus dwells at great length and with especial emphasis on the faith and practice of the *Essenes*, who appear in his description to combine the ascetic virtues of the Pythagoreans and Stoics with a spiritual knowledge of the Divine Law. An analogous sect, marked, however, by characteristic differences, appears in the Egyptian *Therapeutæ*, and from the detailed notices of Josephus (*B. J.* ii 8; *Ant.* xiii. 5, § 9, xv. 10, § 4 f., xviii. 1, § 2 ff.) and Philo (*Quod omn. prob. liber*, § 12 ff.; *Fragm. de Vita contemplativa* ap. Euseb. *Præp. Ev.*), and the casual remarks of Pliny (*H. N.* v. 17), later writers have frequently discussed the relation which

Digitized by Google

these Jewish mystics occupied towards the popular religion of the time, and more particularly towards the doctrines of Christianity. For it is a most remarkable fact that the existence of such sects appears to be unrecognized both in the apostolic writings and in early Hebrew literature.

2. The name *Essene* ('Εσσηνοί, Joseph. *Esseni*, Plin.) or *Essæan* ('Εσσαῖοι, Philo; Joseph. *B. J.* . 3, § 5, &c.) is itself full of difficulty. Various derivations have been proposed for it, and all are more or less open to objection. Some have connected it with חסיד ('Ασιδαῖος), *puritan*, or צנועין, *the retiring*, or חזן, *the servant* (of God); others, again, find the root in אסא, *to heal* (Baur), or חסה, *to bathe* (Grätz). Philo, according to his fashion, saw in the word a possible connection with the Greek ὅσιος, *holy* (*Quod omn. prob. lib.* § 12); and Epiphanius interpreted the collateral form 'Οσσηνοί as meaning "the stout race" (στιβαρὸν γένος, *Hær.* xix. *i. e.* חסין). It seems more likely that Essene represents חזין, *seers* (so Suidas = θεωρητικοί, Hilgenfeld, or חשאין, *the silent, the mysterious* (Jost).[a] Josephus represents חשן (LXX. λογεῖον), *the high-priest's breastplate*, by 'Εσσήνης, interpreting the word as equivalent to λόγιον, *oracle* (*Ant.* iii. 7, § 5). Comp. Jost, *Gesch. d. Judenth.* i. 207 n.; Hilgenfeld, *Jüd. Apok.* p. 277 f.; Ewald, *Gesch. Isr.* iv. 420 n.

3. The obscurity of the Essenes as a distinct body arises from the fact that they represented originally a tendency rather than an organization. The communities which were formed out of them were a result of their practice, and not a necessary part of it. As a sect they were distinguished by an aspiration after ideal purity rather than by any special code of doctrines; and like the Chasidim of earlier times [ASSIDEANS], they were confounded in the popular estimation with the great body of the zealous observers of the Law (Pharisees). The growth of Essenism was a natural result of the religious feeling which was called out by the circumstances of the Greek dominion; and it is easy to trace the process by which it was matured. From the Maccabæan age there was a continuous effort among the stricter Jews to attain an absolute standard of holiness. Each class of devotees was looked upon as practically impure by their successors, who carried the laws of purity still further; and the Essenes stand at the extreme limit of the mystic asceticism which was thus gradually reduced to shape. The associations of the "Scribes and Pharisees" (חברים, *the companions, the wise*) gave place to others bound by a more rigid rule: and the rule of the Essenes was made gradually stricter. Judas, the earliest Essene who is mentioned (c. 110 B. C.), appears living in ordinary society (Joseph. *B. J.* i. 3, § 5). Menahem, according to tradition a colleague of Hillel, was a friend of Herod, and brought upon his sect the favor of the king (Joseph. *Ant.* xv. 10, § 5). But by a natural impulse the Essenes withdrew from the dangers and distractions of business. From the cities they retired to the wilderness to realize the conceptions of religion which they formed, but still they remained on the whole true to their ancient faith. To the Pharisees they stood nearly in the same relation as that in which the Pharisees themselves stood with regard to the mass of the people. The differences lay mainly in rigor of practice, and not in articles of belief.

4. The traces of the existence of Essenes in common society are not wanting nor confined to individual cases. Not only was a gate at Jerusalem named from them (Joseph. *B. J.* v. 4, § 2, 'Εσσηνῶν πύλη), but a later tradition mentions the existence of a congregation there which devoted "one third of the day to study, one third to prayer, and one third to labor" (Frankel, *Zeitschrift*, 1846, p. 458). Those, again, whom Josephus speaks of as allowing marriage, may be supposed to have belonged to such bodies as had not yet withdrawn from intercourse with their fellow-men. But the practice of the extreme section was afterwards regarded as characteristic of the whole class, and the isolated communities of Essenes furnished the type which is preserved in the popular descriptions. These were regulated by strict rules, analogous to those of the monastic institutions of a later date. The candidate for admission first passed through a year's noviciate, in which he received, as symbolic gifts, an axe, an apron, and a white robe, and gave proof of his temperance by observing the ascetic rules of the order (τὴν αὐτὴν δίαιταν). At the close of this probation, his character (τὸ ἦθος) was submitted to a fresh trial of two years, and meanwhile he shared in the lustral rites of the initiated, but not in their meals. The full membership was imparted at the end of this second period, when the novice bound himself "by awful oaths" — though oaths were absolutely forbidden at all other times — to observe piety, justice, obedience, honesty, and secrecy, "preserving alike the books of their sect, and *the names of the angels*" (Joseph. *B. J.* ii. 8, § 7).

5. The order itself was regulated by an internal jurisdiction. Excommunication was equivalent to a slow death, since an Essene could not take food prepared by strangers for fear of pollution. All things were held in common, without distinction of property or house; and special provision was made for the relief of the poor. Self-denial, temperance, and labor — especially agriculture — were the marks of the outward life of the Essenes; purity and divine communion the objects of their aspiration. Slavery, war, and commerce were alike forbidden (Philo, *Quod omn. prob. liber*, § 12, p. 877 M.); and, according to Philo, their conduct generally was directed by three rules, "the love of God, the love of virtue, and the love of man" (Philo, *l. c.*).

6. In doctrine, as has been seen already, they did not differ essentially from strict Pharisees. Moses was honored by them next to God (Joseph *B. J.* ii. 8, 9). They observed the Sabbath with singular strictness; and though they were unable

[a] Jost himself, as Ginsburg correctly remarks (Kitto's *Cycl. of Bibl. Lit.*, 3d ed., i. 827, note), hazards no opinion about the etymology of this name. He merely says that Josephus seems to derive it from חשה, "to be silent," "mysterious." Ginsburg (*l. c.*) enumerates 19 different etymologies which have been proposed for the word, the last being the derivation from חסיא, "pious." To this he inclines "because it plainly connects the Essenes with the *Chasidim*, from which they originated."

Digitized by Google

other sacrifices at Jerusalem, probably from regard to purity (διαφορότητι ἁγνειῶν), they sent gifts thither (Joseph. *Ant.* xviii. 2, § 5): at the same time, like most ascetics, they turned their attention specially to the mysteries of the spiritual world, and looked upon the body as a mere prison of the soul.[a] They studied and practiced with signal success, according to Josephus, the art of prophecy (Joseph. *B. J.* ii. 8; cf. *Ant.* xv. 10, § 5; *B. J.* i. 3, § 5); and familiar intercourse with nature gave them an unusual knowledge of physical truths. They asserted with peculiar boldness the absolute power and foreknowledge of God (Joseph. *Ant.* xiii. 5, § 9, xviii. 1, § 5); and disparaged the various forms of mental philosophy as useless or beyond the range of man (Philo, *l. c.* p. 877).

7. The number of the Essenes is roughly estimated by Philo at 4000 (Philo, *l. c.*), and Josephus says that there were "more than 4000" who observed their rule (*Ant.* xviii. 2, § 5). Their best-known settlements were on the N. W. shore of the Dead Sea (Philo, Plin., *ll. cc.*), but others lived in scattered communities throughout Palestine, and perhaps also in cities (Joseph. *B. J.* ii. 8, § 4. Cf. [Hippol.] *Philos.* ix. 20).

8. In the Talmudic writings there is, as has been already said, no direct mention of the Essenes, but their existence is recognized by the notice of peculiar points of practice and teaching. Under the titles of "the pious," "the weakly" (*i. e.* with study), "the retiring," their maxims are quoted with respect, and many of the traits preserved in Josephus find parallels in the notices of the Talmud (Z. Frankel, *Zeitschrift*, Dec. 1846, p. 451 ff.; *Monatsschrift*, 1853, p. 37 ff.). The four stages of purity which are distinguished by the doctors (*Chagiga*, 18 a, ap. Frankel, *l. c.* p. 451) correspond in a singular manner with the four classes into which the Essenes are said to have been divided (Joseph. *B. J.* ii. 8, § 10); and the periods of probation observed in the two cases offer similar coincidences.

9. But the best among the Jews felt the peril of Essenism as a system, and combined to discourage it. They shrank with an instinctive dread from the danger of connecting asceticism with spiritual power, and cherished the great truth which lay in the saying "Doctrine is not in heaven." The miraculous energy which was attributed to mystics was regarded by them rather as a source of suspicion than of respect; and theosophic speculations were condemned with emphatic distinctness (Frankel, *Monatsschrift*, 1853, pp. 62 ff., 68, 71).

10. The character of Essenism limited its spread. Out of Palestine, Levitical purity was impossible, for the very land was impure; and thus there is no trace of the sect in Babylonia. The case was different in Egypt, where Judaism assumed a new shape from its intimate connection with Greece. Here the original form in which it was moulded was represented not by direct copies, but by analogous forms; and the tendency which gave birth to the Essenes found a fresh development in the pure speculation of the Therapeutæ. These Alexandrine mystics abjured the practical labors which rightly belonged to the Essenes, and gave themselves up to the study of the inner meaning of the Scriptures. The impossibility of fulfilling the law naturally led them to substitute a spiritual for a literal interpretation; and it was their object to ascertain its meaning by intense labor, and then to satisfy its requirements by absolute devotion. The "whole day, from sunrise to sunset, was spent in mental discipline." Bodily wants were often forgotten in the absorbing pursuit of wisdom, and "meat and drink" were at all times held to be unworthy of the light (Philo, *De vit. contempl.* § 4).

11. From the nature of the case Essenism in its extreme form could exercise very little influence on Christianity. In all its practical bearings it was diametrically opposed to the apostolic teaching. The dangers which it involved were far more clear to the eye of the Christian than they were to the Jewish doctors. The only real similarity between Essenism and Christianity lay in the common element of true Judaism: and there is little excuse for modern writers who follow the error of Eusebius, and confound the society of the Therapeutæ with Christian brotherhoods. Nationally, however, the Essenes occupy the same position as that to which John the Baptist was personally called. They mark the close of the old, the longing for the new, but in this case without the promise. In place of the message of the coming "kingdom" they could proclaim only individual purity and isolation. At a later time traces of Essenism appear in the Clementines, and the strange account which Epiphanius gives of the *Osseni* (Ὀσσηνοί) appears to point to some combination of Essene and pseudo-Christian doctrines (*Hær.* xix.). After the Jewish war the Essenes disappear from history. The character of Judaism was changed, and ascetic Pharisaism became almost impossible.

12. The original sources for the history of the Essenes have been already noticed. Of modern essays, the most original and important are those of Frankel in his *Zeitschrift*, 1846, pp. 441–461, and *Monatsschrift*, 1853, p. 30 ff., taken in conjunction with the wider view of Jost, *Gesch. d. Judenth.* i. 207 ff. The account of Hilgenfeld (*Jüd. Apokalyptik*, p. 245 ff.) is interesting and ingenious, but essentially one-sided and subservient to the writer's theory (cf. Volkmar, *Das vierte B. Ezra*, p. 60). Gfrörer (*Philo*, ii. 299 ff.), Dähne (*Jüd. Alex. Relig.-Philos.* i. 467 ff.), and Ewald (*Gesch d. Volk. Isr.* iv. 420 ff.), all contribute important sketches from their respective points of view. The earlier literature, as far as it is of any value, is embodied in these works. B. F. W.

* It may be well to add to the preceding article references to the more recent discussions concerning the Essenes, noticing also some older works which may still be useful to the inquirer. Prideaux, *Connection*, etc. pt. ii. bk. v. has translated in full the passages of Josephus and Philo which relate to them — to be sure, not always accurately. See also Bellermann, *Gesch. Nachrichten aus dem Alterthume über Essäer u. Therapeuten*, Berl. 1821, and P. Beer, *Geschichte, Lehren u. Meinungen alter relig. Sekten d. Juden*, Brünn, 1822, i. 68–113. De Quincey's ingenious but paradoxical essay, in which he endeavors to show that Josephus has given under the name of Essenes a disguised account of a portion of the early Christians, first appeared in *Blackwood's Magazine* for Jan., April, and May, 1840, and was reprinted in his *Hist. and Crit. Essays*, Boston, 1856, i. 26–112, with a Supplement in his *Avenger*, &c. (*ibid.* 1859), pp. 107–

[a] "Accordingly, though they believed in the immortality of the soul, they did not believe in the resurrection of the body (Joseph. *B. J.* ii. 8, § 11). A.

130. There is a review of De Quincey in Kitto's *Journ. of Sacred Lit.* for Oct. 1852, pp. 176–86; see also on the Essenes the number for April 1853, p. 170 ff. The relation of Christianity to Essenism is elaborately discussed by A. F. V. von Wegnern (*Das Verhältniss des Christenthums zum Essenismus*) in Illgen's *Zeitschr. f. d. hist. Theol.* 1841, ii. 3–76. See also, for different views, Neander's *Hist. of the Christ. Rel. and Church*, i. 43–49 (Torrey's transl.); Baur, *Das Christenthum d. drei ersten Jahrh.*, 2e Aufl. 1860, p. 19 ff.; Hilgenfeld, *Der Essäismus und Jesus*, in his *Zeitschr. f. wiss. Theol.* 1867, x. 97–111 (comp. *ib.* iii. 358–62); and A. Réville, *Jésus et l'Essénisme*, in the Strasbourg *Rev. de théol.* 1867, pp. 221–245 (comp. *Rev. des Deux Mondes* for Sept. 15, 1867, p. 331 ff.) On the general subject one may further compare Ritschl, *Ueber die Essener*, in Baur and Zeller's *Theol. Jahrb.* 1855, xiv. 315–56 (comp. his *Entstehung d. altkath. Kirche*, 2e Aufl. 1857, pp. 179–248); Zeller, *Ueber den Zusammenhang des Essäismus mit dem Griechenthum*, ibid. 1856, xv. 401–33; Döllinger, *Heidenthum u. Judenthum*, 1857, p. 754 ff., or (Eng. trans.) *The Gentile and Jew*, ii. 309–17; Reuss, *Hist. de la théol. chrétienne*, 2e éd. 1860, pp. 115–25; M. Nicolas, *Des doctrines relig. des Juifs*, 1860, pp. 80–92; and Ginsburg, *The Essenes, their History and Doctrines*, Lond. 1864. The last mentioned writer in his art. *Essenes* in Kitto's *Cycl. of Bibl. Lit.* 3d ed., says that "Graetz, adopting the results of Frankel, and pursuing the same course still further, has given a masterly treatise upon the Essenes in his *Geschichte der Juden*, Leipzig, 1856, iii. 96 ff., 518 ff."; and also commends highly Herzfeld's account in his *Geschichte d. Volkes Jisrael*, Nordhausen, 1857, ii. 368, 388 ff. He further speaks of "the very interesting and important relics of the Essenes, published by Jellinek . . . in *Beth Ha-Midrash*, vol. ii. (Leipz. 1853), p. xviii. ff.; vol. iii. p. xx. ff."

Only a hint can be here given of the distinctive views of some of the writers above named. Dähne traces in the sect the influence of the Jewish-Alexandrian philosophy; comp. Uhlhorn in Herzog's *Real-Encykl.* iv. 176. Baur and Zeller derive Essenism mainly from the influence of the Neo-Pythagorean philosophy and asceticism upon Judaism. Neander regards it as modified by the infusion of old oriental, Parsi, and Chaldæan elements. Hilgenfeld connects it with the later Jewish prophetic tendency as shown in apocalyptic writings, but derives many characteristics of the sect from Parsi and even Buddhistic influences. Ritschl regards it as an attempt to embody the idea that *all* the Jews, and not a particular order, were a "kingdom of priests" unto God (Ex. xix. 6). He with other writers (as Reuss) finds a close connection between Essenism and Ebionitism, and traces its influence in the history of the Christian church. Ewald (*Gesch. d. Volkes Isr.* iv. 476 ff., 3d ed.), Frankel, Jost, Ginsburg, and Réville agree substantially in the view presented in the preceding article. A.

ESTHER (אֶסְתֵּר, *the planet Venus*: Ἐσθήρ), the Persian name of HADASSAH, daughter of Abihail the son of Shimei, the son of Kish, a Benjamite, and cousin of MORDECAI. The explanation of her old name Hadassah, by the addition of her new name, by which she was better known, with the formula, הִיא אֶסְתֵּר, "that is Esther" (Esth. ii. 7), is exactly analogous to the usual addition of the modern names of towns to explain the use of the old obsolete ones (Gen. xxxv. 19, 27; Josh. xv. 10, &c.). Esther was a beautiful Jewish maiden, whose ancestor Kish had been among the captives led away from Jerusalem (part of which was in the tribe of Benjamin) by Nebuchadnezzar when Jehoiachim was taken captive. She was an orphan without father or mother, and had been brought up by her cousin Mordecai, who had an office in the household of Ahasuerus king of Persia, and dwelt at "Shushan the palace." When Vashti was dismissed from being queen, and all the fairest virgins of the kingdom had been collected at Shushan for the king to make choice of a successor to her from among them, the choice fell upon Esther, and she was crowned queen in the room of Vashti with much pomp and rejoicing. The king was not aware, however, of her race and parentage; and so, with the careless profusion of a sensual despot, on the representation of Haman the Agagite, his prime minister, that the Jews scattered through his empire were a pernicious race, he gave him full power and authority to kill them all, young and old, women and children, and take possession of all their property. The means taken by Esther to avert this great calamity from her people and her kindred, at the risk of her own life, and to turn upon Haman the destruction he had plotted against the Jews, and the success of her scheme, by which she changed their mourning, fasting, weeping, and wailing, into light and gladness and joy and honor, and became for ever especially honored amongst her countrymen, are fully related in the book of Esther. The feast of Purim, *i. e.* of *Lots*, was appointed by Esther and Mordecai to be kept on the 14th and 15th of the month Adar (February and March) in commemoration of this great deliverance. [PURIM.] The decree of Esther to this effect is the last thing recorded of her (ix. 32). The continuous celebration of this feast by the Jews to the present day is thought to be a strong evidence of the historical truth of the book. [ESTHER, BOOK OF.]

The questions which arise in attempting to give Esther her place in profane history are —

I. Who is Ahasuerus? This question is answered under AHASUERUS, and the reasons there given lead to the conclusion that he was Xerxes the son of Darius Hystaspis.

II. The second inquiry is, who then was Esther? Artissona, Atossa, and others are indeed excluded by the above decision; but are we to conclude with Scaliger, that because Ahasuerus is Xerxes, therefore Esther is Amestris? Surely not. None of the historical particulars related by Herodotus concerning Amestris make it possible to identify her with Esther. Amestris was the daughter of Otanes (Onophas in Ctesias), one of Xerxes' generals, and brother to his father Darius (Herod. vii. 61, 82). Esther's father and mother had been Jews. Amestris was wife to Xerxes before the Greek expedition (Herod. vii. 61), and her sons accompanied Xerxes to Greece (Herod. vii. 39), and had all three come to man's estate at the death of Xerxes in the 20th year of his reign. Darius, the eldest, had married immediately after the return from Greece. Esther did not enter the king's palace till his 7th year, just the time of Darius's marriage. These objections are conclusive, without adding the difference of character of the two queens. The truth is that history is wholly silent both about Vashti and Esther. Herodotus only happens to mention one

Digitized by Google

of Xerxes' wives; Scripture only mentions two, if indeed either of them were wives at all. But since we know that it was the custom of the Persian kings before Xerxes to have several wives, besides their concubines; that Cyrus had several (Herod. iii. 3); that Cambyses had four whose names are mentioned, and others besides (iii. 31, 32, 68); that Smerdis had several (*ib.* 68, 69); and that Darius had six wives, whose names are mentioned (*ib. passim*), it is most improbable that Xerxes should have been content with one wife. Another strong objection to the idea of Esther being his one legitimate wife, and perhaps to her being strictly his wife at all, is that the Persian kings selected their *wives* not from the harem, but, if not foreign princesses, from the noblest Persian families, either their own nearest relatives, or from one of the seven great Persian houses. It seems therefore natural to conclude that Esther, a captive, and one of the harem, was not of the highest rank of wives, but that a special honor, with the name of queen, may have been given to her, as to Vashti before her, as the favorite concubine or inferior wife, whose offspring, however, if she had any, would not have succeeded to the Persian throne. This view, which seems to be strictly in accordance with what we know of the manners of the Persian court, removes all difficulty in reconciling the history of Esther with the scanty accounts left us by profane authors of the reign of Xerxes.

It only remains to remark on the character of Esther as given in the Bible. She appears there as a woman of deep piety, faith, courage, patriotism, and caution, combined with resolution; a dutiful daughter to her adoptive father, docile and obedient to his counsels, and anxious to share the king's favor with him for the good of the Jewish people. That she was a virtuous woman, and, as far as her situation made it possible, a good wife to the king, her continued influence over him for so long a time warrants us to infer. And there must have been a singular grace and charm in her aspect and manners, since she "obtained favor in the sight of all that looked upon her" (ii. 15). That she was raised up as an instrument in the hands of God to avert the destruction of the Jewish people, and to afford them protection, and forward their wealth and peace in their captivity, is also manifest from the Scripture account. But to impute to her the sentiments put into her mouth by the apocryphal author of ch. xiv., or to accuse her of cruelty because of the death of Haman and his sons, and the second day's slaughter of the Jews' enemies at Shushan, is utterly to ignore the manners and feelings of her age and nation, and to judge her by the standard of Christian morality in our own age and country instead. In fact the simplicity and truth to nature of the Scriptural narrative afford a striking contrast, both with the forced and florid amplifications of the apocryphal additions, and with the sentiments of some later commentators. It may be convenient to add that the 3rd year of Xerxes was B. C. 483, his 7th, 479, and his 12th, 474 (Clinton, *F. H.*), and that the simultaneous battles of Platæa and Mycale, which frightened Xerxes from Sardis (Diod. Sic. xi. § 36) to Susa, happened, according to Prideaux and Clinton, in September of his 7th year. For a fuller discussion of the identity of Esther, and different views of the subject, see Prideaux's *Connection*, i. 230, 243, 297 ff., and Petav. *de Doctr. Temp.* xii. 27, 28, who make Esther wife of Artaxerxes Longim., following Joseph. *Ant.* xi. 6, as he followed the LXX. and the apocryphal Esther; J. Scalig. (*de Emend. Temp.* vi. 591; *Animadv. Euseb.* p. 100), making Ahasuerus, Xerxes; Usher (*Annal. Vet. Test.*), making him Darius Hystaspis; Loftus, *Chaldæa*, &c. Eusebius (*Canon. Chron.* p. 338, ed. Mediol.) rejects the hypothesis of Artaxerxes Longim., on the score of the silence of the books of Ezra and Nehemiah, and adopts that of Artaxerxes Mnemon, following the Jews, who make Darius Codomanus to be the same as Darius Hystaspis, and the son of Artaxerxes by Esther! It is most observable that *all* Petavius's and Prideaux's arguments against Scaliger's view apply solely to the statement that Esther is Amestris.

A. C. H.

ESTHER, BOOK OF, one of the latest of the canonical books of Scripture, having been written late in the reign of Xerxes, or early in that of his son Artaxerxes Longimanus. The author is not known, but may very probably have been Mordecai himself. The minute details given of the great banquet, of the names of the chamberlains and eunuchs, and Haman's wife and sons, and of the customs and regulations of the palace, betoken that the author lived at Shushan, and probably at court, while his no less intimate acquaintance with the most private affairs both of Esther and Mordecai well suits the hypothesis of the latter being himself the writer. It is also in itself probable that as Daniel, Ezra, and Nehemiah, who held high offices under the Persian kings, wrote an account of the affairs of their nation, in which they took a leading part, so Mordecai should have recorded the transactions of the book of Esther likewise. The termination of the book with the mention of Mordecai's elevation and government, agrees also well with this view, which has the further sanction of many great names, as Aben Ezra, and most of the Jews, Vatablus, Carpzovius, and many others. Those who ascribe it to Ezra, or the men of the great Synagogue, may have merely meant that Ezra edited and added it to the canon of Scripture, which he probably did, bringing it, and perhaps the book of Daniel, with him from Babylon to Jerusalem.

The book of Esther appears in a different form in the LXX.,[a] and the translations therefrom, from that in which it is found in the Hebrew Bible. In speaking of it we shall first speak of the canonical book found in Hebrew, to which also the above observations refer; and next of the Greek book with its apocryphal additions. The canonical ESTHER then is placed among the Hagiographa or כְּתוּבִים by the Jews, and in that first portion of them which they call the five volumes, מְגִלּוֹת. It is sometimes emphatically called *Megillah*, without other distinction, and was held in such high repute by the Jews that it is a saying of Maimonides that in the days of Messiah the prophetic and hagiographical books will pass away, except the book of Esther, which will remain with the Pentateuch. This book is read through by the Jews

[a] It is not intended by this expression to imply that the translators of the Hebrew Bible into Greek were also the authors of the apocryphal additions. The term LXX is used to indicate the whole Greek volume as we now have it.

in their synagogues at the feast of Purim, when it was, and is still in some synagogues, the custom at the mention of Haman's name to hiss, and stamp, and clench the fist, and cry, "Let his name be blotted out; may the name of the wicked rot." It is said also that the names of Haman's ten sons are read in one breath, to signify that they all expired at the same instant of time. Even in writing the names of Haman's sons in the 7th, 8th, and 9th verses of Esth. ix., the Jewish scribes have contrived to express their abhorrence of the race of Haman; for these ten names are written in three perpendicular columns of 3, 3, 4, as if they were hanging upon three parallel cords, three upon each cord, one above another, to represent the hanging of Haman's sons (Stehelin's *Rabbin. Literat.* vol. ii. p. 349). The Targum of Esth. ix., in Walton's Polyglott,[a] inserts a very minute account of the exact position occupied by Haman and his sons on the gallows, the height from the ground, and the interval between each; according to which they all hung in one line, Haman at the top, and his ten sons at intervals of half a cubit under him. It is added that Zeresh and Haman's seventy surviving sons fled, and begged their bread from door to door, in evident allusion to Ps. cix. 9, 10. It has often been remarked as a peculiarity of this book that the name of God does not once occur in it. Some of the ancient Jewish teachers were somewhat staggered at this, but others accounted for it by saying that it was a transcript, under Divine inspiration, from the Chronicles of the Medes and Persians, and that being meant to be read by heathen, the sacred name was wisely omitted. Baxter (*Saint's Rest*, pt. iv. ch. iii.) speaks of the Jews using to cast to the ground the book of Esther, because the name of God was not in it. But Wolf (*B. H.* pt. ii. p. 90) denies this, and says that if any such custom prevailed among the oriental Jews, to whom it is ascribed by Sandys, it must have been rather to express their hatred of Haman. Certain it is that this book was always reckoned in the Jewish canon, and is named or implied in almost every enumeration of the books composing it, from Josephus downwards. Jerome mentions it by name in the *Prolog. Gal.*, in his Epistle to Paulinus, and in the preface to Esther; as does Augustine, *de Civit. Dei*, and *de Doctr. Christ.*, and Origen, as cited by Eusebius (*Hist. Eccles.* vi. 25), and many others. Some modern commentators, both English and German, have objected to the contents of the book as improbable; but if it be true, as Diodorus Sic. relates, that Xerxes put the Medians foremost at Thermopylæ on purpose that they might be all killed, because he thought they were not thoroughly reconciled to the loss of their national supremacy, it is surely not incredible that he should have given permission to Haman to destroy a few thousand strange people like the Jews, who were represented to be injurious to his empire, and disobedient to his laws. Nor again, when we remember what Herodotus relates of Xerxes in respect to promises made at banquets, can we deem it incredible that he should perform his promise to Esther to reverse the decree in the only way that seemed practicable. It is likely too that the secret friends and adherents of Haman would be the persons to attack the Jews, which would be a reason why Ahasuerus would rather rejoice at their destruction. In all other respects the writer shows such an accurate acquaintance with Persian manners, and is so true to history and chronology, as to afford the strongest internal evidences to the truth of the book. The casual way in which the author of 2 Macc. xv. 36 alludes to the feast of Purim, under the name of "Mardochæus's day," as kept by the Jews in the time of Nicanor, is another strong testimony in its favor, and tends to justify the strong expression of Dr. Lee (quoted in Whiston's Josephus, xi. ch. vi.), that "the truth of this history is demonstrated by the feast of Purim, kept up from that time to this very day."[b]

The style of writing is remarkably chaste and simple, and the narrative of the struggle in Esther's mind between fear and the desire to save her people, and of the final resolve made in the strength of that help which was to be sought in prayer and fasting, is very touching and beautiful, and without any exaggeration. It does not in the least savor of romance. The Hebrew is very like that of Ezra and parts of the Chronicles; generally pure, but mixed with some words of Persian origin, and some of Chaldaic affinity, which do not occur in older Hebrew, such as מַאֲמָר, בִּנְיָן, פִּתְשֶׁגֶן, שֻׁרְבִּיט. In short it is just what one would expect to find in a work of the age which the book of Esther pretends to belong to.

As regards the LXX. version of the book (of which there are two texts, called by Dr. Fritzsche, A and B), it consists of the canonical Esther with various interpolations prefixed, interspersed,[c] and added at the close. Read in Greek it makes a complete and continuous history, except that here and there, as *e. g.* in the repetition of Mordecai's pedigree, the patch-work betrays itself. The chief additions are, Mordecai's pedigree, his dream, and his appointment to sit in the king's gate, in the second year of Artaxerxes, prefixed [Apoc. Esther A. V. and Vulg., ch. xi. 2–xii. 6]. Then, in the third chapter, a pretended copy of Artaxerxes's decree for the destruction of the Jews added, written in thorough Greek style [Apoc. xiii. 1–7]; a prayer of Mordecai inserted in the fourth chapter, followed by a prayer of Esther, in which she excuses herself for being wife to the uncircumcised king, and denies having eaten anything or drunk wine at the table of Haman [Apoc. xiii. 8–xiv. 19]; an amplification of v. 1–3 [Apoc. xv. 1–16, A. V.; Vulg. 4–19]; a pretended copy of Artaxerxes' letter for reversing the previous decree, also of manifestly Greek origin, in ch. viii., in which Haman is called a Macedonian, and is accused of having plotted to transfer the empire from the Persians to the Macedonians, a palpable proof of this portion having been composed after the overthrow of the Persian empire by the Greeks [Apoc. ch xvi.]; and lastly an addition to the tenth chapter, in which Mordecai shows how his dream was fulfilled in the events that had happened, gives glory to God, and prescribes the observation of the feast of the 14th and 15th Adar [Apoc. x. 4–13]. The whole book is closed with the following entry: —

[a] There are two Targums to Esther, both of late date. See Wolf's *Bibl. Hebr.* pars ii. pp. 1171–81.

[b] Dr. W. Lee also has some remarks on the proof of the *historical* character of the book derived from the feast of Purim, as well as on other points (*Inquiry of H. S.* p. 480 ff.).

[c] The Targum to Esther contains other copious embellishments and amplifications. [MORDECAI]

Digitized by Google

In the fourth year of the reign of Ptolemæus and Cleopatra, Dositheus, who said he was a priest and Levite, and Ptolemy his son, brought this epistle of Phurim, which they said was the same, and that Lysimachus, the son of Ptolemy, that was in Jerusalem, had interpreted it" [Apoc. xi. 1]. This entry was apparently intended to give authority to this Greek version of ESTHER, by pretending that it was a certified translation from the Hebrew original. Ptolemy Philometor, who is here meant,[a] began to reign B. C. 181. Though, however, the interpolations of the Greek copy are thus manifest, they make a consistent and intelligible story. But the apocryphal additions as they are inserted in some editions of the Latin Vulgate, and in the English Bible, are incomprehensible; the history of which is this: When Jerome translated the book of Esther, he first gave the version of the Hebrew alone as being alone authentic. He then added at the end a version in Latin of those several passages which he found in the LXX., and which were not in the Hebrew, stating where each passage came in, and marking them all with an obelus. The first passage so given is that which forms the continuation of chapter x. (which of course immediately precedes it), ending with the above entry about Dositheus. Having annexed this conclusion, he then gives the *Proœmium*, which he says forms the beginning of the Greek Vulgate, beginning with what is now verse 2 of chapter xi.; and so proceeds with the other passages. But in subsequent editions all Jerome's explanatory matter has been swept away, and the disjointed portions have been printed as chapters xi., xii., xiii., xiv., xv., xvi., as if they formed a narrative in continuance of the canonical book. The extreme absurdity of this arrangement is nowhere more apparent than in chapter xi., where the verse (1) which closes the whole book in the Greek copies. and in St. Jerome's Latin translation, is actually made immediately to precede that (ver. 2) which is the very first verse of the *Proœmium*. As regards the place assigned to Esther in the LXX., in the Vatican edition, and most others, it comes between Judith and Job. Its place before Job is a remnant of the Hebrew order, Esther there closing the historical, and Job beginning the metrical *Megilloth*. Tobit and Judith have been placed between it and Nehemiah, doubtless for chronological reasons. But in the very ancient Codex published by Tischendorf, and called *C. Friderico-Augustanus*, Esther immediately follows Nehemiah (included under Esdras B), and precedes Tobit. This Codex, which contains the apocryphal additions to Esther, was copied from one written by the martyr Pamphilus with his own hand, as far as to the end of Esther, and is ascribed by the editor to the fourth century.[b]

As regards the motive which led to these additions, one seems evidently to have been to supply what was thought an omission in the Hebrew book, by introducing copious mention of the name of God. It is further evident from the other apocryphal books, and additions to canonical Scripture, which appear in the LXX., such as Bel and the Dragon, Susanna, the Song of the Three Children, &c., that the Alexandrian Jews loved to dwell upon the events of the Babylonish Captivity, and especially upon the Divine interpositions in their behalf, probably as being the latest manifestations of God's special care for Israel. Traditional stories would be likely to be current among them, and these would be sure sooner or later to be committed to writing, with additions according to the fancy of the writers. The most popular among them, or those which had most of an historical basis, or which were written by men of most weight, or whose origin was lost in the most remote antiquity, or which most gratified the national feelings, would acquire something of sacred authority (especially in the absence of real inspiration dictating fresh Scriptures), and get admitted into the volume of Scripture, less rigidly fenced by the Hellenistic than by the Hebrew Jews. No subject would be more likely to engage the thoughts and exercise the pens of such writers, than the deliverance of the Jews from utter destruction by the intervention of Esther and Mordecai, and the overthrow of their enemies in their stead. Those who made the additions to the Hebrew narrative according to the religious taste and feeling of their own times, probably acted in the same spirit as others have often done, who have added florid architectural ornaments to temples which were too plain for their own corrupted taste. The account which Josephus follows seems to have contained yet further particulars, as, *e. g.* the name of the eunuch's servant, a Jew, who betrayed the conspiracy to Mordecai; other passages from the Persian Chronicles read to Ahasuerus, besides that relating to Mordecai, and amplifications of the king's speech to Haman, &c. It is of this LXX. version that Athanasius (*Fest. Epist.* 39, Oxf. transl.) spoke when he ascribed the book of Esther to the non-canonical books; and this also is perhaps the reason why in some of the lists of the canonical books Esther is not named, as, *e. g.* in those of Melito of Sardis and Gregory Nazianzen, unless in these it is included under some other book, as Ruth, or Esdras[c] (see Whitaker, *Disput. on H. Scr.* Park. Soc. 57, 58; Cosin on the *Canon of Scr.* p. 49, 50). Origen, singularly enough, takes a different line in his *Ep. to Africanus* (Opp. i. 14). He defends the canonicity of these Greek additions, though he admits they are not in the Hebrew. His sole argument, unworthy of a great scholar, is the use of the LXX. in the churches, an argument which embraces equally all the apocryphal books. Africanus, in his Ep. to Origen, had made the being in the Hebrew essential to canonicity, as Jerome did later. The Council of Trent pronounces the whole book of Esther to be canonical, and Vatablus says that prior to that decision it was doubtful whether or no

[a] He is the same as is frequently mentioned in 1 Macc.; *e. g.* x. 57, xi. 12; cf. Joseph. *Ant.* xiii. 4. § 1, 3, and Clinton, *F. H.* iii. p. 393. Dositheus seems to be a Greek version of Mattithiah; Ptolemy was also a common name for Jews at that time.

[b] * The position of the book of Esther in the Vatican *manuscript* is very different from that which it has in the Vatican, or rather, Roman *edition* (1587), mentioned above. In the Vatican *manuscript*, Ezra and Nehemiah (united in one book as 2d Esdras) are immediately followed by the whole series of *poetical* books (as distinguished from the *prophetical*), namely, Psalms, Proverbs, Ecclesiastes, Canticles, Job, Wisdom of Solomon, Ecclesiasticus. Then come Esther, Judith, Tobit, followed first by the minor, then by the greater prophets. (See further, under BIBLE, p. 305, note *a*, Amer. ed.). The *Codex Friderico-Augustanus* is a part of the same manuscript as the *Codex Sinaiticus*, published by Tischendorf in 1862. A.

[c] "This book of Esther, or sixth of Esdras, as it is placed in some of the most ancient copies of the Vulgate." — Lee's *Dissert. on 2d Esdras* p 25

Digitized by Google

Esther was to be included in the Canon, some authors affirming, and some denying it. He afterwards qualifies the statement by saying that at all events the seven last chapters were doubtful. Sixtus Senensis, in spite of the decision of the Council, speaks of these additions, after the example of Jerome, as "lacinias hinc inde quorumdam Scriptorum temeritate insertas," and thinks that they are chiefly derived from Josephus, but this last opinion is without probability. The manner and the order in which Josephus cites them (*Ant.* xi. 6) show that they had already in his days obtained currency among the Hellenistic Jews as portions of the book of Esther; as we know from the way in which he cites other apocryphal books that they were current likewise, with others which are now lost. For it was probably from such that Josephus derived his stories about Moses, about Sanballat, and the temple on Mount Gerizim, and the meeting of the high-priest and Alexander the Great. But these, not having happened to be bound up with the LXX., perished. However, the marvellous purity with which the Hebrew Canon has been preserved, under the providence of God, is brought out into very strong light, by the contrast of the Greek volume. Nor is it uninteresting to observe how the relaxation of the peculiarity of their national character, by the Alexandrian Jews, implied in the adoption of the Greek language and Greek names, seems to have been accompanied with a less jealous, and consequently a less trustworthy guardianship of their great national treasures, "the oracles of God."

See further, Bishop Cosin, on the *Canon of Holy Script.*; Wolf's *Bibl. Hebr.* ii. 88, and *passim*; Hotting. *Thesaur.* p. 494; Walton, *Proleg.* ix. § 13; Whitaker, *Disput. of Script.* ch. viii.; Dr. O. F. Fritzsche, *Zusätze zum Buch Esther* [in the *Kurzgef. exeg. Handb. zu den Apok. des A. T.*, Lief. i. (1851)]; Baumgarten, *de Fide Lib. Estheræ* [Hal. Sax. 1839], &c. A. C. H.

* M. Baumgarten, author of the treatise *de Fide Lib. Estheræ*, &c., has an excellent article on the same subject in Herzog's *Real-Encyk.* iv. 177–185 (1855). We make room for one of his suggestions. In respect to the omission of the name of God in the book, he remarks that it is the less surprising, because it occurs in a history which is so full of interpositions, revealing the actual presence of Him who presides over the destiny of men and nations, and also the power of that faith in the unseen One, which made the actors in this drama so hopeful, enduring, and triumphant. The historical credibility of the events related in the book is well attested, and at present generally acknowledged (see Win. *Bibl. Realw.* i. 350). Prof. Stuart says very truly: "The fact that the feast of Purim has come down to us from time almost immemorial . . . proves as certainly that the main events related in the book of Esther happened, as the Declaration of Independence and the celebration of the Fourth of July prove that we separated from Great Britain, and became an independent nation. . . . The book of Esther was an essential document to explain the feast of Purim." See his *History and Defence of the O. T. Canon*, p. 357. [PURIM.] It is interesting to observe the self-asserting character of truthfulness which the Scripture narrative assumes as expanded and illustrated from contemporary sources in Dean Milman's sketch of the events (*History of the Jews*, i. 472–477, Amer. ed.).

The later commentators or expositors are Bertheau, *Die Bücher Esra, Nechemia u. Ester erklärt* (1862, Lief. xvii. of the *Kurzgef. exeg. Handb. zum A. T.*), containing, with a commentary, a full critical introduction to the book; Oppert, *Comm. hist. et phil. du Livre d'Esther, d'après la lecture des inscriptions perses* (Paris, 1864), a small pamphlet; Chr. Wordsworth, *The Book of Esther*, in his *Holy Bible, with Notes and Introductions*, iii. 367–384 (1866); and A. D. Davidson, *Lectures, Expository and Practical, on the Book of Esther* (Edin. 1859). Bishop Hall (*Contemplations*, &c., bk. xxi.) has five discourses founded on portions of this suggestive history. Dr. Thomas M'Crie's *Lectures on the Book of Esther* (Edin. 1838), are commended by Prof. Douglas (art. *Esther* in Fairbairn's *Imp. Bible Dict.*) for "comprehensiveness, brevity, and raciness."

On the critical questions connected with the book, and for different opinions respecting its character, the reader may further consult Hävernick, *Handb. der Einl. in das A. Test.* ii. 361 ff., translated, with additions from other sources, in the *Christian Rev.* for Sept. 1848; Keil, *Lehrb. d. hist.-krit. Einl.* u. s. w., 2e Aufl., pp. 468–474 Bleek, *Einl. in das A. Test.* pp. 401–409; Ewald *Gesch. d. Volkes Isr.* iv. 296 ff. (3e Ausg.); Herzfeld, *Gesch. d. Volkes Jisrael*, ii. 1–9 (1855); Davidson, *Introd. to the Old Test.* ii. 151–173; and Kuenen, *Hist. crit. des livres de l'Ancien Test.*, trad. par Pierson, i. 523–534. H.

ETAM (עֵיטָם [*lair of wild beasts*]: Αἰτάν; [Comp. Ἐτάμ; Ald. Ἡτάμ:] *Etam*). 1. A village (חֲצֵר) of the tribe of Simeon, specified only in the list in 1 Chr. iv. 32 (comp. Josh. xix. 7) but that it is intentionally introduced appears from the fact that the number of places is summed as five, though in the parallel list as four. The cities of Simeon appear all to have been in the extreme south of the country (see Joseph. *Ant.* v. 1, § 22). Different from this, therefore, was: —

2. [Αἰτάν; Vat.[1] Ατταν; Alex. Αττανι; Comp. Ἐτάμ.] A place in Judah, fortified and garrisoned by Rehoboam (2 Chr. xi. 6). From its position in this list we may conclude that it was near Bethlehem and Tekoah; and in accordance with this is the mention of the name among the ten cities which the LXX. insert in the text of Josh. xv. 60, "Thecoa and Ephratha which is Bethlehem, Phagor and Aitan (Ethan)." Reasons are shown below for believing it possible that this may have been the scene of Samson's residence, the cliff Etam being one of the numerous bold eminences which abound in this part of the country; and the spring of En-hak-kore one of those abundant fountains which have procured for Etam its chief fame. For here, according to the statements of Josephus (*Ant.* viii. 7, § 3) and the Talmudists, were the sources of the water from which Solomon's gardens and pleasure-grounds were fed, and Bethlehem and the Temple supplied. (See Lightfoot, on *John* v.)

3. [Αἰτάμ; Vat. -ταν; Comp. Ἡτάμ.] A name occurring in the lists of Judah's descendants (1 Chr. iv. 3), but probably referring to the place named above (2), Bethlehem being mentioned in the following verse.

ETAM, THE ROCK (סֶלַע עֵיטָם: πέτρα Ἡτάμ, for Alex. see below; Joseph. Αἰτὰν *Petra*, and *silex, Etam*), a cliff or lofty rock (such seems to be the special force of *Sela*') into a cleft

or chasm (סְעִיף: A. V. "top"), of which Samson retired after his slaughter of the Philistines, in revenge for their burning the Timnite woman who was to have been his wife (Judg. xv. 8, 11 a). This natural stronghold (πέτρα δ' ἐστὶν ὀχυρά, Joseph. *Ant.* v. 8, § 8) was in the tribe of Judah; and near it, probably at its foot, was Lehi or Ramath-lehi, and En-hak-kore (xv. 9, 14, 17, 19). These names have all vanished; at any rate none of them have been yet discovered within that comparatively narrow circle to which Samson's exploits appear to have been confined. Van de Velde (ii. 141) would identify Lehi with *Lekiyeh*, a short distance north of Beer-sheba, but this has nothing beyond its name to recommend it. The name Etam, however, was held by a city in the neighborhood of Bethlehem, fortified by Rehoboam (2 Chr. xi. 6), and which from other sources is known to have been situated in the extremely uneven and broken country round the modern *Urtas*. Here is a fitting scene for the adventure of Samson. It was sufficiently distant from Timnah to have seemed a safe refuge from the wrath of the Philistines, while on the other hand it was not too far for them to reach in search of him; for even at Bethlehem, still more distant from Philistia, they had a garrison, and that in the time of their great enemy king David. In the abundant springs and the numerous eminences of the district round *Urtas*, the cliff Etam, Ramath-lehi, and En-hak-kore may be yet discovered. G.

ETHAM [אֵתָם, from the Coptic *atiom*, "boundary of the sea," Jablonski: Ex. xiii. 20, Ὀθάμ, Alex. Οθομ; Num. xxxiii. 6, 7, Βουθάν: *Etham*]. [EXODUS, THE.]

ETHAN (אֵיתָן [*firm, strong*]: Γαιθάν; [in 1 Chr. and Ps.,] Αἰθάμ [Alex. Αιθαν, and so Vat. and Sin. in Ps.:] *Ethan*). The name of several persons. 1. ETHAN THE EZRAHITE, one of the four sons of Mahol, whose wisdom was excelled by Solomon (1 K. iv. 31). His name is in the title of Ps. lxxxix. There is little doubt that this is the same person who in 1 Chr. ii. 6 is mentioned — with the same brothers as before — as a son of Zerah, the son of Judah. [DARDA; EZRAHITE.] But being a son of Judah he must have been a different person from

2. [In 1 Chr. vi., Αἰθάμ, Alex. Αιθαν: xv., Αἰθάν, FA. in ver. 17, Αιθαμ.] Son of Kishi or Kushaish; a Merarite Levite, head of that family in the time of king David (1 Chr. vi. 44, Heb. 29), and spoken of as a "singer." With Heman and Asaph, the heads of the other two families of Levites, Ethan was appointed to sound with cymbals (xv. 17, 19). From the fact that in other passages of these books the three names are given as Asaph, Heman, and JEDUTHUN, it has been conjectured that the two names both belonged to the one man, or are identical; but there is no direct evidence of this, nor is there anything to show that Ethan the singer was the same person as Ethan the Ezrahite, whose name stands at the head of Ps. lxxxix., though it is a curious coincidence that there should be two persons named Heman and Ethan so closely connected in two different tribes and walks of life.

3. [Αἰθάμ; Vat. Αιθαν; Alex. Ουρι.] A Gershonite Levite, one of the ancestors of Asaph the singer (1 Chr. vi. 42, Heb. 27). In the reversed genealogy of the Gershonites (ver. 21 of this chap.) JOAH stands in the place of Ethan as the son of Zimmah.

ETH'ANIM. [MONTHS.]

ETHBA'AL (אִיתְבַּעַל [*with Baal*, i. e favored by him, Gesen.]: [Ἰεθεβαδλ; Alex Ιαβααλ; Comp.] Ἐθβδαλ; Joseph. Ἰθόβαλος *Ithobalus*), king of Sidon and father of Jezebel, wife of Ahab (1 K. xvi. 31). Josephus (*Ant.* viii. 13, § 1) represents him as king of the Tyrians as well as the Sidonians. We may thus identify him with Eithobalus (Εἰθώβαλος), noticed by Menander (Joseph. *c. Apion.* i. 18), a priest of Astarte, who, after having assassinated Pheles, usurped the throne of Tyre for 32 years. As 50 years elapsed between the deaths of Hiram and Pheles, the date of Ethbaal's reign may be given as about B. C. 940–908.

The variation in the name is easily explained: Ethbaal = *with Baal* [*i. e.* his help]; Ithobalus (אִיתוֹבַעַל) = *Baal with him*, which is preferable in point of sense to the other. The position which Ethbaal held explains, to a certain extent, the idolatrous zeal which Jezebel displayed. W. L. B.

ETHER (עֶתֶר [*abundance*]: Ἰθάρ, Ἰεθέρ; Alex. Αφερ [Alex.[1] Αθερ?], Βεθερ; [Comp. Ἀσέρ, Ἐθέρ; Ald. Ἀθέρ, Ἐθέρ:] *Ether, Athar*), one of the cities of Judah in the low country, the *Shefelah* (Josh. xv. 42) allotted to Simeon (xix. 7). In the parallel list of the towns of Simeon in 1 Chr. iv. 32, TOCHEN is substituted for Ether. In his *Onomasticon* Eusebius mentions it twice, as Ether and as Jether (in the latter case confounding it with JATTIR, a city of priests and containing friends of David during his troubles under Saul). It was then a considerable place (κώμη μεγίστη), retaining the name of Jethira or Etera, very near Malatha in the interior of the district of Daroma, that is in the desert country below Hebron and to the east of Beer-sheba. The name of Ether has not yet been identified with any existing remains; but Van de Velde heard of a *Tel Athar* in this direction (*Memoir*, p. 311). G.

ETHIO'PIA (כּוּשׁ: Αἰθιοπία: *Æthiopia*). The country, which the Greeks and Romans described as "Æthiopia" and the Hebrews as "Cush" lay to the S. of Egypt, and embraced, in its most extended sense, the modern *Nubia, Sennaar, Kordofan*, and northern *Abyssinia*, and in its more definite sense the kingdom of Meroë, from the junction of the Blue and White branches of the Nile to the border of Egypt. The only direction in which a clear boundary can be fixed is in the N., where Syene marked the division between Ethiopia and Egypt (Ez. xxix. 10): in other directions the boundaries can be only generally described as the Red Sea on the E., the Libyan desert on the W., and the Abyssinian highlands on the S. The name "Ethiopia" is probably an adaptation of the native Egyptian name "Ethaush," which bears a tolerably close resemblance to the gentile form "Æthiops;" the Greeks themselves regarded it as expressive of a dark complexion (from αἴθω, "to burn," and ὄψ, "a countenance"). The Hebrews transformed the ethnical designation "Cush"

a There is some uncertainty about the text of this passage. the Alex. MS. of the LXX. [in ver. 8] inserting the words παρὰ τοῦ χειμ ῥόου [τῷ χειμ ῥόῳ], "by the torrent," before the mention of the rock [ἐν τῇ σπηλαίῳ Ἠτάμ]. In ver. 11 the reading agrees with the Hebrew.

Digitized by Google

into a territorial one, restricting it, however, in the latter sense to the African settlements of the Cushite race. [CUSH.] The Hebrews do not appear to have had much practical acquaintance with Ethiopia itself, though the Ethiopians were well known to them through their intercourse with Egypt. They were, however, perfectly aware of its position (Ez. xxix. 10); and they describe it as a well-watered country lying "by the side of" (A. V. "beyond") the waters of Cush (Is. xviii. 1; Zeph. iii. 10), being traversed by the two branches of the Nile, and by the Astaboras or *Tacazze*. The Nile descends with a rapid stream in this part of its course, forming a series of cataracts: its violence seems to be referred to in the words of Is. xviii. 2, "whose land the rivers have spoiled." The Hebrews seem also to have been aware of its tropical characteristics, the words translated in the A. V. "the land shadowing with wings" (Is. xviii. 1) admitting of the sense "the land of the shadow of both sides," the shadows falling towards the north and south at different periods of the year — a feature which is noticed by many early writers (comp. the expression in Strabo, ii. p. 133, ἀμφίσκιοι; Virg. *Ecl.* x. 68; Plin. ii. 75). The papyrus boats ("vessels of bulrushes," Is. xviii. 2), which were peculiarly adapted to the navigation of the Upper Nile, admitting of being carried on men's backs when necessary, were regarded as a characteristic feature of the country. The Hebrews carried on commercial intercourse with Ethiopia, its "merchandise" (Is. xlv. 14) consisting of ebony, ivory, frankincense and gold (Herod. iii. 97, 114), and precious stones (Job xxviii. 19; Joseph. *Ant.* viii. 6, § 5). The country is for the most part mountainous, the ranges gradually increasing in altitude towards the S., until they attain an elevation of about 8000 feet in *Abyssinia*.

The inhabitants of Ethiopia were a Hamitic race (Gen. x. 6), and are described in the Bible as a dark-complexioned (Jer. xiii. 23) and stalwart race (Is. xlv. 14, "men of stature;" xviii. 2, for "scattered," substitute "tall"). Their stature is noticed by Herodotus (iii. 20, 114), as well as their handsomeness. Not improbably the latter quality is intended by the term in Is. xviii. 2, which in the A. V. is rendered "peeled," but which rather means "fine-looking." Their appearance led to their being selected as attendants in royal households (Jer. xxxviii. 7). The Ethiopians are on one occasion coupled with the Arabians, as occupying the opposite shores of the Red Sea (2 Chr. xxi. 16); but elsewhere they are connected with African nations, particularly Egypt (Ps. lxviii. 31; Is. xx. 3, 4, xliii. 3, xlv. 14), Phut (Jer. xlvi. 9), Lub and Lud (Ez. xxx. 5), and the Sukkiim (2 Chr. xii. 3). They were divided into various tribes, of which the Sabeans were the most powerful. [SEBA; SUKKIIM.]

The history of Ethiopia is closely interwoven with that of Egypt. The two countries were not unfrequently united under the rule of the same sovereign. The first Egyptian king who governed Ethiopia was one of the XIIth dynasty, named Osirtasen I., the Sesostris of Herod. ii. 110. During the occupation of Egypt by the Hyksos, the XIIIth dynasty retired to the Ethiopian capital, Napata; and again we find the kings of the XVIIIth and XIXth dynasties exercising a supremacy over Ethiopia, and erecting numerous temples, the ruins of which still exist at *Semneh*, *Amada*, *Soleb*, *Aboosimbel*, and *Jebel Berkel*. The tradition of the successful expedition of Moses against the Ethiopians, recorded by Josephus (*Ant.* ii. 10), was doubtless founded on the general superiority of the Egyptians over the Ethiopians at that period of their history. The XXIId dynasty still held sway over Ethiopia, as we find Ethiopians forming a portion of Shishak's army (2 Chr. xii. 3), and his successor Osorkon apparently described as Zerah "the Ethiopian" (2 Chr. xiv. 9). The kings of the XXVth dynasty were certainly Ethiopians, who ruled the whole of Upper Egypt, and at one time Lower Egypt also, from their northern capital, Napata. Two of these kings are connected with sacred history, namely, So, probably *Sebichus*, who made an alliance with Hoshea king of Israel (2 K. xvii. 4), and Tirhakah, or *Tarcus*, who advanced against Sennacherib in aid of Hezekiah king of Judah (2 K. xix. 9). The prophets appear to refer to a subjection of Ethiopia by the Assyrians as occurring about this period (Is. xx. 4), and particularly to the capture of Thebes at a time when the Ethiopians were among its defenders (Nah. iii. 8, 9). We find, in confirmation of these notices, that Esar-haddon is stated in the Assyrian inscriptions to have conquered both Egypt and Ethiopia. At the time of the conquest of Egypt, Cambyses advanced against Meroë and subdued it; but the Persian rule did not take any root there, nor did the influence of the Ptolemies generally extend beyond northern Ethiopia. Shortly before our Saviour's birth, a native dynasty of females, holding the official title of Candace (Plin. vii. 35), held sway in Ethiopia, and even resisted the advance of the Roman arms. One of these is the queen noticed in Acts viii. 27. [CANDACE.]

W. L. B.

ETHIOPIAN (כּוּשִׁי: Αἰθίοψ: *Æthiops*). Properly "Cushite" (Jer. xiii. 23); used of Zerah (2 Chr. xiv. 9 [8]), and Ebed-melech (Jer. xxxviii. 7, 10, 12, xxxix. 16).[a] W. A. W.

* **ETHIOPIAN EUNUCH**, baptized by the Evangelist Philip on the way between Jerusalem and Gaza (Acts viii. 26 ff.). [BETH-ZUR.] Whether he was an Ethiopian by birth, or a Jew who lived in Ethiopia (comp. Acts ii. 10), has been disputed. The sense of Αἰθιόπων (same verse) belongs naturally to Αἰθίοψ, as applied to the eunuch, and in that case the latter must refer to his Gentile extraction. It was customary for proselytes, as well as foreign Jews, to repair to Jerusalem for worship at the great festivals (see John xii. 20; Acts ii. 10). He was no doubt a eunuch in the strict import of that word, and not in its secondary or official sense as denoting a minister of state or courtier merely; for in the latter case, δυνάστης which follows would be superfluous. His office under CANDACE (which see) as treasurer or chamberlain (ἐπὶ πάσης τῆς γάζης) was one of high rank.

The Ethiopian was reading one of the most remarkable of the Messianic predictions when Philip overtook him. It is not improbable that he had heard, at Jerusalem, of the death of Jesus and the attendant miracles, of the claim put forth by the crucified one to be the Messiah, and of the existence of a numerous party who acknowledged him in that character. Hence he may have been

a * In Acts viii. 27, Αἰθίοψ is strictly "Ethiopian and not "man of Ethiopia" (A. V.). See CANDACE.

Digitized by Google

examining the prophecies at the moment of Philip's approach to him, with reference to the question how far they had been accomplished in the history of the person concerning whom such reports had reached him. The extraordinary means which God employed for bringing the two strangers into connection with each other, and the readiness with which the Ethiopian embraced the gospel, certainly indicate that his mind had been specially prepared for the reception of the truth. Tradition adds that the eunuch's name was Indich, and that it was he who first preached the gospel in Ethiopia. It is certain that Christianity existed there at an early period, but its introduction, says Neander, cannot be traced to any connection with his labors.

H.

ETHIO'PIAN WOMAN (כֻּשִׁית: Αἰθιοπίσσα: *Æthiopissa*). Zipporah, the wife of Moses, is so described in Num. xii. 1. She is elsewhere said to have been the daughter of a Midianite, and in consequence of this Ewald and others have supposed that the allusion is to another wife whom Moses married after the death of Zipporah.

W. A. W.

ETHIO'PIANS (כּוּשׁ, Is. xx. 4; Jer. xlvi. 9; כּוּשִׁי: Αἰθίοπες: *Æthiopia, Æthiopes*). Properly "Cush" or "Ethiopia" in two passages (Is. xx. 4; Jer. xlvi. 9). Elsewhere "Cushites," or inhabitants of Ethiopia (2 Chr. xii. 3, xiv. 12 [11], 13 [12], xvi. 8, xxi. 16; Dan. xi. 43; Am. ix. 7; Zeph. ii. 12 [Acts viii. 27]). [ETHIOPIA.]

W. A. W.

ETH'MA ('Εθμά; [Vat. Οομα;] Alex. Νοομα: *Nobei*), 1 Esdr. ix. 35; apparently a corruption of NEBO in the parallel list of Ezra x. 43.

ETH'NAN (אֶתְנָן [*gift, hire*]: 'Εσθαναμ; [Vat. Ξεννων; Comp. 'Εθναν;] Alex. Εθναδι: *Ethnan*), a descendant of Judah; one of the sons of Helah the wife of Ashur, "the father of Tekoa" (1 Chr. iv. 7).

* **ETHNARCH** (2 Cor. xi. 32). [GOVERNOR, 11.]

ETH'NI (אֵתָנִי [*munificent*]: 'Αθανί, [Vat.] Alex. Αθανει: *Athanai*), a Gershonite Levite, one of the forefathers of Asaph the singer (1 Chr. vi. 41, Heb. 26).

EUBU'LUS (Εὔβουλος [*of good counsel, prudent*]), a Christian at Rome mentioned by St. Paul (2 Tim. iv. 21).

EUER'GETES (Εὐεργέτης, *a benefactor: Ptolemæus Euergetes*), a common surname and title of honor (cf. Plato, *Gorg.* p. 506 c, and Stallb. *ad loc.*) in Greek states, conferred at Athens by a public vote (Dem. p. 475), and so notorious as to pass into a proverb (Luke xxii. 25). The title was borne by two of the Ptolemies, Ptol. III., Euergetes I., B. C. 247–222, and Ptol. VII., Euergetes II., B. C. (170) 146–117. The Euergetes mentioned in the prologue to Ecclesiasticus has been identified with each of these, according to the different views taken of the history of the book. [ECCLESIASTICUS: JESUS SON OF SIRACH.]

B. F. W.

EU'MENES II. (Εὐμένης [*well-disposed, kind*]), king of Pergamus, succeeded his father Attalus I., B. C. 197, from whom he inherited the favor and alliance of the Romans. In the war with Antiochus the Great he rendered the most important services to the growing republic; and at the battle of Magnesia (B. C. 190) commanded his contingent in person (Just. xxxi. 8, 5; App. *Syr.* 34). After peace was made (B. C. 189) he repaired to Rome to claim the reward of his loyalty; and the Senate conferred on him the provinces of Mysia, Lydia, and Ionia (with some exceptions), Phrygia, Lycaonia, and the Thracian Chersonese (App. *Syr.* 44; Polyb. xxii. 7; Liv. xxxviii. 56). His influence at Rome continued uninterrupted till the war with Perseus, with whom he is said to have entertained treasonable correspondence (Liv. xxiv. 24, 25); and after the defeat of Perseus (B. C. 167) he was looked upon with suspicion which he vainly endeavored to remove. The exact date of his death is not mentioned, but it must have taken place in B. C. 159.

The large accession of territory which was granted to Eumenes from the former dominions of Antiochus is mentioned 1 Macc. viii. 8, but the present reading of the Greek and Latin texts offers insuperable difficulties. "The Romans gave him," it is said, "the *country of India and Media*, and Lydia and parts of his (Antiochus) fairest countries (ἀπὸ τῶν καλλ. χωρῶν αὐτοῦ)." Various conjectures have been proposed to remove these obvious errors; but though it may be reasonably allowed that *Mysia* may have stood originally for Media (מסי for מדי, *Michaelis*), it is not equally easy to explain the origin of χώραν τὴν Ἰνδικήν. It is barely possible that Ἰνδικήν may have been substituted for Ἰωνικήν after Μηδίαν was already established in the text. Other explanations are given by Grimm, *Exeg. Handb.* ad loc.; Wernsdorf, *De fide Libr. Macc.* p. 50 ff.; but they have little plausibility.

B. F. W.

EU'NATAN ('Εννατάν; Alex. Ελναθαν: *Ennagam*), 1 Esdr. viii. 44. [ELNATHAN.]

* This form of the name in the A. V. may be a mere misprint for Ennatan, the reading of the Genevan version and the Bishops' Bible.

A.

EUNI'CE (Εὐνίκη [*happily victorious*]), mother of Timotheus, 2 Tim. i. 5; there spoken of as possessing unfeigned faith; and described in Acts xvi. 1, as a γυνὴ Ἰουδαία πιστή.

H. A.

EUNUCH (סָרִיס: εὐνοῦχος, θλαδίας: *spado*; variously rendered in the A. V. "eunuch," "officer," and "chamberlain," apparently as though the word intended a class of attendants who were not always mutilated).[a] The original Hebrew word (root Arab. سرس, *impotens esse ad venerem*, Gesen. *s. v.*) clearly implies the incapacity which mutilation involves, and perhaps includes all the classes mentioned in Matt. xix. 12, not signifying, as the Greek εὐνοῦχος, an office merely. The law, Deut. xxiii. 1 (comp. Lev. xxii. 24), is repugnant to thus treating any Israelite; and Samuel, when describing the arbitrary power of the future king (1 Sam. viii. 15, marg.), mentions "his eunuchs," but does not say that he would make "their sons" such. This, if we compare 2 K. xx. 18; Is. xxxix. 7, possibly implies that these persons would be foreigners. It was a barbarous custom of the East thus to treat captives (Herod. iii. 49, vi. 32), not only of tender age (when a non-development of beard, and feminine mould of limbs and modulation of voice ensues), but, it should seem, when past puberty, which there occurs at an early age. Physiological considerations lead to the supposition that

[a] So Whiston, Joseph. *Ant.* x. 10, § 2, note

in the latter case a remnant of animal feeling is left; which may explain Ecclus. xx. 4, xxx. 20 (comp. Juv. vi. 366, and Mart. vi. 67; Philostr. *Apoll. Tyan.* i. 37; Ter. *Eun.* iv. 3, 24), where a sexual function, though fruitless, is implied. Busbequius (*Ep.* iii. 122, Ox. 1660) seems to ascribe the absence or presence of this to the total or partial character of the mutilation; but modern surgery would rather assign the earlier or later period of the operation as the real explanation. It is total among modern Turks (Tournefort, ii. 8, 9, 10, ed. Par. 1717, *taillés à fleur de ventre*); a precaution arising from mixed ignorance and jealousy. The "officer" Potiphar (Gen. xxxvii. 36, xxxix. 1, marg. "eunuch") was an Egyptian, was married, and was the "captain of the guard;" and in the Assyrian monuments an eunuch often appears, sometimes armed, and in a warlike capacity, or as a scribe, noting the number of heads and amount of spoil, as receiving the prisoners, and even as officiating in religious ceremonies (Layard, *Nineveh*, ii. 324–6, 334). A bloated beardless face and double chin is there their conventional type. Chardin (*Voyages en Perse*, ii. 283, ed. Amsterd. 1711) speaks of eunuchs having a harem of their own. If Potiphar had become such by operation for disease, by accident, or even by malice, such a marriage seems, therefore, according to Eastern notions, supposable.[a] (See Grotius on Deut. xxiii. 1; comp. Burckhardt, *Trav. in Arab.* i. 290.) Nor is it wholly repugnant to that barbarous social standard to think that the prospect of rank, honor, and royal confidence, might even induce parents to thus treat their children at a later age, if they showed an aptness for such preferment. The characteristics as regards beard, voice, &c., might then perhaps be modified, or might gradually follow. The Potipherah of Gen. xli. 50, whose daughter Joseph married, was "priest of On," and no doubt a different person.

The origination of the practice is ascribed to Semiramis (Amm. Marcell. xiv. 6), and is no doubt as early, or nearly so, as eastern despotism itself. Their incapacity, as in the case of mutes, is the ground of reliance upon them (Clarke's *Travels*, part ii. § 1, 13; Busbeq. *Ep.* i. 33). By reason of the mysterious distance at which the sovereign sought to keep his subjects (Herod. i. 99, comp. Esth. iv. 11), and of the malignant jealousy fostered by the debased relation of the sexes, such wretches, detached from social interests and hopes of issue (especially when, as commonly, and as amongst the Jews, foreigners), the natural slaves of either sex (Esth. iv. 5), and having no prospect in rebellion save the change of masters, were the fittest props of a government resting on a servile relation, the most complete ὄργανα ἔμψυχα of its despotism or its lust, the surest (but see Esth. ii. 21) guardians (Xenoph. *Cyrop.* vii. 5, § 15; Herod. viii. 105) of the monarch's person, and the sole confidential witnesses of his unguarded or undignified moments. Hence they have in all ages frequently risen to high offices of trust. Thus the "chief"[b] of the cupbearers and of the cooks of Pharaoh were eunuchs as being near his person, though their inferior agents need not have been so (Gen. xl. 1). The complete assimilation of the kingdom of Israel, and latterly[c] of Judah, to the neighboring models of despotism, is traceable in the rank and prominence of eunuchs (2 K. viii. 6, ix. 32, xxiii. 11, xxv. 19; Is. lvi. 3, 4; Jer. xxix. 2, xxxiv. 19, xxxviii. 7, xli. 16, lii. 25). They mostly appear in one of two relations, either military as "set over the men of war," greater trustworthiness possibly counterbalancing inferior courage and military vigor, or associated, as we mostly recognize them, with women and children. We find the Assyrian Rab-Saris, or chief eunuch (2 K. xviii. 17), employed together with other high officials as ambassador. Similarly, in the details of the travels of an embassy sent by the Duke of Holstein (p. 136), we find a eunuch mentioned as sent on occasion of a state-marriage to negotiate, and of another (p. 273) who was the *Mehetter*, or chamberlain of Shah Abbas, who was always near his person, and had his ear (comp. Chardin, iii. 37), and of another, originally a Georgian prisoner, who officiated as supreme judge. Fryer (*Travels in India and Persia*, 1698) and Chardin (ii. 283) describe them as being the base and ready tools of licentiousness, as tyrannical in humor, and pertinacious in the authority which they exercise; Clarke (*Travels in Europe, &c.*, part ii. § 1, p. 22), as eluded and ridiculed by those whom it is their office to guard. A great number of them accompany the Shah and his ladies when hunting, and no one is allowed, on pain of death, to come within two leagues of the field, unless the king sends an eunuch for him. So eunuchs run before the closed arabahs of the sultanas when abroad, crying out to all to keep at a distance This illustrates Esth. i. 10, 12, 15, 16, ii. 3, 8, 14 The moral tendency of this sad condition is well known to be the repression of courage, gentleness shame, and remorse, the development of malice, and often of melancholy, and a disposition to suicide The favorable description of them in Xenophon (*l. c.*) is overcharged, or at least is not confirmed by modern observation. They are not more liable to disease than others, unless of such as often follows the foul vices of which they are the tools. The operation itself, especially in infancy, is not more dangerous than an ordinary amputation. Chardin (ii. 285) says that only one in four survives; and Clot Bey, chief physician of the Pasha, states that two thirds die. Burckhardt, therefore (*Nub.* p. 329), is mistaken, when he says that the operation is only fatal in about two out of a hundred cases.

It is probable that Daniel and his companions were thus treated, in fulfillment of 2 K. xx. 17, 18; Is. xxxix. 7; comp. Dan. i. 3, 7. The court of Herod of course had its eunuchs (Joseph. *Ant.* xvi.

[a] The Jewish tradition is that Joseph was made a eunuch on his first introduction to Egypt; and yet the accusation of Potiphar's wife, his marriage and the birth of his children, are related subsequently without any explanation. See Targum Pseudojon. on Gen. xxxix. 1, xli. 50, and the details given at xxxix. 13.

[b] Wilkinson (*Anc. Egypt*, ii. 61) denies the use of eunuchs in Egypt. Herodotus, indeed (ii. 92), confirms his statement as regards Egyptian monogamy; but if this as a rule applied to the kings, they seem at any rate to have allowed themselves concubines (*ib.* 181). From the general beardless character of Egyptian heads it is not easy to pronounce whether any eunuchs appear in the sculptures or not.

[c] 2 Chr. xxviii. 1, is remarkable as ascribing eunuchs to the period of David, nor can it be doubted that Solomon's polygamy made them a necessary consequence; but in the state they do not seem to have played an important part at this period.

Digitized by Google

8, § 1, xv. 7, § 4), as had also that of Queen Candace (Acts viii. 27). Michaelis (ii. 180) regards them as the proper consequence of the gross polygamy of the East, although his further remark that they tend to balance the sexual disparity which such monopoly of women causes is less just, since the countries despoiled of their women for the one purpose are not commonly those which furnish male children for the other.

In the three classes mentioned in Matt. xix. 12 the first is to be ranked with other examples of defective organization, the last, if taken literally, as it is said to have been personally exemplified in Origen (Euseb. *Eccl. Hist.* vi. 8), is an instance of human ways and means of ascetic devotion being valued by the Jews above revealed precept (see Schöttgen, *Hor. Heb.* i. 159). But a figurative sense of εὐνοῦχος (comp. 1 Cor. vii. 32, 34) is also possible.

In the A. V. of Esther the word "chamberlain" (marg. "eunuch") is the constant rendering of סָרִיס; and as the word also occurs in Acts xii. 20 and Rom. xvi. 23, where the original expressions are very different, some caution is required. In Acts xii. 20 τὸν ἐπὶ τοῦ κοιτῶνος τοῦ βασιλέως may mean a "chamberlain" merely. Such were persons of public influence, as we learn from a Greek inscription, preserved in Walpole's *Turkey* (ii. 559), in honor of P. Ælius Alcibiades, "chamberlain of the emperor" (ἐπὶ κοιτῶνος Σεβ.), the epithets in which exactly suggest the kind of patronage expressed. In Rom. xvi. 23 the word ἐπίτροπος is the one commonly rendered "steward" (*e. g.* Matt. xx. 8; Luke viii. 3), and means the one to whom the care of the city was committed. For further information, Salden, *Otia Theol. de Eunuchis* [and Winer's *Realw.* art. *Verschnittene*], may be consulted. H. H.

* **EUNUCH, ETHIOPIAN.** [ETHIOPIAN EUNUCH.]

* **EUO'DIA.** [EUODIAS.]

EUO'DIAS (Εὐωδία [Steph., *fragrant*; Εὐοδία, Elz. Griesb. Lachm. Tisch., with all the uncial MSS., *prosperous*]), a Christian woman at Philippi (Phil. iv. 2). The name, however, is correctly Euodia [as in the Genevan vers.], that being the nominative case of Εὐωδίαν. The two persons whom St. Paul there wishes to bring into accordance are both women, referred to in the following verse by αἵτινες and αἷς. H. A.

* The A. V. in Phil. iv. 3 does not bring out this relation of αἵτινες to the previous names. Instead of "help those women which labored," &c., the rendering should be "help them," *i. e.* the women before mentioned, "which labored," &c. The conjecture that Euodia may have taken the name (note the meaning) on becoming a Christian, cannot be proved or disproved. Most of those who recognize an order of deaconesses in the primitive church, think that Euodia belonged to that order. [DEACONESS.] H.

EUPHRATES (פְּרָת: Εὐφράτης: *Euphrates*) is probably a word of Aryan origin, the initial element being *u*, which is in Sanscrit *su*, in Zend *hu*, and in Greek εὖ: and the second element being *fra*, the particle of abundance. The Euphrates is thus "the good and abounding river." It is not improbable that in common parlance the name was soon shortened to its modern form of *Frát*, which is almost exactly what the Hebrew literation expresses. But it is most frequently denoted in the Bible by the term הַנָּהָר, *han-nâhâr*, i. e. "the river," *the* river of Asia, in grand contrast to the short-lived torrents of Palestine. (For a list of the occurrences of this term, see Stanley, *S. & P.* App. § 34).

The Euphrates is the largest, the longest, and by far the most important of the rivers of western Asia. It rises from two chief sources in the Armenian mountains, one of them at *Domli*, 25 miles N. E. of Erzeroum, and little more than a degree from the Black Sea; the other on the northern slope of the mountain range called *Ala-T'agh*, near the village of *Diyadin*, and not far from Mount Ararat. The former, or Northern Euphrates, has the name *Frát* from the first, but is known also as the *Kara-Su* (Black River); the latter, or Southern Euphrates, is not called the *Frát* but the *Murad Chai*, yet it is in reality the main river. Both branches flow at first towards the west or southwest, passing through the wildest mountain-districts of Armenia; they meet at *Kebban-Maden*, nearly in long. 39° E. from Greenwich, having run respectively 400 and 270 miles. Here the stream formed by their combined waters is 120 yards wide, rapid, and very deep; it now flows nearly southward, but in a tortuous course, forcing a way through the ranges of Taurus and Anti-Taurus, and still seeming as if it would empty itself into the Mediterranean; but prevented from so doing by the longitudinal ranges of Amanus and Lebanon, which here run parallel to the Syrian coast, and at no great distance from it; the river at last desists from its endeavor, and in about lat. 36° turns towards the southeast, and proceeds in this direction for above 1000 miles to its embouchure in the Persian Gulf. The last part of its course, from *Hit* downwards, is through a low, flat, and alluvial plain, over which it has a tendency to spread and stagnate; above *Hit*, and from thence to *Sumeisat* (Samosata), the country along its banks is for the most part open but hilly; north of *Sumeisat*, the stream runs in a narrow valley among high mountains, and is interrupted by numerous rapids. The entire course is calculated at 1780 miles, nearly 650 more than that of the Tigris, and only 200 short of that of the Indus; and of this distance more than two thirds (1200 miles) is navigable for boats, and even, as the expedition of Col. Chesney proved, for small steamers. The width of the river is greatest at the distance of 700 or 800 miles from its mouth — that is to say, from its junction with the *Khabour* to the village of *Werai*. It there averages 400 yards, while lower down, from *Werdi* to *Lamlum*, it continually decreases, until at the last named place its width is not more than 120 yards, its depth having at the same time diminished from an average of 18 to one of 12 feet. The causes of this singular phenomenon are the entire lack of tributaries below the *Khabour*, and the employment of the water in irrigation. The river has also in this part of its course the tendency already noted, to run off and waste itself in vast marshes, which every year more and more cover the alluvial tract west and south of the stream. From this cause its lower course is continually varying, and it is doubted whether at present, except in the season of the inundation, any portion of the Euphrates water is poured into the *Shat-el-Arab*.

Digitized by Google

The annual inundation of the Euphrates is caused by the melting of the snows in the Armenian highlands. It occurs in the month of May. The rise of the Tigris is earlier, since it drains the *southern* flank of the great Armenian chain. The Tigris scarcely ever overflows [HIDDEKEL], but the Euphrates inundates large tracts on both sides of its course from Hit downwards. The great hydraulic works ascribed to Nebuchadnezzar (Abyden. Fr. 8) had for their great object to control the inundation by turning the waters through sluices into canals prepared for them, and distributing them in channels over a wide extent of country.

The Euphrates has at all times been of some importance as furnishing a line of traffic between the East and the West. Herodotus speaks of persons, probably merchants, using it regularly on their passage from the Mediterranean to Babylon (Herod. i. 185). He also describes the boats which were in use upon the stream (i. 194) — and mentions that their principal freight was wine, which he seems to have thought was furnished by Armenia. It was, however, more probably Syrian, as Armenia is too cold for the vine. Boats such as he describes, of wicker work, and coated with bitumen, or sometimes covered with skins, still abound on the river. Alexander appears to have brought to Babylon by the Euphrates route vessels of some considerable size, which he had had made in Cyprus and Phœnicia. They were so constructed that they could take to pieces, and were thus carried piecemeal to Thapsacus, where they were put together and launched (Aristobul. ap. Strab. xvi. 1, § 11). The disadvantage of the route was the difficulty of conveying return cargoes against the current. According to Herodotus the boats which descended the river were broken to pieces and sold at Babylon, and the owners returned on foot to Armenia, taking with them only the skins (i. 194). Aristobulus however related (ap. Strab. xvi. 3, § 3) that the Gerrhæans ascended the river in their rafts not only to Babylon, but to Thapsacus, whence they carried their wares on foot in all directions. The spices and other products of Arabia formed their principal merchandise. On the whole there are sufficient grounds for believing that throughout the Babylonian and Persian periods this route was made use of by the merchants of various nations, and that by it the East and West continually interchanged their most important products. (See Layard's *Nineveh and Babylon*, pp. 536–37).

The Euphrates is first mentioned in Scripture as one of the four rivers of Eden (Gen. ii. 14). Its celebrity is there sufficiently indicated by the absence of any explanatory phrase, such as accompanies the names of the other streams. We next hear of it in the covenant made with Abraham (Gen. xv. 18), where the whole country from "the great river, the river Euphrates" to the river of Egypt is promised to the chosen race. In Deuteronomy and Joshua we find that this promise was borne in mind at the time of the settlement in Canaan (Deut. i. 7, xi. 24; Josh. i. 4); and from an important passage in the first book of Chronicles it appears that the tribe of Reuben did actually extend itself to the Euphrates in the times anterior to Saul (1 Chr. v. 9). Here they came in contact with the Hagarites, who appear upon the middle Euphrates in the Assyrian inscriptions of the later empire. It is David, however, who seems for the first time to have entered on the full enjoyment of the promise, by the victories which he gained over Hadadezer, king of Zobah, and his allies, the Syrians of Damascus (2 Sam. viii. 3–8: 1 Chr. xviii. 3). The object of his expedition was "to recover his border," and "to stablish his dominion by the river Euphrates;" and in this object he appears to have been altogether successful: in somuch that Solomon, his son, who was not a man of war, but only inherited his father's dominions, is said to have "reigned over all kingdoms from the river (*i. e.* the Euphrates) unto the land of the Philistines and unto the border of Egypt" (1 K. iv. 21; compare 2 Chr. ix. 26). Thus during the reigns of David and Solomon the dominion of Israel actually attained to the full extent both ways of the original promise, the Euphrates forming the boundary of their empire to the northeast, and the river of Egypt (*torrens Ægypti*) to the southwest. This wide-spread dominion was lost upon the disruption of the empire under Rehoboam; and no more is heard in Scripture of the Euphrates until the expedition of Necho against the Babylonians in the reign of Josiah. The "Great River" had meanwhile served for some time as a boundary between Assyria and the country of the Hittites (see ASSYRIA), but had been repeatedly crossed by the armies of the Ninevite kings, who gradually established their sway over the countries upon its right bank. The crossing of the river was always difficult; and at the point where certain natural facilities fixed the ordinary passage, the strong fort of Carchemish had been built, probably in very early times, to command the position. [CARCHEMISH.] Hence, when Necho determined to attempt the permanent conquest of Syria, his march was directed upon "Carchemish by Euphrates" (2 Chr. xxxv. 20), which he captured and held. thus extending the dominion of Egypt to the Euphrates, and renewing the old glories of the Ramesside kings. His triumph, however, was short-lived. Three years afterwards the Babylonians — who had inherited the Assyrian dominion in these parts — made an expedition under Nebuchadnezzar against Necho, defeated his army, "which was by the river Euphrates in Carchemish" (Jer. xlvi. 2), and recovered all Syria and Palestine. Then "the king of Egypt came no more out of his land, for the king of Babylon had taken from the river of Egypt unto the river Euphrates all that pertained to the king of Egypt" (2 K. xxiv. 7).

These are the chief events which Scripture distinctly connects with the "Great River." It is probably included among the "rivers of Babylon," by the side of which the Jewish captives "remembered Zion" and "wept" (Ps. cxxxvii. 1); and no doubt is glanced at in the threats of Jeremiah against the Chaldæan "waters" and "springs," upon which there is to be a "drought," that shall "dry them up" (Jer. l. 38; li. 36). The fulfillment of these prophecies has been noticed under the head of CHALDÆA. The river still brings down as much water as of old, but the precious element is wasted by the neglect of man; the various water-courses along which it was in former times conveyed are dry; the main channel has shrunk; and the water stagnates in unwholesome marshes.

It is remarkable that Scripture contains no clear and distinct reference to that striking occasion when, according to profane historians (Herod. i. 191: Xen. *Cyrop.* vii. 5), the Euphrates was turned against its mistress, and used to effect the ruin of Babylon. The brevity of Daniel (v. 30, 31) is per

Digitized by Google

gaps sufficient to account for his silence on the point; but it might have been expected from the fullness of Jeremiah (chs. l. and li.) that so remarkable a feature of the siege would not have escaped mention. We must, however, remember, in the first place, that a clear prophecy may have been purposely withheld, in order that the Babylonians might not be put upon their guard. And secondly, we may notice, that there does seem to be at least one reference to the circumstance, though it is covert, as it was necessary that it should be. In immediate conjunction with the passage which most clearly declares the taking of the city by a surprise is found an expression, which reads very obscurely in our version — "the passages are stopped" (Jer. li. 32). Here the Hebrew term used (מַעְבָּרוֹת) applies most properly to "fords or ferries over rivers" (comp. Judg. iii. 28); and the whole passage may best be translated, "the ferries are seized" or "occupied;" which agrees very well with the entrance of the Persians by the river, and with the ordinary mode of transit in the place, where there was but one bridge (Herod. i. 186).

(See, for a general account of the Euphrates, Col. Chesney's *Euphrates Expedition*, vol. i.; and for the lower course of the stream, compare Loftus's *Chaldæa and Susiana*. See also Rawlinson's *Herodotus*, vol. i. Essay ix., and Layard's *Nineveh and Babylon*, chs. xxi. and xxii.) G. R.

EUPOL'EMUS (Εὐπόλεμος [*good in war*]), the "son of John, the son of Accos" ('Ακκώς; cf. Neh. iii. 4, 21, &c.), one of the envoys sent to Rome by Judas Maccabæus, cir. B. C. 161 (1 Macc. viii. 17; 2 Macc. iv. 11; Joseph. *Ant.* xii. 10, § 6). He has been identified with the historian of the same name (Euseb. *Præp. Ev.* ix. 17 ff.); but it is by no means clear that the historian was of Jewish descent (Joseph. *c. Apion.* i. 23; yet cf. Hieron. *de Vir. Illustr.* 38). B. F. W.

EUROCLYDON (Εὐροκλύδων [Lachm. Treg., with A B* Sin., Εὐρακύλων: *Euroaquilo*]), the name given (Acts xxvii. 14) to the gale of wind, which off the south coast of Crete seized the ship in which St. Paul was ultimately wrecked on the coast of Malta. The circumstances of this gale are described with much particularity; and they admit of abundant illustration from the experience of modern seamen in the Levant. In the first place it came down from the island (κατ' αὐτῆς),[a] and therefore must have blown, more or less, from the northward, since the ship was sailing along the south coast, not far from Mount Ida, and on the way from FAIR HAVENS toward PHŒNICE. So Captain Spratt, R. N., after leaving Fair Havens with a light southerly wind, fell in with "a strong northerly breeze, blowing direct from Mount Ida" (Smith, *Voyage and Shipwreck of St. Paul*, 1856, pp. 97, 245 [p. 101, ed. of 1866]). Next, the wind is described as being like a typhoon or whirlwind (τυφωνικός, A. V. "tempestuous"); and the same authority speaks of such gales in the Levant as being generally "accompanied by terrific gusts and squalls from those high mountains" (*Life and Epistles of St. Paul*, 1856, ii. 401). It is also observable that the change of wind in the voyage before us (xxvii. 13, 14) is exactly what might have been expected; for Captain J. Stewart, R. N., observes, in his remarks on the Archipelago, that "it is always safe to anchor under the lee of an island with a northerly wind, as it dies away gradually, but it would be extremely dangerous with southerly winds, as they almost invariably shift to a violent northerly wind" (Purdy's *Sailing Directory*, pt. ii. p. 61). The long duration of the gale ("the fourteenth night," 27), the overclouded state of the sky ("neither sun nor stars appearing," 20), and even the heavy rain which concluded the storm (τὸν ὑετόν, xxviii. 2) could easily be matched with parallel instances in modern times (see *Voy. and Shipwreck*, p. 144; *Life and Epp.* p. 412) We have seen that the wind was more or less northerly. The context gives us full materials for determining its direction with great exactitude. The vessel was driven from the coast of Crete to CLAUDA (xxvii. 16), and apprehension was felt that she would be driven into the African Syrtis (ver. 17). Combining these two circumstances with the fact that she was less than half way from Fair Havens to Phœnice when the storm began (ver. 14), we come to the conclusion that it came from the N. E. or E. N. E. This is quite in harmony with the natural sense of Εὐρακύλων (*Euroaquilo*, Vulg.), which is regarded as the true reading by Bentley, and is found in some of the best MSS.; but we are disposed to adhere to the Received Text, more especially as it is the more difficult reading and the phrase used by St. Luke (ὁ καλούμενος Εὐροκλύδων) seems to point to some peculiar word in use among the sailors. Dean Alford thinks that the true name of the wind was εὐρακύλων, but that the Greek sailors, not understanding the Latin termination, corrupted the word into εὐροκλύδων, and that so St. Luke wrote it. [WINER.] J. S. H.

EUTYCHUS (Εὔτυχος [*fortunate*]), a youth at Troas (Acts xx. 9), who sitting in a window, and having fallen asleep while St. Paul was discoursing far into the night, fell from the third story, and being taken up dead, was miraculously restored to life by the Apostle. The plain statement, ἤρθη νεκρός, and the proceeding of St. Paul with the body (cf. 2 K. iv. 34), forbid us for moment to entertain the view of De Wette, Meyer and Olshausen, who suppose that animation was merely suspended. H. A.

* In his later editions (*Apostelgeschichte*, 1854 and 1861), Meyer discards his earlier opinion, and declares fully that Eutychus was killed by the fall, and hence was restored to life by a miracle. We may add that the window, out of which the sleeper fell, projected (according to the side of the house where the window was) either over the street or over the interior court; and hence, in either case, he fell from "the third story" upon the hard earth or pavement below. The lamentation of those present (θορυβεῖσθε, and see Mark v. 38) shows that they considered him dead, which is also the antithesis suggested by ζῶντα in ver. 12. H.

EVANGELIST. The constitution of the Apostolic Church included an order or body of men known as Evangelists. The absence of any detailed account of the organization and practical working of the church of the first century leaves us in some uncertainty as to their functions and positions. The meaning of the name, "the publishers of glad tidings," seems common to the work of the Christian ministry generally, yet in Eph. iv. 11 the εὐαγγελισταί appear on the one hand after

the ἀπόστολοι and προφῆται; on the other before the ποιμένες and διδάσκαλοι. Assuming that the Apostles here, whether limited to the Twelve or not, are those who were looked on as the special delegates and representatives of Christ, and therefore higher than all others in their authority, and that the prophets were men speaking under the immediate impulse of the Spirit words that were mighty in their effects on men's hearts and consciences, it would follow that the evangelists had a function subordinate to theirs, yet more conspicuous, and so far higher, than that of the pastors who watched over a church that had been founded, and of the teachers who carried on the work of ystematic instruction. This passage accordingly would lead us to think of them as standing between the two other groups — sent forth as missionary preachers of the Gospel by the first, and as such preparing the way for the labors of the second. The same inference would seem to follow the occurrence of the word as applied to Philip in Acts xxi. 8. He had been one of those who had gone every where, εὐαγγελιζόμενοι τὸν λόγον (Acts viii. 4), now in one city, now in another (viii. 40); but he has not the power or authority of an Apostle, does not speak as a prophet himself, though the gift of prophecy belongs to his four daughters (xxi. 9), exercises apparently no pastoral superintendence over any portion of the flock. The omission of evangelists in the list of 1 Cor. xii. may be explained on the hypothesis that the nature of St. Paul's argument led him there to speak of the settled organization of a given local church, which of course presupposed the work of the missionary preacher as already accomplished, while the train of thought in Eph. iv. 11 brought before his mind all who were in any way instrumental in building up the church universal. It follows from what has been said that the calling of the evangelist is expressed by the word κηρύσσειν rather than διδάσκειν, or παρακαλεῖν; it is the proclamation of the glad-tidings to those who have not known them, rather than the instruction and pastoral care of those who have believed and been baptized. And this is also what we gather from 2 Tim. iv. 2, 5. Timotheus is "to preach the word;" in doing this he is to fulfill "the work of an evangelist." It follows also that the name denotes a *work* rather than an *order*. The evangelist might or might not be a bishop-elder or a deacon. The Apostles, so far as they evangelized (Acts viii. 25, xiv. 7; 1 Cor. i. 17), might claim the title, though there were many evangelists who were not Apostles. The brother, "whose praise was in the gospel" (2 Cor. viii. 18), may be looked on as one of St. Paul's companions in the work, and known probably by the same name. In this, as in other points connected with the organization of the church in the Apostolic age, but little information is to be gained from later writers. The name was no longer explained by the presence of those to whom it had been specially applied, and came to be variously interpreted. Theoderet (on Eph. iv. 11) describes the evangelists (as they have been described above) as travelling missionaries. Chrysostom, as men who preached the gospel μὴ περιϊόντες πανταχοῦ. The account given by Eusebius (*H. E.* iii. 37), though somewhat rhetorical and vague, gives prominence to the idea of itinerant missionary preaching. Men "do the work of evangelists, leaving their homes to proclaim Christ, and deliver the written gospels to those who were ignorant of the faith." The last clause of this description indicates a change in the work, which before long affected the meaning of the name. If the gospel was a written book, and the office of the evangelists was to read or distribute it, then the writers of such books were κατ' ἐξοχήν THE evangelists. It is thus, accordingly, that Eusebius (*l. c.*) speaks of them, though the old meaning of the word (as in *H. E.* v. 10, where he applies it to Pantænus) is not forgotten by him. Soon this meaning so overshadowed the old that Œcumenius (Estius on Eph. iv. 11) has no other notion of the evangelists than as those who have written a gospel (comp. Harless on Eph. iv. 11). Augustine, though commonly using the word in this sense, at times remembers its earlier signification (*Serm.* xcix. and cclxvi.). Ambrosianus (Estius, *l. c.*) identifies them with deacons. In later liturgical language the work was applied to the reader of the gospel for the day. (Comp. Neander, *Pflanz. u. Leit.* iii. 5; Hooker, *E. P.* bk. lxxviii. 7, 9.)

E. H. P.

EVE (חַוָּה, i. e. *Chavvah*: LXX. in Gen. iii 20, Ζωή, elsewhere Εὔα: *Heva*), the name given in Scripture to the first woman. It is simply a feminine form of the adjective חַי, *living, alive*, which more commonly makes חַיָּה; or it may be regarded as a variation of the noun חַיָּה, which means *life*. The account of Eve's creation is found at Gen. ii. 21, 22. Upon the failure of a companion suitable for Adam among the creatures which were brought to him to be named, the Lord God caused a deep sleep to fall upon him, and took one of his ribs from him, which he fashioned into a woman, and brought her to the man. Various explanations of this narrative have been offered. Perhaps that which we are chiefly intended to learn from it is the foundation upon which the union between man and wife is built, namely, identity of nature and oneness of origin.

Through the subtlety of the serpent, Eve was beguiled into a violation of the one commandment which had been imposed upon her and Adam. She took of the fruit of the forbidden tree and gave it her husband (comp. 2 Cor. xi. 3; 1 Tim. ii. 13, 14). [ADAM.] The different aspects under which Eve regarded her mission as a mother are seen in the names of her sons. At the birth of the first she said "I have gotten a man from the Lord," ["with Jehovah," i. e. his aid?] or perhaps, "I have gotten a man, even the Lord," mistaking him for the Redeemer. When the second was born, finding her hopes frustrated, she named him Abel, or *vanity*. [ABEL.] When his brother had slain him, and she again bare a son, she called his name Seth, and the joy of a mother seemed to outweigh the sense of the vanity of life: "For God," said she, "hath appointed ME another seed instead of Abel, for Cain slew him." The Scripture account of Eve closes with the birth of Seth. S. L.

EVI (אֵוִי [*desire*]: Εὐΐ; [Vat. Ευει, and so Alex. in Num.:] *Evi, Heveus*), one of the five kings or princes of Midian, slain by the Israelites in the war after the matter of Baal-peor, and whose lands were afterwards allotted to Reuben (Num xxxi. 8; Josh. xiii. 21). [MIDIAN.] E. S. P.

EVIDENCE (Jer. xxxii. 10 ff.) means "bill of sale" (סֵפֶר הַמִּקְנָה), mentioned repeatedly in

the account of Jeremiah's fictitious purchase of a field. This was a symbolic act, signifying that though the threatened desolation must come, God's word of promise was sure, and "houses and fields and vineyards should again be possessed in the land" (Jer. xxxii. 15). H.

EVIL-MERODACH (אֱוִיל מְרֹדַךְ: Εὐιλμαρωδέκ [Vat. -ει-], [Alex. Ενειλαρωδαχ, Ουλαμαραδαχ; FA. in Jer., Ουλεδαμαχαρ; Ουλαμαδάχαρ; Abyden. Ἀμιλμαρούδοκος; Beros. Εὐειλμαρδδουχος: *Evilmerodach*), according to Berosus and Abydenus, was the son and successor of Nebuchadnezzar. We learn from the second book of Kings (2 K. xxv. 27) and from Jeremiah (Jer. lii. 31), that in the first year of his reign this king had compassion upon his father's enemy, Jehoiachin, and released him from prison where he had languished for thirty-seven years, "spake kindly to him," and gave him a portion at his table for the rest of his life. He reigned but a short term, having ascended the throne on the death of Nebuchadnezzar in B. C. 561, and being himself succeeded by Neriglissar in B. C. 559. (See the Canon of Ptolemy, given under BABYLON.) He thus appears to have reigned but two years, which is the time assigned to him by Abydenus (*Fr.* 9) and Berosus (*Fr.* 14). At the end of this brief space Evil-Merodach was murdered by Neriglissar [NERGAL-SHAREZER] — a Babylonian noble married to his sister — who then seized the crown. According to Berosus, Evil-Merodach provoked his fate by lawless government and intemperance. Perhaps the departure from the policy of his father, and the substitution of mild for severe measures, may have been viewed in this light. G. R.

* **EVIL SPIRIT.** [DEMON.]

* **EXCELLENCY OF CARMEL,** Is. xxv. 2. [CARMEL, especially *note*, p. 389, Amer. ed.]

* **EXCELLENT,** after the Latin *excellens*, has its older sense of "surpassing," "transcendent," in Dan. ii. 31 ("brightness . . . excellent") and 2 Peter i. 17 ("excellent glory"). In conformity with that usage, we find Shakespeare speaking of "a grand excellent tyrant," and Taylor of "excellent pain."

"Most excellent" (κράτιστος) as applied to Theophilus, Luke i. 3, and to Felix, Acts xxiii. 26, is unquestionably a title of rank or office. It is the same Greek term that the A. V. renders "noble" as applied to Felix, Acts xxiv. 3, and to Festus, Acts xxvi. 25. [THEOPHILUS.] H.

* **EXCHANGERS.** [MONEY-CHANGERS.]

EXCOMMUNICATION (ἀφορισμός: *excommunicatio*). Excommunication is a power founded upon a right inherent in all religious societies, and is analogous to the powers of capital punishment, banishment, and exclusion from membership, which are exercised by political and municipal bodies. If Christianity is merely a philosophical idea thrown into the world to do battle with other theories, and to be valued according as it maintains its ground or not in the conflict of opinions, excommunication and ecclesiastical punishments and penitential discipline are unreasonable. If a society has been instituted for maintaining any body of doctrine and any code of morals, they are necessary to the existence of that society. That the Christian church is an organized polity, a spiritual "kingdom of God" on earth, is the declaration of the Bible [CHURCH]; and that the Jewish church was at once a spiritual and a temporal organization is clear.

1. *Jewish Excommunication.* — The Jewish system of excommunication was threefold. For a first offense a delinquent was subjected to the penalty of נִדּוּי (*Niddûi*). Rambam (quoted by Lightfoot, *Horæ Hebraicæ* on 1 Cor. v. 5), Morinus (*De Pœnitentia*, iv. 27), and Buxtorf (*Lexicon*, s. v נִדּוּי) enumerate the twenty-four offenses for which it was inflicted. They are various, and range in heinousness from the offense of keeping a fierce dog to that of taking God's name in vain. Elsewhere (*Bab. Moed Katon*, fol. 16, 1) the causes of its infliction are reduced to two, termed money and epicurism, by which is meant debt and wanton insolence. The offender was first cited to appear in court, and if he refused to appear or to make amends, his sentence was pronounced — "Let M. or N. be under excommunication." The excommunicated person was prohibited the use of the bath, or of the razor, or of the convivial table; and all who had to do with him were commanded to keep him at four cubits' distance. He was allowed to go to the Temple, but not to make the circuit in the ordinary manner. The term of this punishment was thirty days; and it was extended to a second, and to a third thirty days when necessary. If at the end of that time the offender was still contumacious, he was subjected to the second excommunication, termed חֵרֶם (*cherem*), a word meaning something devoted to God (Lev. xxvii. 21, 28; Ex. xxii. 20 [19]; Num. xviii. 14). Severer penalties were now attached. The offender was not allowed to teach or to be taught in company with others, to hire or to be hired, nor to perform any commercial transactions beyond purchasing the necessaries of life. The sentence was delivered by a court of ten, and was accompanied by a solemn malediction, for which authority was supposed to be found in the "Curse ye Meroz" of Judg. v. 23. Lastly followed שַׁמָּתָא (*Shammâthâ*), which was an entire cutting off from the congregation. It has been supposed by some that these two latter forms of excommunication were undistinguishable from each other.

The punishment of excommunication is not appointed by the Law of Moses. It is founded on the natural right of self-protection which all societies enjoy. The case of Korah, Dathan, and Abiram (Num. xvi.), the curse denounced on Meroz (Judg. v. 23), the commission and proclamation of Ezra (vii. 26, x. 8), and the reformation of Nehemiah (xiii. 25), are appealed to by the Talmudists as precedents by which their proceedings are regulated. In respect to the principle involved, the "cutting off from the people" commanded for certain sins (Ex. xxx. 33, 38, xxxi. 14; Lev. xvii. 4), and the exclusion from the camp denounced on the leprous (Lev. xiii. 46; Num. xii. 14) are more apposite.

In the New Testament, Jewish excommunication is brought prominently before us in the case of the man that was born blind and restored to sight (John ix.). "The Jews had agreed already that if any man did confess that he was Christ, he should be put out of the synagogue. Therefore said his parents, He is of age, ask him" (22, 23). "And they cast him out. Jesus heard that they had cast him out" (34, 35). The expressions here used

Digitized by Google

ἀποσυνάγωγος γένηται — ἐξέβαλον αὐτὸν ἔξω, refer, no doubt, to the first form of excommunication or *niddûi*. Our Lord warns his disciples that they will have to suffer excommunication at the hands of their countrymen (John xvi. 2); and the fear of it is described as sufficient to prevent persons in a respectable position from acknowledging their belief in Christ (John xii. 42). In Luke vi. 22, it has been thought that our Lord referred specifically to the three forms of Jewish excommunication — "Blessed are ye when men shall hate you, and when they shall separate you from their company (ἀφορίσωσιν), and shall reproach you (ὀνειδίσωσιν), and cast out your name as evil (ἐκβάλωσιν), for the Son of Man's sake." The three words very accurately express the simple separation, the additional malediction, and the final exclusion of *niddûi*, *cherem*, and *shammâthâ*. This verse makes it probable that the three stages were already formally distinguished from each other, though, no doubt, the words appropriate to each are occasionally used inaccurately.[a]

II. *Christian Excommunication.* — Excommunication, as exercised by the Christian church, is not merely founded on the natural right possessed by all societies, nor merely on the example of the Jewish church and nation. It was instituted by our Lord (Matt. xviii. 15, 18), and it was practiced by and commanded by St. Paul (1 Tim. i. 20; 1 Cor. v. 11; Tit. iii. 10).

Its Institution. — The passage in St. Matthew has led to much controversy, into which we do not enter. It runs as follows: "If thy brother shall trespass against thee, go and tell him his fault between thee and him alone: if he shall hear thee, thou hast gained thy brother. But if he will not hear thee, then take with thee one or two more, that in the mouth of two or three witnesses every word may be established. And if he shall neglect to hear them, tell it unto the church: but if he neglect to hear the church, let him be unto thee as a heathen man and a publican." "Verily I say unto you, Whatsoever ye shall bind on earth shall be bound in heaven, and whatsoever ye shall loose on earth shall be loosed in heaven." Our Lord here recognizes and appoints a way in which a member of his church is to become to his brethren as a heathen man and a publican — *i. e.* be reduced to a state analogous to that of the Jew suffering the penalty of the third form of excommunication. It is to follow on his contempt of the censure of the church passed on him for a trespass which he has committed. The final excision is to be preceded, as in the case of the Jew, by two warnings.

Apostolic Example. — In the epistles we find St. Paul frequently claiming the right to exercise discipline over his converts (comp. 2 Cor. i. 23, xiii. 10). In two cases we find him exercising this authority to the extent of cutting off offenders from the church. One of these is the case of the incestuous Corinthian: "Ye are puffed up, and have not rather mourned, that he that hath done this deed might be taken away from among you. For I verily, as absent in body, but present in spirit, have judged already, as though I were present, concerning him that hath so done this deed, in the name of our Lord Jesus Christ, when ye are gathered together, and my spirit, with the power of our Lord Jesus Christ, to deliver such an one unto Satan for the destruction of the flesh, that the spirit may be saved in the day of the Lord Jesus" (1 Cor. v. 2–5). The other case is that of Hymeneus and Alexander: "Holding faith, and a good conscience; which some having put away concerning faith have made shipwreck: of whom is Hymeneus and Alexander; whom I have delivered unto Satan, that they may learn not to blaspheme" (1 Tim. i. 19, 20). It seems certain that these persons were excommunicated, the first for immorality, others for heresy. What is the full meaning of the expression, "deliver unto Satan," is doubtful. All agree that excommunication is contained in it, but whether it implies any further punishment, inflicted by the extraordinary powers committed specially to the Apostles, has been questioned. The strongest argument for the phrase meaning no more than excommunication may be drawn from a comparison of Col. i. 13. Addressing himself to the "saints and faithful brethren in Christ which are at Colosse," St. Paul exhorts them to "give thanks unto the Father which hath made us meet to be partakers of the inheritance of the saints in light: who hath delivered us from the power of darkness, and hath translated us into the kingdom of his dear Son: in whom we have redemption through his blood, even the forgiveness of sins." The conception of the Apostle here is of men lying in the realm of darkness, and transported from thence into the kingdom of the Son of God, which is the inheritance of the saints in light, by admission into the church. What he means by the power of darkness is abundantly clear from many other passages in his writings, of which it will be sufficient to quote Eph. vi. 12: "Put on the whole armor of God, that ye may be able to stand against the wiles of the devil; for we wrestle not against flesh and blood, but against principalities, against powers, against the rulers of the darkness of this world, against spiritual wickedness in high places." Introduction into the church is therefore, in St. Paul's mind, a translation from the kingdom and power of Satan to the kingdom and government of Christ. This being so, he could hardly more naturally describe the effect of excluding a man from the church than by the words, "deliver him unto Satan," the idea being, that the man, ceasing to be a subject of Christ's kingdom of light, was at once transported back to the kingdom of darkness, and delivered therefore into the power of its ruler, Satan. This interpretation is strongly confirmed by the terms in which St. Paul describes the commission which he received from the Lord Jesus Christ, when he was sent to the Gentiles: "To open their eyes, and to turn them from darkness to light, and from the power of Satan unto God, that they may receive forgiveness of sins, and inheritance among them which are sanctified by faith that is in me" (Acts xxvi. 18). Here again the act of being placed in Christ's kingdom, the church, is

[a] On the forms and degrees of Jewish excommunication, see particularly Buxtorf's *Lex. Talm.* col. 827–29, 1303–07, 2466–70. A tremendous example of the *cherem* is given (from Buxtorf) in Stuart's *Comm. on Romans*, p. 403, 2d ed. (note on Rom. ix 3). The anathema pronounced on Spinoza by a Jewish tribunal in 1656 is another remarkable specimen of cursing in the name of religion. It has been recently published in the *Supplementum* to the Works of Spinoza (containing hitherto inedited treatises) p. 290 ff (Amst 1862). A.

pronounced to be a translation from darkness to light, from the power of Satan unto God. Conversely, to be cast out of the church would be to be removed from light to darkness, to be withdrawn from God's government, and delivered into the power of Satan (so Balsamon and Zonaras, *in Basil. Can.* 7; Estius, *in* 1 *Cor.* v.; Beveridge, *in Can. Apost.* x.). If, however, the expression means more than excommunication, it would imply the additional exercise of a special apostolical power, similar to that exerted on Ananias and Sapphira (Acts v. 1), Simon Magus (viii. 20), and Elymas (xiii. 10). (So Chrysostom, Ambrose, Augustine, Hammond, Grotius, Lightfoot.)

Apostolic Precept. — In addition to the claim to exercise discipline, and its actual exercise in the form of excommunication, by the Apostles, we find apostolic precepts directing that discipline should be exercised by the rulers of the church, and that in some cases excommunication should be resorted to: "If any man obey not our word by this epistle, note that man, and have no company with him, that he may be ashamed. Yet count him not as an enemy, but admonish him as a brother," writes St. Paul to the Thessalonians (2 Thess. iii. 14). To the Romans: "Mark them which cause divisions and offenses contrary to the doctrine which ye have heard, and avoid them" (Rom. xvi. 17). To the Galatians: "I would they were even cut off that trouble you" (Gal. v. 12). To Timothy: "If any man teach otherwise, ... from such withdraw thyself" (1 Tim. vi. 3). To Titus he uses a still stronger expression: "A man that is an heretic, after the first and second admonition, reject" (Tit. iii. 10). St. John instructs the lady to whom he addresses his second epistle, not to receive into her house, nor bid God speed to any who did not believe in Christ (2 John 10); and we read that in the case of Cerinthus he acted himself on the precept that he had given (Euseb. *H. E.* iii. 28). In his third epistle he describes Diotrephes, apparently a Judaizing presbyter, "who loved to have the preëminence," as "casting out of the church," *i. e.* refusing church communion to, the stranger brethren who were travelling about preaching to the Gentiles (3 John 10). In the addresses to the Seven Churches, the angels or rulers of the Church of Pergamos and of Thyatira are rebuked for "suffering" the Nicolaitans and Balaamites "to teach and to seduce my servants to commit fornication, and to eat things sacrificed unto idols" (Rev. ii. 20). There are two passages still more important to our subject. In the Epistle to the Galatians, St. Paul denounces, "Though we, or an angel from heaven, preach any other gospel unto you than that which we have preached unto you, let him be accursed (ἀνάθεμα ἔστω). As I said before, so say I now again, If any man preach any other gospel unto you than that ye have received, let him be accursed" (ἀνάθεμα ἔστω, Gal. i. 8, 9). And in the First Epistle to the Corinthians: "If any man love not the Lord Jesus Christ, let him be Anathema Maran-atha" (1 Cor. xvi. 22). It has been supposed that these two expressions, "let him be Anathema," "let him be Anathema Maran-atha," refer respectively to the two later stages of Jewish excommunication — the *cherem* and the *shammâthâ*. This requires consideration.

The words ἀνάθεμα and ἀνάθημα have evidently the same derivation, and originally they bore the same meaning. They express a person or thing set apart, laid up, or devoted. But whereas a thing may be set apart by way of honor or for destruction, the words, like the Latin "sacer" and the English "devoted," came to have opposite senses — τὸ ἀπηλλοτριωμένον Θεοῦ, and τὸ ἀφωρισμένον Θεῷ. The LXX. and several ecclesiastical writers use the two words almost indiscriminately, but in general the form ἀνάθημα is applied to the votive offering (see 2 Macc. ix. 16; Luke xxi. 5; and Chrys. *Hom.* xvi. *in Ep. ad Rom.*), and the form ἀνάθεμα to that which is devoted to evil (see Deut. vii. 26; Josh. vi. 17, viii. 13). Thus St. Paul declares that he could wish himself an ἀνάθεμα from Christ, if he could thereby save the Jews (Rom. ix. 3). His meaning is that he would be willing to be set apart as a vile thing, to be cast aside and destroyed, if only it could bring about the salvation of his brethren. Hence we see the force of ἀνάθεμα ἔστω in Gal. i. 8. "Have nothing to do with him," would be the Apostle's injunction, "but let him be set apart as an evil thing, for God to deal with him as he thinks fit." Hammond (*in loc.*) paraphrases it as follows: — "You are to disclaim and renounce all communion with him, to look on him as on an excommunicated person, under the second degree of excommunication, that none is to have any commerce with in sacred things." Hence it is that ἀνάθεμα ἔστω came to be the common expression employed by Councils at the termination of each canon which they enacted, meaning that whoever was disobedient to the canon was to be separated from the communion of the church and its privileges, and from the favor of God, until he repented (see Bingham, *Ant.* xvi. 2, 16).

The expression Ἀνάθεμα μαραναθά, as it stands by itself without explanation in 1 Cor. xvi. 22, is so peculiar, that it has tempted a number of ingenious expositions. Parkhurst hesitatingly derives it from אָרוּר אַתָּה, "Cursed be thou." But this derivation is not tenable. Buxtorf, Morinus, Hammond, Bingham, and others identify it with the Jewish *shammâthâ*. They do so by translating *shammâthâ*, "The Lord comes." But *shammâthâ* cannot be made to mean "The Lord comes" (see Lightfoot, *in loc.*). Several fanciful derivations are given by Rabbinical writers, as "There is death," "There is desolation;" but there is no mention by them of such a signification as "The Lord comes." Lightfoot derives it from שַׁמָּתָא, and it probably means a thing excluded or shut out. Maranatha, however peculiar its use in the text may seem to us, is a Syro-Chaldaic expression, signifying "The Lord is come" (Chrysostom, Jerome, Estius, Lightfoot), or "The Lord cometh." If we take the former meaning, we may regard it as giving the reason why the offender was to be anathematized; if the latter, it would either imply that the separation was to be in perpetuity, "donec Dominus redeat" (Augustine), or, more properly, it would be a form of solemn appeal to the day on which the judgment should be ratified by the Lord (comp. Jude 14). In any case, it is a strengthened form of the simple ἀνάθεμα ἔστω. And thus it may be regarded as holding towards it a similar relation to that which existed between the *shammâthâ* and the *cherem*, but not on any supposed ground of etymological identity between the two words *shammâthâ* and *maran-atha*. Perhaps we ought to interpunctuate more strongly between ἀνάθεμα and μαραναθά, and read ἤτω ἀνάθεμα· μαραναθά, *i. e.* "Let him be

Digitized by Google

anathema. The Lord will come." The *anathema* and the *cherem* answer very exactly to each other (see Lev. xxvii. 28; Num. xxi. 3; Is. xliii. 28).

Restoration to Communion. — Two cases of excommunication are related in Holy Scripture; and in one of them the restitution of the offender is specially recounted. The incestuous Corinthian had been excommunicated by the authority of St. Paul, who had issued his sentence from a distance without any consultation with the Corinthians. He had required them publicly to promulgate it and to act upon it. They had done so. The offender had been brought to repentance, and was overwhelmed with grief. Hereupon St. Paul, still absent as before, forbids the further infliction of the punishment, pronounces the forgiveness of the penitent, and exhorts the Corinthians to receive him back to communion, and to confirm their love towards him.

The Nature of Excommunication is made more evident by these acts of St. Paul than by any investigation of Jewish practice or of the etymology of words. We thus find, (1) that it is a spiritual penalty, involving no temporal punishment, except accidentally; (2) that it consists in separation from the communion of the church; (3) that its object is the good of the sufferer (1 Cor. v. 5), and the protection of the sound members of the church (2 Tim. iii. 17); (4) that its subjects are those who are guilty of heresy (1 Tim. i. 20), or gross immorality (1 Cor. v. 1); (5) that it is inflicted by the authority of the church at large (Matt. xviii. 18), wielded by the highest ecclesiastical officer (1 Cor. v. 3; Tit. iii. 10); (6) that this officer's sentence is promulgated by the congregation to which the offender belongs (1 Cor. v. 4), in deference to his superior judgment and command (2 Cor. ii. 9), and in spite of any opposition on the part of a minority (*ib.* 6); (7) that the exclusion may be of indefinite duration, or for a period; (8) that its duration may be abridged at the discretion and by the indulgence of the person who has imposed the penalty (*ib.* 8); (9) that penitence is the condition on which restoration to communion is granted (*ib.* 7); (10) that the sentence is to be publicly reversed as it was publicly promulgated (*ib.* 10).

Practice of Excommunication in the Post-Apostolic Church. — The first step was an admonition o the offender, repeated once, or even more than once, in accordance with St. Paul's precept (Tit. iii. 10). (See S. Ambr. *De Offic.* ii. 27; Prosper, *De Vit. Contempl.* ii. 7; Synesius, *Ep.* lviii.) If this did not reclaim him, it was succeeded by the lesser excommunication (ἀφορισμός), by which he was excluded from the participation of the eucharist, and was shut out from the communion-service, although admitted to what was called the service of the catechumens (see Theodoret, *Ep.* lxxvii. *ad Eubul.*). Thirdly followed the greater excommunication or Anathema (παντελὴς ἀφορισμός, ἀνάθεμα), by which the offender was debarred, not only from the eucharist, but from taking part in all religious acts in any assembly of the church, and from the company of the faithful in the ordinary concerns of life. In case of submission, offenders were received back to communion by going through the four stages of public penance, in which they were termed, (1) προσκλαίοντες, *flentes*, or weepers; (2) ἀκροώμενοι, *audientes*, or hearers; (3) ὑποπίπτοντες, *substrati*, or kneelers: (4) συνεστῶτες, *consistentes*, or co-standers; after which they were restored to communion by absolution, accompanied by imposition of hands. To trace out this branch of the subject more minutely would carry us beyond our legitimate sphere. Reference may be made to Suicer's *Thesaurus Ecclesiasticus*, s. vv. προσκλαυσις, ἀκρόασις, ὑπόπτωσις, σύστασις.

EXECUTIONER (טַבָּח: σπεκουλάτωρ). The Hebrew *tabbâch* describes in the first instance the office of executioner, and secondarily, the general duties of the body-guard of a monarch. Thus Potiphar was "captain of the executioners" (Gen. xxxvii. 36; see margin), and had his official residence at the public jail (Gen. xl. 3). Nebuzaradan (2 K. xxv. 8; Jer. xxxix. 9) and Arioch (Dan. ii. 14) held the same office. That the "captain of the guard" himself occasionally performed the duty of an executioner appears from 1 K. ii. 25, 34. Nevertheless the post was one of high dignity, and something beyond the present position of the *zâbit* of modern Egypt (comp. Lane, i. 163), with which Wilkinson (ii. 45) compares it. It is still not unusual for officers of high rank to inflict corporal punishment with their own hands (Wilkinson, ii. 43). The LXX. takes the word in its original sense (cf. 1 Sam. ix. 23), and terms Potiphar *chief-cook*, ἀρχιμάγειρος.

The Greek σπεκουλάτωρ (Mark vi. 27) is borrowed from the Latin *speculator*; originally a military spy or scout, but under the emperors transferred to the *body-guard*, from the vigilance which their office demanded (Tac. *Hist.* ii. 11; Suet. *Claud.* 35). W. L. B.

EXILE. [CAPTIVITY.]

EXODUS (וְאֵלֶּה שְׁמוֹת, being the first words of the book, or abbr. שְׁמוֹת; in the Masora to Gen. xxiv. 8 called נזיקין, see Buxt. *Lex. Talm.* col. 1325: Ἔξοδος: *Exodus*), the second book of the Law or Pentateuch.

A. *Contents.* — The book may be divided into two principal parts, I. Historical, i. 1–xviii. 27; and II. Legislative, xix. 1–xl. 38. The former of these may be subdivided into (1) the preparation for the deliverance of Israel from their bondage in Egypt; (2) the accomplishment of that deliverance.

I. (1.) The first section (i. 1–xii. 36) contains an account of the following particulars: The great increase of Jacob's posterity in the land of Egypt, and their oppression under a new dynasty which occupied the throne after the death of Joseph

Digitized by Google

ch. .); the birth, education, and flight of Moses (ii.) his solemn call to be the deliverer of his people (iii. 1–iv. 17), and his return to Egypt in consequence (iv. 18–31); his first ineffectual attempt to prevail upon Pharaoh to let the Israelites go, which only resulted in an increase of their burdens (v. 1–21); a further preparation of Moses and Aaron for their office, together with the account of their genealogies (v. 22–vii. 7); the successive signs and wonders, by means of which the deliverance of Israel from the land of bondage is at length accomplished, and the institution of the Passover (vii. 8–xii. 36).

(2.) A narrative of events from the departure out of Egypt to the arrival of the Israelites at Mount Sinai. We have in this section (*a.*) the departure and (mentioned in connection with it) the injunctions then given respecting the Passover and the sanctification of the first-born (xii. 37–xiii. 16); the march to the Red Sea, the passage through it, and the destruction of Pharaoh and his host in the midst of the sea, together with Moses' song of triumph on the occasion (xiii. 17–xv. 21); (*b.*) the principal events on the journey from the Red Sea to Sinai, the bitter waters at Marah, the giving of quails and of the manna, the observance of the Sabbath, the miraculous supply of water from the rock at Rephidim, and the battle there with the Amalekites (xv. 22–xvii. 16); the arrival of Jethro in the Israelitish camp, and his advice as to the civil government of the people (xviii.).

II. The solemn establishment of the Theocracy on Mount Sinai. The people are set apart to God as "a kingdom of priests and an holy nation" (xix. 6); the ten commandments are given, and the laws which are to regulate the social life of the people are enacted (xxi. 1–xxiii. 19); an Angel is promised as their guide to the Promised Land, and the covenant between God and Moses, Nadab and Abihu, and seventy elders, as the representatives of the people, is most solemnly ratified (xxiii. 20–xxiv. 18); instructions are given respecting the tabernacle, the ark, the mercy-seat, the altar of burnt-offering, the separation of Aaron and his sons for the priest's office, the vestments which they are to wear, the ceremonies to be observed at their consecration, the altar of incense, the laver, the holy oil, the selection of Bezaleel and Aholiab for the work of the tabernacle, the observance of the Sabbath, and the delivery of the two tables of the Law into the hands of Moses (xxv. 1–xxxi. 18); the sin of the people in the matter of the golden calf, their rejection in consequence, and their restoration to God's favor at the intercession of Moses (xxxii. 1–xxxiv. 35); lastly, the construction of the tabernacle, and all pertaining to its service in accordance with the injunctions previously given (xxxv. 1–xl. 38).

This book, in short, gives a sketch of the early history of Israel as a nation: and the history has three clearly marked stages. First we see a nation enslaved; next a nation redeemed; lastly a nation set apart, and through the blending of its religious and political life consecrated to the service of God.

B. *Integrity.* — According to von Lengerke (*Kenaan*, lxxxviii., xc.) the following portions of the book belong to the original or Elohistic document: Chap. i. 1–14, ii. 23–25, vi. 2–vii. 7, xii. 1–28, 37, 38, 40–51 (xiii. 1, 2, perhaps), xvi., xix. 1, xx., xxv.–xxxi., xxxv.–xl. Stähelin (*Krit. Unters.*) and De Wette (*Einleitung*) agree in the main with this division. Knobel [1857], the most recent writer on the subject, in the introduction to his commentary on Exodus and Leviticus, has sifted these books still more carefully, and with regard to many passages has formed a different judgment. He assigns to the Elohist: i. 1–7, 13, 14, ii. 23–25 from וַיֶּאֱנַח, vi. 2–vii. 7 (except vi. 8), vii. 8–13, 19–22, viii. 1–3. 11 from וְלֹא, and 12–15, ix. 8–12 and 35, xi. 9, 10, xii. 1–23, 28, 37 a, 40–42, 43–51, xiii. 1, 2, 20, xiv. 1–4, 8, 9, 15–18 (except מַה תִּצְעַק אֵלָי in ver. 15, and הָרֵם אֶת מַטְּךָ in ver. 16), 21–23, and 26–29 (except 27 from וַיָּשָׁב), xv. 19, 22, 23, 27, xvi. 1, 2, 9–26, 31–36, xvii. 1, xix. 2 a, xxv.–xxxi. 11, 12–17 in the main; xxxv. 1–xl. 38.

A mere comparison of the two lists of passages selected by these different writers as belonging to the original document is sufficient to show how very uncertain all such critical processes must be. The first, that of von Lengerke, is open to many objections, which have been urged by Hävernick (*Einl. in der Pent.* § 117), Ranke, and others. Thus, for instance, chap. vi. 6, which all agree in regarding as Elohistic, speaks of "great judgments" (שְׁפָטִים גְּדֹלִים in the plur.), wherewith God would redeem Israel, and yet not a word is said of these in the so-called original document. Again xii. 12, 23, 27 contains the announcement of the destruction of the first-born of Egypt, but the fulfillment of the threat is to be found, according to the critics, only in the later Jehovistic additions. Hupfeld has tried to escape this difficulty by supposing that the original documents did contain *an* account of the slaying of the first-born, as the institution of the Passover in xii. 12, &c. has clearly a reference to it: only he will not allow that the story as it now stands is that account. But even then the difficulty is only partially removed, for thus *one* judgment only is mentioned, not *many* (vi. 6). Knobel has done his best to obviate this glaring inconsistency. Feeling no doubt that the ground taken by his predecessors was not tenable, he retains as a part of the original work much which they had rejected. It is especially worthy of notice that he considers some at least of the miraculous portions of the story to belong to the older document, and so accounts for the expression in vi. 6. The changing of Aaron's rod into a serpent, of the waters of the Nile into blood, the plague of frogs, of mosquitoes (A. V. lice), and of boils, and the destruction of the first-born, are, according to Knobel, Elohistic. He points out what he considers here links of connection, and a regular sequence in the narrative. He bids us observe that Jehovah always addresses Moses, and that Moses directs Aaron how to act. The miracles, then, are arranged in order of importance: first there is the sign which serves to accredit the mission of Aaron; next follow three plagues, which, however, do not touch men, and these are sent through the instrumentality of Aaron; the fourth plague is a plague upon man, and here Moses takes the most prominent part; the fifth and last is accomplished by Jehovah himself. Thus the miracles increase in intensity as they go on. The agents likewise rise in dignity If Aaron with his rod of might begins the work, he gives way afterwards to his greater brother, whilst for the last act of redemption Jehovah employs no human agency, but himself with

Digitized by Google

a mighty hand and outstretched arm effects the deliverance of his people. The passages thus selected have no doubt a sort of connection, but it is in the highest degree arbitrary to conclude that because portions of a work may be omitted without seriously disturbing the sense, these portions do not belong to the original work, but must be regarded as subsequent embellishments and additions.

Again, all agree in assigning chaps. iii. and iv. to the Jehovist. The call of Moses, as there described, is said to be merely the Jehovistic parallel to vi. 2–vii. 7. Yet it seems improbable that the Elohist should introduce Moses with the bare words, "And God spake to Moses," vi. 2, without a single word as to the previous history of so remarkable a man. So argues Hävernick, and as it appears to us, not without reason. It will be observed that none of these critics attempt to make the divine names a criterion whereby to distinguish the several documents. Thus in the Jehovistic portion, chap. i. 15–22, De Wette is obliged to remark, with a sort of uneasy candor, "but vv. 17, 20, *Elohim* (?)," and again, chap. iii. 4, 6, 11–15 "here seven times *Elohim*." In other places there is the same difficulty as in chap. xix. 17, 19, which Stähelin, as well as Knobel, gives to the Jehovist. In the passages in chaps. vii., viii., ix., which Knobel classes in the earlier record, the name Jehovah occurs throughout. It is obvious, then, that there must be other means of determining the relative antiquity of the different portions of the book, or the attempt to ascertain which are earlier and which are later must entirely fail. Accordingly certain peculiarities of style are supposed to be characteristic of the two documents. Thus, for instance, De Wette (*Einl.* § 151, S. 183) appeals to פרה ורבה, i. 7, בעצם היו חזה, xii. 17, 41, חקים ברית, vi. 4, the formula וידבר י"י אל משה לאמר, xxv. 1, xxx. 11, &c., צבאות, vi. 26, vii. 4, xii. 17, 41, 51; בין הערבים, xii. 6, xxix. 41, xxx. 8, and other expressions, as decisive of the Elohist. Stähelin also proposes on very similar grounds to separate the first from the second legislation. "Wherever," he says, "I find mention of a pillar of fire, or of a cloud, Ex. xxxiii. 9, 10, or an 'Angel of Jehovah,' as Ex. xxiii., xxxiv., or the phrase 'flowing with milk and honey,' as Ex. xiii. 5, xxxiii. 3 . . . where mention is made of a coming down of God, as Ex. xix., xxxiv. 5, or where the Canaanite nations are numbered, or the tabernacle supposed to be without the camp, Ex. xxxiii. 7, I feel tolerably certain that I am reading the words of the author of the second legislation (*i. e.* the Jehovist)." But these nice critical distinctions are very precarious, especially in a stereotyped language like the Hebrew.

Unfortunately, too, dogmatical prepossessions have been allowed some share in the controversy. De Wette and his school chose to set down everything which savored of a miracle as proof of later authorship. The love of the marvellous, which is all they see in the stories of miracles, according to them could not have existed in an earlier and simpler age. But on their own hypothesis this is a very extraordinary view. For the earlier traditions of a people are not generally the least wonderful, but the reverse. And one cannot, thus, acquit the second writer of a *design* in embellishing his narrative. However, this is not the place to argue with those who deny the possibility of a miracle, or who make the narration of miracles proof sufficient of later authorship. Into this error Knobel, it is true, has not fallen. By admitting some of the plagues into his Elohistic catalogue, he shows that he is at least free from the dogmatic prejudices of critics like De Wette. But his own critical tests are not conclusive. And the way in which he cuts verses to pieces, as in viii. 11, and xiii. 15, 16, 27, where it suits his purpose, is so completely arbitrary, and results so evidently from the stern constraint of a theory, that his labors in this direction are not more satisfactory than those of his predecessors.

On the whole there seems much reason to doubt whether critical acumen will ever be able plausibly to distinguish between the original and the supplement in the book of Exodus. There is nothing indeed forced or improbable in the supposition, either that Moses himself incorporated in his memoirs ancient tradition, whether oral or written, or that a writer later than Moses made use of materials left by the great legislator in a somewhat fragmentary form. There is an occasional abruptness in the narrative, which suggests that this may possibly have been the case, as in the introduction of the genealogy vi. 13–27. The remarks in xi. 3, xvi. 35, 36 lead to the same conclusion. The apparent confusion at xi. 1–3 may be explained by regarding these verses as parenthetical.

We shall give reasons hereafter for concluding that the Pentateuch *in its present form* was not altogether the work of Moses. [PENTATEUCH.] For the present it is sufficient to remark, that even admitting the hand of an editor or compiler to be visible in the book of Exodus, it is quite impossible accurately to distinguish the documents from each other, or from his own additions.

C. *Credibility.* — Almost every historical fact mentioned in Exodus has at some time or other been called in question. But it is certain that all investigation has hitherto tended only to establish the veracity of the narrator. A comparison with other writers and an examination of the monuments confirm, or at least do not contradict, the most material statements of this book. Thus, for instance, Manetho's story of the Hyksos, questionable as much of it is, and differently as it has been interpreted by different writers, points at least to some early connection between the Israelites and the Egyptians, and is corroborative of the fact implied in the Pentateuch that, at the time of the Israelitish sojourn, Egypt was ruled by a foreign dynasty. [EGYPT.] Manetho speaks, too, of strangers from the East who occupied the eastern part of Lower Egypt. And his account shows that the Israelites had become a numerous and formidable people. According to Ex. xii. 37, the number of men beside women and children who left Egypt was 600,000. This would give for the whole nation about two millions and a half. There is no doubt some difficulty in accounting for this immense increase, if we suppose (as on many accounts seems probable) that the actual residence of the children of Israel was only 215 years. We must remember, indeed, that the number who went into Egypt with Jacob was considerably more than "threescore and ten souls" [see CHRONOLOGY]; we must also take into account the extraordinary fruitfulness of Egypt[a] (concerning which all writers are agreed:

[a] Cf. Strabo, xv p. 378; Aristot. *Hist. Anim.* vii

and especially of that part of it in which the Israelites dwelt. Still it would be more satisfactory if we could allow 430 years for the increase of the nation rather than any shorter period.

According to De Wette, the story of Moses' birth is mythical, and arises from an attempt to account etymologically for his name. But the beautiful simplicity of the narrative places it far above the stories of Romulus, Cyrus, and Semiramis, with which it has been compared (Knobel, p. 14). And as regards the etymology of the name, there can be very little doubt that it is Egyptian (from the Copt. ⲙⲱ, "water," and ϣⲓ or ϭⲓ, "to take;" cf. Gesen. *Thes.* in v., and Knobel, *Comm.* in loc.); and if so, the author has either played upon the name or is mistaken in his philology. But this does not prove that the whole story is nothing but a myth. Philology as a science is of very modern growth, and the truth of history does not stand or fall with the explanation of etymologies. The same remark applies to De Wette's objection to the etymology in ii. 22.

Other objections are of a very arbitrary kind. Thus Knobel thinks the command to destroy the male children (i. 15 ff.) extremely improbable, because the object of the king was not to destroy the people, but to make use of them as slaves. To require the midwives to act as the enemies of their own people, and to issue an injunction that every son born of Israelitish parents should be thrown into the Nile, was a piece of downright madness of which he thinks the king would not be guilty. But we do not know that the midwives were Hebrew, they may have been Egyptian; and kings, like other slave owners, may act contrary to their interest in obedience to their fears or their passions; indeed, Knobel himself compares the story of King Bocchoris, who commanded all the unclean in his land to be cast into the sea (Lysim. *ap. Joseph.* c. *Apion.* i. 34), and the destruction of the Spartan Helots (Plutarch, *Lycurg.* 28). He objects further that it is not easy to reconcile such a command with the number of the Israelites at their exodus. But we may suppose that in very many instances the command of the king would be evaded, and probably it did not long continue in force.

Again, De Wette objects to the call of Moses that he *could not* have thus formed the resolve to become the savior of his people — which, as Hävernick justly remarks, is a dogmatical, not a critical decision.

The ten plagues are physically, many of them, what might be expected in Egypt, although in their intensity and in their rapid succession they are clearly supernatural. Even the order in which they occur is an order in which physical causes are allowed to operate. The corruption of the river is followed by the plague of frogs. From the dead frogs are bred the gnats and flies, from these came the murrain among the cattle and the boils on men, and so on.

Most of the plagues indeed, though of course in a much less aggravated form, and without such succession, are actually experienced at this day in Egypt. Of the plague of locusts it is expressly remarked that "before them were no such locusts, neither after them shall be such." And all travelers in Egypt have observed swarms of locusts, brought generally by a southwest wind (Denon, however, mentions their coming with an *east* wind), and in the winter or spring of the year. This last fact agrees also with our narrative. Lepsius speaks of being in a "regular snow-drift of *locusts*," which came from the desert in hundreds of thousands to the valley. "At the edge of the fruitful plain," he says, "they fell down in showers." And this continued for six days, indeed in weaker flights much longer. He also saw *hail* in Egypt. In January 1843, he and his party were surprised by a storm. "Suddenly," he writes, "the storm grew to a tremendous hurricane, such as I have never seen in Europe, and hail fell upon us in such masses, as almost to turn day into night." He notices, too, an extraordinary cattle murrain "which carried off 40,000 head of cattle" (*Letters from Egypt*, Eng. trans. pp. 49, 27, 14).

The institution of the Passover (ch. xii.) has been subjected to severe criticism. This has also been called a mythic fiction. The alleged circumstances are not historical, it is said, but arise out of a later attempt to explain the origin of the ceremony and to refer it to the time of Moses. The critics rest mainly on the difference between the directions given for the observance of this the first, and those given for subsequent passovers. But there is no reason why, considering the very remarkable circumstances under which it was instituted, the first Passover should not have had its own peculiar solemnities, or why instructions should not then have been given for a somewhat different observance for the future. [PASSOVER.]

In minor details the writer shows a remarkable acquaintance with Egypt. Thus, for instance, Pharaoh's daughter goes to the river to bathe. At the present day it is true that only women of the lower orders bathe in the river. But Herodotus (ii. 35) tells us (what we learn also from the monuments) that in ancient Egypt the women were under no restraint, but apparently lived more in public than the men. To this must be added that the Egyptians supposed a sovereign virtue to exist in the Nile-waters. The writer speaks of chariots and "chosen chariots" (xiv. 7) as constituting an important element in the Egyptian army, and of the king as leading in person. The monuments amply confirm this representation. The Pharaohs lead their armies to battle, and the armies consist entirely of infantry and chariots.

Many other facts have been disputed, such as the passage of the Red Sea, the giving of the manna, &c. But respecting these it may suffice to refer to other articles in which they are discussed [THE EXODUS; MANNA; THE RED SEA.]

D. The authorship and date of the book are discussed under PENTATEUCH. J. J. S. P.

T. J. C.

EX'ODUS, THE. The object of this article is to give a combined view of the results stated in the various articles relating or referring to the Exodus of the children of Israel from Egypt. It may be divided into three parts, treating of the chronological, the historical, and the geographical aspect of the event.

1. *Date.* — The date of the Exodus is discussed under CHRONOLOGY, where it is held that a preponderance of evidence is in favor of the year B. C. 1652. The historical questions connected with this date are noticed under EGYPT. Hales places the Exodus B. C. 1648, Usher B. C. 1491, and Bunsen B. C. 1320.

2. *History.* — The Exodus is a great turning point in Biblical history. With it the Patriarchal dispensation ends and the Law begins, and with it the Israelites cease to be a family and become a nation. It is therefore important to observe how the previous history led up to this event. The advancement of Joseph, and the placing of his kinsmen in what was to a pastoral people, at least, "the best of the land," yet, as far as possible, apart from Egyptian influence, favored the multiplying of the Israelites and the preservation of their nationality. The subsequent persecution bound them more firmly together, and at the same time loosened the hold that Egypt had gained upon

Map to illustrate the Exodus of the Israelites.

them. It was thus that the Israelites were ready, when Moses declared his mission, to go forth as one man from the land of their bondage. [JOSEPH; MOSES; EGYPT.]

The history of the Exodus itself commences with the close of that of the Ten Plagues [PLAGUES OF EGYPT]. In the night in which, at midnight, the first-born were slain (Ex. xii 29), Pharaoh urged the departure of the Israelites (vv. 31, 32). They at once set forth from Rameses (vv. 37, 39) apparently during the night (ver. 42), but towards morning, on the 15th day of the first month (Num. xxxiii. 3). They made three journeys and encamped by the Red Sea. Here Pharaoh overtook them, and the great miracle occurred by which they were saved, while the pursuer and his army were destroyed. It has been thought by some that Pharaoh did not perish in the Red Sea; but not only does the narrative seem to forbid such a supposition (Ex. xiv. 18, 23, 28), but it is expressly contradicted in Ps. cxxxvi. (ver. 15). Recently it has been suggested that the Israelites crossed by a ford. If however, their safe passage could thus be accounted for, the drowning of the Egyptians would become

Digitized by Google

more extraordinary than before. Obviously ordinary causes are not sufficient to explain the deliverance of the former and the destruction of the latter. But even were it so, the question would have to be asked whether the occurrence of the event at the fit time could reasonably be considered as due to such ordinary causes, and the necessary negative reply would show the fallacy of attempting a naturalistic explanation of the event on account of the use of natural means. It would be more reasonable to deny the event, but this could not be attempted in the face of the overwhelming evidence of its occurrence.

3. *Geography.* — The determination of the route by which the Israelites left Egypt is one of the most difficult questions in Biblical geography. The following points must be settled exactly or approximately: the situation of the Land of Goshen, the length of each day's march, the position of the first station (Rameses), and the direction of the journey.

The Land of Goshen may be concluded from the Biblical narrative to have been part of Egypt, but not of what was then held to be Egypt Proper. It must therefore have been an outer eastern province of Lower Egypt. The Israelites, setting out from a town of Goshen, made two days' journey towards the Red Sea, and then entered the wilderness, a day's journey or less from the sea. They could only therefore have gone by the valley now called the *Wádi-t-Tumeylát*, for every other cultivated or cultivable tract is too far from the Red Sea. Rameses, as we shall see, must have lain in this valley, which thus corresponded in part at least to Goshen. That it wholly corresponded to that region is evident from its being markedly a single valley, and from the insufficiency of any smaller territory to support the Israelites. [GOSHEN.]

It is not difficult to fix very nearly the length of each day's march of the Israelites. As they had with them women, children, and cattle, it cannot be supposed that they went more than fifteen miles daily; at the same time it is unlikely that they fell far short of this. The three journeys would therefore give a distance of about forty-five miles. There seems, however, as we shall see, to have been a deflexion from a direct course, so that we cannot consider the whole distance from the starting-point, Rameses, to the shore of the Red Sea as much more than about thirty miles in a direct line. Measuring from the ancient western shore of the Arabian Gulf due east of the *Wádi-t-Tumeylát*, a distance of thirty miles in a direct line places the site of Rameses near the mound called in the present day *El-'Abbáseeyeh*, not far from the western end of the valley. That the Israelites started from a place in this position is further evident from the account of the two routes that lay before them: 'And it came to pass, when Pharaoh had let the people go, that God led them not [by] the way of the land of the Philistines, although that [was] near; for God said, Lest peradventure the people repent when they see war, and they return to Egypt; but God let the people turn to the way of the wilderness of the Red Sea" (Ex. xiii. 17, 18). The expression used, וַיַּסֵּב, does not necessarily imply a change in the direction of the journey, but may mean that God did not lead the Israelites into Palestine by the nearest route, but took them about by the way of the wilderness. Were the meaning that the people turned, we should have to suppose Rameses to have been beyond the valley to the west, and this would probably make the distance to the Red Sea too great for the time occupied in traversing it, besides overthrowing the reasonable identification of the Land of Goshen. [RAMESES.] Hence it is clear that they must have started from near the eastern side of the ancient Delta, along which lies the commencement of the route to the Philistine territory.

Rameses is evidently the Raamses of Ex. i. 11. It seems to have been the chief town of the Land of Goshen, for that region, or possibly a part of it, is called the land of Rameses in Gen. xlvii. 11, comp 4, 6. [RAMESES; GOSHEN.]

After the first day's journey the Israelites encamped at Succoth (Ex. xii. 37, xiii. 20; Num. xxxiii. 5, 6). This was probably a mere resting-place of caravans, or a military station, or else a town named from one of the two. Such names as the Scenæ Veteranorum (which has been rashly identified with Succoth), and the Scenæ Maudræ of the *Itinerary* of Antoninus, and the settlement of Ionian and Carian mercenaries called τὰ Στρατόπεδα (Herod. ii. 154), may be compared to this. Obviously such a name is very difficult of identification. [SUCCOTH.]

The next camping-place was Etham, the position of which may be very nearly fixed in consequence of its being described as "in the edge of the wilderness" (Ex. xiii. 20; Num. xxxiii. 6, 7). The cultivable land now extends very nearly to the western side of the ancient head of the gulf. At a period when the eastern part of Lower Egypt was largely inhabited by Asiatic settlers, there can be no doubt that this tract was under cultivation. It is therefore reasonable to place Etham where the cultivable land ceases, near the *Seba Biár*, or *Seven Wells*, about three miles from the western side of the ancient head of the gulf. The Patumos of Herodotus and Strabo, which appears to have been the same as the Thoum or Thou of the *Itinerary* of Antoninus, is more likely to be the Pithom than the Etham of Scripture. [PITHOM.] It is too far west for the latter.

After leaving Etham the direction of the route changed. The Israelites were commanded "to turn and encamp before Pi-hahiroth, between Migdol and the sea, over against Baal-zephon" (Ex. xiv. 2). Therefore it is most probable that they at once turned, although they may have done so later in the march. The direction cannot be doubted, if our description of the route thus far be correct, for they would have been entangled (ver. 3) only by turning southward, not northward. They encamped for the night by the sea, probably after a full day's journey. The place of their encampment and of the passage of the sea would therefore be not far from the Persepolitan monument, which is made in Linant's map the site of the Serapeum. We do not venture to attempt the identification of the places mentioned in the narrative with modern sites. Nothing but the discovery of ancient Egyptian names, and their positive appropriation to such sites, could enable us to do so. Something, however, may be gathered from the names of the places The position of the Israelite encampment was before or at Pi-hahiroth, behind which was Migdol, and on the other hand Baal-zephon and the sea. [BAAL-ZEPHON.] Pi-hahiroth or Hahiroth is probably the name of a natural locality. The separable prefix is evidently the Egyptian masculine article, and we therefore hold the name to be

Digitized by Google

Egyptian. Jablonsky proposed the Coptic etymology, ⲡⲓ-ϫⲓ-ⲣⲱⲧ, "the place where sedge grows," which, or a similar name, the critical sagacity of Fresnel recognized in the modern *Ghuweybet-el-boos*, "the bed of reeds." We cannot, however, hold that the *Ghuweybet-el-boos* in the neighborhood where we place the passage of the sea is the Pi-hahiroth of the Bible: there is another *Ghuweybet-el-boos* near Suez, and such a name would of course depend for its permanence upon the continuance of a vegetation subject to change. [PI-HAHIROTH.] Migdol appears to have been a common name for a frontier watch-tower. [MIGDOL.] Baal-zephon we take to have had a similar meaning to that of Migdol. [BAAL-ZEPHON.] We should expect therefore that the encampment would have been in a depression, partly marshy, having on either hand an elevation marked by a watch-tower.

The actual passage of the sea forms the subject of another article. [RED SEA, PASSAGE OF.] There can be no doubt that the direction was from the west to the east, and that the breadth at the place of crossing was great, since the whole Egyptian army perished.

We do not propose to examine the various theories that have been put forth respecting the route of the Israelites. We have thought it enough to state all the points of evidence which can, in our judgment, lead to a satisfactory conclusion. It might, however, be thought neglectful if we did not allude to what Prof. Lepsius has written on the subject. He does not enter into any detailed exposition of the geography of the Exodus, and attempts but one identification with any modern site — that of Rameses with the ancient Egyptian site now called *Aboo-Kesheyd*, about eight miles from the old head of the gulf. The argument he adduces for this identification is that a monolith is found here representing Rameses II. seated between the gods Tum and Ra, and that therefore he was worshipped at the place which must have borne his name. It might equally, however, have been called Pa-tum, from Tum, and have corresponded in etymology to Patumos or else Pithom. The conclusion to which Prof. Lepsius arrives, that because *Aboo-Kesheyd* is Rameses, therefore the Land of Goshen must have been within the eastern part of Lower Egypt below Heliopolis, is singularly illogical, for Rameses was in the Land of Goshen, and not 20 miles east of it, and it occupied the Israelites more than two days to journey from it to the Red Sea, which makes its allocation within about eight miles of the sea absurd. The supposition involves therefore a double impossibility.

The preceding map exhibits the main features of the country in which we place the route of the Israelites, and the places referred to in this article. The best map is Linant's, in the Atlas of the *Percement de l'Isthme de Suez*. R. S. P.

EXORCIST (ἐξορκιστής: *exorcista*). The verb ἐξορκίζω occurs once in the N. T. and once in the LXX. version of the O. T. In both cases it is used, not in the sense of *exorcise*, but as a synonym of the simple verb ὁρκίζω, *to charge with an oath, to adjure*. Comp. Gen. xxiv. 3 (וְאַשְׁבִּיעֲךָ, A. V. "I will make thee swear") with 37, and Matt. xxvi. 63 with Mark v. 7; and see 1 Thess. v. 27 (ἐνορκίζω, Lachm. Tischend.). The cognate noun, however, together with the simple verb, is found once (Acts xix. 13) with reference to the ejection of evil spirits from persons possessed by them (cf. ἐξόρκωσις, ὁρκόω, Joseph. *Ant.* viii. 2, § 5). The use of the term exorcists in that passage as the designation of a well-known class of persons to which the individuals mentioned belonged, confirms what we know from other sources as to the common practice of exorcism amongst the Jews. That some, at least, of them not only pretended to, but possessed, the power of exorcising, appears by our Lord's admission when he asks the Pharisees, "If I by Beelzebub cast out devils, by whom do your disciples (*υἱοί*) cast them out?" (Matt. xii. 27.) What means were employed by real exorcists we are not informed. David, by playing skillfully on a harp, procured the temporary departure of the evil spirit which troubled Saul (1 Sam. xvi. 23). Justin Martyr has an interesting suggestion as to the possibility of a Jew successfully exorcising a devil, by employing the name of the God of Abraham, Isaac, and Jacob. (Ἀλλ' εἰ ἄρα ἐξορκίζοι τις ὑμῶν κατὰ τοῦ θεοῦ Ἀβραὰμ καὶ θεοῦ Ἰσαὰκ καὶ θεοῦ Ἰακώβ, ἴσως ὑποταγήσεται [τὸ δαιμόνιον], *Dial. cum Tryph.* c. 85, p. 311, C. See also *Apol.* II. c. 6, p. 45, B, where he claims for Christianity superior but not necessarily exclusive power in this respect. Compare the statements of Iren. *adv. Hæres.* ii. 5, and the authorities quoted by Grotius on Matt. xii. 27.) But Justin goes on to say that the Jewish exorcists, as a class, had sunk down to the superstitious rites and usages of the heathen (Ἤδη μέντοι οἱ ἐξ ὑμῶν ἐπορκισταὶ τῇ τέχνῃ, ὅσπερ καὶ τὰ ἔθνη, χρώμενοι ἐξορκίζουσι καὶ θυμιάμασι καὶ καταδέσμοις χρῶνται, εἶπον). With this agrees the account given by Josephus (*Ant.* viii. 2, § 5) of an exorcism which he saw performed by Eleazar, a Jew, in the presence of Vespasian and his sons, though the virtue of the cure is attributed to the mention of the name of Solomon, and to the use of a root, and of certain incantations said to have been prescribed by him. It was the profane use of the name of Jesus as a mere charm or spell which led to the disastrous issue recorded in the Acts of the Apostles (xix. 13–16).

The power of casting out devils was bestowed by Christ while on earth upon the apostles (Matt. x. 8) and the seventy disciples (Luke x. 17–19), and was, according to his promise (Mark xvi. 17), exercised by believers after his ascension (Acts xvi. 18); but to the Christian miracle, whether as performed by our Lord himself or by his followers, the N. T. writers never apply the terms "exorcise" or "exorcist." [See DEMON; DEMONIACS.]

T. T. P.

EXPIATION. [SACRIFICE.]

• **EYE-SERVICE**, a word for which we are indebted to our English translators (found in the Bishops' Bible, Col. iii. 22, and in the A. V., both there and Eph. vi. 6). It is their rendering of ὀφθαλμοδουλεία, which means, service performed only as it were under the master's eye, *i. e.* reluctant and mercenary. The Greek word does not occur elsewhere. H.

• **EZAR** is found in many modern editions of the A. V. in 1 Chr. i. 38 instead of the correct form EZER. [EZER.] A.

EZBAI [2 syl.] (עֶזְבַּי [*thick* or *short*, Distr.] Ἀζοβαί; [Vat. Ἀζωβαι; Alex. Ἀζβι; FA. Ἀζωβε

Josep. Ἀσβαΐ:] *Asbai*), father of Naarai, who was one of David's thirty mighty men (1 Chr. xi. 37). In the parallel list (2 Sam. xxiii. 35) the names are given "Paarai the Arbite," which Kennicott decides to be a corruption of the reading in Chronicles. (*Dissertation*, &c. p. 209.)

EZ'BON (אֶצְבֹן [perh. *inclined*, Ges.]: Θασβών: *Esbon*). 1. Son of Gad, and founder of one of the Gadite families (Gen. xlvi. 16; Num. xxvi. 16). In the latter passage the name is written אָזְנִי (A. V. Ozni), probably by a corruption of the text of very early date, since the LXX. have Ἀζενί. The process seems to have been the accidental omission of the ב in the first instance (as in אֲבִיעֶזֶר, Abiezer (Josh. xvii. 2), which in Num. xxvi. is written אִיעֶזֶר, Jeezer), and then, when אָזְנִי was no longer a Hebrew form, the changing it into אָזְנִי.

2. [אֶצְבֹן:] Ἐσεβών; [Vat. Σεβων; Alex.] Ασεβων: [*Esbon*]. Son of Bela, the son of Benjamin, according to 1 Chr. vii. 7. It is singular, however, that while Ezbon is nowhere else mentioned among the sons of Bela, or Benjamin, he appears here in company with עִירִי, Iri, which is not a Benjamite family either, according to the other lists, but which is found in company with Ezbon among the Gadite families, both in Gen. xlvi. 16 (Eri, עֶרִי), and Num. xxvi. 16. Were these two Gadite families incorporated into Benjamin after the slaughter mentioned Judg. xx.? Possibly they were from Jabesh-Gilead (comp. xxi. 12–14). [BECHER.] 1 Chr. vii. 2, seems to fix the date of the census as in king David's time.

A. C. H.

EZECHI'AS (Ἐζεκίας; [Vat. Εζειας:] *Ozias*). 1. 1 Esdr. ix. 14; put for JAHAZIAH in Ezr. x. 15.

2. (*Ezechias.*) 2 Esdr. vii. 40. [HEZEKIAH.]

EZECI'AS (Ἐζεκίας: *Ezechias*), 1 Esdr. ix. 43; for HILKIAH in the parallel passage, Neh. viii. 4.

EZEKI'AS (Ἐζεκίας, and so Codex B in N. T.: *Ezechias*), Ecclus. xlviii. 17, 22; xlix. 4; 2 Macc. xv. 22; Matt. i. 9, 10. [HEZEKIAH.]

EZE'KIEL (יְחֶזְקֵאל, i. e. *Yechezkel*, for יְחִזְקִיֵּהוּ, *God will strengthen*, or from חִזֵּק אֵל, חֲזָאֵל, *the strength of God*: Ἰεζεκιήλ: *Ezechiel*), one of the four greater prophets. There have been various fancies about his name; according to Abarbanel (*Præf. in Ezech.*) it implies "one who narrates the might of God to be displayed in the future," and some (as Villalpandus, *Præf. in Ezech.* p. x.) see a play on the word in the expressions חֲזָקוֹת, and חָזָק (iii. 7, 8, 9), whence the groundless conjecture of Sanctius (*Prolegom. in Ezech.* p. 2, n. 2) that the name was given him subsequently to the commencement of his career (Carpzov, *Introd. ad Libr. Bibl. Vet Testam.* ii. part iii. ch. v.). He was the son of a priest named Buzi, respecting whom fresh conjectures have been recorded, although nothing is known about him (as Archbp. Newcome observes) beyond the fact that he must have given his son a careful and learned education. The Rabbis had a rule that every prophet in Scripture was also the son of a prophet, and hence they (as R. Dav. Kimchi in his Commentary) absurdly identify Buzi with Jeremiah, who they say was so called, because he was rejected and despised. Another tradition makes Ezekiel the servant of Jeremiah (Greg. Naz. *Or.* xlvii.), and Jerome supposes that the prophets being contemporaries during a part of their mission interchanged their prophecies, sending them respectively to Jerusalem and Chaldæa for mutual confirmation and encouragement, that the Jews might hear as it were a strophe and antistrophe of warning and promise, "velut ac si duo cantores alter ad alterius vocem sese componerent" (Calvin, *Comment. ad Ezech.* i. 2). Although it was only towards quite the close of Jeremiah's lengthened office that Ezekiel received his commission, yet these suppositions are easily accounted for by the internal harmony between the two prophets, in proof of which Hävernick (*Introd. to Ezech.*) quotes Ez. xiii. as compared with Jer. xxiii. 9 ff., and Ez. xxxiv. with Jer. xxxiii. &c. This inner resemblance is the more striking from the otherwise wide difference of character which separates the two prophets; for the elegiac tenderness of Jeremiah is the reflex of his gentle, calm, and introspective spirit, while Ezekiel, in that age when true prophecy was so rare (Ez. xii. 21; Lam. ii. 9), "comes forward with all abruptness and iron consistency. Has he to contend with a people of brazen front and unbending neck? He possesses on his own part an unbending nature, opposing the evil with an unflinching spirit of boldness, with words full of consuming fire" (Hävernick's *Introd.* translated by Rev. F. W. Gotch in *Journal of S. L.* i. 23).

Unlike his predecessor in the prophetic office, who gives us the amplest details of his personal history, Ezekiel rarely alludes to the facts of his own life, and we have to complete the imperfect picture by the colors of late and dubious tradition. We shall mention both sources of information, contenting ourselves with this general caution against the latter. He was taken captive ἐκ γῆς Σαρηδ (Isidor. *de Vit. et Ob. Sanct.* 39; Epiphan. *de Vit. et Mort. Prophet.* ix. ap. Carpzov.) in the captivity (or transmigration, as Jerome more accurately prefers to render גָּלוּת, i. 2) of Jehoiachin (not Jehoiachim as Josephus (*Ant.* x. 6, § 3) states, probably by a slip of memory) with other distinguished exiles (2 K. xxiv. 15), eleven years before the destruction of Jerusalem. Josephus (*l. c.*) says that this removal happened when he was a boy, and although we cannot consider the assertion to be refuted by Hävernick's argument from the matured vigorous, priestly character of his writings, and feel still less inclined to say that he had "*undoubtedly*" exercised for some considerable time the function of a priest, yet the statement is questionable, because it is improbable (as Hävernick also points out) that Ezekiel long survived the 27th year of his exile (xxix. 17), so that if Josephus be correct he must have died very young. He was a member of a community of Jewish exiles who settled on the banks of the Chebar, a "river" or stream of Babylonia, which is sometimes taken to be the *Khabour*, but which the latest investigators suppose to be the *Nahr Malcha* or royal canal of Nebuchadnezzar. [CHEBAR.] The actual name of the spot where he resided was תֵּל אָבִיב (*acervus novarum fru-*

Digitized by Google

גּוֹם, Vulg. μετέωρος καὶ περιῆλθον (?) LXX., "the hill of grief," Syr.), a name which Jerome, as usual, allegorizes. It is thought by Michaelis to be the same as Thallaba in D'Anville's map (Rosenmüll. *Schol. in Ez.* iii. 15). It was by this river "in the land of the Chaldæans" that God's message first reached him (i. 3); the Chaldee version, however, interpolates the words "in the land [of Israel: and again a second time he spake to him in the land] of the Chaldæans," because the Jews had a notion that the Shekinah could not overshadow a prophet out of the Holy Land. Hence R. Jarchi thinks that ch. xvii. was Ezekiel's first prophecy, and was uttered before the Captivity, a view which he supports by the Hebrew idiom הָיְתָה הָיָה (A. V. "came expressly") in i. 3. R. Kimchi, however, makes an exception to the rule in case the prophecy was inspired in some pure and quiet spot like a river's bank (cf. Ps. cxxxvii. 1). His call took place "in the fifth year of king Jehoiachin's captivity" B. C. 595 (i. 2), "in the thirtieth year in the fourth month." The latter expression is very uncertain. Most commentators take it to mean the 30th year of his age, the recognized period for assuming full priestly functions (Num. iv. 23, 30). Origen, following this assumption, makes the prophet a type of Christ, to whom also "the heavens were opened" when he was baptized in Jordan. But, as Pradus argues, such a computation would be unusual, and would not be sufficiently important or well known as a mark of genuineness, and would require some more definite addition. The Chald. paraphrase by Jon. ben Uzziel has — "30 years after Hilkiah the high-priest had found the book of the Law in the sanctuary in the vestibule under the porch at midnight after the setting of the moon in the days of Josiah, &c., in the month Thammuz, in the fifth day of the month" (cf. 2 K. xxii.). This view is adopted by Jerome, Ussher, Hävernick, &c.; but had this been a recognized era, we should have found traces of it elsewhere, whereas even Ezekiel never refers to it again. There are similar and more forcible objections to its being the 30th year from the Jubilee, as Hitzig supposes, following many of the early commentators. It now seems generally agreed that it was the 30th year from the new era of Nabopolassar, father of Nebuchadnezzar, who began to reign B. C. 625 (Rawlinson's *Herod.* i. 508). The use of this *Chaldee* epoch is the more appropriate as the prophet wrote in Babylonia, and he gives a Jewish chronology in ver. 2. Compare the notes of time in Dan. ii. 1, vii. 1; Ez. vii. 7; Neh. ii. 1, v. 14 (Rosenmüller, *Schol.*; Poli *Synops.* in loc.; Scaliger, *de emend. Temp. Prolegom.* p. xii.). The decision of the question is the less important, because in all other places Ezekiel dates from the year of Jehoiachin's captivity (xxix. 17, xxx. 20, *et passim*). We learn from an incidental allusion (xxiv. 18) — the only reference which he makes to his personal history — that he was married, and had a house (viii. 1) in his place of exile, and lost his wife by a sudden and unforeseen stroke. He lived in the highest consideration among his companions in exile, and their elders consulted him on all occasions (viii. 1, xi. 25, xiv. 1, xx. 1, &c.), because in his united offices of priest and prophet he was a living witness to "them of the Captivity" that God had not abandoned them. Vitringa even says (*de Synag. Vet.* p. 332) that "in ædibus suis ut in scholâ quâdam publicâ conventus instituebat, ibique coram frequenti concione divinam interpretabatur voluntatem oratione facundâ" (quoted by Hävernick). There seems to be little ground for Theodoret's supposition that he was a Nazarite. The last date he mentions is the 27th year of the Captivity (xxix. 17), so that his mission extended over twenty-two years, during part of which period Daniel was probably living, and already famous (Ez. xiv. 14, xxviii. 3). Tradition ascribes various miracles to him, as, for instance, escaping from his enemies by walking dry-shod across the Chebar; feeding the famished people with a miraculous draught of fishes, &c. He is said to have been murdered in Babylon by some Jewish prince (? ὁ ἡγούμενος τοῦ λαοῦ, called in the Roman martyrology for vi. Id. Apr. "judex populi." Carpzov, *Introd.* l. c.), whom he had convicted of idolatry; and to have been buried in a σηηλαῖον διπλοῦν, the tomb of Shem and Arphaxad, on the banks of the Euphrates (Epiphan. *de Vit. et Mort. Prophet.*). The tomb, said to have been built by Jehoiachin, was shown a few days' journey from Bagdad (Menasse ben Israel, *de Resur. Mort.* p. 23), and was called "habitaculum elegantiæ." A lamp was kept there continually burning, and the autograph copy of the prophecies was said to be there preserved. The tomb is mentioned by Pietro de la Valle, and fully described in the *Itinerary* of R. Benjamin of Tudela (Hottinger, *Thes. Phil.* II. i. 3; *Cippi Hebraici*, p. 82). A curious conjecture (discredited by Clemens Alexandrinus (*Strom.* i.), but considered not impossible by Selden (*Syntagm. de Diis Syr.* ii. p. 120), Meyer, and others, identifies him with "Nazaratus the Assyrian," the teacher of Pythagoras. We need hardly mention the ridiculous suppositions that he is identical with Zoroaster, or with the Ἐζεκίηλος ὁ τῶν Ἰουδαϊκῶν τραγῳδιῶν ποιητής (Clem. Alex. *Strom.* i. [23]; Euseb. *Præp. Evang.* ix. 28, 29) who wrote a play on the Exodus, called Ἐξαγωγή (Fabricius, *Bibl. Græc.* ii. 19). This Ezekiel lived B. C. 40 (Sixt. Sen. *Bibl. Sanct.* iv. 235).[a]

But, as Hävernick remarks, "by the side of the scattered data of his external life, those of his internal life appear so much the richer." We have already noticed his stern and inflexible energy of will and character; and we also observe a devoted adherence to the rites and ceremonies of his national religion. Ezekiel is no cosmopolite, but displays everywhere the peculiar tendencies of a Hebrew educated under Levitical training. The priestly bias is always visible, especially in chaps. viii.–xi., xl.–xlviii., and in iv. 13 ff., xx. 12 ff., xxi. 8, &c. It is strange of De Wette and Gesenius to attribute this to a "contracted spirituality," and of Ewald to see in it "a one-sided conception of antiquity which he obtained merely from books and traditions," and "a depression of spirit (!) enhanced by the long continuance of the banishment and bondage of the people" (Hävernick's *Introd.*). It was surely this very intensity of patriotic loyalty to a system whose partial suspension he both pre-

[a] This writer is now generally assigned to the second century B. C. See Smith's *Dict. of Greek and Roman Biogr.*, art. *Ezekielus*, and Bernhardy's *Grundriss d. Griech. Literatur*, ii. Abth. ii. pp. 66, 72 ff. The poem, edited by Dübner, has been published by Didot in an appendix to Wagner's edition of the Fragments of Euripides (Paris, 1846). A.

Digitized by Google

blotted and survived, which cheered the exiles with the confidence of his hopes in the future, and tended to preserve their decaying nationality. Mr. F. W. Newman is even more contemptuous than the German critics. "The writings of Ezekiel," he says (*Heb. Monarchy*, p. 330, 2d ed.), "painfully show the growth of what is merely visionary, and an increasing value of hard sacerdotalism;" and he speaks of the "heavy materialism" of Ezekiel's temple, with its priests, sacrifices, &c., as "tedious and unedifying as Leviticus itself." His own remark that Ezekiel's predictions "so kept alive on the minds of the next generation a belief in certain return from captivity, as to have exceedingly conduced towards the result," is a sufficient refutation of such criticisms.

We may also note in Ezekiel the absorbing recognition of his high calling which enabled him cheerfully to endure any deprivation or misery (except, indeed, ceremonial pollution, from which he shrinks with characteristic loathing, iv. 14), if thereby he may give any warning or lesson to his people (iv., xxiv. 15, 16, &c.), whom he so ardently loved (ix. 8, xi. 13). On one occasion, and on one only, the feelings of the man burst, in one single expression, through the self-devotion of the prophet; and while even then his obedience is unwavering, yet the inexpressible depth of submissive pathos in the brief words which tell how in one day "the desire of his eyes was taken from him" (xxiv. 15–18), shows what well-springs of the tenderest human emotion were concealed under his uncompromising opposition to every form of sin.

His predictions are marvellously varied. He has instances of visions (viii.–xi.), symbolical actions (as iv. 8), similitudes (xii., xv.), parables (as xvii.), proverbs (as xii. 22, xviii. 1 ff.), poems (as xix.), allegories (as xxiii., xxiv.), open prophecies (as vi., vii., xx. &c.), "tantâque utertate et figurarum variatione floret ut unus omnes prophetici sermonis numeros ac modos explevisse, jure suo sit dicendus" (Carpzov, *Introd.* ii. pt. iii. 5). It is therefore unjust to charge him with plagiarism, as is done by Michaelis and others, although no doubt his language (in which several Aramaisms and ἅπαξ λεγόμενα also occur) is colored largely both by the Pentateuch and by the writings of Jeremiah. His style is characterized by "numberless particularisms," as may be clearly observed by contrasting his prophecy against Tyre (xxviii.) with that of Isaiah (xxiii.) (Fairbairn's *Ezekiel*). Grotius (in *Critici Sacri*, iv. 8) compares him to Homer for his knowledge, especially of architecture, from which he repeatedly draws his illustrations; and Witsius (*Misc. Sacr.* i. 243) says, that besides his "incomparabile donum prophetiæ," he deserves high literary reputation for the learning and beauty of his style. Michaelis, on the other hand, is very disparaging, and Lowth (referring to the diffuseness of his details) says "he is oftener to be classed with the orators than the poets." Few will agree with Archbishop Newcome's depreciation of such remarks on the ground (apparently) that even the *language* of a sacred writer is a matter of inspiration; for it is clear that inspiration in no way supersedes the individualities of the divine messenger. Ewald (*Die Proph. des Alten Bundes*, ii. 212), though not enthusiastic, admits that "simply as a writer he shows great excellences, particularly in this dismal period," and he points out his "evenness and repose" of style, to which we suppose Jerome alludes when he says, "Sermo ejus nec satis disertus nec admodum rusticus, sed ex utroque genere medie temperatus" (*Præf. in Ezech.*). Hävernick seems to us too strong in saying that "the glow of the divine indignation, the mighty rushing of the spirit of the Lord, the holy majesty of Jehovah, as the seer beheld it, are remarkably reflected in his writings. . . . The lofty action, the torrent of his eloquence . . . rests on this combination of power and consistency, the one as unwearied as the other is imposing." Among the most splendid passages are chapter i. (called by the Rabbis מַרְכָּבָה), the prophecy against Tyrus (xxvi.–xxviii.), that against Assyria, "the noblest monument of eastern history" (xxxi.), and ch. viii., the account of what he saw in the Temple-porch, —

> "When, by the vision led,
> His eye surveyed the dark idolatries
> Of alienated Judah." — Milton, *Par. Lost*, i.

Certain phrases constantly recur in his writings, as "Son of Man," "They shall know that I am the Lord," "The hand of the Lord was upon me," "Set thy face against," &c.

The depth of his *matter*, and the marvellous nature of his visions, make him occasionally obscure. Hence his prophecy was placed by the Jews among the גְּנָזִין (treasures), those portions of Scripture which (like the early part of Genesis, and the Canticles) were not allowed to be read till the age of 30 (Jer. *Ep. ad Eustoch.*; Orig. *Prolm. Homil.* iv. *in Cantic.*; Hottinger, *Thes. Phil.* ii. 1, 3). Hence Jerome compares the "inextricabilis error" of his writings to Virgil's labyrinth ("Oceanus Scripturarum, mysteriorumque Dei labyrinthus"), and also to the catacombs. The Jews classed him in the very highest rank of prophets. Gregory Naz. (*Or.* 23) calls him ὁ προφητῶν θαυμασιώτατος καὶ ὑψηλότατος, and again ὁ τῶν μεγάλων ἐποπτὴς καὶ ἐξηγητὴς μυστηρίων. Isidore (*de Vit. et Ob. Sanct.* 39) makes him a type of Christ from the title "Son of Man," but that is equally applied to Daniel (viii. 17). Other similar testimonies are quoted by Carpzov (*Introd.* ii. 193 ff.). The Sanhedrim is said to have hesitated long whether his book should form part of the canon, from the occasional obscurity, and from the supposed contradiction of xviii. 20 to Ex. xx. 5, xxxiv. 7; Jer. xxxii. 18. But in point of fact these apparent oppositions are the mere expression of truths complementary to each other, as Moses himself might have taught them (Deut. xxiv. 16). Although generally speaking comments on this book were forbidden, a certain R. Nananias undertook to reconcile the supposed differences. (Spinoza, *Tract. Theol. Polit.* ii. 27, partly from these considerations, infers that the present book is made up of mere ἀποσμασμάτια, but his argument from its commencing with a ו, and from the expression in i. 3 above alluded to, hardly needs refutation.)

Of the authenticity of Ezekiel's prophecy there has been no *real* dispute, although a few rash critics (as Oeder, Vogel, and Corrodi) have raised questions about the last chapters, even suggesting that they might have been written by a Samaritan, to incite the Jews to suffer the coöperation in rebuilding the Temple. There is hardly a shadow of argument in favor of this view, and absolutely none to support the anonymous objections in the *Monthly Magazine* for 1798 against the genuineness of other chapters, which never would have

Digitized by Google

attracted any notice had not Jahn taken the superfluous trouble to answer them. The specific nature of some of his predictions (xii. 12, xxvii. 6, &c.; on the former passage and its apparent contradiction to Jer. xxxii. 4, see Joseph. *Ant.* x. 8, § 2) is also in a very unhistorical manner made a ground for impugning the authenticity of the book of Ezekiel by Zunz and others. This style of criticism is very much on the increase, and we have had some audacious instances of it lately; but though it is quite true that the prophets deal far more in external principles than specific announcements, yet *some* show of argument must be adduced before we settle the date of a sacred book as necessarily subsequent to an event which it *professes* to foretell.

The book is divided into two great parts, of which the destruction of Jerusalem is the turning-point; chapters i.–xxiv. contain predictions delivered before that event, and xxv.–xlviii. after it, as we see from xxvi. 2. Again, chapters i.–xxxii. are mainly occupied with correction, denunciation, and reproof, while the remainder deal chiefly in consolation and promise. A parenthetical section in the middle of the book (xxv.–xxxii.) contains a group of prophecies against *seven* foreign nations, the septenary arrangement being apparently (as elsewhere in Scripture) intentional (see an art. on this subject in the *Journal of Sacr. Literature*). De Wette, Carpzov, &c., have adopted various ways of grouping the prophecies, but the best synopsis is that of Hävernick, who divides the book into nine sections distinguished by their superscriptions, as follows: I. Ezekiel's call, i.–iii. 15. II. The *general* carrying out of the commission, iii. 16–vii. III. The rejection of the people, because of their idolatrous worship, viii.–xi. IV. The sins of the age rebuked in detail, xii.–xix. V. The nature of the judgment, and the guilt which caused it, xx.–xxiii. VI. The meaning of the now commencing punishment, xxiv. VII. God's judgment denounced on seven heathen nations (Ammon, xxv. 1–7; Moab, 8–14; the Philistines, 15–17; Tyre, xxvi.–xxviii. 19; Sidon, 20–24; Egypt, xxix.–xxxii.). VIII. Prophecies, after the destruction of Jerusalem, concerning the future condition of Israel, xxxiii.–xxxix. IX. The glorious consummation, xl.–xlviii.

Chronological order is followed throughout (the date of the prediction being constantly referred to), except in the section devoted to prophecies against heathen nations (xxix.–xxxii.), where it is several times abandoned (xxix. 17; cf. xxvi. 1, xxix. 1), so that in the prediction against Egypt, one uttered in the 27th year of the Captivity is inserted between two uttered in the 10th and 11th years. Hence Jahn supposes a purely "accidental" order, which Eichhorn expands into an economical arrangement of the separate scrolls on which the prophecies were written. But there is no necessity to resort to such arbitrary hypotheses. The general unity of subject in the arrangement is obvious, and Jerome (although he assumes some mystery in the violation of chronology throughout the warnings addressed to Pharaoh) correctly remarks, "in prophetis nequaquam historiæ ordo servatur; neque enim narrant præterita sed futura pronuntiant, prout voluntas Spiritus Sancti fuerit" (*Comm. in Ezech.* xxix. 17, where he especially adduces the instance of Jeremiah). Rosenmüller (*Scholia in loc.*) thinks that the *causes* of the destruction of Egypt are put together (xxix. 2–21), and then the actual nature of that predicted judgment is described.

Josephus (*Ant.* x. 5) has the following passage οὐ μόνον δὲ οὗτος (Jeremiah) προσθέσιως ταῦτα ἀλλὰ καὶ ὁ προφήτης Ἰεζεκίηλος, [ὃς] πρῶτος περὶ τούτων δύο βιβλία γράψας κατέλιπεν. The undoubted meaning seems to be that *Ezekiel* (although Eichhorn on various grounds applies the word to Jeremiah) left *two* books of prophecy; which is also stated by Zonaras, and the Latin translation of Athanasius, where, after mentioning other lost books, and *two* of Ezekiel, the writer continues, "nunc vero jam unum duntaxat inveniri scimus. Itaque hæc omnia per impiorum Judæorum amentiam et incuriam periisse manifestum est" (*Synops.* p. 136, but the passage does not occur in the Greek). In confirmation of this view (which is held by Maldonatus and others) we have a passage quoted in Clem. Alex. *Quis dives salv.* 40, ἐν ᾧ εὗρόν σε ἐν αὐτῷ καὶ κρινῶ σε, and again τέτοκεν καὶ οὐ τέτοκεν, φησὶν ἡ γραφή (Id. *Strom.* vii. 16); a prophecy also mentioned, as alluding to the Virgin Mary, in Tertullian, who says, "Legimus apud Ezechielem de vaccâ illâ quæ peperit et non peperit" (*De Carn. Christi*, 23, cf. Epiphan. *Hæres.* xxx. 30. The attempt to refer it by an error of memory to Job xxi. 10, seems a failure). That these passages (quoted by Fabricius, *Cod. Pseudepigr. Vet. Test.* num. 221) can come from a lost *genuine* book is extremely improbable, since we know from Philo and Justin Martyr the extraordinary care with which the Jews guarded the λόγια ζῶντα. They may indeed come from a lost *apocryphal* book, although we find no other trace of its existence (Sixtus Sen. *Bibl. Sanct.* ii. p. 61). Le Moyne (*Var. Sacra*, ii. 332 ff.) thinks that they undoubtedly belong to the collection of traditionary Jewish apophthegms called *Pirke Aboth*, or "chapters of the fathers." Just in the same way we find certain ἄγραφα δόγματα attributed to our Lord by the Fathers, and even by the Apostles (Acts xx. 35), on which see a monograph by Kuinoel. The simplest supposition about the passage in Josephus is either to assume that he is in error, or to admit a former division of Ezekiel into two books, possibly at ch. xl. Le Moyne adopts the latter view, and supports it by analogous cases. There is nothing which militates against it in the fact that Josephus mentions δύο μόνα καὶ ἑκκαιδεκα βιβλία (c. *Apion.* i. 22) as forming the canon.

There are no direct quotations from Ezekiel in the New Testament, but in the Apocalypse there are many parallels and obvious allusions to the later chapters (xl.–xlviii.). We cannot now enter into the difficulties of these or other chapters (for which we must refer to some of the commentaries mentioned below); but we will enumerate, following Fairbairn, the four main lines of interpretation, namely, (1.) The Historico-literal, adopted by Villalpandus, Grotius, Lowth, &c., who make them a prosaic description intended to preserve the memory of Solomon's Temple. (2.) The Historico-ideal (of Eichhorn, Dathe, &c.), which reduces them "to a sort of vague and well-meaning announcement of future good." (3.) The Jewish-carnal (of Lightfoot, Hofmann, &c.), which maintains that their outline was actually adopted by the exiles. (4.) The Christian-spiritual (or Messianic), followed by Luther, Calvin, Cocceius, and most modern commentators, which makes them "a grand complicated symbol of what the good God had in reserve for his church." Rosenmüller, who dis-

Digitized by Google

approves alike of the literalism of Grotius, and the arbitrary, ambiguous allegorizing of others, remarks (*Schol. in* xxviii. 26), "Nobis quidem oleum et operam perdere videntur, qui hujusmodi oracula ad certos eventus referre student aut poetica ornamenta ad factorum fidem explorant." Other prophecies of a general Messianic character are xxxiv. 11–19, and xxxvi.–xxxix.

The chief commentators on this "most neglected of the prophets" are, among the fathers, Origen, Jerome (*Comment. in Ezech. Ll.* xiv.), and Theodoret; among the Jews, Rabbis Dav. Kimchi and Abarbanel; of the Reformers, Oecolampadius and Calvin; and of the Romanists, Pradus and Villalpandus (Rome, 1596 [–1604, in 3 vols. fol., "opus multifaria eruditione refertum et ad antiquitatis studium utilissimum," Rosenm.]). More modern commentaries are those of Starck (1731), Venema (1790), Newcome [1788], W. Greenhill [Lond. 1645–62. 5 vols. 4to, reprinted 1829], Fairbairn [3d ed. Edinb. 1862], Henderson [1855], Hävernick (*Comm. über Ezechiel* [Erlang. 1843]), Hitzig (*Der Prophet Ezechiel erklärt* [Leipz. 1847, Lief. viii. of the *Kurzgef. exeg. Handb. zum A. T.*]). [JEHEZEKEL.] F. W. F.

* As the topography and the monumental sculptures and inscriptions of Babylon have become better known in our own day, it is seen how fully the characteristics of Ezekiel's writings agree with the circumstances in which he was placed at the time. The imagery and symbology in particular, under which his visions are set before us, are largely derived from Babylonian rather than Hebrew sources. The costume of his thoughts shows, in the words of Stanley, that "he had wandered through the vast halls of Assyrian monuments, and there gazed on all that Assyrian monuments have disclosed to us of human dignity and brute strength combined, — the eagle-winged lion, human-headed bull (Layard, *Nin. & Bab.* pp. 448, 464). These complicated forms supplied the vehicle of the sublime truths that dawned upon him from amidst the mystic wheels, the sapphire throne, the amber fire, and the rainbow brightness. It is the last glimpse of these gigantic emblems, which vanished in the prophet's lifetime, only to reappear in our own age from the ruins of the long-lost Nineveh" (*Jewish Church*, ii. 623 ff.). In illustration of this trait of the prophet's style, see also Dean Milman's *History of the Jews*, i. 455 (Amer. ed.), and Herzfeld, *Gesch. des Volkes Jisrael*, i. 206. But nearly all interpreters recognize one signal exception to this view of the origin of Ezekiel's imagery. The scenery under which he so graphically describes the new spiritual temple which in the latter days God was to rear on the top of the mountains for the assemblage and worship of all nations, and the river with its healing waters which was to flow out of it to fertilize the whole earth, and convert its moral wastes into a garden full of the fruits of holiness, and peace, and happiness, is undoubtedly founded on his familiarity with the structure of the temple at Jerusalem, and the hidden springs of the sacred mount, sending forth their waters into the valley of the Kidron, and thence onward over its rocky bed to the plain of the Jordan and into the Dead Sea. Thomson (*Land and Book*, ii. 530–535) has some extended remarks on this parabolic representation. There is a special essay on it by W. Neumann, *Die Wasser des Lebens. Ein exeg. Versuch üb. Ezech.* xlvii. 1 12 (Berl. 1848).

The number of symbolic acts which Ezekiel represents as performed by himself or others, constitutes a peculiar feature of his work (see iv.; v. 1 ff.; xii. 3 ff.; xxiv. 3 ff.; xxxvii. 16 ff.). Bleek reminds us of an important rule of interpretation in regard to many of these acts, which is that they are not to be understood by us as having been literally performed by the prophet before the eyes of others, but are described in this manner only as a more forcible rhetorical exhibition of the messages or teachings which the prophet was sent to announce (*Einl. in das A. T.* p. 514 ff.). We must certainly take this view of some of these acts; for their character is such that they could not have been witnessed by those for whom the prophecies were designed, or have been brought to their knowledge in any other way than by report (*e. g.* iv. 4–6; v. 1–4; xii. 3 ff., &c.). In some instances it may be difficult in this prophet, or in other prophets, to distinguish the scenic and the rhetorical symbolism from each other.

Baumgarten's article on *Ezekiel* in Herzog's *Real-Encyk.* iv. 296–304, furnishes a good outline of the plan and contents of this neglected book There is a translation of Hävernick's *Introduction* in the *Bibl. Sacra* for Aug. 1848. To the commentators already mentioned may be added Rosenmüller, *Scholia*, etc., 2 vols. (2d ed. 1826); Maurer, *Comm. in Vet. Test.*, with notes chiefly grammatical, ii. 1-76 (1838); Ewald, *Die Proph. des Alten Bundes* (1841), ii. 202–387; Umbreit, *Prakt. Commentar über den Propheten Hesekiel*, a translation with exegetical and critical remarks (1843); Henry Cowles, *Ezekiel and Daniel, with Notes*, &c., 12mo (New York, 1867); Kliefoth (*Das Buch Ezechiels übersetzt und erklärt* (2 Abth. 1864–65); G. R. Noyes, *New Trans. of the Hebrew Prophets, with Notes*, (3d ed. Boston, 1866,) vol. ii.; and Hengstenberg, *Die Weissagungen des Proph. Ezechiel erläutert*, 1er Theil (1867). The last three works are meant for general readers. On the Messianic or prophetic portions of Ezekiel, see Hengstenberg's *Christology*, iii. 458–492 (Keith's trans.); Hasse's *Gesch. des Alten Bundes*, pp. 160–173 (1863); and Ensfelder, *Les prophéties messianiques d'Ezéchiel*, in the Strasbourg *Rev. de Théol.* 1864, pp. 59–76. On Ezekiel's vision of the TEMPLE (ch. xl.–xlviii.) there are special treatises by Solomon Bennett, *The Temple of Ezekiel*, &c., Lond. 1824; J. F. Böttcher, in his *Proben alttestamentl. Schrifterklärung* (Leipz. 1833), pp. 218–365, with 2 plates; J. J. Balmer-Rinck, *Des Proph. Ezech. Gesicht vom Tempel übersichtlich dargestellt u. architektonisch erläutert* (Ludwigsb. 1858), with 5 plates and a map (comp. Auberlen's notice in the *Theol. Stud. u. Krit.* 1860, p. 207 ff.); and T. O. Paine, *Solomon's Temple*, etc. (Boston, 1861), with 21 plates. See also Thenius, *Das vorexilische Jerusalem u. dessen Tempel* (an appendix to his *Bücher der Könige*, Leipz. 1849), p 25 ff. The older literature on the subject is described in Rosenmüller's *Scholia* on Ezekiel, ii. 466 ff.

The oriental explorer, Mr. Loftus (*Chaldæa and Susiana*, p. 34, New York, 1857), gives a description and drawing of the reputed tomb of Ezekiel. *Kifil*, where the tomb is found, is a journey of 12 hours from the site of Babylon, but may be said to be near that city, for the palm-trees which cast their shade over the tomb are visible from the summit of the *Birs Nimroud* (see Layard's *Nin. & Bab.* p. 500). The former of these travellers thinks that this may be the prophet's veritable

Digitized by Google

tomb, or at all events, the place of his sepulture. The Jews, it is certain, have always been numerous in that region from the days of the Captivity, but it does not follow that they would from the first mark the spot where their countryman was buried, and keep alive its memory ever after. H.

E'ZEL, THE STONE (הָאֶבֶן הָאֵזֶל) [*the stone of departure*, Gesen.; or, *of separation*, Fürst]: τὸ Ἐργὰβ ἐκεῖνο; Alex. ἐργον: *lapis cui nomen est Ezel*). A well-known stone in the neighborhood of Saul's residence, the scene of the parting of David and Jonathan when the former finally fled from the court (1 Sam. xx. 19). At the second mention of the spot (verse 41) the Hebrew text (מֵאֵצֶל הַנֶּגֶב: A. V. "out of a place toward the south," literally "from close to the south" [more literally, "from the side of the south," *i. e.* south side, Gesen.]) is, in the opinion of [some] critics, undoubtedly corrupt. The true reading is indicated by the LXX., which in both cases has *Ergab* or *Argab* — in ver. 19 for the Hebrew *Eben*, "stone," and in ver. 41 for *han-Negeb*, "the south." *Ergab* is doubtless the Greek rendering of the Hebrew *Argob* = a heap of stones. The true reading of ver. 41 will therefore be as follows: "David arose from close to the stone-heap," — close to which (the same preposition, אֵצֶל, A. V. "by") it had been arranged beforehand that he should remain (ver. 19). The change in 41 from הארגב, as the text stood at the time of the LXX., to הנגב, as it now stands, is one which might easily take place. G.

* The stone was evidently named Ezel (note its import) from the memory of this parting of the two friends from each other at that place. The name is given, therefore, in the passage above, by way of anticipation. As to the question of the state of the Hebrew text, referred to above, see Thenius, *Die Bücher Samuels*, p. 88. His view is that adopted by the preceding writer. On the contrary, Fürst (*Heb. Handwörtb.* i. 14, and Davidson's trans. p. 15) regards the *Ergab* or *Argab* in the LXX. not as proof of a different Hebrew text followed by the translators, but as an arbitrary substitution on their part of the supposed name of the spot where David and Jonathan met each other. It is objected that no appropriate sense can be derived from מֵאֵצֶל הַנֶּגֶב, but the meaning may well be "from the side of the south," *i. e.* from the south side (*Mittags-Seite*, De Wette, Gesenius) of the stone or stone heap where David lay concealed until the departure of Jonathan's armor-bearer to the city, when David rose up and came forth, and the farewell scene took place between him and Jonathan. Such minuteness is after the manner of the Hebrew writers. For a similar explanation, see Keil and Delitzsch on 1 K. xx. 41. H.

E'ZEM (עֶצֶם [*bone*]: Ἀλσέμ; [Vat. Βοοσαλ;] Alex. Βοασομ: *Asom*), one of the towns of Simeon 1 Chr. iv. 29). In the lists of Joshua (xix. 3) the name appears in the slightly different form of AZEM (the vowel being lengthened before the pause).

* **E'ZER** (אֶצֶר, *treasure*, Ges.; *union*, Fürst: in Gen., Ἀσάρ; Alex. Σααρ; in 1 Chr., Ὠσάρ; Comp. Ald. Alex. Ἀσάρ; Vat. in ver. 38, Ὦναν: *Eser*), a son of Seir, and one of the "dukes" or chiefs of Edom (Gen. xxxv. 21, 27, 30; 1 Chr. i. 38, 42). In 1 Chr. i. 38 the name is misprinted Ezar in many modern editions of the A. V., but the ed. of 1611 and other early editions have the correct form. A.

E'ZER (עֶזֶר [*help*]: Ἐζέρ; [Vat. Οζερ, Alex. Εζερ:] *Ezer*). 1. A son of Ephraim, who was slain by the aboriginal inhabitants of Gath, while engaged in a foray on their cattle (1 Chr. vii. 21). Ewald (*Geschichte*, i. 490) assigns this occurrence to the pre-Egyptian period.

2. ([Rom. Vat. omit; Comp. Ald. Alex.] Ἰεζούρ.) A priest who assisted in the dedication of the walls of Jerusalem under Nehemiah (Neh. xii. 42).

3. [(Ἰαζήρ; Vat. Αζηρ; Comp. Alex. Ἐζέρ;) Father of Hushah, and one of the sons of Hur] (1 Chr. iv. 4).

* 4. (Ἀζά; Ald. Alex. Ἀζέρ; Comp. Ἐζέρ.) A Gadite warrior, who joined David at his stronghold in the wilderness (1 Chr. xii. 9). A.

* 5. (Ἀζούρ; FA.[1] Αζορ: *Azer.*) A Levite, son of Jeshua, the ruler of Mizpeh, who assisted in repairing the wall of Jerusalem in the time of Nehemiah (Neh. iii. 19). A.

EZERI'AS (Ζεχρίας; [Ald.] Alex. Ἐζεριας: *Azarias*), 1 Esdr. viii. 1. [AZARIAH, 7; AZARIAS, 4.]

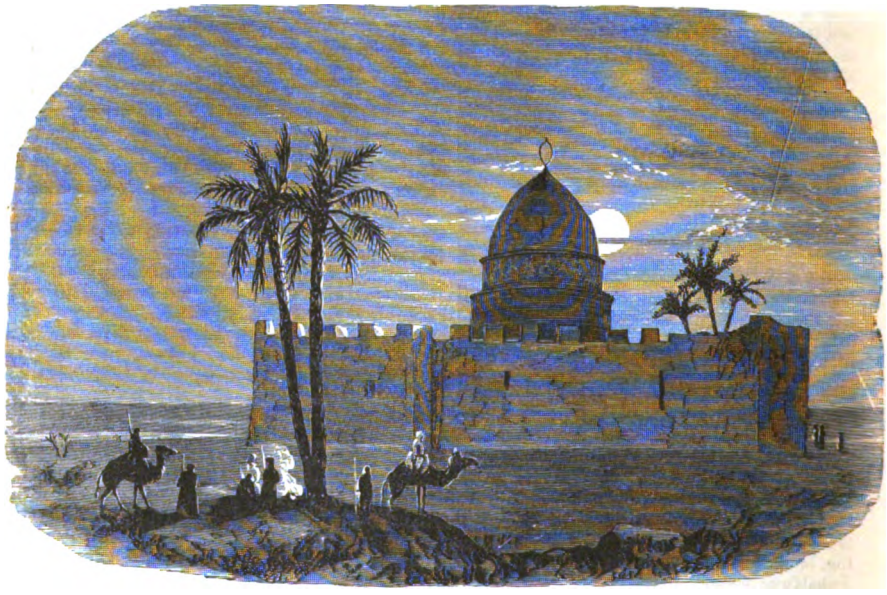
EZI'AS (Ὀζίας; [Vat. Οζειας; Ald.] Alex. Ἐζίας: *Aziahel*), 1 Esdr. viii. 2. [AZARIAH; AZIEL.]

E'ZION-GA'BER, or -GE'BER (עֶצְיוֹן גֶּבֶר = *the giant's backbone*: [Γεσιὼν or] Γασιὼν Γαβέρ, [etc.; Alex. in 1 K. xxii., Ασεωνγαβερ:] *Asiongaber*; Num. xxxiii. 35, 36; Deut. ii. 8; 1 K. ix. 26, xxii. 48; 2 Chr. viii. 17), the last station named for the encampment of the Israelites before they came to "the wilderness of Zin, which is Kadesh," subsequently the station of Solomon's navy, described as "besides Eloth, on the shore of the Red Sea, in the land of Edom;" and where that of Jehoshaphat was afterwards "broken," — probably destroyed on the rocks which lie in "jagged ranges on each side" (Stanley, *S. & P.* p. 2) Wellsted (ii. ch. ix. p. 153) would find it in Dahab [DIZAHAB], but this could hardly be regarded as "in the land of Edom" (although possibly the rocks which Wellsted describes may have been the actual scene of the wreck), nor would it accord with Josephus (*Ant.* viii. 6, § 4)[a] as "not far from Elath." According to the latest map of Kiepert (in Robinson, 1856), it stands at *'Ain el-Ghudyân*, about ten miles up what is now the dry bed of the Arabah, but, as he supposed, was then the northern end of the gulf, which may have anciently had, like that of Suez, a further extension. This probably is the best site for it. By comparing 1 K. ix. 26, 27 with 2 Chr. viii. 17, 18, it is probable that timber was floated from Tyre to the nearest point on the Mediterranean coast, and then conveyed overland to the head of the *Gulf of Akabah*, where the ships seem to have been built; for there can hardly have been adequate forests in the neighborhood [WILDERNESS OF THE WANDERING.] H. H.

EZ'NITE, THE (הָעַצְנִי, *Keri* הָעֶצְנִי [prob. *the spear*, Ges.]: ὁ Ἀσωναῖος [Alex. Ασω

[a] Ἀσιωνγάβαρος, αὐτὴ Βερενίκη καλεῖται νῦν πόλις Αἰλανῖτις κωλπου.

ness: Vulg. omits]). According to the statement of 2 Sam. xxiii. 8, "Adino the Eznite" was another name for "Josheb-basshebeth a Tachcemonite (A. V. "the Tachmonite that sate in the seat"), chief among the captains." The passage is, however, one of the most disputed in the whole Bible, owing partly to the difficulty of the one man bearing two names so distinct without any assigned reason, and partly to the discrepancy between it and the parallel sentence in 1 Chr. xi. 11. in which for the words "Adino the Eznite" other Hebrew words are found, not very dissimilar in appearance but meaning "he shook (A. V. 'lifted up') his spear." The question naturally arises whether the words in Chronicles are an explanation by a later writer of those in Samuel, or whether they preserve the original text which in the latter has become corrupted. The form of this particular word is in the original text (the *Chetib*) Etzno, which has been altered to Etzni by the Masoret scribes (in the *Keri*) apparently to admit of some meaning being obtained from it. Jerome read it *Etzno*, and taking it to be a declension of *Etz* (= "wood") has rendered the words *quasi tenerrimus* ligni *vermiculus*. The LXX. and some Hebrew MSS. (see Davidson's *Heb. Text*) add the words of Chronicles to the text of Samuel, a course followed by the A. V.



The passage has been examined at length by Kennicott (*Dissertation* 1, pp. 71–128) and Gesenius (*Thes.* pp. 994, 995), to whom the reader must be referred for details. Their conclusion is that the reading of the Chronicles is correct. Ewald does not mention it (*Gesch.* iii. 180, *note*). G.

EZ'RA (עֶזְרָא = *help*: Ἔσδρας: [*Esdras*]). 1. The head of one of the twenty-two courses of priests which returned from captivity with Zerubbabel and Jeshua (Neh. xii. 1). But in the somewhat parallel list of Neh. x. 2–8, the name of the same person is written עֲזַרְיָה, Azariah, as it is probably in Ezr. vii. 1. [AZARIAH, 22.]

2. The famous Scribe and Priest, descended from Hilkiah the high-priest in Josiah's reign, from whose younger son Azariah, sprung Seraiah, Ezra's father, quite a different person from Seraiah the high-priest (Ezr. vii. 1). All that is really known of Ezra is contained in the four last chapters of the book of Ezra, and in Neh. viii. and xii. 26. From these passages we learn that he was a learned and pious priest residing at Babylon in the time of Artaxerxes Longimanus. The origin of his influence with the king does not appear, but in the seventh year of his reign, in spite of the unfavorable report which had been sent by Rehum and Shimshai, he obtained leave to go to Jerusalem, and to take with him a company of Israelites, together with priests, Levites, singers, porters, and Nethinim. Of these a list, amounting to 1754, is given in Ezr. viii.; and these, also, doubtless form a part of the full list of the returned captives contained in Neh. vii., and in duplicate in Ezr. ii. The journey of Ezra and his companions from Babylon to Jerusalem took just four months; and they brought up with them a large free-will offering of gold and silver, and silver vessels, contributed, not only by the Babylonian Jews, but by the king himself and his counsellors. These offerings were for the house of God, to beautify it, and for the purchase of bullocks, rams, and the other offerings required for the temple-service. In addition to this Ezra was empowered to draw upon the king's treasurers beyond the river for any further supplies he might require; and all priests, Levites, and other ministers of the temple were exempted from taxation Ezra had also authority given him to appoint magistrates and judges in Judæa, with power of life and death over all offenders. This ample commission was granted him at his own request (Ezr. vii. 6), and it appears that his great design was to effect a religious reformation among the Palestine Jews, and to bring them back to the observation of the law of Moses, from which they had grievously declined. His first step, accordingly, was to enforce a separation from their wives upon all who had made heathen marriages, in which number were many priests and Levites, as well as other Israelites. This was effected in little more than six months after his arrival at Jerusalem. With the detailed account of this important transaction, Ezra's autobiography ends abruptly, and we hear nothing more of him till, 13 years afterwards, in the 20th of Artaxerxes, we find him again at Jerusalem with Nehemiah "the Tirshatha." It is generally assumed that Ezra had continued governor till Nehemiah superseded him; but as Ezra's commission was only of a temporary nature, "to inquire concerning Judah and Jerusalem" (Ezr. vii. 14), and to carry thither "the silver and gold which the king and his counsellors had freely offered unto the God of Israel" (15), and as there is no trace whatever of his presence at Jerusalem between the 8th and the 20th of Artaxerxes, it seems probable that after he had effected the above-named reformation, and had appointed competent judges and magistrates, with authority to maintain it, he himself returned to the king of Persia. This is in itself what one would expect, and what is borne out by the parallel case of Nehemiah, and it also accounts for the abrupt termination of Ezra's narrative, and for that relapse of the Jews into their former irregularities which is apparent in the book of Nehemiah. Such a relapse, and such a state of affairs at Jerusalem in general, could scarcely have occurred if Ezra had continued there. Whether he returned to Jerusalem with Nehemiah, or separately, does not appear certainly, but as he is not mentioned in Nehemiah's narrative till after the completion of the wall (Neh. viii. 1), it is perhaps probable that he followed the latter some months later, having, perhaps, been sent for to aid him in his work. The functions he executed under Nehemiah's government were purely of a priestly and ecclesiastical character, such as reading and interpreting the law of Moses to the people during the eight days of the Feast of Tabernacles, praying in the congregation, and assisting at the dedication of the wall, and in promoting the religious reformation so happily effected by the Tirshatha. But in such he filled the first place; being repeatedly coupled with Nehemiah the Tirshatha (viii. 9, xii. 26), while Eliashib the high-priest is not mentioned as taking any part in the reformation at all. In the sealing to the covenant described Neh. x., Ezra probably sealed under the patronymic Seraiah or Azariah (v. 2). As Ezra is not mentioned after Nehemiah's departure for Babylon in the 32d Artaxerxes, and as everything fell into confusion during Nehemiah's absence (Neh. xiii.), it is not unlikely that Ezra may have died or returned to Babylon before that year. Josephus, who should be our next best authority after Scripture, evidently knew nothing about the time or the place of his death. He vaguely says, "he died an old man and was

Digitized by Google

buried in a magnificent manner at Jerusalem" (*Ant.* xi. 5, § 5), and places his death in the high-priesthood of Joacim, and before the government of Nehemiah! But that he lived under the high-priesthood of Eliashib and the government of Nehemiah is expressly stated in Nehemiah; and there was a strong Jewish tradition that he was buried in Persia. Thus Benjamin of Tudela says of Nehar-Samorah — apparently some place on the lower Tigris,[a] on the frontier of Persia; Zamuza according to the Talmudists, otherwise Zamzumu — "The sepulchre of Ezra the priest and scribe is in this place, where he died on his journey from Jerusalem to king Artaxerxes" (vol. i. p. 116), a tradition which certainly agrees very well with the narrative of Nehemiah. This sepulchre is shown to this day (*ib.* vol. ii., note p. 116). As regards the traditional history of Ezra, it is extremely difficult to judge what portion of it has any historical foundation. The principal works ascribed to him by the Jews, and, on the strength of their testimony, by Christians also, are: — (1.) The institution of the Great Synagogue, of which, the Jews say, Ezra was president, and Daniel, Haggai, Zechariah, Malachi, Zorobabel, Mordecai, Jeshua, Nehemiah, &c., were members, Simeon the Just, the last survivor, living on till the time of Alexander the Great! (2.) The settling the canon of Scripture, and restoring, correcting, and editing the whole sacred volume according to the threefold arrangement of the Law, the Prophets, and the Hagiographa, with the divisions of the *Pesukim*, or verses, the vowel-points handed down by tradition from Moses, and the emendations of the *Keri*. (3.) The introduction of the Chaldee character instead of the old Hebrew or Samaritan. (4.) The authorship of the books of Chronicles, Ezra, Nehemiah, and, some add, Esther; and many of the Jews say, also of the books of Ezekiel, Daniel, and the 12 prophets. (5.) The establishment of syna-

Tomb of Ezra.

gogues. Of most of these works a full account is given in Prideaux's *Connection*, i. 308–348, and 355–376; also in Buxtorf's *Tiberius*. References to the chief rabbinical and other authorities will be found in Winer. A compendious account of the arguments by which most of these Jewish statements are proved to be fabulous is given in Stehelin's *Rabbin. Literat.* pp. 5–8; of which the chief are drawn from the silence of the sacred writers themselves, of the apocryphal books, and of Josephus — and it might be added, of Jerome — and from the fact that they may be traced to the author of the chapter in the Mishna called *Pirke Avoth*. Here, however, it must suffice to observe that the pointed description of Ezra (vii. 6) as "a ready scribe in the law of Moses," repeated in 11, 12, 21, added to the information concerning him that "he had prepared his heart to seek the law of the Lord, and to do it, and to teach in Israel statutes and judgments" (vii. 10), and his commission "to teach the laws of his God to such as knew them not" (25), and his great diligence in reading the Scriptures to the people, all give the utmost probability to the account which attributes to him a corrected edition of the Scriptures, and the circulation of many such copies. The books of Nehemiah and Malachi must indeed have been added later; possibly by Malachi's authority. Some tradition to this effect may have given rise to the Jewish fable of Malachi being the same person as Ezra. But we cannot affirm that Ezra inserted in the Canon any books that were not already acknowledged as inspired, as we have no sufficient ground for ascribing to him the prophetic character. Even the books of which he was the author may not have assumed definitely the character o.

[a] "On the Tigris, near its junction with the Euphrates," says Layard (*Nineveh and Babylon*, p. 501). H.

SCRIPTURE till they were sanctioned by Malachi. There does not, however, seem to be sufficient ground for forming a definite opinion on the details of the subject. In like manner one can only say that the introduction of the Chaldee character, and the commencement of such stated meetings for hearing the Scriptures read as led to the regular synagogue service, are things likely to have occurred about this time. For the question of Ezra's authorship, see CHRONICLES; also EZRA, BOOK OF.

A. C. H.

3. (עֶזְרָה): Ἔσρι; [Vat. Εσρει:] *Ezra*). A name which occurs in the obscure genealogy of 1 Chr. iv. 17. According to the author of the *Quæstiones in Paral*, Ezra is the same as Amram, and his sons Jether and Mered are Aaron and Moses.

EZRA, BOOK OF. The book of Ezra speaks for itself to any one who reads it with ordinary intelligence, and without any prejudice as to its nature and composition. It is manifestly a continuation of the books of Chronicles, as indeed it is called by Hilary, bishop of Poitiers, *Sermones dierum Esdræ* (ap. Cosin's *Canon of Scr.* 51). It is naturally a fresh book, as commencing the history of the returned captives after seventy years of suspension, as it were, of the national life. But when we speak of the book as a *chronicle*, we at once declare the nature of it, which its contents also abundantly confirm. Like the two books of Chronicles, it consists of the contemporary historical journals kept from time to time by the prophets, or other authorized persons, who were eye-witnesses for the most part of what they record, and whose several narratives were afterwards strung together, and either abridged or added to, as the case required, by a later hand. That later hand, in the book of Ezra, was doubtless Ezra's own, as appears by the four last chapters, as well as by other matter inserted in the previous chapters. While therefore, in a certain sense, the whole book is Ezra's, as put together by him, yet, strictly, only the four last chapters are his original work Nor will it be difficult to point out with tolerable certainty several of the writers of whose writings the first six chapters are composed. It has already been suggested [CHRONICLES] that the chief portion of the last chapter of 2 Chr. and Ezr. i may probably have been written by Daniel. The evidences of this in Ezr. i. must now be given more fully. No one probably can read Daniel as a genuine book and not be struck with the very singular circumstance that, while he tells us in ch. ix. that he was aware that the seventy years' captivity, foretold by Jeremiah, was near its close, and was led thereby to pray earnestly for the restoration of Jerusalem, and while he records the remarkable vision in answer to his prayer, yet he takes not the slightest notice of Cyrus's decree, by which Jeremiah's prophecy was fulfilled, and his own heart's desire and prayer to God for Israel was accomplished, and which must have been the most stirring event in his long life, not even excepting the incident of the den of lions He passes over in utter silence the *first* year of Cyrus, to which pointed allusion is made in Dan i. 21, and proceeds in ch. x. to the *third* year of Cyrus. Such silence is utterly unaccountable. But Ezr. i. supplies the missing notice. If placed between Dan ix. and x. it exactly fills up the gap, and records *the* event of the first year of Cyrus, in which Daniel was so deeply interested. And not only so, but the *manner* of the record is exactly Daniel's. Ezr. i. 1: "And in the first year of Cyrus K. of Persia," is the precise formula used in Dan. i. 1, ii. 1, vii. 1, viii. 1, ix. 1, x. 1, xi. 1. The designation (ver. 1, 2, 8) "Cyrus king of Persia" is that used Dan x. 1; the reference to the prophecy of Jeremiah in ver. 1 is similar to that in Dan. ix. 2, and the natural sequence to it. The giving the text of the decree, ver. 2–4 (cf. Dan. iv.), the mention of the name of "Mithredath the treasurer," ver. 8 (cf. Dan. i. 3, 11), the allusion to the sacred vessels placed by Nebuchadnezzar in the house of his god, ver. 7 (cf. Dan. i. 2), the giving the Chaldee name of Zerubbabel, ver. 8, 11 (cf. Dan. i. 7), and the whole *locus standi* of the narrator, who evidently wrote at Babylon, not at Jerusalem, are all circumstances which in a marked manner point to Daniel as the writer of Ezr. i. Nor is there the least improbability in the supposition that if Ezra edited Daniel's papers he might think the chapter in question more conveniently placed in its chronological position in the *Chronicles* than in the collection of Daniel's prophecies. It is scarcely necessary to add that several chapters of the prophets Isaiah and Jeremiah are actually found in the book of Kings, as *e. g.* Is xxxvi.–xxxix. in 2 K. xviii.–xx.

Ezr. i. then was by the hand of Daniel.

As regards Ezr. ii., and as far as iii. 1, where the change of name from Sheshbazzar to Zerubbabel in ver. 2, the mention of Nehemiah the Tirshatha in ver. 2 and 63, and that of Mordecai in ver. 2, at once indicate a different and much finer hand, we need not seek long to discover where it came from, because it is found *in extenso*, *verbatim et literatim* (with the exception of clerical errors), in the 7th ch. of Nehemiah, where it belongs beyond a shadow of doubt [NEHEMIAH, BOOK OF]. This portion then was written by Nehemiah, and was placed by Ezra, or possibly by a still later hand, in this position, as bearing upon the return from captivity related in ch. i., though chronologically out of place. Whether the extract originally extended so far as iii. 1 may be doubted The next portion extends from iii. 2 to the end of ch. vi. With the exception of one large explanatory addition by Ezra, extending from iv. 6 to 23, which has cruelly but most needlessly perplexed commentators, this portion is the work of a writer contemporary with Zerubbabel and Jeshua, and an eye-witness of the rebuilding of the Temple in the beginning of the reign of Darius Hystaspis. The minute details given of all the circumstances, such as the weeping of the old men who had seen the first Temple, the names of the Levites who took part in the work, of the heathen governors who hindered it, the expression (vi. 15) "*This house* was finished," &c., the number of the sacrifices offered at the dedication, and the whole tone of the narrative, bespeak an actor in the scenes described. Who then was so likely to record these interesting events as one of those prophets who took an active part in promoting them, and a branch of whose duty it would be to continue the national *chronicles*? That it was the prophet Haggai becomes tolerably sure when we observe further the following coincidences in style.

1 The title "the prophet," is throughout this portion of Ezra attached in a peculiar way to the name of Haggai. Thus chapter v. 1 we read "Then the prophets, Haggai *the prophet*, and Zechariah the son of Iddo, prophesied," &c.; and vi. 14,

Digitized by Google

"They prospered through the prophesying of Haggai *the prophet*, and Zechariah the son of Iddo." And in like manner in Hag. i. 1, 3, 12, ii. 1, 10, he is called "Haggai the prophet."

2. The designation of Zerubbabel and Jeshua is identical in the two writers. "Zerubbabel the son of Shealtiel, and Jeshua the son of Jozadak" (comp. Ezr. iii. 2, 8, v. 2, with Hag. i. 1, 12, 14, ii. 2, 4, 23). It will be seen that both writers usually name them together, and in the same order: Zechariah, on the contrary, does not once name them together, and calls them simply Zerubbabel, and Jeshua. Only in vi. 11 he adds "the son of Josedech."

3. The description in Ezr. v. 1, 2 of the effect of the preaching of Haggai and Zechariah upon Zerubbabel, Jeshua, and the people, is identical with that in Hag. i., only abbreviated. And Hag. ii. 3 alludes to the interesting circumstance recorded in Ezr. iii. 12.

4. Both writers mark the date of the transactions they record by the year of "Darius the king" (Ezr. iv. 24, vi. 15, compared with Hag. i. 1, 15, ii. 10, &c.).

5. Ezr. iii. 8 contains exactly the same enumeration of those that worked, viz. "Zerubbabel, Jeshua, and the *remnant* of their brethren," as Hag. i. 12, 14, where we have "Zerubbabel, and Jeshua, with all the *remnant* of the people" (comp. too Ezr. vi. 16, and Hag. ii. 2).

6. Both writers use the expression "the work of the house of the Lord" (Ezr. iii. 8 and 9, compared with Hag. i. 14); and both use the phrase "the foundation of the temple was laid" (Ezr. iii. 6, 10, 11, 12, compared with Hag. ii. 18).

7. Both writers use indifferently the expressions the "house of the Lord," and the "temple of the Lord," but the former much more frequently than the latter. Thus the writer in Ezra uses the expression "the house" (בַּיִת) twenty-five times, to six in which he speaks of "the temple" (הֵיכָל). Haggai speaks of "the house" seven times, of "the temple" twice.

8. Both writers make marked and frequent reference to the law of Moses. Thus comp. Ezr. iii. 2, 3–6, 8, vi. 14, 16–22, with Hag. i. 8, 10, ii. 5, 17, 11–13, &c.

Such strongly marked resemblances in the compass of two such brief portions of Scripture seem to prove that they are from the pen of the same writer.

But the above observations do not apply to Ezr. iv. 6–23, which is a parenthetic addition by a much later hand, and, as the passage most clearly shows, made in the reign of Artaxerxes Longimanus. The compiler who inserted chapter ii., a document drawn up in the reign of Artaxerxes, to illustrate the return of the captives under Zerubbabel, here inserts a notice of two historical facts — of which one occurred in the reign of Xerxes, and the other in the reign of Artaxerxes — to illustrate the opposition offered by the heathen to the rebuilding of the temple in the reign of Cyrus and Cambyses. He tells us that in the beginning of the reign of Xerxes, *i. e.* before Esther was in favor, they had written to the king to prejudice him against the Jews — a circumstance, by the way, which may rather have inclined him to listen to Haman's proposition; and he gives the text of letters sent to Artaxerxes, and of Artaxerxes' answer, on the strength of which Rehum and Shimshai forcibly hindered the Jews from rebuilding the city. These letters doubtless came into Ezra's hands at Babylon and may have led to those endeavors on his part to make the king favorable to Jerusalem which issued in his own commission in the seventh year of his reign. At ver. 24 Haggai's narrative proceeds in connection with ver. 5. The mention of Artaxerxes in chapter vi. 14, is of the same kind. The last four chapters, beginning with chapter vii., are Ezra's own, and continue the history after a gap of fifty-eight years — from the sixth of Darius to the seventh of Artaxerxes. The only history of Judæa during this interval is what is given in the above-named parenthesis, from which we may infer that during this time there was no one in Palestine to write the Chronicles. The history of the Jews in Persia for the same period is given in the book of Esther.

The text of the book of Ezra is not in a good condition. There are a good many palpable corruptions both in the names and numerals, and perhaps in some other points. It is written partly in Hebrew, and partly in Chaldee. The Chaldee begins at iv. 8, and continues to the end of vi. 18. The letter or decree of Artaxerxes, vii. 12–26, is also given in the original Chaldee. There has never been any doubt about Ezra being canonical, although there is no quotation from it in the N. T. Augustine says of Ezra "magis rerum gestarum scriptor est habitus quam propheta" (*De Civ. Dei*, xviii. 36). The period covered by the book is eighty years, from the first of Cyrus B. C. 536 to the beginning of the eighth of Artaxerxes B. C. 456. It embraces the governments of Zerubbabel and Ezra, the high-priesthood of Jeshua, Joiakim, and the early part of Eliashib; and the reigns of Cyrus, Cambyses, Smerdis, Darius Hystaspis, Xerxes, and part of Artaxerxes. Of these Cambyses and Smerdis are not named. Xerxes is barely named iv. 6. [ESDRAS, FIRST BOOK OF.] A. C. H.

* Among the later writers on the book of Ezra are these: Keil in his *Apol. Versuch üb. die Bücher der Chronik*, pp. 93–194, and in his *Einl. in das A. Test.* pp. 515–520; Maurer, *Comm. in Vet. Test.* i. 244 ff. (of little value); Nägelsbach, art. *Esra u. Nehemia*, in Herzog's *Real-Encyk.* iv. 165–174; Bleek in his *Einl. in das A. Test.*, pp. 373–391; Davidson, *Introd. to the Old Test.* ii. 121–132; Pusey, in his *Lectures on Daniel*, p. 328 ff. (in defense of its integrity and genuineness); Bertheau, *Die Bücher Esra, Nechemia u. Ester erklärt* (Lief. xvii. of the *Kurzgef. exeg. Handb. zum A. T.*, 1862); Wordsworth, in his *Holy Bible with Introduction and Notes*, iii. 301–324 (1866); and Kuenen, *Hist. crit. des livres de l'Ancien Test.*, trad. par Pierson, i. 496–522 (1866). It is the opinion of many eminent critics of different schools, as Zunz, Ewald, Bertheau, Vaihinger, Dillmann, Herzfeld, Davidson, Bleek, and Kuenen, that the books of Ezra, Nehemiah, and Chronicles were compiled by the same person. H.

EZ'RAHITE, THE (הָאֶזְרָחִי: ὁ Ζαρίτης [Vat. -ρει-], Alex. Εζραηλίτης; [in Ps., Ἰσραηλίτης, Vat. Sin. -λει-:] *Ezrahita*), a title attached to two persons — Ethan (1 K. iv. 31; Ps. lxxxix. title) and Heman (Ps. lxxxviii. title). The word is naturally derivable from Ezrah, or — which is almost the same in Hebrew — Zerach, זֶרַח: and accordingly in 1 Chr. ii. 6, Ethan and Heman are both given as sons of Zerah the son of Judah

another Ethan and another Heman are named as Levites and musicians in the lists of 1 Chr. vi. and elsewhere.

EZRI (עֶזְרִי [*help of Jehovah*, a contracted form, Ges. and Fürst]: Ἐσδρί; [Vat. Ἐσδρει; Comp. Ald.] Alex. Ἐζρατ: *Ezri*), son of Chelub, superintendent for king David of those "who did the work of the field for tillage of the ground" (1 Chr. xxvii. 26).

F.

FABLE (μῦθος: *fabula*). Taking the words fable and parable, not in their strict etymological meaning, but in that which has been stamped upon them by current usage, looking, *i. e.* at the Æsopic fable as the type of the one, at the Parables of the N. T. as the type of the other, we have to ask (1) in what relation they stand to each other, as instruments of moral teaching? (2) what use is made in the Bible of this or of that form? That they have much in common is, of course, obvious enough. In both we find "statements of facts, which do not even pretend to be historical, used as vehicles for the exhibition of a general truth" (Neander, *Leben Jesu*, p. 68). Both differ from the Mythus, in the modern sense of that word, in being the result of a deliberate choice of such a mode of teaching, not the spontaneous, unconscious evolution of thought in some symbolic form. They take their place so far as species of the same genus What are the characteristic marks by which one differs from the other, it is perhaps easier to feel than to define. Thus we have (comp. Trench *On Parables*, p. 2) (1) Lessing's statement that the fable takes the form of an actual narrative, while the Parable assumes only that what is related might have happened; (2) Herder's, that the difference lies in the fable's dealing with brute or inanimate nature, in the parable's drawing its materials exclusively from human life; (3) Olshausen's (on Matt. xiii. 1), followed by Trench (*l. c.*), that it is to be found in the higher truths of which the parable is the vehicle. Perhaps the most satisfactory summing up of the chief distinctive features of each is to be found in the following extract from Neander (*l. c.*): "The parable is distinguished from the fable by this, that, in the latter, qualities, or acts of a higher class of beings may be attributed to a lower (*e. g.* those of men to brutes); while in the former, the lower sphere is kept perfectly distinct from that which it seems to illustrate. The beings and powers thus introduced always follow the law of their nature, but their acts, according to this law, are used to figure those of a higher race. . . . The mere introduction of brutes as personal agents, in the fable, is not sufficient to distinguish it from the parable, which may make use of the same contrivance; as, for example, Christ employs the sheep in one of his parables. The great distinction here, also, lies in what has already been remarked; brutes introduced in the parable act according to the law of their nature, and the two spheres of nature and of the kingdom of God are carefully separated from each other. Hence the reciprocal relations of brutes to each other are not made use of, as these could furnish no appropriate image of the relation between man and the kingdom of God."

Of the fable, as thus distinguished from the parable, we have but two examples in the Bible, (1) that of the trees choosing their king, addressed by Jotham to the men of Shechem (Judg. ix. 8–15). (2) that of the cedar of Lebanon and the thistle, as the answer of Jehoash to the challenge of Amaziah (2 K. xiv. 9). The narrative of Ez. xvii. 1–10, though, in common with the fable, it brings before us the lower forms of creation as representatives of human characters and destinies, differs from it in the points above noticed, (1) in not introducing them as having human attributes, (2) in the higher prophetic character of the truths conveyed by it. The great eagle, the cedar of Lebanon, the spreading vine, are not grouped together as the agents in a fable, but are simply, like the bear, the leopard, and the lion in the visions of Daniel, symbols of the great monarchies of the world.

In the two instances referred to, the fable has more the character of the Greek αἶνος (Quintil. *Inst. Orat.* v. 11) than of the μῦθος; that is, is less the fruit of a vivid imagination, sporting with the analogies between the worlds of nature and of men, than a covert reproof, making the sarcasm which it affects to hide all the sharper (Müller and Donaldson, *Hist. of Greek Literature*, vol. i. c. xi.). The appearance of the fable thus early in the history of Israel, and its entire absence from the direct teaching both of the O. and N. T. are, each of them in its way, significant. Taking the received chronology, the fable of Jotham was spoken about 1209 B. C. The Arabian traditions of Lokman do not assign to him an earlier date than that of David. The earliest Greek αἶνος is that of Hesiod (*Op. et D.* 202), and the prose form of the fable does not meet us till we come (about 550 B. C.) to Stesichorus and Æsop. The first example in the history of Rome is the apologue of Menenius Agrippa B. C. 494, and its genuineness has been questioned on the ground that the fable could hardly at that time have found its way to Latium (Müller and Donaldson, *l. c.*). It may be noticed too that when collections of fables became familiar to the Greeks they were looked on as imported, not indigenous. The traditions that surround the name of Æsop, the absence of any evidence that he *wrote* fables, the traces of eastern origin in those ascribed to him, leave him little more than the representative of a period when the forms of teaching, which had long been familiar to the more eastern nations, were travelling westward, and were adopted eagerly by the Greeks. The collections themselves are described by titles that indicate a foreign origin. They are Libyan (Arist. *Rhet.* ii. 20), Cyprian, Cilician. All these facts lead to the conclusion that the Hebrew mind, gifted, as it was, in a special measure, with the power of perceiving analogies in things apparently dissimilar, attained, at a very early stage of its growth, the power which does not appear in the history of other nations till a later period. Whatever antiquity may be ascribed to the fables in the comparatively later collection of the *Pancha Tantra*, the land of Canaan is, so far as we have any data to conclude from, the fatherland of fable. To conceive brutes or inanimate objects as representing human characteristics, to personify them as acting, speaking, reasoning, to draw lessons from them applicable to human life, — this must have been common among the Israelites in the time of the Judges. The part assigned in the earliest records of the Bible to the impressions made by the brute creation on the mind of man (then "the Lord God formed every beast of

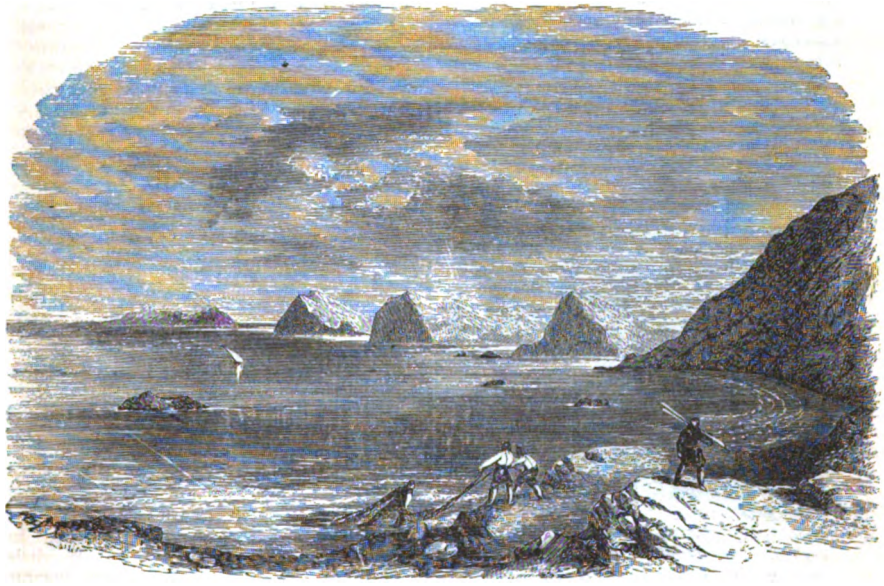
Digitized by Google

the field and every fowl of the air, and brought them unto Adam to see what he would call them" (Gen. ii. 19), and the apparent symbolism of the serpent in the narrative of the Fall (Gen. iii. 1) are at once indications of teaching adapted to men in the possession of this power, and must have helped to develope it (Herder, *Geist der Ebräischen Poesie*, *Werke*, xxxiv. p. 16, ed. 1826). The large number of proverbs in which analogies of this kind are made the bases of a moral precept, and some of which (*e. g.* Prov. xxvi. 11, xxx. 15, 25–28) are of the nature of condensed fables, show that there was no decline of this power as the intellect of the people advanced. The absence of fables accordingly from the teaching of the O. T. must be ascribed to their want of fitness to be the media of the truths which that teaching was to convey. The points in which brutes or inanimate objects present analogies to man are chiefly those which belong to his lower nature, his pride, indolence, cunning, and the like, and the lessons derived from them accordingly do not rise higher than the prudential morality which aims at repressing such defects (comp. Trench *on the Parables*, *l. c.*). Hence the fable, apart from the associations of a grotesque and ludicrous nature which gather round it, apart too from its presenting narratives which are "nec vera nec verisimiles" (Cic. *de Invent.* i. 19), is inadequate as the exponent of the higher truths which belong to man's spiritual life. It may serve to exhibit the relations between man and man; it fails to represent those between man and God. To do that is the office of the PARABLE, finding its outward framework in the dealings of men with each other, or in the world of nature as it is, not in any grotesque parody of nature, and exhibiting, in either case, real and not fanciful analogies. The fable seizes on that which man has in common with the creatures below him; the parable rests on the truths that man is made in the image of God, and that "all things are double one against another."

It is noticeable, as confirming this view of the office of the fable, that, though those of Æsop (so called) were known to the great preacher of righteousness at Athens, though a metrical paraphrase of some of them was among the employments of his imprisonment (Plato, *Phædon*, pp. 60, 61), they were not employed by him as illustrations, or channels of instruction. While Socrates shows an appreciation of the power of such fables to represent some of the phenomena of human life, he was not, he says, in this sense of the word, μυθολογικός. The myths, which appear in the *Gorgias*, the *Phædrus*, the *Phædon*, the *Republic*, are as unlike as possible to the Æsopic fables, are (to take his own account of them) οὐ μῦθοι ἀλλὰ λόγοι, true, though figurative, representations of spiritual realities, while the illustrations from the common facts of life which were so conspicuous in his ordinary teaching, though differing in being comparisons rather than narratives, come nearer to the parables of the Bible (comp. the contrast between τὰ Σωκρατικά, as examples of the παραβολή and the λόγοι Αἰσώπειοι, Arist. *Rhet.* ii. 20). It may be said indeed that the use of the fable as an instrument of teaching (apart from the embellishments of wit and fancy with which it is associated by such writers as Lessing and La Fontaine) belongs rather to childhood, and the child-like period of national life, than to a more advanced development. In the earlier stages of political change, as in the cases of Jotham, Stesichorus (Arist. *Rhet. l. c.*), Menenius Agrippa, it is used as an element of persuasion or reproof. It ceases to appear in the higher eloquence of orators and statesmen. The special excellence of fables is that they are δημηγορικοί (Arist. *Rhet. l. c.*), that "ducere animos solent, præcipue rusticorum et imperitorum" (Quint. *Inst. Orat. l. c.*).

The μῦθοι of false teachers claiming to belong to the Christian church, alluded to by writers of the N. T. in connection with γενεαλογίαι ἀπέραντοι (1 Tim. i. 4), or with epithets Ἰουδαϊκοί (Tit. i. 14), γραώδεις (1 Tim. iv. 7), σεσοφισμένοι (2 Pet. i. 16), do not appear to have had the character of fables, properly so called. As applied to them the word takes its general meaning of anything false or unreal, and it does not fall within the scope of the present article to discuss the nature of the falsehoods so referred to. [See PARABLE.]

E. H. P



FAIR HAVENS (Καλοὶ Λιμένες), a harbor in the island of CRETE (Acts xxvii. 8), not mentioned in any other ancient writing. There seems no probability that it is, as Biscoe suggested (*on the Acts*, p. 347, ed. 1829), the Καλὴ Ἀκτή of Steph. Byz. — for that is said to be a city, whereas Fair Havens is described as "a place near to which was a city called Lasæa" (τόπος τις ᾧ ἐγγὺς ἦν πόλις Λ.). Moreover Mr. Pashley found (*Travels in Crete*, vol. ii. p. 57) a district called *Acte*; and it is most likely that Καλὴ Ἀκτή was situated there; but that district is in the W. of the island, whereas Fair Havens was on the S. Its position is now quite certain. Though not mentioned by classical writers, it is still known by its old Greek name, as it was in the time of Pococke, and other early travellers mentioned by Mr. Smith (*Voyage and Shipwreck of St. Paul*, 2d ed. pp. 80–82). LASÆA too has recently been most explicitly discovered. In fact Fair Havens appears to have been practically its harbor. These places are situated four or five miles to the E. of Cape Matala, which is the most conspicuous headland on the S. coast of Crete, and immediately to the W. of which the coast trends suddenly to the N. This last circumstance explains why the ship which conveyed St. Paul was brought to anchor in Fair Havens. In consequence of violent and continuing N. W. winds she had been unable to hold on her course towards Italy from Cnidus (ver. 7), and had run down, by Salmone, under the lee of Crete. It was possible to reach Fair Havens; but beyond Cape Matala the difficulty would have recurred, so long as the wind remained in the same quarter. A considerable delay took place (ver. 9) during which it is possible that St. Paul may have had opportunities of preaching the gospel at Lasæa, or even at GORTYNA, where Jews resided (1 Macc. xv. 23), and which was not far distant; but all this is conjectural. A consultation took place, at which it was decided, against the apostle's advice, to make an attempt to reach a good harbor named PHENICE, their present anchorage being ἀνεύθετος πρὸς παραχείμασίαν (ver. 12). All such terms are comparative: and there is no doubt that, as a safe winter harbor, Fair Havens is infinitely inferior to Phenice; though perhaps even as a matter of seamanship St. Paul's advice was not bad. However this may be, the south wind, which sprang up afterwards (ver. 13), proved delusive; and the vessel was caught by a hurricane [EUROCLYDON] on her way towards Phenice, and ultimately wrecked. Besides

Digitized by Google

a view (p 81), Mr. Smith gives a chart of Fair Havens with the soundings (p. 257), from which any one can form a judgment for himself of the merits of the harbor. J. S. H.

* The result certainly vindicated the prudence of the apostle's advice in his opposition to the seamen who insisted on leaving Fair Havens and attempting to reach Phœnice (Acts xxvii. 12). It was not a question of the comparative excellence of the two harbors, but of the safety of exchanging one for the other under such circumstances. It should have been taken into account at that season of the year that gales of northerly wind, sudden and violent, were liable to spring up at any moment, and in that event that the ship must be driven off to sea and almost inevitably be wrecked. Paul ere this must have become a cautious as well as experienced navigator. He had "thrice suffered shipwreck, had spent a night and a day in the deep" (2 Cor. xi. 25) before he embarked on this voyage to Rome. Recent observations show that Fair Havens, though not equal to Phœnice (if that be *Lutro*), is yet protected to some extent by reefs and islands, and not bad as a temporary shelter. (See Smith's *Voyage and Shipwreck of St. Paul*, p. 85, 3d ed.) The apostle's advice, therefore, may be justified on nautical grounds. H.

FAIRS (עֲזָבוֹנִים: ἀγορά: *nundinæ, forum*), a word which occurs only in Ez. xxvii. and there no less than seven times (ver. 12, 14, 16, 19, 22, 27, 33): in the last of these verses it is rendered "wares," and this we believe to be the true meaning of the word throughout. It will be observed that the word stands in some sort of relation to מַעֲרָב throughout the whole of the chapter, the latter word also occurring seven times, and translated sometimes "market" (ver. 13, 17, 19), and elsewhere "merchandise" (ver. 9, 27, 33, 34). The words are used alternately, and represent the

Fair Havens in Crete.

alternations of commercial business in which the merchants of Tyre were engaged. That the first of these words cannot signify "fairs" is evident from ver. 12; for the inhabitants of Tarshish did not visit Tyre, but *vice versâ*. Let the reader substitute "paid" or "exchanged for thy wares," for "occupied in thy fairs," and the sense is much improved. The relation which this term bears to *maarab*, which properly means *barter*, appears to be pretty much the same as exists between exports and imports. The requirements of the Tyrians themselves, such as slaves (13), wheat (17), steel (19), were a matter of *maarab;* but where the business consisted in the exchange of Tyrian wares for foreign productions, it is specified in this form, "Tarshish *paid for thy wares* with silver, iron, tin, and lead." The use of the terms would probably have been more intelligible if the prophet had mentioned what the Tyrians gave in exchange: as it is, he only notices the one side of the bargain, namely, what the Tyrians received, whether they were buyers or sellers. W. L. B.

FALLOW-DEER (יַחְמוּר,[a] *yachmûr* Alex. βούβαλος: *bubalus*). The Heb. word, which is mentioned only in Deut. xiv. 5, as the name of one of the animals allowed by the Levitical law for food, and in 1 K. iv. 23, as forming part of the provisions for Solomon's table, appears to point to the *Antilope bubalis*, Pallas; the βούβαλος of the Greeks (see Herod. iv. 192; Aristotle, *Hist. Anim.* iii. 6, ed. Schneider, and *De Part. Anim.* iii. 2, 11, ed. Bekker: Oppian, *Cyn.* ii. 300) is properly, we believe, identified with the aforenamed antelope. From the different descriptions of the *yachmûr*, as given by Arabian writers, and cited by Bochart (*Hieroz.* ii. 284 ff.), it would seem that this is the animal denoted; though

[a] From the root חָמַר, "to be red."

Digitized by Google

Damir's remarks in some respects are fabulous, and he represents the *yachmûr* as having deciduous horns, which will not apply to any antelope. Still Cazuinus, according to Rosenmüller, identifies the *yachmûr*[a] with the *bekker-el-wash* ("wild cow"), which is the modern name in N. Africa for the *Antilope bubalis*. Kitto (*Pict. Bibl.* Deut. l. c.) says, "The yachmûr of the Hebrews is without doubt erroneously identified with the fallow-deer, which does not exist in Asia," and refers the name to the *Oryx leucoryx*, citing Niebuhr as authority for stating that this animal is known among the eastern Arabs by the name of *yazmur*. The fallow-deer (*Cervus dama*) is undoubtedly a native of Asia; indeed Persia seems to be its proper country. Hasselquist (*Trav.* p. 211) noticed this deer in Mount Tabor. Oedmann (*Verm. Samml.* i. 178) believes that the *yachmûr* is best denoted by the *Cervus dama*. The authority of the LXX., however, in a question of this kind, should decide the matter: accordingly we have little doubt but that the *yachmûr* of the Heb. Scriptures denotes the *bekker-el-wash*, or "wild ox," of Barbary and N. Africa. (See Shaw's *Travels*, p. 242, and Suppl.

Alcelaphus bubalis.

p. 75, folio; Buffon, *Hist. Natur.* xii. 294.) The Greek βούβαλος evidently points to some animal having the general appearance of an ox. Pliny (*N. H.* viii. 15) tells us that the common people in their ignorance sometimes gave the name of *bubalus* to the *Bison* (*Auroch*) and the *Urus*. He adds, the animal properly so called is produced in Africa, and bears a resemblance to the calf and the stag. That this antelope partakes in external form of the characters belonging both to the cervine and bovine ruminants will be evident to any one who glances at the woodcut.

The *bekker-el-wash* appears to be depicted in the Egyptian monuments, where it is represented as being hunted for the sake of its flesh, which Shaw tells us (Suppl. p. 75) is very sweet and nourishing, much preferable to that of the red deer. (See Wilkinson's *Anc. Egypt.* i. 223, figs. 3, 4, and p. 225 fig. 19). This animal, which is about the size of a stag, is common in N. Africa, and lives in herds. We were at one time inclined to refer the Heb *yachmûr* to the *Oryx leucoryx* (see art. Ox); on further investigation, however, we have decided for the *Alcelaphus*. The *Teô* or *Tô* may perhaps therefore denote the former antelope. W. H.

* The Arabic يحمور is described in a work of Natural History as "a species originating in the Barbary States, its size somewhat smaller than the red deer, but in form resembling it, having erect spirally curving ringed horns: the color of its body is reddish-brown, and the belly and inner surface of the thighs are white. The female has no horns." This description fixes the species as the *Alcelaphus bubalis*. G. E. P.

* **FAMILIAR SPIRIT** or **SPIRITS** (אוֹב, אוֹבוֹת), found in Lev. xx. 27; 1 Sam. xxviii. 7, 8; 1 Chr. x. 13; 2 Chr. xxxiii. 6; Is. xxix. 4, viii. 19, and elsewhere. [See DIVINATION; MAGIC.] The "familiar" employed in this expression comes from the idea that the necromancers, soothsayers, and the like, had spirits or demons whom they could summon from the unseen world to wait upon them as servants (*famuli*), and execute their commands. See Eastwood and Wright's *Bible Word-Book*, p. 194. H.

FAMINE. When the sweet influences of the Pleiades are bound, and the bands of Scorpio cannot be loosed,[b] then it is that famines generally prevail in the lands of the Bible. In Egypt a deficiency in the rise of the Nile, with drying winds produces the same results. The famines recorded in the Bible are traceable to both these phenomena and we generally find that Egypt was resorted to when scarcity afflicted Palestine. This is notably the case in the first three famines, those of Abraham, of Isaac, and of Jacob, although in the last case Egypt was involved in the calamity, and only saved from its horrors by the providential policy of Joseph. In this instance, too, the famine was widespread, and Palestine further suffered from the restriction which must have been placed on the supplies usually derived, in such circumstances, from Egypt.

In the whole of Syria and Arabia, the fruits of the earth must ever be dependent on rain; the watersheds having few large springs, and the small rivers not being sufficient for the irrigation of even the level lands. If therefore the heavy rains of November and December fail, the sustenance of the people is cut off in the parching drought of harvest-time, when the country is almost devoid of moisture. Further, the pastoral tribes rely on the scanty herbage of the desert-plains and valleys for their flocks and herds; for the desert is interspersed in spring-time with spontaneous vegetation, which is the product of the preceding rain-fall, and fails almost totally without it. It is therefore not difficult to conceive the frequent occurrence and severity of famines in ancient times, when the scattered

[a] يحمور, Rubor; animal ad genus pertinens cui est apud Arabes nomen بقر الوحش (Freytag, *Lex. A*

[b] That is to say, when the best and most fertilising of the rains, which fall when the Pleiades set at dawn (not exactly heliacally) at the end of autumn, fail rain scarcely ever falling at the opposite season, when Scorpio sets at dawn. כְּסִיל is clearly Scorpio, or Cor Scorpionis, as Aben Ezra says.

Digitized by Google

population. rather of a pastoral than an agricultural country was dependent on natural phenomena which, however regular in their season, occasionally failed, and with them the sustenance of man and beast.

Egypt, again, owes all its fertility — a fertility that gained for it the striking comparison to the "garden of the Lord" — to its mighty river, whose annual rise inundates nearly the whole land and renders its cultivation an easy certainty. But this very bounty of nature has not unfrequently exposed the country to the opposite extreme of drought. With scarcely any rain, and that only on the Mediterranean coast, and with wells only supplied by filtration from the river through a nitrous soil, a failure in the rise of the Nile almost certainly entails a degree of scarcity, although if followed by cool weather, and if only the occurrence of a single year, the labor of the people may in a great measure avert the calamity. The causes of dearth and famine in Egypt are occasioned by defective inundation, preceded and accompanied and followed by prevalent easterly and southerly winds. Both these winds dry up the earth, and the latter, keeping back the rain-clouds from the north, are perhaps the chief cause of the defective inundation, as they are also by their accelerating the current of the river — the northerly winds producing the contrary effects. Famines in Egypt and Palestine seem to be affected by drought extending from northern Syria, through the meridian of Egypt, as far as the highlands of Abyssinia.

The first famine recorded in the Bible is that of Abraham after he had pitched his tent on the east of Bethel: "And there was a famine in the land: and Abram went down into Egypt to sojourn there, for the famine was grievous in the land" (Gen. xii. 10). We may conclude that this famine was extensive, although this is not quite proved by the fact of Abraham's going to Egypt; for on the occasion of the second famine, in the days of Isaac, this patriarch found refuge with Abimelech king of the Philistines in Gerar, and was warned by God not to go down into Egypt, whither therefore we may suppose he was journeying (Gen. xxvi. 1 ff.). We hear no more of times of scarcity until the great famine of Egypt which "was over all the face of the earth;" "and all countries came into Egypt to Joseph to buy [corn], because that the famine was [so] sore in all lands" (Gen. xli. 56, 57). "And the sons of Israel came to buy [corn] among those that came; for the famine was in the land of Canaan" (xlii. 5). Thus in the third generation, Jacob is afflicted by the famine, and sends from Hebron to Egypt when he hears that there is corn there; and it is added in a later passage, on the occasion of his sending the second time for corn to Egypt, "and the famine was sore in the land," *i. e.* Hebron.

The famine of Joseph is discussed in art. EGYPT, so far as Joseph's history and policy is concerned. It is only necessary here to consider its physical characteristics. We have mentioned the chief causes of famines in Egypt: this instance differs in the providential recurrence of seven years of plenty, whereby Joseph was enabled to provide against the coming dearth, and to supply not only the population of Egypt with corn, but those of the surrounding countries: "And the seven years of plenteousness, that were in the land of Egypt, were ended And the seven years of dearth began to come, according as Joseph had said: and the dearth was in all lands; but in all the land of Egypt there was bread. And when all the land of Egypt was famished, the people cried to Pharaoh for bread: and Pharaoh said unto all the Egyptians, Go unto Joseph, and what he saith to you, do. And the famine was over all the face of the earth: and Joseph opened all the storehouses, and sold unto the Egyptians; and the famine waxed sore in the land of Egypt. And all countries came into Egypt to Joseph for to buy [corn], because that the famine was [so] sore in all lands" (Gen. xli. 53–57).

The modern history of Egypt throws some curious light on these ancient records of famine; and instances of their recurrence may be cited to assist us in understanding their course and extent. They have not been of very rare occurrence since the Mohammedan conquest, according to the testimony of Arab historians: one of great severity, following a deficient rise of the Nile, in the year of the Flight 597 (A. D. 1200), is recorded by 'Abd-El-Lateef, who was an eye-witness, and is regarded justly as a trustworthy authority. He gives a most interesting account of its horrors, states that the people throughout the country were driven to the last extremities, eating offal, and even their own dead, and mentions, as an instance of the dire straits to which they were driven, that persons who were burnt alive for eating human flesh were themselves, thus ready roasted, eaten by others. Multitudes fled the country, only to perish in the desert-road to Palestine.

But the most remarkable famine was that of the reign of the Fátimee Khaleefeh, El-Mustansir billáh, which is the only instance on record of one of seven years' duration in Egypt since the time of Joseph (A. H. 457–464, A. D. 1064–1071). This famine exceeded in severity all others of modern times, and was aggravated by the anarchy which then ravaged the country. Vehement drought and pestilence (says Es-Suyootee, in his *Hosn el Mohádarah*, MS.) continued for seven consecutive years, so that they [the people] ate corpses, and animals that died of themselves; the cattle perished; a dog was sold for 5 deenárs, and a cat for 3 deenárs . . . and an ardebb (about 5 bushels) of wheat for 100 deenárs, and then it failed altogether. He adds, that all the horses of the Khaleefeh, save three, perished, and gives numerous instances of the straits to which the wretched inhabitants were driven, and of the organized bands of kidnappers who infested Cairo and caught passengers in the streets by ropes furnished with hooks and let down from the houses. This account is confirmed by El-Makreezee (in his *Khitat*),[a] from whom we further learn that the family, and even the women of the Khaleefeh fled, by the way of Syria, on foot, to escape the peril that threatened all ranks of the population. The whole narrative is worthy of attention, since it contains a parallel to the duration of the famine of Joseph, and at the same time enables us to form an idea of the character of famines in the East. The famine of Samaria resembled it in many particulars; and that very briefly recorded in 2 K.

[a] Since writing the above, we find that Quatremère has given a translation of El-Makreesee's account of this famine, in the life of El-Mustansir, contained in his *Mémoires Géographiques et Historiques sur l'Égypte*.

Digitized by Google

viii. 1, 2, affords another instance of one of seven years: "Then spake Elisha unto the woman whose son he had restored to life, saying, Arise, and go, thou and thy household, and sojourn wheresoever thou canst sojourn: for the Lord hath called for a famine; and it shall also come upon the land seven years. And the woman arose, and did after the saying of the man of God: and she went with her household and sojourned in the land of the Philistines seven years." Bunsen (*Egypt's Place*, &c., ii. 334) quotes the record of a famine in the reign of Sesertesen I., which he supposes to be that of Joseph; but it must be observed that the instance in point is expressly stated not to have extended over the whole land, and is at least equally likely, apart from chronological reasons, to have been that of Abraham.

In Arabia, famines are of frequent occurrence. The Arabs, in such cases, when they could not afford to slaughter their camels, used to bleed them, and drink the blood, or mix it with the shorn fur, making a kind of black-pudding. They ate also various plants and grains, which at other times were not used as articles of food. And the tribe of Haneefeh were taunted with having in a famine eaten their god, which consisted of a dish of dates mashed up with clarified butter and a preparation of dried curds of milk (*Sihâh*, MS., art زبع)."

E. S. P.

* FAN. [AGRICULTURE, i. 44.]

FARTHING. Two names of coins in the N. T. are rendered in the A. V. by this word.

1. Κοδράντης, *quadrans* (Matt. v. 26; Mark xii. 42), a coin current in Palestine in the time of Our Lord. It was equivalent to two lepta (λεπτὰ δύο, ὅ ἐστιν κοδράντης, Mark, *l. c.*). The name quadrans was originally given to the quarter of the Roman as, or piece of three unciæ, therefore also called teruncius. The λεπτόν was originally a very small Greek copper coin, seven of which with the Athenians went to the χαλκοῦς. The copper currency of Palestine in the reign of Tiberius was partly of Roman coins, partly of Græco-Roman (technically, *Greek Imperial*). In the former class there was no common piece smaller than the as, equivalent to the ἀσσάριον of the N. T. (*infra*), but in the latter, there were two common smaller pieces, the one apparently the quarter of the ἀσσάριον, and the other its eighth, though the irregularity with which they were struck makes it difficult to pronounce with certainty: the former piece was doubtless called the κοδράντης, and the latter the λεπτόν.

2. Ἀσσάριον (Matt. x. 29; Luke xii. 6), properly a small *as*, *assarium*, but in the time of our Lord used as the Greek equivalent of the Latin *as*. The Vulg. in Matt. x. 29 renders it by *as*, and in Luke xii. 6 puts *dipondius* for two assaria, the dipondius or dupondius being equal to two asses. The ἀσσάριον is therefore either the Roman as, or the more common equivalent in Palestine in the Græco-Roman series, or perhaps both; the last supposition we are inclined to think the most likely. The rendering of the Vulg. in Luke xii. 6 makes it probable that a single coin is intended by two assaria, and this opinion is strengthened by the occurrence, on coins of Chios, struck during the imperial period, but without the heads of emperors and therefore of the *Greek autonomous* class, of the words ACCAPION, ACCAPIA ΔΤΟ, ACCAPIA TPIA. R. S. P.

FASTS. The word צוֹם, νηστεία, *jejunium*, is not found in the Pentateuch, but it often occurs in the historical books and the Prophets (2 Sam. xii. 16; 1 K. xxi. 9–12; Ezr. viii. 21; Ps. lxix. 10; Is. lviii. 5; Joel i. 14, ii. 15; Zech. viii. 19, &c.). In the Law, the only term used to denote the religious observance of fasting is the more significant one, עִנָּה נֶפֶשׁ: ταπεινοῦν τὴν ψυχήν. *affligere animam*: "afflicting the soul" (Lev. xvi. 29–31, xxiii. 27; Num. xxx. 13). The word תַּעֲנִית, i. e. *affliction*, which occurs Ezr. ix. 5, where it is rendered in A. V. "heaviness," is commonly used to denote fasting in the Talmud, and is the title of one of its treatises.

I. One fast only was appointed by the Law, that on the day of Atonement. [ATONEMENT, DAY OF.] There is no mention of any other periodical fast in the O. T., except in Zech. vii. 1–7, viii. 19. From these passages it appears that the Jews, during their Captivity, observed four annual fasts in the fourth, fifth, seventh, and tenth months. When the building of the second Temple had commenced, those who remained in Babylon sent a message to the priests at Jerusalem to inquire whether the observance of the fast in the fifth month should not be discontinued. The prophet takes the occasion to rebuke the Jews for the spirit in which they had observed the fast of the seventh month as well as that of the fifth (vii. 5–6); and afterwards (viii. 19), giving the subject an evangelical turn, he declares that the whole of the four fasts shall be turned to "joy and gladness, and cheerful feasts." Zechariah simply distinguishes the fasts by the months in which they were observed; but the Mishna (*Taanith*, iv. 6) and S. Jerome (*in Zachariam* viii.) give statements of certain historical events which they were intended to commemorate: —

The fast of the fourth month. — The breaking of the tables of the Law by Moses (Ex. xxxii.), and the storming of Jerusalem by Nebuchadnezzar (Jer. lii.).

The fast of the fifth month. — The return of the spies, &c. (Num. xiii., xiv.), the Temple burnt by Nebuchadnezzar, and again by Titus; and the ploughing up of the site of the temple, with the capture of Bether, in which a vast number of Jews from Jerusalem had taken refuge in the time of Hadrian.

The fast of the seventh month. — The complete sack of Jerusalem by Nebuchadnezzar and the death of Gedaliah (2 K. xxv.).

The fast of the tenth month. — The receiving by Ezekiel and the other captives in Babylon of the news of the destruction of Jerusalem.

Some other events mentioned in the Mishna are omitted as unimportant. Of those here stated several could have had nothing to do with the fasts in the time of the prophet. It would seem most probable, from the mode in which he has grouped them together, that the original purpose of all four was to commemorate the circumstances connected with the commencement of the Captivity, and that the other events were subsequently associated with them on the ground of some real or fancied coincidence of the time of occurrence. As regards the

* * For the famine predicted by Agabus, which occurred in the reign of Claudius (Acts xi. 28), see AGABUS H.

[illegible] of the fifth month, at least, it can hardly be doubted that the captive Jews applied it exclusively to the destruction of the Temple, and that S. Jerome was right in regarding as the reason of their request to be released from its observance, the fact that it had no longer any purpose after the new Temple was begun. As this fast (as well as the three others) is still retained in the Jewish Calendar, we must infer either that the priests did not agree with the Babylonian Jews, or that the fast having been discontinued for a time, was renewed after the destruction of the Temple by Titus.

The number of annual fasts in the present Jewish Calendar has been multiplied to twenty-eight, a list of which is given by Reland (*Antiq.* p. 274).

II. Public fasts were occasionally proclaimed to express national humiliation on account of sin or misfortune, and to supplicate divine favor in regard to some great undertaking or threatened danger. In the case of public danger, the proclamation appears to have been accompanied with the blowing of trumpets (Joel ii. 1–15; cf. *Taanith*, i. 6). The following instances are recorded of strictly national fasts: Samuel gathered "all Israel" to Mizpeh and proclaimed a fast, performing at the same time what seems to have been a rite symbolical of purification, when the people confessed their sin in having worshipped Baalim and Ashtaroth (1 Sam. vii. 6); Jehoshaphat appointed one "throughout all Judah" when he was preparing for war against Moab and Ammon (2 Chr. xx. 3); in the reign of Jehoiakim, one was proclaimed for "all the people in Jerusalem and all who came thither out of the cities of Judah," when the prophecy of Jeremiah was publicly read by Baruch (Jer. xxxvi. 6–10; cf. Baruch i. 5); three days after the feast of Tabernacles, when the second Temple was completed, "the children of Israel assembled with fasting and with sackcloths and earth upon them" to hear the Law read, and to confess their sins (Neh. ix. 1). There are references to general fasts in the Prophets (Joel i. 14, ii. 15; Is. lviii.), and two are noticed in the books of the Maccabees (1 Macc. iii. 46–47; 2 Macc. xiii. 10–12).

There are a considerable number of instances of cities and bodies of men observing fasts on occasions in which they were especially concerned. In the days of Phinehas, the grandson of Aaron, when the men of Judah had been defeated by those of Benjamin, they fasted in making preparation for another battle (Judg. xx. 26). David and his men fasted for a day on account of the death of Saul (2 Sam. i. 12), and the men of Jabesh-Gilead fasted seven days on Saul's burial (1 Sam. xxxi. 13). Jezebel, in the name of Ahab, appointed a fast for the inhabitants of Jezreel, to render more striking, as it would seem, the punishment about to be inflicted on Naboth (1 K. xxi. 9–12). Ezra proclaimed a fast for his companions at the river of Ahava, when he was seeking for God's help and guidance in the work he was about to undertake (Ezr. viii. 21–23). Esther, when she was going to intercede with Ahasuerus, commanded the Jews of Shushan neither to eat nor drink for three days (Esth. iv. 16).

Public fasts expressly on account of unseasonable weather and of famine, may perhaps be traced in the first and second chapters of Joel. In later times they assumed great importance and form the main subject of the treatise *Taanith* in the Mishna.

III. Private occasional fasts are recognised in the passage of the Law (Num. xxx. 13). The instances given of individuals fasting under the influence of grief, vexation, or anxiety, are numerous (1 Sam. i. 7, xx. 34: 2 Sam. iii. 35, xii. 16; 1 K. xxi. 27; Ezr. x. 6; Neh. i. 4; Dan. x. 3). The fasts of forty days of Moses (Ex. xxiv. 18, xxxiv. 28; Deut. ix. 18) and of Elijah (1 K. xix. 8) are, of course, to be regarded as special acts of spiritual discipline, faint though wonderful shadows of that fast in the wilderness of Judæa, in which all true fasting finds its meaning.

IV. In the N. T. the only references to the Jewish fasts are the mention of "the Fast" in Acts xxvii. 9 (generally understood to denote the Day of Atonement), and the allusions to the weekly fasts (Matt. ix. 14; Mark ii. 18; Luke v. 33, xviii. 12; Acts x. 30). These fasts originated some time after the Captivity. They were observed on the second and fifth days of the week, which, being appointed as the days for public fasts (*Taanith*, ii 9), seem to have been selected for these private voluntary fasts. The Gemara states that they were chosen because Moses went up Mount Sinai on the fifth day and came down on the second. All that can be known on the subject appears to be given by Grotius, Lightfoot, and Schoettgen on Luke xviii. 12; and Lightfoot on Matt. ix. 14.

A time of fasting for believers in Christ is foretold Matt ix. 15, and a caution on the subject is given Matt. vi. 16–18. Fasting and prayer are spoken of as the great sources of spiritual strength, Matt. xvii. 21; Mark ix. 29; 1 Cor. vii. 5; and they are especially connected with ordination, Acts xiii. 3, xiv. 23.

V. The Jewish fasts were observed with various degrees of strictness. Sometimes there was entire abstinence from food (Esth. iv. 16, &c.). On other occasions there appears to have been only a restriction to a very plain diet (Dan. x. 3). Rules are given in the Talmud (both in *Joma* and *Taanith*) as to the mode in which fasting is to be observed on particular occasions. The fast of the day, according to Josephus, was considered to terminate at sunset, and St. Jerome speaks of the fasting Jew as anxiously waiting for the rising of the stars. Fasts were not observed on the Sabbaths, the new moons, the great festivals, or the feasts of Purim and Dedication (Jud. viii. 6; *Taanith*, ii. 10).

Those who fasted frequently dressed in sackcloth or rent their clothes, put ashes on their head and went barefoot (1 K. xxi. 27; cf. Joseph. *Ant.* viii 13, § 8; Neh. ix. 1; Ps. xxxv. 13). The rabbinical directions for the ceremonies to be observed in public fasts, and the prayers to be used in them, may be seen in *Taanith*, ii. 1–4.

VI. The sacrifice of the personal will, which gives to fasting all its value, is expressed in the old term used in the law, *afflicting the soul*. The faithful son of Israel realized the blessing of "chastening his soul with fasting" (Ps. lxix. 10). But the frequent admonitions and stern denunciations of the prophets may show us how prone the Jews were, in their formal fasts, to lose the idea of a spiritual discipline, and to regard them as being in themselves a means of winning favor from God, or, in a still worse spirit, to make a parade of them in order to appear religious before men (Is. lviii. 3, Zech vii. 5, 6; Mal. iii. 14; comp. Matt. vi. 16).

S. C.

* The word صوم in Arabic, the same root as צוּם, signifies abstinence from food, drink or

versation, and sexual intercourse. This is undoubtedly the true intent of fasting, perfect absorption in religion to the exclusion of all sensual occupations or delights. G. E. P.

FAT. The Hebrews distinguished between the suet or pure fat of an animal (חֵלֶב), and the fat which was intermixed with the lean (מַשְׁמַנִּים, Neh. viii. 10). Certain restrictions were imposed upon them in reference to the former: some parts of the suet, namely, about the stomach, the entrails, the kidneys, and the tail of a sheep, which grows to an excessive size in many eastern countries, and produces a large quantity of rich fat [SHEEP], were forbidden to be eaten in the case of animals offered to Jehovah in sacrifice (Lev. iii. 3, 9, 17, vii. 3, 23). The ground of the prohibition was that the fat was the richest part of the animal, and therefore belonged to Him (iii. 16). It has been supposed that other reasons were superadded, as that the use of fat was unwholesome in the hot climate of Palestine. There appears, however, to be no ground for such an assumption. The presentation of the fat as the richest part of the animal was agreeable to the dictates of natural feeling, and was the ordinary practice even of heathen nations, as instanced in the Homeric descriptions of sacrifices (*Il.* i. 460, ii. 423; *Od.* iii. 457), and in the customs of the Egyptians (Her. ii. 47), and Persians (Strab. xv. p. 732). Indeed, the term *cheleb* is itself significant of the feeling on which the regulation was based: for it describes the *best* of any production (Gen. xlv. 18; Num. xviii. 12; Ps. lxxxi. 16, cxlvii. 14; compare 2 Sam. i. 22; Judg. iii. 29; Is. x. 16). With regard to other parts of the fat of sacrifices or the fat of other animals, it might be consumed, with the exception of those dying either by a violent or a natural death (Lev. vii. 24), which might still be used in any other way. The burning of the fat of sacrifices was particularly specified in each kind of offering, whether a peace-offering (Lev. iii. 9), consecration-offering (viii. 25), sin-offering (iv. 8), trespass-offering (vii. 3), or redemption-offering (Num. xviii. 17). The Hebrews fully appreciated the luxury of well-fatted meat, and had their stall-fed oxen and calves (1 K. iv. 23; Jer. xlvi. 21; Luke xv. 23); nor is there any reason to suppose its use unwholesome. W. L. B.

FAT, *i. e.* VAT. The word employed in the A. V. to translate the Hebrew term יְקָב, *Yekeb*, in Joel ii. 24, iii. 13 only. The word commonly used for *yekeb*, indiscriminately with *gath*, גַּת, is "wine-press" or "wine-fat," and once "press-fat" (Hag. ii. 16); but the two appear to be distinct — *gath* the upper receptacle or "press" in which the grapes were trod, and *yekeb* the "vat," on a lower level, into which the juice or must was collected. The word is derived by Gesenius (*Thes.* p. 619 *b*) from a root signifying to hollow or dig out; and in accordance with this is the practice in Palestine, where the "wine-press" and "vats" appear to have been excavated out of the native rock of the hills on which the vineyards lay. One such, apparently ancient, is described by Robinson as at *Hableh* in central Palestine (iii. 137), and another, probably more modern, in the Lebanon (p. 603). The word rendered "wine-fat" in Mark xii. 1 is ὑπολήνιον, which is frequently used by the LXX. to translate *yekeb* in the O. T. [WINE-PRESS.] G.

FATHER (*Ab*, אָב, Chald. *Abba*, אַבָּא, Mark xiv. 36, Rom. viii. 15: πατήρ: *pater*: a primitive word, but following the analogy of אָבַהּ, *to show kindness*, Gesen. *Thes.* pp. 6–8).

The position and authority of the father as the head of the family is expressly assumed and sanctioned in Scripture, as a likeness of that of the Almighty over his creatures, an authority — as Philo remarks — intermediate between human and divine (Philo, περὶ γονέων τιμῆς, § 1). It lies of course at the root of that so-called patriarchal government (Gen. iii. 16; 1 Cor. xi. 3), which was introductory to the more definite systems which followed, and which in part, but not wholly, superseded it. When, therefore, the name of "father of nations" (אַבְרָהָם) was given to Abram, he was thereby held up not only as the ancestor, but as the example to those who should come after him (Gen. xviii. 18, 19; Rom. iv. 17). The father's blessing was regarded as conferring special benefit, but his malediction special injury on those on whom it fell (Gen. ix. 25, 27, xxvii. 27–40, xlviii. 15, 20, xlix.); and so also the sin of a parent was held to affect, in certain cases, the welfare of his descendants (2 K. v. 27), though the Law forbade the punishing of the son for his father's transgression (Deut. xxiv. 16; 2 K. xiv. 6; Ez. xviii. 20). The command to honor parents is noticed by St. Paul as the only one of the Decalogue which bore a distinct promise (Ex. xx. 12; Eph. vi. 2), and disrespect towards them was condemned by the Law as one of the worst of crimes (Ex. xxi. 15, 17; 1 Tim. 1, 9; comp. Virg. *Æn.* vi. 609; Aristoph *Ran.* 274–773). Instances of legal enactment in support of parental authority are found in Ex. xxii. 17; Num. xxx. 3, 5, xii. 14; Deut. xxi. 18, 21; Lev. xx. 9, xxi. 9, xxii. 12; and the spirit of the Law in this direction may be seen in Prov. xiii. 1, xv. 5, xvii. 25, xix. 13, xx. 20, xxviii. 24, xxx. 17; Is. xlv. 10; Mal. i. 6. The father, however, had not the power of death over his child (Deut. xxi. 18–21; Philo, *l. c.*).

From the patriarchal spirit, also, the principle of respect to age and authority in general appears to be derived. Thus Jacob is described as blessing Pharaoh (Gen. xlvii. 7, 10; comp. Lev. xix. 32; Prov. xvi. 31; Philo, *l. c.* § 6).

It is to this well-recognized theory of parental authority and supremacy that the very various uses of the term "father" in Scripture are due. (1.) As the source or inventor of an art or practice (Gen. iv. 20, 21; John viii. 44; Job xxxviii. 28, xvii. 14; 2 Cor. 1, 3). (2.) As an object of respect or reverence (Jer. ii. 27; 2 K. ii. 12, v. 13, vi. 21). (3.) Thus also the pupils or scholars of the prophetical schools, or of any teacher, are called sons (2 K. ii. 3, iv. 1; 1 Sam. x. 12, 27; 1 K. xx. 35; Heb. xii. 9; 1 Tim. i. 2). (4.) The term father, and also mother, is applied to any ancestor of the male or female line respectively (Is. li. 2; Jer. xxxv. 6, 18; Dan. v. 2; 2 Sam. ix. 7; 2 Chr. xv. 16). (5.) In the Talmud the term father is used to indicate the chief, *e. g.* the principal of certain works are termed "fathers." Objects whose contact causes pollution are called "fathers" of defilement (Mishn. *Shabb.* vii. 2, vol. ii. p. 2b, *Pesach*, i. 6 vol. ii. p. 137, Surenh.). (6.) A protector or guardian (Job xxix. 16; Ps. lxviii. 5; Deut. xxxii 6). Many personal names are found with the prefix

Digitized by Google

אָב, as Absalom, Abishai, Abiram, &c., implying some quality or attribute possessed, or ascribed (Gesen. pp. 8, 10).

"Fathers" is used in the sense of seniors (Acts vii. 2, xxii. 1), and of parents in general, or ancestors (Dan. v. 2; Jer. xxvii. 7; Matt. xxiii. 30, 32).

Among Mohammedans parental authority has great weight during the time of pupilage. The son is not allowed to eat, scarcely to sit in his father's presence. Disobedience to parents is reckoned one of the most heinous of crimes (Burckhardt, *Notes on Bed.* i. 355; Lane, *Mod. Egypt.* i. 84; Atkinson, *Travels in Siberia*, &c. p. 559). H. W. P.

* The Arabic أَب, "father," denotes the person by whose means a thing is *made*, *repaired*, or *caused to appear*, as well as the *parent*. G. E. P.

FATHOM. [Measures.]

* **FAUCHION**, a short sword (Jud. xiii. 6 and xvi. 9), less common than *fulchion* or *faulchion*, in each form now almost obsolete. It stands for δικινδικης, a transferred Persian word. It is the name of the weapon with which Judith slew Holofernes (see Fritzsche, *Handb. zu den Apokryphen des A. T.* i. 196). H.

FEASTS. [Festivals.]

* **FEET.** For various customs in relation to the feet, see Dust; Mourning; Sandal; and Washing the Hands and Feet.

FE'LIX (Φῆλιξ, Acts xxiii.–xxiv.: [*Felix*, happy, fortunate;] in Tac. *Hist.* v. 9, called Antonius Felix; in Suidas, Claudius Felix; in Josephus and Acts, simply Felix; so also in Tac. *Ann.* xii. 54), a Roman procurator of Judæa, appointed by the Emperor Claudius, whose freedman he was, on the banishment of Ventidius Cumanus in A. D. 53. Tacitus (*Ann.* xii. 54) states that Felix and Cumanus were joint procurators, Cumanus having Galilee, and Felix, Samaria. In this account Tacitus is directly at issue with Josephus (*Ant.* xx. 6, 2–7, 1), and is generally supposed to be in error; but his account is very circumstantial, and by adopting it we should gain some little justification for the expression of St. Paul, Acts xxiv. 10, that Felix had been judge of the nation "for many years." Those words, however, must not even thus be closely pressed; for Cumanus himself only went to Judæa in the eighth year of Claudius (Joseph. *Ant.* xx. 5, § 2). Felix was the brother of Claudius's powerful freedman Pallas (*B. J.* ii. 12, § 8; *Ant.* xx. 7, § 1); and it was to the circumstance of Pallas's influence surviving his master's death (Tacit. *Ann.* xiv. 65) that Felix was retained in his procuratorship by Nero. He ruled the province in a mean, cruel, and profligate manner, "per omnem sævitiam et libidinem jus regium servili ingenio exercuit" (Tac. *Hist.* v. 9, and *Ann.* xii. 54). With this compendious description the fuller details of Josephus agree, though his narrative is tinged with his hostility to the Jewish patriots and zealots, whom, under the name of robbers, he describes Felix as putting down and crucifying by hundreds. His period of office was full of troubles and seditions. We read of his putting down false Messiahs (Joseph. *Ant.* xx. 8, § 5; *B. J.* ii. 13, § 4); the followers of an Egyptian magician (*Ant.* xx. 8, § 6; *B. J.* ii. 13, § 5; Acts xxi. 38); riots between the Jews and Syrians in Cæsarea (*Ant.* xx. 8, § 7; *B. J.* ii. 13, § 7), and between the priests and the principal citizens of Jerusalem (*Ant.* xx. 8, § 8; Joseph. *Life*, 3). He once employed the sicarii for his own purposes, to bring about the murder of the high-priest Jonathan (*Ant.* xx. 8, § 5). His severe measures and cruel retributions seemed only to accelerate the already rapid course of the Jews to ruin: "intempestivis remediis delicta accendebat" (Tac. *Ann.* xii. 54; ὁ πόλεμος καθ' ἡμέραν ἀνερρίπιζετο, Joseph. *B. J.* ii. 13, § 6). St. Paul was brought before Felix in Cæsarea, having been sent thither out of the way of the Jews at Jerusalem by the "chief captain" Claudius Lysias. Some effect was produced on the guilty conscience of the procurator, as the Apostle reasoned of righteousness, and temperance, and judgment to come; but St. Paul was remanded to prison and kept there, in hopes of extorting money from him, two years (Acts xxiv. 26, 27). At the end of that time Porcius Festus [Festus] was appointed to supersede Felix, who, on his return to Rome, was accused by the Jews in Cæsarea, and would have suffered the penalty due to his atrocities, had not his brother Pallas prevailed with the Emperor Nero to spare him (*Ant.* xx. 8, § 9). This was probably in the year 60 A. D. (Anger, *De temporum in Act. Apost. ratione*, &c., p. 100; Wieseler, *Chronologie der Apostelgeschichte*, pp. 66–82). The wife of Felix was Drusilla, daughter of Herod Agrippa I. the former wife of Azizus King of Emesa. [Drusilla.] H. A.

* **FELLER** (Is. xiv. 8), a cutter of wood (from the Anglo-Saxon, *fellan*, to fell). The prophet represents the cedars of Lebanon as shouting in the lower world, over the fall of Sennacherib, their great destroyer: "Since thou art laid low, no feller is come up against us." H.

FENCED CITIES (מְבֻצָרִים, or מִבְצָרוֹת, Dan. xi. 15, from בָּצַר, *cut off*, *separate*, equivalent to תִּבְצְרוֹת עָרִים, Ges. 231: πόλεις ὀχυραί, τειχήρεις, τετειχισμέναι: *urbes*, or *civitates*, *munitæ*, *munitæ*, *munitissimæ*, *firmæ*). The broad distinction between a city and a village in Biblical language has been shown to consist in the possession of walls. [City.] The city had walls, the village was unwalled, or had only a watchman's tower (מִגְדָּל: πύργος: *turris custodum*; compare Gesen. 267), to which the villagers resorted in times of danger. A threefold distinction is thus obtained — (1) cities; (2) unwalled villages; (3) villages with castles or towers (1 Chr. xxvii. 25). The district east of the Jordan, forming the kingdoms of Moab and Bashan, is said to have abounded from very early times in castles and fortresses, such as were built by Uzziah to protect the cattle, and to repel the inroads of the neighboring tribes, besides unwalled towns (Amm. Marc. xiv. 9; Deut. iii. 5; 2 Chr. xxvi. 10). Of these many remains are thought by Mr. Porter to exist at the present day (*Damascus*, ii. 197). The dangers to which unwalled villages are exposed from the marauding tribes of the desert, and also the fortifications by which the inhabitants sometimes protect themselves, are illustrated by Sir J. Malcolm (*Sketches of Persia*, c. xiv. 148; and Fraser, *Persia*, pp. 379, 380; comp. Judg. v. 7). Villages in the *Hauran* are sometimes inclosed by a wall, or rather the houses being joined together form a defense against Arab robbers, and the entrance is closed by a gate (Burckhardt, *Syria*, p. 212).

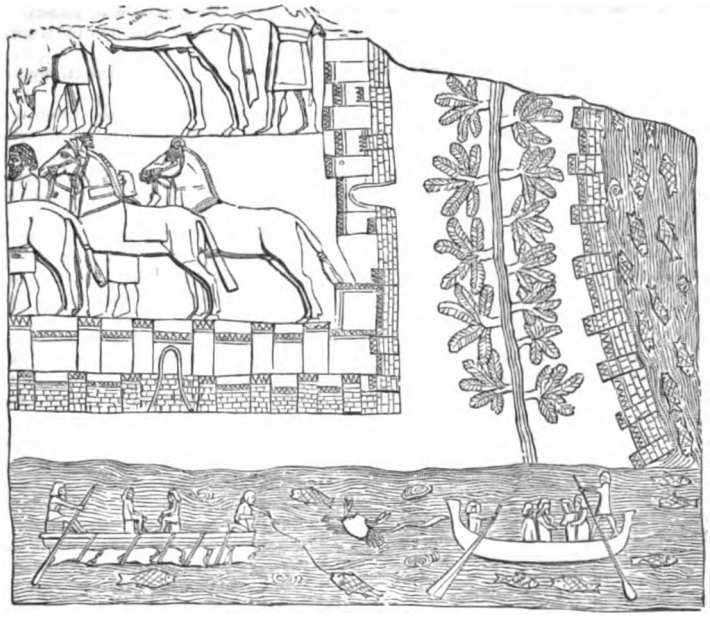
A further characteristic of a city as a fortified place is found in the use of the word בָּנָה, *build*, and also *fortify*. So that to "build" a city appears to be sometimes the same thing as to fortify it (comp. Gen. viii. 20, and 2 Chr. xvi. 6 with 2 Chr. xi. 5–10, and 1 K. xv. 17).

The fortifications of the cities of Palestine, thus regularly "fenced," consisted of one or more walls crowned with battlemented parapets, גֶּדֶר, having towers at regular intervals (2 Chr. xxxii. 5; Jer. xxxi. 38), on which in later times engines of war were placed, and watch was kept by day and night in time of war (2 Chr. xxvi. 9, 15; Judg. ix. 45; 2 K. ix. 17). Along the oldest of the three walls

Walls of Antioch, remarkable for their strength, and the manner in which they are carried up and down the sides of mountains.



of Jerusalem there were 90 towers; in the second, 14; and in the third, 60 (Joseph. *B. J.* v. 4, § 2). One such tower, that of Hananeel, is repeatedly mentioned (Jer. xxxi. 38; Zech. xiv. 10), as also others (Neh. iii. 1, 11, 27). The gate-ways of fortified towns were also fortified and closed with strong doors (Neh. ii. 8, iii. 3, 6, &c.; Judg. xvi. 2, 3; 1 Sam. xxiii. 7; 2 Sam. xviii. 24, 33; 2 Chr. xiv. 7; 1 Macc. xiii. 33, xv. 39). In advance of the wall there appears to have been sometimes an outwork (חֵיל, προτείχισμα), in A. V. "ditch" (1 K. xxi. 23; 2 Sam. xx. 15; Ges. *Thes.* p. 454), which was perhaps either a palisade or wall lining the ditch, or a wall raised midway within the ditch itself. Both of these methods of strengthening fortified places, by hindering the near approach of machines, were usual in earlier Egyptian fortification (Wilkinson, *Anc. Egypt.* i. 408), but would generally be of less use in the hill forts of Palestine than in Egypt. In many towns there was a keep or citadel for a last resource to the defenders. Those remaining in the *Hauran* and *Ledja* are square. Such existed at Shechem and Thebez (Judg. ix. 46, 51, viii. 17; 2 K. ix. 17), and the great forts or towers of Psephinus, Hippicus, and especially Antonia, served a similar purpose, as well as that of overawing the town at Jerusalem. These forts were well furnished with cisterns (Acts xxi. 34; 2 Macc. v. 5; Joseph. *Ant.* xviii. 4, § 3; *B. J.* i. 5, § 4, v. 4, § 2, vi. 2, § 1). At the time of the entrance of Israel into Canaan there were many fenced cities existing, which first caused great alarm to the exploring party of searchers (Num. xiii. 28), and afterwards gave much trouble to the people in subduing them. Many of these were refortified, or, as it is expressed, rebuilt by the Hebrews (Num. xxxii. 17, 34–42; Deut. iii. 4, 5; Josh. xi. 12, 13; Judg. i. 27–33), and many, especially those on the sea-coast, remained for a long time in the possession of their inhabitants, who were enabled to preserve them by means of their strength in chariots (Josh. xiii. 3, 6, xvii. 16; Judg. i. 19; 2 K. xviii. 8; 2 Chr. xxvi. 6). The strength of Jerusalem was shown by the fact that that city, or at least the citadel, or "stronghold of Zion," remained in the possession of the Jebusites until the time of David (2 Sam. v. 6, 7; 1 Chr. xi. 5). Among the kings of Israel and Judah several are mentioned as fortifiers or "builders" of cities: Solomon (1 K. ix. 17–19; 2 Chr. viii. 4–6), Jeroboam I. (1 K. xii. 25), Rehoboam (2 Chr. xi. 5, 12), Baasha (1 K. xv. 17), Omri (1 K. xvi. 24), Hezekiah (2 Chr. xxxii. 5), Asa (2 Chr. xiv. 6, 7), Jehoshaphat (2 Chr. xvii. 12), but especially Uzziah (2 K. xiv. 22; 2 Chr. xxvi. 2, 9, 15), and in the reign of Ahab the town of Jericho was rebuilt and fortified by a private individual, Hiel of Bethel (1 K. xvi. 34). Herod the Great was conspicuous in fortifying strong positions, as Masada, Machærus, Herodium, besides his great works at Jerusalem (Joseph. *B. J.* vii. 6, §§ 1, 2, and 8, § 3; *B. J.* i. 21, § 10; *Ant.* xiv. 13, 9).

But the fortified places of Palestine served only in a few instances to check effectually the progress of an invading force, though many instances of determined and protracted resistance are on record, as of Samaria for three years (2 K. xviii. 10), Jerusalem (2 K. xxv. 3) for four months, and in later times of Jotapata, Gamala, Machærus, Masada, and above all Jerusalem itself, the strength of whose defenses drew forth the admiration of the conqueror Titus (Joseph. *B. J.* iii. 6, iv. 1 and 9, vii. 6, §§ 2–4 and 8; Robinson, i. 232).

Assyrian Fortifications. (Layard.)

The earlier Egyptian fortifications consisted usually of a quadrangular and sometimes double wall of sun-dried brick, fifteen feet thick, and often fifty feet in height, with square towers at intervals, of the same height as the walls, both crowned with a parapet, and a round-headed battlement in shape like a shield. A second lower wall with towers at the entrance was added, distant 13 or 20 feet from the main wall, and sometimes another was made of 70 or 100 feet in length, projecting at right angles from the main wall to enable the defenders to annoy the assailants in flank. The ditch was sometimes fortified by a sort of tenaille in the ditch itself, or a ravelin on its edge. In later times the practice of fortifying towns was laid aside, and the large temples with their inclosures were made to serve the purpose of forts (Wilkinson, *Anc. Egypt.* i. 408, 409, abridgm.).

The fortifications of Nineveh, Babylon, Ecbatana, and of Tyre and Sidon, are all mentioned, either in the canonical books or the Apocrypha. In the sculptures of Nineveh representations are found of walled towns, of which one is thought to represent Tyre, and all illustrate the mode of fortification adopted both by the Assyrians and their enemies (Jer. li. 30–32, 58; Am. i. 10; Zech. ix. 3; Ez. xxvii. 11; Nah. iii. 14; Tob. i. 17, xiv. 14, 15; Jud. i. 1, 4; Layard, *Nin.* vol. ii. pp. 275, 279, 388, 395; *Nin. & Bab.* pp. 231, 358; *Mon. of Nin.* pt. ii. 39, 43). H. W. P.

FERRET (אַנָקָה: μυγαλή: *mygale*), one of the unclean creeping things mentioned in Lev. xi. 30. The μυγαλή of Aristotle (*Hist. An.* viii. 24) is the *Mus araneus*, or shrew-mouse; but it is more probable that the animal referred to in Lev. was a reptile of the lizard tribe, deriving its name from the mournful cry, or wail, which some lizards utter. The root is אָנַק, *to sigh* or *groan*. The Rabbinical writers seem to have identified this animal with the hedgehog: see Lewysohn, *Zoöl. des Talmuds*, §§ 129, 134. W. D.

FESTIVALS (חַגִּים).[a] The object of this article is merely to give a classification of the sacred times of the Hebrews, accompanied by some general remarks. A particular account of each festival is given in its proper place.

I. The religious times ordained in the Law fall under three heads: (1.) Those formally connected with the institution of the Sabbath. (2.) The historical or great festivals. (3.) The Day of Atonement.

(1.) Immediately connected with the institution of the Sabbath are —

(*a.*) The weekly Sabbath itself.

(*b.*) The seventh new moon or Feast of Trumpets.

(*c.*) The Sabbatical Year.

(*d.*) The Year of Jubilee.

(2.) The great feasts (מוֹעֲדִים; in the Talmud, רְגָלִים, *pilgrimage feasts*) are —

(*a.*) The Passover.

(*b.*) The Feast of Pentecost, of Weeks, of Wheat-harvest, or of the First-Fruits.

(*c.*) The Feast of Tabernacles, or of Ingathering.

On each of these occasions every male Israelite was commanded "to appear before the Lord," that is, to attend in the court of the tabernacle or the Temple, and to make his offering with a joyful heart (Deut. xxvii. 7; Neh. viii. 9–12; cf. Joseph. *Ant.* xi. 5, § 5). The attendance of women was voluntary, but the zealous often went up to the

[a] The original meaning of the word חָג is a "dance." The modern Arabic term *Hadj* is derived from the same root (Gesen. *Thes.* p. 444).

Digitized by Google

Passover. Thus Mary attended it (Luke ii. 41), and Hannah (1 Sam. i. 7, ii. 19). As might be supposed, there was a stricter obligation regarding the Passover than the other feasts, and hence there was an express provision to enable those who, by unavoidable circumstances or legal impurity, had been prevented from attending at the proper time, to observe the feast on the same day of the succeeding month (Num. ix. 10–11).

On all the days of Holy Convocation there was to be an entire suspension of ordinary labor of all kinds (Ex. xii. 16; Lev. xvi. 29, xxiii. 21, 24, 25, 35). But on the intervening days of the longer festivals work might be carried on.[a]

Besides their religious purpose, the great festivals must have had an important bearing on the maintenance of a feeling of national unity. This may be traced in the apprehensions of Jeroboam (1 K. xii. 26, 27), and in the attempt at reformation by Hezekiah (2 Chr. xxx. 1), as well as in the necessity which, in later times, was felt by the Roman government of mustering a considerable military force at Jerusalem during the festivals (Joseph. *Ant.* xvii. 9, § 3, xvii. 10, § 2; cf. Matt. xxvi. 5; Luke xiii. 1).

The frequent recurrence of the sabbatical number in the organization of these festivals is too remarkable to be passed over, and (as Ewald has observed) seems, when viewed in connection with the sabbatical sacred times, to furnish a strong proof that the whole system of the festivals of the Jewish law was the product of one mind. Pentecost occurs seven weeks after the Passover; the Passover and the Feast of Tabernacles last seven days each; the days of Holy Convocation are seven in the year — two at the Passover, one at Pentecost, one at the Feast of Trumpets, one on the Day of Atonement, and two at the Feast of Tabernacles; the Feast of Tabernacles, as well as the Day of Atonement, falls in the seventh month of the sacred year; and, lastly, the cycle of annual feasts occupies seven months, from Nisan to Tisri.

The agricultural significance of the three great festivals is clearly set forth in the account of the Jewish sacred year contained in Lev. xxiii. The prominence which, not only in that chapter but elsewhere, is given to this significance, in the names by which Pentecost and Tabernacles are often called, and also by the offering of "the first-fruits of wheat-harvest" at Pentecost (Ex. xxxiv. 22), and of "the first of the first-fruits" at the Passover (Ex. xxiii. 19, xxxiv. 26), might easily suggest that the origin of the feasts was patriarchal (Ewald, *Alterthümer*, p. 385), and that the historical associations with which Moses endowed them were grafted upon their primitive meaning. It is perhaps, however, a difficulty in the way of this view, that we should rather look for the institution of agricultural festivals amongst an agricultural than a pastoral people, such as the Israelites and their ancestors were before the settlement in the land of promise.

The times of the festivals were evidently ordained in wisdom, so as to interfere as little as possible with the industry of the people. The Passover was held just before the work of harvest commenced, Pentecost at the conclusion of the corn-harvest and before the vintage, the Feast of Tabernacles after all the fruits of the ground were gathered in. In winter, when travelling was difficult, there were no festivals.

(3.) For the Day of Atonement, see that article.

II. After the Captivity, the Feast of Purim (Esth. ix. 20 ff.) and that of the Dedication (1 Macc. iv. 56) were instituted. The Festivals of Wood-carrying, as they were called (ἑορταὶ τῶν ξυλοφορίων), are mentioned by Josephus (*B. J.* ii. 17, § 6) and the Mishna (*Taanith*, iv. 5). What appears to have been their origin is found in Neh. x. 34. The term, "the Festival of the Basket" (ἑορτὴ καρτάλλου) is applied by Philo to the offering of first-fruits described in Deut. xxvi. 1-11 (Philo, vol. v. p. 51). [FIRST-FRUITS.]

The system of the Hebrew festivals is treated at large by Bähr (*Symbolik des Mosaischen Cultus*, bk. iv.), by Ewald (*Alterthümer*, p. 379 ff.), and by Philo, in a characteristic manner (Περὶ τῆς Ἑβδόμης, *Opp.* vol. v. p. 21, ed. Tauch.).

S. C.

FES'TUS, POR'CIUS (Πόρκιος Φῆστος, Acts xxiv. 27), successor of Felix as procurator of Judæa (Acts *l. c.*; Joseph. *Ant.* xx. 8, § 9; *B. J.* ii. 14, § 1), sent by Nero, probably in the autumn of the year 60 A. D. (See FELIX.) A few weeks after Festus reached his province he heard the cause of St. Paul, who had been left a prisoner by Felix, in the presence of Herod Agrippa II. and Bernice his sister. Not finding anything in the Apostle worthy of death or of bonds, and being confirmed in this view by his guests, he would have set him free had it not been that Paul had himself previously (Acts xxv. 11, 12) appealed to Cæsar. In consequence, Festus sent him to Rome. Judæa was in the same disturbed state during the procuratorship of Festus, which had prevailed through that of his predecessor. Sicarii, robbers, and magicians were put down with a strong hand (*Ant.* xx. 8, § 10). Festus had a difference with the Jews at Jerusalem about a high wall which they had built to prevent Agrippa seeing from his palace into the court of the Temple. As this also hid the view of the Temple from the Roman guard appointed to watch it during the festivals, the procurator took strongly the side of Agrippa; but permitted the Jews to send to Rome for the decision of the emperor. He being influenced by Poppæa, who was a proselyte, decided in favor of the Jews. Festus died probably in the summer of 62 A. D., having ruled the province less than two years. The chronological questions concerning his entrance on the province and his death are too intricate and difficult to be entered on here, but will be found fully discussed by Anger, *de temporum in Act. Apost. ratione*, p. 99 ff., and Wieseler, *Chronologie der Apostelgeschichte*, pp. 89–99. Josephus implies (*B. J.* ii. 14, § 1) that Festus was a just as well as an active magistrate. H. A.

* A question arises under this name respecting Luke's accuracy.

Could Festus in the reign of Nero call the emperor *his lord* in accordance with Roman usage, as he is said to have done, Acts xxv. 26? A free Roman under the republic never called any one his κύριος or *dominus*, which Latin word, denoting

a The Law always speaks of the Days of Holy Convocation as Sabbaths. But the Mishna makes a distinction, and states in detail what acts may be performed on the former, which are unlawful on the Sabbath, in the treatise *Yom Tob*; while in Moed *Katon* it lays down strange and burdensome conditions in reference to the intermediate days

house master, slave-master, is the equivalent of δεσπότης, and in a degree of κύριος. If *dominus*, now, at a subsequent period could be so used, much more κύριος could be. That it could be and was so used we have the means of showing. Under Augustus, when a mime in the theatre uttered the words, "O dominum aequum et bonum," the audience applied it to the emperor and expressed loud applause (Sueton. *August.* § 53). Augustus rebuked the use of the term, but could not repress it, nor could Tiberius prevent its application to himself (Sueton. *Tiber.* § 27; Tac. *Ann.* ii. 87). Philo, in his account of his legation to Caligula, makes Herod Agrippa call that emperor δεσπότης, and even Philo's fellow-delegates address him as κύριος. Afterwards, in addressing the emperor, it became much more frequent. The letters of Pliny to Trajan, and those of Fronto to Marcus Aurelius before his accession to the imperial power, begin with *domino meo*. So in addresses to a crowd, to unknown and even to known persons of no very high rank the same title was given, and that during the reign of Nero himself (Dion Cass. lxi. 20). The lapidary style from Tiberius onward follows in the same track. The earliest use of *dominus*, as a title of the emperor, on inscriptions belongs to the age of Domitian, but κύριος, especially on Egyptian marbles, is the emperor's title of honor in very many instances, and from an earlier date. Thus Nero was so called. Moreover children called their parents so, and friends each other. "Illud mihi in ore erat *domini mei* Gallionis," says Seneca under Nero, speaking of his brother the "deputy of Achaia" (*Epist.* 104). These remarks serve to show the wonderful accuracy of Luke in the Acts, of which accuracy all new study is constantly furnishing additional proof. See a copious discussion of this topic in the *Bibl. Sacra*, xviii. 595–608.

T. D. W.

FETTERS (זִקִּים, נְחֻשְׁתַּיִם, כֶּבֶל). (1.) The first of these Hebrew words, *nechushtaim*, expresses the material of which fetters were usually made, namely, *brass* (πέδαι χαλκαί: A. V. "fetters of brass"), and also that they were made in *pairs*, the word being in the dual number: it is the most usual term for fetters (Judg. xvi. 21; 2 Sam. iii. 34; 2 K. xxv. 7; 2 Chr. xxxiii. 11, xxxvi. 6; Jer. xxxix. 7, lii. 11). Iron was occasionally employed for the purpose (Ps. cv. 18, cxlix. 8). (2.) *Cebel* occurs only in the above Psalms, and, from its appearing in the singular number, may perhaps apply to the link which connected the fetters. *Zikkim* ("fetters," Job xxxvi. 8) is more usually translated "chains" (Ps. cxlix. 8; Is. xlv. 14; Nah. iii. 10), but its radical sense appears to refer to the *contraction* of the feet by a chain (Gesen. *Thes.* p. 424). [Fetters of iron (πέδαι) are probably meant in Mark v. 4 *bis* and Luke viii. 29. See CHAINS. H.]

W. L. B.

FEVER (חַרְחֹר, דַּלֶּקֶת, קַדַּחַת: πυρετός, ῥῖγος, ἐρεθισμός; Lev. xxvi. 16, Deut. xxviii. 22). These words, from various roots[a] signifying heat or inflammation, are rendered in the A. V. by various words suggestive of fever, or a feverish affection. The word ῥῖγος ("shuddering") suggests the ague as accompanied by fever, as in the opinion of the LXX. probably intended; and this is still a very common disease in Palestine; the third word, which they render ἐρεθισμός (a term still known to pathology), a feverish irritation, and which in the A. V. is called burning fever, may perhaps be erysipelas. Fever constantly accompanies the bloody flux, or dysentery (Acts xxviii. 8; comp. De Mandelslo, *Travels*, ed. 1669, p. 65). Fevers of an inflammatory character are mentioned (Burckhardt, *Arab.* i. 446) as common at Mecca, and putrid ones at Djidda. Intermittent fever and dysentery, the latter often fatal, are ordinary Arabian diseases. For the former, though often fatal to strangers, the natives care little, but much dread a relapse. These fevers sometimes occasion most troublesome swellings in the stomach and legs (ii. 290, 291).

H. H.

FIELD (שָׂדֶה). The Hebrew *sadeh* is not adequately represented by our *field:* the two words agree in describing *cultivated* land, but they differ in point of extent, the *sadeh* being specifically applied to what is *uninclosed*, while the opposite notion of inclosure is involved in the word *field*. The essence of the Hebrew word has been variously taken to lie in each of these notions, Gesenius (*Thes.* p. 1321) giving it the sense of *freedom*, Stanley (p. 490) that of *smoothness*, comparing *arvum* from *arare*. On the one hand *sadeh* is applied to any cultivated ground, whether pasture (Gen. xxix. 2, xxxi. 4, xxxiv. 7; Ex. ix. 3), tillage (Gen. xxxvii. 7, xlvii 24; Ruth ii. 2, 3; Job xxiv. 6; Jer. xxvi. 18; Mic. iii. 12), woodland (1 Sam. xiv. 25, A. V. "ground"; Ps. cxxxii. 6), or mountain-top (Judg. ix. 32, 36; 2 Sam. i. 21); and in some instances in marked opposition to the neighboring wilderness (Stanley, pp. 236, 490), as in the instance of Jacob settling in the field of Shechem (Gen. xxxiii. 19), the field of Moab (Gen. xxxvi. 35; Num. xxi. 20, A. V. "country"; Ruth i. 1), and the vale of Siddim, i. e. *of the cultivated fields*, which formed the oasis of the Pentapolis (Gen. xiv. 3, 8), though a different sense has been given to the name (by Gesenius, *Thes.* p. 1321). On the other hand the *sadeh* is frequently contrasted with what is inclosed, whether a vineyard (Ex. xxii. 5; Lev. xxv. 3, 4; Num. xvi 14, xx. 17; compare Num. xxii. 23, "the ass went into the field," with verse 24, "a path of the vineyards, a wall being on this side and a wall on that side"), a garden (the very name of which, גַּן, implies inclosure), or a walled town (Deut. xxviii. 3, 16); unwalled villages or scattered houses ranked in the eye of the law as fields (Lev. xxv. 31), and hence the expression εἰς τοὺς ἀγρούς = *houses in the fields* (*in villis*, Vulg.; Mark vi. 36, 56). In many passages the term implies what is remote from a house (Gen. iv. 8, xxiv. 63; Deut. xxii. 25) or settled habitation, as in the case of Esau (Gen. xxv. 27; the LXX., however, refer it to his character, ἀγροῖκος): this is more fully expressed by פְּנֵי הַשָּׂדֶה, *the open field* (Lev. xiv. 7, 53, xvii. 5; Num. xix. 16; 2 Sam. xi. 11), with which is naturally coupled the notion of exposure and desertion (Jer. ix. 22; Ez. xvi. 5, xxxii. 4, xxxiii. 27, xxxix. 5).

The separate plots of ground were marked off by stones, which might easily be removed (Deut. xix.

[a] Winer suggests the Arabic حَرْحَر which he renders *Stickfluss*, i. e. choking phlegm. It rather seems to mean the frothing at the mouth which accompanies the violent religious exercitations of the fanatical Arabs on the occasion of the festival of the Nebi-Mousa.

Digitized by Google

14, xxvii. 17; cf. Job xxiv. 2; Prov. xxii. 28, xxiii. 10): the absence of fences rendered the fields liable to damage from straying cattle (Ex. xxii. 5) or fire (ver. 6; 2 Sam. xiv. 30): hence the necessity of constantly watching flocks and herds, the people so employed being in the present day named *Natoor* (Wortabet, *Syria*, i. 293). A certain amount of protection was gained by sowing the tallest and strongest of the grain crops on the outside: "spelt" appears to have been most commonly used for this purpose (Is. xxviii. 25, as in the margin). From the absence of inclosures, cultivated land of any size might be termed a field, whether it were a piece of ground of limited area (Gen. xxiii. 13, 17; Is. v. 8), a man's whole inheritance (Lev. xxvii. 16 ff.; Ruth iv. 5; Jer. xxxii. 9, 25; Prov. xxvii. 26, xxxi. 16), the *ager publicus* of a town (Gen. xli. 48; Neh. xii. 29), as distinct, however, from the ground immediately adjacent to the walls of the Levitical cities, which was called מִגְרָשׁ (A. V. *suburbs*), and was deemed an appendage of the town itself (Josh. xxi. 11, 12), or lastly the territory of a people (Gen. xiv. 7, xxxii. 3, xxxvi. 35; Num. xxi. 20; Ruth i. 6, iv. 3; 1 Sam. vi. 1, xxvii. 7, 11). In 1 Sam. xxvii. 5, "a town in the field" (A. V. *country*) = a provincial town as distinct from the royal city. A plot of ground separated from a larger one was termed חֶלְקַת שָׂדֶה (Gen. xxxiii. 19; Ruth ii. 3; 1 Chr. xi. 13), or simply חֶלְקָה (2 Sam. xiv. 30, xxiii. 12; cf. 2 Sam. xix. 29). Fields occasionally received names after remarkable events, as Helkath-Hazzurim, *the field of the strong men*, or possibly *of swords* (2 Sam. ii. 16), or from the use to which they may have been applied (2 K. xviii. 17; Is. vii. 3; Matt. xxvii. 7).

It should be observed that the expressions "fruitful field" (Is. x. 18, xxix. 17, xxxii. 15, 16) and "plentiful field" (Is. xvi. 10; Jer. xlviii. 33) are not connected with *sadeh*, but with *carmel*, meaning a park or well-kept wood, as distinct from a wilderness or a forest. The same term occurs in 2 K. xix. 23, and Is. xxxvii. 24 (A. V. *Carmel*), Is. x. 18 (*forest*), and Jer. iv. 26 (*fruitful place*) [CARMEL]. Distinct from this is the expression in Ez. xvii. 5, שְׂדֵה־זֶרַע (A. V. *fruitful field*), which means a field suited for planting suckers.

We have further to notice other terms — (1.) *Shedemoth* (שְׁדֵמוֹת), translated "fields," and connected by Gesenius with the idea of *inclosure*. It is doubtful, however, whether the notion of *burning* does not rather lie at the bottom of the word. This gives a more consistent sense throughout. In Is. xvi. 8, it would thus mean the *withered* grape; in Hab. iii. 17, *blasted* corn; in Jer. xxxi. 40, the *burnt* parts of the city (no "fields" intervened between the southeastern angle of Jerusalem and the Kidron); while in 2 K. xxiii. 4, and Deut. xxxii. 32, the sense of a *place of burning* is appropriate. It is not therefore necessary to treat the word in Is. xxxvii. 27, "blasted," as a corrupt reading. (2.) *Abel* (אָבֵל), a well-*watered* spot, frequently employed as a prefix in proper names. (3.) *Achu* (אָחוּ), a word of Egyptian origin, even in the LXX. in a Græcised form, ἄχει (Gen. xli. 2, 18, "meadow;" Job viii 11, "flag;" Is. xix. 7, LXX.), meaning the flags and rushes that grow in the marshes of lower Egypt. (4.) *Meerah* (מְעָרָה), which occurs only once (Judg. xx. 33 "meadows"): it has been treated as a corruption either of מְעָרָה, *cave*, or מֵעֲרָב, *from the west* (ἀπὸ δυσμῶν, LXX.). But the sense of *openness* or *exposure* may be applied to it: thus, "they came forth on account of the *exposure* of Gibeah," the Benjamites having been previously enticed away (ver. 31). W. L. B.

* This practice of leaving the fields of different proprietors uninclosed, or separated only by a narrow foot-path, explains other Scripture statements or allusions. Thus the sower, scattering his seed as he approaches the end or side of his own lot, is liable to have some of the grains fall beyond the ploughed portion; and there, exposed on the hard earth (see Matt. xiii. 4), the fowls may come and devour them up. In this way also we may understand the Saviour's passing with his disciples through the corn-fields on the Sabbath. Instead of crossing the fields and trampling down the grain, they no doubt followed one of these paths between the fields, where the grain stood within their reach. The object being to appease their hunger, the "plucking of the ears of corn to eat" was not, according to Jewish ideas, a violation of the rights of property, nor was it for that that the Pharisees complained of the disciples, but for breaking the Sabbath (Luke vi. 1 ff.). The people of Palestine grant the same liberty to the hungry at the present time (Rob. *Bibl. Res.* ii. 192). Ruth, it is said, gleaned in "a part of the field belonging to Boaz" (Ruth ii. 3). We are to think of an open cultivated tract of country, the property of various owners, and the particular part of this uninclosed field to which the steps of the gleaner brought her, was the part which belonged to Boaz.

In the N. T., "fields" (ἀγροί) occasionally means farm-houses or hamlets, in distinction from villages and towns. See Mark v. 14, vi. 36, 56, where we have "country" in the A. V. H.

* **FIELD, FULLER'S, THE.** [FULLER'S FIELD, THE.]

* **FIELD, POTTER'S, THE.** [ACELDAMA; POTTER'S FIELD, THE.]

FIG, FIG-TREE, תְּאֵנָה, a word of frequent occurrence in the O. T., where it signifies the tree *Ficus carica* of Linnæus, and also its fruit. The LXX. render it by συκῆ and σῦκον, and when it signifies fruit by συκή [?]—also by συκεών or συκών, *ficetum*, in Jer. v. 17 and Am. iv. 9. In N. T. συκῆ is the fig-tree, and σῦκα the figs (Jam. iii. 12). The fig-tree is very common in Palestine (Deut. viii. 8). Mount Olivet was famous for its fig-trees in ancient times, and they are still found there (see Stanley, *S. & P.* pp. 187, 421, 422). "To sit under one's own vine and one's own fig-tree" became a proverbial expression among the Jews to denote peace and prosperity (1 K. iv. 25; Mic. iv. 4; Zech. iii. 10). The character of the tree, with its wide-spreading branches, accords well with the derivation of the name from תָּאַן to stretch out, *porrexit brachia*. In Gen. iii. 7 the identification of עֲלֵה תְאֵנָה with the leaves of the *Ficus carica* has been disputed by Gesenius, Tuch, and others, who think that the large leaves of the Indian *Musa paradisiaca* are meant (Germ. *Adamsfeige* — Fr. *figuier d'Adam*). These

Digitized by Google

saves, however, would not have needed to be strung or sewn together, and the plant itself is not of the same kind with the fig-tree.

When figs are spoken of as distinguished from the fig-tree, the plur. form תְּאֵנִים is used (see Jer. viii. 13). There are also the words פַּגָּה, פֶּג, and דְּבֵלָה, signifying different kinds of figs. (*a.*) In Hos. ix. 10, פַּגָּה בִּתְאֵנָה signifies *the first ripe of the fig-tree*, and the same word occurs in Is. xxviii. 4, and in Mic. vii. 1 (comp. Jer. xxiv. 2). Lowth, on Is. xxviii. 4, quotes from Shaw's *Trav.* p. 370, fol., a notice of the early fig called *boccôre*, and in Spanish *Albacora*. (*b.*) בֶּג is the unripe fig, which hangs through the winter. It is mentioned only in Cant. ii. 13, and its name comes from the root בָּגַג, *crudus fuit*. The LXX. render it ὄλυνθοι. It is found in the Greek word Βηθφαγή = בֵּית פַּאגֵי, "house of green figs" (see Buxt. col. 1691).

(*c.*) In the historical books of the O. T. mention is made of cakes of figs, used as articles of food, and compressed into that form for the sake of keeping them. They also appear to have been used remedially for boils (2 K. xx. 7; Is. xxxviii. 21). Such a cake was called דְּבֵלָה, or more fully דְּבֶלֶת תְּאֵנִים, on account of its shape, from root דָּבַל, to make round. Hence, or rather from the Syriac דבלתא, the first letter being dropt, came the Greek word παλάθη. Athenæus (xi. 500, ed. Casaub.) makes express mention of the παλάθη Συριακή. Jerome on Ez. vi. describes the παλάθη, to be a mass of figs and rich dates, formed into the shape of bricks or tiles, and compressed in order that they may keep. Such cakes harden so as to need cutting with an axe. W. D.

Fig — *Ficus carica.*

Few passages in the Gospels have given occasion to so much perplexity as that of St. Mark xi. 13, where the Evangelist relates the circumstance of our Lord's cursing the fig-tree near Bethany: "And seeing a fig-tree afar off having leaves he came, if haply he might find anything thereon, and when he came to it, he found nothing but leaves; *for the time of figs was not yet.*" The apparent unreasonableness of seeking fruit at a time when none could naturally be expected, and the consequent injustice of the sentence pronounced upon the tree, is obvious to every reader.

The fig-tree (*Ficus carica*) in Palestine produces fruit at two, or even three different periods of the year: first, there is the *biccûrâh*, or "early ripe fig," frequently mentioned in the O. T. (see Mic. vii. 1; Is. xxviii. 4; Hos. ix. 10), which ripens on an average towards the end of June, though in favorable places of soil or temperature the figs may ripen a little earlier, while under less favorable circumstances they may not be matured till the middle of July. The *biccûrâh* drops off the tree as soon as ripe; hence the allusion in Nah. iii. 12, when shaken they "even fall into the mouth of the eater." Shaw (*Trav.* i. 264, 8vo ed.) aptly compares the Spanish name *breba* for this early fruit, "quasi breve," as continuing only for a short time. About the time of the ripening of the *biccûrim*, the *kaiumâse* or summer fig begins to be formed; these rarely ripen before August, when another crop, called "the winter fig," appears. Shaw describes this kind as being of a much longer shape and darker complexion than the *kaimouse*, hanging and ripening on the tree even after the leaves are shed, and, provided the winter proves mild and temperate, as gathered as a delicious morsel in the spring. (Comp. also Pliny, *H. N.* xvi. 26, 27.)

The attempts to explain the above-quoted passage in St. Mark are numerous, and for the most part very unsatisfactory; passing over, therefore, the ingenious though objectionable reading proposed by Dan. Heinsius (*Exercit. Sac.* ed. 1639, p. 116) of οὗ γὰρ ἦν, καιρὸς σύκων — "where he was, it was the season for figs" — and merely mentioning another proposal to read that clause of the evangelist's remark as a question, "for was it not the season of figs?" and the no less unsatisfactory rendering of Hammond (*Annot. on St. Mark*), "it was not a good season for figs," we come to the interpretations which, though not perhaps of recent origin, we find in modern works.

The explanation which has found favor with most writers is that which understands the words καιρὸς σύκων to mean "the fig-harvest;" the γάρ in this case is referred not to the clause immediately preceding, "he found nothing but leaves," but to the more remote one, "he came if haply he might find anything thereon;" for a similar *trajection* it is usual to refer to Mark xvi. 3, 4: the sense of the whole passage would then be as follows: "And seeing a fig-tree afar off having leaves, he came if perchance he might find any fruit on it (and he ought to have found some), for the time of gathering it had not yet arrived, but when he came he found nothing but leaves.' (See the notes in the Greek Testaments of Burton, Trollope, Bloomfield, Webster and Wilkinson; Macknight, *Harm. of the Gospels*, ii. 591, note, 1809; Elsley's *Annot.* ad l. c., &c.) A forcible objection to this explanation will be found in the fact that at the time implied, namely, the end of March or the beginning of April, no figs

Digitized by Google

at all eatable would be found on the trees: the *bicurim* seldom ripen in Palestine before the end of June, and at the time of the Passover the fruit, to use Shaw's expression, would be "hard and no bigger than common plums," corresponding in this state to the *paggim* (פַּגִּים) of Cant. ii. 13, wholly unfit for food in an unprepared state, and it is but reasonable to infer that our Lord expected to find something more palatable than these small sour things upon a tree which by its show of foliage bespoke, though falsely, a corresponding show of good fruit, for it is important to remember that *the fruit comes before the leaves*. Again, if καιρός denotes the "fig-harvest," we must suppose, that although the fruit might not have been ripe, the season was not very far distant, and that the figs in consequence must have been considerably more matured than these hard *paggim;* but is it probable that St. Mark should have thought it necessary to state that it was not yet the season for gathering figs in March, when they could not have been fit to gather before June at the earliest?

There is another way of seeking to get over the difficulty, by supposing that the tree in question was not of the ordinary kind. Celsius (*Hierob.* ii. 385) says there is a peculiar fig-tree known to the Jews by the name of *Benoth-shuach* (בנות שוח), which produces *grossuli*, "small unripe figs" (*paggim*) every year, but only good fruit every third year; and that our Lord came to this tree at a time when the ordinary annual *grossuli* only were produced! We are ignorant as to what tree the *Benoth-shuach* may denote, but it is obvious that the apparent *unreasonableness* remains as it was.

As to the tree which Whitby (*Comment. in Mark*, l. c.) identifies with the one in question, that it was that kind which Theophrastus (*Hist. Plant.* iv. 2, § 4) calls ἀειφυλλον, "evergreen," it is enough to observe that this is no fig at all, but the Carob or Locust tree (*Ceratonia siliqua*).

It appears to us, after a long and diligent study of the whole question, that the difficulty is best met by looking it full in the face, and by admitting that the words of the evangelist are to be taken in the natural order in which they stand, neither having recourse to *trajection*, nor to unavailable attempts to prove that eatable figs could have been found on the trees in March. It is true that occasionally the winter figs remain on the tree in mild seasons, and may be gathered the following spring, but this is not to be considered a usual circumstance; and even *these* figs, which ripen late in the year, do not, in the natural order of things, continue on the tree at a time when it is shooting forth its leaves.

But, after all, where is the *unreasonableness* of the whole transaction? It was stated above that the fruit of the fig-tree appears before the leaves; consequently if the tree produced leaves it should also have had some figs as well. As to what natural causes had operated to effect so unusual a thing as for a fig-tree to have leaves in March, it is unimportant to inquire; but the stepping out of the way with the possible chance (εἰ ἄρα, *si forte*, 'under the circumstances;" see Winer, *Gram. of N. T. Diction*, p. 465, Masson's transl.) of finding eatable fruit on a fig-tree in leaf at the end of March, would probably be repeated by any observant modern traveller in Palestine. The whole question turns on the *pretensions* of the tree; had it not proclaimed by its foliage its superiority over other fig-trees, and thus proudly exhibited its *precociousness*, had our Lord at that season of the year visited any of the other fig-trees upon which no leaves had as yet appeared with the prospect of finding fruit, — then the case would be altered, and the unreasonableness and injustice real. The words of St. Mark, therefore, are to be understood in the sense which the order of the words naturally suggests. The evangelist gives the reason why no fruit *was* found on the tree, namely, "because it was not the time for fruit;" we are left to infer the reason why it *ought to have had* fruit if it were true to its pretensions; and it must be remembered that this miracle had a typical design, to show how God would deal with the Jews, who, professing like this precocious fig-tree "to be first," should be "last" in his favor, seeing that no fruit was produced in their lives, but only, as Wordsworth well expresses it, "the rustling leaves of a religious profession, the barren traditions of the Pharisees, the ostentatious display of the Law, and vain exuberance of words without the good fruit of works."

Since the above was written we have referred to Trench's *Notes on the Miracles* (p. 438), and find that this writer's remarks are strongly corroborative of the views expressed in this article. The following observation is so pertinent that we cannot do better than quote it: "All the explanations which go to prove that, according to the natural order of things in a climate like that of Palestine, there might have been, even at this early time of the year, figs on that tree, either winter figs which had survived till spring, or the early figs of spring themselves — all these, ingenious as they often are, yet seem to me beside the matter. For, without entering further into the question whether they prove their point or not, they shatter upon that οὐ γὰρ ἦν καιρὸς σύκων of St. Mark; *from which it is plain that no such calculation of probabilities brought the Lord thither, but those abnormal leaves which he had a right to count would have been accompanied with abnormal fruit.*" See also Trench's admirable reference to Ez. xvii. 24. W. H.

* Lange (*Bibelwerk*, ii. 116) adopts the *trajection* view, mentioned in the preceding article. In the οὐ γὰρ clause, he finds in effect a reason, not why Jesus should not have expected to find figs on the tree (namely, because it was not the time for figs to be ripe), but just the reverse, *i. e.* why he might be expected to have found them (since the leaves had come) provided it was not so late in the season that they had been gathered. Mark states, therefore, essentially for the reader's information, that this reason for the disappointment (οὐ γὰρ ἦν καιρὸς σύκων) did not exist, and hence the deceitful tree could justly serve as a fit symbol of false professors of the gospel. The season for the harvesting of figs differs in different lands. Hence Mark's foreign readers (he only gives the explanation) would need to be informed, that it was not, in this particular instance, too early for figs on the one hand (as the leaves showed), and not too late on the other, as the harvest-time was not past. For the possibility that a species of the fig-tree might have leaves, and even fruit, "in the warm, sheltered ravines of Olivet," at the time of the Passover see Thomson's *Land & Book*, i. 538. H.

FIR (בְּרוֹשׁ, *bĕrôsh;* בְּרוֹתִים, *bĕrôthim* ἄρκευθος, κέδρος, πίτυς, κυπάρισσος, πεύκη *abies, cupressus*). The Hebrew term in all probability denotes either the *Pinus halepensis* or the *Juniperus excelsa*, both of which trees grow in Lebanon and would supply excellent timber for the

Digitized by Google

purposes to which we learn in Scripture the *berôsh* was applied; as, for instance, for boards or planks for the Temple (1 K. vi. 15); for its two doors (ver. 34); for the ceiling of the greater house (2 Chr. iii. 5); for ship-boards (Ez. xxvii. 5); for musical instruments (2 Sam. vi. 5). The red heart-wood of the tall fragrant juniper of Lebanon was no doubt extensively used in the building of the Temple; and the identification of *berôsh* or *berôth* with this tree receives additional confirmation from the LXX. words ἄρκευθος and κέδρος, "a juniper." The deodar, the larch, and Scotch fir, which have been by some writers identified with the *berôsh*, do not exist in Syria or Palestine. [CEDAR.]

W. H.

FIRE (1. אֵשׁ: πῦρ: *ignis*: 2. אוֹר, and also אוּר: φῶς: *lux*; flame or light). The applications of fire in Scripture may be classed as: —

I. *Religious.* — (1.) That which consumed the burnt sacrifice, and the incense offering, beginning with the sacrifice of Noah (Gen. viii. 20), and continued in the ever burning fire on the altar, first kindled from heaven (Lev. vi. 9, 13, ix. 24), and rekindled at the dedication of Solomon's Temple (2 Chr. vii. 1, 3). (2.) The symbol of Jehovah's presence, and the instrument of his power, in the way either of approval or of destruction (Ex. iii. 2, xiv. 19, xix. 18; Num. xi. 1, 3; Judg. xiii. 20; 1 K. xviii. 38; 2 K. i. 10, 12, ii. 11, vi. 17; comp. Is. li. 6, lxvi. 15, 24; Joel ii. 30; Mal. iii. 2, 3, iv. 1; Mark ix. 44; 2 Pet. iii. 10; Rev. xx. 14, 15; Reland, *Ant. Sacr.* i. 8, p. 25; Jennings, *Jewish Ant.* ii. 1, p. 301; Joseph. *Ant.* iii. 8, § 6, viii. 4, § 4). Parallel with this application of fire and with its symbolical meaning is to be noted the similar use for sacrificial purposes, and the respect paid to it, or to the heavenly bodies as symbols of deity, which prevailed among so many nations of antiquity, and of which the traces are not even now extinct: *e. g.* the Sabæan and Magian systems of worship, and their alleged connection with Abraham (Spencer, *de Leg. Hebr.* ii. 1, 2); the occasional relapse of the Jews themselves into sun-, or its corrupted form of fire-worship (Is. xxvii. 9; comp. Gesen. חַמָּן, p. 489; Deut. xvii. 3; Jer. viii. 2; Ez. viii. 16; Zeph. i. 5; 2 K. xvii. 16, xxi. 3, xxiii. 5, 10, 11, 13; Jahn, *Arch. Bibl.* c. vi. §§ 405, 408) [MOLOCH]; the worship or deification of heavenly bodies or of fire, prevailing to some extent, as among the Persians, so also even in Egypt (Her. iii. 16; Wilkinson, *Anc. Egypt.* i. 328, abridgm.); the sacred fire of the Greeks and Romans (Thuc. i. 24, ii. 15; Cic. *de Leg.* ii. 8, 12; Liv. xxviii. 12; Dionys. ii. 67; Plut. *Numa*, 9, i. 263, ed. Reiske); the ancient forms and usages of worship, differing from each other in some important respects, but to some extent similar in principle, of Mexico and Peru (Prescott, *Mexico*, i. 60, 34; *Peru*, i. 101); and lastly the theory of the so-called Guebres of Persia, and the Parsees of Bombay. (Fraser, *Persia*, c. iv. pp. 141, 162, 164; Sir R. K. Porter, *Travels*, ii. 50, 424; Chardin, *Voyages*, ii. 310, iv. 258, viii. 367 ff.; Niebuhr, *Voyages*, ii. 36, 37; Mandelslo, *Travels*, b. i. p. 76; Gibbon, *Hist.* c. viii., i. 335, ed. Smith; Benj. of Tudela, *Early Trav.* pp. 114, 116; Burckhardt, *Syria*, p. 156.)

The perpetual fire on the altar was to be replenished with wood every morning (Lev. vi. 12; comp. Is. xxxi. 9). According to the Gemara, it was divided into 3 parts, one for burning the victims one for incense, and one for supply of the other portions (Lev. vi. 15; Reland, *Antiq. Heb.* i. 4, 8, p. 26; and ix. 10, p. 98). Fire for sacred purposes obtained elsewhere than from the altar was called "strange fire," and for use of such Nadab and Abihu were punished with death by fire from God (Lev. x. 1, 2; Num. iii. 4, xxvi. 61).

(3.) In the case of the spoil taken from the Midianites, such articles as could bear it were purified by fire as well as in the water appointed for the purpose (Num. xxxi. 23). The victims slain for sin-offerings were afterwards consumed by fire outside the camp (Lev. iv. 12, 21, vi. 30, xvi. 27. Heb. xiii. 11). The Nazarite who had completed his vow, marked its completion by shaving his head and casting the hair into the fire on the altar on which the peace-offerings were being sacrificed (Num. vi. 18).

II. *Domestic.* — Besides for cooking purposes, fire is often required in Palestine for warmth (Jer. xxxvi. 22; Mark xiv. 54; John xviii. 18; Harmer, *Obs.* i. 125; Raumer, p. 79). For this purpose a hearth with a chimney is sometimes constructed, on which either lighted wood or pans of charcoal are placed (Harmer, i. 405). In Persia a hole made in the floor is sometimes filled with charcoal, on which a sort of table is set covered with a carpet; and the company placing their feet under the carpet draw it over themselves (Olearius, *Travels*, p. 294; Chardin, *Voyages*, viii. 190). Rooms in Egypt are warmed, when necessary, with pans of charcoal, as there are no fire-places except in the kitchens (Lane, *Mod. Egypt.* i. 41; *Englishw. in Egypt*, ii. 11). [COAL, Amer. ed.]

On the Sabbath the law forbade any fire to be kindled even for cooking (Ex. xxxv. 3; Num. xv. 32). To this general prohibition the Jews added various refinements, *e. g.* that on the eve of the Sabbath no one might read with a light, though passages to be read on the Sabbath by children in schools might be looked out by the teacher. If a Gentile lighted a lamp, a Jew might use it, but not if it had been lighted for the use of the Jew. If a festival day fell on the Sabbath eve no cooking was to be done (Mishn. *Shabb.* i. 3, xvi. 8, vol. ii. 4, 56, *Moed Katon*, ii. vol. ii. 287, Surenhus.).

III. The dryness of the land in the hot season in Syria of course increases liability to accident from fire. The Law therefore ordered that any one kindling a fire which caused damage to corn in a field should make restitution (Ex. xxii. 6; comp. Judg. xv. 4, 5; 2 Sam. xiv. 30; Mishn. *Maccoth*, vi. 5, 6, vol. iv. p. 48, Surenhus.; Burckhardt, *Syria*, pp. 496, 622).

IV. Punishment of death by fire was awarded by the Law only in the cases of incest with a mother-in-law and of unchastity on the part of a daughter of a priest (Lev. xx. 14, xxi. 9). In the former case both the parties, in the latter the woman only, was to suffer. This sentence appears to have been a relaxation of the original practice in such cases (Gen. xxxviii. 24). Among other nations, burning appears to have been no uncommon mode, if not of judicial punishment, at least of vengeance upon captives; and in a modified form was not unknown in war among the Jews themselves (2 Sam. xii. 31: Jer. xxix. 22; Dan. iii. 20, 21). In certain cases the bodies of executed criminals and of infamous persons were subsequently burnt (Josh. vii. 25; 2 K. xxiii. 16).

The Jews were expressly ordered to destroy the idols of the heathen nations, and especially any city of their own relapsed into idolatry (Ex. xxxii. 20

Digitized by Google

2 K. x. 26; Deut. vii. 5, xii. 3, xiii. 16). In some cases the cities, and in the case of Hazor, the chariots also, were, by God's order, consumed with fire (Josh. vi. 24, viii. 28, xi. 6, 9, 13). One of the expedients of war in sieges was to set fire to the gate of the besieged place (Judg. ix. 49, 52). [SIEGES.]

V. Incense was sometimes burnt in honor of the dead, especially royal personages, as is mentioned specially in the cases of Asa and Zedekiah, and negatively in that of Jehoram (2 Chr. xvi. 14, xxi. 19; Jer. xxxiv. 5).

VI. The use of fire in metallurgy was well known to the Hebrews at the time of the Exodus (Ex. xxxii. 24, xxxv. 32, xxxvii. 2, 6, 17, xxxviii. 2, 8; Num. xvi. 38, 39). [HANDICRAFT.]

VII. Fire or flame is used in a metaphorical sense to express excited feeling and divine inspiration, and also to describe temporal calamities and future punishments (Ps. lxvi. 12; Jer. xx. 9; Joel ii. 30; Mal. iii. 2; Matt. xxv. 41; Mark ix. 43; Rev. xx. 15). H. W. P.

FIRE-PAN (מַחְתָּה: πυρεῖον, θυμιατήριον: *ignium receptaculum, thuribulum*), one of the vessels of the Temple service (Ex. xxvii. 3, xxxviii. 3; 2 K. xxv. 15; Jer. lii. 19). The same word is elsewhere rendered "snuff-dish" (Ex. xxv. 38, xxxvii. 23; Num. iv. 9; ἐπαρυστήρ: *emunctorium*) and "censer" (Lev. x. 1, xvi. 12; Num. xvi. 6 ff.). There appear, therefore, to have been two articles so called; one, like a chafing-dish, to carry live coals for the purpose of burning incense; another, like a snuffer-dish, to be used in trimming the lamps, in order to carry the snuffers and convey away the snuff. W. L. B.

FIRKIN. [MEASURES.]

FIRMAMENT. This term was introduced into our language from the Vulgate, which gives *firmamentum* as the equivalent of the στερέωμα of the LXX. and the *rakia* (רָקִיעַ) of the Hebrew text (Gen. i. 6). The Hebrew term first demands notice. It is generally regarded as expressive of simple *expansion*, and is so rendered in the margin of the A. V. (*l. c.*); but the true idea of the word is a complex one, taking in the *mode* by which the expansion is effected, and consequently implying the *nature of the material* expanded. The verb *raka* means to expand *by beating*, whether by the hand, the foot, or any instrument. It is especially used, however, of beating out metals into thin plates (Ex. xxxix. 3; Num. xvi. 39), and hence the substantive רְקָעִים = "broad plates" of metal (Num. xvi. 38). It is thus applied to the flattened surface of the solid earth (Is. xlii. 5, xliv. 24; Ps. cxxxvi. 6), and it is in this sense that the term is applied to the heaven in Job xxxvii. 18 — "Hast thou spread (rather *hammered*) out the sky which is strong, and as a molten looking-glass" — the mirrors to which he refers being made of metal. The sense of *solidity*, therefore, is combined with the ideas of *expansion* and *tenuity* in the term *rakia*. Saalschütz (*Archæol.* ii. 67) conceives that the idea of solidity is inconsistent with Gen. ii. 6, which implies, according to him, the passage of the mist through the *rakia*; he therefore gives it the sense of pure *expansion* — it is the large and lofty room in which the winds, &c., have their abode. But it should be observed that Gen. ii. 6 implies the very reverse. If the mist had penetrated the *rakia* it could have descended in the form of rain; the mist, however, was formed under the *rakia*, and resembles a heavy dew — a mode of fructifying the earth which, from its regularity and quietude, was more appropriate to a state of innocence than rain, the occasional violence of which associated it with the idea of divine vengeance. But the same idea of *solidity* runs through all the references to the *rakia*. In Ex. xxiv. 10, it is represented as a solid floor — "a paved work of a sapphire stone;" nor is the image much weakened if we regard the word לִבְנַת as applying to the *transparency* of the stone rather than to the *paving* as in the A. V., either sense being admissible. So again, in Ez. i. 22–26, the "firmament" is the floor on which the throne of the Most High is placed. That the *rakia* should be transparent, as implied in the comparisons with the sapphire (Ex. *l. c.*) and with crystal (Ez. *l. c.*; comp. Rev. iv. 6), is by no means inconsistent with its solidity. Further, the office of the *rakia* in the economy of the world demanded *strength* and *substance*. It was to serve as a division between the waters above and the waters below (Gen. i. 7). In order to enter into this description we must carry our ideas back to the time when the earth was a chaotic mass, overspread with water, in which the material elements of the heavens were intermingled. The first step, therefore, in the work of orderly arrangement was to separate the elements of heaven and earth, and to fix a floor of partition between the waters of the heaven and the waters of the earth; and accordingly the *rakia* was created to support the upper reservoir (Ps. cxlviii. 4; comp. Ps. civ. 3, where Jehovah is represented as "building his chambers of water," not simply "in water," as the A. V.; the prep. בְּ signifying the *material* out of which the beams and joists were made), itself being supported at the edge or rim of the earth's disk by the mountains (2 Sam. xxii. 8; Job xxvi. 11). In keeping with this view the *rakia* was provided with "windows" (Gen. vii. 11; Is. xxiv. 18; Mal. iii. 10) and "doors" (Ps. lxxviii. 23), through which the rain and the snow might descend. A secondary purpose which the *rakia* served was to support the heavenly bodies, sun, moon, and stars (Gen. i. 14), in which they were fixed as nails, and from which, consequently, they might be said to drop off (Is. xiv. 12, xxxiv. 4; Matt. xxiv. 29). In all these particulars we recognize the same view as was entertained by the Greeks and, to a certain extent, by the Latins. The former applied to the heaven such epithets as "brazen" (χάλκεον, *Il.* xvii. 425; πολύχαλκον, *Il.* v. 504) and "iron" (σιδήρεον, *Od.* xv. 328, xvii. 565) — epithets also used in the Scriptures (Lev. xxvi. 19) — and that this was not merely poetical embellishment appears from the views promulgated by their philosophers. Empedocles (Plutarch, *Plac. Phil.* ii. 11) and Artemidorus (Senec. *Quæst.* vii. 13). The same idea is expressed in the *cælo affixa sidera* of the Latins (Plin. ii. 39, xviii. 57). If it be objected to the Mosaic account that the view embodied in the word *rakia* does not harmonize with strict philosophical truth, the answer to such an objection is, that the writer describes things as they appear rather than as they are. But in truth the same absence of philosophic truth may be traced throughout all the terms applied to this subject, and the objection is levelled rather against the principles of language than anything else. Examine the Latin *cælum* (κοῖλον) the "hollow place" or cave scooped out of solid

Digitized by Google

ge e. our own "heaven," *i. e.* what is *heaved up*; the Greek *οὐρανός*, similarly significant of height (Pott. *Etym. Forsch.* i. 123); or the German "himmel," from *heimeln*, to cover — the "roof" which constitutes the "heim" or abode of man: in each there is a large amount of philosophical error. Correctly speaking, of course, the atmosphere is the true *rakia* by which the clouds are supported, and undefined space is the abode of the celestial bodies. There certainly appears an inconsistency in treating the *rakia* as the support both of the clouds and of the stars, for it could not have escaped observation that the clouds were below the stars: but perhaps this may be referred to the same feeling which is expressed in the *cælum ruit* of the Latins, the downfall of the *rakia* in stormy weather. Although the *rakia* and the *shamayim* ("heavens") are treated as identical in Gen. i. 8, yet it was more correct to recognize a distinction between them, as implied in the expression "firmament of the heavens" (Gen. i. 14), the former being the upheaving power and the latter the upheaved body — the former the line of demarcation between heaven and earth, the latter the *strata* or stories into which the heaven was divided. W. L. B.

* We must distinguish the merely ideal and poetical imagery in later writings (Ps. civ. 3; 2 Sam. xxii. 8; Job xxvi. 11, xxxvii. 18), and in symbolic vision (Ez. i. 22–26), from the purely descriptive, though manifestly phenomenal, representation in Genesis. In the latter, it is also necessary to distinguish between the phenomena described, and the processes which we may presuppose as being anterior to and the cause of them, but of which the sacred writer makes no account.[a] Moreover, we should not overlook the writer's purpose, to give, in a few broad and powerful strokes, the great outlines of creation; shadowing forth its deep mysteries in a series of grand and impressive representations, on a scale of magnificence which is without a parallel. In the tone of description suited to such a purpose, minute specification is out of place. All is vast, and general. Let anything be added in the way of minute distinction, or of explanation and conciliation, and the whole style of conception is changed.

One stage among these mysterious processes was the separation of the waters enveloping the earth into waters above and waters below. The phenomenon to be described — not explained but simply described as a phenomenon — is the unfailing supply of the former, poured down from time to time for ages without stint, and never exhausted. It accords with the whole tone of this remarkable and unique document, to describe this phenomenon as a separation of waters by a firmament (more properly, *expanse*[b]) interposed between the waters below and the waters above, dividing the one from the other. If in this same expanse the heavenly bodies are set, it is what we should expect in a style of representation which excludes minute circumstantial detail. This is a trait, moreover, that is true to nature, as it appears in an oriental sky; where the stars at night seem to be set in the same expanse in which the clouds also are seen, and far beyond is the blue vault that bounds it.[c] The description, therefore, is phenomenally true; nor can science urge anything against it, since the stars, though not in the same limit of space, are set in the same expanse.

It may be said to be now well established, that the phenomena of creation, as described here, in its successive stages, accord with its deepest mysteries, as science is gradually unfolding them. T. J. C.

FIRST-BORN (בְּכוֹר, *πρωτότοκος*: *primogenitus*; from בָּכַר, *early ripe*, Gesen. p. 206), applied equally both to animals and human beings. That some rights of primogeniture existed in very early times is plain, but it is not so clear in what they consisted. They have been classed as, (*a*) authority over the rest of the family; (*b*) priesthood; (*c*) a double portion of the inheritance. The birthright of Esau and of Reuben, set aside by authority or forfeited by misconduct, prove a general privilege as well as quasi-sacredness of primogeniture (Gen. xxv. 23, 31, 34, xlix. 3; 1 Chr. v. 1; Heb. xii. 16), and a precedence which obviously existed, and is alluded to in various passages (as Ps. lxxxix. 27; Job xviii. 13; Rom. viii. 29; Col. i. 15; Heb. xii. 23) [BIRTHRIGHT]; but the story of Esau's rejection tends to show the supreme and sacred authority of the parent irrevocable even by himself, rather than inherent right existing in the eldest son, which was evidently not inalienable (Gen. xxvii. 29, 33, 36; Grotius, Calmet, Patrick, Knobel, on Gen. xxv.).

Under the law, in memory of the Exodus, the eldest son was regarded as devoted to God, and was in every case to be redeemed by an offering not exceeding 5 shekels, within one month from birth If he died before the expiration of 30 days, the Jewish doctors held the father excused, but liable to the payment if he outlived that time (Ex. xiii. 12–15, xxii. 29; Num. viii. 17, xviii. 15, 16; Lev. xxvii. 6; Lightfoot, *Hor. Hebr.* on Luke ii. 22; Philo, *de Pr. Sacerd.* i., ii. 233, Mangey). This devotion of the first-born was believed to indicate a priesthood belonging to the eldest sons of families, which being set aside in the case of Reuben, was

a * This remark is applicable to many points in the account of the creation, and among others to the firmament (expanse) and to the appearance in it of the heavenly bodies on the fourth day. T. J. C.

b * The etymological argument, in the preceding article, only proves that the sense of simple expansion, as in all such cases, originated in an act observable by the senses. The irrelevance of some references (as, for example, Ex. xxiv. 10; Is. xiv. 12, xxxiv. 4) seems too obvious to require correction. Gen. ii. 6 (in a document completing the account of creation, but wholly different in style from ch. i. 1–ii. 3) describes the ordinary process in the formation of clouds and the descent of rain; the ascent of vapors (*mist*) being expressed by the Hebrew imperfect tense, as an act continued and repeated from time to time, and the descent of rain by the perfect, as a single act completed at once. T. J. C.

c * "An oriental sky," says Prof. Hackett (*Illustrations of Scripture*, p. 31, 8th ed.) "has another peculiarity, which adds very much to its impressive appearance. With us the stars seem to adhere to the face of the heavens; they form the most distant objects within the range of vision; they appear to be set in a groundwork of thick darkness, beyond which the eye does not penetrate. . . . But in Eastern climes the stars seem to hang, like burning lamps, midway between heaven and earth; the pure atmosphere enables us to see a deep expanse of blue ether lying far beyond them. The hemisphere above us glows and sparkles with innumerable fires, that appear as if kept burning in their position by an immediate act of the Omnipotent, instead of resting on a frame-work which subserves the illusion of seeming to give to them their support." T. J. C.

Digitized by Google

transferred to the tribe of Levi. This priesthood is said to have lasted till the completion of the Tabernacle (Jahn, *Arch. Bibl.* x. § 165, 387; Patrick, Selden, *de Syn.* c. 16; Mishn. *Zebuchim*, xiv. 4, vol. v. p. 58; comp. Ex. xxiv. 5).

The ceremony of redemption of the first-born is described by Calmet from Leo of Modena (Calm. *on Num.* xviii.). The eldest son received a double portion of the father's inheritance (Deut. xxi. 17), but not of the mother's (Mishn. *Becoroth*, viii. 9). If the father had married two wives, of whom he preferred one to the other, he was forbidden to give precedence to the son of the one, if the child of the other were the first-born (Deut. xxi. 15, 16). In the case of levirate marriage, the son of the next brother succeeded to his uncle's vacant inheritance (Deut. xxv. 5, 6). Under the monarchy, the eldest son usually, but not always, as appears in the case of Solomon, succeeded his father in the kingdom (1 K. i. 30, ii. 22).

The male first-born of animals (פֶּטֶר רֶחֶם: διανοῖγον μήτραν: *quod aperit vulvam*) was also devoted to God (Ex. xiii. 2, 12, 13, xxii. 29, xxxiv. 19, 20; Philo, *l. c.* and *Quis rerum div. hæres*, 24, i. 489, Mang.). Unclean animals were to be redeemed with the addition of one fifth of the value, or else put to death; or if not redeemed, to be sold, and the price given to the priests (Lev. xxvii. 13, 27, 28). The first-born of an ass was to be redeemed with a lamb, or, if not redeemed, put to death (Ex. xiii. 13, xxxiv. 20; Num. xviii. 15). Of cattle, goats, or sheep, the first-born from eight days to twelve months old were not to be used, but offered in sacrifice. After the burning of the fat, the remainder was appropriated to the priests (Ex. xxii. 30; Num. xviii. 17, 18; Deut. xv. 19, 20; Neh. x. 36). If there were any blemish, the animal was not to be sacrificed, but eaten at home (Deut. xv. 21, 22, and xii. 5–7, xiv. 23). Various refinements on the subject of blemishes are to be found in Mishn. *Becoroth*. (See Mal. i. 8. By "first-lings," Deut. xiv. 23, compared with Num. xviii. 17, are meant tithe animals: see Reland, *Antiq.* iii. 10, p. 327; Jahn, *Arch. Bibl.* § 387.) H. W. P.

* FIRST-BORN, DEATH OF THE. [PLAGUES, 10.]

FIRST-FRUITS. (1.) רֵאשִׁית, from רֹאשׁ, *shake*, Gesen. pp. 1249, 1252; sometimes רֵאשִׁית בִּכּוּרִים. (2.) בִּכּוּרִים in pl. only, or בִּכּוּרִים, Gesen. p. 206: usually πρωτογεννήματα, ἀπαρχαὶ τῶν πρωτογεννημάτων (Ex. xxiii. 19): *primitiæ, frugum initia, primitiva*. (3.) תְּרוּמָה, Gesen. p. 1276: ἀφαίρεμα, ἀπαρχή: *primitiæ*.

Besides the first-born of man and of beast, the Law required that offerings of first-fruits of produce should be made publicly by the nation at each of the three great yearly festivals, and also by individuals without limitation of time. No ordinance appears to have been more distinctly recognized than this, so that the use of the term in the way of illustration carried with it a full significance even in N. T. times (Prov. iii. 9; Tob. i. 6; 1 Macc. iii. 49; Rom. viii. 23, xi. 16; Jam. i. 18; Rev. xiv. 4). (1.) The Law ordered in general, that the first of all ripe fruits and of liquors, or, as it is twice expressed, the first of first-fruits, should be offered in God's house (Ex. xxii. 29, xxiii. 19, xxxiv. 26; Philo, *de Monarch.* ii. 3 (ii 224, Mang.)). (2.) On the morrow after the Passover Sabbath, i. e. on the 16th of Nisan, a sheaf of new corn was to be brought to the priest, and waved before the altar in acknowledgment of the gift of fruitfulness (Lev xxiii. 5, 9, 10, 12, ii. 12). Josephus tells us that the sheaf was of barley, and that until this ceremony had been performed, no harvest work was to be begun (Joseph. *Ant.* iii. 10, § 5). (3.) At the expiration of seven weeks from this time, i. e. at the Feast of Pentecost, an oblation was to be made of two loaves of leavened bread made from the new flour, which were to be waved in like manner with the Passover sheaf (Ex. xxxiv. 22; Lev. xxiii. 15, 17; Num. xxviii. 26). (4.) The Feast of Ingathering, i. e. the Feast of Tabernacles in the 7th month, was itself an acknowledgment of the fruits of the harvest (Ex. xxiii. 16, xxxiv. 22; Lev. xxiii. 39). These four sorts of offerings were national. Besides them, the two following were of an individual kind, but the last was made by custom to assume also a national character. (5.) A cake of the first dough that was baked was to be offered as a heave-offering (Num. xv. 19, 21). (6.) The first-fruits of the land were to be brought in a basket to the holy place of God's choice, and there presented to the priest, who was to set the basket down before the altar. The offerer was then, in words of which the outline, if not the whole form was prescribed, to recite the story of Jacob's descent into Egypt, and the deliverance therefrom of his posterity; and to acknowledge the blessings with which God had visited him (Deut. xxvi. 2–11).

The offerings, both public and private, resolve themselves into two classes: (*a.*) Produce in general, in the Mishna בִּכּוּרִים, *Biccurim*, first-fruits, *primitiæ fructus*, πρωτογεννήματα, raw produce. (*b.*) תְּרוּמוֹת, *Terumoth*, offerings, *primitiæ*, ἀπαρχαί, prepared produce (Gesen. p. 1276; Augustine, *Quæst. in Hept.* iv. 32, vol. iii. p. 732; Spencer, *de Leg. Hebr.* iii. 9, p. 713; Reland, *Antiq.* iii. 7; Philo, *de Præm. Sacerd.* 1 (ii. 233, Mang.); *de Sacrific. Abel. et Cain*, 21 (i. 177, M.)).

(*a.*) Of the public offerings of first-fruits, the Law defined no place from which the Passover sheaf should be chosen, but the Jewish custom, so far as it is represented by the Mishna, prescribed that the wave-sheaf or sheaves should be taken from the neighborhood of Jerusalem (*Terumoth*, x. 2). Deputies from the Sanhedrim went out on the eve of the festival, and tied the growing stalks in bunches. In the evening of the festival day the sheaf was cut with all possible publicity, and carried to the Temple. It was there threshed, and an omer of grain, after being winnowed, was bruised and roasted: after it had been mixed with oil and frankincense laid upon it, the priest waved the offering in all directions. A handful was thrown on the altar-fire, and the rest belonged to the priests, to be eaten by those who were free from ceremonial defilement. After this the harvest might be carried on. After the destruction of the Temple all this was discontinued, on the principle, as it seems, that the House of God was exclusively the place for oblation (Lev. ii. 14, x. 14, xxiii. 13; Num. xviii. 11; Mishn. *Terum.* v. 6, x. 4, 5; *Shekalim* viii. 8; Joseph. *Ant.* iii. 10, § 5; Philo, *de Præm Sacerd.* 1 (ii. 233, Mang.); Reland, *Antiq.* iii. 7 3, iv. 3, 8).

The offering made at the feast of the Pentecost was a thanksgiving for the conclusion of whose

Digitized by Google

harvest. It consisted of two loaves (according to Josephus, one loaf) of new flour baked with leaven, which were waved by the priest as at the Passover. The size of the loaves is fixed by the Mishna at seven palms long and four wide, with horns of four fingers length. No private offerings of first-fruits were allowed before this public oblation of the two loaves (Lev. xxiii. 15, 20; Mishn. *Terum.* x. 6, xi. 4; Joseph. *Ant.* iii. 10, § 6; Reland, *Antiq.* iv. 4, 5). The private oblations of first-fruits may be classed in the same manner as the public. The directions of the Law respecting them have been stated generally above. To these the Jews added or deduced the following. Seven sorts of produce were considered liable to oblation, namely, wheat, barley, grapes, figs, pomegranates, olives, and dates (Gesen. p. 219; Deut. viii. 8; Mishn. *Biccurim*, i. 3; Hasselquist, *Travels*, p. 417), but the Law appears to have contemplated produce of all sorts, and to have been so understood by Nehemiah (Deut. xxvi. 2; Neh. x. 35, 37). The portions intended to be offered were decided by inspection, and the selected fruits were fastened to the stem by a band of rushes (*Bic.* iii. 1). A proprietor might, if he thought fit, devote the whole of his produce as first-fruits (*ibid.* ii. 4). But though the Law laid down no rule as to quantity, the minimum fixed by custom was one sixtieth (Reland, *Antiq.* iii. 8, 4). No offerings were to be made before Pentecost, nor after the feast of the Dedication, on the 25th of Cisleu (Ex. xxiii. 16; Lev. xxiii. 16, 17; *Bic.* i. 3, 6). The practice was for companies of 24 persons to assemble in the evening at a central station, and pass the night in the open air. In the morning they were summoned by the leader of the feast with the words, "Let us arise and go up to Mount Zion, the House of the Lord our God." On the road to Jerusalem they recited portions of Psalms cxxii. and cl. Each party was preceded by a piper, a sacrificial bullock having the tips of his horns gilt and crowned with olive. At their approach to the city they were met by priests appointed to inspect the offerings, and were welcomed by companies of citizens proportioned to the number of the pilgrims. On ascending the Temple mount each person took his basket containing the first-fruits and an offering of turtle doves, on his shoulders, and proceeded to the court of the Temple, where they were met by Levites singing Ps. xxx. 2. The doves were sacrificed as a burnt-offering, and the first-fruits presented to the priests with the words appointed in Deut. xxvi. The baskets of the rich were of gold or silver: those of the poor of peeled willow. The baskets of the latter kind were, as well as the offerings they contained, presented to the priests, who waved the offerings at the S. W. corner of the altar: the more valuable baskets were returned to the owners (*Bic.* iii. 6, 8). After passing the night at Jerusalem, the pilgrims returned on the following day to their homes (Deut. xvi. 7; *Terum.* ii. 4). It is mentioned that King Agrippa bore his part in this highly picturesque national ceremony by carrying his basket, like the rest, to the Temple (*Bic.* iii. 4). Among other by-laws were the following: (1.) He who ate his first-fruits elsewhere than in Jerusalem and without the proper form was liable to punishment (*Maccoth*, iii. 3, vol. iv. p. 284, Surenh.). (2.) Women, slaves, deaf and dumb persons, and some others, were exempt from the verbal oblation before the priest, which was not generally used after the Feast of Tabernacles (*Bic.* i. 5, 6).

(*b.*) The first-fruits prepared for use were not required to be taken to Jerusalem. They consisted of wine, wool, bread, oil, date-honey, onions, cucumbers (*Terum.* ii. 5, 6; Num. xv. 19, 21; Deut. xviii. 4). They were to be made, according to some, only by dwellers in Palestine; but according to others, by those also who dwelt in Moab, in Ammonitis, and in Egypt (*Terum.* i. 1). They were not to be taken from the portion intended for tithes, nor from the corners left for the poor (*ibid.* i. 5, iii. 7). The proportion to be given is thus estimated in that treatise: a liberal measure, one fortieth, or, according to the school of Shammai, one thirtieth; a moderate portion, one fiftieth; a scanty portion, one sixtieth. (See Ez. xlv. 13.) The measuring-basket was to be thrice estimated during the season (*ibid.* iv. 3). He who ate or drank his offering by mistake was bound to add one fifth, and present it to the priest (Lev. v. 16, xxii. 14), who was forbidden to remit the penalty (*Terum.* vi. 1, 5). The offerings were the perquisite of the priests, not only at Jerusalem, but in the provinces, and were to be eaten or used only by those who were clean from ceremonial defilement (Num. xviii. 11; Deut. xviii. 4).

The corruption of the nation after the time of Solomon gave rise to neglect in these as well as in other ordinances of the Law, and restoration of them was among the reforms brought about by Hezekiah (2 Chr. xxxi. 5, 11). Nehemiah also, at the return from Captivity, took pains to reorganize the offerings of first-fruits of both kinds, and to appoint places to receive them (Neh. x. 35, 37, xii. 44). Perversion or alienation of them is reprobated, as care in observing is eulogized by the prophets, and specially mentioned in the sketch of the restoration of the Temple and Temple service made by Ezekiel (Ez. xx. 40, xliv. 30, xlviii. 14; Mal. iii. 8).

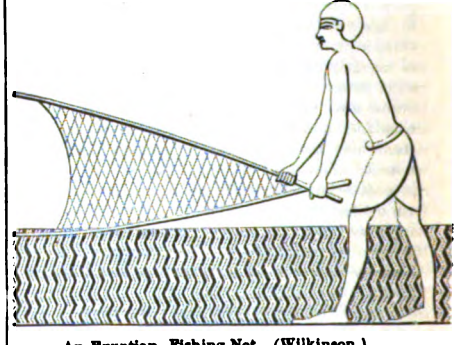
An offering of first-fruits is mentioned as an acceptable one to the prophet Elisha (2 K. iv. 42).

Besides the offerings of first-fruits mentioned above, the Law directed that the fruit of all trees fresh planted should be regarded as uncircumcised or profane, and not to be tasted by the owner for three years. The whole produce of the fourth year was devoted to God; and did not become free to the owner till the fifth year (Lev. xix. 23–25). The trees found growing by the Jews at the conquest were treated as exempt from this rule. (Mishn. *Orlah*, i. 2.)

Offerings of first-fruits were sent to Jerusalem by Jews living in foreign countries (Joseph. *Ant.* xvi. 6, § 7).

Offerings of first-fruits were also customary in heathen systems of worship. (See, for instances and authorities, Patrick, *On Deut.* xxvi.; and a copious list in Spencer, *de Leg. Hebr.* iii. 9, *de Primitiarum Origine*; also Leslie, *On Tithes*, Works, vol. ii.; Winer, s. v. *Erstlinge*.)

H. W. P.



FISH, FISHING. The Hebrews recognized fish as one of the great divisions of the animal kingdom, and, as such, give them a place in the account of the creation (Gen. i. 21, 28), as well as in other passages where an exhaustive description of living creatures is intended (Gen. ix. 2; Ex. xx. 4; Deut. iv. 18; 1 K. iv. 33). They do not, however, appear to have acquired any intimate knowledge of this branch of natural history. Although they were acquainted with some of the names given

Digitized by Google

by the Egyptians to the different species (for Josephus, *B. J.* iii. 10, § 8, compares one found in the Sea of Galilee to the *coracinus*), they did not adopt a similar method of distinguishing them; nor was any classification attempted beyond the broad divisions of clean and unclean, great and small. The former was established by the Mosaic Law (Lev. xi. 9, 10), which pronounced unclean such fish as were devoid of fins and scales: these were and are regarded as unwholesome food in Egypt (Wilkinson, *Anc. Egypt.* iii. 58, 59), so much so that one of the laws of El-Hakim prohibited the sale, or even the capture of them (Lane, *Mod. Egypt.* i. 132). This distinction is probably referred to in the terms σαπρά (*esui non idonea*, Schleusner's *Lex.* s. v.; Trench, *On Parables*, p. 137) and καλά (Matt. xiii. 48). Of the various species found in the Sea of Galilee (as enumerated by Raumer, *Palästina*, p. 93), the *Silurus* would be classed among the former, while the *Sparus Galilæus*, a species of bream, and the *mugil*, chub, would be deemed "clean" or "good." The second division is marked in Gen. i. 21 (as compared with verse 28), where the great marine animals (תַּנִּינִים הַגְּדֹלִים: κήτη μεγάλα), generically described as *whales* in the A. V. (Gen. *l. c.*; Job vii. 12) [WHALE], but including also other animals, such as the crocodile [LEVIATHAN] and perhaps some kinds of serpents, are distinguished from "every living creature that *creepeth*" (הָרֹמֶשֶׂת: A. V. "moveth"), a description applying to fish, along with other reptiles, as having no legs. To the former class we may assign the large fish referred to in Jon. ii. 1 (דָּג גָּדוֹל: κήτος μέγα, Matt. xii. 40), which Winer (art. *Fische*), after Bochart, identifies with a species of shark (*Canis carcharias*): and also that referred to in Tob. vi. 2 ff., identified by Bochart (*Hieroz.* iii. 697 ff.) with the *Silurus glanis*, but by Kitto (art. *Fish*) with a species of crocodile (the *seesar*) found in the Indus. The Hebrews were struck with the remarkable fecundity of fish, and have expressed this in the term דָּג, the root of which signifies *increase* (comp. Gen. xlviii. 16), and in the secondary sense of שָׁרַץ, lit. to *creep*, thence to *multiply* (Gen. i. 20, viii. 17, ix. 7; Ex. i. 7), as well as in the allusions in Ex. xlvii. 10. Doubtless they became familiar with this fact in Egypt, where the abundance of fish in the Nile, and the lakes and canals (Strab. xvii. p. 823; Diod. i. 36, 43, 52; Her. ii. 93, 149), rendered it one of the staple commodities of food (Num. xi. 5; comp. Wilkinson, iii. 62). The destruction of fish was on this account a most serious visitation to the Egyptians (Ex. vii. 21; Is. xix. 8). Occasionally it is the result of natural causes: thus St. John (*Travels in Valley of the Nile*, ii. 246) describes a vast destruction of fish from cold, and Wellsted (*Travels in Arabia*, i. 310) states that in Oman the fish are visited with an epidemic about every five years, which destroys immense quantities of them. It was perhaps as an image of fecundity that the fish was selected as an object of idolatry: the worship of it was widely spread, from Egypt (Wilkinson, iii. 58) to Assyria (Layard, *Nineveh*, ii. 467), and even India (Baur, *Mythologie*, ii. 58). Among the Philistines, Dagon (= *little fish*) was represented by a figure half man and half fish (1 Sam. v 4). On this account the worship of fish is expressly prohibited (Deut. iv. 18). [DAGON.]

In Palestine, the Sea of Galilee was and still is remarkably well stored with fish, and the value attached to the fishery by the Jews is shown by the traditional belief that one of the ten laws of Joshua enacted that it should be open to all comers (Lightfoot's *Talmudical Exercitations* on Matt. iv. 18). No doubt the inhabitants of northern Judæa drew large supplies thence for their subsistence in the earlier as well as the later periods of the Bible history. Jerusalem derived its supply chiefly from the Mediterranean (comp. Ez. xlvii. 10), at one time through Phœnician traders (Neh. xiii. 16), who must have previously salted it (in which form it is termed מלוחא in the Talmud; Lightfoot on Matt. xiv. 17). The existence of a regular fish market is implied in the notice of the fish gate, which was probably contiguous to it (2 Chr. xxxiii. 14; Neh. iii. 3, xii. 39; Zeph. i. 10). In addition to these sources, the reservoirs formed in the neighborhood of towns may have been stocked with fish (2 Sam. ii. 13, iv. 12; Is. vii. 3, xxii. 9, 11; Cant. vii. 4, where, however, "fish" is interpolated in the A. V.). With regard to fish as an article of food, see FOOD.

Numerous allusions to the art of fishing occur in the Bible. In the O. T. these allusions are of a metaphorical character, descriptive either of the conversion (Jer. xvi. 16; Ez. xlvii. 10) or of the destruction (Ez. xxix. 3 ff.; Eccl. ix. 12; Am. iv. 2; Hab. i. 14) of the enemies of God. In the N. T. the allusions are of a historical character for the most part, though the metaphorical application is still maintained in Matt. xiii. 47 ff. The most usual method of catching fish was by the use of the net, either the *casting* net (חֵרֶם, Hab. i. 15; Ez. xxvi. 5, 14, xlvii. 10; δίκτυον, Matt. iv. 20, 21; Mark i. 18, 19; Luke v. 2 ff.; John xxi. 6 ff.; ἀμφίβληστρον, Matt. iv. 18; Mark i. 16), probably resembling the one used in Egypt, as shown

An Egyptian Fishing-Net. (Wilkinson.)

in Wilkinson (iii. 55), or the *draw* or *drag* net (מִכְמֹרֶת, Is. xix. 8; Hab. i. 15; σαγήνη, Matt. xiii. 47), which was larger and required the use of a boat: the latter was probably most used on the Sea of Galilee, as the number of boats kept on it was very considerable (Joseph. *B. J.* iii. 10, § 9). On other waters a method analogous to the use of the weir in our country was pursued: a fence of canes or reeds was made, within which the fish were caught: this was forbidden on the Sea of Galilee, in consequence of the damage done to the boats by the stakes (Lightfoot on Matt. iv. 19).

Digitized by Google

Angling was a favorite pursuit of the wealthy in Egypt, as well as followed by the poor who could not afford a net (Wilkinson, iii. 53 ff.); the requisites were a hook (חַכָּה, Is. xix. 8; Hab. i. 15; Job xli. 1; צָנָּה and סִיר, so called from its resemblance to a *thorn*, Am. iv. 2; ἄγκιστρον, Matt. xvii. 27), and a line (חֶבֶל, Job xli. 1) made perhaps of reeds: the rod was occasionally dispensed with (Wilkinson, iii. 53), and is not mentioned in the Bible: ground-bait alone was used, fly-fishing being unknown. A still more scientific method was with the trident (שָׂפָּה, A. V. "barbed iron") or the spear (יְאֹרִים), as practiced in Egypt in taking the crocodile (Job xli. 7) or the hippopotamus (Wilkinson, iii. 72). A similar custom of spearing fish still exists in Arabia (Wellsted, ii. 347). The reference in Job xli. 2 is not to the use of the hook in fishing, but to the custom of keeping fish alive in the water when not required for immediate use, by piercing the gills with a ring (חוֹחַ, A. V. "thorn") attached to a stake by a rope of reeds (אַגְמֹן, A. V. "hook"). The night was esteemed the best time for fishing with the net (Luke v. 5; Plin. ix. 23). W. L. B.

* See Mr. Tristram's *Land of Israel*, in regard to the fishes of the Sea of Galilee, p. 426; those of the Jordan, pp. 245, 485; and those of the Jabbok and Gilead, pp. 529, 544. As showing how abundant they still are in the Sea of Tiberias, this traveller states that he saw crumbs of poisoned bread thrown to them, "which the fish seized, and turning over dead, were washed ashore and collected for the market. The shoals were marvellous — black masses, many hundred yards long, with the back fins projecting out of the water as thick as they could pack. No wonder any net should break which inclosed such a shoal." There seems to be no trace in the Bible of any such mode of taking fish in ancient times. Fishing from boats on this sea has almost if it has not altogether ceased. Only two or three boats (Tristram, p. 426) used for any purpose are now found on the lake of Galilee. Sepp states (*Jerusalem u. das heil. Land*, ii. 185) that nets are no longer used in fishing there, but probably we are to understand this as meaning that they are not cast from boats for a draught; for others inform us that the fishermen wade into the water with hand-nets, which they dexterously throw around the fish and thus capture them. (See Richter, *Wallfahrten*, p. 60; and Rob. *Bibl. Res.* iii. 262, 1st ed.) It must have been a common sight to the ancient inhabitants of Palestine, as it is to those there now, to see the flying-fish leap from the waters along the coast of the Mediterranean. "Their flight is always short, spasmodic, and painful; and when their web-wings become dry they instantly collapse, and the poor little aëronaut drops into the water like a stone" (Thomson, *Land and Book*, ii. 257). The catfish or *coracinus* (κορακῖνος) is very abundant in the Round Fountain ('*Ain Mudawarah*) n. the plain of Gennesaret. [CAPERNAUM, Amer. ed.] "Certain kinds of fishing," says Thomson, referring apparently to the Mediterranean, though the same may once have been true also of the Sea of Galilee, "are always carried on at night. With blazing torch the boat glides over the flashing sea, and the men stand gazing keenly into it until their prey is sighted, when, quick as lightning, they fling their net or fly their spear; and often you see the tired fishermen come sullenly into harbor in the morning, having toiled all night in vain" (*Land and Book*, ii. 80). The Saviour's language (Matt. vii. 10; Luke xi. 11) implies that a person in need might ask a fish of another and expect it as a gratuity. There was an ancient "fish gate" at Jerusalem (2 Chr. xxxiii. 14; Neh. iii. 3, &c.), and a fish market has existed there in all periods (Tobler, *Topographie von Jerusalem*, p. 208). It is evident that the inhabitants have always relied in part on their fish-stocked waters for supplies of food. The reference to "sluices and ponds" in Is. xix. 10 (A. V.), as if for preserving fish, probably rests on a mistranslation. [SLUICES, Amer. ed.] H.

* **FISH GATE.** [JERUSALEM, I. 8, and III., viii.]

* **FISH-POOLS,** a mistranslation in Cant. vii. 4, A. V. [HESHBON, Amer. ed.]

FITCHES (*i. e.* VETCHES), the representative in the A. V. of the two Hebrew words *cussemeth* and *ketzach*. As to the former see RYE.

Ketzach (קֶצַח: μελάνθιον: *gith*) denotes without doubt the *Nigella sativa*, an herbaceous annual plant belonging to the natural order *Ranunculaceæ*, and sub-order *Helleboreæ*, which grows in the S of Europe and in the N. of Africa. It was for-

Nigella sativa.

merly cultivated in Palestine for the sake of its seeds, which are to this day used in eastern countries as a medicine and a condiment. This plant is mentioned only in Is. xxviii. 25, 27, where especial reference is made to the mode of threshing it; not with "a threshing instrument" (חָרִיץ, מוֹרַג), but "with a staff" (מַטֶּה), because the heavy-armed cylinders of the former implement would have crushed the aromatic seeds of the *Nigella*. The μελάνθιον of Dioscorides (iii. 83, ed. Sprengel) is unquestionably the *Nigella*; both these terms having reference to its black seeds, which, according to the above-named author and Pliny (*H. N.* xix. 8), were sometimes mixed with bread. The word *gith* is of uncertain origin. It is used by Pliny (*H. N.* xx. 17), who says, "*Gith* ex Græcis alii melanthion, alii melaspermon vocant." Plautus also (*Rud.* v. 2, 39) has the same word *git*: "Os calet tibi! num *git* frigidefactas." Comp. Celsius (*Hierob.* ii. 71).

Digitized by Google

Besides the *N. sativa*, there is another species, the *N. arvensis*, which may be included under the term *ketzach;* but the seeds of this last-named plant are less aromatic than the other. W H.

* The seeds of this plant are universally used in Syria, not mixed with the bread, but sprinkled on the top of the loaf or cake. They are called الحبّة السوداء, that is, *the black seed*, in allusion to their color; also حبّة البركة, *the seed of blessing*, in allusion to their supposed medicinal virtues. There is an Arabic proverb, "In *the black seed* is the medicine for every disease." It is no less true at this day than in Isaiah's time, that it is beaten out with a staff, not threshed out with the *Nouraj* on the threshing-floor. G. E. P.

FLAG, the representative in the A. V. of the two Hebrew words *âchû* and *sûph*.

1. *Achû* (אָחוּ): ἄχι, ἄχει, βούτομον: *locus palustris, carectum:* A. V. "meadow," "flag"), a word, according to Jerome (*Comment. in* Is. xix. 7), of Egyptian origin, and denoting "any green and coarse herbage, such as rushes and reeds, which grows in marshy places." "Quum ab eruditis quæreremem," says Jerome, "quod hic sermo significaret, audivi ab Ægyptiis hoc nomine linguæ eorum *omne quod in palude virens nascitur*, appellari." In Job viii. 11 it is asked, "Can the *âchû* grow without water?" It seems probable that some *specific* plant is here denoted, as Celsius has endeavored to prove (*Hierob.* i. 342), for the *âchû* is mentioned with the *gôme*, "the papyrus." The word occurs once again in Gen. xli. 2, 18, where it is said that the seven well-favored kine came up out of the river and fed in an *âchû*. Royle (Kitto's *Cyc.* art. *Achu*) and Kitto (*Pict. Bib.* on Gen. *l. c.*) are inclined to think that the *âchû* denotes the *Cyperus esculentus*. The last-named writer identifies this sedge with the μαλιναθάλλη of Theophrastus (*Hist. Plant.* iv. 8, § 12), which plant was much eaten by sheep and cattle. There is, however, much doubt as to what the *malinathalla* denotes, as Schneider has shown. The LXX. render *âróth* by ἄχι in Is. xix. 7. [See REED.] Kalisch (*Comment.* on Gen. *l. c.*) says that the *âchû* "is unquestionably either the *Cyperus esculentus* or the *Butomus umbellatus*." We are quite unable to satisfy ourselves so easily on this point. There are many marsh-plants besides the *Cyperus esculentus* and the *B. umbellatus;* at the same time, if the Greek βούτομος denotes the latter plant, about which, however, there is some doubt, it is possible that the *âchû* of Job viii. 11 may be represented by the *Butomus umbellatus*, or "flowering rush," which grows in Palestine and the East. The *âchû* of Gen. (*l. c.*) may be used in a general sense to denote such marshy vegetation as is seen on some parts of the Nile. As to discussions on the origin of אָחוּ, see Celsius, *Hierob.* l. c.; Jablonski, *Opusc.* i. 45, ii. 159, ed. Te-Water; Schultens, *Comment. ad Job*, l. c., and Gesenius, *Thes.* s. v., &c.

2. *Sûph* (סוּף: ἕλος: *carectum, pelagus*) occurs frequently in the O. T. in connection with *yam*, "sea," to denote the "Red Sea" (יַם־סוּף). [SEA.] The term here appears to be used in a very wide sense to denote "weeds of any kind." The *yam-sûph*, therefore, is the "sea of weeds," and perhaps, as Stanley (*S. & P.* p. 6, note) observes, *sûph* "may be applied to any aqueous vegetation," which would include the arborescent coral growths for which this sea is celebrated, as well as the different algæ which grow at the bottom: see Pliny (*H. N.* xiii. 25), and Shaw (*Trav.* p. 387, fol. 1738), who speaks of a "variety of *algæ* and *fuci* that grow within its channel, and at low water are left in great quantities upon the sea-shore" (see also p. 384). The word *sûph* in Jon. ii. 5, translated "weeds" by the A. V., has, there can be no doubt, reference to "sea-weed," and more especially to the long ribbon-like fronds of the *Laminariæ*, or the entangled masses of *Fuci*. In Ex. ii. 3, 5, however, where we read that Moses was laid "in the *sûph* ('flags,' A. V.) by the river's brink," it is probable that "reeds" or "rushes," &c., are denoted, as Rab. Salomon explains it, "a place thick with reeds." (See Celsius, *Hierob.* ii. 66.) The *yam-sûph* in the Coptic version (as in Ex. x. 19, xiii 18; Ps. cvi. 7, 9, 22) is rendered "the *Sari-sea*." The word *Sari* is the old Egyptian for a "reed" or a "rush" of some kind. Jablonski (*Opusc.* i. 266) gives *Juncus* as its rendering, and compares a passage in Theophrastus (*Hist. Plant.* iv. 8, §§ 2, 5) which thus describes the *sari:* "The *sari* grows in water about marshes and those watery places which the river after its return to its bed leaves behind it; it has a hard and closely twisted root, from which spring the *saria* (stalks) so called." Pliny (*H. N.* xiii. 23) thus speaks of this plant: "The *sari*, which grows about the Nile, is a shrubby kind of plant (?), commonly being about two cubits high, and as thick as a man's thumb; it has the panicle (*coma*) of the papyrus, and is similarly eaten; the root, on account of its hardness, is used in blacksmiths' shops instead of charcoal." Sprengel (*Hist. Rei Herb.* i. 78) identifies the *sari* of Theophrastus with the *Cyperus fastigiatus*, Linn.; but the description is too vague to serve as a sufficient basis for identification. There can be little doubt that *sûph* is sometimes used in a general sense like our English "weeds." It cannot be restricted to denote *alga*, as Celsius has endeavored to show, because *alga* is not found in the Nile. Lady Calcott (*Script. Herb.* p. 158) thinks the *Zostera marina* ("grass-wrack") may be intended; but there is nothing in favor of such an opinion. The *sûph* of Is. xix. 6, where it is mentioned with the *kâneh*, appears to be used in a more restricted sense to denote some species of "reed" or "tall grass." There are various kinds of *Cyperaceæ* and tall *Graminaceæ*, such as *Arundo* and *Saccharum*, in Egypt. [REED.] W. H.

* It is quite possible that no definite species was intended here, as in many other places in the Scriptures where plants are mentioned. In Gen. xli. 2, 18, where the kine fed "in an *âchû*," the expression may be used in a general sense, just as we might say "in the *sedge*," without intending to designate any particular species of *Cyperus*, or *Carex*, or *Juncus*, or others of kindred orders. This same indefiniteness is retained in the Arabic terms رَبيع and حَلْف, the former signifying *Gramineæ* in general; the latter being an indefinite term covering many species of *Gramineæ* and *Cyperaceæ;* while بَرْدِي is a general term for *Juncaceæ*. G. E. P

FLAGON a word employed in the A. V. to render two distinct Hebrew terms: 1. *Ashishah*, אֲשִׁישָׁה (2 Sam. vi. 19; 1 Chr. xvi. 3; Cant. ii. 5; Hos. iii 1). The real meaning of this word, according to the conclusions of Gesenius (*Thes.* p. 166), is a cake of pressed raisins. He derives it from a root signifying to compress, and this is confirmed by the renderings of the LXX. (λάγανον, ἀμορίτη, πέμματα) and of the Vulgate, and also by the indications of the Targum Pseudojon. and the Mishna (*Nedarim*, 6, § 10). In the passage in Hosea there is probably a reference to a practice of offering such cakes before the false deities. The rendering of the A. V. is perhaps to be traced to Luther, who in the first two of the above passages has *ein Nössel Wein*, and in the last *Kanne Wein*; but primarily to the interpretations of modern Jews (*e. g.* Gemara, *Baba Bathra*, and Targum on Chronicles), grounded on a false etymology (see Michaelis, quoted by Gesenius, and the observations of the latter, as above). It will be observed that in the two first passages the words "of wine" are interpolated, and that in the last "of wine" should be "of grapes."

2. *Nebel*, נֵבֶל (Is. xxii. 24 only). *Nebel* is commonly used for a bottle or vessel, originally probably a skin, but in later times a piece of pottery (Is. xxx. 14). But it also frequently occurs with the force of a musical instrument (A. V. generally "psaltery," but sometimes "viol"), a meaning which is adopted by the Targum, and the Arabic and Vulgate versions, and Luther, and given in the margin of the A. V. The text, however, follows the rendering of the LXX., and with this agrees Gesenius's rendering, "*Becken und Flaschen, von allerhand Art.*" G.

FLAX. Two Hebrew words are used for this plant in O. T., or rather the same word slightly modified — פִּשְׁתָּה, and פִּשְׁתָּה. About the former there is no question. It occurs only in three places (Ex. ix. 31; Is. xlii. 3, xliii. 17). As regards the latter, there is probably only one passage where it stands for the plant in its undressed state (Josh. ii. 6). Eliminating all the places where the words are used for the article manufactured in the *thread*, the *piece*, or the *made up garment* [LINEN; COTTON], we reduce them to two: Ex. ix. 31, certain, and Josh. ii. 6, disputed.

In the former the flax of the Egyptians is recorded to have been damaged by the plague of hail. The word גִּבְעֹל is retained by Onkelos: but is rendered in LXX. σπερματίζον, and in Vulg. *folliculos germinabut*. The A. V. seems to have followed the LXX. (*bolled* = σπερματίζον); and so Rosenm "globulus seu nodus lini maturescentis" (*Schol.* ad loc.). Gesenius makes it the calix or corolla; refers to the Mishna, where it is used for the calix of the hyssop, and describes this explanation as one of long standing among the more learned Rabbins (*Thes.* p. 261).

For the flax of ancient Egypt, see Herod. ii 37, 105; Cels. ii. p. 235 ff.; Heeren, *Ideen*, ii. 2, p. 368 ff. For that of modern Egypt, see Hasselquist, *Journey*, p. 500; Olivier, *Voyage*, iii. 297; Girard's *Observations* in *Descript. de l'Égypte*, tom. xvii. (*État moderne*), p. 98: Paul Lucas, *Voyages*, pt. ii. p. 47.

From Ritter's *Erdkunde*, ii. 916 (comp. his *Vorhalle*, &c. pp 45–48) it seems probable that the cultivation of flax for the purpose of the manufacture of linen was by no means confined to Egypt; but that, originating in India, it spread over the whole continent of Asia at a very early period of antiquity. That it was grown in Palestine even before the conquest of that country by the Israelites appears from Josh. ii. 6, the second of the two passages mentioned above. There is, however, some difference of opinion about the meaning of the words פִּשְׁתֵּי הָעֵץ: λινοκαλάμη: Vulg. *stipula lini*; and so A. V. "stalks of flax;" Joseph. speaks of λίνου ἀγκαλίδας, armfuls, or bundles of flax; but Arab. Vers. "stalks of *cotton*." Gesenius, however, and Rosenmüller are in favor of the rendering "stalks of flax." If this be correct, the place involves an allusion to the custom of drying the flax-stalks by exposing them to the heat of the sun upon the flat roofs of houses; and so expressly in Joseph. (*Ant.* v. 1, § 2), λίνου γὰρ ἀγκαλίδας ἐπὶ τοῦ τέγους ἔψυχε. In later times this drying was done in ovens (Rosenm. *Alterthumsk.*). There is a decided reference to the raw material in the LXX. rendering of Lev. xiii. 47, ἱματίῳ στυπτινίνῳ, and Judg. xv. 14, στυππίον, comp. Is. i. 31.

The various processes employed in preparing the flax for manufacture into cloth are indicated — (1.) The drying process (see above). (2.) The peeling of the stalks, and separation of the fibres (the name being derivable either, as Parkh. from פָּשַׁט, to strip, peel, or as Gesen. from פָּשַׁשׁ, to separate into parts). (3.) The hackling (Is. xix. 9; LXX λίνον τὸ σχιστόν; vid. Gesen. *Lex.* s. v. שָׁרִיק, and for the *combs* used in the process, comp. Wilkinson, *Anc. Egypt.* iii. 140). The flax, however, was not always dressed before weaving (see Ecclus. xl. 4, where ὠμόλινον is mentioned as a species of clothing worn by the poor). That the use of the coarser fibres was known to the Hebrews may be inferred from the mention of *tow* (נְעוֹרֶת), in Judg. xvi. 9; Is. i. 31. That flax was anciently one of the most important crops in Palestine appears from Hos. ii. 5, 9; that it continued to be grown and manufactured into linen in N. Palestine down to the Middle Ages we have the testimony of numerous Talmudists and Rabbins. At present it does not seem to be so much cultivated there as the *cotton* plant. [COTTON; LINEN.] T. E. B.

FLEA, an insect twice only mentioned in Scripture, namely, in 1 Sam. xxiv. 14, xxvi. 20. In both cases David in speaking to Saul applies it to himself as a term of humility. The Heb. word is פַּרְעֹשׁ, which the LXX. render by ψύλλος, and the Vulg. by *pulex*. Fleas are abundant in the East, and afford the subject of many proverbial expressions. W. D.

FLESH. [FOOD.]

FLINT. The Heb. quadriliteral חַלָּמִישׁ is rendered *flint* in Deut. viii. 15, xxxii. 13; Ps. cxiv. 8; and Is. l. 7. In Job xxviii. 9 the same word is rendered *rock* in the text, and *flint* in the margin. In the three first passages the reference is to God's bringing water and oil out of the naturally barren rocks of the wilderness for the sake of his people. In Isaiah the word is used metaphorically to signify the firmness of the prophet in resistance to his persecutors. In Ez iii. 9 the English word "flint"

Digitized by Google

occurs in the same sense, but there it represents the Heb. *Tsor*. So also in Is. v. 28 we have *like flint*, in reference to the hoofs of horses. In 1 Macc. x. 73 κόχλαξ is translated *flint*, and in Wisd. xi. 4 the expression ἐκ πέτρας ἀκροτόμου is adopted from Deut. viii. 15 (LXX.). [KNIFE.]

W. D.

FLOOD. [NOAH.]

FLOOR. [PAVEMENT.]

FLOUR. [BREAD.]

FLOWERS. [PALESTINE, BOTANY OF.]

FLUTE (מַשְׂרוֹקִיתָא), a musical instrument, mentioned amongst others (Dan. iii. 5, 7, 10, 15) as used at the worship of the golden image which Nebuchadnezzar had set up. It is derived from שָׂרַק, to hiss; LXX. σύριγξ, a pipe. According to the author of *Shilte-Haggiborim*, this instrument was sometimes made of a great number of pipes — a statement which, if correct, would make its name the Chaldee for the musical instrument called in Hebrew עוּגָב, and erroneously rendered in the A. V. "Organ."

D. W. M.

FLUTE (חָלִיל: χορός: *tibia*), 1 K. i. 40, marg. [PIPE.]

FLUX, BLOODY (δυσεντερία, Acts xxviii. 8), the same as our dysentery, which in the East is, though sometimes sporadic, generally epidemic and infectious, and then assumes its worst form. It is always attended with fever. [FEVER.] A sharp gnawing and burning sensation seizes the bowels, which give off in purging much slimy matter and purulent discharge. When blood flows it is said to be less dangerous than without it (Schmidt, *Bibl. Medic.* c. xiv. pp. 503–507). King Jehoram's disease was probably a chronic dysentery, and the "bowels falling out" the *prolapsus ani*, known sometimes to ensue (2 Chr. xxi. 15, 19).

H. H.

FLY. FLIES. The two following Hebrew terms denote flies of some kind.

1. *Zĕbûb* (זְבוּב: μυῖα: *musca*) occurs only in Eccl. x. 1, "Dead *zĕbûbim* cause the ointment of the apothecary to send forth a stinking savour," and in Is. vii. 18, where it is said, "the Lord shall hiss for the *zĕbûb* that is in the uttermost part of the rivers of Egypt." The Heb. name, it is probable, is a generic one for any insect, but the etymology is a matter of doubt (see Gesenius, *Thes.* p. 401; *Heb. and Chald. Lex.* s. v.; and Fürst, *Heb. Concord.* s. v.). In the first quoted passage allusion is made to flies, chiefly of the family *Muscidæ*, getting into vessels of ointment or other substances; even in this country we know what an intolerable nuisance the house-flies are in a hot summer when they abound, crawling everywhere and into everything; but in the East the nuisance is tenfold greater. The *zĕbûb* from the rivers of Egypt has by some writers, as by Oedmann (*Vermisch. Samm.* vi. 79), been identified with the *zimb* of which Bruce (*Trav.* v. 190) gives a description, and which is evidently some species of *Tabanus*. Sir G. Wilkinson has given some account (*Transac. of the Entomol. Soc.* ii. p. 183) of an injurious fly under the name of *dthebab*, a term almost identical with *zĕbûb*. It would not do to press too much upon this point when it is considered that Egypt abounds with noxious insects: but it must be allowed that there is some reason for this identification; and though, as was stated above, *zĕbûb* is probably a generic name for any *flies*, in this passage of Isaiah it may be used to denote some very troublesome and injurious fly, κατ' ἐξοχήν. "The *dthebab* is a long gray fly, which comes out about the rise of the Nile, and is like the *cleg* of the north of England; it abounds in calm hot weather, and is often met with in June and July, both in the desert and on the Nile." This insect is very injurious to camels, and causes their death, if the disease which it generates is neglected; it attacks both man and beast.

2. *'Arób* (עָרֹב: κυνόμυια: *omne genus muscarum, musca diversi generis, musca gravissima*: "swarms *of flies*," "divers sorts of *flies*," A. V.), the name of the insect, or insects, which God sent to punish Pharaoh; see Ex. viii. 21–31; Ps. lxxviii. 45, cv. 31. The question as to what particular insect is denoted by *'árób*, or whether any one species is to be understood by it, has long been a matter of dispute. The Scriptural details are as follows: the *'árób* filled the houses of the Egyptians, they covered the ground, they lighted on the people, the land was laid waste on their account. From the expression in ver. 31, "there remained not one," some writers have concluded that the Hebrew word points to some definite species; we do not think, however, that much stress ought to be laid upon this argument; if the *'árób* be taken to denote "swarms," as the Auth. Version renders it, the "not *one* remaining" may surely have for its antecedent an individual fly understood in the collective "swarms." The LXX. explain *'árób* by κυνόμυια, *i. e.* "dog-fly;" it is not very clear what insect is meant by this Greek term, which is frequent in Homer, who often uses it as an abusive epithet. It is not improbable that one of the *Hippoboscidæ*, perhaps *H. equina*, Linn., is the κυνόμυια of Ælian (*N. A.* iv. 51), though Homer may have used the compound term to denote extreme impudence, implied by the shamelessness of the dog and the teasing impertinence of the common fly (*Musca*). As the *'árób* are said to have filled the houses of the Egyptians, it seems not improbable that common flies (*Muscidæ*) are more especially intended, and that the compound κυνόμυια denotes the grievous nature of the plague, though we see no reason to restrict the *'árób* to any one family. "Of insects," says Sonnini (*Trav.* iii. p. 299), "the most troublesome in Egypt are flies; both man and beast are cruelly tormented with them. No idea can be formed of their obstinate rapacity It is in vain to drive them away; they return again in the self-same moment, and their perseverance wearies out the most patient spirit." The *'árób* may include various species of *Culicidæ* (gnats), such as the mosquito, if it is necessary to interpret the "devouring" nature of the *'árób* (in Ps. lxxviii. 45) in a strictly literal sense; though the expression used by the Psalmist is not inapplicable to the flies, which even to this day in Egypt may be regarded as a "plague," and which are the great instrument of spreading the well-known ophthalmia, which is conveyed from one individual to another by these dreadful pests; or the literal meaning of the *'árób* "devouring" the Egyptians may be understood in its fullest sense of the *Muscidæ*, if we suppose that the people may have been punished by the larvæ gaining admittance into the bodies as into the stomach, frontal sinus, and intestines

Digitized by Google

and so occasioning in a hot climate many instances of death;[a] see for cases of *Myasis* produced by *dipterous larvæ*, *Transactions of Entomol. Soc.* ii. pp. 266–269.

The identification of the *'ârôb* with the cockroach (*Blatta orientalis*), which Oedmann (*Verm. Sam.* pt. ii. c. 7) suggests, and which Kirby (*Bridgw. Treat.* ii. p. 357) adopts, has nothing at all to recommend it, and is purely gratuitous, as Mr. Hope proved in 1837 in a paper on this subject in the *Trans. Ent. Soc.* ii. p. 179–183. The error of calling the cockroach a beetle, and the confusion which has been made between it and the Sacred Beetle of Egypt (*Ateuchus sacer*), has recently been repeated by M. Kalisch (*Hist. and Crit. Comment. Ex. l. c.*). The cockroach, as Mr. Hope remarks, is a nocturnal insect, and prowls about for food at night, "but what reason have we to believe that the fly attacked the Egyptians by night and not by day?" We see no reason to be dissatisfied with the reading in our own version. W. H.

* FLYING ROLL. [ROLL, Amer. ed.]

* FOLD. [SHEEP-FOLD.]

FOOD. The diet of eastern nations has been in all ages light and simple. As compared with our own habits, the chief points of contrast are the small amount of animal food consumed, the variety of articles used as accompaniments to bread, the substitution of milk in various forms for our liquors, and the combination of what we should deem heterogeneous elements in the same dish, or the same meal. The chief point of agreement is the large consumption of bread, the importance of which in the eyes of the Hebrew is testified by the use of the term *lechem* (originally food of any kind) specifically for bread, as well as by the expression "staff of bread" (Lev. xxvi. 26: Ps. cv. 16; Ez. iv. 16, xiv. 13). Simpler preparations of corn were, however, common; sometimes the fresh green ears were eaten in a natural state,[b] the husks being rubbed off by the hand (Lev. xxiii. 14; Deut. xxiii. 25; 2 K. iv. 42; Matt. xii. 1; Luke vi. 1); more frequently, however, the grains, after being carefully picked, were roasted in a pan over a fire (Lev. ii. 14), and eaten as "parched corn," in which form it was an ordinary article of diet, particularly among laborers, or others who had not the means of dressing food (Lev. xxiii. 14; Ruth ii. 14; 1 Sam. xvii. 17, xxv. 18; 2 Sam. xvii. 28): this practice is still very usual in the East (cf. Lane, i. 251; Robinson, *Researches*, ii. 350). Sometimes the grain was bruised (like the Greek *polenta*, Plin. xviii. 14), in which state it was termed either גֶּרֶשׂ (ἑρικτά, LXX.; A. V. "beaten" Lev. ii. 14, 16), or רִיפוֹת (πτισάναι, Aquil. Symm.; A. V. "corn;" 2 Sam. xvii. 19; cf. Prov. xxvii. 22), and then dried in the sun; it was eaten either mixed with oil (Lev. ii. 15), or made into a soft cake named עֲרִיסָה (A. V. "dough;" Num. xv. 20; Neh. x. 37; Ez. xliv. 30). The Hebrews used a great variety of articles (John xxi. 5) to give a relish to bread. Sometimes salt was so used (Job vi. 6), as we learn from the passage just quoted; sometimes the bread was dipped into the sour wine (A. V. "vinegar") which the laborers drank (Ruth ii. 14); or, where meat was eaten, into the gravy, which was either served up separately for the purpose, as by Gideon (Judg. vi. 19), or placed in the middle of the meat dish, as done by the Arabs (Burckhardt, *Notes*, i. 63), whose practice of dipping bread in the broth, or melted fat of the animal, strongly illustrates the reference to the sop in John xiii. 26 ff. The modern Egyptians season their bread with a sauce[c] composed of various stimulants, such as salt, mint, sesame, and chick-peas (Lane, i. 180). The Syrians, on the other hand, use a mixture of savory and salt for the same purpose (Russell, i. 93). Where the above mentioned accessories were wanting, fruit, vegetables, fish, or honey, were used. In short it may be said that all the articles of food which we are about to mention were mainly viewed as subordinates to the staple commodity of bread. The various kinds of bread and cakes are described under the head of BREAD.

Milk and its preparations hold a conspicuous place in eastern diet, as affording substantial nourishment; sometimes it was produced in a fresh state (חָלָב; Gen. xviii. 8), but more generally in the form of the modern *leban*, i. e. sour milk (חֶמְאָה; A. V. "butter;" Gen. xviii. 8; Judg. v. 25; 2 Sam. xvii. 29). The latter is universally used by the Bedouins, not only as their ordinary beverage (Burckhardt, *Notes*, i. 240), but mixed with flour, meat, and even salad (Burckhardt, i. 58, 63; Russell, *Aleppo*, i. 118). It is constantly offered to travellers, and in some parts of Arabia it is deemed scandalous to take any money in return for it (Burckhardt, *Arabia*, i. 120). For a certain season of the year, *leban* makes up a great part of the food of the poor in Syria (Russell, *l. c.*). Butter (Prov. xxx. 33) and various forms of coagulated milk, of the consistency of the modern *kaimak* (Job x. 10; 1 Sam. xvii. 18; 2 Sam. xvii. 29) were also used. [BUTTER; CHEESE; MILK.]

Fruit was another source of subsistence: figs stand first in point of importance; the early sorts described as the "summer fruit" (קַיִץ; Am. viii. 1, 2), and the "first ripe fruit" (בִּכּוּרָה: Hos ix. 10; Mic. vii. 1) were esteemed a great luxury, and were eaten as fresh fruit; but they were generally dried and pressed into cakes, similar to the date-cakes of the Arabians (Burckhardt, *Arabia*, i. 57), in which form they were termed דְּבֵלִים (παλάθαι, A. V. "cakes of figs;" 1 Sam. xxv. 18; xxx. 12; 1 Chr. xii. 40), and occasionally קַיִץ simply (2 Sam. xvi. 1; A. V. "summer fruit"). Grapes were generally eaten in a dried state as raisins (צִמֻקִים; *ligaturæ uvæ passæ*, Vulg.; 1 Sam. xxv. 18, xxx. 12; 2 Sam. xvi. 1; 1 Chr. xii. 40), but sometimes, as before, pressed into cakes, named אֲשִׁישָׁה (2 Sam. vi. 19; 1 Chr. xvi. 3; Cant. ii. 5; Hos. iii. 1), understood by the LXX. as a sort of cake, λάγανον ἀπὸ τηγάνου, and by

[a] There is, however, no occasion to appeal to the above explanation, for the common flies in Egypt well merit the epithet of "devouring." Mr Tristram assures us that he has had his ankles and instep covered with blood from the bite of the common fly, as he lay on the sand in the desert with his boots off.

[b] This custom is still practiced in Palestine (Robinson's *Researches*, i. 493).

[c] The later Jews named this sauce חֲרוֹסֶת (Mishn. *Pes.* 2, § 8): it consisted of vinegar, almonds, and spice, thickened with flour. It was used at the celebration of the Passover (*Pes.* 10, § 3).

Digitized by Google

the A. V. as a "flagon of wine." Fruit-cake forms a part of the daily food of the Arabians, and is particularly adapted to the wants of travellers; dissolved in water it affords a sweet and refreshing drink (Niebuhr, *Arabia*, p. 57; Russell, *Aleppo*, i. 82); an instance of its stimulating effect is recorded in 1 Sam. xxx. 12. Apples (probably citrons) are occasionally noticed, but rather in reference to their fragrance (Cant. ii. 5, vii. 8) and color (Prov. xxv. 11), than as an article of food. Dates are not noticed in Scripture, unless we accept the rendering of קַיִץ in the LXX. (2 Sam. xvi. 1) as = φοίνικες; it can hardly be doubted, however, that, where the palm-tree flourished, as in the neighborhood of Jericho, its fruit was consumed; in Joel i. 12 it is reckoned among other trees valuable for their fruit. The pomegranate-tree is also noticed by Joel; it yields a luscious fruit, from which a species of wine was expressed (Cant. viii. 2; Hag. ii. 19). Melons were grown in Egypt (Num. xi. 5), but not in Palestine. The mulberry is undoubtedly mentioned in Luke xvii. 6 under the name συκάμινος; the Hebrew בְּכָאִים so translated (2 Sam. v. 23; 1 Chr. xiv. 14) is rather doubtful; the Vulg. takes it to mean *pears*. The συκομορέα ("sycamore," A. V.; Luke xix. 4) differed from the tree last mentioned; it was the Egyptian fig, which abounded in Palestine (1 K. x. 27), and was much valued for its fruit (1 Chr. xxvii. 28; Am. vii. 14). [Apple; Citron; Fig; Mulberry-trees; Palm-tree; Pomegranate; Sycamine-tree; Sycamore.]

Of vegetables we have most frequent notice of lentils (Gen. xxv. 34; 2 Sam. xvii. 28, xxiii. 11; Ez. iv. 9), which are still largely used by the Bedouins in travelling (Burckhardt, *Arabia*, i. 65); beans (2 Sam. xvii. 28; Ez. iv. 9), which still form a favorite dish in Egypt and Arabia for breakfast, boiled in water and eaten with butter and pepper; from 2 Sam. xvii. 28 it might be inferred that beans and other kinds of pulse were roasted, as barley was, but the second קָלִי in that verse is probably interpolated, not appearing in the LXX., and even if it were not so, the reference to *pulse* in the A. V., as of *cicer* in the Vulg., is wholly unwarranted; cucumbers (Num. xi. 5; Is. i. 8; Bar. vi. 70 [or Epist. of Jer. 70]; cf. 2 K. iv. 39 where wild gourds, *cucumeres asinini*, were picked in mistake for cucumbers); leeks, onions, and garlic, which were and still are of a superior quality in Egypt (Num. xi. 5; cf. Wilkinson, *Anc. Egypt.* ii. 374; Lane, i. 251); lettuce, of which the wild species, *lactuca agrestis*, is identified with the Greek πικρίς by Pliny (xxi. 65), and formed, according to the LXX. and the Vulg., the "bitter herbs" (מְרֹרִים) eaten with the paschal lamb (Ex. xii. 8; Num. ix. 11); endive, which is still well known in the East (Russell, i. 91), may have been included under the same class. In addition to the above we have notice of certain "herbs" (אֹרוֹת; 2 K. iv. 39) eaten in times of scarcity, which were mallows according to the Syriac and Arabic versions, but according to the Talmud a vegetable resembling the *Brassica eruca* of Linnæus; and again of the purslane (מַלּוּחַ: ἅλιμα: A. V. "mallows") and broom-root (רְתָמִים, A. V. "juniper;" Job xxx 4) as eaten by the poor in time of famine, unless the latter were gathered as fuel. An insipid plant, probably purslane, used in salad, appears to be referred to in Job vi. 6, under the expression רִיר חַלָּמוּת ("white of egg," A. V.). The usual method of eating vegetables was in the form of pottage (נָזִיד: ἕψημα: *pulmentum*; Gen. xxv. 29; 2 K. iv. 38; Hag. ii. 12), a meal wholly of vegetables was deemed very poor fare (Prov. xv. 17; Dan. i. 12; Rom. xiv. 2). The modern Arabians consume but few vegetables; radishes and leeks are most in use, and are eaten raw with bread (Burckhardt, *Arabia*, i. 56). [Beans; Cucumber; Garlic; Gourd; Leek; Lentiles; Onion.]

The spices or condiments known to the Hebrews were numerous; cummin (Is. xxviii. 25; Matt. xxiii. 23), dill (Matt. xxiii. 23, "anise," A. V.), coriander (Ex. xvi. 31; Num. xi. 7), mint (Matt. xxiii. 23), rue (Luke xi. 42), mustard (Matt. xiii. 31, xvii. 20), and salt (Job vi. 6), which is reckoned among "the principal things for the whole use of man's life" (Ecclus. xxxix. 26). Nuts (pistachios) and almonds (Gen. xliii. 11) were also used as *whets* to the appetite. [Almond-tree; Anise; Coriander; Cummin; Mint; Mustard; Nuts; Spices.]

In addition to these classes, we have to notice some other important articles of food: in the first place, honey, whether the natural product of the bee (1 Sam. xiv. 25; Matt. iii. 4), which abounds in most parts of Arabia (Burckhardt, *Arabia*, i. 54), or the other natural and artificial productions included under that head, especially the *dibs* of the Syrians and Arabians, *i. e.* grape-juice boiled down to the state of the Roman *defrutum*, which is still extensively used in the East (Russell, i. 82); the latter is supposed to be referred to in Gen. xliii. 11 and Ez. xxvii. 17. The importance of honey, as a substitute for sugar, is obvious; it was both used in certain kinds of cake (though prohibited in the case of meat offerings, Lev. ii. 11) as in the pastry of the Arabs (Burckhardt, *Arabia*, i. 54), and was also eaten in its natural state either by itself (1 Sam. xiv. 27; 2 Sam. xvii. 29; 1 K. xiv. 3), or in conjunction with other things, even with fish (Luke xxiv. 42). "Butter and honey" is an expression for rich diet (Is. vii. 15, 22); such a mixture is popular among the Arabs (Burckhardt, *Arabia*, i. 54). "Milk and honey" are similarly coupled together, not only frequently by the sacred writers, as expressive of the richness of the promised land, but also by the Greek poets (cf. Callim. *Hymn. in Jov.* 48; Hom. *Od.* xx. 68). Too much honey was deemed unwholesome (Prov. xxv. 27). With regard to oil, it does not appear to have been used to the extent we might have anticipated; the modern Arabs only employ it in frying fish (Burckhardt, *Arabia*, i. 54), but for all other purposes butter is substituted: among the Hebrews it was deemed an expensive luxury (Prov. xxi. 17), to be reserved for festive occasions (1 Chr. xii. 40); it was chiefly used in certain kinds of cake (Lev. ii. 5 ff.; 1 K. xvii. 12). "Oil and honey" are mentioned in conjunction with bread in Ez. xvi. 13, 18. The Syrians, especially the Jews, eat oil and honey (*dibs*) mixed together (Russell, i. 80). Eggs are not often noticed, but were evidently known as articles of food (Is. x. 14, lix. 5; Luke xi. 12), and are reckoned by Jerome (*In Epitaph. Paul.* i. 176) among the delicacies of the table. [Honey; Oil.]

The Orientals have been at all times sparing in the use of animal food: not only does the excessive

Digitized by Google

eat of the climate render it both unwholesome to eat much meat (Niebuhr *Descript.* p. 46) and expensive from the necessity of immediately consuming a whole animal, but beyond this the ritual regulations of the Mosaic law in ancient, as of the Koran in modern times, have tended to the same result. It has been inferred from Gen. ix. 3, 4, that animal food was not permitted before the flood: but the notices of the flock of Abel (Gen. iv. 2) and of the herds of Jabal (Gen. iv. 20), as well as the distinction between clean and unclean animals (Gen. vii. 2), favor the opposite opinion; and the permission in Gen. ix. 3 may be held to be only a more explicit declaration of a condition implied in the grant of universal dominion previously given (Gen. i. 28). The prohibition then expressed against consuming the blood of any animal (Gen. ix. 4) was more fully developed in the Levitical law, and enforced by the penalty of death (Lev. iii. 17, vii 26, xix. 26; Deut. xii. 16; 1 Sam. xiv. 32 ff.; Ez. xliv. 7, 15), on the ground, as stated in Lev. xvii. 11 and Deut. xii. 23, that the blood contained the principle of life, and, as such, was to be offered on the altar; probably there was an additional reason in the heathen practice of consuming blood in their sacrifices (Ps. xvi. 4; Ex. xxxiii. 25). The prohibition applied to strangers as well as Israelites, and to all kinds of beast or fowl (Lev. vii. 26, xvii. 12, 13). So strong was the feeling of the Jews on this point, that the Gentile converts to Christianity were laid under similar restrictions (Acts xv. 20, 29, xxi. 25). As a necessary deduction from the above principle, all animals which had died a natural death (נְבֵלָה, Deut. xiv. 21), or had been torn of beasts (טְרֵפָה, Ex. xxii. 31), were also prohibited (Lev. xvii. 15; cf. Ex. iv. 14), and to be thrown to the dogs (Ex. xxii. 31): this prohibition did not extend to strangers (Deut. xiv. 21). Any person infringing this rule was held unclean until the evening, and was obliged to wash his clothes (Lev. xvii. 15). In the N. T. these cases are described under the term πνικτόν (Acts xv. 20), applying not only to what was *strangled* (as in A. V.), but to any animal from which the blood was not regularly poured forth. Similar prohibitions are contained in the Koran (ii. 175, v. 4, xvi. 116), the result of which is that at the present day the Arabians eat no meat except what has been bought at the shambles. Certain portions of the fat of sacrifices were also forbidden (Lev. iii. 9, 10), as being set apart for the altar (Lev. iii. 16, vii. 23; cf. 1 Sam. ii. 16 ff.; 2 Chr. vii. 7): it should be observed that the term in Neh. viii. 10, translated *fat*, is not חֵלֶב, but מַשְׁמַנִּים = the fatty pieces of meat, delicacies. In addition to the above, Christians were forbidden to eat the flesh of animals, portions of which had been offered to idols (εἰδωλόθυτα), whether at private feasts, or as bought in the market (Acts xv. 29, xxi. 25; 1 Cor. viii. 1 ff.). All beasts and birds classed as unclean (Lev. xi. 1 ff.; Deut. xiv. 4 ff.) were also prohibited [Unclean Beasts and Birds]: and in addition to these general precepts there was a special prohibition against "seething a kid in his mother's milk" (Ex. xxiii. 19, xxxiv 26; Deut. xiv. 21), which has been variously understood, by Talmudical writers, as a general prohibition against the joint use of meat and milk (Mishna, *Cholin*, cap. 8, § 1); by Michaelis (*Mos. Recht*, iv. 210), as prohibiting the use of fat or milk, as compared with ..., in cooking; by Luther and Calvin, as prohibiting the slaughter of young animals; and by Bochart and others, as discountenancing cruelty in any way. These interpretations, however, all fail in establishing any connection between the precept and the offering of the first-fruits, as implied in the three passages quoted. More probably it has reference to certain heathen usages at their harvest festivals (Maimonides, *More Neboch.* 3, 48; Spencer, *de Legg. Hebr. Ritt.* p. 535 ff.): there is a remarkable addition in the Samaritan version and in some copies of the LXX. in Deut. xiv. 21, which supports this view: ὃς γὰρ ποιεῖ τοῦτο, ὡσεὶ ἀσεβάλακα θύσει, ὅτι μίασμά ἐστι τῷ θεῷ Ἰακώβ (cf. Knobel, *Comment.* in Ex. xxiii. 19). The Hebrews further abstained from eating the sinew of the hip (גִּיד הַנָּשֶׁה, Gen. xxxii. 32), in memory of the struggle between Jacob and the angel (comp. ver. 25). The LXX., the Vulg., and the A. V. interpret the ἅπαξ λεγόμενον word *nasheh* of the shrinking or benumbing of the muscle (ὃ ἐνάρκησεν: *qui emarcuit:* "which shrank"): Josephus (*Ant.* i 20, § 2) more correctly explains it, τὸ νεῦρον τὸ πλατύ; and there is little doubt that the nerve he refers to is the *nervus ischiadicus*, which attains its greatest thickness at the hip. There is no further reference to this custom in the Bible; but the Talmudists (*Cholin*, 7) enforced its observance by penalties.

Under these restrictions the Hebrews were permitted the free use of animal food: generally speaking they only availed themselves of it in the exercise of hospitality (Gen. xviii. 7), or at festivals of a religious (Ex. xii. 8), public (1 K. i. 9; 1 Chr. xii. 40), or private character (Gen. xxvii. 4; Luke xv. 23); it was only in royal households that there was a daily consumption of meat (1 K. iv. 23; Neh. v. 18). The use of meat is reserved for similar occasions among the Bedouins (Burckhardt's *Notes*, i. 63). The animals killed for meat were — calves (Gen. xviii. 7; 1 Sam. xxviii. 24; Am. vi. 4), which are further described by the term fatling (מָרִיא = μόσχος σιτευτός, Luke xv. 23, and σιτιστά, Matt. xxii. 4; 2 Sam. vi. 13; 1 K. i. 9 ff.; A. V. "fat cattle"); lambs (2 Sam. xii. 4; Am. vi. 4); oxen, not above three years of age (1 K. i. 9; Prov. xv. 17; Is. xxii. 13; Matt. xxii. 4), which were either stall-fed (בָּרִאים: μόσχοι ἐκλεκτοί), or taken up from the pastures (רְעִי: βόες νομάδες; 1 K. iv. 23); kids (Gen. xxvii. 9; Judg. vi. 19; 1 Sam. xvi. 20); harts, roebucks, and fallow-deer (1 K. iv. 23), which are also brought into close connection with ordinary cattle in Deut. xiv. 5, as though holding an intermediate place between tame and wild animals; birds of various kinds (צִפֳּרִים: A. V. "fowls;" Neh. v. 18; the LXX., however, give χίμαρος, as though the reading were צְפִירִים); quail in certain parts of Arabia (Ex. xvi. 13; Num. xi. 32); poultry (פַּרְבָּרִים: 1 K. iv. 23; understood generally by the LXX., ὀρνίθων ἐκλεκτῶν σιτευτά; by Kimchi and the A. V. as fatted fowl; by Gesenius, *Thesaur.* 246, as geese, from the *whiteness* of their plumage; by Thenius, *Comm.* in *l. c.*, as guinea-fowls, as though the word represented the call of that bird); partridges (1 Sam. xxvi. 20); fish, with the exception of such as were without scales and fins (Lev. xi. 9; Deut. xiv

Digitized by Google

), both salted, as was probably the case with the sea-fish brought to Jerusalem (Neh. xiii. 16), and fresh (Matt. xiv. 19, xv. 36; Luke xxiv. 42): in our Saviour's time it appears to have been the usual food about the Sea of Galilee (Matt. vii. 10); the term ὀψάριον is applied to it by St. John (vi. 9; xxi. 9 ff.) in the restricted sense which the word obtained among the later Greeks, as = *fish*. Locusts, of which certain species only were esteemed clean (Lev. xi. 22), were occasionally eaten (Matt. iii. 4), but considered as poor fare. They are at the present day largely consumed by the poor both in Persia (Morier's *Second Journey*, p. 44) and in Arabia (Niebuhr, *Voyage*, i. 319); they are salted and dried, and roasted, when required, on a frying-pan with butter (Burckhardt's *Notes*, ii. 92; Niebuhr, *l. c.*).

Meat does not appear ever to have been eaten by itself; various accompaniments are noticed in Scripture, as bread, milk, and sour milk (Gen. xviii. 8); bread and broth (Judg. vi. 19); and with fish either bread (Matt. xiv. 19, xv. 36; John xxi. 9) or honeycomb (Luke xxiv. 42): the instance in 2 Sam. vi. 19 cannot be relied on, as the term אֲשִׁפָּר, rendered in the A. V. *a good piece of flesh*, after the Vulg., *assatura bibulæ carnis*, means simply a portion or measure, and may apply to wine as well as meat. For the modes of preparing meat, see COOKING; and for the times and manner of eating, MEALS: see also FISH, FOWL, &c., &c.

To pass from ordinary to occasional sources of subsistence: prison diet consisted of bread and water administered in small quantities (1 K. xxii. 27; Jer. xxxvii. 21); pulse and water was considered but little better (Dan. i. 12); in time of sorrow or fasting it was usual to abstain either altogether from food (2 Sam. xii. 17, 20), or from meat, wine, and other delicacies, which were described as לֶחֶם חֲמֻדוֹת, lit. *bread of desires* (Dan. x. 3). In time of extreme famine the most loathsome food was swallowed; such as an ass's head (2 K. vi. 25), the ass, it must be remembered, being an unclean animal (for a parallel case comp. Plutarch, *Artaxerx.* 24), and dove's dung (see the article on that subject), the dung of cattle (Joseph. *B. J.* v. 13, § 7), and even possibly their own dung (2 K. xviii. 27). The consumption of human flesh was not altogether unknown (2 K. vi. 28; cf. Joseph. *B. J.* vi. 3, § 4), the passages quoted supplying instances of the exact fulfillment of the prediction in Deut. xxviii. 56, 57; comp. also La n. ii. 20, iv. 10; Ez. v. 10.

With regard to the beverages used by the Hebrews, we have already mentioned milk, and the probable use of barley-water, and of a mixture resembling the modern *sherbet*, formed of fig-cake and water. The Hebrews probably resembled the Arabs in not drinking much during their meals, but concluding them with a long draught of water. It is almost needless to say that water was most generally drunk. In addition to these the Hebrews were acquainted with various intoxicating liquors, the most valued of which was the juice of the grape, while others were described under the general term of *shechar* or *strong drink* (Lev. x. 9; Num. vi. 3; Judg. xiii. 4, 7), if indeed the latter does not sometimes include the former (Num. xxviii. 7). These were reserved for the wealthy or for festive occasions: the poor consumed a sour wine (A. V. "vinegar;" Ruth ii. 14; Matt. xxvii. 48), calculated to quench thirst, but not agreeable to the taste (Prov. x. 26). [DRINK, STRONG VINEGAR; WATER; WINE.] W. L. B.

* It is not correct to say that the food of the Orientals is *light* and *simple*, unless meat be the only *heavy* article. They use an inordinate amount of grease in cooking. Eggs are fried in twice their bulk of fat, or butter, or oil. Rice is not eaten except drenched with butter. A stew is unheard of unless the meat and vegetables be first fried in butter or fat, that they may drink in as much of the fatty matter as possible.

Again, they are famous in the East for elaborate compounds. *Kibbe*, their most prized article of diet, is compounded of cracked wheat, boiled and dried previously to give it solidity, beaten up with meat, and onions, and spices, and the nut of a species of pine, a very heavy article of diet. Esau's pottage was probably compounded with lentils, oil, onions, and spices, like the *mejedderah* of the present day. Dyspepsia is one of the most universal disorders of the people, and arises from their heavy and unwholesome food, and the fact that their heavy meal is taken just before retiring for the night.

Again, oil is not used merely for frying fish, but is eaten universally in place of butter and fat during Lent, and at all times is a prominent article of diet. I know of a single family where they use 500 pounds of it per annum, of which the larger part is for food. There are twelve to fourteen persons in the household. G. E. P.

* **FOOT, WATERING WITH THE**, is mentioned in Deut. xi. 10, as a mark of the inferiority of Egypt to Palestine in regard to the existence there of fountains and rivulets. The phrase (whatever its origin may be) imports that the Egyptians, owing to their scanty supplies of water, were obliged to practice a careful, pains-taking economy in the use of such means of irrigation as they possessed. The reference, as some think, is to a reel with a rope and bucket attached to it, "the upper part of which the operator drew towards him with his hands, while at the same time he pushed the lower part from him with his feet" (Rob. *Bibl. Res.* ii. 351, and note ii., at the end of vol. i.). Niebuhr gives a drawing of such a machine which he found very common in India (*Reisebeschr. nach Arabien*, i. 148), but says that he saw it only once in Egypt. The more common explanation is that stated under GARDEN. In addition to the testimony there, Dr. Shaw (*Travels in Barbary and the Levant*, ii. 267) says of the modern Egyptians that they plant their various sorts of pulse in rills, and that when they water them, "they stand ready, as occasion requires, to stop and divert the torrent, by turning the earth against it with the foot, and opening at the same time, with a mattock, a new track to receive it." H.

FOOTMAN, a word employed in the Authorized Version in two senses. (1.) Generally, to distinguish those of the people or of the fighting-men who went on foot from those who were on horseback or in chariots. The Hebrew word for this is רַגְלִי, *ragli*, from *regel*, a foot. The LXX. commonly express it by πεζοί, or occasionally ταγμάτα.

But (2.) The word occurs in a more special sense (in 1 Sam. xxii. 17 only), and as the translation of a different term from the above — רָץ, *rats*

This passage affords the first mention of the existence of a body of swift runners in attendance on the king, though such a thing had been foretold by Samuel (1 Sam. viii. 11). This body appear to have been afterwards kept up, and to have been distinct from the body-guard — the six hundred, and the thirty — who were originated by David. See 1 K. xiv. 27, 28; 2 Chr. xii. 10, 11; 2 K. xi. 4, 6, 11, 13, 19. In each of these cases the word is the same as the above, and is rendered "guard:" but the translators were evidently aware of its signification, for they have put the word "runners" in the margin in two instances (1 K. xiv. 27; 2 K. xi. 13). This indeed was the force of the term "footman" at the time the A. V. was made, as is plain not only from the references just quoted, but amongst others from the title of a well-known tract of Bunyan's — *The Heavenly Footman, or a Description of the Man that gets to Heaven*, on 1 *Cor.* ix. 24 (St. Paul's figure of the race). Swift running was evidently a valued accomplishment of a perfect warrior — a *gibbor*, as the Hebrew word is — among the Israelites. There are constant allusions to this in the Bible, though obscured in the A. V., from the translators not recognizing the technical sense of the word *gibbor*. Among others see Ps. xix. 5; Job xvi. 14; Joel ii. 7, where "strong man," "giant," and "mighty man," are all *gibbor*. David was famed for his powers of running; they are so mentioned as to seem characteristic of him (1 Sam. xvii. 22, 48, 51, xx. 6), and he makes them a special subject of thanksgiving to God (2 Sam. xxii. 30; Ps. xviii. 29). The cases of Cushi and Ahimaaz (2 Sam. xviii.) will occur to every one. It is not impossible that the former — "the Ethiopian," as his name most likely is — had some peculiar mode of running. [CUSHI.] Asahel also was "swift on his feet," and the Gadite heroes who came across to David in his difficulties were "swift as the roes upon the mountains:" but in neither of these last cases is the word *rootz* employed. The word probably derives its modern sense from the custom of domestic servants running by the side of the carriage of their master. [GUARD.] G.

* **FORDS.** [See JORDAN, iii.]

FOREHEAD (מֵצַח, from נָצַח, rad. inus. *shine*, Gesen. p. 815: *μέτωπον*: *frons*). The practice of veiling the face in public for women of the higher classes, especially married women, in the East, sufficiently stigmatizes with reproach the unveiled face of women of bad character (Gen. xxiv. 65; Jer. iii. 3; Niebuhr, *Voy.* i. 132, 149, 150; Shaw, *Travels*, p. 228, 240; Hasselquist, *Travels*, p. 58; Buckingham, *Arab Tribes*, p. 312; Lane, *Mod. Eg.* i. 72, 77, 225–248; Burckhardt, *Travels*, i. 233). An especial force is thus given to the term "hard of forehead" as descriptive of audacity in general (Ez. iii. 7, 8, 9; comp. Juv. *Sat.* xiv. 242 — "Ejectum attritâ de fronte ruborem").

The custom among many oriental nations both of coloring the face and forehead, and of impressing on the body marks indicative of devotion to some special deity or religious sect, is mentioned elsewhere [CUTTINGS IN FLESH] (Burckhardt, *Notes on Bed.* i. 51; Niebuhr, *Voy.* ii. 57; Wilkinson, *Anc. Eg.* ii. 242; Lane, *Mod. Eg.* i. 66). It is doubtless alluded to in Rev. (xiii. 16, 17, xiv. 9, xvii. 5, xx. 4), and in the opposite direction by Ezekiel (ix. 4, 6), and in Rev. (vii. 3, ix. 4, xiv. 1, xxii. 4, The mark mentioned by Ezekiel with approval has been supposed to be the figure of the cross, said to be denoted by the word here used, תָּו, in the ancient Semitic language (Gesen. p. 1495; Spencer, *de Leg. Hebr.* ii. 20, 3, pp. 409, 413).

It may have been by way of contradiction to heathen practice that the high-priest wore on the front of his mitre the golden plate inscribed "Holiness to the Lord" (Ex. xxviii. 36, xxxix. 30 Spencer, *l. c.*).

The "jewels for the forehead," mentioned by Ezekiel (xvi. 12), and in margin of A. V. Gen xxiv. 22, were in all probability nose-rings (Is. iii. 21; Lane, *Mod. Eg.* iii. 225, 226; Harmer, *Obs* iv. 311, 312; Gesen. p. 870; Winer, s. v. *Nasenring*). The Persian and also Egyptian women wear jewels and strings of coins across their foreheads (Olearius, *Travels*, p. 317; Lane, *Mod. Eg.* ii. 228). [NOSE-JEWEL.]

For the use of frontlets between the eyes, see FRONTLETS, and for the symptoms of leprosy apparent in the forehead, LEPROSY. H. W. P.

* **FORESKIN.** [CIRCUMCISION.]

FOREST. The corresponding Hebrew terms are יַעַר, חֹרֶשׁ, and פַּרְדֵּס. The first of these most truly expresses the idea of a forest, the etymological force of the word being *abundance*, and its use being restricted (with the exception of 1 Sam. xiv. 26, and Cant. v. 1, in which it refers to honey) to an abundance of trees. The second is seldom used, and applies to woods of less extent, the word itself involving the idea of what is being cut down (*silva a cædendo dicta*, Gesen. *Thesaur.* p. 530): it is only twice (1 Sam. xxiii. 15 ff.; 2 Chr. xxvii. 4) applied to woods properly so called; its sense, however, is illustrated in the other passages in which it occurs, namely, Is. xvii. 9 (A. V. "bough"), where the comparison is to the solitary relic of an ancient forest, and Ez. xxxi. 3, where it applies to trees or foliage sufficient to afford shelter (*frondibus nemorosus*, Vulg.: A. V. "with a shadowing shroud"). The third, *pardes* (a word of foreign origin, meaning a *park* or *plantation*, whence also comes the Greek *παράδεισος*), occurs only once in reference to forest trees (Neh. ii. 8), and appropriately expresses the care with which the forests of Palestine were preserved under the Persian rule, a regular warden being appointed, without whose sanction no tree could be felled. Elsewhere the word describes an orchard (Eccl. ii. 5; Cant. iv. 13).

Although Palestine has never been in historical times a woodland country, yet there can be no doubt that there was much more wood formerly than there is at present. It is not improbable that the highlands were once covered with a primeval forest, of which the celebrated oaks and terebinths scattered here and there were the relics. The woods and forests mentioned in the Bible appear to have been situated where they are usually found in cultivated countries, in the valleys and defiles that lead down from the high to the lowlands and in the adjacent plains. They were therefore of no great size, and correspond rather with the idea of the Latin *saltus* than with our *forest*.

(1.) The wood of Ephraim was the most extensive. It clothed the slopes of the hills that bordered the plain of Jezreel, and the plain itself in the neighborhood of Beth-shean (Josh. xvii. 15 ff.), extending, perhaps, at one time to Tabor, which is translated *δρυμός* by Theodotion (Hos. v. 1), and which is still well covered with forest trees (Stanley, p. 350). (2.) The wood of Bethel (2 K. ii. 23, 24;

Digitized by Google

was situated in the ravine which descends to the plain of Jericho. (3.) The forest of Hareth (1 Sam. xxii. 5) was somewhere on the border of the Philistine plain, in the southern part of Judah. (4.) The wood through which the Israelites passed in their pursuit of the Philistines (1 Sam. xiv. 25) was probably near Aijalon (comp. v. 31), in one of the valleys leading down to the plain of Philistia. (5.) The "wood" (Ps. cxxxii. 6) implied in the name of Kirjath-jearim (1 Sam. vii. 2) must have been similarly situated, as also (6.) were the "forests" (*choresh*) in which Jotham placed his forts (2 Chr. xxvii. 4). (7.) The plain of Sharon was partly covered with wood (Strab. xvii. p. 758), whence the LXX. give δρυμός as an equivalent (Is. lxv. 10). It has still a fair amount of wood (Stanley, p. 260). (8.) The wood (*choresh*) in the wilderness of Ziph, in which David concealed himself (1 Sam. xxiii. 15 ff.), lay S. E. of Hebron.

The greater portion of Persæa was, and still is, covered with forests of oak and terebinth (Is. ii. 13; Ez. xxvii. 6; Zech. xi. 2; comp. Buckingham's *Palestine*, pp. 103 ff., 240 ff.; Stanley, p. 324). A portion of this near Mahanaim was known as the "wood of Ephraim" (2 Sam. xviii. 6), in which the battle between David and Absalom took place. Winer (art. *Wälder*) places it on the west side of the Jordan, but a comparison of 2 Sam. xvii. 26, xviii. 3, 23, proves the reverse. The statement in xviii. 23, in particular, marks its position as on the highlands, at some little distance from the valley of the Jordan (comp. Joseph. *Ant.* vii. 10, §§ 1, 2).

The house of the forest of Lebanon (1 K. vii. 2, x. 17, 21; 2 Chr. ix. 16, 20) was so called probably from being fitted up with cedar. It has also been explained as referring to the forest-like rows of cedar pillars. The number and magnificence of the cedars of Lebanon is frequently noticed in the poetical portions of the Bible. The *forest* generally supplied Hebrew writers with an image of pride and exaltation doomed to destruction (2 K. xix. 23; Is. x. 18, xxxii. 19, xxxvii. 24; Jer. xxi. 14, xxii. 7, xlvi. 23; Zech. xi. 2), as well as of unfruitfulness as contrasted with a cultivated field or vineyard (Is. xxix. 17, xxxii. 15; Jer. xxvi. 18; Hos. ii. 12). W. L. B.

* **FORNICATION.** [ADULTERY.]

FORTIFICATIONS. [FENCED CITIES.]

FORTUNA'TUS (Φορτούνατος [Latin, *happy, fortunate*], 1 Cor. xvi. 17), one of three Corinthians, the others being Stephanas and Achaicus, who were at Ephesus when St. Paul wrote his first Epistle. Some have supposed that they were *οἱ Χλοῆς*, alluded to 1 Cor. i. 11; but the language of irony, in which the Apostle must in that case be interpreted in ch. xvi. as speaking of their presence, would become sarcasm too cutting for so tender a heart as St. Paul's to have uttered among his valedictions. "The household of Stephanas" is mentioned in ch. i. 16 as having been baptized by himself: perhaps Fortunatus and Achaicus may have been members of that household. There is a Fortunatus mentioned at the end of Clement's first Epistle to the Corinthians, who was possibly the same person. H. A.

* **FOUNDER.** [HANDICRAFT, I.]

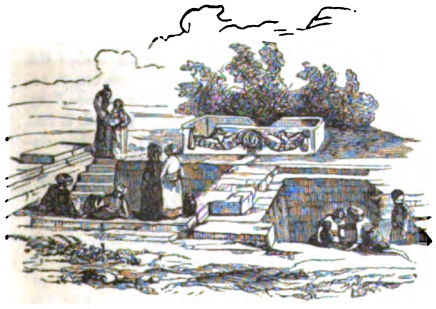
FOUNTAIN. (1.) עַיִן, from עִין, *to flow*; so signifies an "eye," Gesen. p. 1017. (2.) מַעְיָן (from ב), a well-watered place; sometimes in A. V. "well," or "spring." (3.) מוֹצָא מַיִם, from יָצָא, *to go forth*, Gesen. p. 613; a gushing forth of waters. (4.) מָקוֹר, from קוּר, *to dig*, Gesen p. 1209. (5.) מַבּוּעַ, from נָבַע, *to bubble forth* Gesen. p. 845. (6.) בַּל, or בְּלֻחַ, from בָּלַל, *to roll*, Gesen. p. 288, all usually: πηγή, or πηγὴ ὕδατος: *fons* and *fons aquarum*. The special use of these various terms will be found examined in the Appendix to Stanley's *Sinai and Palestine*.

Among the attractive features presented by the Land of Promise to the nation migrating from Egypt by way of the desert, none would be more striking than the natural gush of waters from the ground. Instead of watering his field or garden, as in Egypt, "with his foot" (Shaw, *Travels*, p. 408), the Hebrew cultivator was taught to look forward to a land "drinking water of the rain of heaven, a land of brooks of water, of fountains and depths springing from valleys and hills" (Deut. viii. 7, xi. 11). In the desert of Sinai, "the few living, perhaps perennial springs," by the fact of their rarity assume an importance hardly to be understood in moister climates, and more than justify a poetical expression of national rejoicing over the discovery of one (Num. xxi. 17). But the springs of Palestine, though short-lived, are remarkable for their abundance and beauty, especially those which fall into the Jordan and its lakes throughout its whole course (Stanley, *S. & P.* pp. 17, 122, 123, 295, 373, 509; Burckhardt, *Syria*, p. 344). The spring or fountain of living water, the "eye" of the landscape (see No. 1), is distinguished in all oriental languages from the artificially sunk and inclosed well (Stanley, p. 509). Its importance is implied by the number of topographical names compounded with En, or *'Ain* (Arab.): En-gedi, *'Ain-jidy*, "spring of the gazelle," may serve as a striking instance (1 Sam. xxiii. 29; Reland, p. 763; Robinson, i. 504; Stanley, App. § 50). [See AIN.]

Fountain at Nazareth. (Roberts.)

The volcanic agency which has operated so powerfully in Palestine, has from very early times given tokens of its working in the warm springs which are found near the sea of Galilee and the Dead Sea. One of them, En-eglaim, the "spring of calves," at the N. E. end of the latter, is probably identical with Callirrhöe, mentioned by Josephus as a place

Digitized by Google



resorted to by Herod in his last illness (Joseph. *B. J.* i. 33, § 5; Kitto, *Phys. Geogr. of Pal.* 120, 121; Stanley, *S. & P.* 285). His son Philip built the town, which he named Tiberias, at the sulphureous hot-springs at the S. of the sea of Galilee (Joseph. *Ant.* xviii. 2, § 3; Hasselquist, *Travels*, App. 283; Kitto, 114; Burckhardt, *Syria*, 328, 330). Other hot-springs are found at seven miles distance from Tiberias, and at *Omkeis* (Gadara) (Reland, 775; Burckhardt, 276, 277; Kitto, 116, 118).

Jerusalem, though mainly dependent for its supply of water upon its rain-water cisterns, appears from recent inquiries to have possessed either more than one perennial spring, or one issuing by more than one outlet. To this agree the "fons perennis aquæ" of Tacitus (*Hist.* v. 12), and the ὕδατων ἀνέκλειπτος σύστασις of Aristeas (Joseph. ii. 112, ed. Havercamp.; Robinson, i. 343, 345; Williams, *Holy City*, ii. 458, 468; Raumer, p. 298; Ez. xlvii. 1, 12; Kitto, *Phys. Geogr.* pp. 412, 415). [CISTERNS; SILOAM.]

In the towers built by Herod, Josephus says there were cisterns with χαλκουργήματα through which water was poured forth: these may have been statues or figures containing spouts for water after Roman models (Plin. *Epist.* v. 6; *H. N.* xxxvi. 15, 121; Joseph. *B. J.* v. 4, § 4).

No Eastern city is so well supplied with water as Damascus (*Early Trav.* p. 294). In oriental cities generally public fountains are frequent (Poole, *English. in Egypt*, i. 180). Traces of such fountains at Jerusalem may perhaps be found in the names En-Rogel (2 Sam. xvii. 17), the "Dragon-well" or fountain, and the "gate of the fountain" (Neh. ii. 13, 14). The water which supplied Solomon's pools near Bethlehem was conveyed to them by subterranean channels. In these may perhaps be found the "sealed fountain" of Cant. iv. 12 (Hasselquist, p. 145; Maundrell, *Early Trav.* p. 457). The fountain of Nazareth bears a traditional antiquity, to which it has probably good derivative, if not actual claim (Roberts, *Views in Palestine*, i. 21, 29, 33; Col. Ch. Chron. No. cxxx. p. 147; Fisher's *Views in Syria*, i. 31, iii. 44).

So-called "Fountain" of Cana. (From Roberts.)

* **FOUNTAIN-GATE.** [JERUSALEM, I., 13, and III., VIII.]

FOWL. Several distinct Hebrew and Greek words are thus rendered in the A. V. of the Bible. Of these the most common is עוֹף, which is usually a collective term for all kinds of birds, frequently with the addition of הַשָּׁמַיִם, "of the skies." עַיִט is a collective term for birds of prey, derived from עוּט, "to attack vehemently." It is translated *fowl* in Gen. xv. 11, Job xxviii. 7, Is. xviii. 6.

צִפּוֹר (Chald. צְפַר), from root צָפַר, "to hiss," is also a collective term for birds, though occasionally rendered by *swallow* and *sparrow*. For the collective use of the word see Deut. iv. 17; Ps viii. 8; Ez. xvii. 23; and Dan. iv. 12. In Neh v. 18, the word seems to have the special sense which "fowl" has with us, as it is enumerated among the viands provided for Nehemiah's table.

In 1 K. iv. 23, among the daily provisions for Solomon's table "fatted fowl" are included, the Hebrew words being בְּרִרִים אֲבוּסִים. Gesenius prefers to translate this "fatted geese," referring the word to the root בָּרַר, "to be pure," because of the pure whiteness of the bird. He gives reasons for believing that the same word in the cognate languages included also the meaning of *swan*.

In the N. T. the word translated "fowls" is most frequently τὰ πετεινά, which comprehends all kinds of birds (including *ravens*, Luke xii. 24); but in Rev. xix. 17–21, where the context shows that birds of prey are meant, the Greek is τὰ ὄρνεα. The same distinction is observed in the apocryphal writings: comp. Jud. xi. 7, Ecclus. xvii. 4 xliii 14, with 2 Macc. xv. 33. W. D.

[The following supplement to the preceding article appears under BIRDS in the English edition, but was omitted in reprinting, through the misunderstanding of a reference in the Appendix. As "birds" and "fowls" are used in precisely the same sense in the A. V., it is better that the two articles should be united.]

Birds are mentioned as articles of food in Deut. xiv. 11, 20, the intermediate verses containing a list of unclean birds which were not to be eaten. There is a similar list in Lev. xi. 13–19. From Job vi. 6, Luke xi. 12, we find that the eggs of birds were also eaten. Quails and pigeons are edible birds mentioned in the O. T. Our Saviour's mention of the hen gathering her chickens under her wing implies that the domestic fowl was known in Palestine. The art of snaring wild birds is referred to in Ps. cxxiv. 7; Prov. i. 17, vii. 23; Am iii. 5; Hos. v. 1, vii. 12. The cage full of birds in Jer. v. 27 was a trap in which decoy-birds were placed to entice others, and furnished with a trap-door which could be dropped by a fowler watching at a distance. This practice is mentioned in Ecclus. xi. 30 (πέρδιξ θηρευτὴς ἐν καρταλλῳ; comp. Arist. *Hist. Anim.* ix. 8). In Deut. xxii. 6 it is commanded that an Israelite finding a bird's-nest in his path might take the young or the eggs, but must let the hen-bird go. By this means the extirpation of any species was guarded against. Comp. Phocyl. *Carm.* 80 ff.:—

Μή τις ὄρνιθας καλιῆς ἅμα πάντας ἑλέσθω
μητέρα δ' ἀκροκόποις, ἵν' ἐχῃς πάλι τῆσδε νεοττούς.

Birds were not ordinarily used as victims in the Jewish sacrifices. They were not deemed valuable enough for that purpose; but the substitution of turtle-doves and pigeons was permitted to the poor and in the sacrifice for purification. The way of offering them is detailed in Lev. i. 15–17, and v. 8 and it is worthy of notice that the practice of not

Digitized by Google

dividing them, which was the case in other victims, was of high antiquity (Gen. xv. 10).

The abundance of birds in the East has been mentioned by many travellers. In Curzon's *Monasteries of the Levant*, and in Stanley's *Sinai and Palestine*, this abundance is noticed; by the latter in connection with his admirable illustration of the parable of the sower (Matt. xiii. 4). (Comp. Rosenmüller, *Morgenl.* v. 59.)

The nests of birds were readily allowed by the Orientals to remain in their temples and sanctuaries, as though they had placed themselves under the protection of God (comp. Herod. i. 159; Ælian, *V. H.* v. 17). There is probably an allusion to this in Ps. lxxxiv. 3.

The seasons of migration observed by birds are noticed in Jer. viii. 7. Birds of song are mentioned in Ps. civ. 12; Eccl. xii. 4. Ducks and geese are supposed to be meant by the word עֲרֻבִּים in 1 K. iv. 23. W. D.

FOWLER. [SPARROW.]

FOX (שׁוּעָל, *shû'âl*: ἀλωπηξ). The root of שׁוּעָל is שָׁעַל, "to break through, to make hollow;" and hence its application to the fox, which burrows. The term, probably, in its use by the Hebrews, included the jackal as well as the common fox; for some of the passages in which A. V. renders it "fox" suit that animal, while others better represent the habits of the jackal.

The fox is proverbially fond of grapes, and a very destructive visitor to vineyards (Cant. ii. 15). The proverbially cunning character of the fox is alluded to in Ez. xiii. 4 and Luke xiii. 32, where the prophets of Israel are said to be like foxes in the desert, and where our Saviour calls Herod "that fox." His habit of burrowing among ruins is referred to in Neh. iv. 3 and Lam. v. 18 (see also Matt. viii. 20). In Judg. xv. 4, and in Ps. lxiii. 10, it seems probable that the jackal rather than the fox is spoken of. The Rabbinical writers make frequent mention of the fox and his habits. In the Talmud it is said, "The fox does not die from being under the earth: he is used to it, and it does not hurt him." And again, "He has gained as much as a fox in a ploughed field," *i. e.* nothing. Another proverb relating to him is this:—

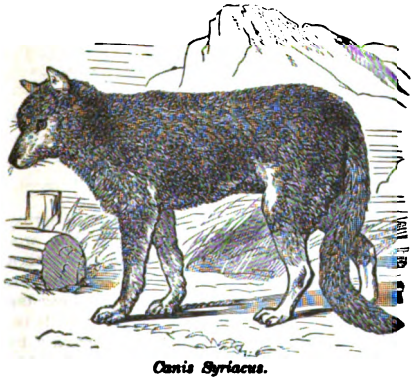
> "If the fox be at the rudder,
> Speak him fairly, 'My dear brother.'"

Both the fox and the jackal are common in Palestine; the latter name being probably connected with the Heb. *shû'âl*; Fr. *chacal*; Germ. *schakal*; Sanskr. *çṛiḳâla*, *çṛigâla*.

A curious instance of a not unfrequent error in the LXX. will be found in 1 K. xx. 10, where *shû'âlim*, foxes, has been read for *salim*, handfuls, and rendered accordingly. W. D.

There can be no doubt that the Hebrew word *shû'âl* (שׁוּעָל) denotes the "jackal" (*Canis aureus*), as well as "the fox." The passage in Ps. lxiii. 10, "they shall be a portion for *shû'âlim*," evidently refers to "jackals," which are ever ready to prey on the dead bodies of the slain. Indeed, we are inclined to think that the "jackal" is the animal more particularly signified in almost all the passages in the O. T. where the Hebrew term occurs. The partiality for grapes is nearly as strong in the jackal as in the fox;[a] and there can be no doubt that the Hebrew *shû'âl*, the Persian *shagal*, the German *schakal*, and the English *jackal*, are all connected with each other.

Jackal. *Canis aureus.*

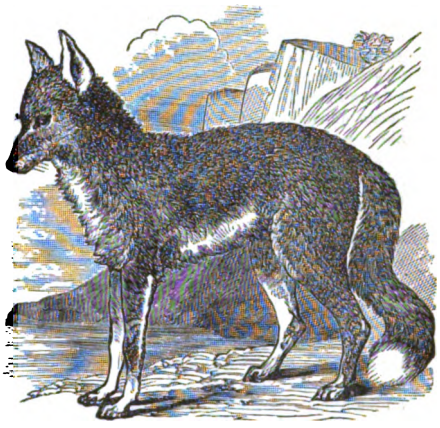


The *shû'âlim* of Judg. xv. 4 are evidently "jackals," and not "foxes," for the former animal is gregarious, whereas the latter is solitary in its habits; and it is in the highest degree improbable that Samson should ever have succeeded in catching so many as 300 foxes, whereas he could readily have "taken in snares," as the Hebrew verb (לָכַד) properly means, so many jackals, which go together for the most part in large groups. The whole passage, which describes the manner in which Samson avenged himself on the Philistines by tying the tails of two jackals together, with a firebrand between them, and then sending them into the standing corn and orchards of his enemies, has, it is well known, been the subject of much dispute. Dr. Kennicott (*Remarks on Select Passages in the O. T.*, Oxford, 1787, p. 100) proposed, on the authority of seven Heb. MSS., to read *shĕdâlim* (שְׁדָלִים), "sheaves" (?), instead of *shû'âlim* (שׁוּעָלִים), leaving out the letter ו, the meaning then being, simply, that Samson took 300 sheaves of corn, and put end to end ("tail to tail"), and then set a burning torch between them. (See also what an anonymous French author has written under the title of *Renards de Samson*, and his arguments refuted in a treatise, "De Vulpibus Simsonæis," by B. H. Gebhard, in *Thes. Nov. Theol. Phil.* i. 553 ff.) The proposed reading of Kennicott has deservedly found little favor with commentators. Not to mention the authority of the important old versions which are opposed to this view, it is pretty certain that *shĕâlîm* cannot mean "sheaves." The word, which occurs only three times, denotes in Is. xl. 12 "the hollow of the hand," and in 1 K. xx. 10, Ez. xiii. 19, "handfuls."

The difficulty of the whole passage consists in understanding how two animals tied together by their tails would run far in the same direction. Col. H. Smith (in Kitto's *Cyc.* art. *Shu'al*) observes, "they would assuredly pull counter to each other, and ultimately fight most fiercely." Probably they would; but it is only fair to remember

[a] We remember some years ago testing this fondness for grapes in the jackals, foxes, and wolves, in the Regent's Park Zoölogical Gardens. The two first-named animals ate the fruit with avidity, but the wolves would not touch it.

Digitized by Google



a reply to the objections which critics have advanced to this transaction of the Hebrew judge, that it has yet to be demonstrated that two jackals united by their tails *would* run counter, and thus defeat the intended purpose; in so important a matter as the verification of a Scripture narrative the proper course is experimental where it can be resorted to. Again, we know nothing as to the *length of the cord* which attached the animals, a consideration which is obviously of much importance in the question at issue, for as jackals are gregarious, the couples would naturally run together if we allow a length of cord of two or three yards, especially when we reflect that the terrified animals would endeavor to escape as far as possible out of the reach of their captor, and make the best of their way out of his sight. Col. H. Smith's explanation, which has been adopted by Kitto (in the *Pict. Bibl.* in Judg. *l. c.*), namely, that by "tail to tail" is to be understood the *end of the firebrand* attached to the extremity of the tail, is contradicted by the immediate context, where it is said that Samson "put a firebrand in the midst between two tails." The translation of the A. V. is unquestionably the correct rendering of the Hebrew, and has the authority of the LXX. and Vulg. in its favor. But if the above remarks are deemed inadequate to a satisfactory solution of Samson's exploit, we are at liberty to suppose that he had men to help him, both in the capture of the jackals and in the use to which he put them, and it is not necessary to conclude that the animals were all caught at, and let loose from, *the same place*. Some might have been taken in one portion of the Philistines' territory and some in another, and let loose in different

Canis Syriacus.

parts of the country. This view would obviate the alleged difficulty alluded to above: for there would be no necessity for the jackals to run any great distance in order to insure the greatest amount of damage to the crops: 150 different *centres*, so to speak, of conflagration throughout the country of the Philistines must have burnt up nearly all their corn; and, from the whole context, it is evident that the injury done was one of almost unlimited extent.[a]

With respect to the jackals and foxes of Palestine, there is no doubt that the common jackal of the country is the *Canis aureus*, which may be heard every night in the villages. Hemprich and Ehrenberg (*Symb. Phys.* pt. i.) speak of a vulpine animal, under the name of *Canis Syriacus*, as occurring in Lebanon. Col. H. Smith has figured an animal to which he gives the name of "Syrian fox" or *Vulpes thaleb*, or *taaleb*; but we have been quite unable to identify the animal with any known species.[b] The Egyptian *Vulpes Niloticus* and doubtless the common fox of our own country (*V. vulgaris*) are Palestine species. Hasselquist (*Trav* p. 184) says foxes are common in the stony country about Bethlehem, and near the Convent of St. John, where about vintage time they destroy all the vines unless they are strictly watched. That jackals and foxes were formerly very common in some parts of Palestine is evident from the names of places derived from these animals, as Hazar-Shual (Josh. xv. 28), Shaal-bim (Judg. i. 35). W. H.

Vulpes Niloticus.

FRANKINCENSE (לְבֹנָה, from לָבַן, *to be white*: λίβανος, Ex. xxx. 34, &c., and Matt. ii. 11; λιβανωτός, 1 Chr. ix. 29; Rev. viii. 3, N. T.), a vegetable resin, brittle, glittering, and of a bitter taste, used for the purpose of sacrificial fumigation (Ex. xxx. 34–36). It is obtained by successive incisions in the bark of a tree called the *arbor thuris*, the first of which yields the purest and whitest kind (לְ זַכָּה: λίβανον διαφανῆ, or καθαρόν); while the produce of the after incisions is spotted with yellow, and as it becomes old loses its whiteness altogether. The Hebrews imported their frankincense from Arabia (Is. lx. 6; Jer. vi. 20), and more particularly from Saba; but it is remarkable that at present the Arabian Libanum, or Olibanum, is of a very inferior kind, and that the finest frankincense imported into Turkey comes through Arabia from the islands of the Indian Archipelago. The Arabian plant may possibly have degenerated, or it may be that the finest kind

[a] The reader will find interesting information respecting some of the supposed difficulties in Samson's exploit with the foxes, in Thomson's *Land and Book*, ii. 340, 341. Prof. Cassel also (*Richter und Ruth*, p. 136, in Lange's *Bibelwerk*) brings forward from the history of other ancient chieftains various instances of a resort to similar modes of inflicting injury on enemies in war. H.

[b] The late Col. Hamilton Smith used to make drawings of animals from all sources, such as monuments, books specimens, &c.; but, as he often forgot the source it is difficult in several instances to understand what animal he intended. Dr. Gray tells us that he was unable to identify many of the horses in Jardine's *Naturalist's Library*.

Digitized by Google

was always procured from India, as it certainly was in the time of Dioscorides. The Arabs call the best frankincense *cundur*, with which compare the Sanskrit *cunduru*, an odorous gum which is stated by the Hindu medical writers to be the produce of a tree called *Sallaci* or *Salai*. This tree grows on the mountains of India, and is described by Dr. Roxburgh, who calls it the *Boswellia serrata* (*Asiat. Res.* ix. 377, 8vo ed.).

The resin itself is well known: but it is still uncertain by what tree it is produced. Ancient as well as modern authors vary in their descriptions to such an extent that it is difficult to arrive at a consistent, still more difficult to gain a botanical idea of the plant. It is described by Theophrastus as attaining the height of about five ells, having many branches, leaves like the pear-tree, and bark like the laurel; but at the same time he mentions another description, according to which it resembles the *mastick-tree*, its leaves being of a reddish color (*Hist. Plant.* ix. 4). According to Diodorus (v. 41) it is a small tree, resembling the Egyptian hawthorn, with gold-yellow leaves like those of the *wood*. The difficulty was rather increased than otherwise in the time of Pliny by the importation of some shoots of the tree itself, which seemed to belong to the *terebinthus* (xii. 31). Garcia de Horto represents it as low, with a leaf like that of the *mastick:* he distinguishes two kinds, the finer, growing on the mountains, the other dark, and of an inferior quality, growing on the plains. Chardin says that the frankincense tree on the mountains of Caramania resembles a large pear-tree. It is not mentioned by Forskål, and Niebuhr could learn nothing of it (*Trav.* p. 356). A more definite notion of the plant might possibly be obtained from the *Thuia occidentalis*, the American *arbor vitæ*, or frankincense tree. But at any rate there can be little doubt that the tree which produces the Indian frankincense, and which in all probability supplied Arabia with the finer kind supposed to be indigenous in that country, is the *Boswellia serrata* of Roxburgh (*vid. supr.*); or *Boswellia thurifera* of Colebrooke. Its claims have been maintained by Colebrooke against the *Juniperus Lycia* of Linnæus, which was long supposed to be the true frankincense tree. Colebrooke shows, upon the testimony of French botanists, that this tree, which grows in the south of France, does not yield the gum in question. It is extremely doubtful what tree produces the Arabian *olibanum:* Lamarck proposes the *Amyris Gileadensis;* but, as it would seem, upon inconclusive evidence.

The Indian *olibanum*, or frankincense, is imported in chests and casks from Bombay, as a regular article of sale. It is chiefly used in the rites of the Greek and Roman churches; and its only medical application at present is as a perfume in sick rooms. The *olibanum*, or frankincense used by the Jews in the Temple service, is not to be confounded with the frankincense of commerce, which is a spontaneous exudation of the *Pinus abies*, or Norway spruce fir, and resembles, in its nature and uses, the Burgundy pitch which is obtained from the same tree.

From Cant. iv. 14, it has been inferred that the frankincense tree grew in Palestine, and especially on Mount Lebanon. The connection between the names, however, goes for nothing (Lebonah, Lebanon); the word may be used for aromatic plants generally (Gesen. *Lex.*); and the rhetorical flourishes of Florus (*Epit.* iii. 6, "thuris silvas") and Ausonius (*Monosyl.* p. 110) are of little avail against the fact that the tree is not at present found in Palestine (Cels. *Hierob.* i. p. 231 ff. Rosenm. *Alterthumsk.* iv. 153 ff.). T. E. B.

* **FRANKLY** (said of the creditor's manner of discharging his debtors, Luke vii. 42) formerly meant freely, generously. The Greek is ἐχαρίσατο, *i. e.* made *a gift* of the debt to those who owed it. H.

* **FRAY** (Deut. xxviii. 26; Jer. vii. 33; Zech. i. 21) means "affright," "terrify." It was common when our version was made, but is now a provincialism. H.

* **FREEDOM**, Acts xxii. 28. [CITIZENSHIP.]

* **FRET** (Lev. xiii. 55) is apparently a noun (not a participle) denoting the plague-spot in a leprous garment. It translates פְּחֶתֶת, literally a hollow spot, here one that has eaten into the texture of the cloth. It is from the Anglo-Saxon *fretan*, "to devour," kindred with *freodan*, "to rub." H.

* **FRINGES.** [DRESS; HEM OF GARMENT.]

FROG (צְפַרְדֵּעַ, *tzephardê'a* [*marsh-leaper* Gesen., but Dietrich has other conjectures]: βάτραχος: *rana*), the animal selected by God as an instrument for humbling the pride of Pharaoh (Ex. viii. 2–14; Ps. lxxviii. 45, cv. 30; Wisd. xix. 10); frogs came in prodigious numbers from the canals, the rivers, and the marshes, they filled the houses, and even entered the ovens and kneading troughs; when at the command of Moses the frogs died, the people gathered them in heaps, and "the land stank" from the corruption of the bodies. There can be no doubt that the whole transaction was miraculous; frogs, it is true, if allowed to increase, can easily be imagined to occur in such multitudes as marked the second plague of Egypt; indeed similar plagues are on record as having occurred in various places, as at Pæonia and Dardania, where frogs suddenly appeared in such numbers as to cause the inhabitants to leave that region (see Eustathius on Hom. *Il.* i., and other quotations cited by Bochart, *Hieroz.* iii. 575); but that the transaction was miraculous appears from the following considerations.

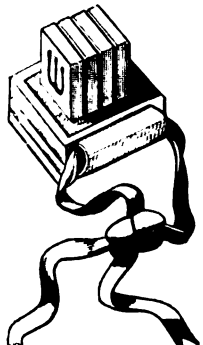
(1.) The time of the occurrence was in spring, when frogs would be in their tadpole state, or at any rate not sufficiently developed to enable them to go far from the water. (2.) The frogs would not naturally have died, in such prodigious numbers as is recorded, in a single day.

It is stated (Ex. viii. 7) that the Egyptian "magicians brought up frogs." Some writers have denied that they could have had any such power, and think that they must have practiced some deceit It is worthy of remark, that though they may have been permitted by God to increase the plagues, they were quite unable to remove them.

Amongst the Egyptians the frog was considered a symbol of an imperfect man, and was supposed to be generated from the slime of the river — ἐκ τῆς τοῦ ποταμοῦ ἰλύος (see Horapollo, i. 26). A frog sitting upon a lotus (*Nelumbium*) was also regarded by the ancient Egyptians as symbolical of the return of the Nile to its bed after the inundations Hence the Egyptian word *Hhrur*, which was used to denote the Nile *descending*, was also, with the slight change of the first letter into an aspirate *Chrur*, the name of a frog (Jablonski, *Panth. Ægypt.* iv. 1, § 9).

The only known species of frog which occurs at present in Egypt is the *Rana esculenta* of which

Digitized by Google



two varieties are described which differ from Spallanzani's species in some slight peculiarities (*Descript. de l'Égypte, Hist. Natur.* tom. i. p. 181, fol. ed.). The *Rana esculenta*, the well-known edible frog of the Continent, which occurs also in some localities in England, has a wide geographical range, being found in many parts of Asia, Africa, and Europe. How the *R. punctata* (*Pelodytes*) came to be described as an Egyptian species we cannot say, but it is certain that this species is not found in Egypt, and it is almost certain that none but the *R. esculenta* does occur in that country. We are able to state that Dr. A. Günther of the British Museum confirms this statement. A species of tree-frog (*Hyla*) occurs in Egypt; but with this genus we have nothing to do. W. H.

* It is remarkable that none of the Hebrew writers speak of frogs as existing in Palestine (though referring to those in Egypt, as in Ps. lxxviii. 45, cv. 30); and yet the marshes, pools, and tanks there abound with them, and the traveller in the spring months hears their croaking incessantly from one end of the land to the other. The crater known as *Birket er-Ram* (the Phiala of Josephus), not far from the ancient Cæsarea Philippi (*Banias*), is a noted haunt of these animals. "On every stone, and along the edge they sat in serried ranks, bolting into the water before us as we stepped, while hundreds of water-snakes wriggled from under them, but not a stork or a heron to rule them" (Tristram, *Land of Israel*, p. 590, 2d ed.). "Large parts of its surface (Phiala) are covered with a sort of sea-weed, and upon it, and all around the margin,

'These loud-piping frogs make the marshes to ring.'

It seems to be the very metropolis of frogdom" (Thomson, *Land and Book*, i. 368). H.

FRONTLETS, or PHYLACTERIES (טוֹטָפוֹת, Ex. xiii. 16; Deut. vi. 8, xi. 18; the only three passages of the O. T. in which the word occurs; LXX. ἀσάλευτα; N. T. φυλακτήρια, Matt. xxiii. 5; the modern Jews called them *Tephillin*, תְּפִלִּין, a word not found in the Bible, Buxtorf, *Lex. Talm.* s. v.). These "frontlets" or "phylacteries" were strips of parchment, on which were written four passages of Scripture (Ex. xiii. 2–10, 11–17; Deut. vi. 4–9, 13–22) in an ink prepared for the purpose. They were then rolled up in a case of black calf-skin, which was attached to a stiffer piece of leather, having a thong one finger broad, and one and a half cubits long. "They were placed at the bend of the left arm, and after the thong had made a little knot in the shape of the letter ד, it was wound about the arm in a spiral line, which ended at the top of the middle finger." This was called "the *Tephillah* on the arm," and the leather case contained only one cell, the passages being written on a single piece of parchment, with thin lines ruled between (Godwyn, *Moses and Aaron*, bk. i. ch. x.). Those worn on the forehead were written on four strips of parchment (which might not be of any hide except cow hide, Nork, *Bram. und Rabb.* p. 211; comp Hesych. *s. v.* Σκυτίκη ἑπτακουρία), and put into four little cells within a square case, on which the letter שׁ was written; the three points of the שׁ being "an emblem of the heavenly Fathers, Jehovah our Lord Jehovah" (*Zohar*, fol. 54, col. 2). The square had two thongs (רְצִיעוֹת), on which Hebrew letters were inscribed; these were passed round the head, and after making a knot in the shape of ד passed over the breast. This phylactery was called "the *Tephillah* on the head," and was worn in the centre of the forehead (Leo of Modena, *Ceremonies of the Jews*, i. 11, n. 4; Calmet, s. v. *Phylactery*; Otho, *Lex. Rab.* p. 656).

Frontlets or Phylacteries.

The derivation of טוֹטָפוֹת is uncertain. Gesenius derives it by contraction from מְטַפְּסוֹת (*Thes.* p. 548). The Rabbinic name תְּפִלִּין comes from תְּפִלָּה, "a prayer," because they were worn during prayer, and were supposed to typify the sincerity of the worshipper; hence they were bound on the *left* wrist (Gem. *Eruvin*, 95, 2; Otho, *l. c.*; Buxt. *Lex. Talm.* s. v.). In Matt. xxiii. 5, only, they are called φυλακτήρια, either because they tended to promote observance of the Law (ἀεὶ μνημὴν ἔχειν τοῦ Θεοῦ, Just. Mart. *Dial. c. Tryph.* p. 205, for which reason Luther happily renders the word by *Denkzettel*); or from the use of them as amulets (Lat. *Praebia*, Gk. περίαπτα, Grotius *ad Matt.* xxiii. 5). Φυλακτήριον is the ordinary Greek word for an amulet (Plut. ii. 378, B, where φυλ. = the Roman *Bulla*), and is used *apparently* with this meaning by a Greek translator, Ex. xiii. 18, for כְּסָתוֹת, cushions (Rosenmüller, *Schol.* ad loc. cit.; Schleusner, *Lex. in N. T.*). That phylacteries *were* used as amulets is certain, and was very natural (Targ. *ad Cant.* viii. 3; Bartolocc. *Bibl. Rab.* i. 576; Winer, s. vv. *Amulete, Phylakterien*). Jerome (on Matt. xxiii. b) says they were thus used in his day by the Babylonians, Persians, and Indians, and condemns certain Christian "mulierculæ" for similarly using the gospels ("parvula evangelia," βιβλία μικρά, Chrys.) as περιάμματα, especially the Proem to St. John (comp. Chrysost. *Hom. in Matt.* 73). The Koran and other sacred books are applied to the same purpose to this day (Hottinger, *Hist. Orient.* i. 8, p. 301, *de Nummis Orient.* xvii. ff.; "The most esteemed of all Hhegabs is a Mooshaf, or copy of the Koran," Lane. *Mod. Egypt.* i. 338). Scaliger even supposes that phylacteries were designed to supersede those amulets, the use of which had been already learnt by the Israelites in Egypt. [AMULETS.] There was a spurious book called *Phylact. Angelorum*, where Pope Gelasius evidently understood the word to mean "amulets," for he remarks that Phylacteria ought rather to be ascribed to devils. In this sense they were expressly forbidden by Pope Gregory ("Si quis . . . phylacteriis usus fuerit, anathema sit," Sixt. Senensis, *Bibl. Sanct.* p. 92; comp. Can. 36, Concil. Laod.).

The LXX. rendering ἀσάλευτα (Aquil. ἀτίνακτα) must allude to their being tightly *bound* on the forehead and wrist during prayer. Petit (*Var. Lectt.* ii. 3) would read ἀζάλευτα (h. e. σφραγὶς αἰδοῖα ἐπὶ ἀτορροπῆ? Schleusner, *Thes.* s. v.

Israel.), but he is amply refuted by Spencer (*de Legg. Rit.* iv. 2, p. 1210) and Witsius (*Ægypt.* ii. 9, § 11). Jerome calls them *Pittaciola* (al. Pictat.), a name which tolerably expresses their purpose (Forcellini, *Lex.* s. v.).

The expression "they make broad their phylacteries" (πλατύνουσι τὰ φυλ. αὐτῶν, Matt. xxiii. 5) refers not so much to the phylactery itself, which seems to have been of a prescribed breadth, as to the case (קְצִיצָה) in which the parchment was kept, which the Pharisees (among their other pretentious customs, Mark vii. 3, 4; Luke v. 33, &c.) made as conspicuous as they could (Reland, *Antiq.* ii. 9, 15). Misled probably by the term πλατύνουσι, and by the mention of the צִיצִת, or fringe (Num. xv. 38, κλῶσμα δακτύλιον ἐπὶ τὰ κράσπεδα τῶν πτερυγίων, LXX.), in connection with them, Epiphanius says that they were πλάτεα σήματα πορφύρας, like the Roman *laticlave*, or the stripes on a Dalmatic (τὰ δὲ σήματα τῆς πορφύρας φυλακτήρια ἐλέσθαισιν οἱ ἠκριβωμένοι μετονομάζειν, c. Hær. i. 33; Sixt. Sen. *l. c.*). He says that these purple stripes were worn by the Pharisees with fringes, and four pomegranates, that no one might touch them, and hence he derives their name (Reland, *Ant.* ii. 9, 15). But that this is an error is clearly shown by Scaliger (*Elench. Trihær.* viii. 66 ff.). It is said that the Pharisees wore them always, whereas the common people only used them at prayers, because they were considered to be even holier than the צִיץ, or golden plate, on the priest's tiara (Ex. xxviii. 36) since that had the sacred name once engraved, but in each of the *Tephillin* the tetragrammaton recurred twenty-three times (Carpzov, *App. Critic.* 196). Again, the Pharisees wore the *Tephillah* above the elbow, but the Sadducees on the palm of the hand (Godwyn, *l. c.*). The modern Jews only wear them at morning prayers, and sometimes at noon (Leo of Modena, *l. c.*).

In our Lord's time they were worn by all Jews, except the Karaites, women, and slaves. Boys, when (at the age of thirteen years and a day) they became בני מצות (sons of the commandments), were bound to wear them (*Baba Berac.* fol. 22, 1, in Glossâ), and therefore they may have been used even by our Lord, as he merely discountenanced their abuse. The suggestion was made by Scaliger (*l. c.*), and led to a somewhat idle controversy. Lightfoot (*Hor. Hebr. ad Matt.* xxiii. 5) and Otho (*Lex. Rab.* p. 656) agree with Scaliger, but Carpzov (*l. c.*) and others strongly deny it, from a belief that the entire use of phylacteries arose from an error.

The Karaites explained Deut. vi. 8, Ex. xiii. 9, &c., as a *figurative* command to remember the law (Reland, *Antiq.* p. 132), as is certainly the case in similar passages (Prov. iii. 3, vi. 21, vii. 3; Cant. viii. 6, &c.). It seems clear to us that the scope of these injunctions favors the Karaite interpretation, and in Ex. xiii. 9 the word is not טוֹטָפוֹת, but זִכָּרוֹן "a memorial" (Gerhardus *on Deut.* vi. 8; Edzardus on *Beracoth*, i. 209; Heidanus, *de Orig Erroris*, viii. B. 6; Schöttgen, *Hor. Hebr.* i. 199; Rosenmüller, *ad loc.*; Hengstenberg, *Pent.* i. 456). Considering too the nature of the passages inscribed on the phylacteries (by *no means* the most important in the Pentateuch — for the Fathers are mistaken in saying that the Decalogue was used in this way, Jer. *l. c.*; Chrysost. *l. c.*; Theophyl. *ad Matt.* xxiii. 5), and the fact that we have no trace whatever of their use before the exile (during which time the Jews probably learnt the practice of wearing them from the Babylonians), we have no doubt that the object of the precepts (Deut. vi. 8; Ex. xiii. 9) was to impress on the minds of the people the necessity of remembering the Law. But the figurative language in which this duty was urged upon them was mistaken for a literal command. An additional argument against the literal interpretation of the direction is the dangerous abuse to which it was immediately liable. Indeed such an observance would defeat the supposed intention of it, by substituting an outward ceremony for an inward remembrance. We have a specimen of this in the curious literalism of Kimchi's comment on Ps. i. 2. Starting the objection that it is impossible to meditate in God's law day and night, because of sleep, domestic cares, &c., he answers that for the fulfillment of the text it is sufficient to wear *Tephillin!*

In spite of these considerations, Justin (*Dial. c. Tryph.* l. c.), Chrysostom, Euthymius, Theophylact, and many moderns (Baumgarten, *Comm.* i. 479; Winer, s. v. *Phylakt.*) prefer the literal meaning. It rests therefore with them to account for the entire absence of all allusion to phylacteries in the O. T. The passages in Proverbs (*v. supra*) contain no such reference, and in Ez. xxiv. 17 פְּאֵר means not a phylactery (as Jarchi says), but a turban. [CROWNS.] (Gesen. *Thes.* p. 1089.)

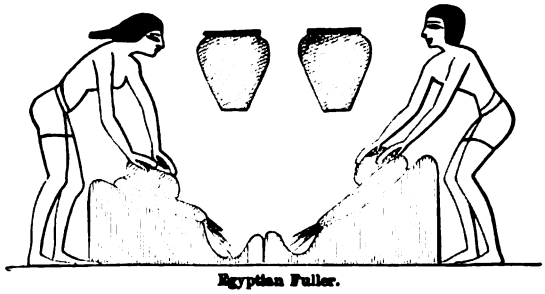
The Rabbis have many rules about their use. They were not worn on Sabbaths or other sacred days, because those days were themselves a sign or pledge (אוֹת), and required no further memorial (*Zohar*, fol. 236; Reland, *l. c.*). They must be read standing in the morning (when blue can be distinguished from green), but in the evening (at sunset) they might be read sitting. In times of persecution a red thread was worn instead (Munster, *de præc. affirm.*; comp. Josh. ii. 18). Both hands were to be used, if possible, in writing them. The leather must have no hole in it. A single blot did not signify if an uneducated boy could read the word. At the top of the parchment no more room must be left than would suffice for the letter ל, but at the bottom there might be room even for ן or ד. A man, when wearing the *Tephillin*, must not approach within four cubits of a cemetery (Sixt. Senensis, *l. c.*). He who has a taste for further frivolities (which yet are deeply interesting as illustrative of a priestly superstition) may find them in Lightfoot (*Hor. Heb.* ad loc.), Schöttgen, Otho (*Lex. Rab.* s. v.), and in the Mishna — especially in the treatise called *Rosh Hashanah*.

The Rabbis even declared that God wore them, arguing from Is. lxii. 8; Deut. xxxiii. 2; Is. xlix. 16. Perhaps this was a pious fraud to inculcate their use; or it may have had some mystic meaning (*Zohar*, pt. ii. fol. 2; Carpzov, *l. c.*).

Josephus gives their general significance (*Ant.* iv. 8, § 13, ὡς περίβλεπτον εἶναι πανταχόθεν τὸ περὶ αὐτοὺς πρόθυμον τοῦ Θεοῦ). They were supposed to save from the Devil (Targ. *ad Cant.* viii. 3 and from sin (Hottinger, *Jur. Hebr. Leg.* xx. 29) and they were used for oaths; but the Rabbis disapproved the application of them to charm wounds

Digitized by Google

w hall children to sleep (bl. *Leg.* 253; Maimon *de Idol.* ii.). He who wore them was supposed to prolong his days (Is. xxxviii. 16), but he who did not, was doomed to perdition, since he thereby broke ught affirmative precepts (Maimon. *Tephil.* iv. 26).



On the analogous practice alluded to in Rev. xiii. 16, xiv. 1, see FOREHEAD.

Besides the authors already quoted (Sixt. Senensis, Reland, Otho, Lightfoot, Schöttgen, Carpzov, Hottinger, Godwyn, Rosenmüller, &c.), see the following, to whom they refer: Maimonides, *Tephillin;* Wagenseil *in Sota*, cap. ii. pp. 397–418; Surenhusius, *Mishna*, *ad Tract.* Beracoth, pp. 8, 9; Beck, *de Judæorum Ligamentis precatoriis*, and *de Usu Phylact.* (1679); Basnage, *Hist. des Juifs*, liv. vi. ch. xviii.; Braunius, *de Vest. Sacerd.* p. 7 ff.; Buxtorf, *Synag. Jud.* p. 170 ff.; Ugolini, *Thes.* tom. xxi., *de Usu Phylact.* There is in this latter work much further information, but we have inserted all that seemed interesting. F. W. F.

* **FROST.** [PALESTINE, 47.]

* **FUEL.** [COAL; DUNG; OVEN; THORNS.]

FULLER (כֹּבֵס, from כָּבַס, *tread*, Gesen. p 657: γναφεύς: *fullo*). The trade of the fullers, so far as it is mentioned in Scripture, appears to have consisted chiefly in cleansing garments and whitening them. The use of white garments, and also the feeling respecting their use for festal and religious purposes, may be gathered from the following passages: Eccl. ix. 8; Dan. vii. 9; Is. lxiv. 6; Zech. iii. 3, 5; 2 Sam. vi. 14; 1 Chr. xv. 27; Mark ix. 3; Rev. iv. 4, vi. 11, vii. 9; Mishna, *Taanith*, iv. 8; see also Stat. *Silv.* i. 2, 237; Ovid. *Fast.* i. 79; Claudian, *de Laud. Stil.* iii. 289. This branch of the trade was perhaps exercised by other persons than those who carded the wool and smoothed the cloth when woven (Mishna, *Bava kama*, i. x. 10). In applying the marks used to distinguish cloths sent to be cleansed, fullers were desired to be careful to avoid the mixtures forbidden by the Law (Lev. xix. 19; Deut. xxii. 11; Mishna, *Massec. Cilaim*, ix. 10).

Egyptian Fuller.

The process of fulling or cleansing cloth, so far as it may be gathered from the practice of other nations, consisted in treading or stamping on the garments with the feet or with bats in tubs of water, in which some alkaline substance answering the purpose of soap had been dissolved (Gesen. *Thes.* p. 1261, רָגַל; Beckmann, *Hist. of Inventions*, ii. 94, 95, Bohn). The substances used for this purpose which are mentioned in Scripture are נֶתֶר, nitre, νίτρον, *nitrum* (Gesen. p. 930; Prov. xxv. 20; Jer. ii. 22), and בֹּרִית, soap, πόα, *herba fullonum*, *herba borith* (Gesen. p. 348; Mal. iii. 2). Nitre is found in Egypt and in Syria, and vegetable alkali was also obtained there from the ashes of certain plants, probably *Salsola kali* (Gesen. p. 246; Plin. xxxi. 10, 46; Hasselquist, p. 275; Burckhardt, *Syria*, p. 214). The juice also of some saponaceous plant, perhaps *Gypsophila struthium*, or *Saponaria officinalis*, was sometimes mixed with the water for the like purpose, and may thus be regarded as representing the soap of Scripture. Other substances also are mentioned as being employed in cleansing, which, together with alkali, seem to identify the Jewish with the Roman process, as urine and chalk, *Creta cimolia*, and bean-water, *i. e.* bean-meal mixed with water (Mishna, *Shabb.* ix. 5; *Niddah*, ix. 6). Urine, both of men and of animals, was regularly collected at Rome for cleansing cloths (Plin. xxxviii. 6, 8; Athen. xi. p. 484; Mart. ix. 93; Plautus, *Asin.* v. 2, 57), and it seems not improbable that its use in the fuller's trade at Jerusalem may have suggested the coarse taunt of Rabshakeh, during his interview with the deputies of Hezekiah in the highway of the Fuller's Field (2 K. xviii. 17), but Schöttgen thinks it doubtful whether the Jews made use of it in fulling (*Antiq. full.* § 9). The process of whitening garments was performed by rubbing into them chalk or earth of some kind. *Creta cimolia* (Cimolite) was probably the earth most frequently used. The whitest sort of earth for this purpose is a white potter's clay or marl, with which the poor at Rome rubbed their clothes on festival days to make them appear brighter (Plin. xxxi. 10, § 118, xxxv. 17). Sulphur which was used at Rome for discharging positive color, was abundant in some parts of Palestine, but there is no evidence to show that it was used in the fuller's trade.

The trade of the fullers, as causing offensive smells, and also as requiring space for drying clothes, appears to have been carried on at Jerusalem outside the city, and from them a field, a monument, and also a spring (En-rogel), to have derived their names (Beckmann, *Hist. of Inv.* ii 92, 106, Bohn; *Dict. of Antiq.* art. *Fullo;* Winer, s. v. *Walker;* Wilkinson, abridgm. ii. 106; Saalschütz, i. 3, 14, 32, ii. 14, 6; Schöttgen, *Antiq. fullonicæ*). [HANDICRAFT.] H. W. P.

FULLER'S FIELD, THE (שְׂדֵה כוֹבֵס: ὁ ἀγρὸς τοῦ γναφέως, or κναφέως: *ager fullonis*), a spot near Jerusalem (2 K. xviii. 17; Is. xxxvi. 2, vii. 3) so close to the walls that a person speaking from there could be heard on them (2 K. xviii. 17, 26). It is only incidentally mentioned in these passages, as giving its name to a "highway" (מְסִלַּה = an embanked road, Gesen. *Thes.* p 957 b), "in" (בְּ) or "on" (אֶל, A. V. "in"), which highway was the "conduit of the upper pool." The "end" (קְצֵה) of the conduit, whatever that was, appears to have been close to the road (Is. vii. 3). One resort of the fullers of Jerusalem would seem to have been below the city on the southeast side [EN-ROGEL]. But Rabshakeh and his "great host" can hardly have approached in that direction They must have come from the

Digitized by Google

north — the only accessible side for any body of people — as is certainly indicated by the route traced in Is. x. 28–32 [GIBEAH]; and the Fuller's Field was therefore, to judge from this circumstance, on the table-land on the northern side of the city. The "pool" and the "conduit" would be sufficient reasons for the presence of the fullers. But on the other hand, Rabshakeh and his companions may have left the army and advanced along the east side of Mount Moriah to En-rogel, to a convenient place under the Temple walls for speaking.

In considering the nature of this spot, it should be borne in mind that *Sadeh*, "field," is a term almost invariably confined to cultivated arable land, as opposed to unreclaimed ground. [JERUSALEM.]

G.

* Others find this "field" on the west of Jerusalem, near the pool usually marked on the maps as "upper Gihon" (*Birket el-Mamillah*). The field took its name doubtless from the fact that the fullers spread the garments cleansed by them on the ground there to dry. This pool is used now for that purpose, and the adjacent ground may be seen covered with whitening garments. (See Robinson in *Bibl. Sacra*, iii. 646 f.) Williams (*Holy City*, i. Suppl. p. 122) places the Fuller's Field on the north of Jerusalem, chiefly because Josephus (*B. J.* v. 4, § 2) speaks of a "fuller's monument" there (*γναφέως μνῆμα*). On that side of the city the field and the place of washing could not well have been near each other, unless the nature of the ground has very much changed. On the other hand, "a fuller's monument," probably a tomb, would have no necessary connection with the "fuller's field." (See Schultz, *Jerusalem, eine Vorlesung*, pp. 51, 84.) The different opinions show how imperfectly the minute topography of the ancient city is yet known. H.

FUNERALS. [BURIAL.]

FURLONG. [MEASURES.]

FURNACE. Various kinds of furnaces are noticed in the Bible. (1.) תַּנּוּר is so translated in the A. V. in Gen. xv. 17; Is. xxxi. 9; Neh. iii. 11, xii. 38. Generally the word applies to the baker's oven, which is described under BREAD, and there is little doubt that the "tower of the furnaces" in Neh. should be rendered "tower of the ovens." In Gen. xv. and Is. xxxi. it is used in a more general sense. (2.) כִּבְשָׁן, a smelting or calcining furnace (Gen. xix. 28; Ex. ix. 8, 10, xix. 18), especially a lime-kiln, the use of which was evidently well known to the Hebrews (Is. xxxiii. 12; Am. ii. 1). (3.) כּוּר, a refining furnace (Prov. xvii. 3, xxvii. 21; Ez. xxii. 18 ff.), metaphorically applied to a state of trial (Deut. iv. 20; 1 K. viii. 51; Is. xlviii. 10; Jer. xi. 4). The form of it was probably similar to the one used in Egypt, which is figured below. [The word translated "furnace" (A. V.) in Ps. xii. 6 (7), עֲלִיל, does not occur elsewhere, and is of uncertain signification. Gesenius inclines to the sense "workshop"; Fürst and others understand it to mean 'crucible." — A.] (4.) אַתּוּן, a large furnace built like a brick-kiln, with an opening at the top to cast in the materials (Dan. iii. 22, 23), and a door at the ground by which the metal might be extracted (ver. 26). The Roman *fornax*, as represented in *Dict. of Ant.* p. 546, gives an idea of the Persian *attûn*. The Persians were in the habit of using the furnace as a means of inflicting capital

Furnace. — An Egyptian blowing the fire for melting gold. (Wilkinson.)

punishment (Dan. *l. c.*; Jer. xxix. 22; 2 Macc. vii. 5; Hos. vii. 7). A parallel case is mentioned by Chardin (*Voyage en Perse*, iv. 276), two ovens having been kept ready heated for a whole month to throw in any corn-dealers who raised the price of corn. (5.) The potter's furnace (Ecclus. xxvii. 5; xxxviii. 30), which resembles a chimney in shape, and was about five or six feet high, as represented below. (6.) The blacksmith's furnace

The Egyptian Potter's Furnace. (Wilkinson.)

(Ecclus. xxxviii. 28). The Greek *κάμινος*, which is applied to the two latter, also describes the calcining furnace (Xen. *Vectig.* iv. 49). It is metaphorically used in the N. T. in this sense (Rev. i. 15, ix. 2), and in Matt. xiii. 42, with an especial reference to Dan. iii. 6. W. L. B.

* **FURNITURE**, formerly = "equipment," "accoutrements" (see *Bible Word-Book*), is so used in Gen. xxxi. 34. Rachel put the "teraphim" (which see) or "images" in the "camel's furniture," in order to conceal them from Laban, who was searching for them in her tent. It is not easy to say how this should be understood. Thomson thinks that she placed them under the padding of the riding-saddle, where, as he mentions, the Arabs at present often secrete stolen goods (*Land and Book*, ii. 24). Carpets were frequently spread over the saddle on which women rode, and these could have been thrown over the idols, so as to answer the purpose of a seat and of concealment. Kitto (*Bible Illustr.* i. 301, Amer. ed.) suggests that the convexity of the pack-saddle may have formed a good hiding-place for the images. It is altogether less probable that the "furniture" was the palanquin or litter swung across the camel's back, with apartments on both sides, and screened with curtains (see Jahn, *Bibl. Archæol.* § 49, Upham's trans.). The rapid travelling on this flight of Jacob would have made such a vehicle inconvenient and unsafe. On the Hebrew expression, see Tuch, *Die Genesis*, p. 459; Bunsen, *Bibelwerk*, i. 67; Knobel, *Die Genesis*, p. 226; Keil and Delitzsch, *Pentateuch*

. 288 (Eng. trans.). "Saddle," or the whole, though vague, may for us be the best translation. H.

G.

GA'AL (גַּעַל [*rejection*, Fürst, perh. a *cutting* אּ *graft*, Ges.]: Γαάλ; [Vat. Γαλααδ, exc. ver. 28, Γααδ; Alex. Γααδ, exc. ver. 36, Γαδ, and vv. 26, 37, Γαλααδ;] Joseph. Γαάλης: *Gaal*), son of Ebed, aided the Shechemites in their rebellion against Abimelech (Judg. ix. [26–41]; Joseph. *Ant.* v. 7, §§ 3, 4). He does not seem to have been a native of Shechem, nor specially interested in the revolution, but rather one of a class of *condottieri*, who at such a period of anarchy would be willing to sell their services to the highest bidder. Josephus calls him τὸν τῶν ἀρχόντων, a term which scarcely designates any special office, as in the case of Zebul (τῶν Σικιμιτῶν ἀρχων, Joseph. *l. c.*): more probably it has reference to the headship of his family (Judg. ix. 26; Joseph. *l. c.*), and the command of a body of men-at-arms, who seem to have been permanently attached to his service (σὺν ὁπλίταις καὶ συγγενέσι, Joseph.). His appeal to ante-Israelitish traditions (Judg. ix. 28), together with the re-establishment of idolatry at Shechem, shows that the movement in which he took part was a reactionary one, and proceeded upon the principle of a combination of the aborigines with the idolatrous Israelites against the iconoclastic family of Gideon as represented by Abimelech. The ambitious designs of Gaal, who seems to have aspired to the supreme command, awakened the jealousy of Zebul, who recalled Abimelech, and procured the expulsion of Gaal from the city upon a charge of cowardice [ABIMELECH.] T. E. B.

GA'ASH ([גַּעַשׁ, in pause] גָּעָשׁ = *earthquake*: Γαάς, [Rom. Vat.] once Γαλααδ: *Gaas*). On the north side of "the hill of Gaash" (accurately "Mount G.," הַר־גָּעַשׁ), in the district of "Mount Ephraim," was Timnath-serach, or Timnath-cheres, the city which at his request was given by the nation to Joshua; where he resided, and where at last he was buried (Josh. xxiv. 30; Judg. ii. 9; comp. Josh. xix. 49, 50). We only hear of it again incidentally as the native place of one of David's guard, "Hiddai, or Hurai, of the brooks (the torrent-beds or wadies, נַחֲלֵי) of Gaash" — the "torrents of the earthquake" (2 Sam. xxiii. 30; 1 Chr. xi. 32). By Eusebius and Jerome the name is mentioned (*Onom.* "Gaas"), but evidently without any knowledge of the place: nor does it appear to have been recognized by any more modern traveller in Palestine. G.

* The name of Gaash has been lost, but the hill which was so called has been identified with reasonable certainty. Our countryman, Dr. Eli Smith, in 1843 discovered Timnath-serah (= Timnath-heres) in the site and ruins of the present *Tibneh*, about 6 miles northeast of *Jufna* (the Roman Gophna). But we know from Judg. ii. 9, that Gaash was within the precincts of the ancient town, which lay in the tribe of Ephraim (where *Tibneh* is at present), and that Joshua was buried on the north side of this hill. It is found now that off against these ruins of *Tibneh* (thus identified as Timnath-serah), a little to the south of them, rises a high hill, and on "the north side" of this hill are some remarkable tombs of elaborate structure and of great antiquity. Thus nothing but the extant name is wanting; for the site of the ruined town, the vicinity of the hill, the sepulchral excavations on the north side of the hill where the tomb of Joshua was cut out, supply ample proof that Gaash must have been in this place. (See "Visit to Antipatris" in the *Bibl. Sacra*, 1843, p. 478 ff.) Add to all this that "the brooks" (*wadies* or ravines) of Gaash (2 Sam. xxiii. 30) answer to "the deep valleys round about this hill, through which the winter torrents flow to *Wady Belát*." (See Rob. *Phys. Geogr.* p. 42.) H.

GA'BA (גֶּבַע [*height, hill*]: Γαβαά, Γαυβάλ, Γαβαών, [etc.:] *Gabee, Gabaa, Geba*). The same name as GEBA, but with the vowel sound made broader, according to Hebrew custom, because of its occurrence at the end of a clause or sentence. It is found in the A. V. in Josh. xviii. 24; Ezr. ii. 26; Neh. vii. 30 ["Geba," A. V. ed. 1611]: but in the Hebrew also in 2 Sam. v. 25; 2 K. xxiii. 8; Neh. xi. 31. [GABBES.]

GAB'AEL (Γαβαήλ; Alex. Γαμαηλ: Vet. Lat. *Gabahel*; Vulg. omits). 1. An ancestor of Tobit (Tob. i. 1).

2. [Γαβαῆλος, Γαβαήλ; Alex. iv. 20, Γαμαηλος, FA'. i. 14, Γαβηλος: *Gabelus.*] A poor Jew (Tob. i. 17, Vulg.) of "Rages in Media," to whom Tobias lent (*sub chirographo dedit*, Vulg.) ten talents of silver, which Gabael afterwards faithfully restored to Tobias in the time of Tobit's distress (Tob. i. 14, iv. 1, 20, v. 6, ix. [2, 5,] x. 2). [GABRIAS.] B. F. W.

GAB'ATHA ([Γαβαθά:] *Bagatha*), Esth. xii 1. [BIGTHAN.]

GAB'BAI [2 syl.] (גַּבַּי [*collector*, as of tribute]: Γηβέ; [Vat. Γηβη; Alex. Γηβεει; FA. Γηβεις:] *Gebbai*), apparently the head of an important family of Benjamin resident at Jerusalem (Neh. xi. 8).

GAB'BATHA (Γαββαθᾶ: *Gabbatha*). The Hebrew or Chaldee appellation of a place also called "Pavement" (λιθόστρωτον), where the judgment-seat or bema (βῆμα) was planted, from his place on which Pilate delivered our Lord to death (John xix. 13). The name, and the incident which leads to the mention of the name, occur nowhere but in this passage of St. John. The place was outside the prætorium (A. V. judgment-hall), for Pilate brought Jesus forth from thence to it.

It is suggested by Lightfoot (*Exerc. on St. John*, ad loc.) that the word is derived from גַּב, a surface, in which case Gabbatha would be a mere translation of λιθόστρωτον. There was a room in the Temple in which the Sanhedrim sate, and which was called Gazith, because it was paved with smooth and square flags (גָּזִית); and Lightfoot conjectures that Pilate may on this occasion have delivered his judgment in that room. But this is not consistent with the practice of St. John, who, in other instances, gives the Hebrew name as that properly belonging to the place, not as a mere translation of a Greek one. Besides, Pilate evidently spoke from the bema — the regular seat of justice — and this in an important place like Jerusalem would be in a fixed spot. Besides, the prætorium, a Roman residence with the idolatrous emblems, could not have been within the Temple. The word is more

Digitized by Google

probably Chaldee, גַּבְּתָא, from an ancient root signifying height or roundness — the root of the Hebrew word *Gibeah*, which is the common term in the O. T. for a bald rounded hill, or elevation of moderate height. In this case Gabbatha designated the elevated bema; and the "pavement" was possibly some mosaic or tessellated work, either forming the bema itself, or the flooring of the court immediately round it — perhaps some such work as that which we are told by Suetonius (*Cæsar*, 46) Julius Cæsar was accustomed to carry with him on his expeditions, in order to give the bema or tribunal its necessary conventional elevation. [PAVEMENT.] G.

GAB'DES (Γαββῆς, both MSS.; [rather, Rom., Alex.; Vat. Ασκαββης; Ald. Γαββης:] *Gabes*), 1 Esdr. v. 20. [GABA.]

GABRI'AS (Γαβρίας, LXX.; Γαβρεί, FA. [Sin.]; *i. e.* גַּבְרִיָּה, *the man of Jehovah*), according to the present text of the LXX. the brother of Gabael, the creditor of Tobit (Tob. i. 14), though in another place (Tob. iv. 20, τῷ τοῦ Γαβρία [Vat. -ει-]; cf. Fritzsche, *ad loc.*) he is described as his father. The readings throughout are very uncertain, and in the versions the names are strangely confused. It is an obvious correction to suppose that Γαβαήλῳ τῷ ἀδελφῷ τῷ Γαβρίᾳ should be read in i. 14, as is in fact suggested by *Cod. FA.*, Γαβήλῳ . . . τῷ ἀδ. τῷ Γαβρεί. The misunderstanding of τῷ ἀδελφῷ (cf. Tob. i. 10, 16, &c.) naturally occasioned the omission of the article. The old Latin has, *Gabelo fratri meo filio Gabahel*; and so also iv. 20. B. F. W.

GA'BRIEL (גַּבְרִיאֵל, *man of God*: Γαβριήλ, LXX. and N. T.: [*Gabriel*]). The word, which is not in itself distinctive, but merely a description of the angelic office, is used as a proper name or title in Dan. viii. 16, ix. 21, and in Luke i. 19, 26. (It is also added in the Targums as a gloss on some other passages of the O. T.) In the ordinary traditions, Jewish and Christian, Gabriel is spoken of as one of the archangels. In Scripture, he is set forth only as the representative of the angelic nature, not in its dignity or power of contending against evil [MICHAEL], but in its ministration of comfort and sympathy to man. Thus his mission to Daniel is to interpret in plain words the vision of the ram and the he-goat, and to comfort him after his prayer with the prophecy of the "seventy weeks." And so in the New Testament he is the herald of good tidings, declaring as he does the coming of the predicted Messiah and of his forerunner. His prominent character, therefore, is that of a "fellow-servant" of the saints on earth; and there is a corresponding simplicity, and absence of all terror and mystery, in his communications to men. A. B.

* There is no clear Scriptural authority for the plural use of archangel (see above). The term, which twice occurs in the N. T. (1 Thess. iv. 16; Jude 9), is once applied to Michael, but not to Gabriel. Although the divine messages by the angel Gabriel, on both the occasions of his recorded appearance, were characterized, as above stated, by simplicity and freedom from terror, yet it is stated, in each instance, that the vision awakened extraordinary fear — suggesting the thought, that there may have been something in the mien of the angel fitted to inspire special awe. S. W.

GAD (גָּד: Γάδ; [1 Chr. vi. 63, Vat. M. Δαν Jer. xlix. 1, Γαλαάδ, but Comp. with 4 MSS Γάδ;] Joseph. Γάδας: *Gad*), Jacob's seventh son the first-born of Zilpah, Leah's maid, and whole-brother to Asher (Gen. xxx. 11–13, xlvi. 16, 18). (*a.*) The passage in which the bestowal of the name of Gad is preserved — like the others, an exclamation on his birth — is more than usually obscure: "And Leah said, 'In fortune' (*be gad*, בגד), and she called his name Gad" (Gen. xxx. 11). Such is supposed to be the meaning of the old text of the passage (the *Cetib*): so it stood at the time of the LXX., who render the key-word by ἐν τύχῃ; in which they are followed by Jerome in the Vulgate, *feliciter*.[a] But in the marginal emendations of the Masorets (the *Keri*) the word is given בָּא גָד, "Gad comes." This construction is adopted by the ancient versions of Onkelos, Aquila (ἦλθεν ἡ ζωσις), and Symmachus (ἦλθεν Γάδ). (*b.*) In the blessing of Jacob, however, we find the name played upon in a different manner: "Gad" is here taken as meaning a piratical band or troop (the term constantly used for which is *gedûd*, גְּדוּד), and the allusion — the turns of which it is impossible adequately to convey in English — would seem to be to the irregular life of predatory warfare which should be pursued by the tribe after their settlement on the borders of the Promised Land. "Gad, a plundering troop (*gedûd*) shall plunder him (*ye-gûd-enû*), but he will plunder (*ya-gûd*) at their heels" (Gen. xlix. 19).[b] (*c.*) The force here lent to the name has been by some partially transferred to the narrative of Gen. xxx., *e. g.* the Samaritan version, the Veneto-Greek, and our own A. V. "a troop (of children) cometh." But it must not be overlooked that the word *gedûd* — by which it is here sought to interpret the *gad* of Gen. xxx. 11 — possessed its own special signification of turbulence and fierceness, which makes it hardly applicable to children in the sense of a number or crowd, the image suggested by the A. V. Exactly as the turns of Jacob's language apply to the characteristics of the tribe, it does not appear that there is any connection between his allusions and those in the exclamation of Leah. The key to the latter is probably lost. To suppose that Leah was invoking some ancient divinity, the god Fortune, who is conjectured to be once alluded to — and once only — in the later part of the book of Isaiah, under the title of *Gad* (Is. lxv. 11; A. V. "that troop;" Gesenius, "dem Glück"), is surely a poor explanation.

Of the childhood and life of the individual GAD nothing is preserved. At the time of the descent into Egypt seven sons are ascribed to him, remarkable from the fact that a majority of their names have plural terminations, as if those of families rather than persons (Gen. xlvi. 16). The list, with a slight variation, is again given on the occasion of the census in the wilderness of Sinai (Num. xxvi. 15–18). [AROD; EZBON; OZNI.] The position

[a] In his *Quæst. in Genesim*, Jerome has *in fortuna*. Josephus (*Ant.* i. 19, § 8) gives it still a different turn — τυχαῖος = *fortuitus*.

[b] Jerome (*De Benedict. Jacobi*) interprets this of the revenge taken by the warriors of the tribe on their return from the conquest of western Palestine, for the incursions of the desert tribes during their absence.

at Gad during the march to the Promised Land was on the south side of the Tabernacle (Num. ii. 14). The leader of the tribe at the time of the start from Sinai was Eliasaph son of Reuel or Deuel (ii. 14, x. 20). Gad is regularly named in the various enumerations of the tribes through the wanderings — at the despatching of the spies (xiii. 15) — the numbering in the plains of Moab (xxvi. 3, 15); but the only inference we can draw is an indication of a commencing alliance with the tribe which was subsequently to be his next neighbor. He has left the more closely related tribe of Asher, to take up his position next to Reuben. These two tribes also preserve a near equality in their numbers, not suffering from the fluctuations which were endured by the others. At the first census Gad had 45,650, and Reuben 46,500; at the last, Gad had 40,500, and Reuben 43,330. This alliance was doubtless induced by the similarity of their pursuits. Of all the sons of Jacob these two tribes alone returned to the land which their forefathers had left five hundred years before, with their occupations unchanged. "The trade of thy slaves hath been about cattle from our youth even till now" — "we are shepherds, both we and our fathers" (Gen. xlvi. 34, xlvii. 4) — such was the account which the patriarchs gave of themselves to Pharaoh. The civilization and the persecutions of Egypt had worked a change in the habits of most of the tribes, but Reuben and Gad remained faithful to the pastoral pursuits of Abraham, Isaac, and Jacob; and at the halt on the east of Jordan we find them coming forward to Moses with the representation that they "have cattle" — "a great multitude of cattle," and the land where they now are is a "place for cattle." What should they do in the close precincts of the country west of Jordan with all their flocks and herds? Wherefore let this land, they pray, be given them for a possession, and let them not be brought over Jordan (Num. xxxii. 1–5). They did not, however, attempt to evade taking their proper share of the difficulties of subduing the land of Canaan, and after that task had been effected, and the apportionment amongst the nine and a half tribes completed "at the door-way of the tabernacle of the congregation in Shiloh, before Jehovah," they were dismissed by Joshua "to their tents," to their "wives, their little ones, and their cattle," which they had left behind them in Gilead. To their *tents* they went, to the dangers and delights of the free Bedouin life in which they had elected to remain, and in which — a few partial glimses excepted — the later history allows them to remain hidden from view.

The country allotted to Gad appears, speaking roughly, to have lain chiefly about the centre of the land east of Jordan. The south of that district, from the Arnon (*Wady Mojeb*), about half way down the Dead Sea, to Heshbon, nearly due east of Jerusalem, was occupied by Reuben, and at or about Heshbon the possessions of Gad commenced. They embraced half Gilead, as the oldest record specially states (Deut. iii. 12), or half the land of the children of Ammon (Josh. xiii. 25), probably the mountainous district which is intersected by the torrent Jabbok — if the *Wady Zurka* be the Jabbok — including, as its most northern town, the ancient sanctuary of Mahanaim. On the east the furthest landmark given is "Aroer that faces Rabbah," the present *Amman* (Josh. xiii. 25). West was the Jordan (ver. 27). The territory thus consisted of two comparatively separate and Independent parts, (1) the high land, on the general level of the country east of Jordan, and (2) the sunk valley of the Jordan itself — the former stopping short at the Jabbok; the latter occupying the whole of the great valley on the east side of the river, and extending up to the very sea of Cinnereth, or Gennesaret, itself.

Of the structure and character of the land which thus belonged to the tribe — "the land of Gad and Gilead" — we have only vague information. From the western part of Palestine its aspect is that of a wall of purple mountain, with a singularly horizontal outline; here and there the surface is seamed by the ravines, through which the torrents find their way to the Jordan, but this does not much affect the vertical wall-like look of the range. But on a nearer approach in the Jordan valley, the horizontal outline becomes broken, and when the summits are attained, a new scene is said to burst on the view. "A wide table-land appears, tossed about in wild confusion of undulating downs, clothed with rich grass throughout; in the southern parts trees are thinly scattered here and there, aged trees covered with lichen, as if the relics of a primeval forest long since cleared away; the northern parts still abound in magnificent woods of sycamore, beech, terebinth, ilex, and enormous fig-trees. These downs are broken by three deep defiles, through which the three rivers of the *Yarmûk*, the Jabbok, and the Arnon fall into the valley of the Jordan and the Dead Sea. On the east they melt away into the vast red plain, which by a gradual descent joins the level of the plain of the Hauràn, and of the Assyrian desert" (Stanley, *S. & P.* p. 320). A very picturesque country, not the "flat open downs of smooth and even turf" of the country round Heshbon (Irby, p. 142), the sheep-walks of Reuben and of the Moabites, but "most beautifully varied with hanging woods, mostly of the vallonia oak, laurestinus, cedar, arbutus, arbutus andrachne, &c. At times the country had all the appearance of a noble park" (147), "graceful hills, rich vales, luxuriant herbage" (Porter, *Handb.* p. 310). [GILEAD.]

Such was the territory allotted to the Gadites; but there is no doubt that they soon extended themselves beyond these limits. The official records of the reign of Jotham of Judah (1 Chr. v. 11, 16) show them to have been at that time established over the whole of Gilead, and in possession of Bashan as far as Salcah, the modern *Sûlkhad*, a town at the eastern extremity of the noble plain of the *Hauràn*, and very far both to the north and the east of the border given them originally, while the Manassites were pushed still further northwards to Mount Hermon (1 Chr. v. 23). They soon became identified with Gilead, that name so memorable in the earliest history of the nation; and in many of the earlier records it supersedes the name of Gad, as we have already remarked it did that of Bashan. In the song of Deborah "Gilead" is said to have "abode beyond Jordan" (Judg. v. 17) Jephthah appears to have been a Gadite, a native of Mizpeh (Judg. xi. 34; comp. 31, and Josh. xiii. 26), and yet he is always designated "the Gileadite;" and so also with Barzillai of Mahanaim (2 Sam. xvii. 27; Ezr. ii. 61; comp. Josh. xiii. 26).

The character of the tribe is throughout strongly marked, fierce and warlike, "strong men of might, men of war for the battle, that could handle shield and buckler, their faces the faces of lions and like roes upon the mountains for swiftness." Such is the graphic description given of those eleven heroes

Digitized by Google

of Gad, "the least of them more than equal to a hundred, and the greatest to a thousand," who joined their fortunes to David at the time of his greatest discredit and embarrassment (1 Chr. xii. 8), undeterred by the natural difficulties of "flood and field" which stood in their way. Surrounded, as they were, by Ammonites, Midianites, Hagarites, "Children of the East," and all the other countless tribes, animated by a common hostility to the strangers whose coming had dispossessed them of their fairest districts, the warlike propensities of the tribe must have had many opportunities of exercise. One of its great engagements is related in 1 Chr. v. 19–22. Here their opponents were the wandering Ishmaelite tribes of Jetur, Nephish, and Nodab (comp. Gen. xxv. 15), nomad people, possessed of an enormous wealth in camels, sheep, and asses, to this day the characteristic possessions of their Bedouin successors. This immense booty came into the hands of the conquerors, who seem to have entered with it on the former mode of life of their victims: probably pushed their way further into the eastern wilderness in the "steads" of these Hagarites. Another of these encounters is contained in the history of Jephthah, but this latter story develops elements of a different nature and a higher order than the mere fierceness necessary to repel the attacks of the plunderers of the desert. In the behavior of Jephthah throughout that affecting history, there are traces of a spirit which we may almost call chivalresque; the high tone taken with the Elders of Gilead, the noble but fruitless expostulation with the king of Ammon before the attack, the hasty vow, the overwhelming grief, and yet the persistent devotion of purpose — surely in all these there are marks of a great nobility of character, which must have been more or less characteristic of the Gadites in general. If to this we add the loyalty, the generosity and the delicacy of Barzillai (2 Sam. xix. 32–39) we obtain a very high idea of the tribe at whose head were such men as these. Nor must we, while enumerating the worthies of Gad, forget that in all probability Elijah the Tishbite, "who was of the inhabitants of Gilead," was one of them.

But while exhibiting these high personal qualities, Gad appears to have been wanting in the powers necessary to enable him to take any active or leading part in the confederacy of the nation. The warriors, who rendered such assistance to David, might, when Ishbosheth set up his court at Mahanaim as king of Israel, have done much towards affirming his rights. Had Abner made choice of Shechem or Shiloh instead of Mahanaim, the quick, explosive Ephraim instead of the unready Gad, who can doubt that the troubles of David's reign would have been immensely increased, perhaps the establishment of the northern kingdom ante-dated by nearly a century? David's presence at the same city during his flight from Absalom produced no effect on the tribe, and they are not mentioned as having taken any part in the quarrels between Ephraim and Judah.

Cut off as Gad was by position and circumstances from its brethren on the west of Jordan, it still retained some connection with them. We may infer that it was considered as belonging to the northern kingdom: "Know ye not," says Ahab in Samaria, "know ye not that Ramoth in Gilead is ours, and we be still, and take it not out of the hand of the king of Syria?" (1 K. xxii. 3). The territory of Gad was the battle-field on which the long and fierce struggles of Syria and Israel were fought out, and as an agricultural pastoral country, it must have suffered severely in consequence (2 K. x. 33).

Gad was carried into captivity by Tiglath-Pileser (1 Chr. v. 26), and in the time of Jeremiah the cities of the tribe seem to have been inhabited by the Ammonites. "Hath Israel no sons? hath he no heir? why doth Malcham (*i. e.* Moloch) inherit Gad, and his people dwell in his cities?" (Jer. xlix. 1). G.

GAD (גָּד [see above]: Γάδ: *Gad*), "the seer" (חוֹזֵה), or "the king's seer," *i. e.* David's — such appears to have been his official title (1 Chr xxix. 29; 2 Chr. xxix. 25; 2 Sam. xxiv. 11; 1 Chr xxi. 9) — was a "prophet" (נָבִיא), who appears to have joined David when in "the hold," and at whose advice he quitted it for the forest of Hareth (1 Sam. xxi. 5). Whether he remained with David during his wanderings is not to be ascertained: we do not again encounter him till late in the life of the king, when he reappears in connection with the punishment inflicted for the numbering of the people (2 Sam. xxiv. 11–19; 1 Chr. xxi. 9–19). But he was evidently attached to the royal establishment at Jerusalem, for he wrote a book of the Acts of David (1 Chr. xxix. 29), and also assisted in settling the arrangements for the musical service of the "house of God," by which his name was handed down to times long after his own (2 Chr. xxix. 25). In the abruptness of his introduction Gad has been compared with Elijah (Jerome, *Qu. Hebr.* on 1 Sam. xxii. 5), with whom he may have been of the same tribe, if his name can be taken as denoting his parentage, but this is unsupported by any evidence. Nor is there any apparent ground for Ewald's suggestion (*Gesch.* iii. 116) that he was of the school of Samuel. If this could be made out, it would afford a natural reason for his joining David. [DAVID, p. 556.] G.

GAD (גָּד: δαιμόνιον; Sin. δαίμων: *Fortuna*). Properly "the Gad," with the article. In the A. V. of Is. lxv. 11 the clause "that prepare a table for that troop" has in the margin instead of the last word the proper name "Gad," which evidently denotes some idol worshipped by the Jews in Babylon, though it is impossible positively to identify it. Huetius would understand by it Fortune as symbolized by the Moon, but Vitringa, on the contrary considers it to be the Sun. Millius (*Diss. de Gad et Meni*) regards both Gad and Meni as names of the Moon. That Gad was the deity Fortune, under whatever outward form it was worshipped, is supported by the etymology, and by the common assent of commentators. It is evidently connected with the Syriac ܓܕܐ, *gâdô*, "fortune, luck," and with the Arabic جد, *jad*, "good fortune," and Gesenius is probably right in his conjecture that Gad was the planet Jupiter, which was regarded by the astrologers of the East (Pococke, *Spec. Hist. Ar.* p. 130) as the star of greater good fortune. Movers (*Phœn.* i. 650) is in favor of the planet Venus. Some have supposed that a trace of the Syrian worship of Gad is to be found in the exclamation of Leah, when Zilpah bare a son (Gen. xxx. 11), בָּגָד, *bâgâd*, or as the *Kerî* has it, בָּא גָד, "Gad, or good fortune, cometh." The Targum of Pseudo-Jonathan and the Jerusalem Targum both

Digitized by Google

give "a lucky planet cometh," but it is most probable that this is an interpretation which grew out of the astrological beliefs of a later time; and we can infer nothing from it with respect to the idolatry of the inhabitants of Padan-Aram in the age of Jacob. That this later belief in a deity Fortune existed, there are many things to prove. Buxtorf (*Lex. Talm.* s. v.) says that anciently it was a custom for each man to have in his house a splendid couch, which was not used, but was set apart for "the prince of the house," that is, for the star, or constellation Fortune, to render it more propitious. This couch was called the couch of Gada, or good-luck (Talm. Babl. *Sanhed.* f. 20 *a*, *Nedarim*, f. 56 *a*). Again in Bereshith Rabba, sect. 65, the words יָבוֹא גָד, in Gen. xxvii. 31, are explained as an invocation to Gada or Fortune. Rabbi Moses the Priest, quoted by Aben Ezra (on Gen. xxx. 11), says "that לְגַד (Is. lxv. 11) signifies the star of luck, which points to everything that is good; for thus is the language of Kedar (Arabic): but he says that בָּא גַד (Gen. xxx. 11) is not used in the same sense."

Illustrations of the ancient custom of placing a banqueting table in honor of idols will be found in the table spread for the sun among the Ethiopians (Her. iii. 17, 18), and in the feast made by the Babylonians for their god Bel, which is described in the Apocryphal history of Bel and the Dragon (comp. also Her. i. 181, &c.). The table in the temple of Belus is described by Diodorus Siculus (ii. 9) as being of beaten gold, 40 feet long, 15 wide, and weighing 500 talents. On it were placed two drinking cups (καρχήσια) weighing 30 talents, two censers of 300 talents each, and three golden goblets, that of Jupiter or Bel weighing 1200 Babylonian talents. The couch and table of the god in the temple of Zeus Triphylius at Patara in the island of Panchæa are mentioned by Diodorus (v. 46). Comp. also Virg. *Æn.* ii. 763:

> "Huc undique Troia gaza
> Incensis erepta adytis, *mensæque deorum*
> *Crateresque auro solidi*, captivaque vestis
> Congeritur."

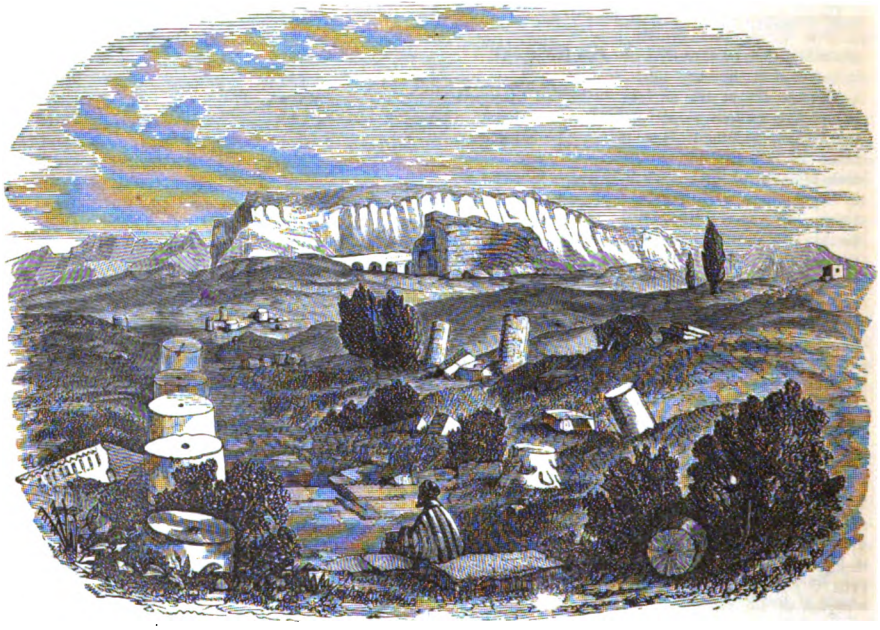
In addition to the opinions which have been referred to above may be quoted that of Stephen Le Moyne (*Var. Sacr.* p. 363), who says that Gad is the goat of Mendes, worshipped by the Egyptians as an emblem of the sun; and of Le Clerc (*Comm. in Is.*) and Lakemacher (*Obs. Phil.* iv. 18, &c.), who identify Gad with Hecate. Macrobius (*Sat.* i. 19) tells us that in the later Egyptian mythology Τύχη was worshipped as one of the four deities who presided over birth, and was represented by the Moon. This will perhaps throw some light upon the rendering of the LXX. as given by Jerome. [MENI, note *a*.]

Traces of the worship of Gad remain in the proper names Baal-Gad, and Giddeneme (Plaut. *Pœn.* v. 3), the latter of which Gesenius (*Mon. Phœn.* p. 407) renders גַּד נְעִמָה, "favoring fortune."

W. A. W.

GAD'ARA, a strong city (Joseph. *Ant.* xiii. 13, § 3), situated near the river Hieromax (Plin. *H. N.* v. 16), east of the Sea of Galilee, over against Scythopolis and Tiberias (Euseb *Onom.* s. v.), and sixteen Roman miles distant from each of those places (*Itin. Anton.* ed. Wess. pp. 196, 198; *Tab. Peut.*). It stood on the top of a hill, at the foot of which, upon the banks of the Hieromax, three miles distant, were warm springs and baths called Amatha (*Onom.* s. v. *Ætham et Gadara*; *Itin. Ant. Martyr.*). Josephus calls it the capital of Peræa; and Polybius says it was one of the most strongly fortified cities in the country (Joseph. *B. J.* iv. 7, § 3; Polyb. v. 71). A large district was attached to it, called by Josephus Γαδαρῖτις (*B. J.* iii. 10, § 10); Strabo also informs us that the warm healing springs were ἐν τῇ Γαδαρίδι, "in the territory of Gadara (*Geog.* xvi.). Gadara itself is not mentioned in the Bible, but it is evidently identical with the "Country of the Gadarenes," χώρα or περίχωρος τῶν Γαδαρηνῶν (Mark v. 1; Luke viii. 26, 37).

Of the site of Gadara, thus so clearly defined, there cannot be a doubt. On a partially isolated hill, at the northwestern extremity of the mountains of Gilead, about sixteen miles from Tiberias, lie the extensive and remarkable ruins of *Um Keis*. Three miles northward, at the foot of the hill, is the deep bed of the *Sheriat el-Mandhûr*, the ancient Hieromax; and here are still the warm springs of Amatha. On the west is the Jordan valley; and on the south is *Wady el-'Arab*, running parallel to the *Mandhûr*. *Um Keis* occupies the crest of the ridge between the two latter wadies; and as this crest declines in elevation towards the east as well as the west, the situation is strong and commanding. The whole space occupied by the ruins is about two miles in circumference; and there are traces of fortifications all round, though now almost completely prostrate.



The first historical notice of Gadara is its capture, along with Pella and other cities, by Antiochus the Great, in the year B. C. 218 (Joseph. *Ant.* xii. 3, § 3). About twenty years afterwards it was taken from the Syrians by Alex. Jannæus, after a siege of ten months (*Ant.* xiii. 13, § 3; *B. J.* i. 4, § 2). The Jews retained possession of it for some time; but the place having been destroyed during their civil wars, it was rebuilt by Pompey to gratify his freedman Demetrius, who was a Gadarene (*B. J.* i. 7, § 7). When Gabinius, the proconsul of Syria, changed the government of Judæa, by dividing the country into five districts, and placing each under the authority of a council, Gadara was made the capital of one of these districts (*B. J.* i. 8, § 5). The territory of Gadara, with the adjoining one of Hippos, was subsequently added to the kingdom of Herod the Great (*Ant.* xv. 7, § 3).

Gadara, however, derives its greatest interest from having been the scene of our Lord's miracle in healing the demoniacs (Matt. viii. 28–34; Mark v. 1-21; Luke viii. 26–40). "They ware no clothes, neither abode in any house, but in the tombs." Christ came across the lake from Capernaum, and landed at the southeastern corner, where the steep, lofty bank of the eastern plateau breaks down into the plain of the Jordan. The demoniacs met him a short distance from the shore; on the side of the adjoining declivity the "great herd of swine" were feeding; when the demons went among them the whole herd rushed down that "steep place" into the lake and perished; the keepers ran up to the city and told the news, and the excited population came down in haste, and "besought Jesus that he would depart out of their coasts." The whole circumstances of the narrative are thus strikingly illustrated by the features of the country. Another thing is worthy of notice. The most interesting remains of Gadara are its *tombs*, which dot the cliffs

Digitized by Google

for a considerable distance round the city. They are excavated in the limestone rock, and consist of chambers of various dimensions, some more than 20 feet square, with recesses in the sides for bodies. The doors are slabs of stone — a few being ornamented with panels: some of them still remain in their places. The present inhabitants of *Um Keis* are all troglodytes, "dwelling in tombs," like the poor maniacs of old; and occasionally they are almost as dangerous to the unprotected traveller. In the Gospel of Matt. (viii. 28) we have [in the received text] the word Γεργεσηνῶν (instead of Γαδαρηνῶν), which seems to be the same as the Hebrew גִּרְגָּשִׁי (LXX. Γεργεσαῖος) in Gen. xv. 21 and Deut. vii. 1 — the name of an old Canaanitish tribe [GIRGASHITES], which Jerome (*Comm. ad Gen.* xv.) locates on the shore of the sea of Tiberias. Origen also says (*Opp.* iv. 140) that a city called *Gergesa* anciently stood on the eastern side of the lake. Even were this true, still the other gospels would be strictly accurate. Gadara was a large city, and its district would include Gergesa. But it must be remembered that the most ancient MSS. give the word Γερασηνῶν, while others have Γαδαρηνῶν — the former reading is adopted by Griesbach[a] and Lachmann, while Scholz [with Tisch. and Treg.] prefers the latter; and either one or other of these is preferable to Γεργεσηνῶν. [GERASA.]

Gadara was captured by Vespasian on the first outbreak of the war with the Jews, all its inhabitants massacred, and the town itself, with the surrounding villages, reduced to ashes (Joseph. *B. J.* iii. 7, § 1). It was at this time one of the most important cities east of the Jordan, and is even called the Capital of Perœa. At a later period it was the seat of a bishop; but it fell to ruin at, or soon after, the Mohammedan conquest.

Gadara.

The ruins of *Um Keis* bear testimony to the splendor of ancient Gadara. On the northern side of the hill is a theatre, and not far from it are the remains of one of the city gates. At the latter a street commences — the *via recta* of Gadara — which ran through the city in a straight line, having a colonnade on each side. The columns are all prostrate. On the west side of the hill is another larger theatre in better preservation. The principal part of the city lay to the west of these two theatres, on a level piece of ground. Now not a house, not a column, not a wall remains standing; yet the old pavement of the main street is nearly perfect; and here and there the traces of the chariot-wheels are visible on the stones, reminding one of the thoroughfares of Pompeii. (Full descriptions of Gadara are given in *Handbook for Syr. & Pal.*; Burckhardt, *Syria*, p. 270 f.; Porter, in *Journal of Sac. Lit.* vol. vi. p. 281 f.) J. L. P.

* It is still a question whether we know the exact place where the Saviour healed the demoniacs, or the precipice from which the swine rushed down into the sea. The statement in the foregoing article that both these events occurred at Gadara, or in its immediate vicinity, is attended with serious difficulty. That city is ten miles inland from the lake, and is approached only by a toilsome way, whereas the evangelists seem to represent the miracle as performed at once on the Saviour's landing (Mark v. 2), and consequently, according to the

[a] * Griesbach retains Γεργεσηνῶν in the text (Matt. viii. 28), but marks Γεραση̃νῶν as of equal, or nearly equal, authority. See the full discussion in his *Commentarius Criticus*, i. 90 ff. Lachmann, Tischendorf and Tregelles agree in reading Γερασηνῶν in Mark; in Luke, Tisch. now reads (8th ed.) Γεργεσηνων. A.

Digitized by Google

impression which the narrative makes on the reader, near the shore. Again, the mountain where the swine were feeding appears to have been near the lake; for they ran madly down the precipice (κρημνός) into the sea and were drowned. But with Gadara at such a distance, the miracle could not have been wrought till after some considerable delay, and still less could the swine have plunged directly into the sea. A recent traveller in that region, Thomson (*Land & Book*, ii. 35), describes the intervening country thus: — First (as one goes inland), "there is a broad plain from *Khurbet Simra* to the *Jermuk*; then the vast gorge of this river, and after it an ascent for an hour and a half to *Um Keis*." Hence, if the swine started from the vicinity of Gadara, they would have to run down the mountain, ford the *Jermuk* (Hieromax) as deep and rapid as the Jordan itself, and then cross a level plain several miles in length before reaching the lake.

Under these circumstances the writer just named proposes a different locality, which agrees much better with the Scripture account. He reports his finding a heap of ruins on the eastern shore of the lake, near the mouth of *Wady Semakh*, known among the natives as *Kersa* or *Gersa*. Directly above this site stands "an immense mountain," where are also (as well as near Gadara) rock-tombs such as lunatics in the East sometimes occupy at the present day.[a] The base of this mountain, though not directly overhanging the site, is so near the shore that the swine, rushing down the declivity (said to be almost perpendicular = κατὰ τοῦ κρημνοῦ, Mark v. 13), would be carried by their own impetus across the narrow strip of beach into the depth of the sea.[b] He says further, that this *Gersa*, as pronounced by the Arabs, gives back to us very nearly the ancient Gergesa or Geresa. This may be the identical place of which Origen seems to have heard, and which he supposed to be the scene of the miracle. (See Reland's *Palaestina*, p. 807.)

One circumstance not unimportant to the discussion here has been overlooked by some writers. The evangelists do not mention Gadara or Gergesa (whichever may be the true reading), but speak only of "the country (region, χώρα) of the Gadarenes," or Gergesenes, as a general geographical designation.[c] So far from naming that city, Luke (viii. 26), in order to give his readers an idea of the "region of the Gadarenes," merely defines it as opposite to Galilee (ἀντιπέραν τῆς Γαλιλαίας). Hence the city to which the Synoptists refer as the one to which the keepers of the swine fled in terror, and from which the people, on hearing their report, came out to Jesus (Matt. viii. 33 ff.; Mark 14; Luke viii. 34 ff.), is not necessarily Gadara, but may be any other city in the land of the Gadarenes, viewed definitely as the one associated in the writer's mind with these transactions. It is sufficient for the accuracy of the writers, if we find the scene of the two-fold miracle within the limits of the country of the Gadarenes or Gergesenes. The evangelists do not in reality commit themselves to anything more definite than that.

It is gratifying to find that Mr. Tristram, who also visited the ruins of this *Kersa* or *Gersa*, endorses Dr. Thomson's view. "The bluff behind is so steep, and the shore so narrow, that a herd of swine, rushing frantically down, must certainly have been overwhelmed in the sea before they could recover themselves. While the tombs at Gadara are peculiarly interesting and remarkable, yet the whole region is so perforated everywhere by these rock-chambers of the dead, that we may be quite certain that a home for the demoniac will not be wanting, whatever locality be assigned for the events recorded by the evangelists." (*Land of Israel*, p. 466, 2d ed.) Lord Lindsay, who went into that region, assigns the occurrence to *Wady Fik*, considerably further south on the lake (*Letters on the Holy Land*, p. 238). Stanley, at first relying on that writer, adopted the same view (*Sin. & Pal.* ch. x.); but now speaks of the inadmissibility of that identification (*Notices of Eastern Localities, &c.*, p. 194). Captain Wilson's exploring party have visited this *Kersa* still more recently, and found it answering well to the conditions of the Scripture history. H.

GAD'DI (גַּדִּי: Γαδδί; [Vat. Γαδδει:] *Gaddi*), son of Susi; representative of the tribe of Manasseh among the spies sent by Moses to explore Canaan (Num. xiii. 11).

GAD'DIEL (גַּדִּיאֵל [*God the fortune-giver*, Fürst]: Γουδιήλ: *Geddiel*), son of Sodi; representative of the tribe of Zebulun on the same occasion (Num. xiii. 10).

GA'DI (גָּדִי: Γαδδί; [Vat. Γαδδει;] Alex. Γεδδει, and Γαδδει: *Gadi*), father of Menahem who seized the throne of Israel from Shallum (2 K xv. 14, 17).

GAD'ITES, THE (הַגָּדִי: ὁ Γάδ, ὁ Γαδδί, [Vat. FA. -δει], *oi viol* Γάδ; [Alex. in 2 K. x. 33, Γαλααδδει; Vat. in 1 Chr. xii. 8, Γεδδει; ver. 37, FA. Γαδδειν:] *Gad, Gaditae, Gaddi*). The descendants of Gad and members of his tribe. Their character is described under GAD, p. 849. In 1 Sam. xxiii. 36 for "the Gadite" the LXX. have Γαλααδδί [Vat. -δει, Alex. Γαδδι], and the Vulg. *de Gadi*. W. A. W.

GA'HAM (גָּחָם [perh. *burning, fire-brand*]: Ταάμ; Alex. ["in charact. minore"] Γααμ: [*Gaham*]), son of Nahor, Abraham's brother, by his concubine Reumah (Gen. xxii. 24). No light has yet been thrown on this tribe. The name probably signifies "sunburnt," or "swarthy."

GA'HAR (גַּחַר [*hiding-place*, Ges.]: Γαάρ, [in Ezr., Vat. Γαελ; in Neh., Vat. FA. omit:] *Gaher*). The Bene-Gachar were among the families of Nethinim who returned from the Captivity with Zerubbabel (Ezr. ii. 47; Neh. vii. 49). In the lists of 1 Esdr. the name is given as GEDDUR.

a * Tristram (*Land of Israel*, 2d ed., p. 465, note) says: "I have often met in the outskirts of Caiffa 'Haifa, at the foot of Mount Carmel] a maniac who wells in similar tombs." H

b * Matthew's "afar off," viii. 30 (μακράν), being of course relative, applies well enough to the herd high up on the side of the "immense mountain," though the spectator may be at the base. Besides, one feels that Mark's and Luke's *deictic* ἐκεῖ reflects a manifest sense on their part of the vicinity of the mountain and the landing-place to each other. The hand points out the object, as it were, visible from the shore. H.

c * Tristram (p. 465) speaks of Matthew as naming the exact locality, Gergesa = *Gersa*, but Matthew's expression is χώρα τῶν Γεργεσηνῶν or Γαδαρηνῶν (the latter the better reading), and therefore in each case indefinite like that of the other writers. H

GAIUS or CAIUS (Γάϊος: *Caius*, the former Grecized from the latter) is the name apparently of four persons mentioned in the N. T.

1. A Macedonian, a missionary associate of Paul (συνέκδημος), whom the mob at Ephesus seized and dragged into the theatre, and would no doubt have killed, had it not been for the interposition of the Asiarchs and "town-clerk" of the city. This Gaius is otherwise unknown. See Acts xix. 29.

2. One of the party who went with Paul from Corinth (possibly only from Philippi), accompanying him as far as Asia, when he went for the last time from Europe to Palestine.[a] This Gaius was a native of Derbe (Acts xx. 4), and hence a different person from the preceding one. Some, as Kuinoel, Olshausen, Neander, regard him as a Thessalonian, but they must then join Δερβαῖος with Τιμόθεος, in the above passage, which not only puts καί there out of its natural place, but disagrees with xvi. 1. Timothy was a native of LYSTRA (which see).

3. A Gaius, who lived at Corinth, and sent a salutation in Paul's letter to the Roman Christians (Rom. xvi. 23). He was one of the very few whom Paul baptized at Corinth (1 Cor. i. 14), was Paul's "host" during his second sojourn in that city, and was noted for his hospitality to all who bore Christ's name (Rom. xvi. 23).

4. John's Third Epistle is addressed to a Christian of this name, of whose character the Apostle's commendation (3 John i. 6) gives us an exalted opinion. We may possibly identify him with number 2. John wrote the epistle at Ephesus. Derbe was in Lycaonia, a province of Asia Minor, and the Derbean Gaius, as last traced in the Acts (xx. 4), was on the way to Asia. [JOHN, SECOND AND THIRD EPISTLES OF.] H.

GAL'AAD (Γαλαάδ; [in 1 Macc. v. 9, Alex. Γαλααδιτις: *Galaad;* in Jud. i., *Cedar*, in xv. Vulg. omits]), 1 Macc. v. 9, 55; Jud. i. 8, xv. 5; and THE COUNTRY OF GALAAD (ἡ Γαλααδῖτις; [Sin. -δει-:] *Galaaditis*), 1 Macc. v. 17, 20, 25, 27, 36, 45; xiii. 22, the Greek form of the word GILEAD.

GA'LAL (גָּלָל [*occasion*, or *cause;* and then, perh., *one weighty, influential*, Fürst]: Γαλαάλ; [Vat. Γαλααδ; Alex. Γωληλ; Comp. Γαλάλ:] *Galal*). 1. A Levite, one of the sons of Asaph (1 Chr. ix. 15).

2. Another Levite of the family of Elkanah (1 Chr. ix. 16).

3. [Rom. Vat. Alex. FA.[1] omit; FA.[3] and comp. Γαλελ.] A third Levite, son of Jeduthun (Neh. xi. 17).

GALA'TIA (Γαλατία). It is sometimes difficult to determine, in the case of the names of districts mentioned in the N. T., whether they are to be understood in a general and popular sense as referring to a region inhabited by a race or tribe of people, or whether they define precisely some tract of country marked out for political purposes. Galatia is a district of this kind; and it will be convenient to consider it, first ethnologically, and then as a Roman province.

Galatia is literally the "Gallia" of the East. Roman writers call its inhabitants Galli, just as Greek writers call the inhabitants of ancient France Γαλάται. In 2 Tim. iv. 10, some commentators suppose Western Gaul to be meant, and several MSS. have Γαλλίαν instead of Γαλατίαν. In 1 Macc. viii. 2, where Judas Maccabeus is hearing the story of the prowess of the Romans in conquering the Γαλάται, it is possible to interpret the passage either of the Eastern or Western Gauls; for the subjugation of Spain by the Romans, and their defeat of Antiochus, King of Asia, are mentioned in the same context. Again, Γαλάται is the same word with Κέλται; and the Galatians were in their origin a stream of that great Keltic torrent (apparently Kymry, and not Gael) which poured into Greece in the third century before the Christian era. Some of these invaders moved on into Thrace, and appeared on the shores of the Hellespont and Bosphorus, when Nicomedes I., king of Bithynia, being then engaged in a civil war, invited them across to help him. Once established in Asia Minor, they became a terrible scourge, and extended their invasions far and wide. The neighboring kings succeeded in repressing them within the general geographical limits to which the name of Galatia was permanently given. Antiochus I., king of Syria, took his title of Soter in consequence of his victory over them, and Attalus I. of Pergamus commemorated his own success by taking the title of king. The Galatians still found vent for their restlessness and love of war by hiring themselves out as mercenary soldiers. This is doubtless the explanation of 2 Macc. viii. 20, which refers to some struggle of the Seleucid princes in which both Jews and Galatians were engaged. In Joseph. *B. J.* i. 20, § 3, we find some of the latter, who had been in Cleopatra's body-guard, acting in the same character for Herod the Great. Meanwhile the wars had been taking place, which brought all the countries round the east of the Mediterranean within the range of the Roman power. The Galatians fought on the side of Antiochus at Magnesia. In the Mithridatic war they fought on both sides. At the end of the Republic Galatia appears as a dependent kingdom, at the beginning of the Empire as a province. (See Ritter, *Erdkunde*, xviii. 597–610.)

The Roman province of Galatia may be roughly described as the central region of the peninsula of Asia Minor, with the provinces of ASIA on the west, CAPPADOCIA on the east, PAMPHYLIA and CILICIA on the south, and BITHYNIA and PONTUS on the north. It would be difficult to define the exact limits. In fact they were frequently changing. For information on this subject, see the *Dict. of Geog.* i. 930 *b*. At one time there is no doubt that this province contained Pisidia and Lycaonia, and therefore those towns of Antioch, Iconium, Lystra, and Derbe, which are conspicuous in the narrative of St. Paul's travels. But the characteristic part of Galatia lay northward from those districts. On the table-land between the Sangarius and the Halys, the Galatians were settled in three tribes, the Tectosages, the Tolistoboii, and the Trocmi, the first of which is identical in name with a tribe familiar to us in the history of Gaul, as distributed over the Cevennes near Toulouse. The three capitals were respectively Tavium, Pessinus, and Ancyra. The last of these (the modern *Angora*) was the centre of the roads of the district, and may be regarded as the metropolis of the Galatians. These Eastern Gauls preserved much of their ancient character

[a] It is said erroneously in Kitto's *Cyclop. of Bibl. Lit.* (iii. 1167), that Paul was then going "from Asia, on his second visit to Europe," *i. e.*, earlier than the actual time, and the opposite of the true direction. H.

Digitized by Google

and something of their ancient language. At least Jerome says that in his day the same language might be heard at Ancyra as at Trèves: and he is a good witness; for he himself had been at Trèves. The prevailing speech, however, of the district was Greek. Hence the Galatians were called Gallogræci. ("Hi jam degeneres sunt; mixti, et Gallogræci vere, quod appella..tur." Manlius in Livy, xxxviii. 17.) The inscriptions found at Ancyra are Greek, and St. Paul wrote his Epistle in Greek.

It is difficult at first sight to determine in what sense the word Galatia is used by the writers of the N. T., or whether always in the same sense. In the Acts of the Apostles the journeys of St. Paul through the district are mentioned in very general terms. We are simply told (Acts xvi. 6), that on his second missionary circuit he went with Silas and Timotheus through *τὴν Φρυγίαν καὶ τὴν Γαλατικὴν χώραν*. From the epistle indeed we have this supplementary information, that an attack of sickness (*δι' ἀσθένειαν τῆς σαρκός*, Gal. iv. 13) detained him among the Galatians, and gave him the opportunity of preaching the Gospel to them, and also that he was received by them with extraordinary fervor (*ib.* 14, 15); but this does not inform us of the route which he took. So on the third circuit he is described (Acts xviii. 23) as *διερχόμενος καθεξῆς τὴν Γαλατικὴν χώραν καὶ Φρυγίαν*. We know from the first Epistle to the Corinthians that on this journey St. Paul was occupied with the collection for the poor Christians of Judæa, and that he gave instructions in Galatia on the subject (*ὅσπερ διέταξα ταῖς ἐκκλησίαις τῆς Γαλατίας*, 1 Cor. xvi. 1); but here again we are in doubt as to the places which he had visited. We observe that the "churches" of Galatia are mentioned here in the plural, as in the opening of the Epistle to the Galatians themselves (Gal. i. 2). From this we should be inclined to infer that he visited several parts of the district, instead of residing a long time in one place, so as to form a great central church, as at Ephesus and Corinth. This is in harmony with the phrase *ἡ Γαλατικὴ χώρα* used in both instances. Since Phrygia is mentioned first in one case, and second in the other, we should suppose that the order of the journey was different on the two occasions. Phrygia also being not the name of a Roman province, but simply an ethnographical term, it is natural to conclude that Galatia is used here by St. Luke in the same general way. In confirmation of this view it is worth while to notice that in Acts ii. 9, 10, where the enumeration is ethnographical rather than political, Phrygia is mentioned, and not Galatia, while the exact contrary is the case in 1 Pet. i. 1, where each geographical term is the name of a province.

The Epistle to the Galatians was probably written very soon after St. Paul's second visit to them. Its abruptness and severity, and the sadness of its tone, are caused by their sudden perversion from the doctrine which the Apostle had taught them, and which at first they had received so willingly. It is no fancy, if we see in this fickleness a specimen of that "esprit impétueux, ouvert à toutes les impressions," that, "mobilité extrême," which Thierry marks as characteristic of the Gaulish race (*Hist. des Gaulois*, Introd. iv., v.). From Joseph. *Ant.* xvi. 6, § 2, we know that many Jews were settled in Galatia: but Gal. iv. 8 would lead us to suppose that St. Paul's converts were mostly Gentiles.

We must not leave unnoticed the view advocated by Böttger (*Schauplatz der Wirksamkeit des Apostels Paulus*, pp. 28–30, and the third of his *Beiträge*, pp. 1–5), namely, that the Galatia of the epistle is entirely limited to the district between Derbe and Colossæ, *i. e.* the extreme southern frontier of the Roman province. On this view the visit alluded to by the Apostle took place on his first missionary circuit; and the *ἀσθένεια* of Gal. iv. 13 is identified with the effects of the stoning at Lystra (Acts xiv. 19). Geographically this is not impossible, though it seems unlikely that regions called Pisidia and Lycaonia in one place should be called Galatia in another. Böttger's geography, however, is connected with a theory concerning the date of the epistle; and for the determination of this point we must refer to the article on the GALATIANS, THE EPISTLE TO THE. J. S. H.

* **GALATIANS** (Γαλάται: *Galatæ*), 1 Macc. viii. 2; 2 Macc. viii. 20; Gal. iii. 1; to whom Paul wrote his Galatian epistle. Of this people some account has been given above [GALATIA]. No one of all the N. T. epistles reflects so many national traits of the readers to whom they were addressed as that to the Galatians. The somewhat peculiar intermixture of Judaistic and heathen elements which we find at work among them, their tendency to the opposite extremes of a Pharisaic legalism on the one hand, and of a degree of libertinism on the other, the ardor of temperament which made them so zealous for the truth of the Gospel at one time, and so easy a prey to the arts of false teachers at another, and likewise susceptible of such strong affection for Paul when they first believed, and of such partisanship for his opponents so soon after his leaving them, are characteristics more or less peculiar to this letter, and presuppose certain historical antecedents having something to do with their formation.

Of these antecedents, Prof. Lightfoot's ethnographic sketch, brief, but the result of extended investigation (*St. Paul's Epistle to the Galatians*, pp. 1–17, 2d ed.), furnishes a very good account: "The Galatians, whom Manlius subdued by the arms of Rome, and St. Paul by the sword of the Spirit, were a very mixed race. The substratum of society consisted of the original inhabitants of the invaded country, chiefly Phrygians, of whose language not much is known, but whose strongly marked religious system has a prominent place in ancient history. The upper layer was composed of the Gaulish conquerors; while scattered irregularly through the social mass were Greek settlers, many of whom doubtless had followed the successors of Alexander thither, and were already in the country when the Gauls took possession of it. To the country thus peopled the Romans, ignoring the old Phrygian population, gave the name of Gallogræcia. . . . The great work of the Roman conquest was the fusion of the dominant with the conquered race — the result chiefly, it would appear, of that natural process by which all minor distinctions are levelled in the presence of a superior power. From this time forward the amalgamation began, and it was not long before the Gauls adopted even the religion of their Phrygian subjects. . . . But before St. Paul visited the country two new elements had been added to this already heterogeneous population. The establishment of the province must have drawn thither a considerable number of Romans, not very widely spread in all probability, but gathered about the centres of government, either holding official

Digitized by Google

positions themselves, or connected more or less directly with those who did. . . . More important is it to remark on the large influx of Jews, which must have invaded Galatia in the interval. Antiochus the Great had settled two thousand Jewish families in Lydia and Phrygia; and even if we suppose these settlements did not extend to Galatia, properly so called, the Jewish colonists must in course of time have overflowed into a neighboring country which possessed so many attractions for them. . . . The country of Galatia afforded great facilities for commercial enterprise. With fertile plains rich in agricultural produce, with extensive pastures for flocks, with a temperate climate and copious rivers, it abounded in all those resources out of which a commerce is created. It was moreover conveniently situated for mercantile transactions, being traversed by a great high-road between the East and the shores of the Ægean, along which caravans were constantly passing, and among its towns it numbered not a few which are mentioned as great centres of commerce. . . . With these attractions it is not difficult to explain the vast increase of the Jewish population in Galatia, and it is a significant fact that in the generation before St. Paul, Augustus directed a decree granting especial privileges to the Jews to be inscribed in his temple at Ancyra, the Galatian metropolis, doubtless because this was a principal seat of the dispersion in these parts of Asia Minor. Other testimony to the same effect is afforded by the inscriptions found in Galatia, which present here and there Jewish names and symbols amidst a strange confusion of Phrygian and Celtic, Roman and Greek. At the time of St. Paul they probably boasted a large number of proselytes, and may even have infused a beneficial leaven into the religion of the mass of the heathen population. . . . The main features of the Gaulish character are traced with great distinctness by the Roman writers. Quickness of apprehension, promptitude in action, great impressibility, an eager craving after knowledge, this is the brighter aspect of the Celtic character. Inconstant and quarrelsome, treacherous in their dealings, incapable of sustained effort, easily disheartened by failure, such they appear when viewed on their darker side. . . . Fickleness is the term used to express their temperament. This instability of character was the great difficulty against which Cæsar had to contend in his dealings with the Gauls. He complains that they all with scarcely an exception are impelled by the desire of change. Nor did they show more constancy in the discharge of their religious than of their social obligations. The hearty zeal with which they embraced the Apostle's teaching, followed by their rapid apostasy, is only an instance out of many of the reckless facility with which they adopted and discarded one religious system after another. To St. Paul, who had had much bitter experience of hollow professions and fickle purposes, this extraordinary levity was yet a matter of unfeigned surprise. 'I marvel,' he says, 'that ye are changing so quickly.' He looked upon it as some strange fascination. 'Ye senseless Gauls, who did bewitch you?' The language in which Roman writers speak of the martial courage of the Gauls, impetuous at the first onset, but rapidly melting in the heat of the fray, well describes the short-lived prowess of these converts in the warfare of the Christian church. Equally important, in its relation to St. Paul's epistle, is the type of religious worship which seems to have pervaded the Celtic nations. The Gauls are described as a superstitious people, given over to ritual observances. . . . The Gospel was offered to them, and the energy of the Apostle's preaching took their hearts by storm. But the old leaven still remained. The pure and spiritual teaching of Christianity soon ceased to satisfy them. Their religious temperament, fostered by long habit, prompted them to seek a system more external and ritualistic. 'Having begun in the Spirit, they would be made perfect in the flesh.' Such is the language of the Apostle rebuking this unnatural violation of the law of progress." H.

GALATIANS, THE EPISTLE TO THE, was written by the Apostle St. Paul, not long after his journey through Galatia and Phrygia (Acts xviii. 23), and *probably* (see below) in the early portion of his two years and a half stay at Ephesus, which terminated with the Pentecost of A. D. 57 or 58. It would thus succeed in order of composition the epistles to the Thessalonians, and would form the first of the second group of epistles, the remaining portions of which are epistles to the Corinthians and to the Romans.

This characteristic letter was addressed to the churches of the Asiatic province of Galatia (i. 2), or Gallograecia (Strabo, xii. 566) — a province that bore in its name its well-founded claim to a Gallic or Celtic origin (Pausanias, i. 4), and that now, after an establishment, first by predatory conquest, and subsequently by recognition but limitation at the hands of neighboring rulers (Strabo, *l. c.*; Pausanias, iv. 5), could date an occupancy, though not an independence, extending to more than three hundred years; the first subjection of Galatia to the Romans having taken place in 189 B. C. (Liv. xxxviii. 16 ff.), and its formal reduction (with territorial additions) to a regular Roman province in 25 B. C. The epistle appears to have been called forth by the machinations of Judaizing teachers, who, shortly before the date of its composition, had endeavored to seduce the churches of this province into a recognition of circumcision (v. 2, 11, 12; vi. 12 ff.), and had openly sought to depreciate the apostolic claims of St. Paul (comp. i. 1, 11).

The scope and contents of the epistle are thus: (1) apologetic (i., ii.) and polemical (iii., iv.), and (2) hortatory and practical (v., vi.), the positions and demonstrations of the former portion being used with great power and persuasiveness in the exhortations of the latter. The following is a brief summary: —

After an address and salutation, in which his total independence of human mission is distinctly asserted (i. 1), and a brief doxology (i. 5), the Apostle expresses his astonishment at the speedy lapse of his converts, and reminds them how he had forewarned them that even if an angel preached to them another gospel he was to be anathema (i. 6–10). The gospel he preached was not of men, as his former course of life (i. 11–14), and as his actual history subsequent to his conversion (i. 15–24), convincingly proved. When he went up to Jerusalem it was not to be instructed by the Apostles, but on a special mission, which resulted in his being formally accredited by them (ii. 1–10); nay, more, when St. Peter dissembled in his communion with Gentiles, he rebuked him, and demonstrates the danger of such inconsistency (ii. 11–21). The Apostle then turns to the Galatians and urges specially the doctrine of justification, as evinced by the gift of the Spirit (iii. 1–5), the case

of Abraham (iii 6–9), the fact of the law involving curse, from which Christ has freed us (iii. 10–14), and lastly the prior validity of the promise (iii. 15–18), and that preparatory character of the Law (iii. 19–24) which ceased when faith in Christ and baptism into him were fully come (iii. 25–29). All this the Apostle illustrates by a comparison of the nonage of an heir with that of bondage under the Law: they were now sons and inheritors (iv. 1–7), why then were they now turning back to bondage (iv. 8–11)? They once treated the Apostle very differently (iv. 12–16); now they pay court to others and awaken feelings of serious mistrust (iv. 17–20), and yet with all their approval of the Law show that they do not understand its deeper and more allegorical meanings (iv. 21–30). If this be so, they must stand fast in their freedom, and beware that they make not void their union with Christ (iv. 31–v. 6): their perverters at any rate shall be punished (v. 7–12). The real fulfillment of the Law is love (v. 13–15): the works of the Spirit are what no law condemns, the works of the flesh are what exclude from the kingdom of God (v. 16–26). The Apostle further exhorts the spiritual to be forbearing (vi. 1–5), the taught to be liberal to their teachers, and to remember that as they sowed so would they reap (vi. 6–10). Then after a noticeable recapitulation, and a contrast between his own conduct and that of the false teachers (vi. 11–16), and an affecting entreaty that they would trouble him no more (vi. 17), the Apostle concludes with his usual benediction (vi. 18).

With regard to the *genuineness* and *authenticity* of this epistle, no writer of any credit or respectability has expressed any doubts. The testimony of the early church is most decided and unanimous. Beside express references to the epistle (Irenæus, *Hær.* iii. 7, 2, v. 21, 1; Tertull. *de Præscr.* c. 60, *al.*), we have one or two direct citations found as early as the time of the Apostolic Fathers (Polyc. *ad Phil.* c. 3), and several apparent allusions (see Davidson, *Introd.* ii. 318 ff.). The attempt of Bruno Bauer (*Kritik der Paulin. Briefe*, Berlin, 1850) to demonstrate that this epistle is a compilation of later times, out of those to the Romans and to the Corinthians, has been treated by Meyer with a contempt and a severity (*Vorrede*, p. vii.; *Einleit.* p. 8) which, it does not seem too much to say, are both *completely* deserved. Such efforts are alike melancholy and desperate, but are useful in exhibiting the real issues and tendencies of all historical criticism that has the hardihood to place its own, often interested, speculations before external testimony and recognized facts.

Two historical questions require a brief notice: —

1. The *number of visits* made by St. Paul to the churches of Galatia previous to his writing the epistle. These seem certainly to have been *two*. The Apostle founded the churches of Galatia in the visit recorded Acts xvi. 6, during his second missionary journey, about A. D. 51, and revisited them at the period and on the occasion mentioned Acts xviii. 23, when he went through the country of Galatia and Phrygia, ἐπιστηρίζων πάντας τοὺς μαθητάς. On this occasion it would seem probable that he found the leaven of Judaism beginning to work in the churches of Galatia, and that he then warned them against it in language of the most decided character (comp. i. 9, v. 3). The majority of the new converts consisted of Gentiles (iv. 8), but, as we may infer from the language of the epistle, had considerable contact with Jews, and some familiarity with Jewish modes of interpretation. It was then all the more necessary to warn them emphatically against believing in the necessity of circumcision, and of yielding themselves up to the bondage of a Law which, however strenuously urged upon them by those around them, had now become merged in that dispensation to which it was only prevenient and preparatory.

2. Closely allied with the preceding question is that of the date and place from which the epistle was written. If the preceding view be correct, the epistle could not have been written before the second visit, as it contains clear allusions to warnings that were then given when the Apostle was present with them. It must then date from some period subsequent to the journey recorded in Acts xviii 23. How long subsequent to that journey is somewhat debatable. Conybeare and Howson, and more recently Lightfoot (*Journal of Class. and Sacred Philol.* for Jan. 1857), urge the probability of its having been written at about the same time as the Epistle to the Romans, and find it very unlikely that two epistles so nearly allied in subject and line of argument should have been separated in order of composition by the two epistles to the Corinthians. They would therefore assign Corinth as the place where the epistle was written, and the three months that the Apostle stayed there (Acts xx. 2, 3), apparently the winter of A. D. 57 or 58, as the exact period. It is not to be denied that there is a considerable plausibility in these arguments; still when we consider not only the note of time in Gal. i. 6, οὕτως ταχέως, but also the obvious fervor and freshness of interest that seems to breathe through the whole epistle, it does seem almost impossible to assign a later period than the commencement of the prolonged stay in Ephesus. The Apostle would in that city have been easily able to receive tidings of his Galatian converts; the dangers of Judaism, against which he personally warned them, would have been fresh in his thoughts; and when he found that these warnings were proving unavailing, and that even his apostolic authority was becoming undermined by a fresh arrival of Judaizing teachers, — it is then that he would have written, as it were, on the spur of the moment, in those terms of earnest and almost impassioned warning that so noticeably mark this epistle. We do not, therefore, see sufficient reason for giving up the anciently received opinion that the epistle was written from Ephesus, perhaps not very long after the Apostle's arrival at that city. The subscription ἐγράφη ἀπὸ Ῥώμης has found, both in ancient and modern times, some supporters but seems in every way improbable, and was not unlikely suggested by a mistaken reference of the expressions in ch. vi. 17 to the sufferings of imprisonment. See Meyer, *Einleit.* p. 7; Davidson, *Introduction*, ii. 292 ff.; Alford, *Prolegomena*, p. 459.

The editions of [commentaries on] this epistle have been very numerous. We may specify those of Winer (Lips. 1829 [4th ed. 1859]), Rückert (Leipz. 1833), Usteri (Zürich, 1833), Schott (Lips. 1834), Olshausen (Königsb. 1840), Windischmann (Mainz, 1843), De Wette (Leipz. 1845 [3d ed. by W. Müller, 1864]), Meyer (Götting. 1851 [4th ed. 1862]), Turner (New York, 1855), and in our own country those of Ellicott (Lond. 1854, 4th ed. 1867), Bagge (Lond. 1856), and Alford (Lond. 1857 [4th ed. 1865]). C. J. E.

* Prof. Lightfoot in his *Commentary* (see under

GALATIANS) assigns the Epistle to the Galatians to Corinth as the place where it was written, at the time of Paul's last visit to that city (Acts xx. 3 ff.) and shortly before his writing the Epistle to the Romans. Like other advocates of this opinion, he argues for it mainly from the similarity of thought and language which distinguishes these two letters in a somewhat remarkable degree. For a tabular view of the passages which exhibit this resemblance see his *St. Paul's Epistle to the Galatians*, pp. 45–48, and Davidson's *Introduction to the N. T.* p. 326. But there are two considerations which abate the force of this reasoning. First, it is to be borne in mind that this similarity so far as it is *verbal* (the sort of correspondence only which furnishes decisive proof of proximity in time) is found to a great extent in the proof-texts quoted from the O. T., or other formulistic expressions, and would therefore be found to exist at whatever intervals of time the two letters may have been written. The verbal agreement between the Epistle to the Ephesians and that to the Colossians is of a very different character, and shows that the phraseology of the one was still in the writer's memory, as well as the ideas, when the other was written. Secondly, the similarity in the trains of thought is really not greater than one might expect to occur when the same writer, who has fixed and definite views of Christian truth, is led to discuss the same topics at different times and under different circumstances. For example, Paul's speech to the Lystrians (Acts xiv. 15–17) contains a striking epitome of his views respecting the accountability of the heathen as more fully stated in Rom. i. 19 ff., and yet the speech and the epistle stand widely apart from each other as to the time when the one was spoken and the other written. On this relation of Paul's discourses and epistles to each other, see especially Tholuck's *Die Reden des Apostels Paulus in der Apostelg., mit seinen Briefen verglichen* (*Stud. u. Krit.* 1839, p. 305 ff.); and Ch. J. Trip's *Paulus nach der Apostelgeschichte: Historischer Werth dieser Berichte*, pp. 187–219 (Leiden, 1866).

Bishop Ellicott's view (stated above) that Paul wrote to the Galatians from Ephesus, is the generally accepted one of the later critics as well as the older. So, among others, Winer, Hemsen, Olshausen, Wieseler, Schott, Anger, Neander, Meyer, Guericke, Reuss, Ewald, Schaff, Pressensé. Bleek is undecided (*Einl. in das N. Test.* p. 429), and some, as De Wette and Alford, have held both opinions at different times. On the question whether Paul wrote the entire letter with his own hand, see EPISTLES (Amer. ed.). It is one of the four letters which Chr. Fr. Baur admits to be unquestionably Pauline, never having in fact been seriously questioned, says Meyer, except by Bruno Bauer, 1850.

The dogmatic and practical interest of this epistle has given to it a foremost place in all ages of the church. It formed the battle-ground between Protestantism and Romanism at the time of the Reformation. Luther wrote and re-wrote Commentaries on it, which have been often printed, and translated into other languages. Of all the labors of his active life he esteemed none more useful than that bestowed on the exposition of this one epistle. In our own day it has been brought into new prominence by the use which Baur and his followers make of it as supporting their notion of Christianity as having been only a modified Judaism until it was re-wrought by the plastic hand of the energetic Paul. "The epistle," says Lightfoot (p. 68, 2d ed.), "affords at once the ground for, and the refutation of, this view. It affords the ground, for it discovers the mutual jealousy and suspicions of the Jewish and the Gentile converts. It affords the refutation, for it shows the true relations existing between St. Paul and the Twelve. It presents not indeed a colorless uniformity of feeling and opinion, but a far higher and more instructive harmony, the general agreement amidst some lesser differences and some human failings, of men animated by the same divine Spirit, and working together for the same hallowed purpose."

Additional literature. — Among the writers who have illustrated this epistle the following also deserve notice: C. F. A. Fritzsche, *De nonnullis Pauli ad Galat. Epistolæ Locis Comm.* i.–iii., Rostock, 1833–34, repr. in Fritzschiorum *Opusc. Acad.* pp. 158–258; P. A. Sardinoux, *Comm. sur l'épître de l'ap. Paul aux Galates*, Valence, 1837, with a critical introduction and new translation; Barnes, Albert, *Notes, Explan. and Practical, on 2d Corinthians and Galatians*, New York, 1839; Hilgenfeld, *Der Galaterbrief übersetzt, in seinen geschichtl. Beziehungen untersucht u. erklärt*, etc. Leips. 1852; Brown, John, *Exposition of the Ep. to the Galatians*, Edin. 1853, an elaborate work; Maurice, *The Unity of the New Test.* (1854), pp. 491–511, Jatho, *Pauli Brief an die Galater*, Hildesh. 1856, Ewald, in his *Sendschreiben des Ap. Paulus übersetzt u. erklärt* (1857), pp. 52–101; Jowett *The Epistles to the Thessalonians, Galatians Romans, with Crit. Notes and Dissertations*, vol. i., 2d ed., Lond. 1859 (1st ed. 1856); Wieseler, *Comm. üb. d. Brief an die Galater*, Gött. 1859, see also his supplementary article in Herzog's *Real-Encyk.* xix. 523–535; Schmoller, *Der Brief an die Galater*, in Lange's *Bibelwerk*, Theil viii. (1862, 2d ed. 1865); J. C. K. von Hofmann, *Die heilige Schrift zusammenhängend untersucht*, Theil ii. Abth. i. (1863); Reithmayr (Cath.), *Comm. zum Briefe an die Galater*, München, 1865; Vömel, *S. Pauli Br. an d. Galater, griech. mit deutscher Uebersetzung u. mit krit. Anmerkungen* (1865); G. W. Matthias, *Der Galaterbrief*, u. s. w. (1865), Greek text with German translation, explanation of difficult passages, and a special dissertation on iii. 20; Webster and Wilkinson, *Greek New Test.* ii. 112–180 (1861); Wordsworth, *Greek New Test.*, 4th ed., 1866; and J. B. Lightfoot, *St. Paul's Ep. to the Galatians; a revised Text, with Introduction, Notes, and Dissertations*, 2d ed., Lond. 1866. This last work is one of special value in its treatment of the various ethnographic and historical questions which grow out of the epistle. Hermann's *Progr. de Pauli Epist. ad Galat. tribus primis Capitibus* (Lips. 1832) is not only remarkable, but very instructive. It shows how impossible it is to reach the sense of the N. T. writers if we construe their Greek (as did this celebrated scholar) as strictly classical, without making due allowance for its Hebraistic character.

The doctrinal passages, of which so many occur in this letter, are specially examined in such works as Usteri's *Paulin. Lehrbegriff*, Zürich, 1834; Neander's *Planting and Training of the Christian Church by the Apostles*; R. A. Lipsius's *Die Paulinische Rechtfertigungslehre*, Leips. 1853; C F. Schmid's *Bibl. Theol. des N. T.* 2e Aufl (1859), pp. 472–588; Reuss's *Hist. de la théol. chrétienne au siècle apostolique*, tom. ii., 2e éd. Strasb. 1860; and Messner's *Die Lehre der Apostel dargestellt*, Leips. 1856.

On the relation of this epistle to the theory of the Tübingen critics, see the commentaries of Meyer and Hofmann; Lechler's *Das apostol. u. nachapost. Zeitalter*, p. 235 ff.; Prof. G. P. Fisher's *Essays on the Supernatural Origin of Christianity* (New York, 1866), pp. 205–282 (from the *New Englander* for July, 1864); Lightfoot's Diss. iii., *St. Paul and the Three*, in his *Ep. to the Gal.* pp. 283–355, 2d ed.; and especially C. J. Trip's prize-essay, *Paulus nach der Apostelgeschichte* (already mentioned), which treats of many of the points in this controversy common to Acts and Galatians, and is a valuable contribution to the subject. It deserves to be translated into English. For the view of the Tübingen school, besides the well known works of Baur and Zeller (see addition to ACTS OF THE APOSTLES), one may consult the articles of Hilgenfeld in his *Zeitschr. f. wiss. Theol.* for 1858, 1860, and 1866.

A fuller outline of the argument of the epistle than the one given above, will be found in the *Christian Review* for Oct. 1861, pp. 577–584. For the correction of errors in the A. V. relating either to the sense or the Greek text, see articles in the *Bibl. Sacra*, xix. 211–225 and xxii. 138–149; also Alford's *New Testament for English Readers*, vol. ii. Most of the changes there recommended are incorporated in the revised version of the American Bible Union. Winer prefixes an admirable Latin translation to his *Pauli ad Galatas Epistola* (4th ed., 1859). H.

GALBANUM (חֶלְבְּנָה, *chelb'nâh*), one of the perfumes employed in the preparation of the sacred incense (Ex. xxx. 34 [comp. Ecclus. xxiv. 15]). The similarity of the Hebrew name to the Greek χαλβάνη and the Latin *galbanum* has led to the supposition that the substance indicated is the same. The galbanum of commerce is brought chiefly from India and the Levant. It is a resinous gum of a brownish-yellow color, and strong, disagreeable smell, usually met with in masses, but sometimes found in yellowish tear-like drops. The ancients believed that when burnt the smoke of it was efficacious in driving away serpents and gnats (Plin. xii. 56, xix. 58, xxiv. 13; Virg. *Georg.* iii. 415). But, though galbanum itself is well known, the plant which yields it has not been exactly determined. Dioscorides (iii. 87) describes it as the juice of an umbelliferous plant growing in Syria, and called by some μετώπιον (cf. i. 71). Kühn, in his commentary on Dioscorides (ii. p. 532), is in favor of the *Ferula ferulago*, L., which grows in North Africa, Crete, and Asia Minor. According to Pliny (xii. 56) it is the resinous gum of a plant called *stagonitis*, growing on Mount Amanus in Syria; while the *metopion* is the product of a tree near the oracle of Ammon (xii. 49). The testimony of Theophrastus (*Hist. Plant.* ix. 7), so far as it goes, confirms the accounts of Pliny and Dioscorides. It was for some time supposed to be the product of the *Bubon galbanum* of Linnæus, a native of the Cape of Good Hope. Dor found in the galbanum of commerce the fruit of an umbelliferous plant of the tribe *Silerinæ*, which he assumed to be that from which the gum was produced, and to which he gave the name of *Galbanum officinale*. But his conclusion was called in question by Dr. Lindley, who received from Sir John Macneil the fruits of a plant growing at Durrood, near Nishapore, in Khorassan, which he named *Opoidia galbanifera*, of the tribe *Smyrneæ*. This plant has been adopted by the Dublin College in their Pharmacopœia, as that which yields the galbanum (Pereira, *Mat. Med* ii. pt. 2, p. 188). M. Buhse, in his Persian travels (quoted in Royle, *Mat. Med.* pp. 471, 472), identified the plant producing galbanum with one which he found on the Demawend mountains. It was called by the natives *khassuch*, and bore a very close resemblance to the *Ferula erubescens*, but belonged neither to the genus *Galbanum* nor to *Opoidia*. It is believed that the Persian galbanum, and that brought from the Levant, are the produce of different plants. But the question remains undecided.

If the galbanum be the true representative of the *chelb'nâh* of the Hebrews, it may at first sight appear strange that a substance which, when burnt by itself, produces a repulsive odor, should be employed in the composition of the sweet-smelling incense for the service of the tabernacle. We have the authority of Pliny that it was used, with other resinous ingredients, in making perfumes among the ancients; and the same author tells us that these resinous substances were added to enable the perfume to retain its fragrance longer. "Resina aut gummi adjiciuntur ad continendum odorem in corpore" (xiii. 2). Galbanum was also employed in adulterating the opobalsamum, or gum of the balsam plant (Plin. xii. 54). W. A. W.

GAL'EËD (גַּלְעֵד, *i. e.* Gal-ed = *heap of witness*: [ver. 47, Βουνὸς μάρτυς; 48, B. μαρτυρεῖ; Alex. B. μαρτυρει: *Acervus testimonii Galaad*]). The name given by Jacob to the heap which he and Laban made on Mount Gilead, in witness of the covenant then entered into between them (Gen. xxxi. 47, 48; comp. 23, 25). [GILEAD; JEGAR-SAHADUTHA.]

GAL'GALA (Γάλγαλα: *Galgala*), the ordinary equivalent in the LXX. for Gilgal. In the A. V. it is named only in 1 Macc. ix. 2, as designating the direction of the road taken by the army of Demetrius, when they attacked Massaloth in Arbela — "the way to Galgala" (ὁδὸν τὴν εἰς Γάλγαλα). The army, as we learn from the statements of Josephus (*Ant.* xii. 11, § 1), was on its way from Antioch, and there is no reason to doubt that by Arbela is meant the place of that name in Galilee now surviving as *Irbid*. [ARBELA.] Its ultimate destination was Jerusalem (1 Macc. ix. 3), and Galgala may therefore be either the upper Gilgal near Bethel, or the lower one near Jericho, as the route through the Ghor or that through the centre of the country was chosen (Ewald, *Gesch.* iv. 370). Josephus omits the name in his version of the passage. It is a gratuitous supposition of Ewald's that the Galilee which Josephus introduces is a corruption of Galgala. G.

* **GALILE'AN** or **GALILÆ'AN** (Γαλιλαῖος: *Galilæus*), an inhabitant of GALILEE (Mark xiv. 70; Luke xiii. 1, 2, xxii. 59, xxiii. 6; John iv. 45; Acts ii. 7; also in the Greek, Matt. xxvi. 69; Acts i. 11, v. 37). A.

GAL'ILEE (Γαλιλαία; [Vat. Γαλειλαια: *Galilæa*]). This name, which in the Roman age was applied to a large province, seems to have been originally confined to a little "circuit" (the Hebrew word גְּלִיל, *Galil*, the origin of the later "Galilee," like גְּלִיל, signifies a "circle, or circuit") of country round Kedesh-Naphtali, in which were situated the twenty towns given by Solomon

so Hiram, king of Tyre, as payment for his work in conveying timber from Lebanon to Jerusalem (Josh. xx. 7; 1 K. ix. 11; LXX. Γαλιλαία). They were then, or subsequently, occupied by strangers, and for this reason Isaiah gives to the district the name "Galilee of the Gentiles" (גְּלִיל הַגּוֹיִם, Is. ix. 1. In Matt. iv. 15, Γαλιλαία τῶν ἐθνῶν; in 1 Macc. v. 15, Γαλιλαία ἀλλοφύλων). It is probable that the strangers increased in number, and became during the Captivity the great body of the inhabitants; extending themselves also over the surrounding country, they gave to their new territories the old name, until at length Galilee became one of the largest provinces of Palestine. In the time of the Maccabees Galilee contained only a few Jews living in the midst of a large heathen population (1 Macc. v. 20–23); Strabo states that in his day it was chiefly inhabited by Syrians, Phœnicians, and Arabs (xvi. p. 760); and Josephus says Greeks also dwelt in its cities (*Vit.* 12).

In the time of our Lord all Palestine was divided into three provinces, Judæa, Samaria, and Galilee (Acts ix. 31; Luke xvii. 11; Joseph. *B. J.* iii. 3). The latter included the whole northern section of the country, including the ancient territories of Issachar, Zebulun, Asher, and Naphtali. Josephus defines its boundaries, and gives a tolerably full description of its scenery, products, and population. He says the soil is rich and well cultivated; fruit and forest trees of all kinds abound; numerous large cities and populous villages, amounting in all to no less than two hundred and forty, thickly stud the whole face of the country; the inhabitants are industrious and warlike, being trained to arms from their infancy (*B. J.* iii. 3, § 3; *Vit.* 45). On the west it was bounded by the territory of Ptolemais, which probably included the whole plain of Akka to the foot of Carmel. The southern border ran along the base of Carmel and of the hills of Samaria to Mount Gilboa, and then descended the valley of Jezreel by Scythopolis to the Jordan. The river Jordan, the Sea of Galilee, and the upper Jordan to the fountain at Dan, formed the eastern border; and the northern ran from Dan westward across the mountain ridge till it touched the territory of the Phœnicians (*B. J.* iii. 3, § 1, ii. 18, § 9; comp. Luke viii. 26).

Galilee was divided into two sections, "Lower" and "Upper;" ἡ κάτω καὶ ἡ ἄνω Γαλιλαία. Cyril says (*c. Jul.* ii.) Εἰσὶ γὰρ Γαλιλαῖαι δύο, ὧν ἡ μὲν μία κατὰ τὴν Ἰουδαίαν, ἥγε μὴν ἑτέρα ταῖς Φοινίκων πόλεσιν ὅμορός τε καὶ γείτων. A single glance at the country shows that the division was natural. Lower Galilee included the great plain of Esdraelon with its offshoots, which run down to the Jordan and the Lake of Tiberias: and the whole of the hill-country adjoining it on the north to the foot of the mountain-range. The words of Josephus are clear and important (*B. J.* iii. 3, § 1): Καὶ τῆς μὲν κάτω καλουμένης Γαλιλαίας ἀπὸ Τιβεριάδος μέχρι Ζαβουλὼν ἧς ἐν τοῖς παραλίοις Πτολεμαῖς γείτων τὸ μῆκος ἐκτείνεται· πλατύνεται δὲ ἀπὸ Ξαλὼθ ἧς ἐν τῷ μεγάλῳ πεδίῳ κειμένης κώμης ἡ Ξαλὼθ καλεῖται μέχρι Βηρσάβης. "The village of Xaloth" is evidently the Chesulloth of Josh. xix. 12, now called *Iksál*, and situated at the base of Mount Tabor, on the northern border of the Great Plain (Porter, *Handbook*, p. 359). But a comparison of Josephus, *Ant.* xx. 6, § 4, with *B. J.* iii. 3, § 4, proves that Lower Galilee extended as far as the village of Ginea, the modern *Jenîn*, on the extreme southern side of the plain. The site of the northern border town, Bersabe, is not known but we learn incidentally that both Arbela and Jotapata were in Lower Galilee (Joseph. *Vit.* 37 *B. J.* ii. 20, § 6); and as the former was situated near the northwest angle of the Lake of Tiberias, and the latter about eight miles north of Nazareth (Porter, *Handbook*, pp. 432, 377), we conclude that Lower Galilee included the whole region extending from the plain of Akka, on the west, to the shores of the lake on the east. It was thus one of the richest and most beautiful sections of Palestine. The Plain of Esdraelon presents an unbroken surface of fertile soil — soil so good that to enjoy it the tribe of Issachar condescended to a semi-nomadic state, and "became a servant to tribute" (Deut. xxxiii. 18; Gen. xlix. 14, 15). With the exception of a few rocky summits round Nazareth the hills are all wooded, and sink down in graceful slopes to broad winding vales of the richest green. The outlines are varied, the colors soft, and the whole landscape is characterized by that picturesque luxuriance which one sees in parts of Tuscany. The blessings promised by Jacob and Moses to Zebulun and Asher seem to be here inscribed on the features of the country. Zebulun, nestling amid these hills, "offers sacrifices of righteousness" of the abundant flocks nourished by their rich pastures; he rejoices "in his goings out" along the fertile plain of Esdraelon; "he sucks of the abundance of the seas" — his possessions skirting the bay of Haifa at the base of Carmel; and "he sucks of treasures hid in the sand," probably in allusion to the *glass*, which was first made from the sands of the river Belus (Deut. xxxiii. 18, 19; Plin. v. 19; Tac. *Hist.* v.). Asher, dwelling amid the hills on the northwest of Zebulun, on the borders of Phœnicia, "dips his feet in oil," the produce of luxuriant olive groves, such as still distinguish this region; "his bread," the produce of the plain of Phœnicia and the fertile upland valleys, "is fat;" "he yields royal dainties" — oil and wine from his olives and vineyards, and milk and butter from his pastures (Gen. xlix. 20; Deut. xxxiii. 24, 25). The chief towns of Lower Galilee were Tiberias, Tarichæa, at the southern end of the Sea of Galilee, and Sepphoris (Joseph. *Vit.* 9, 25, 29, 37). The latter played an important part in the last great Jewish war (Joseph. *Vit.* 45; *B. J.* ii. 18, § 11). It is now called *Sefûrieh*, and is situated about three miles north of Nazareth (Porter, *Handbook*, p. 378). There were besides two strong fortresses, Jotapata, now called *Jefât*, and Mount Tabor (Joseph. *B. J.* iii. 7, § 3 ff., iv. 1, § 6). The towns most celebrated in N. T. history are Nazareth, Cana, and Tiberias (Luke i. 26; John ii. 1, vi. 1).

Upper Galilee, according to Josephus, extended from Bersabe on the south, to the village of Baca, on the borders of the territory of Tyre, and from Meloth on the west, to Thella, a city near the Jordan (*B. J.* iii. 3, § 1). None of these places are now known, but there is no difficulty in ascertaining the position and approximate extent of the province. It embraced the whole mountain-range lying between the upper Jordan and Phœnicia. Its southern border ran along the foot of the Safed range from the northwest angle of the Sea of Galilee to the plain of Akka. To this region the name "Galilee of the Gentiles" is given in the O. and N. T. (Is. ix. 1; Matt. iv. 15). So Eusebius states: ἡ μὲν Γαλιλαία ἐθνῶν εἴρηται ἡ ὁρίοις Τυρίων παρακειμένη, ἔνθα ἔδωκε Χολαμὼ

τῷ Χιρὰμ καὶ πόλεις κλήρου Νεφθαλείμ (*Onom.* s. v. Γαλιλαία) The town of Capernaum, on the north shore of the lake, was in upper Galilee (*Onom.* s. v. *Capharnaum*), and this fact is important, as showing how far the province extended southward, and as proving that it, as well as Lower Galilee, touched the lake. The mountain-range of Upper Galilee is a southern prolongation of Lebanon, from which it is separated by the deep ravine of the Leontes [LEBANON]. The summit of the range is table-land; part of which is beautifully wooded with dwarf oak, intermixed with tangled shrubberies of hawthorn and arbutus. The whole is varied by fertile upland plains, green forest glades, and wild picturesque glens breaking down to the east and west. The population are still numerous and industrious, consisting chiefly of Metâwileh, a sect of Mohammedans. *Safed* is the principal town, and contains about 4000 souls, one-third of whom are Jews. It is one of the four holy Jewish cities of Palestine, and has for three centuries or more been celebrated for the sacredness of its tombs, and the learning of its Rabbins. *Safed* seems to be the centre of an extensive volcanic district. Shocks of earthquake are felt every few years. One occurred in 1837, which killed about 5000 persons (Porter, *Handbook*, p. 438). On the table-land of Upper Galilee lie the ruins of Kedesh-Naphtali (Josh. xx. 7), and Giscala (now *el-Jish*), a city fortified by Josephus, and celebrated as the last place in Galilee that held out against the Romans (*B. J.* ii. 22, § 6, iv. 1, § 1, 2, § 1–5).

Galilee was the scene of the greater part of our Lord's private life and public acts. His early years were spent at Nazareth; and when he entered on his great work he made Capernaum his home[a] (Matt. iv. 13, ix. 1). It is a remarkable fact that the first three Gospels are chiefly taken up with our Lord's ministrations in this province: while the Gospel of John dwells more upon those in Judæa. The nature of our Lord's parables and illustrations was greatly influenced by the peculiar features and products of the country. The vineyard, the fig-tree, the shepherd, and the desert in the parable of the Good Samaritan, were all appropriate in Judæa; while the corn-fields (Mark iv. 28), the fisheries (Matt. xiii. 47), the merchants (Matt. xiii. 45), and the flowers (Matt. vi. 28), are no less appropriate in Galilee. The Apostles were all either Galileans by birth or residence (Acts i. 11); and as such they were despised, as their Master had been, by the proud Jews (John i. 46, vii. 52; Acts ii. 7). It appears also that the pronunciation of those Jews who resided in Galilee had become peculiar, probably from their contact with their Gentile neighbors (Matt. xxvi. 73; Mark xiv. 70; see Lightfoot, *Opp.* ii. 77). After the destruction of Jerusalem, Galilee became the chief seat of Jewish schools of learning, and the residence of their most celebrated Rabbins. The National Council or Sanhedrim was taken for a time to Jabneh in Philistia, but was soon removed to Sepphoris, and afterwards to Tiberias (Lightfoot, *Opp.* ii. 141). The Mishna was here compiled by Rabbi Judah Hakkodesh (cir. A. D. 109–220); and a few years afterwards the Gemara was added (Buxtorf, *Tiberias*, p. 19). Remains of splendid synagogues still exist in many of the old towns and villages, showing that from the second to the seventh century the Jews were as prosperous as they were numerous (Porter, *Handbook*, pp. 427, 440).

J. L. P.

* **GALILEE, MOUNTAIN IN**, where the Saviour manifested himself to some of his disciples (Matt. xxviii. 16, and probably 1 Cor. xv. 6) after his resurrection. It is impossible to know what particular mountain is here referred to. Some of the conjectures are that it was the Mount of Transfiguration (whether that was Tabor or Hermon on the east of the Jordan), or the Mount of Beatitudes in the vicinity of the Sea of Galilee. The singular opinion that it was the northern summit of Olivet is utterly indefensible.[b] It is stated explicitly in Matt. xxviii. 16 that the disciples went into Galilee (εἰς τὴν Γαλιλαίαν) to the mountain which Christ had appointed for the interview: and Galilee, according to the invariable usage of the N. T., denotes the province of that name. Undoubtedly the Saviour mentioned the place, but the Evangelist has passed that over. H.

GALILEE, SEA OF. [GENNESARET.]

GALL, the representative in the A. V. of the Hebrew words *mêrêrâh*, or *mêrôrâh*, and *rôsh*.

1. *Mêrêrâh* or *mêrôrâh* (מְרֵרָה or מְרֹרָה: χολή: *fel, amaritudo, viscera mea*) denotes etymologically "that which is bitter;" see Job xiii 26, "thou writest bitter things against me." Hence the term is applied to the "bile" or "gall" from its intense bitterness (Job xvi. 13, xx. 25); it is also used of the "poison" of serpents (Job xx. 14), which the ancients erroneously believed was their gall: see Pliny, *H. N.* xi 37, "No one should be astonished that it is the gall which constitutes the poison of serpents."

2. *Rôsh* (רֹאשׁ or רוֹשׁ: χολή, πικρία, ἄγρωστις: *fel, amaritudo, caput*), generally translated "gall" by the A. V., is in Hos. x. 4, rendered "hemlock;" in Deut. xxxii. 33, and Job xx. 16, *rôsh* denotes the "poison" or "venom" of serpents. From Deut. xxix. 18, "a root that beareth *rôsh*" (margin "a poisonful herb"), and Lam. iii. 19, "the wormwood and the *rôsh*," compared with Hos. x. 4, "judgment springeth up as *rôsh*," it is evident that the Hebrew term denotes some bitter, and perhaps poisonous plant, though it may also be used, as in Ps. lxix. 21, in the general sense of "something very bitter." Celsius (*Hierob.* ii. 46–52) thinks "hemlock" (*Conium maculatum*) is intended, and quotes Jerome on Hosea in support of his opinion, though it seems that this commentator had in view the couch-grass (*Triticum repens*) rather than "hemlock." Rosenmüller (*Bib. Bot.* p. 118) is inclined to think that the *Lolium temulentum* [darnel] best agrees with the passage in Hosea, where the *rôsh* is said to grow "in the furrows of the field."

Other writers have supposed, and with some

[a] * The best arrangement places the Saviour's removal to Capernaum after his return from Judæa to Galilee (John iv. 1 ff.). It must have been, therefore, a year or more after his baptism, the proper beginning of his public ministry. (See table at the end of Gospels.) H.

[b] * Rudolf Hofmann, in his *Ueber den Berg Gallia* (Meissen, 1856), maintains this view, and urges it as important for harmonising the different account of the Saviour's appearances after the resurrection. There is some evidence that the northern point of Olivet may have been known as Galilee in a later age, because the Galileans usually crossed here on their way to Jerusalem (see Thilo's *Cod. apocr. N. T.* p. 619 ff.). H

Digitized by Google

reason (from Deut. xxxii. 32, "their grapes are grapes of *rôsh*"), that some berry-bearing plant must be intended. Gesenius (*Thes.* p. 1251) understands "poppies;" Michaelis (*Suppl. Lex. Heb.* p. 2220) is of opinion that *rôsh* may be either the *Lolium temulentum*, or the *Solanum* ("nightshade"). Oedmann (*Verm. Sam.* pt. iv. c. 10) argues in favor of the *Colocynth*. The most probable conjecture, for proof there is none, is that of Gesenius: the capsules of the *Papaveraceæ* may well give the name of *rôsh* ("head") to the plant in question, just as we speak of poppy *heads*. The various species of this family spring up quickly in corn-fields, and the juice is extremely bitter. A steeped solution of poppy heads may be "the water of gall" of Jer. viii. 14, unless, as Gesenius thinks, the מֵי רֹאשׁ may be the poisonous extract, *opium*; but nothing definite can be learnt.

The passages in the Gospels which relate the circumstance of the Roman soldiers offering our Lord, just before his crucifixion, "vinegar mingled with gall" according to St. Matthew (xxvii. 34), and "wine mingled with myrrh" according to St. Mark's account (xv. 23), require some consideration. The first-named Evangelist uses χολή, which is the LXX. rendering of the Hebrew *rôsh* in the Psalm (lxix. 21) which foretells the Lord's sufferings. St. Mark explains the bitter ingredient in the sour vinous drink to be "myrrh" (οἶνος ἐσμυρνισμένος), for we cannot regard the transactions as different. "Matthew, in his usual way," as Hengstenberg (*Comment.* on Ps. lxix. 21) remarks, "designates the drink theologically. Always keeping his eye on the prophecies of the O. T., he speaks of gall and vinegar for the purpose of rendering the fulfillment of the Psalms more manifest. Mark again (xv. 23), according to *his* way, looks rather at the *outward* quality of the drink." Bengel takes quite a different view; he thinks *both* myrrh *and* gall were added to the sour wine: "myrrha conditus ex more; felle adulteratus ex petulantia" (*Gnom. Nov. Test. Matt.* l. c.). Hengstenberg's view is far preferable; nor is "gall" (χολή) to be understood in any other sense than as expressing the bitter nature of the draught. As to the intent of the proffered drink, it is generally supposed that it was for the purpose of deadening pain. It was customary to give criminals just before their execution a cup of wine with frankincense in it, to which reference is made, it is believed, by the οἶνος κατανύξεως of Ps. lx. 3; see also Prov. xxxi. 6. This the Talmud states was given in order to alleviate the pain. See Buxtorf (*Lex. Talm.* p. 2131), who thus quotes from the Talmud (*Sanhed.* fol. 43, 1): "Qui exit ut occidatur (ex sententia judicis) potant eum grano thuris in poculo vini ut distrahatur mens ejus." Rosenmüller (*Bib Bot.* p. 163) is of opinion that the myrrh was given to our Lord, not for the purpose of alleviating his sufferings, but in order that he might be sustained until the punishment was completed. He quotes from Apuleius (*Metamorph.* viii.), who relates that a certain priest "disfigured himself with a multitude of blows, having previously strengthened himself by taking myrrh." How far the frankincense in the cup, as mentioned in the Talmud, was supposed to possess soporific properties, or in any way to induce an alleviation of pain, it is difficult to determine. The same must be said of the οἶνος ἐσμυρνισμένος of St. Mark; for it is quite certain that neither of these two drugs in question, both of which are the produce of the same natural order of plants (*Amyridaceæ*), is ranked among the hypnopoietics by modern physicians. It is true that Dioscorides (i. 77) ascribes a soporific property to myrrh, but it does not seem to have been so regarded by any other author. Notwithstanding, therefore, the almost concurrent opinion of ancient and modern commentators, that the "wine mingled with myrrh" was offered to our Lord as an anodyne, we cannot readily come to the same conclusion. Had the soldiers intended a mitigation of suffering, they would doubtless have offered a draught drugged with some substance having narcotic properties. The drink in question was probably a mere ordinary beverage of the Romans, who were in the habit of seasoning their various wines, which, as they contained little alcohol, soon turned sour, with various spices, drugs, and perfumes, such as myrrh, cassia, myrtle, pepper, &c., &c. (*Dict. of Gr. and Rom. Antiq.* art. *Vinum*). W. H.

* Rosenmüller's supposition is not founded on a knowledge of the natural history of Palestine. No plant is more common in the fields than the *Papaver Syriacum*, which is a plant of the same genus as the opium plant, *Papaver somniferum*. In places the *Papaver Syriacum* is seen in such profusion that the ground is covered with its red blossoms.

The bitterness of the colocynth is proverbial with the Arabs, who speak of anything bitter as being like the علقم, but the fact that this does not grow in the furrows causes us to decide in favor of the former. G. E. P.

GALLERY, an architectural term, describing the porticos or verandas, which are not uncommon in eastern houses. It is doubtful, however, whether the Hebrew words so translated have any reference to such an object. (1.) In Cant. i. 17, the word *râchît* (רָחִיט) means "panelling," or "fretted work," and is so understood in the LXX. and Vulg (φάτνωμα: *laquearе*). The sense of a "gallery" appears to be derived from the marginal reading *râhît* (רָהִיט, *Keri*), which contains the idea of "running," and so of an ambulatory, as a place of exercise: such a sense is, however, too remote to be accepted. (2.) In Cant. vii. 5, *râhît* is applied to the hair, the regularly arranged, flowing locks being compared by the poet to the channels of running water seen in the pasture-grounds of Palestine. [HAIR.] (3.) In Ez. xli. 15, xlii. 3, the word *attîk* (אַתִּיק) seems to mean a pillar, used for the support of a floor. The LXX. and Vulg. give in the latter passage περίστυλον, and *porticus*, but a comparison of verses 5 and 6 shows that the "galleries" and "pillars" were identical; the reason of the upper chambers being shorter is ascribed to the absence of supporting pillars, which allowed an extra length to the chambers of the lower story. The space thus included within the pillars would assume the corner of an open gallery.

W. L. B.

GALLEY. [SHIP.]

GAL'LIM (גַּלִּים = *heaps*, or possibly *springs* [in Is.,] Γαλλείμ; [Vat. Γαλειμ; FA.[1] Ταλειμ;] *Gallim*), a place which is twice mentioned in the Bible: (1.) As the native place of the man to whom Michal David's wife was given — "Phalti the son of Laish, who was from Gallim" (מִגַּלִּים

Digitized by Google

1 Sam. xxv. 44). The LXX. [Rom. Vat.] has Ραμμά [Alex. Γαλλει], and Josephus Γεθλά; but there is no clew in either to the situation of the place. In 2 Sam. iii. 15, 16, where Michal returns to David at Hebron, her husband is represented as following her as far as Bahurim, *i. e.* on the road between the Mount of Olives and Jericho (comp. 2 Sam. xvi. 1). But even this does not necessarily point to the direction of Gallim, because Phalti may have been at the time with Ishbosheth at Mahanaim, the road from which would naturally lead past Bahurim. (2.) The name occurs again in the catalogue of places terrified at the approach of Sennacherib (Is. x. 30): "Lift up thy voice, O daughter (*i. e.* O inhabitant) of Gallim! attend, O Laish! poor Anathoth!" The other towns in this passage — Aiath, Michmash, Ramah, Gibeah of Saul — are all, like Anathoth, in the tribe of Benjamin, a short distance north of Jerusalem. It should not be overlooked that in both these passages the names Laish and Gallim are mentioned in connection. Possibly the *Ben-Laish* in the former implies that Phalti was a native of Laish, that being dependent on Gallim.

Among the names of towns added by the LXX. to those of Judah in Josh. xv. 59, Galem (Γαλέμ [Alex. Γαλλιμ]) occurs between Karem and Thether. In Is. xv. 8, the Vulgate has Gallim for Eglaim, among the towns of Moab.

The name of Gallim has not been met with in modern times. Schwarz (p. 131) reports a *Beit-Djallin* between Ramleh and Joppa, but by other explorers the name is given as *Beit-Dejan*. Eusebius, from hearsay (λέγεται), places it near Akkaron (Ekron). G.

GAL'LIO (Γαλλίων: Junius Annæus Gallio, Plin. *H. N.* xxxi. 33), the Roman proconsul of Achaia when St. Paul was at Corinth, A. D. 53, under the Emperor Claudius [Acts xviii. 12–17]. He was brother to Lucius Annæus Seneca, the philosopher, and was originally named Marcus Annæus Novatus, but got the above name from his adoption into the family of the rhetorician Lucius Junius Gallio. (See Tac. *Ann.* xv. 73, xvi. 17; Seneca, *Nat. Quæst.* iv. præf.; Dion. Cass. lx. 35; Statius, *Silv.* ii. 7, 32.) Gallio appears to have resigned the government of Achaia on account of the climate not agreeing with his health, Seneca. *Ep.* civ.: "Quum in Achaia febrem habere cœpisset, protinus navem adscendit, clamitans non corporis esse sed loci morbum." The character of him which his brother gives is in accordance with that which we might infer from the narrative in the Acts: "Nemo mortalium uni tam dulcis est, quam hic omnibus." "Gallionem fratrem meum, quem nemo non parum amat, etiam qui amare plus non potest." And Statius (*l. c.*) says, "Hoc plus quam Senecam dedisse mundo, aut dulcem generasse Gallionem." He is said to have been put to death by Nero, "as well as his brother Seneca, but not at the same time" (Winer); but there is apparently no authority for this.[a] Tacitus describes him (*Ann.* xv. 73) as "fratris morte pavidum, et pro sua incolumitate supplicem;" and Jerome in the *Chronicle* of Eusebius says that he committed suicide in the year 65 A. D. Of Seneca's works, the *De Ira* is dedicated to him (*Exegisti a me, Novate, &c.*), and the *Vita Beata* (*Vivere, Gallio frater, omnes beate volunt*). H. A.

* It is worth observing as a mark of Luke's accuracy that he mentions Gallio as proconsul (ἀνθυπατεύοντος, Acts xviii. 12) in the reign of Claudius (Suet. *Claud.* c. 25); for under the preceding emperors, Tiberius and Caligula, Achaia was an imperial province, and the title of the governor would have been proprætor (ἀντιστράτηγος, προσβευτής). See Lardner's *Credibility*, pt. i. bk. i. ch. i. [PROCONSUL.] Luke does not mention Gallio's indifference to the dispute between the Jews and the Christians and to the abuse of Sosthenes by the Greeks (Acts xviii. 17) in order either to commend or censure him, but simply as showing why the attempt of the Jews against Paul had such an unexpected issue. Luke's οὐδὲν τούτων ἔμελεν, which furnishes this explanation, accords at the same time with Gallio's character, as his contemporaries describe it (see above); for this incidental remark about his carelessness reveals to us a glimpse of that easy temper which goes so far to make a man a general favorite. H.

GALLOWS. [PUNISHMENT.]

GAM'AEL (Γαμαλιήλ; [Vat. Γαμηλος; Ald.] Alex. Γαμαήλ: *Amenus*), 1 Esdr. viii. 29. [DANIEL, 3.]

GAMALIEL (גַּמְלִיאֵל [*God the avenger* Fürst]: Γαμαλιηλ: *Gamaliel*), son of Pedahzur; prince or captain (נָשִׂיא) of the tribe of Manasseh at the census at Sinai (Num. i. 10; ii. 20; vii. 54, 59), and at starting on the march through the wilderness (x. 23).

GAMA'LIEL (Γαμαλιήλ: for the Hebrew equivalent see the preceding article), a Pharisee and celebrated doctor of the Law, who gave prudent worldly advice in the Sanhedrim respecting the treatment of the followers of Jesus of Nazareth (Acts v. 34 ff.). We learn from Acts xxii. 3, that he was the preceptor of St. Paul. He is generally identified with the very celebrated Jewish doctor Gamaliel, who is known by the title of "the glory of the law," and was the first to whom the title "Rabban," "our master," was given. The time agrees, and there is every reason to suppose the assumption to be correct. This Gamaliel was son of Rabbi Simeon, and grandson of the celebrated Hillel; he was president of the Sanhedrim under Tiberius, Caligula, and Claudius, and is reported to have died eighteen years before the destruction of Jerusalem. Winer says "after" (*nach*); but it is evidently a mistake, for he was succeeded in the presidency by his son Simeon, who perished in the siege (see Lightfoot, *Centuria chorographica Matthæo præmissa*, ch. xv.). If the identity be assumed, there is no reason — and we should arrive at the same result by inference from his conduct in Acts (*l. c.*) — for supposing him at all inclined towards Christianity. The Jewish accounts make him die a Pharisee. And when we remember that in Acts v. he was opposing the then prevalent feature of Sadducæism in a matter where the Resurrection was called in question, and was a wise and enlightened man opposing furious and unreasoning zealots, — and consider also, that when the *anti pharisaical* element in Christianity was brought out in the acts and sayings of Stephen, his pupil Saul was found the foremost persecutor, — we should be slow to suspect him of forwarding the Apostles *as followers of Jesus.*

[a] Lewin's citations (*Fasti Sacri*, p. 335 f.) show that Gallio was a victim of Nero's cruelty as well as Seneca, and was put to death after his brother. H

Digitized by Google

Ecclesiastical tradition makes him become a Christian, and be baptized by St. Peter and St. Paul (Phot. *Cod.* 171, p. 199), together with his son Gamaliel, and with Nicodemus; and the Clementine Recognitions (i. 65) state that he was secretly a Christian at this time. Various notices and anecdotes concerning him will be found in Conybeare and Howson's *Life of St. Paul*, ed. 2, vol. i. p. 69 ff. H. A.

* For the alleged anachronism in Gamaliel's speech before the Jewish Council, see THEUDAS. His recommendation of a lenient policy toward the followers of Jesus when the popular rage against them was so strong, is certainly remarkable. Neander (*Pflanzung*, i. 74 ff.) attributes to him something more than the discernment which sees the folly of conferring importance on what is insignificant, or of making fanaticism more violent by vain resistance. On the contrary, the manner in which the Apostles had spoken and acted may have produced a favorable impression on him, and so much the more because their strict observance of the Law and their hostile attitude towards Sadduceeism may have awakened in him an interest in their behalf. It is by no means impossible that the thought may distinctly have occurred to him that there might be something divine in the cause of these persecuted Galileans. The Talmud, in accordance with this view, represents Gamaliel as not only a great teacher, but tolerant and charitable, far beyond the mass of his countrymen. See further Pressel's article on "Gamaliel" in Herzog's *Real-Encyk.* iv. 656 f., and especially Ginsburg's art. *Gamaliel I.* in Kitto's *Cycl. of Bib. Lit.*, 3d ed. H.

GAMES. Of the three classes into which games may be arranged, juvenile, manly, and public, the two first alone belong to the Hebrew life, the latter, as noticed in the Bible, being either foreign introductions into Palestine or the customs of other countries. With regard to juvenile games, the notices are very few. It must not, however, be inferred from this that the Hebrew children were without the amusements adapted to their age. The toys and sports of childhood claim a remote antiquity; and if the children of the ancient Egyptians had their dolls of ingenious construction, and played at ball (Wilkinson, *Anc. Egypt.* abridgm. i. 197), and if the children of the Romans amused themselves much as those of the present day —

> "Ædificare casas, plostello adjungere mures,
> Ludere par impar, equitare in arundine longâ."
> Hor. 2 *Sat.* iii. 247 —

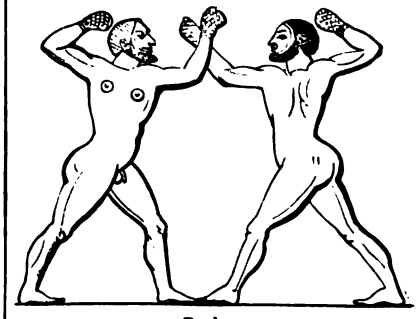
we may imagine the Hebrew children doing the same, as they played in the streets of Jerusalem (Zech. viii. 5). The only recorded sports, however, are keeping tame birds (Job xli. 5; cf. Catull. ii. 1, "Passer, deliciæ meæ puellæ") and imitating the proceedings of marriages or funerals (Matt. xi. 16).

With regard to manly games, they were not much followed up by the Hebrews; the natural earnestness of their character and the influence of the climate alike indisposed them to active exertion. The chief amusement of the men appears to have consisted in conversation and joking (Jer. xv. 17; Prov. xxvi. 19). A military exercise seems to be noticed in 2 Sam. ii. 14, but the term under which it is described (שַׂחֲקוּ) is of too general an application to enable us to form an idea as to its character: if intended as a sport it must have resembled the *Djerid*, with the exception of the combatants not being mounted; but it is more consonant to the sense of the passage to reject the notion of sport and give *sichak* the sense of *fencing* or *fighting* (Thenius, *Comm.* in loc.). In Jerome's day the usual sport consisted in lifting weights as a trial of strength, as also practiced in Egypt (Wilkinson, i. 207). Dice are mentioned by the Talmudists (Mishna, *Sanhed.* 3, 3; *Shabb.* 23, 2), probably introduced from Egypt (Wilkinson, ii. 424); and, if we assume that the Hebrews imitated, as not improbably they did, other amusements of their neighbors, we might add such games as odd and even, *morra* (the *micare digitis* of the Romans), draughts, hoops, catching balls, &c. (Wilkinson, i. 188). If it be objected that such trifling amusements were inconsistent with the gravity of the Hebrews, it may be remarked that the amusements of the Arabians at the present day are equally trifling, such as blindman's buff, hiding the ring, &c. (Wellsted, *Arabia*, i. 160).

Public games were altogether foreign to the spirit of Hebrew institutions: the great religious festivals supplied the pleasurable excitement and the feelings of national union which rendered the games of Greece so popular, and at the same time inspired the persuasion that such gatherings should be exclusively connected with religious duties. Accordingly the erection of a *gymnasium* by Jason, in which the discus was chiefly practiced, was looked upon as a heathenish proceeding (1 Macc. i. 14, 2 Macc. iv. 12–14); and the subsequent erection by Herod of a theatre and amphitheatre at Jerusalem (Joseph. *Ant.* xv. 8, § 1), as well as at Cæsarea (*Ant.* xv. 9, § 6; *B. J.* i. 21, § 8) and at Berytus (*Ant.* xix. 7, § 5), in each of which a quinquennial festival in honor of Cæsar was celebrated with the usual contests in gymnastics, chariot-races, music, and with wild beasts, was viewed with the deepest aversion by the general body of the Jews (*Ant.* xv. 8, § 1).

The entire absence of verbal or historical reference to this subject in the Gospels shows how little it entered into the life of the Jews: some of the foreign Jews, indeed, imbibed a taste for theatrical representations; Josephus (*Vit.* 3) speaks of one Aliturus, an actor of farces (μιμολόγος), who was in high favor with Nero. Among the Greeks the rage for theatrical exhibitions was such that every city of any size possessed its theatre and stadium. At Ephesus an annual contest (ἀγὼν καὶ γυμνικὸς, καὶ μουσικός, Thucyd. iii. 104) was held in honor of Diana, which was superintended by officers named Ἀσιάρχαι (Acts xix. 31; A. V. "chief of Asia"). [ASIARCHÆ.] It is probable that St. Paul was present when these games were proceeding, as they were celebrated in the month of May (comp. Acts xx. 16; Conybeare and Howson's *St. Paul*, ii. 81). A direct reference to the exhibitions that took place on such occasions is made in the term ἐθηριομάχησα (1 Cor. xv. 32). The θηριομάχοι were sometimes professional performers, but more usually criminals (Joseph. *Ant.* xv. 8, § 1) who were exposed to lions and other wild beasts without any means of defence (Cic. *Pro Sext.* 64; Tertull. *Apol.* 9). Political offenders were so treated, and Josephus (*B. J.* vii. 3, § 1) records that no less than 2500 Jews were destroyed in the theatre at Cæsarea by this and similar methods. The expression as used by St. Paul is usually taken as metaphorical, both on account of the qualifying words κατ' ἄνθρωπον, the absence of all reference to the occurrence in the

Digitized by Google



Acts, and the rights of citizenship which St. Paul enjoyed: none of these arguments can be held to be absolutely conclusive, while on the other hand the term θηριομαχεῖν is applied in its literal sense in the Apostolical Epistles (Ign. *ad Eph.* 1, *ad Trall.* 10; *Mart. Polyc.* 3; cf. Euseb. *H. E.* iv. 15), and, where metaphorically used (Ign. *ad Rom.* 5), an explanation is added which implies that it would otherwise have been taken literally. Certainly St. Paul was exposed to some extraordinary suffering at Ephesus, which he describes in language borrowed from, if not descriptive of, a real case of θηριομαχία; for he speaks of himself as a criminal condemned to death (ἐπιθανατίους, 1 Cor. iv. 9; ἀπόκριμα τοῦ θανάτου ἐσχήκαμεν, 2 Cor. i. 9), exhibited previously to the execution of the sentence (ἀπέδειξεν, 1 Cor. *l. c.*), reserved to the conclusion of the games (ἐσχάτους) as was usual with the *thrsomachi* (*novissimos elegit, velut bestiarios*, Tertull. *de Pudic.* 14), and thus made a spectacle (θέατρον ἐγενήθημεν). Lightfoot (*Exercit.* on 1 Cor xv. 32) points to the friendliness of the Asiarchs at a subsequent period (Acts xix. 31) as probably resulting from some wonderful preservation which they had witnessed. Nero selected this mode of executing the Christians at Rome, with the barbarous aggravation that the victims were dressed up in the skins of beasts (Tac. *Ann.* xv. 44). St. Paul may possibly allude to his escape from such torture in 2 Tim. iv. 17. [*Dict. of Ant.* art. *Bestiarii.*]

St. Paul's epistles abound with allusions to the Greek contests, borrowed probably from the Isthmian games, at which he may well have been present during his first visit to Corinth (Conybeare and Howson, ii. 206). These contests (ὁ ἀγών — a word of general import, applied by St. Paul, not to the *fight*, as the A. V. has it, but to the *race*, 2 Tim. iv. 7; 1 Tim. vi. 12) were divided into two classes, the *pancratium*, consisting of boxing and wrestling, and the *pentathlon*, consisting of leaping, running, quoiting, hurling the spear, and wrestling. The competitors (ὁ ἀγωνιζόμενος, 1 Cor. ix. 25; ἐὰν ἀθλῇ τις, 2 Tim. ii. 5) required a long and severe course of previous training (cf. σωματικὴ γυμνασία, 1 Tim. iv. 8), during which a particular diet was enforced (πάντα ἐγκρατεύεται, δουλαγωγῶ, 1 Cor. ix. 25, 27). In the Olympic contests these preparatory exercises (προγυμνάσματα) extended over a period of ten months, during the last of which they were conducted under the supervision of appointed officers. The contests took place in the presence of a vast multitude of spectators (περικείμενον νέφος μαρτύρων, Heb. xii. 1), the competitors being the spectacle (θέατρον = θέαμα, 1 Cor. iv. 9; θεαζόμενοι, Heb. x. 33). The games were opened by the proclamation of a herald (κηρύξας, 1 Cor. ix. 27), whose office it was to proclaim the name and country of each candidate, and especially to announce the name of the victor before the assembled multitude. Certain conditions and rules were laid down for the different contests, as, that no bribe be offered to a competitor; that in boxing the combatants should not lay hold of one another, &c.; any infringement of these rules (ἐὰν μὴ νομίμως ἀθλήσῃ, 2 Tim. ii. 5) involved a loss of the prize, the competitor being pronounced disqualified (ἀδόκιμος, 1 Cor. ix. 27; *indignus brabeo*, Bengel.). The judge was selected for his spotless integrity (ὁ δίκαιος κριτής, 2 Tim. iv. 8): his office was to decide any disputes (βραβευέτω, Col. iii. 15; A. V. "rule") and to give the prize (τὸ βραβεῖον, 1 Cor. ix. 24; Phil. iii. 14), consisting of a crown (στέφανος, 2 Tim. ii 5, iv. 8)

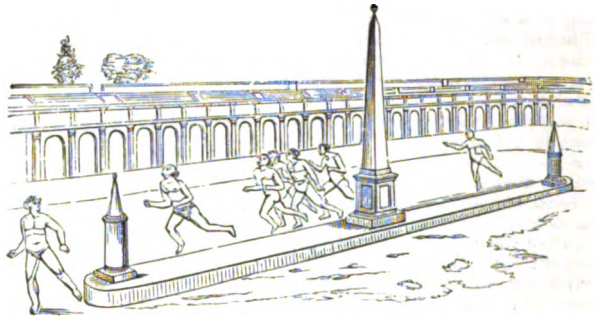
Isthmian Crowns.

of leaves of wild olive at the Olympic games, and of pine or, at one period, ivy at the Isthmian games. These crowns, though perishable (φθαρτόν, 1 Cor ix. 25; cf. 1 Pet. v. 4), were always regarded as a source of unfailing exultation (Phil. iv. 1; 1 Thess. ii. 19): palm branches were also placed in the hands of the victors (Rev. vii. 9). St. Paul alludes to two only out of the five contests, boxing and running, most frequently to the latter. In boxing (πυγμή; cf. πυκτεύω, 1 Cor. ix. 26), the hands and arms were bound with the *cestus*, a band of leather studded with nails, which very much in-

Boxing

creased the severity of the blow, and rendered a bruise inevitable (ὑπωπιάζω, 1 Cor. *l. c.*; ὑπώπια = τὰ ὑπὸ τοὺς ὄπας τῶν πληγῶν ἴχνη, Pollux, *Onom.* ii. 4, 52). The skill of the combatant was shown in avoiding the blows of his adversary so that they were expended on the air (οὐχ ὡς ἀέρα δέρων, 1 Cor. *l. c.*). The foot-race (δρόμος, 2 Tim. iv. 7, a word peculiar to St. Paul; cf. Acts xiii. 25, xx. 24) was run in the *stadium* (ἐν σταδίῳ;

The Race.



A. V. "race;" 1 Cor. ix. 24), an oblong area, open at one end and rounded in a semicircular

Digitized by Google

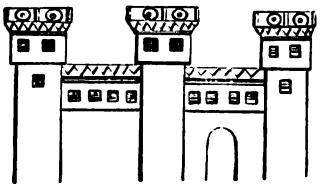
form at the other, along the sides of which were the raised tiers of seats on which the spectators sat. The race was either from one end of the *stadium* to the other, or, in the δίαυλος, back again to the starting-post. There may be a latent reference to the δίαυλος in the expression ἀρχηγὸν καὶ τελειωτήν (Heb. xii. 2), Jesus being, as it were, the starting-point and the goal, the *locus a quo* and the *locus ad quem* of the Christian's course. The judge was stationed by the goal (σκοπόν; A. V. "mark"; Phil. iii. 14), which was clearly visible from one end of the *stadium* to the other, so that the runner could make straight for it (οὐκ ἀδήλως, 1 Cor. ix. 26). St. Paul brings vividly before our minds the earnestness of the competitor, having cast off every encumbrance (ὄγκον ἀποθέμενοι πάντα), especially any closely-fitting robe (εὐπερίστατον, Heb. xii. 1; cf. Conybeare and Howson, ii. 543), holding on his course uninterruptedly (διώκω, Phil. iii. 12), his eye fixed on the distant goal (ἀφορῶντες, ἀπέβλεπε, Heb. xii. 2, xi. 26; ἀπό notat *longe*, Bengel), unmindful of the space already past (τὰ μὲν ὀπίσω ἐπιλανθανόμενος, Phil. *l. c.*), and stretching forward with bent body (τοῖς δὲ ἔμπροσθεν ἐπεκτεινόμενος), his perseverance (δι' ὑπομονῆς, Heb. xii. 1), his joy at the completion of the course (μετὰ χαρᾶς, Acts xx 24), his exultation as he not only receives (ἔλαβον, Phil. iii. 12) but actually grasps (καταλάβω, not "apprehend," as A. V. Phil.; ἐπιλαβοῦ, 1 Tim. vi. 12, 19) the crown which had been set apart (ἀπόκειται, 2 Tim. iv. 8) for the victor.

W. L. B.

* Dr. Howson devotes the last of his four essays on the "Metaphors of St. Paul" (*Sunday Magazine*, 1866–7) to the illustration of Paul's imagery derived from the Greek games (July, pp. 683–689). He reminds us that the athletic games of the Greeks, such as "wrestling, boxing, and especially foot-races, with all the preliminary training, with the assembled and applauding multitudes while the contest was going on, with the formality of the heralds and the strict observance of the rules, with the umpires and prizes and eager congratulations at the close, with the poems which perpetuated great victories like heir-looms," must have been very familiar to Paul's thoughts. Though a Jew, he was born in a foreign city, and not only labored for the most part in places where the Greek population was predominant, but wrote his letters to Greek Christians or those who spoke the Greek language. In some of these cities, as Ephesus, Philippi, Athens, Corinth, and Rome, remains of the *Gymnasium*, for training the body, and of the *Stadium*, or the ground for running, are still to be seen.

Foot-race, adapted from a view of the Circus Flora at Rome. (Montfaucon.)

The foot-race supplied many of the figures which occur in his speeches and epistles. Unfortunately, our ambiguous "course" (A. V.) conceals some of these from the reader. When in his sermon at Antioch in Pisidia (Acts xiii. 25) the Apostle speaks of John the Baptist as "fulfilling his course," he means that the forerunner was hastening to the end of his appointed "race" (δρόμος), and that this race though brief was energetic while it lasted. So also in Acts xx. 24, the substitution of "race" for "course" brings out a similar allusion in that passage to the struggles of the runner for the crown of victory. "I count not my life dear unto me," he says, "that I may finish my race with joy." The comparison in Heb. xii. 2 gives special prominence to the immense concourse which the Greek spectacle called together, as well as the necessity of being free from every hindrance and of straining to the utmost every nerve, in order to obtain the heavenly runner's prize. (See also 1 Cor. ix. 24; Gal. ii. 2, v. 7; Phil. ii. 16.) There was an officer among those employed in the supervision of the games "whose business it was with his voice or with a trumpet to summon the competitors to the exciting struggle." Paul seems to refer to this practice, when, in speaking of the possibility that some who have instructed and warned others may lose their own souls, he says (1 Cor. ix. 27): "I keep under my body and bring it into subjection; lest that by any means, after having been a herald ("preached" in the A. V.) to others (ἄλλοις κηρύξας), I myself should be a cast-away." The metaphor in this passage (taken from the boxer, not the runner) states strongly another significant thought: "So" (*i. e.* imitating the earnestness of those who strive for "a corruptible (fading) crown") "fight I, not as one beating the air." What is meant is that if we have really entered on the Christian warfare, having now to do with definite formidable antagonists, we are not to trifle, but to be in earnest, like the pugilist "with whom is no mere striking for striking's sake, no mere pretense no dealing of blows in the air." The apostle refers not to outward efforts for the advancement of Christ's kingdom, but (note the context) its triumph in each one's bosom over his own peculiar sins and temptations. The "bodily exercise" of which Paul speaks with so much disparagement (1 Tim. iv. 8) was not a species of religious asceticism, against which he would warn the self-righteous, but the severe training of the body, to which the athletes submitted for the sake of the rewards so worthless



Digitized by Google

and contemptible, though coveted so much, in comparison with those of the works "of godliness," in which we should "exercise (or *train*) ourselves" — a service "having promise of the life that now is, and of that which is to come."

Possibly Paul when at Philippi may have seen the rock seats in the hill-side there, full of eager spectators of combats such as he refers to in his letter to the Philippians: "Not as though I had already attained, either were already perfect: but I follow after. . This one thing I do, forgetting those things which are behind, and reaching forth unto those things which are before, I press toward the mark for the prize of the high calling of God in Christ Jesus" (Phil. iii. 12–14). The athlete in the scene which this figure so vividly depicts, forgetting the spaces of the race-course already past, and thinking only of those which lie between him and the goal, runs, as it were, with outstretched neck (ἀνατεινόμενος), in his eagerness to outstrip every competitor and arrive first at the pillar where the crown of the victor awaits him. For the Christian "there is no looking back, no thought of giving up the struggle. The whole energy of mind and body is bent upon success, and till success is achieved, nothing is done." Once more, it is not to a fight or campaign, as the A. V. might suggest, but to a strife in the foot-race, that Paul alludes in that outburst of exultant joy, on the eve of his martyrdom: "I have fought the good fight, I have finished my course (*race*); I have kept the faith; henceforth there is laid up for me a crown of righteousness, which the Lord, the righteous Judge, shall give me at that day" (2 Tim. iv. 7, 8). "The race is nearly run, the struggle is all but over; he is weary, as it were, and pants with the effort, but he is successful, the crown is in sight, and the Judge, the righteous Judge, who cannot make a mistake, is there, ready to place that bright wreath upon his brow."

The entire paper of which use has been so freely made in this account of Paul's *agonistic* figures, contains many good hints, both for the preacher and the general student of the Apostle's speeches and letters. The subject illustrates the dependence of practical exegesis on a knowledge of archæology. It reveals also a harmony of language in what is ascribed to Paul as a writer and a speaker, which is not without its value as "one of the small collateral proofs of the genuine and honest character both of the Acts and the epistles." H.

GAM'MADIMS (גַּמָּדִים). This word occurs only in Ez. xxvii. 11, where it is said of Tyre "the Gammadims were in thy towers." A variety of explanations of the term have been offered. (1.) One class turns upon a supposed connection with גֹּמֶד, *a cubit*, as though = *cubit-high men*, whence the Vulg. has *Pygmæi*. Michaelis thinks that the *apparent* height alone is referred to, with the intention of conveying an idea of the great height of the towers. Spencer (*de Leg. Heb. Rit.* ii. cap. 21) explains it of small images of the tutelar gods, like the Lares of the Romans. (2.) A second class treats it as a geographical or local term; Grotius holds *Gamad* to be a Hebraized form of the name *Ancon*, a Phœnician town; the Chaldee paraphrase has *Cappadocians*, as though reading גַּפָּדִים: Fuller (*Miscell.* vi. 3) identifies them as the inhabitants of Gamala (Plin. v. 14); and again the word has been broken up into גַּם מָדִים = *also the Medes*. (3.) A third class gives a more general sense to the word; Gesenius (*Thes.* p. 292) connects it with גֶּפֶן, *a bough*, whence the sense of brave warriors, *hostes arborum instar cadentes*. Hitzig (*Comm.* in loc.) suggests deserters (*Ueberläufer*) and draws attention to the preposition in as favoring this sense: he inclines, however, to the opinion that the prophet had in view Cant. iv. 4, and that the word גִּבּוֹרִים in that passage has been successively corrupted into שֹׁמְרִים, as read by the LXX. which gives φύλακες, and גַּמָּדִים, as in the present text. After all, the rendering in the LXX. furnishes the simplest explanation: the Lutheran translation has followed this, giving *Wächter*. The following words of the verse, "they hanged their shields upon thy walls round about," are illustrated by one of the bas-reliefs found at Kouyunjik (see preceding cut). W. L. B.

Castle of a maritime people, with the shields hanging upon the walls. (From a bas-relief at Kouyunjik. Layard.)

* The best sense is that of "warriors," under (3) above. Thus De Wette's *Uebersetzung* (1858) renders the word by "Tapfere," and that of the *Société biblique Protestante de Paris* (1866), by "des braves." Rödiger supports this signification from the Syriac use of ܓܒܪ and its derivatives, in his *Addit. ad Gesen. Thes.*, p. 79 f. H.

GA'MUL (גְּמוּל) [*weaned*, Ges.; hence one *mature*, *strong*, Fürst]: Γαμούλ; Alex. Γαμουηλ *Gamul*), a priest; the leader of the 22d course in the service of the sanctuary (1 Chr. xxiv. 17).

GAR (Γάρ; [Ald. Γάρ]: *Saxus*). "Sons of Gar" are named among the "sons of the servants of Solomon" in 1 Esdr. v. 34. There are not in the lists of Ezra and Nehemiah any names corresponding to the two preceding and the six succeeding this name. It does not appear whence the form of the name in the A. V. is derived. [It was derived from the Aldine edition; see above.]

GARDEN (גַּן, גִּנָּה, גַּנָּה: κῆπος). Gardens in the East, as the Hebrew word indicates, are inclosures, on the outskirts of towns, planted with various trees and shrubs. From the allusions in the Bible we learn that they were surrounded by hedges of thorn (Is. v. 5), or walls of stone (Prov. xxiv. 31). For further protection lodges (Is. i. 8; Lam. ii. 6) or watch-towers (Mark xii. 1) were built in them, in which sat the keeper (לֵצִי, Job xxvii. 18) to drive away the wild beasts and robbers, as is the case to this day. Layard (*Nin. & Bab* p. 365) gives the following description of a scene which he witnessed: "The broad silver river wound through the plain, the great ruin cast its dark shadows in the moonlight, the lights of 'the lodges in the gardens of cucumbers' flickered at

Digitized by Google

our feet, and the deep silence was only broken by the sharp report of a rifle fired by the watchful guards to frighten away the wild boars that lurked in the melon beds." The scarecrow also was an invention not unknown (προβασκάνιον, Bar. vi. 70 [or Epist. of Jer. 70]).

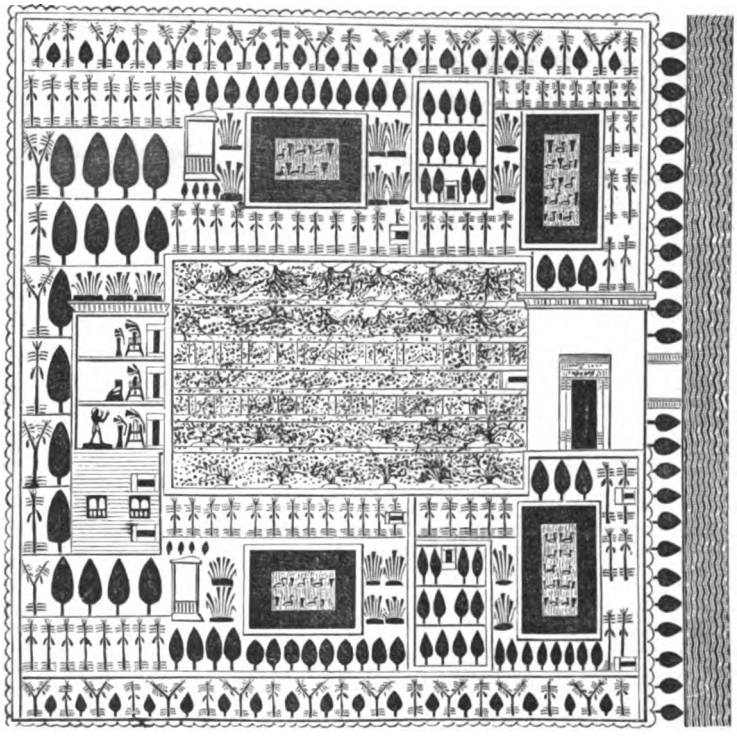
The gardens of the Hebrews were planted with flowers and aromatic shrubs (Cant. vi. 2, iv. 16), besides olives, fig-trees, nuts, or walnuts (Cant. vi. 11), pomegranates, and others for domestic use (Ex. xxiii. 11; Jer. xxix. 5; Am. ix. 14). The quince, medlar, citron, almond, and service trees are among those enumerated in the Mishna as cultivated in Palestine (*Kilaim*, i. § 4). Gardens of herbs, or kitchen-gardens, are mentioned in Deut. xi. 10, and 1 K. xxi. 2. Cucumbers were grown in them (Is. i. 8; Bar. vi. 70 [or Epist. of Jer. 70]), and probably also melons, leeks, onions, and garlic, which are spoken of (Num. xi. 5) as the productions of a neighboring country. In addition to these, the lettuce, mustard-plant (Luke xiii. 19), coriander, endive, one of the bitter herbs eaten with the paschal lamb, and rue, are particularized in the precepts of the Mishna, though it is not certain that they were all, strictly speaking, cultivated in the gardens of Palestine (*Kilaim*, i. §§ 2, 8). It is well known that, in the time of the Romans, the art of gardening was carried to great perfection in Syria. Pliny (xx. 16) says, "Syria in hortis operosissima est; indeque proverbium Græcis, 'Multa Syrorum olera;'" and again (xii. 54) he describes the balsam plant as growing in Judæa alone, and there only in two royal gardens. Strabo (xvi. p. 763), alluding to one of these gardens near Jericho, calls it ὁ τοῦ βαλσάμου παράδεισος. The rose-garden in Jerusalem, mentioned in the Mishna (*Maaseroth*, ii. § 5), and said to have been situated westward of the Temple mount, is remarkable as having been one of the few gardens which, from the time of the prophets, existed within the city walls (Lightfoot, *Hor. Heb.* on Matt. xxvi. 36). They were usually planted without the gates, according to the gloss quoted by Lightfoot, on account of the fetid smell arising from the weeds thrown out from them, or from the manure employed in their cultivation.

The gate Gennath, mentioned by Josephus (*B. J.* v. 4, § 2) is supposed to have derived its name from the rose-garden already mentioned, or from the fact of its leading to the gardens without the city. It was near the garden-ground by the Gate of the Women that Titus was surprised by the Jews while reconnoitering the city. The trench by which it was surrounded cut off his retreat (Joseph. *B. J.* v. 2, § 2). But of all the gardens of Palestine none is possessed of associations more sacred and imperishable than the garden of Gethsemane, beside the oil-presses on the slopes of Olivet. Eight aged olive-trees mark the site which tradition has connected with that memorable garden-scene, and their gnarled stems and almost leafless branches attest an antiquity as venerable as that which is claimed for them. [GETHSEMANE.]

In addition to the ordinary productions of the country, we are tempted to infer from Is. xvii. 10 that in some gardens care was bestowed on the rearing of exotics. To this conclusion the description of the gardens of Solomon in the Targum on Eccl. ii. 5, 6, seems to point: "I made me well-watered gardens and paradises, and sowed there all kinds of plants, some for use of eating, and some for use of drinking, and some for purposes of medicine; all kinds of plants of spices. I planted in them trees of emptiness (*i. e.* not fruit-bearing) and all trees of spices which the spectres and demons brought me from India, and every tree which produces fruit; and its border was from the wall of the citadel, which is in Jerusalem, by the waters of Siloah. I chose reservoirs of water, which behold! are for watering the trees and the plants, and I made me fish-ponds of water, some of them also for the plantation which rears the trees to water it."

In a climate like that of Palestine the neighborhood of water was an important consideration in selecting the site of a garden. The nomenclature of the country has perpetuated this fact in the name En-gannim — "the fountain of gardens" — the modern *Jenin* (cf. Cant. iv. 15). To the old Hebrew poets "a well-watered garden," or "a tree planted by the waters," was an emblem of luxuriant fertility and material prosperity (Is. lviii. 11; Jer. xvii. 8, xxxi. 12); while no figure more graphically conveyed the idea of dreary barrenness or misery than "a garden that hath no water" (Is. i. 30). From a neighboring stream or cistern were supplied the channels or conduits, by which the gardens were intersected, and the water was thus conveyed to all parts (Ps. i. 3; Eccl. ii. 6; Ecclus. xxiv. 30). It is matter of doubt what is the exact meaning of the expression "to water with the foot" in Deut. xi. 10. Niebuhr (*Descr. de l'Arab.* p 138) describes a wheel which is employed for irrigating gardens where the water is not deep, and which is worked by the hands and feet after the manner of a treadmill, the men "pulling the upper part towards them with their hands, and pushing with their feet upon the lower part" (Robinson, ii. 226). This mode of irrigation might be described as "watering with the foot." But the method practiced by the agriculturists in Oman, as narrated by Wellsted (*Trav.* i. 281), answers more nearly to this description, and serves to illustrate Prov. xxi. 1: "After ploughing, they form the ground with a spade into small squares with ledges on either side, along which the water is conducted When one of the hollows is filled, the peasant stops the supply by turning up the earth with his foot, and thus opens a channel into another."

The orange, lemon, and mulberry groves which lie around and behind Jaffa supply, perhaps, the most striking peculiarities of oriental gardens — gardens which Maundrell describes as being "a confused miscellany of trees jumbled together, without either posts, walks, arbors, or anything of art or design, so that they seem like thickets rather than gardens" (*Early Trav. in Pal.* p. 416). The Persian wheels, which are kept ever working, day and night, by mules, to supply the gardens with water, leave upon the traveller's ear a most enduring impression (Lynch, *Exp. to Jordan*, p. 441; Siddon's *Memoir*, p. 187).



The law against the propagation of mixed species (Lev. xix. 19; Deut. xxii. 9, 11) gave rise to numerous enactments in the Mishna to insure its observance. The portions of the field or garden, in which the various plants were sown, were separated by light fences of reed, ten palms in height, the distance between the reeds being not more than three palms, so that a kid could not enter (*Kilaim*, iv. §§ 3, 4).

The kings and nobles had their country-houses surrounded by gardens (1 K. xxi. 1; 2 K. ix. 27) and these were used on festal occasions (Cant. v. 1

Digitized by Google

so intimately, indeed, were gardens associated with festivity that horticulture and conviviality are in the Talmud, denoted by the same term (cf. Buxtorf, *Lex. Talm.* s. v. אריסות). It is possible, however, that this may be a merely accidental coincidence. The garden of Ahasuerus was in a court of the palace (Esth. i. 5), adjoining the banqueting-hall (Esth. vii. 7). In Babylon the gardens and orchards were inclosed by the city walls (Layard, *Nin.* ii. 246). Attached to the house of Joachim was a garden or orchard (Sus. 4) — "a garden inclosed" (Cant. iv. 12) — provided with baths and other appliances of luxury (Sus. 15; cf. 2 Sam. xi. 2).

In large gardens the *orchard* (פַּרְדֵּס, παράδεισος) was probably, as in Egypt, the inclosure set apart for the cultivation of date and sycamore trees, and fruit-trees of various kinds (Cant. iv. 13 Eccl. ii. 5). Schroeder, in the preface to his *Thesaurus Linguæ Armenicæ*, asserts that the word "pardes" is of Armenian origin, and denotes a garden near a house, planted with herbs, trees, and flowers. It is applied by Diodorus Siculus (ii. 10) and Berosus (quoted by Joseph. *Ant.* x. 11, § 1) to the famous hanging gardens of Babylon. Xenophon (*Anab.* i. 2, § 7) describes the "paradise" at Celænæ in Phrygia, where Cyrus had a palace, as a large preserve full of wild beasts; and Aulus Gellius (ii. 20) gives "*vivaria*" as the equivalent of παράδεισοι (cf. Philostratus, *Vit. Apoll. Tyan* i. 38). The officer in charge of such a domain

An Egyptian garden, with the vineyard and other inclosures, tanks of water, a temple or chapel, and a small house. (Rosellini.)

was called "the keeper of the paradise" (Neh. ii. 8).

The ancient Hebrews made use of gardens as places of burial (John xix. 41). Manasseh and his son Amon were buried in the garden of their palace, the garden of Uzza (2 K. xxi. 18, 26; ἐν τοῖς κήποις αὐτοῦ παραδείσοις, Joseph. *Ant.* x. 3, § 2). The retirement of gardens rendered them favorite places for devotion (Matt. xxvi. 36, John xviii. 1; cf. Gen. xxiv. 63). In the degenerate times of the monarchy they were selected as the scenes of idolatrous worship (Is. i. 29, lxv. 3, lxvi. 17) and images of the idols were probably erected in them.

Gardeners are alluded to in Job xxviii. 18 and John xx. 15. But how far the art of gardening was carried among the Hebrews we have few means of ascertaining. That they were acquainted with the process of grafting is evident from Rom. xi. 17, 24, as well as from the minute prohibitions of the Mishna;[a] and the method of propagating plants by layers or cuttings was not unknown (Is. xvii 10). Buxtorf says that אריסין, *arísin* (Mishna, *Biccurim*, i. § 2), were gardeners who tended and looked after gardens on consideration of receiving some portion of the fruit (*Lex. Talm.* s. v.). But that gardening was a special means of livelihood is clear from a proverb which contains a warning

[a] It was forbidden to graft trees on trees of a different kind, or to graft vegetables on trees or trees on vegetables (*Kilaim*, i. §§ 7, 8).

Digitized by Google

against rash speculations: "Who hires a garden eats the birds; who hires gardens, him. the birds eat" (Dukes, *Rabbin. Blumenlese*, p. 141).

The traditional gardens and pools of Solomon, supposed to be alluded to in Eccl. ii. 5, 6, are shown in the *Wady Urtâs* (*i. e.* Hortus), about an hour and a quarter to the south of Bethlehem (cf. Joseph. *Ant.* viii. 7, § 3).[a] The Arabs perpetuate the tradition in the name of a neighboring hill, which they call "*Jebel-el-Fureidis*," or "Mountain of the Paradise" (Stanley, *S. & P.* p. 166). Maundrell is skeptical on the subject of the gardens (*Early Trav. in Pal.* p. 457), but they find a champion in Van de Velde, who asserts that they "were not confined to the *Wadi Urtâs;* the hill-slopes to the left and right also, with their heights and hollows, must have been covered with trees and plants, as is shown by the names they still bear, as 'peach-hill,' 'nut-vale,' 'fig-vale,'" &c. (*Syria & Pal.* ii. 27).

The "king's garden," mentioned in 2 K. xxv. 4, Neh. iii. 15, Jer. xxxix. 4, lii. 7, was near the pool of Siloam, at the mouth of the Tyropœon, north of *Bir Eyub*, and was formed by the meeting of the valleys of Jehoshaphat and Ben Hinnom (Wilson, *Lands of the Bible*, i. 498). Josephus places the scene of the feast of Adonijah at En-rogel, "beside the fountain that is in the royal paradise" (*Ant.* vii. 14, § 4; cf. also ix. 10, § 4). W. A. W.

GA'REB (גָּרֵב [*leper*, Fürst]: [Rom. Vat. Γηράβ; Alex. Γαρηθ; Comp.] Γαρέβ: [*Gareb*]), one of the heroes of David's army (2 Sam. xxiii. 38). He is described as *the* (A. V. "an") Ithrite, *et ipse Jethrites*, Vulg. This is generally explained as a patronymic = son of Jether. It may be observed, however, that Ira, who is also called the Ithrite in this passage, is called the Jairite in 2 Sam. xx. 26, and that the readings of the LXX. vary in the former passage, 'Εθραῖος, 'Εθιραῖος, and 'Εθεναῖος. These variations support to a certain extent the sense given in the Syriac version, which reads in 2 Sam. xx. 26 יַאִיתְרִי, *i. e.* an inhabitant of Jathir in the mountainous district of Judah. W. L. B.

GA'REB, THE HILL (גִּבְעַת גָּרֵב [*scabbed, leprous*, Gesen., Fürst]: βουνοὶ Γαρήβ: *collis Gareb*), in the neighborhood of Jerusalem, named only in Jer. xxxi. 39. [JERUSALEM.]

* The prophet mentions this hill as falling within the circuit of the restored "holy" Jerusalem, which was to be built in the latter times. Ewald, in view of the meaning partly ("scraped off," "bald"), would identify Gareb with Golgotha (κρανίον) in the history of the Crucifixion (*Geschichte Christus*, p. 485). Gesenius thinks it may have been the later Bezetha (*Add. ad Thesaur.* p. 30). It is impossible to reconcile these opinions, unless Bezetha was outside of Jerusalem in the time of Christ. The supposed Bezetha is now within the city. [JERUSALEM.] H.

GARIZIM (Γαριζίν; Alex. Γαριζειν, [Γαριζει:] *Garizin*), 2 Macc. v. 23, vi. 2. [GERIZIM.]

* **GARLANDS** (στέμματα), wreaths or chaplets of flowers which the priest of Jupiter at Lystra brought with oxen to the gates of the city when the people were about to offer worship to Paul and Barnabas (Acts xiv. 13). The garlands were to adorn the victims of sacrifice, and perhaps, as De Wette suggests, the head of the priest himself, and the altar. See Jahn's *Bibl. Archæol.* § 401, 5. That the garlands were not exclusively meant for the oxen seems probable from the Greek (ταύρους καὶ στέμματα, and not ταύρους ἐστεμμένους) [CROWN; DIADEM.] H.

GARLIC (שׁוּם: τὰ σκόρδα: *allia*), mentioned in Num. xi. 5 as one of the Egyptian plants the loss of which was regretted by the mixed multitude at Taberah. It is the *Allium sativum* of Linnæus, which abounds in Egypt (see Celsius, *Hierobot.* pt. ii. p. 52 ff.), a fact evident from Herodotus (ii. 125), when he states that the allowance to the workmen for this and other vegetables was inscribed on the great pyramid. W. D.

GARMENT. [DRESS.]

* **GARMENT, BABYLONISH.** [DRESS; BABYLONISH GARMENT.]

GARMITE, THE (הַגַּרְמִי [*the stormy* Fürst]: [Rom. Ald.] Γαρμί; [Vat. Αταμει;] Alex. Ογαρμι: *Garmi*). Keilah the Garmite, *i. e.* the descendant of Gerem (see the Targum on this word) is mentioned in the obscure genealogical lists of the families of Judah (1 Chr. iv. 19). Keilah is apparently the place of that name; but there is no clew to the reason of the sobriquet here given it.

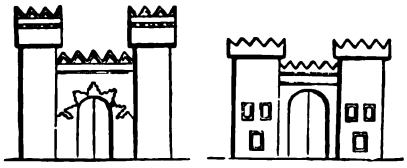
GARRISON. The Hebrew words so rendered in the A. V. are derivatives from the root *nâtsab* to "place, erect," which may be applied to a variety of objects. (1.) *Matstsâb* and *matstsêbâh* (מַצָּב, מַצֵּבָה) undoubtedly mean a "garrison," or fortified post (1 Sam. xiii. 23, xiv. 1, 4, 12, 15; 2 Sam. xxiii. 14). (2.) *Netsîb* (נְצִיב) is also used for a "garrison" (in 1 Chr. xi. 16), but elsewhere for a "column" erected in an enemy's country as a token of conquest, like the *stelæ* erected by Sesostris (Her. ii. 102, 106): the LXX. correctly gives ἀνδστημα (1 Sam. x. 5): Jonathan broke in pieces a column which the Philistines had erected on a hill (1 Sam. xiii. 3). (3.) The same word elsewhere means "officers" placed over a vanquished people (2 Sam. viii. 6, 14; 1 Chr. xviii. 13, 2 Chr. xvii. 2): the presence of a "garrison" in such cases is implied but not expressed in the word (comp. 1 K. iv. 7, 19). (4.) *Mattsêbâh* (מַצֵּבָה) means a "pillar:" in Es. xxvi. 11, reference is made to the beautiful pillars of the Tyrian temples, some of which attracted the attention of Herodotus (ii. 44). W. L. B.

* There was a garrison at Jerusalem at a later period, variously known as the acropolis or citadel, Baris (Macedonian for *arx*, see Wahl's *Clavis Libr. V. T. Apocryph.* s. v.), tower of Antonia (Joseph. *Ant.* xv. 11, § 4; *B. J.* i. 5, § 4), and castle or barracks (Acts xxi. 34). It was built by the Maccabees, and during the Roman occupancy was held by the Roman troops stationed at Jerusalem, or moved thither from Cæsarea to prevent riots during the festivals. Its military use appears in its N T. name, the παρεμβολή or "camp" (Acts xxi. 34 37). It is especially memorable as having been the

[a] Within a few years this valley of *Urtâs* has been put under European cultivation, and though in its neglected state it seemed to be sterile and almost useless, it exhibits now an extraordinary richness and fertility. H.

Digitized by Google

village and prison of the Apostle Paul (Acts xxiii. 10). It stood on a rock or hill at the northwest angle of the temple-area. It had a tower at the southeast corner, which was 70 cubits high and overlooked the whole temple with its courts. At a moment's notice the soldiers in this garrison could descend by flights of stairs into the inclosure below and instantly suppress any tumult there which might be reported to the officer in command (Joseph. *B. J.* v. 5, § 8). This arrangement explains how the chiliarch could interfere with so much promptitude and rescue Paul from the fury of the Jewish mob. It was from the steps which led up into this castle that the Apostle addressed the crowd in the adjacent court (Acts xxii. 3 ff.). The Turkish garrison stands at present very nearly on the site of the ancient fortress. If this garrison (as some suppose) was Pilate's *prætorium* during his visits to Jerusalem, it was then the place where Jesus was arraigned before the Roman tribunal, and whence he was led along the *Via Dolorosa* to Golgotha.

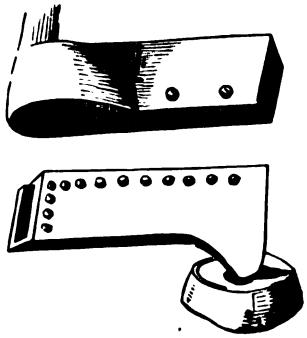


The A. V. in 2 Cor. xi. 32 speaks of a "garrison" at Damascus as employed to prevent Paul's escape. But the Greek verb (ἐφρούρει) states only the fact of the custody, not the means of it: the governor "watched" or "guarded the city." The watch on this occasion may have belonged to the garrison. H.

GASHMU (גַּשְׁמוּ): [Comp. Ald. with 7 MSS. Γησάμ; FA.^{3} Γοσεμ:] *Gossem*), Neh. vi. 6. Assumed by all the lexicons to be a variation of the name of GESHEM (see vv. 1, 2). The words "and Gashmu saith" are omitted in both MSS. of the LXX.

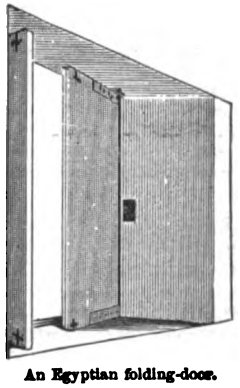
GATAM (גַּעְתָּם [*a valley burnt*, Fürst]: Γοθόμ, Γοσθάμ; Alex. [Γοθομ, Γοθα,] Γοθαμ: *Gatham*, *Gathan*), the fourth son of Eliphaz the son of Esau (Gen. xxxvi. 11; 1 Chr. i. 36), and one of the "dukes" of Eliphaz (Gen. xxxvi. 16). By Knobel (*Genesis*, ad loc.) the name is compared with *Jodam* (جدام), a tribe inhabiting a part of the mountains of *Sherah* called *Hismah*. But in this case the *Ain* in the original name would have been dropped, which is very rarely the case. Rödiger (Gesen. *Thes.* iii. 80) quotes جعثم as the name of an Arab tribe, referring to Ibn Duraid, 1854, p. 300.

GATE. (1.) שַׁעַר, from שָׁעַר, *to divide*, Gesen. p. 1458: πύλη: *porta*, *introitus*. (2.) פֶּתַח, from פָּתַח, *to open*, Gesen. p. 1138: θύρα, πύλη: *ostium*, a "doorway." (3.) סַף, a vestibule or gateway: αὐλή, σταθμός: *limen*, *postes*. (4.) תְּרַע, Chald. only in Ezra and Daniel: αὐλή, θύρα: *ostium*, *fores*. (5.) דֶּלֶת from דָּלָה, *to hang down*: Gesen. p. 339, *a door*: θύρα: *valva*, *ostium*, *fores*, the "door" or valve.



The gates and gateways of eastern cities anciently held, and still hold, an important part, not only in the defense, but in the public economy of the place. They are thus sometimes taken as representing the city itself (Gen. xxii. 17, xxiv. 60; Deut. xii. 12; Judg. v. 8; Ruth iv. 10; Ps. lxxxvii. 2, cxxii. 2). Among the special purposes for which they were used may be mentioned: (1.) As places of public resort, either for business, or where people sat to converse and hear news (Gen. xix. 1, xxiii. 10, xxxiv. 20, 24; 1 Sam. iv. 18; 2 Sam. xv. 2, xviii. 24; Ps. lxix. 12; Neh. viii. 1, 3, 16; Shaw p. 207). (2.) Places for public deliberation, administration of justice, or of audience for kings and rulers, or ambassadors (Deut. xvi. 18, xxi. 19, xxv. 7; Josh. xx. 4; Judg. ix. 35; Ruth iv. 1; 2 Sam. xix. 8; 1 K. xxii. 10; Job xxix. 7; Prov. xxii. 22, xxiv. 7; Jer. xvii. 19, xxxviii. 7; Lam. v. 14; Am. v. 12; Zech. viii. 16; Polyb. xv. 31). Hence came the usage of the word "Porte" in speaking of the government of Constantinople (*Early Trav.* p. 349). (3.) Public markets (2 K. vii. 1; comp. Aristoph. *Eq.* 1243, ed. Bekk.; Neh. xiii. 16, 19). [CITIES.] In heathen towns the open spaces near the gates

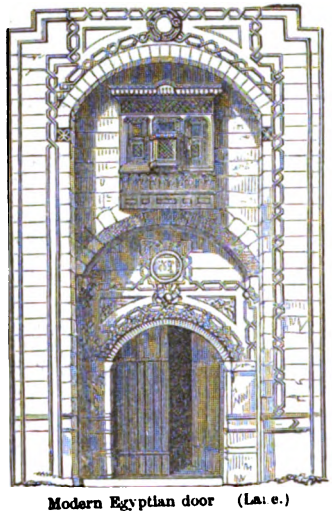
Assyrian gates. (Layard.)



appear to have been sometimes used as places for sacrifice (Acts xiv. 13; comp. 2 K. xxiii. 8).

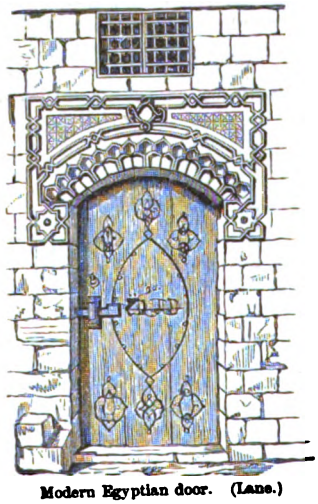
Regarded, therefore, as positions of great importance, the gates of cities were carefully guarded and

Egyptian doors. — Fig. 1. The upper pin, on which the door turned. Fig. 2. Lower pin. (Wilkinson.)



closed at nightfall (Deut. iii. 5; Josh. ii. 5, 7; Judg. ix. 40, 44; 1 Sam. xxiii. 7; 2 Sam. xi. 23, Jer. xxxix. 4; Judith i. 4). They contained chambers over the gateway, and probably also chambers or recesses at the sides for the various purposes to

An Egyptian folding-door.

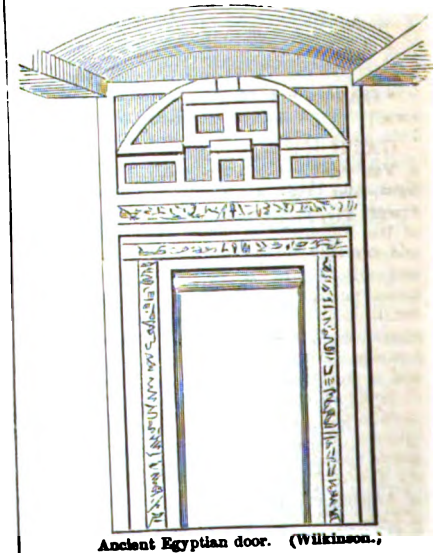


which they were applied (2 Sam. xviii. 24; Layard, *Nin. & Bab.* p. 67, and note).

The gateways of Assyrian cities were arched or square-headed entrances in the wall, sometimes flanked by towers (Layard, *Nineveh*, ii. 388, 395, *Nin. & Bab.* p. 231, *Mons. of Nin.* pt. 2, pl. 49; see also Assyrian bas-reliefs in Brit. Mus. Nos. 49, 25, 26). In later Egyptian times the gates of the

Modern Egyptian door (Lane.)

temples seem to have been intended as places of defense, if not the principal fortifications (Wilkinson, *Anc. Egypt.* i. 409, abridgm.). The doors themselves of the larger gates mentioned in Scripture were two-leaved, plated with metal, closed with locks and fastened with metal bars (Deut. iii. 5; Judg. xvi. 3; 1 Sam. xxiii. 7; 1 K. iv. 13; 2 Chr. viii. 5; Neh. iii. 3–15; Ps. cvii. 16; Is. xlv. 1, 2; Jer. xlix. 31). Gates not defended by iron were of course liable to be set on fire by an enemy (Judg. ix. 52).



Modern Egyptian door. (Lane.)

The gateways of royal palaces and even of private houses were often richly ornamented. Sentences from the Law were inscribed on and above the gates, as in Mohammedan countries sentences from the Koran are inscribed over doorways and on doors (Deut. vi. 9; Is. liv. 12; Rev. xxi. 21; Maundrell, *Early Trav.* p. 483; Lane, *Mod. Egypt.* i. 29; Rauwolff, *Travels*, pt. iii. c. 10; Ray, ii 278). The principal gate of the royal palace at Ispahan was in Chardin's time held sacred, and served as a sanctuary for criminals (Chardin, vii. 368), and petitions were presented to the sovereign at the gate. (See Esth. iv. 2, and Herod. iii. 120, 140.) The gateways of Nimroud and Persepolis were flanked by colossal figures of animals.

Ancient Egyptian door. (Wilkinson.)

The gates of Solomon's Temple were very massive and costly, being overlaid with gold and carvings (1 K. vi. 34, 35; 2 K. xviii. 16). Those of the Holy Place were of olive-wood, two-leaved, and overlaid with gold; those of the temple of fir (1 K. vi. 31, 32 34; Ez. xli. 23, 24). Of the gates of the outer court of Herod's temple, 9 were covered with gold and silver, as well as the posts and lintels, but the outer one, the Beautiful Gate (Acts iii. 2), was

Ancient Egyptian door. (Wilkinson.)

made entirely of Corinthian brass, and was considered to surpass the others far in costliness

Digitized by Google

(Joseph. *B. J.* v. 5, § 3). This gate, which was so heavy as to require 20 men to close it, was unexpectedly found open on one occasion shortly before the close of the siege (Joseph. *B. J.* vi. 5, § 3; c. *Ap.* ii. 9).

The figurative gates of pearl and precious stones (Is. liv. 12; Rev. xxi. 21) may be regarded as having their types in the massive stone doors which are found in some of the ancient houses in Syria. These are of single slabs several inches thick, sometimes 10 feet high, and turn on stone pivots above and below (Maundrell, *Early Trav.* p. 447; Shaw, p. 210; Burckhardt, *Syria*, pp. 58, 74; Porter, *Damascus*, ii. 22, 192; Ray, *Coll. of Trav.* ii. 429).

Egyptian doorways were often richly ornamented. The parts of the doorway were the threshold (סַף, Judg. xix. 27: πρόθυρον: *limen*); the side-posts (מְזוּזוֹת: σταθμοί: *uterque postis*), the lintel מַשְׁקוֹף: φλιά: *superliminare*, Ex. xii. 7). It was on the lintel and side-posts that the blood of the Passover lamb was sprinkled (Ex. xii. 7, 22). A trace of some similar practice in Assyrian worship seems to have been discovered at Nineveh (Layard, *Nin.* ii. 256).

The camp of the Israelites in the desert appears to have been closed by gates (Ex. xxxii. 27).

The word "door" in reference to a tent, expresses the opening made by dispensing with the cloths in front of the tent, which is then supported only by the hinder and middle poles (Gen. xviii. 2; Burckhardt, *Notes on Bed.* i. 42).

In the Temple, Levites, and in houses of wealthier classes, and in palaces, persons were especially appointed to keep the door (Jer. xxxv. 4; 2 K. xii. 9, xxv. 18; 1 Chr. ix. 18, 19; Est. ii. 21; שֹׁעֲרִים: θυρωροί, πυλωροί: *portarii, janitores*). In the A. V. these are frequently called "porters," a word which has now acquired a different meaning. The chief steward of the household in the palace of the Shah of Persia was called chief of the guardians of the gate (Chardin, vii. 369). [CURTAIN; HOUSE; TEMPLE.] H. W. P.

* **GATE, BEAUTIFUL,** Acts iii. 2. [TEMPLE (of Herod), *Cloisters.*]

* **GATES OF JERUSALEM.** [JERUSALEM.]

GATH (גַּת, *a wine-press:* Γέθ; [1 Sam. v. 8, Vat. Γεθα, Alex. Γεθθα; vii. 14, Ἀζόβ; xvii. 52 ים, Alex. Γαι: 1 Chr. vii. 21, Alex. Γαιθ;] Joseph. Γίττα: *Geth*), one of the five royal cities of the Philistines (Josh. xiii. 3; 1 Sam. vi. 17); and the native place of the giant Goliath (1 Sam. xvii. 4, 23). The site of Gath has for many centuries remained unknown. The writer of this article made a tour through Philistia in 1857, one special object of which was to search for the long lost city. After a careful survey of the country, and a minute examination of the several passages of Scripture in which the name is mentioned, he came to the conclusion that it stood upon the conspicuous hill now called *Tell-es-Sâfieh*. This hill stands upon the side of the plain of Philistia, at the foot of the mountains of Judah; 10 miles E. of Ashdod, and about the same distance S. by E. of Ekron. It is irregular in form, and about 200 feet high. On the top are the foundations of an old castle; and great numbers of hewn stones are built up in the walls of the terraces that run along the declivities. On the N. E. is a projecting shoulder whose sides appear to have been scarped. Here, too, are traces of ancient buildings; and here stands the modern village, extending along the whole northern face of the hill. In the walls of the houses are many old stones, and at its western extremity two columns still remain on their pedestals. Round the sides of the hill, especially on the S., are large cisterns excavated in the rock. Gath occupied a strong position (2 Chr. xi. 8) on the border of Judah and Philistia (1 Sam. xxi. 10; 1 Chr. xviii 1); and from its strength and resources, forming the key of both countries, it was the scene of frequent struggles, and was often captured and recaptured (2 Chr. xi. 8, xxvi. 6; 2 K. xii. 17; Am. vi. 2). It was near Shocoh and Adullam (2 Chr. xi. 8), and it appears to have stood on the way leading from the former to Ekron; for when the Philistines fled on the death of Goliath, they went "by the way of Shaaraim, even unto Gath and unto Ekron" (1 Sam. xvii. 1, 52). All these notices combine in pointing to *Tell-es-Sâfieh* as the site of Gath. The statements of most of the early geographers as to the position of Gath are not only confused, but contradictory, probably owing to the fact that there was more than one place of the same name. But there is one very clear description by Eusebius, translated without change or comment by Jerome. It is as follows: "Gath, from which the Anakim and Philistines were not exterminated, is a village seen by such as go from Eleutheropolis to Diospolis, at about the fifth milestone" — κώμη παριόντων ἀπὸ τῆς Ἐλευθεροπόλεως περὶ Διόσπολιν περὶ πέμπτον σημεῖον τῆς Ἐλευθεροπόλεως (*Onom.* s. v. Γεθθά). The road from Eleutheropolis, now *Beit Jebrîn*, to Diospolis or Lydda, must have passed near *Tell-es-Sâfieh*, which would be distinctly seen at about the distance indicated. Eusebius mentions another Gath (*Onom.* s. v. *Geth*), a large village between Antipatris and Jamnia, which he considered to be that to which the Ark was carried (1 Sam. v. 8), but this position, on the western side of the plain of Philistia, does not agree with the descriptions above referred to. Jerome, who, as stated above, translates Eusebius' former notice without change or comment, gives a perplexing statement in his Comm. on Micah: "Geth una est de 5 urbibus Palæstinæ vicina Judææ confinio et de Eleutheropoli euntibus Gazam, nunc usque vicus vel maximus." Yet in his preface to Jonah, he says that Geth in Opher, the native place of the prophet, is to be distinguished: "Allarum Geth urbium quæ juxta Eleutheropolim sive Diospolim hodie quoque monstrantur." On the whole then there is nothing in these notices to contradict the direct statement of Eusebius, and we may therefore, safely conclude that *Tell-es-Sâfieh* is its site.

The ravages of war to which Gath was exposed appear to have destroyed it at a comparatively early period, as it is not mentioned among the other royal cities by the later prophets (Zeph. ii. 4; Zech ix. 5, 6). It is familiar to the Bible student as the scene of one of the most romantic incidents in the life of king David (1 Sam. xxi. 10–15), when to save his life "he feigned himself mad; scrabbled on the doors of the gate, and let his spittle fall down upon his beard." A few years later he returned to the city, was well received by the Philistine king, and had Ziklag assigned to him as a residence. He then secured some firm friends among his hereditary foes, who were true to him when his

Digitized by Google

own son rebelled. We have few more striking examples of devoted attachment than that of Ittai the Gittite (2 Sam. xv. 19–22). J. L. P.

GATH-HE'PHER, or GITTAH-HE'PHER (גַּת חֵפֶר), *the wine-press of the well*; and with ה loc. גִּתָּה חֵפֶר, Josh. xix. 13: [in 2 K., Γεθχοφέρ, Vat. Γεθχοβερ, Alex. Γεθ Αχοβερ, Comp. Γαιθεφέρ, Vulg. *Geth quæ est in Opher*; in Josh., Γεβερέ, Alex. Γαιθθα, Ald. Γεθθαεφθά, Comp. Γεθαεφέρ, Vulg. *Geth-hepher*]), a town on the border of the territory of Zebulun, not far from Japhia, now *Yáfa* (Josh. xix. 12, 13), celebrated as the native place of the prophet Jonah (2 K. xiv. 25). Jerome says (*Prœm. in Jonam*): "Geth quæ est in Opher haud grandis est viculus, in secundo Sepphoris miliario quæ hodie appellatur Diocesarea euntibus Tiberiadem, ubi et sepulchrum ejus ostenditur." Benjamin of Tudela in the 12th century says that the tomb of Jonah was still shown on a hill near Sepphoris (*Early Travels in Pal.* p. 89). About 2 miles E. of *Seffúrieh* (Sepphoris), on the top of a rocky hill, stands the little village of *el-Meshhad*, in which the tomb of Jonah yet exists. It belongs to the Moslems, and both they and the Christians of Nazareth agree in regarding this as the native village of the prophet. There can scarcely be a doubt that *el Meshhad* is the ancient Gath-hepher. J. L. P.

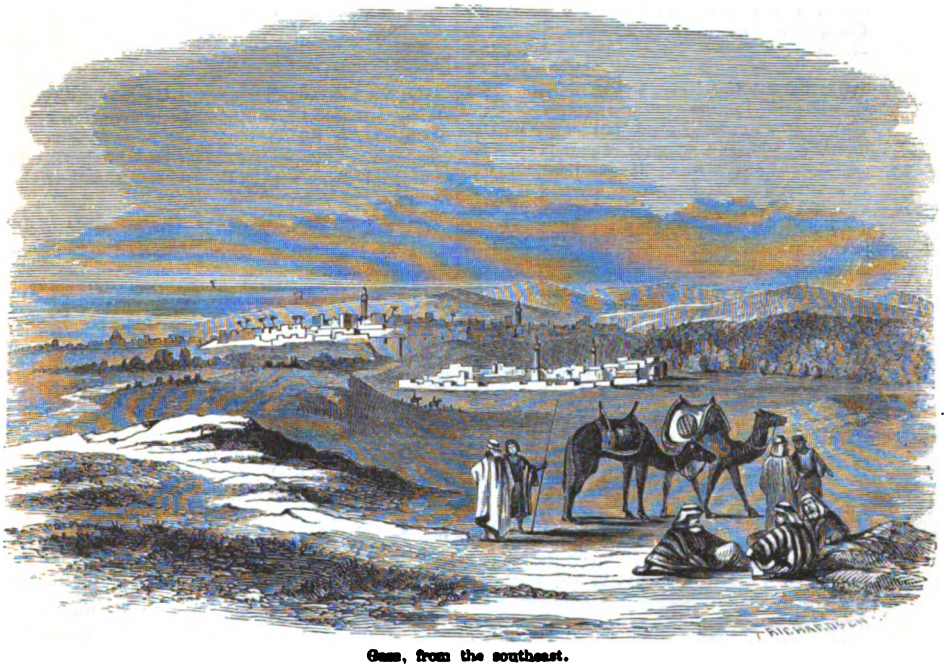
GATH-RIM'MON (גַּת רִמּוֹן [*pomegranate-press*: Γεθρεμμών, exc. Josh. xxi. 24, Rom. Vat. Γεθερεμμών, and 1 Chr., Vat. Γεθωρων: *Gethremmon*]). 1. A city given out of the tribe of Dan to the Levites (Josh. xxi. 24; 1 Chr. vi. 69), situated on the plain of Philistia, apparently not far from Joppa (Josh. xix. 45). Eusebius mentions a Γεθθά lying between Antipatris and Jamnia, which would answer well to the position of Gath-rimmon (*Onom.* s. v. *Geth*). But in another place he says Γεθρεμμὼν νῦν ἐστι κώμη μεγίστη ἀπὸ σημείων ιβ' Διοσπόλεως ἀπιόντων εἰς Ἐλευθερόπολιν (*Onom.* s. v.). This, however, would seem to agree better with the position of Gath, the royal city of Philistia, than of that assigned to Gath-rimmon in the passage above cited. The site of Gath-rimmon is unknown (Reland, p. 808).

2. [Ἰεβαθά; Alex. Βαιθσα; Ald. with 11 MSS. Βαιθσάν (7 others Βεθσάν); Comp. with 3 MSS. Γεθρεμμών: *Gethremmon*.] A town of the half tribe of Manasseh west of the Jordan, assigned to the Levites (Josh. xxi. 25). It is only once mentioned, and the LXX. reading is Βαιθσάν [see above]. In the parallel passage in 1 Chr. vi. 70, this town is called BILEAM. The reading Gath-rimmon is, therefore, probably an error of the transcribers, and may be merely a repetition of the same name occurring in the previous verse. J. L. P.

GA'ZA (עַזָּה, i. e. *Azzah* [*strong, a fortress*]: Γάζα; still called *Ghuzzeh* or *'Azzah*: the form *Gazera* is found in the Apocrypha and Josephus, and Brocardus mentions it as used in his day), one of the five chief cities of the Philistines. It is remarkable for its continuous existence and importance from the very earliest times. Like Damascus, it is mentioned both in the book of Genesis and in the Acts of the Apostles: and it is still a place of very considerable size, larger than Jerusalem.

The secret of this unbroken history is to be found in the situation of Gaza. It is the last town in the S. W. of Palestine, on the frontier towards Egypt. Ἐσχάτη ὠκεῖτο ὡς ἐπ' Αἰγύπτου ἐπὶ Φοινίκης ἰόντι ἐπὶ τῇ ἀρχῇ τῆς ἐρήμου (Arrian, *Exp. Alex.* ii. 26). It lay on the road which must always have been the line of communication between the valley of the Nile and the whole region of Syria. Even now its bazaars are better than those of Jerusalem. "Those travelling towards Egypt naturally lay in here a stock of provisions and necessaries for the desert: while those coming from Egypt arrive at Gaza exhausted, and must of course supply themselves anew" (Robinson, ii. 40).

The same peculiarity of situation has made Gaza important in the military sense. Its name means "the strong;" and this was well elucidated in its siege by Alexander the Great, which, notwithstanding all his resources of artillery, lasted five months. As Van de Velde says (p. 187), it was the key of the country. What had happened in the times of the Pharaohs (Jer. xlvii. 1) and Cambyses (Pomp. Mel. i. 11) happened again in the struggles between the Ptolemies and Seleucidæ (Polyb. v. 68, xvi. 40). This city was one of the most important military positions in the wars of the Maccabees (see 1 Macc. xi. 61, 62, xiii. 43; Joseph. *Ant.* xiii. 5, § 5, and 13, § 3). By the Romans it was assigned to the kingdom of Herod (xv. 7, § 3), and after his death to the province of Syria (xvii. 11, § 4). Nor does the history of Gaza in connection with war end here. In A. D. 634 it was taken by the generals of the first Khalif Abu Bekr, though he did not live to hear of the victory. Some of the most important campaigns of the crusaders took place in the neighborhood. In the 12th century we find the place garrisoned by the Knights Templars. It finally fell into the hands of Saladin, A. D. 1170 after the disastrous battle of Hattin.



The Biblical history of Gaza may be traced through the following stages: — In Gen. x. 19 it appears, even before the call of Abraham, as a "border" city of the Canaanites. With this we should compare the descriptive words in Deut. ii. 23, where the name is spelt "Azzah" in the English Version. [AZZAH.] In the conquest of Joshua the territory of Gaza is mentioned as one which he was not able to subdue (Josh. x. 41, xi. 22, xiii. 3). It was assigned to the tribe of Judah (Josh. xv. 47), and that tribe did obtain possession of it (Judg. i. 18); but they did not hold it long; for soon afterwards we find it in the hands of the Philistines (Judg. iii. 3, xiii. 1, xvi. 1, 21); indeed it seems to have been their capital; and notwithstanding the gigantic efforts of Samson,[a] who died here, Gaza apparently continued through the times of Samuel, Saul, and David to be a Philistine city (1 Sam. vi. 17, xiv. 52, xxxi. 1; 2 Sam. xxi. 15) Solomon became master of "Azzah" (1 K. iv. 24)

[a] * The A. V Judg. xvi. 3, implies a proximity of Gaza to Hebron which is not true, nor required by the Hebrew. Samson carried the doors of the city-gate "to the top of the hill" (definite) "that is (not *before*, but) toward Hebron." This may be the hill half an hour southeast from Gaza; for it lies in the right direction, and is a marked eminence, being partially isolated and higher than any other point in the neighborhood. H.

Digitized by Google

But in after times the same trouble with the Philistines recurred (2 Chr. xxi. 16, xxvi. 6, xxviii. 18). In these passages, indeed, Gaza is not specified, but there is little doubt that it is implied. In 2 K. xviii. 8, we are distinctly told that Hezekiah "smote the Philistines even unto Gaza, and the borders thereof, from the tower of the watchmen to the fenced city." During this period of Jewish history, it seems that some facts concerning the connection of Gaza with the invasion of Sennacherib may be added from the inscriptions found at Nineveh (Layard's *Nineveh and Babylon*, p. 144). We ought here to compare certain passages in the prophets where the name of the Philistine city occurs: namely, Am. i. 6, 7; Zeph. ii. 4; Zech. ix. 5. The period intermediate between the Old and New Testaments has been touched on above.

The passage where Gaza is mentioned in the N. T. (Acts viii. 26) is full of interest. It is the account of the baptism of the Ethiopian eunuch on his return from Jerusalem to Egypt. The words in this passage: "Arise and go towards the south, unto the way that goeth down from Jerusalem to Gaza, which is desert" (πορεύου κατὰ μεσημβρίαν, ἐπὶ τὴν ὁδὸν τὴν καταβαίνουσαν ἀπὸ Ἰερουσαλὴμ εἰς Γάζαν· αὕτη ἐστὶν ἔρημος), have given rise to much discussion. It is doubted, in the first place, whether they are to be attributed to the angel or to the narrator. The solution of this doubt depends partly on another question, namely, whether αὕτη is to be referred to the road or the city. If to the latter, the remark will naturally be understood as St. Luke's; and we may suppose that he wrote the passage just after the beginning of the Jewish war (A. D. 65), when Gaza was actually desolated (Joseph. *B. J.* ii. 18, § 1). Others would refer us to a passage of Strabo, where he says that the town was ἔρημος after it was taken by Alexander: but the text of Strabo in this place is doubtful; and it is evident (see above) that the statement cannot be literally true. Pomponius Mela speaks of Gaza as "ingens urbs et munita admodum,"

Gaza, from the southeast.

and it is prominently noticed in Pliny. Some suppose (as Jerome) that the site of Gaza was changed: and this may possibly be true: for Strabo says that it was only seven stadia from the sea, whereas it is now considerably more: and the encroachment of the drifting sands near the coast may have been a motive for the restorers of the city to move it further eastwards. The probability, however, is that the words αὕτη ἐστὶν ἔρημος refer to the road, and are used by the angel to inform PHILIP, who was then in Samaria, on what route he would find the eunuch. Besides the ordinary road from Jerusalem by Ramleh to Gaza, there was another, more favorable for carriages (Acts viii. 28), further to the south, through Hebron, and thence through a district comparatively without towns and much exposed to the incursions of people from the desert. The matter is discussed by Raumer in one of his *Beiträge*, incorporated in the last edition of his *Palästina*, also by Robinson in the Appendix to his second volume. The latter writer suggests a very probable place for the baptism, namely, at the water in the *Wady el-Hasy*, between Eleutheropolis and Gaza, not far from the old sites of Lachish and Eglon. The legendary scene of the baptism is at *Beit-sûr*, between Jerusalem and Hebron: the tradition having arisen apparently from the opinion that Philip himself was travelling southwards from Jerusalem. But there is no need to suppose that he went to Jerusalem at all. Lange (*Apost. Zeitalt.* ii. 109) gives a spiritual sense to the word ἔρημος. [See BETH-ZUR, Amer. ed.]

The modern *Ghuzzeh* is situated partly on an oblong hill of moderate height, and partly on the lower ground. The climate of the place is almost tropical, but it has deep wells of excellent water

Digitized by Google

There are a few palm-trees in the town, and its fruit-orchards are very productive. But the chief feature of the neighborhood is the wide-spread olive-grove to the N. and N. E. Hence arises a considerable manufacture of soap, which *Ghuzzeh* exports in large quantities. [ASHES, Amer. ed.] It has also an active trade in corn. For a full account of nearly all that has been written concerning the topographical and historical relations of Gaza, see Ritter's *Erdkunde*, xvi. 45–60. Among the travellers who have described the place we may mention especially Robinson (*Biblical Researches*, ii. 35–43) and Van de Velde (*Syria and Palestine*, ii 179–188), from whom we have already quoted; also Thomson (*Land and Book*, ii. 331–343). The last writer speaks of the great extent of corn-land near Gaza, and of the sound of millstones in the city. Both these circumstances are valuable illustrations of the acts and sufferings of SAMSON, the great hero of Gaza. [On the site and ruins of Gaza, see also Porter's *Handb. of Syr. and Palest.* i. 262 ff.; Sepp's *Jerusalem u. das heil. Land*, ii. 522 ff.; and Gage's Trans. of Ritter's *Geogr. of Palestine*, iii. 205 ff. — H.] J. S. H.

GAZ'ARA (ἡ Γάζαρα, and τὰ Γάζαρα: [in 1 Macc. xv. 28, 35, Alex. Γαζαρηνων (gen.):] *Gazara*), a place frequently mentioned in the wars of the Maccabees, and of great importance in the operations of both parties. Its first introduction is as a stronghold (ὀχύρωμα), in which Timotheus took refuge after his defeat by Judas, and which for four days resisted the efforts of the infuriated Jews (2 Macc. x. 32–36). One of the first steps of Bacchides, after getting possession of Judæa, was to fortify Bethsura and Gazara and the citadel (ἄκρα) at Jerusalem (1 Macc. ix. 52); and the same names are mentioned when Simon in his turn recovered the country (xiv. 7, 33, 34, 36, xv. 28). So important was it, that Simon made it the residence of his son John as general-in-chief of the Jewish army (xiii. 53, xvi. 1).

There is every reason to believe that Gazara was the same place as the more ancient GEZER or GAZER. The name is the same as that which the LXX. use for Gezer in the O. T.; and more than this, the indications of the position of both are very much in accordance. As David smote the Philistines from Gibeon to Gezer, so Judas defeats Gorgias at Emmaus, and pursues him to Gazera (1 Macc. iv. 15). Gazara also is constantly mentioned in connection with the sea-coast — Joppa and Jamnia (xv. 28, 35; iv. 15), and with the Philistine plain, Azotus, Adasa, &c. (iv. 15, vii. 45, xiv. 34). [GAZERA.] G.

GA'ZATHITES, THE (הָעַזָּתִי, accur. *the Azathite*: τῷ Γαζαίῳ: *Gazæos*), Josh. xiii. 3; the inhabitants of GAZA. Elsewhere the same name is rendered GAZITES in the A. V.

GA'ZER (גֶּזֶר [*declivity, precipice*]: [Γαζηρά; in 1 Chr. xiv., FA. Γαζαραν: *Gezer, Gazera*]), 2 Sam. v. 25; 1 Chr. xiv. 16. The same place as GEZER; the difference arising from the emphatic Hebrew accent; which has been here retained in the A. V., though disregarded in several other places where the same form occurs. [GEZER.] From the uniform practice of the LXX., both in the O. T. and the books of Maccabees, Ewald infers that the original form of the name was Gazer; but the punctuation of the Masorets is certainly as often the one as the other. (Ewald, *Gesch.* ii. 427 note.) G.

GAZE'RA. 1. (τὰ Γάζηρα; Alex. Γασηρα Joseph. τὰ Γάδαρα: *Gezerон, Gazara*), 1 Macc iv. 15, vii. 45. The place elsewhere given as GAZARA.

2. [Καζηρά; Ald. Alex. Γαζηρά: *Gaze.*] One of the "servants of the temple," whose sons returned with Zorobabel (1 Esdr. v. 31). In Ezra and Nehem. the name is GAZZAM.

GA'ZEZ (גָּזֵז [*shearer*]: ὁ Γεζουέ; [Comp. Γαζήζ, Γαζάς; Ald. Γαζέρ:] *Gezez*), a name which occurs twice in 1 Chr. ii. 46; (1) as son of Caleb by Ephah his concubine; and (2) as son of Haran, the son of the same woman: the second is possibly only a repetition of the first. At any rate there is no necessity for the assumption of Houbigant, that the second Gazez is an error for Jahdai. In some MSS. and the Peshito the name is given Gazem The Vat. LXX. omits the second occurrence.

GA'ZITES, THE (הָעַזָּתִים: τοῖς Γαζαίοις: *Philisthiim*), inhabitants of Gaza (Judg. xvi. 2). Elsewhere given as GAZATHITES.

GAZ'ZAM (גַּזָּם [*devouring*]: Γαζέμ, Γηζάμ: *Gazam*, [*Gezem*]). The Bene-Gazzam were among the families of the NETHINIM who returned from the Captivity with Zerubbabel (Ezr. ii. 48; Neh. vii. 51). In 1 Esdr. [v. 31] the name is altered to GAZERA.

GE'BA (גֶּבַע, often with the definite article = *the hill*: Γαβαά, [etc.: *Gabaa, Geba,*] *Gabaa, Gabee*), a city of Benjamin, with "suburbs," allotted to the priests (Josh. xxi. 17; 1 Chr. vi. 60). It is named amongst the first group of the Benjamite towns, apparently those lying near to and along the north boundary (Josh. xviii. 24). Here the name is given as GABA, a change due to the emphasis required in Hebrew before a pause; and the same change occurs in Ezr. ii. 26; Neh. vii. 30 and xi. 31; 2 Sam. v. 25; 2 K. xxiii. 8; the last three of these being in the A. V. Geba. In one place Geba is used as the northern landmark of the kingdom of Judah and Benjamin, in the expression "from G. to Beer-sheba" (2 K. xxiii. 8), and also as an eastern limit in opposition to Gazer (2 Sam. v. 25). In the parallel passage to this last in 1 Chr. xiv. 16, the name is changed to Gibeon During the wars of the earlier part of the reign of Saul, Geba was held as a garrison by the Philistines (1 Sam. xiii. 3), but they were ejected by Jonathan, a feat which, while it added greatly to his renown, exasperated them to a more overwhelming invasion. Later in the same campaign we find it referred to to define the position of the two rocks which stood in the ravine below the garrison of Michmash, in terms which fix Geba on the south and Michmash on the north of the ravine (1 Sam. xiv. 5; the A. V. has here Gibeah). Exactly in accordance with this is the position of the modern village of *Jeba*, which stands picturesquely on the top of its steep terraced hill, on the very edge of the great *Wady Suweinit*, looking northwards to the opposite village, which also retains its old name of *Mükhmâs*. The names, and the agreement of the situation with the requirements of the story of Jonathan, make the identification all but certain; but it is still further confirmed by the invaluable list of Benjamite towns visited by the Assyrian army on their road through the country southward

Digitized by Google

to Jerusalem, which we have in Is. x. 28–32; where the minute details — the stoppage of the heavy baggage (A. V. "carriages"), which could not be got across the broken ground of the wady at Michmash; then the passage of the ravine by the lighter portion of the army, and the subsequent bivouac ("lodging," מָלוֹן = rest for the night) at Geba on the opposite side — are in exact accordance with the nature of the spot. Standing as it does on the south bank of this important wady — one of the most striking natural features of this part of the country — the mention of Geba as the northern boundary of the lower kingdom is very significant. Thus commanding the pass, its fortification by Asa (1 K. xv. 22; 2 Chr. xvi. 6) is also quite intelligible. It continues to be named with Michmash to the very last (Neh. xi. 31).

Geba is probably intended by the "Gibeah-in-the-field" of Judg. xx. 31, to which its position is very applicable. [GIBEAH, 6.] The "fields" are mentioned again as late as Neh. xii. 29.

It remains to notice a few places in which, from the similarity of the two names, or possibly from some provincial usage,[a] "Geba" is used for "Gibeah." These are: (1.) Judg. xx. 10: here the A. V., probably anxious to prevent confusion, has "Gibeah." (2.) Judg. xx. 33: "the meadows," or more probably "the cave of Geba." Geba may be here intended, but Gibeah — as in the A. V. — seems almost necessary. Owing to the word occurring here at a pause the vowels are lengthened, and in the Hebrew it stands as *Gâba*. (3.) 1 Sam. xiii. 16: here the meaning is evident, and the A. V. has again altered the name accordingly. Josephus (*Ant.* vi. 6, § 2) has Γαβαών, Gibeon, in this place; for which perhaps compare 1 Chr. viii. 29, ix. 35.

2. The Geba (Γαιβαί; Alex. Ταιβαν; [Sin. Γαιβαν; Comp. Γαβά; Ald. Γαιβά]) named in Jud. iii. 10, where Holofernes is said to have made his encampment — "between Geba and Scythopolis" — must be the place of the same name, *Jeba*, on the road between Samaria and *Jenin*, about three miles from the former (Rob. i. 440). The Vulgate has a remarkable variation here — "venit ad Idumæos in terram Gabaa." G.

GE'BAL (גְּבָל, *G'bal*, from גָּבַל, *Gâbal, to twist*; hence גְּבוּל, *G'bûl, a line*; thence جبل. *Gebal*, a line of mountains as a natural boundary: [in Ps.,] Γεβάλ: [Vat. Sin. Ναιβαλ:] *Gebal*; [in Ez., βίβλιοι: *Giblii*]), a proper name, occurring in Ps. lxxxiii. 7 (Vulg. lxxxii.) in connection with Edom and Moab, Ammon and Amalek, the Philistines and the inhabitants of Tyre. The mention of Assur, or the Assyrian, in the next verse is with reason supposed to refer the date of the composition to the latter days of the Jewish kingdom. It is inscribed, moreover, with the name of Asaph. Now in 2 Chr. xx. 14 it is one of the sons or descendants of Asaph, Jahaziel, who is inspired to encourage Jehoshaphat and his people, when threatened with invasion by the Moabites, Ammonites, and others from beyond the sea, and from Syria (as the LXX. and Vulg.: it is unnecessary here to go into the obscurities and varieties of the Hebrew, Syriac, and Arabic versions). It is impossible, therefore not to recognize the connection between this psalm and these events; and hence the contexts both of the psalm and of the historical records will justify our assuming the Gebal of the Psalms to be one and the same city with the Gebal of Ezekiel (xxvii. 9), a maritime town of Phœnicia and not another, as some have supposed, in the district round about Petra, which is by Josephus, Eusebius, and St. Jerome called Gebalene. Jehoshaphat had, in the beginning of his reign, humbled the Philistines and Arabians (2 Chr. xvii. 10-11), and still more recently had assisted Ahab against the Syrians (*ibid.* ch. xviii.). Now, according to the poetic language of the Psalmist, there were symptoms of a general rising against him. On the south the Edomites, Ishmaelites, and Hagarenes; on the southeast Moab, and northeast Ammon. Along the whole line of the western coast (and, with Jehoshaphat's maritime projects, this would naturally disturb him most, see 2 Chr. xx 36) the Amalekites, Philistines, and Phœnicians, or inhabitants of Tyre, to their frontier town Gebal, with Assur, *i. e.* the Syrians, or Assyrians, from the more distant north. It may be observed that the Ashurites are mentioned in connection with Gebal no less in the prophecy (ver. 6) than in the psalm. But, again, the Gebal of Ezekiel was evidently no mean city. From the fact that its inhabitants are written "Giblians" in the Vulg. and "Biblians" in the LXX., we may infer their identity with the Giblites, spoken of in connection with Lebanon by Joshua (xiii. 5), and that of their city with the "Biblus" (or Byblus) of profane literature — so extensive that it gave name to the surrounding district. (See a passage from Lucian, quoted by Reland, *Palæst.* lib. i. c. xlii. p. 269.) It was situated on the frontiers of Phœnicia, somewhat to the north of the mouth of the small river Adonis, so celebrated in mythology (comp. Ez. viii. 13). Meanwhile the Giblites, or Biblians, seem to have been preëminent in the arts of stone-carving (1 K. v. 18) and ship-caulking (Ez. xxvii. 9); but, according to Strabo, their industry suffered greatly from the robbers infesting the sides of Mount Lebanon. Pompey not only destroyed the strongholds from whence these pests issued, but freed the city from a tyrant (Strab. xvi. 2, 18). Some have confounded Gebal, or Biblus, with the Gabala of Strabo, just below Laodicea, and consequently many leagues to the north, the ruins and site of which, still called Jebilee, are so graphically described by Maundrell (*Early Travels in Palestine*, by Wright, p. 494). By Moroni (*Dizion. Eccles.*) they are accurately distinguished under their respective names. Finally, Biblus became a Christian see in the patriarchate of Antioch, subject to the metropolitan see of Tyre (Reland's *Palæst.* lib. i. p. 214 ff.). It shared the usual vicissitudes of Christianity in these parts; and even now furnishes episcopacy with a title. It is called *Jebail* by the Arabs, thus reviving the old Biblical name. E. S. Ff.

GE'BER (גֶּבֶר [*man, hero*]), a name occurring twice in the list of Solomon's commissariat officers, and there only. 1. (Ναβέρ; [Vat. Alex. Γαβερ: *Bengaber*].) The son of Geber (*Ben-Geber*) resided in the fortress of Ramoth-Gilead and had charge of Havoth-Jair, and the district of Argob (1 K. iv. 13). Josephus (*Ant.* viii. 2, § 3) gives the name as Γαβδήρης.

2. (Γαβέρ; [Vat. M. omits:] *Gaber.*) Geber the son of Uri had a district south of the former —

[a] As with us, Barkshire for Berkshire, Darby for Derby, &c.

Digitized by Google

the "land of Gilead," the country originally possessed by Sihon and Og, probably the modern *Belka*, the great pasture-ground of the tribes east of Jordan (1 K. iv. 19). The conclusion of this verse as rendered in the A. V. is very unsatisfactory — "and he was the only officer which was in the land," when two others are mentioned in 13 and 14. A more accurate interpretation is, "and one officer who was in the land," that is, a superior (נָצִיב), a word of rare occurrence, but used again for Solomon's "officers" in 2 Chr. viii. 10) over the three. Josephus has ἐπὶ δὲ τούτων εἷς πάλιν ἄρχων ἀποδέδεικτο, the πάλιν referring to a similar statement just before that there was also one general superintendent over the commissaries of the whole of Upper Palestine. G.

GE'BIM (גֵּבִים, with the article = probably *the ditches* [*cisterns, springs*, Fürst]; the word is used in that sense in 2 K. iii. 16, and elsewhere: Γιββείρ; [Comp. Γεβίμ:] *Gabim*), a village north of Jerusalem, in the neighborhood of the main road, and apparently between Anathoth (the modern *Anata*) and the ridge on which Nob was situated, and from which the first view of the city is obtained. It is named nowhere but in the enumeration by Isaiah of the towns whose inhabitants fled at Sennacherib's approach (x. 31). Judging by those places the situation of which is known to us, the enumeration is so orderly that it is impossible to entertain the conjecture of either Eusebius (*Onom.* Gebin), who places it at Geba, five miles north of Gophna; or of Schwarz (p. 131), who would have it identical with Gob or Gezer: the former being at least 10 miles north, and the latter 20 miles west, of its probable position. *El-Isawiyeh* occupies about the right spot. G.

GEDALI'AH (גְּדַלְיָה, and גְּדַלְיָהוּ, *i. e.* Gedalia'hu [*Jehovah is great*]: Γοδολίας: *Godolias*). 1. GEDALIAH, the son of Ahikam (Jeremiah's protector, Jer. xxvi. 24), and grandson of Shaphan the secretary of king Josiah. After the destruction of the Temple, B. C. 588, Nebuchadnezzar departed from Judæa, leaving Gedaliah with a Chaldæan guard (Jer. xl. 5) at Mizpah, a strong (1 K. xv. 22) town, six miles N. of Jerusalem, to govern, as a tributary (Joseph. *Ant.* x. 9, § 1) of the king of Babylon, the vine-dressers and husbandmen (Jer. lii. 16) who were exempted from captivity. Jeremiah joined Gedaliah; and Mizpah became the resort of Jews from various quarters (Jer. xl. 6, 11), many of whom, as might be expected at the end of a long war, were in a demoralized state, unrestrained by religion, patriotism, or prudence. The gentle and popular character of Gedaliah (Joseph. *Ant.* x. 9, § 1, 3), his hereditary piety (Rosenmüller in Jer. xxvi. 24), the prosperity of his brief rule (Jer. xl. 12), the reverence which revived and was fostered under him for the ruined Temple (xli. 5), fear of the Chaldæan conquerors whose officer he was, — all proved insufficient to secure Gedaliah from the foreign jealousy of Baalis king of Ammon, and the domestic ambition of Ishmael, a member of the royal family of Judah (Joseph. *Ant.* x. 9, § 3). This man [Ishmael, 2 K. xxv. 25] came to Mizpah with a secret purpose to destroy Gedaliah. Gedaliah, generously refusing to believe a friendly warning which he received of the intended treachery, was murdered, with his Jewish and Chaldæan followers, two months after his appointment. After his death, which is still commemorated in the Jewish calendar (Prideaux, *Connexion, anno* 588, and Zech. viii. 19)[a] as a national calamity, the Jews, in their native land, anticipating the resentment of the king of Babylon, gave way to despair. Many, forcing Jeremiah to accompany them, fled to Egypt under Johanan.

2. [Vat. Γουρα, Γαλουια.] GEDALIA'HU; a Levite, one of the six sons of Jeduthun who played the harp in the service of Jehovah (1 Chr. xxv. 3 9).

3. [Γαδαλία; Vat. -λεια: FA. Γαλαδεια: *Godolia.*] GEDALIAH; a priest in the time of Ezra (Ezr. x. 18). [JOADANUS.]

4. [FA.[1] Γολιας: *Gedelias.*] GEDALIA'HU; son of Pashur (Jer. xxxviii. 1), one of those who caused Jeremiah to be imprisoned.

5 GEDALIAH; grandfather of Zephaniah the prophet (Zeph. i. 1). W. T. B.

GED'DUR (Γεδδούρ; [Vat. Κεδδουρ:] *Geddu*), 1 Esdr. v. 30. [GAHAR.]

GED'EON ([Alex.] Γεδεων; [Sin. Γεδσων:] *Gedeon*). 1. The son of Raphaim; one of the ancestors of Judith (Jud. viii. 1). The name is omitted in the Vat. LXX.

2. The Greek form of the Hebrew name GIDEON (Heb. xi. 32); retained in the N. T. by our translators, in company with Elias, Eliseus, Osee, Jesus, and other Grecized Hebrew names, to the confusion of the ordinary reader.

GE'DER (גֶּדֶר [*walled place*]: Γαδήρ; [Vat. Ασει.] *Gader*). The king of Geder was one of the 31 kings who were overcome by Joshua on the west of the Jordan (Josh. xii. 13), and mentioned in that list only. Being named with Debir, Hormah, and Arad, Geder was evidently in the extreme south: this prevents our identifying it with Gedor (Josh. xv. 58), which lay between Hebron and Bethlehem; or with ha-Gederah in the low country (xv. 36). It is possible, however, that it may be the same place as the Gedor named in connection with the Simeonites (1 Chr. iv. 39). G.

GEDE'RAH (גְּדֵרָה, with the article = *the sheepcote*: Γάδηρα: *Gedera*), a town of Judah in the *Shefelah* or lowland country (Josh. xv. 36), apparently, from the near mention of Azekah, Socoh, &c., in its eastern part, near the "valley of the Terebinth." [ELAH.] This position agrees passably with that assigned by Eusebius (*Onomasticon*) to "Gedour," which he says was in his time a very large village 10 miles from Eleutheropolis, on the road to Diospolis (Lydda); and also with another which he gives as Gidora, in the boundaries of Jerusalem (Ælia), near the Terebinth. No town bearing this name has however been yet discovered in this hitherto little explored district. The name (if the interpretation given be correct), and the occurrence next to it of one so similar as GEDEROTHAIM, seem to point to a great deal of sheep-breeding in this part. G.

GEDE'RATHITE, THE (הַגְּדֵרָתִי [see above]: ὁ Γαδαραθίμ; [Vat. -ειμ;] Alex. Γαδη-

[a] Called the "fast of the seventh," *i. e.* month comp. Zech viii. 19 with 2 K. xxv. 25. See *Feste der Juden* in Herzog's *Real-Encyk.* iv. 387). For the character of Gedaliah and the tragical scene of his death, the reader may see Stanley's *Jewish History*, p. 616 ff. G.

Digitized by Google

ωθ; [FA. Γεδαρα:] *Gaaerathites*), the native of a place called Gederah, but not of that in the *Shefelah* of Judah, for Jozabad the Gederathite (1 Chr. xii. 4) was one of Saul's own tribe — his "brethren of Benjamin" (ver. 2). No other is named. G.

GE'DERITE, THE (הַגְּדֵרִי: ὁ Γεδωρίτης [Vat. -ρει-]; Alex. ὁ Γεδωρ: *Gederites*), *i. e.* the native of some place named Geder or Gederah. Baal-hanan the Gederite had charge of the olive and sycamore groves in the low country (*Shefelah*) for king David (1 Chr. xxvii. 28). He possibly belonged to GEDERAH, a place in this district, the very locality for sycamores. G.

GEDE'ROTH (גְּדֵרוֹת = *sheep-cotes*, but in Chr. with the article: Γεδδώρ, Γαληρώ; Alex. Γαδηρωθ: *Gideroth*, *Gederoth*), a town in the *Shefelah* or low country of Judah (Josh. xv. 41; 2 Chr. xxviii. 18). It is not named in the same group with GEDERAH and GEDEROTHAIM in the list in Joshua, but lay apparently a little more to the north with Makkedah. The notice in Chronicles shows, however, that all the towns of these groups were comparatively close together. G.

GEDEROTHA'IM (גְּדֵרֹתַיִם = *two sheep-folds: Gederathaim*), a town in the low country of Judah (Josh. xv. 36), named next in order to Gederah. The LXX. treat the word as referring to the name preceding it, and render it καὶ αἱ ἐπαύλεις αὐτῆς. G.

GE'DOR (גְּדוֹר [*a wall*]: *Gedor*). 1. (Γεδδών; Alex. Γεδωρ.) A town in the mountainous part of Judah, named with Halhul and Bethzur (Josh. xv. 58), and therefore a few miles north of Hebron. Eusebius (*Onom.* "Gædur") places it at ten miles south of Diospolis, the modern *Lüdd*; but this does not agree with the requirements of the passage. On the other hand, Robinson (iii. 283) has discovered a *Jedûr* half way between Bethlehem and Hebron, about two miles west of the road, which very probably represents the ancient site. The Gædur of Eusebius is more likely.

2. [Γεδωρ; FA. Γεδδωρ.] The town — apparently of Benjamin — to which "Jehoram of Gedor" belonged, whose sons Joelah and Zebadiah were among the mighty men, "Saul's brethren of Benjamin," who joined David in his difficulties at Ziklag (1 Chr. xii. 7). The name has the definite article to it in this passage (מִן־הַגְּדוֹר: οἱ τοῦ Γεδώρ). If this be a Benjamite name, it is very probably connected with

3. (Γεδούρ; [in 1 Chr. viii. 31, Vat. Δουρ; in ix. 37, Vat. Sin. Ιεδουρ.]) A man among the ancestors of Saul; son of Jehiel, the "father of Gibeon" (1 Chr. viii. 31; ix. 37).

4. The name occurs twice in the genealogies of Judah — 1 Chr. iv. 4, and 18 — (in both shortened to גְּדֹר: Γεδώρ). In the former passage Penuel is said to be "father of Gedor," while in the latter Jered, son of a certain Ezra by his Jewish wife (A. V. "Jehudijah"), has the same title. In the Targum, Jered, Gedor, and other names in this passage, are treated as being titles of Moses, conferred on him by Jehudijah, who is identified with the daughter of Pharaoh.

5. In the records of the tribe of Simeon, in 1 Chr. iv. 39, certain chiefs of the tribe are said to have gone, in the reign of Hezekiah, "to the entrance of Gedor, unto the east side of the valley" (הַגָּיְאָה), in search of pasture grounds, and to have expelled thence the Hamites who dwelt there in tents, and the Maonites (A. V. "habitations") Simeon lay in the extreme south of Judah, and therefore this Gedor must be a different place from that noticed above — No. 1. If what is told in ver. 42 was a subsequent incident in the same expedition, then we should look for Gedor between the south of Judah and Mount Seir, *i. e.* Petra. No place of the name has yet been met with in that direction. The LXX. (both MSS.) read Gerar for Gedor (ἕως τοῦ ἐλθεῖν Γέραρα; which agrees well both with the situation and with the mention of the "pasture," and is adopted by Ewald (i. 322, note). The "valley" (*Gai*, i. e. rather the "ravine"), from the presence of the article, would appear to be some well-known spot; but in our present limited knowledge of that district, no conjecture can be made as to its locality. It may be noticed that *Nachal* (= wady), and not *Gai*, is the word elsewhere applied to Gerar. G.

GEHA'ZI (גֵּחֲזִי [usually = גֵּי־חֲזִי *valley of vision*, Ges.; Fürst suggests from another root, *lessener*, *denier*]: Γιεζί: [Vat. Alex. -ζει:] *Giezi*), the servant or boy of Elisha. He was sent as the prophet's messenger on two occasions to the good Shunammite (2 K. iv.); obtained fraudulently in Elisha's name money and garments from Naaman was miraculously smitten with incurable leprosy, and was dismissed from the prophet's service (2 K. v.). Later in the history he is mentioned as being engaged in relating to King Joram all the great things which Elisha had done, when the Shunammite whose son Elisha had restored to life appeared before the king, petitioning for her house and land of which she had been dispossessed in her seven years' absence in Philistia (2 K. viii.).

W. T. B.

GEHEN'NA (Γεέννα), the Greek representative of גֵּי־הִנֹּם, Josh. xv. 8, Neh. xi. 30 (rendered by LXX. Γαιέννα, Josh. xviii. 16; more fully גֵּי בְנֵי־הִנֹּם, or גֵּי בֶן־הִנֹּם, 2 K. xxiii. 10, 2 Chr. xxviii. 3, xxxiii. 6, Jer. xix. 2), the "valley of Hinnom," or "of the son," or "children of H." (A. V.), a deep narrow glen to the S. of Jerusalem, where, after the introduction of the worship of the fire-gods by Ahaz, the idolatrous Jews offered their children to Molech (2 Chr. xxviii. 3; xxxiii 6; Jer. vii. 31, xix. 2–6). In consequence of these abominations the valley was polluted by Josiah (2 K. xxiii. 10); subsequently to which it became the common lay-stall of the city, where the dead bodies of criminals, and the carcases of animals, and every other kind of filth was cast, and, according to late and somewhat questionable authorities, the combustible portions consumed with fire. From the depth and narrowness of the gorge, and, perhaps, its ever-burning fires, as well as from its being the receptacle of all sorts of putrefying matter, and all that defiled the holy city, it became in later times the image of the place of everlasting punishment. "where their worm dieth not, and the fire is not quenched;" in which the Talmudists placed the mouth of hell: "There are two palm-trees in the V. of H., between which a smoke ariseth . . . and this is the door of Gehenna." (Talmud, quoted by Barclay, *City of Great King*, p. 90· Lightfoot, *Centur. Chorograph. Matt. proœm.* ii. 200.)

In this sense the word is used by our blessed Lord, Matt. v. 29, 30, x. 28, xxiii. 15, 33; Mark x. 43, 45; Luke xii. 5; and with the addition τοῦ πυρός, Matt. v. 22, xviii. 9; Mark ix. 47; and by St. James, iii. 6. [HELL; HINNOM, VALLEY OF; TOPHET.] E. V.

* There is a remarkable passage in the book of Enoch which deserves notice here, as perhaps the earliest example in Jewish writings of the representation of Gehenna or the Valley of Hinnom as a place of punishment for the wicked. The valley is not *named* in the passage referred to, but it is so minutely described in connection with Jerusalem and Mount Zion that its identity is unmistakable. After the description, the passage continues thus: —

"Then I said: 'What means this blessed land which is full of trees, and this accursed valley in the midst?' Then Uriel, one of the holy angels with me, answered and said: 'This accursed valley is for those who shall be accursed to eternity: here must assemble all those who utter with their mouths unseemly speeches against God, and blaspheme his glory; here they are to be gathered, and this is the place of their punishment. And in the last times will the spectacle be given to the righteous of a just judgment on these for ever and ever; for which those who have found mercy will praise the Lord of glory, the eternal king.'" (*Enoch*, c. 27, Dillmann; 26, Laurence.)

"This," remarks a writer in the *National Review* (xviii. 563, 564), "is the earliest expression of the Jewish belief respecting the scene and mode of the Messianic crisis. . . . The Judgment, it is plain, was to take place near Jerusalem: and while the temple hill was to be the citadel of reward to the pious, the punishment of the wicked, in order to be within sight [comp. Is. lxvi. 24], would take place in the valley of Hinnom below. This spot, it is quite evident, is not figuratively referred to, as furnishing merely a name and symbol for the invisible penalties of another world, but literally designated as their real topographical seat; precisely as the neighboring heights are taken to be the proper metropolis of the elect. Both physical and historical causes inclined the Jewish imagination to select this particular valley for the fatal purpose. Stretching towards the volcanic district to the south, it is said to have emitted at times a smoke which betrayed subterranean fires, and which would receive from the Jew the same penal interpretation that his Scriptures had already put on the convulsions of the Asphaltite basin. And as the frequent scene of the rites of Moloch, it was associated with many horrors, and had received the curse of the prophets (comp. 2 K. xxiii. 10; Jer. vii. 31–33, xix. 5–7, xxxii. 35; Is. xxiv. 15, 23)."

For a fuller illustration of the subject, see Dillmann's note (*Das Buch Henoch*, pp. 131, 132), and comp. *Enoch*, cc. xc. 26, 27, liv. 1, 2. lvi. 3, 4 (or lxxxix. 34–37, liii. 1, 2, liv. 7, 8, in Laurence's translation). The conception of the writer appears to have been, that at the time of the Messianic judgment the wicked would be gathered in the Valley of Hinnom in the presence of the righteous, where the earth would open, as in the case of the followers of Korah (Num. xvi. 30), and receive them into the fiery lake beneath. From this conception of "the accursed valley" as the gate of hell, the transfer of the name Gehenna to the place of punishment itself (comp. the Latin *Avernus*) was easy and natural. *Jahannam* is the current Arabic name for hell, as *Gehinnam* is in the Targums and the Talmud (see Buxt. *Lex. Talm.* col 395, and Lightfoot and Wetstein on Matt. v. 22). See also JEHOSHAPHAT, VALLEY OF. A

GELI'LOTH (גְּלִילוֹת [*circle, circuit*] Γαλιλώθ; Alex. Αγαλλιλωθ, as if the definite article had been originally prefixed to the Hebrew word *ad tumulos*), a place named among the marks of the south boundary line of the tribe of Benjamin (Josh. xviii. 17). The boundary went from Enshemesh towards Geliloth, which was "over against" (נֹכַח) the ascent of ADUMMIM. In the description of the north boundary of Judah, which was identical at this part with the south of Benjamin, we find Gilgal substituted for Geliloth with the same specification as "over against" (נֹכַח) the ascent of Adummim (Josh. xv. 7). The name Geliloth never occurs again in this locality, and it therefore seems probable that Gilgal is the right reading. Many glimpses of the Jordan valley are obtained through the hills in the latter part of the descent from Olivet to Jericho, along which the boundary in question appears to have run; and it is very possible that, from the ascent of Adummim, Gilgal appeared through one of these gaps in the distance, "over against" the spectator, and thus furnished a point by which to indicate the direction of the line at that part.

But though Geliloth does not again appear in the A. V., it is found in the original bearing a peculiar topographical sense. The following extract from the Appendix to Professor Stanley's *S. & P.* (1st edit.) § 13, contains all that can be said on the point: "This word is derived from a root גָּלַל, 'to roll' (Gesen. *Thes.* p. 287 *b.*). Of the five times in which it occurs in Scripture, two are in the general sense of boundary or border: Josh. xiii. 2, 'All the *borders* of the Philistines' (ὅρια); Joel iii. 4, 'All the *coasts* of Palestine' (Γαλιλαία ἀλλοφύλων); and three specially relate to the course of the Jordan: Josh. xxii. 10, 11, 'The *borders* of Jordan' (Γαλαὰδ τοῦ Ἰορδάνου); Ez. xlvii. 8, 'The east *country*' (εἰς τὴν Γαλιλαίαν). It has been pointed out in ch. vii. p. 278 note, that this word is analogous to the Scotch term 'links,' which has both the meanings of Geliloth, being used of the snake-like windings of a stream, as well as with the derived meaning of a coast or shore. Thus Geliloth is distinguished from *Ciccar*, which will rather mean the circle of vegetation or dwellings gathered round the bends and reaches of the river."

It will not be overlooked that the place Geliloth, noticed above, is in the neighborhood of the Jordan. G.

GEMAL'LI (גְּמַלִּי [*camel-owner* or *camel-keeper*]: Γαμαλί; [Vat. Γαμαι:] *Gemalli*), the father of Ammiel, who was the "ruler" (*Nasi*) of Dan, chosen to represent that tribe among the spies who explored the land of Canaan (Num. xiii. 12).

GEMARI'AH (גְּמַרְיָה [*Jehovah requites*]. Γαμαρίας; [Vat. vv. 10, 11, -ρει-:]: *Gamarias*). 1. Son of Shaphan the scribe, and father of Michaiah. He was one of the nobles of Judah, and had a chamber in the house of the Lord, from which (or from a window in which, Prideaux, Michaelis) Baruch read Jeremiah's alarming prophecy in the ears of all the people, B. C. 606 (Jer. xxxvi [10–12, 25]). Gemariah with the other princes

heard the Divine message with terror but without a sign of repentance: though Gemariah joined two others in intreating king Jehoiakim to forbear destroying the roll which they had taken from Baruch.

2. Son of Hilkiah, being sent B. C. 597 by king Zedekiah on an embassy to Nebuchadnezzar at Babylon, was made the bearer of Jeremiah's letter to the captive Jews (Jer. xxix.). W. T. B.

GEMS. [STONES, PRECIOUS.]

GENEALOGY (Γενεαλογία), literally the act or art of the γενεαλόγος, *i. e.* of him who treats of birth and family, and reckons descents and generations. Hence by an easy transition it is often (like ἱστορία) used of the document itself in which such series of generations is set down. In Hebrew the term for a genealogy or pedigree is סֵפֶר הַיַּחַשׂ, and סֵפֶר תּוֹלְדוֹת, "the book of the generations;" and because the oldest histories were usually drawn up on a genealogical basis, the expression often extended to the whole history, as is the case with the Gospel of St. Matthew, where "the book of the generation of Jesus Christ" includes the whole history contained in that Gospel. So Gen. ii. 4, "These are the generations of the heavens and of the earth," seems to be the title of the history which follows. Gen. v. 1, vi. 9, x. 1, xi. 10, 27, xxv. 12, 19, xxxvi. 1, 9, xxxvii. 2, are other examples of the same usage, and these passages seem to mark the existence of separate histories from which the book of Genesis was compiled. Nor is this genealogical form of history peculiar to the Hebrews, or the Semitic races. The earliest Greek histories were also genealogies. Thus the histories of Acusilaus of Argos and of Hecataeus of Miletus were entitled Γενεαλογίαι, and the fragments remaining of Xanthus, Charon of Lampsacus, and Hellanicus, are strongly tinged with the same genealogical element,[a] which is not lost even in the pages of Herodotus. The frequent use of the patronymic in Greek, the stories of particular races, as Heraclidae, Alcmaeonidae, &c., the lists of priests, and kings, and conquerors at the Games, preserved at Elis, Sparta, Olympia, and elsewhere; the hereditary monarchies and priesthoods, as of the Branchidae, Eumolpidae, &c., in so many cities in Greece and Greek Asia; the division, as old as Homer, into tribes, *fratriae*, and γένη, and the existence of the *tribe*, the *gens*, and the *familia* among the Romans; the Celtic clans, the Saxon families using a common patronymic, and their royal genealogies running back to the Teutonic gods, these are among the many instances that may be cited to prove the strong family and genealogical instinct of the ancient world. Coming nearer to the Israelites, it will be enough to allude to the hereditary principle, and the vast genealogical records of the Egyptians, as regards their kings and priests, and to the passion for genealogies among the Arabs, mentioned by Layard and others, in order to show that the attention paid by the Jews to genealogies is in entire accordance with the manners and tendencies of their contemporaries. In their case, however, it was heightened by several peculiar circumstances. The promise of the land of Canaan to the seed of Abraham, Isaac, and Jacob successively, and the separation of the Israelites from the Gentile world; the expectation of Messiah as to spring from the tribe of Judah; the exclusively hereditary priesthood of Aaron with its dignity and emoluments; the long succession of kings in the line of David; and the whole division and occupation of the land upon genealogical principles by the tribes, families, and houses of fathers, gave a deeper importance to the science of genealogy among the Jews than perhaps any other nation. We have already noted the evidence of the existence of family memoirs even before the flood, to which we are probably indebted for the genealogies in Gen. iv., v.; and Gen x., xi., &c., indicate the continuance of the same system in the times between the flood and Abraham. But with Jacob, the founder of the nation, the system of reckoning by genealogies (הִתְיַחֵשׂ, or in the language of Moses, Num. i. 18, הִתְיַלֵּד) was much further developed. In Gen. xxxv. 22–26 we have a formal account of the sons of Jacob, the patriarchs of the nation, repeated in Ex. i. 1–5. In Gen. xlvi. we have an exact genealogical census of the house of Israel at the time of Jacob's going down to Egypt. The way in which the former part of this census, relating to Reuben and Simeon, is quoted in Ex. vi., where the census of the tribe of Levi is all that was wanted, seems to show that it was transcribed from an existing document. When the Israelites were in the wilderness of Sinai, in the second month of the second year of the Exodus, their number was taken by Divine command, "after their families, by the house of their fathers," tribe by tribe, and the number of each tribe is given "by their generations, after their families, by the house of their fathers, according to the number of the names, by their polls," Num. i., iii. This census was repeated 38 years afterwards, and the names of the families added, as we find in Num. xxvi. According to these genealogical divisions they pitched their tents, and marched, and offered their gifts and offerings, and chose the spies. According to the same they cast the lots by which the troubler of Israel, Achan, was discovered, as later those by which Saul was called to the throne. Above all, according to these divisions, the whole land of Canaan was parcelled out amongst them. But now of necessity that took place which always has taken place with respect to such genealogical arrangements, namely, that by marriage, or servitude, or incorporation as friends and allies, persons not strictly belonging by birth to such or such a family or tribe, were yet reckoned in the census as belonging to them, when they had acquired property within their borders, and were liable to the various services in peace or war which were performed under the heads of such tribes and families. Nobody supposes that all the Cornelii, or all the Campbells, sprang from one ancestor, and it is in the teeth of direct evidence from Scripture, as well as of probability, to suppose that the Jewish tribes contained absolutely none but such as were descended from the twelve patriarchs.[b] The tribe of Levi was probably the only one which had no admixture of foreign blood. In many of the Scripture genealogies, as *e. g.* those of Caleb, Joab,

[a] Ὅσα Ἑλλάνικος Ἀκουσιλάῳ περὶ τῶν γενεαλογιῶν διαφώνηκεν (Joseph. *c. Apion.* i. 3).

[b] Jul. Africanus, in his *Ep. to Aristides*, expressly mentions that the ancient genealogical records at Jerusalem included those who were descended from proselytes, and γειῶραι, as well as those who sprang from the patriarchs. The registers in Ezra and Nehemiah include the Nethinim, and the children of Solomon's servants.

Digitized by Google

Rechab, and the sons of Rephaiah, &c., in 1 Chr. iii. 21, it is quite clear that birth was not the ground of their incorporation into their respective tribes. [BECHER; CALKB.] However, birth was, and continued to be throughout their whole national course, the *foundation* of all the Jewish organization, and the reigns of the more active and able kings and rulers were marked by attention to genealogical operations. When David established the temple services on the footing which continued till the time of Christ, he divided the priests and Levites into courses and companies, each under the family chief. The singers, the porters, the trumpeters, the players on instruments, were all thus genealogically distributed. In the active stirring reign of Rehoboam, we have the work of Iddo concerning genealogies (2 Chr. xii. 15). When Hezekiah reopened the temple, and restored the temple services which had fallen into disuse, he reckoned the whole nation by genealogies. This appears from the fact of many of the genealogies in Chronicles terminating in Hezekiah's reign [AZARIAH, 5], from the expression "So all Israel were reckoned by genealogies" (1 Chr. ix. 1), immediately following genealogies which do so terminate, and from the narrative in 2 Chr. xxxi. 16–19 proving that, as regards the priests and Levites, such a complete census was taken by Hezekiah. It is indicated also in 1 Chr. iv. 41. We learn too incidentally from Prov. xxv. that Hezekiah had a staff of scribes, who would be equally useful in transcribing genealogical registers as in copying out Proverbs. So also in the reign of Jotham king of Judah, who among other great works built the higher gate of the house of the Lord (2 K. xv. 35), and was an energetic as well as a good king, we find a genealogical reckoning of the Reubenites (1 Chr. v. 17), probably in connection with Jotham's wars against the Ammonites (2 Chr. xxvii. 5). When Zerubbabel brought back the Captivity from Babylon, one of his first cares seems to have been to take a census of those that returned, and to settle them according to their genealogies. The evidence of this is found in 1 Chr. ix., and the duplicate passage Neh. xi.; in 1 Chr. iii. 19; and yet more distinctly in Neh. vii. 5, and xii. In like manner Nehemiah, as an essential part of that national restoration which he labored so zealously to promote, gathered "together the nobles, and the rulers, and the people, that they might be reckoned by genealogy," Neh. vii. 5, xii. 26. The abstract of this census is preserved in Ezra ii. and Neh. vii., and a portion of it in 1 Chr. iii. 21–24. That this system was continued after their times, as far at least as the priests and Levites were concerned, we learn from Neh. xii. 22; and we have incidental evidence of the continued care of the Jews still later to preserve their genealogies, in such passages of the apocryphal books as 1 Macc. ii. 1–5, viii. 17, xiv. 29, and perhaps Judith viii. 1; Tob. i. 1, &c. Passing on to the time of the birth of Christ, we have a striking incidental proof of the continuance of the Jewish genealogical economy in the fact that when Augustus ordered the census of the empire to be taken, the Jews in the province of Syria immediately went each one to his own city, *i. e.* (as is clear from Joseph going to Bethlehem the city of David), to the city to which his tribe, family, and father's house belonged. So that the return, if completed, doubtless exhibited the form of the old censuses taken by the kings of Israel and Judah.

Another proof is the existence of our Lord's genealogy in two forms as given by St Matthew and St. Luke. [GENEALOGY OF CHRIST.]. The mention of Zacharias, as "of the course of Abia," of Elizabeth, as "of the daughters of Aaron," and of Anna the daughter of Phanuel, as "of the tribe of Aser," are further indications of the same thing. And this conclusion is expressly confirmed by the testimony of Josephus in the opening of his *Life*. There, after deducing his own descent, "not only from that race which is considered the noblest among the Jews, that of the priests, but from the first of the 24 courses" (the course of Jehoiarib), and on the mother's side from the Asmonean sovereigns, he adds, "I have thus traced my genealogy, as I have found it recorded in the public tables" (*ἐν ταῖς δημοσίαις δέλτοις ἀναγεγραμμένην*); and again, *Contr. Apion* i. § 7, he states that the priests were obliged to verify the descent of their intended wives by reference to the archives kept at Jerusalem; adding that it was the duty of the priests after every war (and he specifies the wars of Antiochus Epiph., Pompey, and Q. Varus), to make new genealogical tables from the old ones, and to ascertain what women among the priestly families had been made prisoners, as all such were deemed improper to be wives of priests. As a proof of the care of the Jews in such matters he further mentions that in his day the list of successive high priests preserved in the public records extended through a period of 2000 years. From all this it is abundantly manifest that the Jewish genealogical records continued to be kept till near the destruction of Jerusalem. Hence we are constrained to disbelieve the story told by Africanus concerning the destruction of all the Jewish genealogies by Herod the Great, in order to conceal the ignobleness of his own origin. His statement is, that up to that time the Hebrew genealogies had been preserved entire, and the different families were traced up either to the patriarchs, or the first proselytes, or the *γειῶραι* or mixed people. But that on Herod's causing these genealogies to be burnt, only a few of the more illustrious Jews who had private pedigrees of their own, or who could supply the lost genealogies from memory, or from the books of chronicles, were able to retain any account of their own lineage — among whom he says were the Despoayni, or brethren of our Lord, from whom was said to be derived the scheme (given by Africanus) for reconciling the two genealogies of Christ But there can be little doubt that the registers of the Jewish tribes and families perished at the destruction of Jerusalem, and not before. Some partial records may, however, have survived that event, as it is probable, and indeed seems to be implied in Josephus's statement, that at least the priestly families of the dispersion had records of their own genealogy. We learn too from Benjamin of Tudela, that in his day the princes of the Captivity professed to trace their descent to David, and he also names others, *e. g.* R. Calonymos, "a descendant of the house of David, as proved by his pedigree." vol. i. p. 32, and R. Eleazar Ben Tsemach, "who possesses a pedigree of his descent from the prophet Samuel, and knows the melodies which were sung in the temple during its existence," *ib.* p. 100, &c. He also mentions descendants of the tribes of Dan, Zabulon, and Naphtali, among the mountains of Khasvin, whose prince was of the tribe of Levi The patriarchs of Jerusalem, so called from the Hebrew רֹאשׁ אָבוֹת, claimed descent from Hillel

be Babylonian, of whom it is said that a genealogy, found at Jerusalem, declared his descent from David and Abital. Others, however, traced his descent from Benjamin, and from David only through a daughter of Shephatiah[a] (Wolf, *B. H.* iv. 580). But however tradition may have preserved for a while true genealogies, or imagination and pride have coined fictitious ones, after the destruction of Jerusalem, it may be safely affirmed that the Jewish genealogical system then came to an end. Essentially connected as it was with the tenure of the land on the one hand, and with the peculiar privileges of the houses of David and Levi on the other, it naturally failed when the land was taken away from the Jewish race, and when the promise to David was fulfilled, and the priesthood of Aaron superseded by the exaltation of Christ to the right hand of God. The remains of the genealogical *spirit* among the later Jews (which might of course be much more fully illustrated from Rabbinical literature) has only been glanced at to show how deeply it had penetrated into the Jewish national mind.[b] It remains to be said that just notions of the nature of the Jewish genealogical records are of great importance with a view to the right interpretation of Scripture. Let it only be remembered that these records have respect to political and territorial divisions, as much as to strictly genealogical descent, and it will at once be seen how erroneous a conclusion it may be, that all who are called "sons" of such or such a patriarch, or chief father, must necessarily be his very children. Just as in the very first division into tribes Manasseh and Ephraim were numbered with their uncles, as if they had been sons instead of grandsons (Gen. xlviii. 5) of Jacob, so afterwards the names of persons belonging to different generations would often stand side by side as heads of families or houses, and be called the sons of their common ancestor. For example, Gen. xlvi. 21 contains grandsons as well as sons of Benjamin [BELAH], and Ex. vi. 24 probably enumerates the son and grandson of Assir as heads, with their father, of the families of the Korhites. And so in innumerable instances. If any one family or house became extinct, some other would succeed to its place, called after its own chief father. Hence of course a census of any tribe drawn up at a later period would exhibit different divisions from one drawn up at an earlier. Compare, *e. g.*, the list of courses of priests in Zerubbabel's time (Neh. xii.), with that of those in David's time (1 Chr. xxiv.).[c] The same principle must be borne in mind in interpreting any particular genealogy. The sequence of generations may represent the succession to such or such an inheritance or headship of tribe or family, rather than the relationship of father and son.[d] Again, where a pedigree was abbreviated, it would naturally specify such generations as would indicate from what chief houses the person descended. In cases where a name was common the father's name would be added for distinction only. These reasons would be well understood at the time, though it may be difficult now to ascertain them positively. Thus in the pedigree of Ezra (Ezr. vii. 1–5), it would seem that both Seraiah and Azariah were heads of houses (Neh. x. 2); they are both therefore named. Hilkiah is named as having been high-priest, and his identity is established by the addition "the son of Shallum" (1 Chr. vi. 13); the next named is Zadok, the priest in David's time, who was chief of the 16 courses, sprung from Eleazar, and then follows a complete pedigree from this Zadok to Aaron. But then as regards the chronological use of the Scripture genealogies, it follows from the above view that great caution is necessary in using them as measures of time, though they are invaluable for this purpose whenever we can be sure that they are complete. What seems necessary to make them trustworthy measures of time is, either that they should have special internal marks of being complete, such as where the mother as well as the father is named, or some historical circumstance defines the several relationships, or, that there should be several genealogies, all giving the same number of generations within the same termini. When these conditions are found it is difficult to overrate the value of genealogies for chronology. In determining however the relation of generations to time, some allowance must be made for the station in life of the persons in question. From the early marriages of the princes, the average of even 30 years to a generation will probably be found too long for the kings.[e]

Another feature in the Scripture genealogies which it is worth while to notice is the recurrence of the same name, or modifications of the same name, such as Tobias, Tobit, Nathan, Mattatha, and even of names of the same signification, in the same family. This is an indication of the carefulness with which the Jews kept their pedigrees (as otherwise they could not have known the names of their remote ancestors); it also gives a clew by which to judge of obscure or doubtful genealogies.

The Jewish genealogies have two forms, one giving the generations in a descending, the other in an ascending scale. Examples of the descending form may be seen in Ruth iv. 18–22, or 1 Chr. iii. Of the ascending, 1 Chr. vi. 33–43 (A. V.); Ezr. vii. 1–5. The descending form is expressed by the formula A begat B, and B begat C, &c., or, the sons of A, B his son, C his son, &c.; or, the sons of A, B, C, D; and the sons of B, C, D, E; and the sons of C, E, F, G, &c. The ascending is always expressed in the same way. Of the two, it is obvious that the descending scale is the one in which we are most likely to find collateral descents, inasmuch as it implies that the object is

[a] Some further information on these modern Jewish genealogies is given in a note to p. 32 of Asher's *Benj. of Tudela*, vol. ii. p. 6.

[b] Thus in the Targum of Esther we have Haman's pedigree traced through 21 generations to the "impious Esau;" and Mordecai's through 42 generations to Abraham. The writer makes 33 generations from Abraham to King Saul!

[c] The Jews say that only 4 courses came back with Zerubbabel, and that they were subdivided into 24, having the rights of such courses as should return from captivity. See Selden, *Opp.* v. i. t. i. p. x.

[d] "The term 'son of' appears to have been used throughout the East in those days, as it still is, to denote connection generally, either by descent or succession" (Layard's *Nin. & Bab.* p. 618). The observation is to explain the inscription "Jehu the son of Omri."

[e] Mr. J. W. Bosanquet, in a paper read before the "Chronolog. Instit.," endeavors to show that a generation in Scripture language = 40 years; and that St Matthew's three divisions of 14 generations, consequently, equal each 560 years; a calculation which suits his chronological scheme exactly, by placing the Captivity in the year B. C. 563.

Digitized by Google

so enumerate the heirs of the person at the head of the stem; and if direct heirs failed at any point, collateral ones would have to be inserted. In all cases, too, where the original document was preserved, when the direct line failed, the heir would naturally place his own name next to his immediate predecessor, though that predecessor was not his father, but only his kinsman. Whereas in the ascending scale there can be no failure in the nature of things. But neither form is in itself more or less fit than the other to express either proper or imputed filiation.

Females are named in genealogies when there is any thing remarkable about them, or when any right or property is transmitted through them. See Gen. xi. 29, xxii. 23, xxv. 1–4, xxxv. 22–26; Ex. vi. 23; Num. xxvi. 33; 1 Chr. ii. 4, 19, 50, 35, &c.

The genealogical lists of names are peculiarly liable to corruptions of the text, and there are many such in the books of Chronicles, Ezra, &c. Jerome speaks of these corruptions having risen to a fearful height in the LXX.: "Sylvam nominum quæ scriptorum vitio confusa sunt." "Ita in Græc. et Lat. Codd. hic nominum liber vitiosus est, ut non tam Hebræa quam barbara quædam et Sarmatica nomina conjecta arbitrandum sit." "Sæpe tria nomina, subtractis è medio syllabis, in unum vocabulum cogunt, vel . . . unum nomen . . . in duo vel tria vocabula dividunt" (*Præfat. in Paraleip.*). In like manner the lists of high-priests in Josephus are so corrupt that the names are scarcely recognizable. This must be borne in mind in dealing with the genealogies.

The Bible genealogies give an unbroken descent of the house of David from the creation to the time of Christ. The registers at Jerusalem must have supplied the same to the priestly and many other families. They also inform us of the origin of most of the nations of the earth, and carry the genealogy of the Edomitish sovereigns down to about the time of Saul. Viewed as a whole, it is a genealogical collection of surpassing interest and accuracy. (Rawlinson's *Herod.* vol. i. ch. 2; Burrington's *Geneal. Tab.*; Selden's *Works*, passim; *Benj. of Tudela's Itin.*, by A. Asher.)

A. C. H.

* The late Prof. Auberlen has some thoughts on this subject of the "genealogies," particularly those in the book of Genesis, of which it may be well to remind the reader. He calls attention especially to the uses of such registers among the Hebrews, in whose minds it was so important to keep alive a consciousness of their mission as a national family, set apart for peculiar religious purposes. Such registers are "without doubt the oldest medium through which history was handed down among men. . . . Those in the first eleven chapters of Genesis are perhaps the most ancient examples, first of an oral, and then of a written tradition, that there are on earth. . . . They furnish the casting or framework of history, in the names and numbers of which they largely consist; but such data, it is to be remarked, are to the Oriental living things; they are to him as a gallery of family pictures, with which an ever fresh remembrance and oral tradition may connect many particulars which are not recorded. Of the transmission of such accessory facts, we have a remarkable instance in Gen. v. 21–24. The case of the Table of Nations, so called, in the tenth chapter of Genesis, shows how readily the genealogical register expands itself to historiography, genealogy to ethnography and ethnography to history (see Acts xvii. 26). This Table contains notices of the germinant organization of states and kingdoms with which history in its narrower sense begins." It is remarked as disclosing the main object and interest of "the genealogies," that they attach themselves almost exclusively to the line of descent from Adam, which contains the progenitors of the chosen race, of which in the fullness of time Christ was to be born, while as to Cain a few names only are mentioned, and soon the succession in that line is broken off altogether. Thus in Gen. xi. 10, the Messianic genealogy becomes distinct from the general or human genealogy; or, in other words, the human genealogy derives its importance from the Messianic. The significance of these registers, it is maintained, is to be mainly found in the recognition of this Messianic element which pervades them. See the full discussion in Auberlen's *Göttliche Offenbarung: ein apologetischer Versuch*, pp. 123–131 (trans. in the *Bibl. Sacra*, 1865, pp. 395–405). H.

GENEALOGY OF JESUS CHRIST.

The New Testament gives us the genealogy of but one person, that of our Saviour. The priesthood of Aaron having ceased, the possession of the land of Canaan being transferred to the Gentiles, there being under the N. T. dispensation no difference between circumcision and uncircumcision, barbarian and Scythian, bond and free, there is but One whose genealogy it concerns us as Christians to be acquainted with, that of our Lord Jesus Christ. Him the prophets announced as the seed of Abraham and the son of David, and the angel declared that to him should be given the throne of his father David, that he might reign over the house of Jacob for ever. His descent from David and Abraham being therefore an essential part of his Messiahship, it was right that his genealogy should be given as a portion of Gospel truth. Considering, further, that to the Jews first he was manifested and preached, and that his descent from David and Abraham was a matter of special interest to them, it seems likely that the proof of his descent would be one especially adapted to convince them; in other words that it would be drawn from documents which they deemed authentic. Such were the genealogical records preserved at Jerusalem. [GENEALOGY.] And when to the above considerations we add the fact that the lineage of Joseph was actually made out from authentic records for the purpose of the civil census ordered by Augustus, it becomes morally certain that the genealogy of Jesus Christ was extracted from the public registers. Another consideration adds yet further conviction. It has often excited surprise that the genealogies of Christ should both give the descent of Joseph, and not Mary. But if these genealogies were those contained in the public registers, it could not be otherwise. In them Jesus, the son of Mary, the espoused wife of Joseph, could only appear as Joseph's son (comp. John i. 45). In transferring them to the pages of the Gospels, the evangelists only added the qualifying expression "as was supposed" (Luke iii. 23, and its equivalent, Matt. i. 16).

But now to approach the difficulties with which the genealogies of Christ are thought to be beset. These difficulties have seemed so considerable in all ages as to drive commentators to very strange shifts. Some, as early as the second century, broached the notion, which Julius Africanus vigorously repud-

Digitized by Google

tion, that the genealogies are imaginary lists designed only to set forth the union of royal and priestly descent in Christ. Others, on the contrary, to silence this and similar solutions, brought in a "Deus ex machinâ," in the shape of a tradition derived from the Desposyni, in which by an ingenious application of the law of Levirate to *uterine* brothers, whose mother had married first into the house of Solomon, and afterwards into the house of Nathan, some of the discrepancies were reconciled, though the meeting of the two genealogies in Zerubbabel and Salathiel is wholly unaccounted for. Later, and chiefly among Protestant divines, the theory was invented of one genealogy being Joseph's and the other Mary's, a theory in direct contradiction to the plain letter of the Scripture narrative, and leaving untouched as many difficulties as it solves. The fertile invention of Annius of Viterbo forged a book in Philo's name, which accounted for the discrepancies by asserting that all Christ's ancestors, from David downwards, had two names. The circumstance, however, of one line running up to Solomon, and the other to Nathan, was overlooked. Other fanciful suggestions have been offered; while infidels, from Porphyry downwards, have seen in what they call the contradiction of Matthew and Luke a proof of the spuriousness of the Gospels; and critics like Professor Norton, a proof of such portions of Scripture being interpolated. Others, like Alford, content themselves with saying that solution is impossible, without further knowledge than we possess. But it is not too much to say that after all, in regard to the main points, there is no difficulty at all, if only the documents in question are dealt with reasonably, and after the analogy of similar Jewish documents in the O. T. — and that the clews to a right understanding of them are so patent, and so strongly marked, that it is surprising that so much diversity of opinion should have existed. The following propositions will explain the true construction of these genealogies: —

1. They are both the genealogies of Joseph, *i. e.* of Jesus Christ, as the reputed and legal son of Joseph and Mary. One has only to read them to be satisfied of this. The notices of Joseph as being of the house of David, by the same evangelists who give the pedigree, are an additional confirmation (Matt. i. 20; Luke i. 27, ii. 4, &c.), and if these pedigrees were extracted from the public archives, they must have been Joseph's.

2. The genealogy of St. Matthew is, as Grotius most truly and unhesitatingly asserted, Joseph's genealogy as legal successor to the throne of David, *i. e.* it exhibits the successive heirs of the kingdom ending with Christ, as Joseph's reputed son. St. Luke's is Joseph's private genealogy, exhibiting his real birth, as David's son, and thus showing why he was heir to Solomon's crown. This is capable of being almost demonstrated. If St. Matthew's genealogy had stood alone, and we had no further information on this subject than it affords, we might indeed have thought that it was a genealogical stem in the strictest sense of the word, exhibiting Joseph's forefathers in succession, from David downwards. But immediately we find a second genealogy of Joseph — that in St. Luke's Gospel — such is no longer a reasonable opinion. Because if St. Matthew's genealogy, tracing as it does the successive generations through the long line of Jewish kings, had been Joseph's real paternal stem, there could not possibly have been room for a second genealogy. The steps of ancestry coinciding with the steps of succession, one pedigree only could in the nature of things be proper. The mere existence, therefore, of a second pedigree, tracing Joseph's ancestry through private persons, by the side of one tracing it through kings, is in itself a proof that the latter is not the true stem of birth. When, with this clew, we examine St. Matthew's list, to discover whether it contains in itself any evidence as to when the lineal descent was broken, we fix at once upon Jechonias, who could not, we know, be literally the father of Salathiel, because the word of God by the mouth of Jeremiah had pronounced him *childless*, and declared that none of his seed should sit upon the throne of David, or rule in Judah (Jer. xxii. 30). The same thing had been declared concerning his father Jehoiakim in Jer. xxxvi. 30. Jechonias, therefore, could not be the father of Salathiel, nor could Christ spring either from him or his father. Here then we have the most striking confirmation of the justice of the inference drawn from finding a second genealogy, namely, that St. Matthew gives the *succession*, not the strict birth; and we conclude that the names after the childless Jechonias are those of his next heirs, as also in 1 Chr. iii. 17. One more look at the two genealogies convinces us that this conclusion is just; for we find that the two next names following Jechonias, Salathiel and Zorobabel, are actually taken from the other genealogy, which teaches us that Salathiel's real father was Neri, of the house of Nathan. It becomes, therefore, perfectly certain that Salathiel of the house of Nathan became heir to David's throne on the failure of Solomon's line in Jechonias, and that as such he and his descendants were transferred as "sons of Jeconiah" to the royal genealogical table, according to the principle of the Jewish law laid down Num. xxvii. 8–11. The two genealogies then coincide for two, or rather for four generations, as will be shown below. There then occur six names in St. Matthew, which are not found in St. Luke; and then once more the two genealogies coincide in the name of Matthan or Matthat (Matt i. 15; Luke iii. 24), to whom two different sons, Jacob and Heli, are assigned, but one and the same grandson and heir Joseph, the husband of Mary, and the reputed father of Jesus, who is called Christ. The simple and obvious explanation of this is, on the same principle as before, that Joseph was descended from Joseph, a younger son of Abiud (the Juda of Luke iii. 26), but that on the failure of the line of Abiud's eldest son in Eleazar, Joseph's grandfather Matthan became the heir; that Matthan had two sons, Jacob and Heli; that Jacob had no son, and consequently that Joseph, the son of his younger brother Heli, became heir to his uncle, and to the throne of David. Thus the simple principle that one evangelist exhibits that genealogy which contained the successive heirs to David's and Solomon's throne, while the other exhibits the paternal stem of him who was the heir, explains all the anomalies of the two pedigrees, their agreements as well as their discrepancies, and the circumstance of there being two at all. It must be added that not only does this theory explain all the phenomena, but that that portion of it which asserts that Luke gives Joseph's paternal stem receives a most remarkable confirmation from the names which compose that stem. For if we begin with Nathan, we find that his son, Mattatha, and four others, of whom the last was grandfather to Joseph, had names which are merely modifica-

Digitized by Google

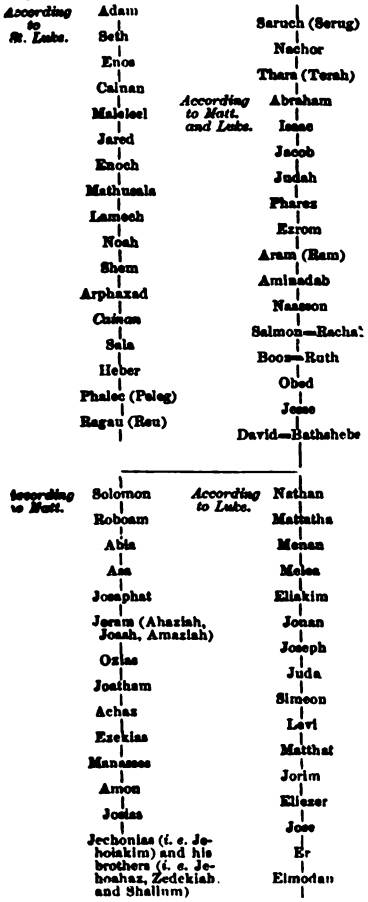
tions of Nathan (Matthat twice, and Mattathias twice); or, if we begin with Joseph, we shall find no less than three of his name between him and Nathan: an evidence, of the most convincing kind, that Joseph was lineally descended from Nathan in the way St. Luke represents him to be (comp. Zech. xii. 12).

3. Mary, the mother of Jesus, was in all probability the daughter of Jacob, and first cousin to Joseph her husband.[a] So that in point of *fact*, though not of *form*, both the genealogies are as much hers as her husband's.

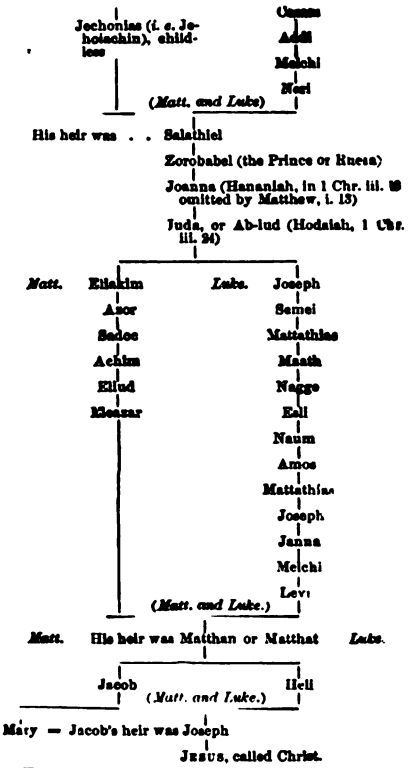
But besides these main difficulties, as they have been thought to be, there are several others which cannot be passed over in any account, however concise, of the genealogies of Christ. The most startling is the total discrepancy between them both and that of Zerubbabel in the O. T. (1 Chr. iii. 19–24). In this last, of seven sons of Zerubbabel not one bears the name, or any thing like the name, of Rhesa or Abiud. And of the next generation not one bears the name, or any thing like the name, of Eliakim or Joanna, which are in the corresponding generation in Matthew and Luke. Nor can any subsequent generations be identified. But this difference will be entirely got rid of, and a remarkable harmony established in its place, if we suppose Rhesa, who is named in St. Luke's Gospel as Zerubbabel's son, to have slipped into the text from the margin. *Rhesa* is in fact not a name at all, but it is the Chaldee title of the princes of the Captivity, who at the end of the second, and through the third century after Christ, rose to great eminence in the East, assumed the state of sovereigns, and were considered to be of the house of David. (See preceding article, p. 882 *b*.) These princes then were exactly what Zerubbabel was in his day. It is very probable, therefore, that this title, רֵישָׁא, *Rhesa*, should have been placed against the name of Zerubbabel by some early Christian Jew, and thence crept into the text. If this be so, St. Luke will then give Joanna, Ἰωαννᾶς, as the son of Zerubbabel. But Ἰωαννᾶς is the very same name as *Hananiah*, חֲנַנְיָה, the son of Zerubbabel according to 1 Chr. iii. 19. [HANANIAH.] In St. Matthew this generation is omitted. In the next generation we identify Matthew's Ab-jud (Abiud), אֲבִיהוּד, with Luke's Juda, in the Hebrew of that day יְהוּד (Jud), and both with Hodaiah, הוֹדַוְיָהוּ, of 1 Chr. iii. 24 (a name which is actually interchanged with Juda, יְהוּדָה, Ezr. iii. 9; Neh. xi. 9, compared with Ezr. ii. 40; 1 Chr. ix. 7), by the simple process of supposing the Shemaiah, שְׁמַעְיָה, of 1 Chr. iii. 22 to be the same person as the Shimei, שִׁמְעִי, of ver. 19: thus at the same time cutting off all those redundant generations which bring this genealogy in 1 Chr. iii. down some 200 years later than any other in the book, and long after the close of the canon.

The next difficulty is the difference in the number of generations between the two genealogies. St. Matthew's division into three fourteens gives us 42, while St. Luke, from Abraham to Christ inclusive, reckons 56, or, which is more to the point (since the generations between Abraham and David are the same in both genealogies), while St. Matthew reckons 28 from David to Christ, St. Luke reckons 43, or 42 without Rhesa. But the genealogy itself supplies the explanation. In the second tessarodecad, including the kings, we know that three generations are omitted — Ahaziah, Joash, Amaziah — in order to reduce the generations from 17 to 14: the difference between these 17 and the 19 of St. Luke being very small. So in like manner it is obvious that the generations have been abridged in the same way in the third division to keep to the number 14. The true number would be one much nearer St. Luke's 23 (22 without Rhesa), implying the omission of about seven generations in this last division. Dr. Mill has shown that it was a common practice with the Jews to distribute genealogies into divisions, each containing some favorite or mystical number, and that, in order to do this, generations were either repeated or left out. Thus in Philo the generations from Adam to Moses are divided into two decads and one hebdomad, by the repetition of Abraham. But in a Samaritan poem the very same series is divided into two decads only, by the omission of six of the least important names (*Vindication*, pp. 110–118).

Another difficulty is the apparent deficiency in the number of the last tessarodecad, which seems to contain only 13 names. But the explanation of this is, that either in the process of translation, or otherwise, the names of Jehoiakim and Jehoiachin have got confused and expressed by the one name Jechonias. For that Jechonias, in ver. 11, means Jehoiakim, while in ver. 12 it means Jehoiachin, is quite certain, as Jerome saw long ago. Jehoiachin had no brothers, but Jehoiakim had three brothers, of whom two at least sat upon the throne, if not three,[b] and were therefore named in the genealogy The two names are very commonly considered as the same, both by Greek and Latin writers, *e. g.* Clemens Alex., Ambrose, Africanus, Epiphanius, as well as the author of 1 Esdr. (i. 37, 43), and others. Irenæus also distinctly asserts that Joseph's genealogy, as given by St. Matthew, expresses both Joiakim and Jechonias. It seems that this identity of name has led to some corruption in the text of very early date, and that the clause Ἰεχονίας δὲ ἐγέννησε τὸν Ἰεχονίαν has fallen out between αὐτοῦ and ἐπὶ τῆς μετ. Βαβ., in ver. 11. The Cod. Vat. B contains the clause only after Βαβυλῶνος in ver. 12, where it seems less proper (see Alford's *Greek Test.*).



The last difficulty of sufficient importance to be mentioned here is a chronological one. In both the genealogies there are but three names between Salmon and David — Boaz, Obed, Jesse. But, according to the common chronology, from the entrance into Canaan (when Salmon was come to man's estate) to the birth of David was 405 years, or from that to 500 years and upwards. Now for about an equal period, from Solomon to Jehoiachin St. Luke's genealogy contains 20 names. Obviously, therefore, either the chronology or the genealogy is wrong. But it cannot be the genealogy (which is repeated four times over without any variation), because it is supported by *eight* other gen-



[a] Hippolytus of Thebes, in the 10th century, asserted that Mary was granddaughter of Matthan, but by her mother (Patritius, *Dissert.* ix. &c., *De the Jes. Christi*).

[b] See Jer. xxii. 11.

Digitized by Google

logies,[a] which all contain about the same number of generations from the Patriarchs to David as David's own line does: except that, as was to be expected from Judah, Boaz, and Jesse being all advanced in years at the time of the birth of their sons, David's line is one of the shortest. The number of generations in the genealogies referred to is 14 in five, 15 in two, and 11 in one, to correspond with the 11 in David's line. There are other genealogies where the series is not complete, but not one which contains more generations. It is the province therefore of Chronology to square its calculations to the genealogies. It must suffice here to assert that the shortening the interval between the Exodus and David by about 200 years, which brings it to the length indicated by the genealogies, does in the most remarkable manner bring Israelitish history into harmony with Egyptian, with the traditional Jewish date of the Exodus, with the fragment of Edomitish history preserved in Gen. xxxvi. 31–39, and with the internal evidence of the Israelitish history itself. The following pedigree will exhibit the successive generations as given by the two Evangelists: —

Thus it will be seen that the whole number of generations from Adam to Christ, both inclusive, is 74, without the second Cainan and Rhesa. Including these two, and adding the name of God, Augustine reckoned 77, and thought the number typical of the forgiveness of all sins in baptism by Him who was thus born in the 77th generation, alluding to Matt. xviii. 22; with many other wonderful speculations on the hidden meaning of the numbers 3, 4, 7, 10, 11, and their additions and multiplications (*Quæst. Evang.*, l. ii. c. 6). Irenæus, who probably, like Africanus and Eusebius, omitted Matthat and Levi, reckoned 72 generations, which he connected with the 72 nations, into which, according to Gen. x. (LXX.), mankind was divided, and so other fathers likewise.

For an account of the different explanations that have been given, both by ancient and modern commentators, the reader may refer to the elaborate Dissertation of Patritius in his 2d vol. *De Evangeliis*; who, however, does not contribute much to elucidate the difficulties of the case. The opinions advanced in the foregoing article are fully discussed in the writer's work on the *Genealogies of our Lord Jesus Christ*; and much valuable matter will be found in Dr. Mills' *Vindication of the Genealogies*, and in Grotius's note on Luke iii. 23. Other treatises are Gomarus, *De Geneal. Christi*; Hottinger, *Dissert. duæ de Geneal. Christi*; G. G. Voss, *De J. Chr. Geneal.*; Yardley, *On the Geneal. of J. Chr.*, &c.

GENERATION. 1. *Abstract.* — Time, either definite or indefinite. The primary meaning of the Heb. דּוֹר is revolution; hence *period* of time: comp. περίοδος, ἐνιαυτός, and *annus*. From the general idea of a period comes the more special notion of an age or generation of men, the ordinary period of human life. In this point of view the history of the word seems to be directly contrasted with that of the Lat. *seculum;* which, starting with the idea of breed, or race, acquired the secondary signification of a definite period of time (Censorin. *de Die Nat.* c. 17).

In the long-lived Patriarchal age a generation seems to have been computed at 100 years (Gen. xv. 16; comp. 13, and Ex. xii. 40); the later reckoning, however, was the same which has been adopted by other civilized nations, namely, from thirty to forty years (Job xlii. 16). For *generation* in the sense of a *definite* period of time, see Gen. xv. 16; Deut. xxiii. 3, 4, 8, &c.

As an indefinite period of time: for time *past* see Deut. xxxii. 7; Is. lviii. 12; for time *future* see Ps. xlv. 17, lxxii. 5, &c.

2. *Concrete.* — The men of an age, or time. So generation = *contemporaries* (Gen. vi. 9; Is. liii. 8; see Lowth *ad loc.;* Ges. *Lex.;* better than "æterna generatio," or "multitudo creditura"); *posterity*, especially in legal formulæ (Lev. iii. 17, &c.); *fathers*, or *ancestors* (Ps. xlix. 19; Rosenm. *Schol.* ad loc.; comp. 2 Chr. xxxiv. 28). Dropping the idea of time, generation comes to mean a *race*, or *class* of men; *e. g.* of the righteous (Ps. xiv. 5, &c.): of the wicked (Deut. xxxii. 5; Jer. vii. 29, where "generation of his wrath" = against which God is angry).

In A. V. of N. Test. three words are rendered by *generation:* —

(1.) Γένεσις, properly *generatio;* but in Matt. i. 1 βίβλος γενέσεως = סֵפֶר תּוֹלְדוֹת = a genealogical scheme. (2.) Γεννήματα, pl. of γέννημα, Matt. iii. 7, &c., A. V. *generation;* more properly *brood* [*of vipers*], as the result of generation in its primary sense (3.) Γενεά in most of its uses corresponds with the Heb. דּוֹר [see above].

For the abstract and indefinite, see Luke i. 50; Eph. iii. 21 (A. V. "ages"), *future:* Acts xv. 21 (A. V. "of old time"), Eph. iii. 5 (A. V. "ages"), *past.* For concrete, see Matt. xi. 16.

For generation without reference to time, see Luke xvi. 8, "in their generation" [A. V.], *i. e.* in their disposition, "indoles, ingenium, et ratio hominum,"[a] (Schleusn.): in Matt. i. 17, "all the generations;" either *concrete* use, sc. "familiæ sibi invicem succedentes;" or *abstract* and *definite*, according to the view which may be taken of the difficulties connected with the genealogies of our Lord. [GENEALOGY.] T. E. B.

• **GENERATION or GENERATIONS,** as the translation of תּוֹלְדוֹת or γένεσις, has these secondary meanings in the A. V.: first, a genealogical register (as Gen. v. 1); second, a family history (Gen. vi. 9, xxv. 19, etc.), since early history among the Orientals is drawn so much from genealogical registers; and third, a history of the origin of things as well as persons, *e. g.* of the earth (Gen. ii. 4). H.

GENES'ARETH. In this form the name appears in the edition of the A. V. of 1611, in Mark vi. 53 and Luke v. 1, following the spelling of the Vulgate. In Matt. xiv. 34, where the Vulg. has *Genesar*, the A. V. originally followed the Received Greek Text — Genesaret. The oldest MSS have, however, Γεννησαρέτ in each of the three places. [GENNESARET.]

GEN'ESIS (בְּרֵאשִׁית: Γένεσις: *Genesis*; called also by the later Jews סֵפֶר יְצִירָה), the first book of the Law or Pentateuch.

A. The book of Genesis has an interest and an importance to which no other document of antiquity can pretend. If not absolutely the oldest book in the world, it is the oldest which lays any claim to being a trustworthy history. There may be some papyrus-rolls in our Museums which were written in Egypt about the same time that the genealogies of the Semitic race were so carefully collected in the tents of the Patriarchs. But these rolls at best contain barren registers of little service to the historian. It is said that there are fragments of Chinese literature which in their present form date back as far as 2200 years B. C., and even more.[b] But they are either calendars containing astronomical calculations, or records of merely local or temporary interest. Genesis, on the contrary, is rich in details respecting other races besides the race to which it more immediately belongs. And the Jewish pedigrees there so studiously preserved are but the scaffolding whereon is reared a temple of universal history.

If the religious books of other nations make any pretensions to vie with it in antiquity, in all other respects they are immeasurably inferior. The Mantras, the oldest portions of the Vedas, are, it would seem, as old as the fourteenth century B. C.[c] The Zendavesta, in the opinion of competent scholars, is of very much more modern date. Of the Chinese sacred books, the oldest, the Yih-king, is undoubtedly of a venerable antiquity, but it is not certain that it was a religious book at all; while the writings attributed to Confucius are certainly not earlier than the sixth century B. C.[d]

But Genesis is neither like the Vedas, a collection of hymns more or less sublime; nor like the Zendavesta, a philosophic speculation on the origin of all things, nor like the Yih-king, an unintelligible jumble whose expositors could twist it from a cosmological essay into a standard treatise on ethical philosophy.[e] It is a history, and it is a religious history. The earlier portion of the book, so far as the end of the eleventh chapter, may be properly termed a history of the world; the latter is a history of the fathers of the Jewish race. But from first to last it is a religious history: it begins with the creation of the world and of man; it tells of the early happiness of a Paradise in which God spake with man; of the first sin and its consequences; of the promise of Redemption; of the gigantic growth of sin, and the judgment of the Flood; of a new earth, and a new covenant with

[a] • Meyer (*in loc.*) takes the Greek expression as meaning "in respect to their own race," *i. e.* their kindredship in a moral sense. The worldly in their dealings with each other are wiser in worldly things than the children of light in spiritual things. H.

man, its unchangeableness typified by the bow in the heavens; of the dispersion of the human race over the world. And then it passes to the story of Redemption; to the promise given to Abraham, and renewed to Isaac and to Jacob, and to all that chain of circumstances which paved the way for the great symbolic act of Redemption, when with a mighty hand and a stretched out arm Jehovah brought his people out of Egypt.

It is very important to bear in mind this religious aspect of the history if we would put ourselves in a position rightly to understand it. Of course the facts must be treated like any other historical facts, sifted in the same way, and subjected to the same laws of evidence. But if we would judge of the work as a whole we must not forget the evident aim of the writer. It is only in this way we can understand, for instance, why the history of the Fall is given with so much minuteness of detail, whereas of whole generations of men we have nothing but a bare catalogue. And only in this way can we account for the fact that by far the greater portion of the book is occupied not with the fortunes of nations, but with the biographies of the three patriarchs. For it was to Abraham, to Isaac, and to Jacob that God revealed himself. It was to them that the promise was given, which was to be the hope of Israel till "the fullness of the time" should come. And hence to these wandering sheikhs attaches a grandeur and an interest greater than that of the Babels and Nimrods of the world. The minutest circumstances of their lives are worthier to be chronicled than the rise and fall of empires. And this not merely from the patriotic feeling of the writer as a Jew, but from his religious feeling as one of the chosen race. He lived in the land given to the fathers; he looked for the seed promised to the fathers, in whom himself and all the families of the earth should be blessed.

B. *Unity and Design.* — That a distinct plan and method characterize the work is now generally admitted. This is acknowledged in fact quite as much by those who contend for, as by those who deny the existence of different documents in the book. Ewald and Tuch are no less decided advocates of the unity of Genesis, so far as its plan is concerned, than Ranke or Hengstenberg. Ewald indeed (in his *Composition der Genesis*) was the first who established it satisfactorily, and clearly pointed out the principle on which it rests.

What, then, is the plan of the writer? First, we must bear in mind that Genesis is after all but a portion of a larger work. The five books of the Pentateuch form a consecutive whole: they are not merely a collection of ancient fragments loosely strung together, but, as we shall prove elsewhere, a well-digested and connected composition. [PENTATEUCH.]

The great subject of this history is the establishment of the Theocracy. Its central point is the giving of the Law on Sinai, and the solemn covenant there ratified, whereby the Jewish nation was constituted "a kingdom of priests and a holy nation to Jehovah." With reference to this great central fact all the rest of the narrative is grouped.

Israel is the people of God. God rules in the midst of them, having chosen them to himself. But a nation must have laws, therefore He gives them a law; and, in virtue of their peculiar relationship to God, this body of laws is both religious and political, defining their duty to God as well as their duty to their neighbor. Further, a nation must have a land, and the promise of the land and the preparation for its possession are all along kept in view.

The book of Genesis then (with the first chapters of Exodus) describes the steps which led to the establishment of the Theocracy. In reading it we must remember that it is but a part of a more extended work; and we must also bear in mind these two prominent ideas, which give a characteristic unity to the whole composition, namely, the people of God, and the promised land.

We shall then observe that the history of Abraham holds the same relation to the other portions of Genesis, which the giving of the Law does to the entire Pentateuch. Abraham is the father of the Jewish *Nation:* to Abraham the *Land* of Canaan is first given in promise. Isaac and Jacob, though also prominent figures in the narrative, yet do but inherit the promise as Abraham's children, and Jacob especially is the chief connecting link in the chain of events which leads finally to the possession of the land of Canaan. In like manner the former section of the book is written with the same obvious purpose. It is a part of the writer's plan to tell us what the divine preparation of the world was in order to show, first, the significance of the call of Abraham, and next, the true nature of the Jewish theocracy. He does not (as Tuch asserts) work backwards from Abraham, till he comes in spite of himself to the beginning of all things. He does not ask, Who was Abraham? answering, of the posterity of Shem; and who was Shem? a son of Noah; and who was Noah? etc. But he begins with the creation of the world, because the God who created the world and the God who revealed himself to the fathers is the same God. Jehovah, who commanded his people to keep holy the seventh day, was the same God who in six days created the heavens and the earth, and rested on the seventh day from all his work. The God who, when man had fallen, visited him in mercy, and gave him a promise of redemption and victory, is the God who sent Moses to deliver his people out of Egypt. He who made a covenant with Noah, and through him with "all the families of the earth," is the God who also made himself known as the God of Abraham, of Isaac, and of Jacob. In a word, creation and redemption are eternally linked together. This is the idea which in fact gives its shape to the history, although its distinct enunciation is reserved for the N. T. There we learn that all things were created by and for Christ, and that in him all things consist (Col. i. 16, 17), and that by the church is made known unto principalities and powers the manifold wisdom of God. It would be impossible, therefore, for a book which tells us of the beginning of the church, not to tell us also of the beginning of the world.

The book of Genesis has thus a character at once special and universal. It embraces the world; it speaks of God as the God of the whole human race. But as the introduction to Jewish history, it makes the universal interest subordinate to the national. Its design is to show how God revealed himself to the first fathers of the Jewish race, in order that he might make to himself a nation who should be his witnesses in the midst of the earth. This is the inner principle of unity which pervades the book. Its external framework we are now to examine. Five principal persons are the pillars, as to speak, on which the whole superstructure rests: Adam, Noah, Abraham, Isaac, and Jacob.

Digitized by Google

I. *Adam.* — The creation of the world, and the earliest history of mankind (ch. i.–iii.). As yet, no divergence of the different families of man.

II. *Noah.* — The history of Adam's descendants to the death of Noah (iv.–ix.). — Here we have (1) the line of Cain branching off while the history follows the fortunes of Seth, whose descendants are (2) traced in genealogical succession, and in an unbroken line as far as Noah, and (3) the history of Noah himself (vi.–ix.), continued to his death.

III. *Abraham.* — Noah's posterity till the death of Abraham (x.–xxv. 18). — Here we have (1) the peopling of the whole earth by the descendants of Noah's three sons (xi. 1–9). The history of two of these is then dropped, and (2) the line of Shem only pursued (xi. 10–32) as far as Terah and Abraham, where the genealogical table breaks off. (3) Abraham is now the prominent figure (xii.–xxv. 18). But as Terah had two other sons, Nahor and Haran (xi. 27), some notices respecting their families are added. Lot's migration with Abraham into the land of Canaan is mentioned, as well as the fact that he was the father of Moab and Ammon (xix. 37, 38), nations whose later history was intimately connected with that of the posterity of Abraham. Nahor remained in Mesopotamia, but his family is briefly enumerated (xxii. 20–24), chiefly no doubt for Rebekah's sake, who was afterwards the wife of Isaac. Of Abraham's own children, there branches off first the line of Ishmael (xxi. 9, &c.), and next the children by Keturah; and the genealogical notices of these two branches of his posterity are apparently brought together (xxv. 1–6, and xxv. 12–18), in order that, being here severally dismissed at the end of Abraham's life, the main stream of the narrative may flow in the channel of Isaac's fortunes.

IV. *Isaac.* — Isaac's life (xxv. 19–xxxv. 29), a life in itself retiring and uneventful. But in his sons the final separation takes place, leaving the field clear for the great story of the chosen seed. Even when Nahor's family comes on the scene, as it does in ch. xxix., we hear only so much of it as is necessary to throw light on Jacob's history.

V. *Jacob.* — The history of Jacob and Joseph (xxxvi.–l.). — Here, after Isaac's death, we have (1) the genealogy of Esau, xxxvi., who then drops out of the narrative in order that (2) the history of the patriarchs may be carried on without intermission to the death of Joseph (xxxvii.–l.).

Thus it will be seen that a specific plan is preserved throughout. The main purpose is never forgotten. God's relation to Israel holds the first place in the writer's mind. It is this which it is his object to convey. The history of that chosen seed who were the heirs of the promise, and the guardians of the divine oracles, is the only history which interprets man's relation to God. By its light all others shine, and may be read when the time shall come. Meanwhile, as the different families drop off here and there from the principal stock, their course is briefly indicated. A hint is given of their parentage and their migrations; and then the narrative returns to its regular channel. Thus the whole book may be compared to one of those vast American rivers which, instead of being fed by tributaries, send off here and there certain lesser streams or bayous, as they are termed, the main current meanwhile flowing on with its great mass of water to the sea.

Beyond all doubt then, we may trace in the book of Genesis in its present form a systematic plan. It is no hasty compilation, no mere collection of ancient fragments without order or arrangement. It coheres by an internal principle of unity. Its whole structure presents a very definite and clearly marked outline. But does it follow from this that the book, as it at present stands, is the work of a single author?

C. *Integrity.* — This is the next question we have to consider. Granting that this unity of design, which we have already noticed, leads to the conclusion that the work must have been by the same hand, are there any reasons for supposing that the author availed himself in its composition of earlier documents? and if so, are we still able by critical investigation to ascertain where they have been introduced into the body of the work?

1. Now it is almost impossible to read the book of Genesis with anything like a critical eye without being struck with the great peculiarities of style and language which certain portions of it present. Thus, for instance, chap. ii. 3–iii. 24 is quite different both from chap. i. and from chap. iv. Again, chap. xiv. and (according to Jahn) chap. xxiii. are evidently separate documents transplanted in their original form without correction or modification into the existing work. In fact there is nothing like uniformity of style till we come to the history of Joseph.

2. We are led to the same conclusion by the *inscriptions* which are prefixed to certain sections, as ii. 4, v. 1, vi. 9, x. 1, xi. 10, 27, and seem to indicate so many older documents.

3. Lastly, the distinct use of the Divine names, *Jehovah* in some sections, and *Elohim* in others, is characteristic of two different writers; and other peculiarities of diction, it has been observed, fall in with this usage, and go far to establish the theory. All this is quite in harmony with what we might have expected *à priori*, namely, that if Moses or any later writer were the author of the book he would have availed himself of existing traditions either oral or written. That they *might have been* written is now established beyond all doubt, the art of writing having been proved to be much earlier than Moses. That they *were* written we infer from the book itself.

Astruc, a Belgian physician, was the first who broached the theory that Genesis was based on a collection of older documents. [PENTATEUCH.] Of these he professed to point out as many as twelve, the use of the Divine names, however, having in the first instance suggested the distinction. Subsequently Eichhorn adopted this theory, so far as to admit that two documents, the one Elohistic, and the other Jehovistic, were the main sources of the book, though he did not altogether exclude others. Since his time the theory has been maintained, but variously modified, by one class of critics, whilst another class has strenuously opposed it. De Wette, Knobel, Tuch, Delitzsch, &c., think that *two* original documents may be traced throughout the work, the Jehovist, who was also probably the editor of the book in its present form, having designed merely to complete the work of the Elohist. Hengstenberg, Keil, Baumgarten, and Hävernick contend for a single author. The great weight of probability lies on the side of those who argue for the existence of different documents. The evidence already alluded to is strong; and nothing can be more natural than that an honest historian should seek to make his work more valuable by embodying in it the most ancient records of his race: the

Digitized by Google

higher the value which they possessed in his eyes, the more anxious would he be to preserve them in their original form. Those particularly in the earlier portion of the work were perhaps simply transcribed. In one instance we have what looks like an omission, ii. 4, where the inscription seems to promise a larger cosmogony.[a] Here and there throughout the book we meet with a later remark, intended to explain or supplement the earlier monument. And in some instances there seems to have been so complete a fusion of the two principal documents, the Elohistic and the Jehovistic, that it is no longer possible accurately to distinguish them. The later writer, the Jehovist, instead of transcribing the Elohistic account intact, thought fit to blend and intersperse with it his own remarks. We have an instance of this, according to Hupfeld (*Die Quellen der Genesis*), in chap. vii.: vv. 1–10 are usually assigned to the Jehovist; but whilst he admits this, he detects a large admixture of Elohistic phraseology and coloring in the narrative. But this sort of criticism it must be admitted is very doubtful. Many other instances might be mentioned where there is the same difficulty in assigning their own to the several authors. Thus in sections generally recognized as Jehovistic, chaps. xii., xiii., xix., here and there a sentence or a phrase occurs, which seems to betray a different origin, as xii. 5, xiii. 6, xix. 29. These anomalies, however, though it may be difficult to account for them, can hardly be considered of sufficient force entirely to overthrow the theory of independent documents which has so much, on other grounds, to recommend it. And certainly when Keil, Hengstenberg and others, who reject this theory, attempt to account for the use of the Divine names, on the hypothesis that the writer designedly employed the one or the other name according to the subject of which he was treating, their explanations are often of the most arbitrary kind. As a whole, the documentary character of Genesis is so remarkable when we compare it with the later books of the Pentateuch, and is so exactly what we might expect, supposing a Mosaic authorship of the whole, that, whilst contending against the theory of different documents in the later portions, we feel convinced that this theory is the only tenable one in Genesis.

Of the two principal documents, the Elohistic is the earlier. So far as we can detach its integral portions, they still present the appearance of something like a connected work. This has been very well argued by Tuch (*Die Genesis, Allg. u. Einl.* li.–lxv.), as well as by Hupfeld (*Die Quellen der Genesis*), Knobel, and Delitzsch.

Hupfeld, however, whose analysis is very careful, thinks that he can discover traces of *three* original records, an earlier Elohist, a Jehovist, and a later Elohist. These three documents were, according to him, subsequently united and arranged by a fourth person, who acted as editor of the whole. His argument is ingenious and worthy of consideration, though it is at times too elaborate to be convincing.

The following table of the use of the Divine Names in Genesis will enable the reader to form his own judgment as to the relative probability of the hypotheses above mentioned. Much as commentators differ concerning some portions of the book, one pronouncing passages to be Elohistic, which another with equal confidence assigns to the Jehovist, the fact is certain that whole sections are characterized by a separate use of the Divine names.

(1.) Sections in which Elohim is found exclusively, or nearly so: Chap. i.–ii. 3 (creation of heaven and earth); v. (generations of Adam, except ver. 29, where Jehovah occurs); vi. 9–22 (generations of Noah); vii. 9–24 (the entering into the ark), but Jehovah in ver. 16; viii. 1–19 (end of the flood); ix. 1–17 (covenant with Noah); xvii. (covenant of circumcision), where, however, Jehovah occurs once in ver. 1, as compared with Elohim seven times; xix. 29–38 (conclusion of Lot's history); xx. (Abraham's sojourn at Gerar), where again we have Jehovah once and Elohim four times, and ha-Elohim twice; xxi. 1–21 (Isaac's birth and Ishmael's dismissal), only xxi. 1, Jehovah; xxi. 22–34 (Abraham's covenant with Abimelech), where Jehovah is found once; xxv. 1–18 (sons of Keturah, Abraham's death and the generations of Ishmael), Elohim once; xxvii. 46–xxviii. 9 (Jacob goes to Haran, Esau's marriage), Elohim once, and El Shaddai once; xxxi. (Jacob's departure from Laban), where Jehovah twice [namely, vv. 3 and 49]; xxxiii.–xxxvii. (Jacob's reconciliation with Esau, Dinah and the Shechemites, Jacob at Bethel, Esau's family, Joseph sold into Egypt). It should be observed, however that in large portions of this section the Divine name does not occur at all. (See below.) xl.–l. (history of Joseph in Egypt): here we have Jehovah once only (xlix. 18). [Ex. i.–ii. (Israel's oppression in Egypt, and birth of Moses as deliverer)].

[a] * This remark is unnecessary. In Gen. ii. 4 ff. there is a further account of creation, more particular so far as relates to the first human pair and the provisions made for them. The superscription, "These are the generations of the heavens and of the earth," is specially adapted to such an account. We should not expect from it an account of the creation of the heavens and the earth, or "a larger cosmogony" in any sense. The Hebrew word rendered "generations" properly means *births*, and by metonymy a record of births, a family record. [GENEALOGY; GENERATIONS, Amer. ed.] In such a record incidents of family history would naturally be interwoven (as in ch. v., especially vv. 24, 29, and in xi. 27–32, xxv. 1–8,, and hence the word came to express simply a record of such incidents. Thus in vi 9 ff. and under the heading "These are the generations of Noah," instead of a list of births we find only the chief events of his own life and times. In xxv. 19 this heading is prefixed to the brief family history of Isaac, and in xxxvi 1 to that of Esau, and in xxxvii. 2 to that of Jacob. The birth or origin of the one whose name stands as the subject of this word is seldom included.

Accordingly, we should expect here, under the superscription, "These are the generations of the heavens and of the earth," not an account of their origin, but a continuation and further development of their history, in events connected with them as parts of the same divine plan. And this is what we find. The account of creation is here continued, but with special reference to man, for whom the heavens and the earth were made and in whose history the design of their creation is fully unfolded. Hence all the facts here related are presented from a point of view which has him for its object, and hence the order of sequence here observed in narrating them.

The words, "when they were created," etc., show that the following account belongs to the same period of time as the preceding one, and is a continuation of it. In ver. 5, where the account commences we should translate: "And there was yet no plant of the field in the earth, and no herb of the field had yet sprung up." T. J. C.

(2.) Sections in which Jehovah occurs exclusively, or in preference to Elohim; iv. (Cain and Abel, and Cain's posterity), where Jehovah 10 times and Elohim only once; vi. 1–8 (the sons of God and the daughters of men, etc.); vii. 1–9 (the entering into the ark), but Elohim once, ver. 9; viii. 20–22 (Noah's altar and Jehovah's blessing); ix. 18–27 (Noah and his sons); x. (the families of mankind as descended from Noah); xi. 1–9 (the confusion of tongues); xii. 1–20 (Abram's journey first from Haran to Canaan, and then into Egypt); xiii. (Abraham's separation from Lot); xv. (Abram's faith, sacrifice, and covenant); xvi. (Hagar and Ishmael), where אֵל רֳאִי once; xviii.–xix. 28 (visit of the three angels to Abram, Lot, destruction of Sodom and Gomorrah) xxiv. (betrothal of Rebekah and Isaac's marriage); xxv. 19–xxvi. 35 (Isaac's sons, his visit to Abimelech, Esau's wives); xxvii. 1–40 (Jacob obtains the blessing), but in ver. 28 ha-Elohim; xxx. 25–43 (Jacob's bargain with Laban), where however Jehovah only once; xxxviii. (Judah's incest); xxxix. (Jehovah with Joseph in Potiphar's house and in the prison); [Ex. iv. 18–31 (Moses' return to Egypt); v. (Pharaoh's treatment of the messengers of Jehovah).]

(3.) The section Gen. ii. 4–iii. 24 (the account of Paradise and the Fall) is generally regarded as Jehovistic, but it is clearly quite distinct. The Divine name as there found is not Jehovah, but Jehovah Elohim (in which form it only occurs once beside in the Pentateuch, Ex. ix. 30), and it occurs 20 times: the name Elohim being found three times in the same section, once in the mouth of the woman, and twice in that of the serpent.

(4.) In Gen. xiv. the prevailing name is El-Elyon (A. V. "the most high God"), and only once, in *Abram's* mouth, "Jehovah the most high God," which is quite intelligible.

(5.) Some few sections are found in which the names Jehovah and Elohim seem to be used promiscuously. This is the case in xxii. 1–19 (the offering up of Isaac); xxviii. 10–22 (Jacob's dream at Bethel): xxix. 31–xxx. 24 (birth and naming of the eleven sons of Jacob): and xxxii. (Jacob's wrestling with the angel); [Ex. iii. 1–iv. 17 (the call of Moses).]

(6.) It is worthy of notice that of the other Divine names Adonai is always found in connection with Jehovah, except Gen. xx. 4; whereas El, El-Shaddai, etc., occur most frequently in the Elohistic sections.

(7.) In the following sections neither of the Divine names occur: — Gen. xi. 10–32, xxii. 20–24, xxiii., xxv. 27–34, xxvii. 40–45, xxix. 1–30, xxxiv., xxxvi., xxxvii., xl., Ex. ii. 1–22.

D. *Authenticity.* — Luther used to say, "Nihil pulcrius Genesi, nihil utilius." But hard critics have tried all they can to mar its beauty and to detract from its utility. In fact the bitterness of the attacks on a document so venerable, so full of undying interest, hallowed by the love of many generations, makes one almost suspect that a secret malevolence must have been the mainspring of hostile criticism. Certain it is that no book has met with more determined and unsparing assailants. To enumerate and to reply to all objections would be impossible. We will only refer to some of the most important.

(1.) The story of Creation, as given in the first chapter, has been set aside in two ways: first by placing it on the same level with other cosmogonies which are to be found in the sacred writings of all nations; and next, by asserting that its statements are directly contradicted by the discoveries of modern science.

Let us glance at these two objections.

(*a.*) Now when we compare the Biblical with all other known cosmogonies, we are immediately struck with the great *moral* superiority of the former. There is no confusion here between the Divine Creator and his work. God is before all things, God creates[a] all things; this is the sublime assertion of the Hebrew writer. Whereas all the cosmogonies of the heathen world err in one of two directions. Either they are Dualistic, that is, they regard God and matter as two eternal co-existent principles; or they are Pantheistic, *i. e.* they confound God and matter, making the material universe a kind of emanation from the great Spirit which informs the mass. Both these theories, with their various modifications, whether in the more subtle philosophemes of the Indian races, or in the rougher and grosser systems of the Phœnicians and Babylonians, are alike exclusive of the idea of creation. Without attempting to discuss in anything like detail the points of resemblance and difference between the Biblical record of creation and the myths and legends of other nations, it may suffice to mention certain particulars in which the superiority of the Hebrew account can hardly be called in question. First, the Hebrew story alone clearly acknowledges the personality and unity of God. Secondly, here only do we find recognized a distinct act of creation, by creation being understood the calling into existence out of nothing the whole material universe. Thirdly, here only is there a clear intimation of that great law of progress which we find everywhere observed. The *order* of creation as given in Genesis is the gradual progress of all things from the lowest and least perfect to the highest and most completely developed forms. Fourthly, there is the fact of a relation between the personal Creator and the work of his fingers, and that relation is a relation of Love: for God looks upon his creation at every stage of its progress and pronounces it very good. Fifthly, there is throughout a sublime simplicity, which of itself is characteristic of a history, not of a myth or of a philosophical speculation.

(*b.*) It would occupy too large a space to discuss at any length the objections which have been urged from the results of modern discovery against the literal truth of this chapter. One or two remarks of a general kind must suffice. It is argued, for instance, that light could not have existed before the sun, or at any rate not that kind of light which would be necessary for the support of vegetable life; whereas the Mosaic narrative makes light created on the first day, trees and plants on the third, and the sun on the fourth. To this we may reply, that we must not too hastily build an argument upon our ignorance. We do not *know* that the existing laws of creation were in operation when

[a] This is capable of proof, not from the meaning of the root בָּרָא, which does not necessarily mean creation out of nothing (though it is never used but of a Divine act), but from the whole structure of the sentence. In the beginning — put that beginning when you will — God, already existent, *created*. But at the time of the Divine act, nothing but God, according to the sacred writer, existed.

Digitized by Google

the creative fiat was first put forth. The very act of Creation must have been the introducing of laws; but when the work was finished, those laws may have suffered some modification. Men are not now created in the full stature of manhood, but are born and grow. Similarly the lower ranks of being might have been influenced by certain necessary conditions during the first stages of their existence, which conditions were afterwards removed without any disturbance of the natural functions. And again it is not certain that the language of Genesis can only mean that the sun was *created* on the fourth day. It *may* mean that then only did that luminary become visible to our planet.

With regard to the six days, no reasonable doubt can exist that they ought to be interpreted as six periods, without defining what the length of those periods is. No one can suppose that the Divine rest was literally a rest of 24 hours. On the contrary, the Divine Sabbath still continues. There has been no *creation* since the creation of man. This is what Genesis teaches, and this geology confirms. But God, after six periods of creative activity, entered into that Sabbath in which his work has been not a work of Creation but of Redemption.[a]

No attempt, however, which has as yet been made to identify these six periods with corresponding geological epochs can be pronounced satisfactory.[b] On the other hand, it seems rash and premature to assert that no reconciliation is possible.[c] What we ought to maintain is, that no reconciliation is necessary. It is certain that the author of the first chapter of Genesis, whether Moses or some one else, knew nothing of geology or astronomy. It is certain that he made use of phraseology concerning physical facts in accordance with the limited range of information which he possessed. It is also certain that the Bible was never intended to reveal to us knowledge of which our own faculties rightly used could put us in possession. And we have no business, therefore, to expect anything but popular language in the description of physical phenomena. Thus, for instance, when it is said that by means of the firmament God divided the waters which were above from those which were beneath, we admit the fact without admitting the implied explanation. The *Hebrew* supposed that there existed vast reservoirs above him corresponding to the "waters under the earth." *We* know that by certain natural processes the rain descends from the clouds. But the *fact* remains the same that there are waters above as well as below.

Further investigation may perhaps throw more light on these interesting questions. Meanwhile it may be safely said that modern discoveries are in no way opposed to the great outlines of the Mosaic cosmogony. That the world was created in six periods, that creation was by a law of gradual advance beginning with inorganic matter, and then advancing from the lowest organisms to the highest, that since the appearance of man upon the earth no new species have come into being; these are statements not only not disproved, but the two last of them, at least, amply confirmed by geological research.[d]

(2.) To the description of Paradise, and the history of the Fall and of the Deluge, very similar remarks apply. All nations have their own version of these facts, colored by local circumstances and embellished according to the poetic or philosophic spirit of the tribes among whom the tradition has taken root. But if there be any one original source of these traditions, any root from which they diverged, we cannot doubt where to look for it. The earliest record of these momentous facts is that preserved in the Bible. We cannot doubt this, because the simplicity of the narrative is greater than that of any other work with which we are acquainted. And this simplicity is an argument at once in favor of the greater antiquity and also of the greater truthfulness of the story. It is hardly possible to suppose that traditions so widely spread over the surface of the earth as are the traditions of the Creation, the Fall, and the Deluge, should have no foundation whatever in fact. And it is quite as impossible to suppose that that version of these facts, which in its moral and religious aspect is the purest, is not also, to take the lowest ground, the most likely to be true.

Opinions have differed whether we ought to take the story of the Fall in Gen. iii. to be a literal statement of facts, or whether, with many expositors since the time of Philo, we should regard it as an allegory, framed in childlike words as befitted the childhood of the world, but conveying to us a deeper spiritual truth. But in the latter case we ought not to deny that spiritual truth. Neither should we overlook the very important bearing which this narrative has on the whole of the subsequent history of the world and of Israel. Delitzsch well says, "The story of the Fall, like that of the Creation, has wandered over the world. Heathen nations have transplanted and mixed it up with their geography, their history, their mythology, although it has never so completely changed form and color and spirit, that you cannot recognize it. Here, however, in the Law, it preserves the character of a universal, human, world-wide fact: and the groans of Creation, the Redemption that is in Christ Jesus, and the heart of every man, conspire in their testimony to the most literal truth of the narrative."

The universality of the Deluge, it may be proved, is quite at variance with the most certain facts of geology. But then we are not bound to contend for a universal deluge. The Biblical writer himself, it is true, supposed it to be universal, but that was

[a] Hence the force of our Lord's argument, very generally misunderstood, in John v. 17.

[b] One of the most elaborate of these is by the late Hugh Miller, in his *Testimony of the Rocks*. No man had a better right to be heard, both as a profound geologist and as a sincere Christian. And it is impossible not to admire the eloquence and ingenuity with which he attempts to reconcile the story of Genesis with the story of the rocks. But his argument is far from convincing. And he only attempts to reconcile *three* of the Mosaic days with the three great periods of geology. Another writer, Mr. M'Causland, who has adopted his view, and tried to extend it to the six days, does not seem entitled to speak with authority on the geological question.

[c] As Professor Powell does, in his *Order of Nature*.

[d] I am aware it may be said that the trilobite which is discovered in the lowest fossiliferous rocks is not the lowest type of organic being: but lower forms may have perished without leaving traces behind them. And if not, manifestly in such a narrative as that of Genesis we ought not to expect *minute* accuracy: if the main it is certainly true that, as we advance from the lower to the higher strata, we find a corresponding advance in organic deposits.

Digitized by Google

only because it covered what was then the known world: there can be no doubt that it did extend to all that part of the world *which was then inhabited*: and this is enough, on the one hand, to satisfy the terms of the narrative, and on the other, the geological difficulty, as well as other difficulties concerning the ark and the number of animals, disappear with this interpretation. [See NOAH.]

(3.) When we come down to a later period in the narrative, where we have the opportunity of testing the accuracy of the historian, we find it in many of the most important particulars abundantly corroborated.

Whatever interpretation we may be disposed to put on the story of the confusion of tongues and the subsequent dispersion of mankind, there is no good ground for setting it aside. Indeed, if the reading of a cylinder recently discovered at *Birs Nimrûd*[a] may be trusted, there is independent evidence corroborative of the Biblical account. But at any rate the other versions of this event are far less probable (see these in Joseph. *Antiq.* i. 4, § 3; Euseb. *Præp. Ev.* ix. 14). The later myths concerning the wars of the Titans with the gods are apparently based upon this story, or rather upon perversions of it. But it is quite impossible to suppose, as Kalisch does (*Genesis*, p. 313), that "the Hebrew historian converted that very legend into a medium for solving a great and important problem." There is not the smallest appearance of any such design. The legend is a perversion of the history, not the history a comment upon the legend. One of the strongest proofs of the *bonâ fide* historical character of the earlier portion of Genesis is to be found in the valuable ethnological catalogue contained in chap. x. Knobel, who has devoted a volume[b] to the elucidation of this document, has succeeded in establishing its main accuracy beyond doubt, although, in accordance with his theory as to the age of the Pentateuch, he assigns to it no greater antiquity than between 1200 and 1000 B. C.

(4.) As to the fact implied in this dispersion, that all languages had one origin, philological research has not as yet been carried far enough to lead to any very certain result. Many of the greatest philologists[c] contend for real affinities between the Indo-European and the Semitic tongues. On the other hand, languages like the Coptic (not to mention many others) seem at present to stand out in complete isolation. And the most that has been effected is a classification of languages in three great families. This classification, however, is in exact accordance with the threefold division of the race in Shem, Ham, and Japhet, of which Genesis tells us.

(5.) Another fact which rests on the authority of the earlier chapters of Genesis, the derivation of the whole human race from a single pair, has been abundantly confirmed by recent investigations. For the full proof of this it is sufficient to refer to Prichard's *Physical History of Mankind*, in which the subject is discussed with great care and ability.

(6.) It is quite impossible, as has already been said to notice all the objections made by hostile critics at every step as we advance. But it may be well to refer to one more instance in which suspicion has been cast upon the credibility of the narrative. Three stories are found in three distinct portions of the book, which in their main features no doubt present a striking similarity to one another. See xii. 10–20, xx., xxvi. 1–11. These, it is said, besides containing certain improbabilities of statement, are clearly only three different versions of the same story.

It is of course *possible* that these are only different versions of the same story. But is it psychologically so very improbable that the same incident should happen three times in almost the same manner? All men repeat themselves, and even repeat their mistakes. And the repetition of circumstances over which a man has no control, is sometimes as astonishing as the repetition of actions which he can control. Was not the state of society in those days such as to render it no way improbable that Pharaoh on one occasion, and Abimelech on another, should have acted in the same selfish and arbitrary manner? Abraham too *might* have been guilty twice of the *same* sinful cowardice; and Isaac might, in similar circumstances, have copied his father's example, calling it wisdom. To say, as the most recent expositor of this book has done, that the object of the Hebrew writer was to represent *an idea*, such as "the sanctity of matrimony," that "in his hands, the facts are subordinated to ideas," etc., is to cut up by the very roots the historical character of the book. The mythical theory is preferable to this; for that leaves a substratum of fact, however it may have been embellished or perhaps disfigured by tradition.[d]

There is a further difficulty about the age of Sarah, who at the time of the first occurrence must have been 65 years old, and the freshness of her beauty, therefore, it is said, long since faded. In reply it has been argued that as she lived to the age of 127, she was only then in middle life; that consequently she would have been at 65 what a woman of modern Europe would be at 35 or 40, an age at which personal attractions are not necessarily impaired.

But it is a minute criticism, hardly worth answering, which tries to cast suspicion on the veracity of the writer, because of difficulties such as these. The positive evidence is overwhelming in favor of his credibility. The patriarchal tent beneath the shade of some spreading tree, the wealth of flocks and herds, the free and generous hospitality to strangers, the strife for the well, the purchase of the cave of Machpelah for a burial-place, — we feel at once that these are no inventions of a later writer in more civilized times. So again, what can be more life-like, more touchingly beautiful, than the picture of Hagar and Ishmael, the meeting of Abraham's servant with Rebekah, or of Jacob with Rachel at the well of Haran? There is a fidelity in the minutest incidents which convinces us that we are reading history, not fable. Or can anything more completely transport us into patriarchal times than the battle of the kings and the interview between Abraham and Melchisedec? The very opening of the story, "In the days of Amraphel," etc., reads like the work of some old chronicler who

[a] As given by M. Oppert in a paper read before the Royal Society of Literature.

[b] *Die Völkertafel der Genesis.*

[c] As Bopp, Lepsius, Burnouf, &c. See Renan, *Histoire des Langues Sémitiques*, l. v. c. 2, 3.

[d] If the view of Delitzsch is correct, that xii. 10–20 is Jehovistic; xx., Elohistic (with a Jehovistic addition, ver. 18); xxvi. 1–13, Jehovistic, but taken from written documents, this may to some minds explain the repetition of the story

lived not far from the time of which he speaks. The archaic forms of names of places, Bela for Zoar; Chatzatzon Tamar for En-gedi; Emek Shaveh for the King's Vale; the Vale of Siddim as descriptive of the spot which was afterwards the Dead Sea; the expression "Abram the Hebrew;" are remarkable evidences of the antiquity of the narrative. So also are the names of the different tribes who at that early period inhabited Canaan; the Rephaim, for instance, of whom we find in the time of Joshua but a weak remnant left (Josh. xiii. 12), and the Susim, Emim, Chorim, who are only mentioned beside in the Pentateuch (Deut. ii. 10, 12). Quite in keeping with the rest of the picture is Abraham's "arming his trained servants" (xiv. 14) — a phrase which occurs nowhere else — and above all the character and position of Melchisedec. "Simple, calm, great, comes and goes the priest-king of the divine history." The representations of the Greek poets, says Creuzer (*Symb.* iv. 378), fall very far short of this. And as Hävernick justly remarks, such a person could be no theocratic invention; for the union of the kingly and priestly offices in the same person was no part of the theocracy. Lastly, the name by which he knows God, "the most high God, possessor of heaven and earth," occurs also in the Phœnician religions, but not amongst the Jews, and is again one of those slight but accurate touches which at once distinguishes the historian from the fabulist.

Passing on to a later portion of the book we find the writer evincing the most accurate knowledge of the state of society in Egypt. The Egyptian jealousy of foreigners, and especially their hatred of shepherds; the use of interpreters in the court (who, we learn from other sources, formed a distinct caste); the existence of caste; the importance of the priesthood; the means by which the land which had once belonged to free proprietors passed into the hands of the king; the fact that even at that early time a settled trade existed between Egypt and other countries, are all confirmed by the monuments or by later writers. So again Joseph's priestly dress of fine linen, the chain of gold round his neck, the chariot on which he rides, the body-guard of the king, the rites of burial and embalming (though spoken of only incidentally) are spoken of with a minute accuracy, which can leave no doubt on the mind as to the credibility of the historian.

E. *Author and date of composition.* — It will be seen, from what has been said above, that the book of Genesis, though containing different documents, owes its existing form to the labor of a single author, who has digested and incorporated the materials he found ready to his hand. A modern writer on history, in the same way, might sometimes transcribe passages from ancient chronicles, sometimes place different accounts together, sometimes again give briefly the substance of the older document, neglecting its form.

But it is a distinct inquiry who this author or editor was. This question cannot properly be discussed apart from the general question of the authorship of the entire Pentateuch. We shall therefore reserve this subject for another article. [PENTATEUCH.] J. J. S. P.

* The older works on Genesis, and some of the later, are mentioned at the close of the article PENTATEUCH. The principal later works on Genesis are the following: Schumann, *Geneses*, 1829; Tiele, *Das erste Buch Mose's*, 1836; Tuch, *Die Genesis*, 1839; Drechsler, *Die Einheit und Ächtheit der Genesis*, 1838; Hengstenberg, *Die Bücher Mose's und Ægypten*, 1841, trans. by R. D. C. Robbins *Egypt and the Books of Moses*, Andover, 1843 Baumgarten, *Theolog. Commentar zum Pentateuch*, 1843; Schröder, *Das erste Buch Mose*, 1844; De Sola and Lindenthal, *Heb. Scriptures with New Translation and Notes*, 1844; Knobel, *Die Völkertafel der Genesis*, 1850; Keil, *über Gen.* vi. 1–4 (in *Zeitschrift für luth. Theol. u. Kirche*, 1855); Kalisch, *Hist. and Crit. Commentary on the Old Test., Exodus, Genesis, Leviticus*, 1855–1867; Wright, *The Book of Genesis in Hebrew, revised text*, etc., 1859; Reinke, *Die Schöpfung der Welt*, 1859; Knobel, *Die Genesis erklärt* (Lief. xi. of the *Kurzgef. exeget. Handbuch*), 2te Aufl. 1860; Auberlen, *Die göttliche Offenbarung*, 1861 (the portion relating to the first eleven chapters trans. in the *Bibl. Sacra*, 1865, pp. 395–439); Delitzsch *Comm. über die Genesis*, 3te Ausg. 1860; Murphy *Critical and Exegetical Commentary, with a new translation*, Genesis, 1863, Exodus, 1866; Böttcher, *Neue exeget.-krit. Ährenlese*, Abth. i. 1863, Lange, *Die Genesis*, 1864 (Amer. ed. by Prof. Tayler Lewis, in press, 1867); Bosizio, *Das Hexaemeron und die Geologie*, 1865; Schultz, *Die Schöpfungsgeschichte nach Naturwissenschaft und Bibel*, 1865; Keil (in Keil and Delitzsch's *Bibl. Comm.*), *Genesis und Exodus*, 2te Aufl. 1866; Quarry, *Genesis and its Authorship*, 1866; Hirsch, *Die Genesis übersetzt und erläutert*, 1867; Conant, *The Book of Genesis, revised English version, with explanatory and philological notes* (in press, 1867).

T. J. C.

GENNE'SAR, THE WATER OF (τὸ ὕδωρ Γεννησάρ; [Alex. Sin.^{ca} του Γ.; Sin.^{1} του Γεννησαι;] Joseph. *Ant.* xiii. 5, § 7, τὰ ὕδατα τὰ Γεννησάρα λεγ.: *Aqua Genesar*), 1 Macc. xi. 67. [GENNESARET.]

GENNES'ARET, LAND OF (ἡ γῆ Γεννησαρέτ: *terra Genesar, terra Genesareth*). After the miracle of feeding the five thousand, our Lord and his disciples crossed the Lake of Gennesaret and came to the other side, at a place which is called "the land of Gennesaret" (Matt. xiv. 34; Mark vi. 53). It is generally believed that this term was applied to the fertile crescent-shaped plain on the western shore of the lake, extending from *Khan Minyeh* on the north to the steep hill behind *Mejdel* on the south, and called by the Arabs *el-Ghuweir* "the little Ghor." The description given by Josephus (*B. J.* iii. 10, § 8) would apply admirably to this plain. He says that along the lake of Gennesaret there extends a region of the same name, of marvelous nature and beauty. The soil was so rich that every plant flourished, and the air so temperate that trees of the most opposite natures grew side by side. The hardy walnut, which delighted in cold, grew there luxuriantly; there were the palm-trees that were nourished by heat, and fig-trees and olives beside them, that required a more temperate climate. Grapes and figs were found during ten months of the year. The plain was watered by a most excellent spring called by the natives Capharnaum, which was thought by some to be a vein of the Nile, because a fish was found there closely resembling the *coracinus* of the lake of Alexandria. The length of the plain along the shore of the lake was thirty stadia, and its breadth twenty. Making every allowance for the coloring given by the historian to his description, and for the neglected condition of *el-Ghuweir* at

the present day, there are still left sufficient points of resemblance between the two to justify their being identified. The dimensions given by Josephus are sufficiently correct, though, as Dr. Thomson remarks (*Land and Book*, p. 348), the plain "is a little longer than thirty, and not quite twenty furlongs in breadth." Mr. Porter (*Handb.* p. 429) gives the length as three miles, and the greatest breadth as about one mile.[a] It appears that Professor Stanley either assigns to "the land of Gennesaret" a wider signification, or his description of its extent must be inaccurate; for, after calling attention to the tropical vegetation and climate of the western shores of the lake, he says: "This fertility . . . reaches its highest pitch in the one spot on the western shore where the mountains, suddenly receding inland, leave a level plain of five miles wide, and six or seven miles long. This plain is 'the land of Gennesareth'" (*S. & P.* p. 374). Still his description goes far to confirm in other respects the almost exaggerated language in which Josephus depicts the prodigality of nature in this region. "No less than four springs pour forth their almost full-grown rivers through the plain; the richness of the soil displays itself in magnificent corn-fields; whilst along the shore rises a thick jungle of thorn and oleander, abounding in birds of brilliant colors and various forms." Burckhardt tells us that even now the pastures of *Khan Minyeh* are proverbial for their richness (*Syria*, p. 319).

In the *Journal of Classical and Sacred Philology* (ii. 290–308) Mr. Thrupp has endeavored to show that the land of Gennesaret was not *el-Ghuweir*, but the fertile plain *el-Bathhah* on the northeastern side of the lake. The dimensions of this plain and the character of its soil and productions correspond so far with the description given by Josephus of the land of Gennesaret as to afford reasonable ground for such an identification. But it appears from an examination of the narrative in the Gospels, that, for other reasons, the plain *el-Bathhah* is not the land of Gennesaret, but more probably the scene of the miracle of feeding the five thousand. After delivering the parable of the Sower, our Lord and his disciples left Capernaum, near which was the scene of the parable, and went to Nazareth (Matt. xiii. 54; Mark vi. 1). It was while he was here, apparently, that the news was brought him by the Apostles of the death of John the Baptist (Matt. xiv. 13; Mark vi. 30). He was still, at any rate, on the western side of the lake of Tiberias. On hearing the intelligence "he departed thence by ship into a desert place apart" (Matt. xiv. 13; Mark vi. 32), the "desert place" being the scene of the miraculous feeding of the five thousand, and 'belonging to the city called Bethsaida" (Luke ix. 10). St. John (vi. 1) begins his account of the miracle by saying that "Jesus went *over* the sea of Galilee" — an expression which he could not have used had the scene of the miracle lain on the western shore of the lake, as Mr. Thrupp supposes, at *el-Ghuweir*. It seems much more probable that it was on the eastern or northeastern side After the miracle Jesus sent his disciples in the boat to the other side (Matt xiv. 22), towards Bethsaida (Mark vi. 45), in order to go to Capernaum (John vi. 17), where he is found next day by the multitudes whom he had fed (John vi. 24, 25); boat came to shore in the land of Gennesar seems, therefore, perfectly clear, whatever actual positions of Capernaum and the scene miracle, that they were on *opposite* sides lake, and that Capernaum and the land of G aret were close together on the *same* side.

Additional interest is given to the land o nesaret, or *el-Ghuweir*, by the probability t scenery suggested the parable of the Sower. admirably described by Professor Stanley. " was the undulating corn-field descending water's edge. There was the trodden pa running through the midst of it, with no fe hedge to prevent the seed from falling her there on either side of it, or upon it; itself with the constant tramp of horse and mul human feet. There was the 'good' rich soil, distinguishes the whole of that plain and its borhood from the bare hills elsewhere desce into the lake, and which, where there is no ruption, produces one vast mass of corn. was the rocky ground of the hillside protr here and there through the corn-fields, as else through the grassy slopes. There were the bushes of thorn — the 'Nabk,' that kind of tradition says that the Crown of Thorns was — springing up, like the fruit-trees of the mo land parts, in the very midst of the waving wh (*S. & P.* p. 426). W. A. W.

* The interest of this plain arises especially its connection with the life and ministry of our L Ebrard discusses anew the question whether C naum was situated here or not, in the *Theol. dien und Kritiken* for 1867, pp. 723–741. He ad that the fountain of Capernaum (Καφαρναούμ) tioned by Josephus (*B. J.* iii. 10, § 8) is no d the Round Fountain (*'Ain Mudawwarah*) near south end of the plain, but maintains that the of Capernaum itself, which he identifies with Κεφαρνόμη of Josephus (*Vit.* 72), was at *Tell H* at the north end of the lake and beyond the pl He replies very pertinently to Dr. Robinson's jections to regarding the Round Fountain as one intended by the Jewish historian. But on other hand, this concession as to the situation the fountain of Capernaum has been supposed most writers to determine the situation of the to of Capernaum; [b] for it is not easy to believe tha fountain and a town, both known by the same co mon name, would be at such a distance from e other. Ebrard lays special stress on the termi tion of the ancient name as still heard in *H* and also on the fact that important ruins are fo at *Tell Hûm*, which are not found at *'Ain Mud wurah*. These are points worthy of consideratio He urges also that Josephus, in speaking of t fountain (Καφαρναούμ) as "so called by the peo of that region," means to express a doubt wheth it was rightly so called. It is not a necessary infe ence, for Josephus might very naturally expre himself in that manner because he was writing a distant land for foreign readers. The articl aside from its more direct object, is valuable for th incidental information which it furnishes respectin the topography of the western shore of the lak [See CAPERNAUM, Amer. ed.] H.

a * This is also Dr. Robinson's estimate (*Phys Geogr.* p. 78). H

b * Yet a few others also (see *e. g.* Wilson's *Lands of the Bible*, ii. 139 ff.) have thrown out this idea of separation of the fountain and the town from eac other. h.
